but almost a ruin. It has numerous churches, a convent,
and a considerable trade in corn, hemp and flax. P. 8000.

NOVI—1. A tn. in Hungary and 17 m. N. Modena, pleasantly
situated and well built. Pop. 2400.—2. A market to
Austria, Croatia, on the sea-coast, 45 m. S. W. Carlsbad;
with a castle, church, Pauline monastery and a small harbor.
Pop. 2000.—3. [or *Castellum Novi*] A tn. Austria, Dalmatia,
carols and 24 m. from Cattaro, cap. dist. with a l. Catholic
church, a courthouse, manufactures of brassware, a mineral
spring, and some trade. 4. (Roman) A tn. European Turkey
prov. Bosnia, 150 m. S. E. Bosna-Sani with some warm
baths, and a small trade. Pop. 8000 to 10,000.

NOVI a tn. Italy Piedmont, div. and 24 m. N. W.
Genoa, cap. prov. N side of the Apennines. It is sur-
rounded by an ancient wall once flanked with towers, and
enclosed by a fosse. It has several irregular but tolerably
spacious streets, a handsome square, adorned with a beautiful
marble fountain, an ordinary court of law, a court of com-
merce, and several important public offices. There are churches,
one of these a fine ancient structure, with a facade flanked by
two towers and two monasteries a gymnasium with a library
a handsome new theatre, a founding hospital, manufactures
of fusian bombazine, hemp, cotton and mixed goods, earthen
ware, and majolica. numerous silk mills, dye-works, and an
important trade in silk, for which Novi is
perhaps the largest mart in the kingdom.
Pop. 10,278.—The ravine, about 88 m.
long E. to W., and about 9 m. broad, is hilly
throughout and in the S. is covered by lofty
summits of the Apennines. The principal
rivers are the Savina, Orba, Lemone, Fiole,
and Eochera. Soil generally this, and of
no great fertility many of the inhabitants
emigrate annually to procure the means of
subsistence. The most important product
is silk, which is here raised in large quan-
tities and of the finest quality, and is much
in demand, both for London and Lyons.
Pop. 41,847.

NOVIGRAD a market in Austria,
Croatia, generalship Warasdin, cap. dist.,
on the Komarom, about 2 tn. from
Kopetowitz, with a church and a castle.
Pop. 3500.

NOVILLE Lps. Bosn. a vil. and com.
Belgium, prov. and 9 m. N. E. Namur;
with three bleachfields, an oil and a flour
mills. Pop. (agricultural) 1121.

NOVITA, a tn. New Granada, dep.
Cauca, cap. prov. Chocó, r. bank Tambo,
125 m. W. by N Bogota; lat. 8° 42' N. J.
Houses mostly of wood; population chiefly
negroes, mulattoes, and samboes, employed in working the
gold mines. Pop. 1000.

NOVGOROD, MONASTERY OF THE ASSUMPTION.
From *Illustrations*, Voyage Pitagore de Saint.

large extent of surface, indicating it was in former impet-
uous, and presents comparative insubstantiality. It contains a
great number of mean houses or rather huts, and has streets

negroes, mulattoes, and samboes, employed in working the
gold mines. Pop. 1000.

NOVO, a river, Brazil, which rises in prov. Minas-Geraes, flows E. between the rivers Para and Araguaia, and in a course nearly parallel with them and, a little above their junction, joins the W. bank of the latter. The united streams form the Parahyba. The channel of the Novo is so rocky throughout as to be nowhere navigable.

NOVO-ARCANJELUS, an isl., N. Pacific. See **NOVA**.

NOVO-DUMONAI, a to Russia. See **DUMONAI**.

NOVO-DUMONAI, a seaport to and fort, S.W. Africa, belonging to the Portuguese, coast of S. Guinea, lat. 11° 53' S. lon. 15° 42' E. The town occupies the summit of a rock, and is inhabited chiefly by free negroes.

NOVODMITRIEVSKE, a to Russia, gov. and 103 m. W.S.W. Saratov at the confluence of the Jelon and Bereznova. Pop. 2100.

NOVOGRODEK, a walled to. Russia, gov. and 80 m. E. Grodno, cap. dist., on a height washed by a small affluent of the Niemien. It is tolerably well built, has several churches, a synagogue, and gymnasium. Pop. 1200.

NOVOI CAUCAS, a to Russia. See **CAUCAS**.

NOVOI TCHERKASSK, a to Russia. See **CHERKASSK**.

NOVOKHOPEBSK, a to Russia, gov. and 108 m. E. S. E. Voronezh, cap. dist., on the Voronezh. It is enclosed by a fosse, and a rampart flanked with four bastions; and has two churches, and an hospital, some trade, and in its docks are built vessels to navigate the Black Sea. Pop. 1800.

NOVOLA, a to. and com. Naples, prov. Otranto, dist. and 7 m. W. N. W. Lecce. Pop. 8487.

NOVOMESTO, or **NOVOMESTO**, a to. Russia, gov. Orel, cap. dist., on the Irkut, with several fairs. P. 1050.

NOVOMIRGOBOD, a to Russia, gov. and 103 m. N. W. Kherson, 1 bank of the Dnieper, which below the town forms a small lake. It is the see of a bishop, has three churches, and a considerable trade in fruit. Pop. 8000.

NOVOMOSKOVSKE, a fortified in Russia, gov. and 23 m. N. E. Ekaterinodar, r. bank of the Don. Pop. 2300.

NOVOROSSIEK, a small seaport to Russia, on E. coast Black Sea, at the mouth of the Tmesos, and S. of Abjaya. The town is built on a slope rising gradually from the shore, and terminating in low heights, and is defended by two forts.

NOVORUSSIA, a to Russia, gov. and 84 m. S. Tula, on the Narutcha. Pop. 2000.

NOVOILLOV, a cape, Japan W. coast, lat. Yesso lat. 43° 14' 30" N. lon. 140° 27' 30" E. It projects about 20 m. into the sea, having Strogoff Bay N. and Suchtelen Bay S. and is only separated from Volcano Bay on the opposite side of the island by an isthmus of about 20 m.

NOVOGELLLO, a vil. Hungary, Hither Danube, co. Bors, 1 bank Danube, 4 m. from Yulovar. It has a church, and a trade in grain, wine, cattle, butter and salt. P. 1079.

NOV-CROW, an isl. China, Gulf of Tonquin, off N. E. part peninsula of Lou-tchou, lat. 20° 58' N. about 6 m. long by 5 m. wide, N. W. coast lined with rocky shoals, stretching in some places, 300 to 400 yards into the sea. The inhabitants live chiefly by fishing and piloting, and have a little trade. The harbour though difficult of entrance, is well sheltered, and has long been a noted resort of Ladrones pirates.

NOVAGLER, a to. Hindoostan, prov. Gwalidars, at the junction of the Matsoo with the Mahanuddy river, 110 m. S. W. Bumbulpor, lat. 30° 40' N. lon. 83° 43' E.

NOVEMIASTOW See **NEMIAT**.

NOVORUSSIA, or **NOVORUSSIA**, a to. Russia, gov. and 84 m. S. Tula, cap. dist., on the Zucha, with a church, and some transit trade. Pop. 1300.

NOVOTON par Eng. Suffolk 1167 as Pop. 187.

NOVOTON, a vil. Russia, 73 m. S. E. Shikharpor, lat. 27° 50' N. lon. 69° 40' E.

NOVA, a to. Spain, Galicia, prov. and 48 m. S. W. Co. Rubia, lat. 43° 50' N. lon. 8° 50' W. on the sea-coast, at the mouth of the Tambre. It has a townhouse, two schools, three churches, a hermitage, an hospital, and other charitable institutions. Curing cardines, currency, paper-making, corn-grinding, and shoe-making, are carried on. Pop. 1888.

NOVA (San Bartolomeo), a to. Spain, Catalonia, prov. and 18 m. from Barcelona, with a church, court-house, prison, small hospital, primary school, and manufactures of paper and hempen goods, a distillery, several flour-mills, and a trade in wine and brandy. Pop. 1923.

Vol. II.

NOYEN several small places, France, particularly — 1. **Noyen-sur-Seine**, a to. dep. Seine, r. bank Seine, 10 m. N. La Fliche, with a handsome Gothic church, a Romanesque market-hall, and manufactures of linen. Near it is a daily heated spring. P. 1247.

NOYERS a to. and com. France, dep. Yonne on the Seine, 22 m. E. S. E. Auxerre. It is walled, flanked with towers, and has a communal college, an hospital, manufactures of serge, coarse linen cotton stuffs, leather, wax, and common candles, and a trade in corn wine and wool. Pop. 1764.

NOYON (Latin *Nemodunum Novesium*), a to. France, dep. Oise on the Vorse, 44 m. E. N. E. Beauvais. It is a very ancient, but regularly and well built town, adorned by numerous fountains and has a cathedral, a fine Romanesque edifice, begun in the 12th, and completed on a uniform plan early in the 13th century. An ancient Hotel de Ville manufactures of leather, and tissues of hemp and flax, and a trade, chiefly in corn sent to Paris from a small harbour on the Oise, at Pont L'Evêque. Noyon was the birthplace of Jean Calvin. Pop. 5099.

NU GABIEP a river S. Africa. See **ORANGE RIVER**.

NUBERA, a district Ladak. See **NUBA**.

NUBIA a name given up a more or less restricted sense, to the countries on and around the Valley of the Nile, above Egypt, up as far as Abyssinia and the hilly districts still occupied by Blacks. This name, as now applied had no place in ancient geography. The Ethiopians of Greek and Roman writers began immediately above Egypt, and the Arabs or Nolans of Sindh and Persia were evidently the natives of Kordofan. The statements which seem to set them to of the Nile admit of a easy explanation and need not be here discussed. The name itself evidently originated in Egypt, where the word *nub* or *nub*, signifying gold, lent an appellation, at an early period, to those countries whence the precious metal was derived. It is nowhere a native appellation though Nubah is the general name given to the natives of the gold countries immediately beyond the limits of Nubia.

It was under Diodorus that the Romans, finding the rocky valley of the Nile, actually peopled by Nubians, extending from the redoubtable Blemmyes (*Blemmyes*, *Blemmyes*, *Blemmyes*), gave it up, to a distance of seven days journey to a colony of Nubians, brought from an oasis in the western desert. In truth the water-carriers of that desert are, to this day, all originally from Kordofan. After some struggles with the Blemmyes, the Nubians obtained the upper hand on the Nile, in the 6th century and the spread of Christianity among them aided their national progress. In the following century, therefore, the Arab conquerors of Egypt found a nation of Nubians on the Nile immediately above that country. This was the original Nubia a name subsequently extended, with out regard to race or government, to all the Christian states on the river up to the wild country. This wide and indiscriminate application of the name has been revived of late years, and all the countries in the S., subjugated by the Turco Egyptians, are collectively called Nubia which, in this sense therefore, comprehends — 1. Nubia proper, or the Valley of the Nile, actually peopled by Nubians, extending from the limits of Egypt to the S. bounds of Dongola. 2. The ancient Meroe the modern capital of which is Blendy, and the domain of which may be considered as extending along the Nile from Dongola to the confluence of the Blues and White rivers. 3. Senaar, higher up. To this last seems to be annexed Kordofan on the W. and Taka, E. of the Atbara.

Nubia proper extends through 6° of lat. from Fildis (34°), to the S. limit of Dongola (37°) nearly 300 m. nearly along the river. The first portion of it, the Wall-el-Kandis, reaches up about 70 m. then follows Wall-Nubah, to the second cataract. The average width of this part of the valley does not exceed 2 1/2 m. It presents to view a glaring, reddish desert, studded with pointed black rocks, and with narrow strips of green and palm trees along the river. Above the second or great cataract of Wall-Halib, which is, in fact, a succession of distinct hills, the Bahr-el-Hajle (or Ghazal of Bochar) reaches up about 50 m. Here there is scarcely a trace of vegetation. To this follows Sukkot, where the valley opens, and repulsive sterility begins to disappear. The date here attains perfection. Mahan succeeds, and then comes

the fertile level of Dongola, where the river forms several large islands, that of Argo being 20 m. in length. Remains of ancient edifices occur throughout this whole extent, but chiefly below Dongola. The most remarkable are the temple of Kabaish (Jemshut) (Zabul), the sculptures of which represent the expedition of Sesostris that of Idikka; the excavated temple of Ipsamboul a little below Wadi-Halfah; and the temple of Senna, a little above it. In Dongola, some colossal figures of granite lie prostrate on the side of Argo. The inhabitants throughout speak, in various dialects, a language fundamentally the same, and which radically agrees with that of Koldai in Kordofan. They are a handsome

NUBAHA.—From Sir John Lubbock's Album.

swarthy race of dark brown complexion bold frank, cheerful, and more simple and incorrupt in manners than their neighbours, either up or down the river. In Egypt, where they are called Bardos (Barbars) they are preferred as porters and domestic servants. The chief town of Lower Nuba is Durri a large village of 2000 huts. The new capital, Dongola, or Marakha, contains 5000 or 6000 inhabitants. The whole population of Nuba proper does not probably exceed 150,000 souls. See SENNAAR and SERRAX.

NUBLADA, or **ST. BENEDICTO** an isl. N Pacific, Revillagigedo group lat. 19° 25' 40" N lon. 110° 44' W length, N.E. to S.W. 8 m.; breadth, about 3 m. It is rugged and barren.

NUBLE, a river Chile, which rises in the W slope of the Cordillera of the Andes, near lat. 38° N. flows W 8 W and, after a course of about 50 m. unites with the Chillan in forming the Itata.

NUDEA a tn. in Hindoostan, dist same name, prov Bengal, at the confluence of the Jellinghy and Costinbhar branches of the Ganges, where their junction forms the Hooghly, about 60 m. N Calcutta. It was the capital of a Hindoo principality anterior to the Mahomedan conquest and, in more recent times, has been the seat of British rule. The town is immediately N Calcutta area 2942 sq. m. It is extremely fertile in all the more valuable productions of India, including sugar, tobacco, mulberries, fax hemp, &c. Pop. 298,785.

NUDDINGEN a vil. Bavaria, Lower Franconia, dist. and near Hildesheim: with a church, a chapel, several mills, and a trade in wine. Pop. 1390.

NUEVA-CAGAYAN, a tn. Philippines, esp. prov S. Camarines, in B.R. of Isl. Luzon, on the Hago or Santa Cruz, at its mouth in the Bay of San Miguel. It is built with considerable regularity; is the see of a bishop, and has, at Santa Cruz, in its vicinity, a fine mission, where the governor resides. Pop. 12,000.

NUEVA-LEONIA, a vil. and com. Spain, Andalusia, prov. and about 24 m. from Cordova, with a church, primary school, a four-mill, and a trade in corn. Pop. 1008.

NUEVA-LEONIA, a prov. Philippines, Isl. Luzon, extending along part of the E. coast, and backwards nearly to Lolo.

NUEVA-LEONIA, a prov. Philippines, Isl. Luzon, bounded N by the Ilocos, E. by Cagayan and Nueva-Visaya, and extending chiefly of part of the mountain chain which traverses the island centrally N to S. It is about 150 m. in length but is very imperfectly known, the greater part of it being still in the hands of independent and very uncivilized native tribes.

NUEVA-LEONIA, a prov. Philippines, Isl. Luzon, bounded N by Cagayan, E and S. Nueva-Visaya, and W Nueva-Visaya and Pangasinan. It was formerly included in prov. Cagayan from which it was separated in 1899, and is both limited in extent, of indifferent fertility, and thinly peopled. Its staple product is tobacco, and some gold is gathered from the sands of its torrents. Pop. 22,333.

NUEVITAS-DEL-PAISUR, a port, N.E. coast, Cuba, lat. 21° 29' N lon. 75° 30' W a large bay, with many shoal places, but capacious enough for any number and class of vessels. It is the port of Santa Maria del Rosario, and has, on that account, a considerable trade.

NUOVO-LACU, a dep. Mexico. See LACU.

NUFFIELD, par. Eng. Oxford; 30' 6" N. Pop. 2,311.

NUGGENA, a tn. Hindoostan, prov. and 68 m. N.E. Delhi. It is a large place, with some native fortifications in its vicinity called Kaloo Khan's Fort. Pop. about 15,000.

NUGGUR—1, a tn. N.W. Hindoostan, prov. Ajmer, 67 m. S. Jeypor, strongly fortified, and further protected on the W by a lake.—2, a ruined city, Hindoostan, prov. Mysore lat. 13° 54' N lon. 75° 6' E, on a wide plain, surrounded by hills. The fort is one of the strongest in the Deccan, and there are various handsome buildings, mosques, and palaces, within and about it. The gardens of Nugger are celebrated throughout the W side of India, for their beauty and produce.

KUGEDU a vil. and com. Isl. Sardinia, div. Sassari, prov. and S of Ozieri: with a church, a primary school, and a trade in cattle and dairy produce. Pop. 1736.

NUHAHIVA, an Isl. Marquesas. See NUKA HIVA.

NUITS (Latin, *Nivium*), a tn. France, dep. Cote-d'Or on the Meuse, 15 m. S.W. Dijon, with manufactures of woollen cloth, leather, and vinegar, and a considerable trade in Burgundy wine, fruit, vegetables, building stone, &c. Pop. 5404.

NUJIBARAD a tn. Hindoostan, prov. and 65 m. N.E. Delhi, in a low and swampy district. It consists of regular broad streets, enclosed by barriers at intervals, and forming distinct bazars and carries on an extensive traffic, chiefly in wood, bamboo, copper, and tin, brought from the hills. About 1 m. E. is the fort of Futteghur.

NUJIFGHUR, a tn. Hindoostan, prov. Allahabad, dist. and 8 E. of Cawnpore, 7 bank Ganges. It is a busy commercial place, which has recently sprung up in consequence of an extensive indigo-work established in its vicinity.

NUKA HIVA, the principal Isl. of the Marquesas Archipelago, in Pacific Ocean lat. 9° S, lon. 140° W greatest length, E. to W., 17 m.; breadth, 10 m.; circuit, above 60 m. The S. coast consists of lofty rugged, and precipitous rocks, from many of which the water is seen tumbling in beautiful cascades. The interior is very elevated, and, in its loftiest summit, attains the height of 5840 ft. Its N. coast is flatter and rises gradually from the shore towards the centre. The principal places of resort, and the best anchorages, are on the S. side, on which there are at least three bays; the most important called Port-Dechiboulogne, whose depth may be in perfect safety. The inhabitants are notorious for cannibalism, dissoluteness, and treachery, which all combine to make the population much less than the island is naturally able to maintain. The highest estimate makes it 18,000, the lowest and latest, only 5000.

completely encased in white stone, 64 ft. in height; the workhouse, an Italian building of three stories, with a fine front, and a great hall, the walls of which are decorated with paintings in oil, many of them by Dürer—the Reiche-

KARLSBERG STRAßE (CAROLINE STREET) AND CHURCH OF ST. SEBALD.—From Albrechtsberg, Monarchstadt at Nürnberg.

schloss, or imperial castle, in the N W corner of the town, towering above all its other houses, and containing within its court a remarkable lime-tree said to have been planted by the hands of Queen Kunigunda, and now above 700 years old; the Assumption church [church of St. Giles] a handsome modern Italian building, containing a very ancient chapel, originally founded by the Emperor Conrad III. for some Scotch Benedictine monks, and containing an altar-piece by Vandyck; the parsonage of St. Sebald's, with a beautiful oval window and near it the Gothic chapel of St. Maurice, now converted into a picture-gallery. There are numerous benevolent and educational institutions. Among the former are the general and military hospitals the orphan and foundling hospital the deaf and dumb asylum, and asylum for destitute children, among the latter are a gymnasium school of arts, polytechnical, industrial and many other public and private schools. The manufactures and trade were at one time very extensive, and almost all the streets derived their names from the particular branches of industry carried on in them and many important inventions had their first existence here. Of these inventions may be specified wire-drawing, watches, and firearms. The industry of the town has greatly declined, but it still manufactures and carries on an extensive trade in wire, musical and mathematical instruments, toys, lead pencils, needles, pins, etc.

Nürnberg, though an ancient city does not carry its origin so far back as Roman times. It had acquired considerable importance in the 10th or 11th centuries, and has been frequently visited by the emperors of Germany. It was greatly enlarged by Conrad III., and received several embellishments and important privileges from Frederick Barbarossa. In 1319, it was raised to the rank of a free city of the empire. It early took part in the Reformation. Subsequently it suffered during the great European wars, and being repeatedly laid under contribution by both parties, became so exhausted, that the sources of its prosperity were almost dried up, and the population rapidly decreased by extensive emigration. Having

recently incurred a load of debt, which made it an acquisition of little value to any state, it was finally taken possession of in 1806 by Bavaria, which undertook the satisfaction of its debts, and, by judicious arrangements, has considerably increased its trade. Many distinguished individuals have been born here. Among others may be mentioned the poets Feinberg and Hans Sachs, the mathematician Behaim, the painter Albert Dürer, and the sculptors Peter Vischer and Adam Kraft. Pop. 45,861

NURNEY, three parts. Irish.—1, Par and to. Carlow; 2728 ac. Pop. 671.—2, Par and to. Kildare, 3796 ac. Pop. 673.—3, Par Kildare; 1180 ac. Pop. 669

NURPUR, a tn. in the N E of the Punjab, on the lower slopes of the Himalaya lat. 33° 13' N; lon 76° 40' E. It is defended by a fort built of stone and mud, situated on an eminence 100 ft. high, but commanded on all sides by loftier heights, and has a good and well-stocked bazaar and manufactures of shawls which employ a large number of the inhabitants. Its position makes it a place of considerable importance. Pop. about 8000.

NURRI a vil, isl. Eardale, div. Caghar, prov. and 3 m. E. Isli. It has uneven, twisted, and extremely filthy streets, several churches a Capuchin convent, a primary school, brick and tile works, and a trade in corn, wine, fruit, hides, wool and dairy produce. Pop. 2835.

NURTINGEN, a tn. in Württemberg, circle Schwarzwald, on the Neckar 14 m. S.E. Stuttgart, with an old church castle, hospital, Latin and general school, manufactures of woollens, Turkey dye-works, cottons and other mills. P. 9869

NUS, or Nuz, a vil and com. Italy Piedmont, div. and 8 m. N. E. Aosta, l. bank Dora, with two churches, an old castle, manufactures of ironware, and a trade in cattle. Pop. 2059

NUSCO a tn. Naples, prov. Principato-Ultra, dist. and 5 m. W S W Angelo de Lombardi. It is the son of a bishop and has a seminary and hospital. Pop. 8560

NUSLAU or NUSLAW a market tn. Austria, Moravia, circle and 10 m. S.E. Brün, at the foot of a hill near 1 bank Saborow. It has a church. Pop. 1198

NUSLOCH, a market tn. Baden, circle Lower Rhine, bail. and 1 m. S. Hülshof, with three churches. P. 2054

NUSSEBACH or ALBU, a vil Austria, Transylvania, dist. and about 24 m. from Crostadt, near the Ait, with a trade in corn, cattle, and timber. Pop. 1097

NUSSEDOFF numerous places, Austria, particularly 1, A vil below the Enns; so near Vienna as to be almost one of its suburbs. It produces a famous wine which bears its name, and is much valued by the citizens of the capital on holidays. Pop. 3000.—2 (Oostsch, or Oost), a market tn. Hungary co. Presburg with a church and a flour-mill. Pop. 1804.—3, (Uster, or Wiedsch), a market tn. Hungary, co. Presburg, about 8 m. from Modera with several mills, and a trade in corn, wine, and cattle. P. 1096

NUSSEBABAD.—1, A tn. N W Hindoostan prov. and about 12 m. S Ajmer, with extensive compounds for British troops. It is considered healthy but is one of the most expensive places of residence in all India.—2 A small tn. E. Hindoostan, prov. Bengal, r. bank Mahanapootra, lat. 24 32' N lon 86° E

NUTLEY par Eng. Hants 1601 ac. Pop. 169

NUTTS ARCHIPELAGO an assemblage of islands, W coast, S. Australia, between lon. 132° 55' and 134° E; the principal ones are St. Francis and St. Peter

NTARABD (also Nari), two nearly contiguous places, Hungary, co. Presburg, in the S. coast, 80 m. from Komorn, with a church, and a castle. Pop. 1705

NTABSA, or Ntamsi (the Seal), great lake, in the S. part of Equatorial Africa, the southern end of which appears to be in about lat. 13° S, lon 55° E. The direction of the lake is probably S.E. and N.W. its breadth is, in general, a three days' voyage in a canoe (perhaps 40 m. or 50 m.), the nights being spent on islands, which are numerous. As to its length, we have no direct or conclusive testimony. Old accounts make it 100 leagues, and, indeed, to this extent the lake may be now traversed with tolerable certainty. Some native reports give it a length of two months' voyage in a canoe. But the fact is, that its northern end is

unknown to the natives on its southern shores, from whom we obtain our information. The people who dwell near it often speak of it as if it were a river. The remarkable elongation of this narrow lake has caused some doubt of its continuity, and it has been suggested that the lake on the W of Monomoezi is quite distinct from Nyassa or the lake, in the Musungu country, W of it. But these doubts must yield to the following considerations:—1st, All the routes gathered for three centuries, on the E. coast, chiefly at Kifwa, relate to a great lake of the interior, and not to lakes, although a constant communication is maintained between Kifwa and the inland tribes of the Musungu and the Musungu of Monomoezi, 2d, The shores of Nyassa, as Nyassa is called on its W side, are distinctly traceable on that side, from native reports, as far as the river Lapuala, within the 9th parallel, and thence to the limits of Monomoezi. That the same Nyassa is not applied to it in the last-mentioned country, is obviously owing to the difference between the Musungu and Musungu languages.

The nations dwelling on the shores of Nyassa are called generally, in the Swahili or language of the E. coast, Wanyassa (Sea people). This name, however, does not appear to be applied to the tribes of Monomoezi, on the E. side of the lake, probably because they do not in fact occupy its shores for a distance of three or four days' journey intervening between the populous districts of Monomoezi and the lake—the journey being over a waterless country, probably a steep descent. To the Musungu of Monomoezi, in the 9th or 10th parallel, the Musungu, of whom the Ndutu are a branch. These occupy the S E and S shores of the lake, and are scattered over the country farther W. But we believe that the Mangwa on the S W shores of the lake, are, as well as their W neighbours the Mviza, to be considered as Musungu. Beyond the Mangwa, on the W side, are the Ambo, and beyond them the Mviza, who extend N to the mouth of the Zambezi, in about lat. 8° 30' S. Here terminates our information respecting the shores of the lake. We know, however, that copper and ivory are brought across the lake, a three days' voyage, to Oha in Monomoezi (lat. 7° 50'), from Zangwayika, a town on its W shores, and N apparently of the Lapuala.

The tribes at the S. end of the lake, and further S. (the Musungu?), entitle their chiefs Maravi. Hence the Portuguese called the country N of the Zambezi and towards the lake, the Maravi country, and they named the lake itself Lake Maravi. The Musungu, on the other hand, entitle an independent king Mumbo, hence their invading hordes have been called the Mumbos. The Portuguese learned, early in the 16th century, that the river Cuan, at Kifwa, was thought to issue from the great inland lake. They supposed that the Zambezi, also descended from the same lake; and as the name of the latter river was originally written (by De Barros and his followers) Zambeiro or Zambe, the lake also received, from geographers, the name of Zambeiro so that, within the name of the river was corrected by João das Santos (1609), the S. relations of the lake were soon lost sight of, and Lake Zambeiro figured, in later times, only in connection with the river of Kifwa.

The first graphic account of the lake was given by the missionary Luitpold Maritano (1824) from native information. He says—The river Chirin (he meant, probably, the Mosito, which enters the sea opposite the Querimbo Islands) issues from it, at first very quietly, but afterwards, meeting with rocks, it becomes so furious that no boat can descend it. Maravi (the town of a chief) lies between the lake and the Zambezi. Then follow two of the chief kings, namely, Masei, distant 15 days from Maravi, and the other, Rouanga, five days journey further. As to the further end of the lake, the people of Rouanga know nothing of it, so distant is it. The lake is 4 or 5 leagues wide, and, in some places, the opposite shore cannot be seen across it. It is all sprinkled over with islands on which those who navigate it can rest. It abounds in fish, has a depth of 8 or 10 fathoms, and is much fished by the winds of Mozambique (S.E.) so that whenever wind attempts to explore it, must go there in April or May. The borders of the lake abound in millet, sheep, and ivory, which latter may be had cheap. There are many boats on it, called *cochi*. This account appears to be accurate, so far as it goes. The word *cochi* (boat) belongs to the Musungu

language, the Musungu call a canoe *paludo*. The sheep of the Wanyassa, are all black and four-legged. The trade and navigation of Nyassa seem to be active only towards its S. extremity owing probably, to the insupportable character of its E. shore in Monomoezi, and to the wildness of the tribes occupying the opposite or W lowlands. At its S. end, the lake penetrates into a region of hills, equally populous on both sides. Here recent accounts indicate us to the great market of Moia, on the E. side, and, four days further N, Ngombi, a still more important place opposite to which, at a distance of three days' voyage, is the town of the Sultan of Nyassa (Mangwa?), perhaps the Maravi described by Maritano.

NYBORG (New castle), a tn. and seaport, Denmark, lat. 56° 50' N. on the Great Belt, 17 m. E. S. E. Odense. It is strongly though irregularly fortified and has a harbour admitting vessels drawing 15 ft. good building-docks, and a considerable trade in grain. All vessels which pass the Great Belt, pay their dues here. In 1659, the Danes gained here an important victory over the Swedes, and thereby freed their country from a foreign yoke. Pop. 1861, 3069.

NYHAMM a port E. coast, Sweden, lat. 61° 40' N. at the mouth of the Ljusna, in the Gulf of Bothnia. It is capable of holding 40 ships, is sheltered, and is much used for refuge by vessels sailing between Stockholm and Finland.

NYINAH a tn. W. Africa, dist. Koranko, N. E. Sierra Leone, lat. 8° 45' N., lon. 11° 28' W. on the route between Rokelle and Falahe, houses large, and wall built.

NYIR, several places, Hungary.—1. *Adony* A vil. Thither Thias, co. Szabolcs 9 m. from Hadias with a church. Pop. 1870 — 2. *Vár-Vár* A vil., co. Szathmar with a church, and a trade in corn and wine. Pop. 1124 — 3. *Bachor* A market to co. Szabolcs, 39 m. N. E. Debreczin with two churches, a monastery, and a trade in corn, cattle, and timber. Pop. 3250.—4. *Selcké*, A vil. on Szabolcs, about 9 m. from Nyir-Bachor, with a church, a trade in cattle, and timber, and a flour mill. Pop. 1845.

NYIRAD, a vil. Hungary Thither Dumbo co. Szabolcs, 8 m. from Szeged with a church, and a trade in agricultural produce. Pop. 1289.

NYIRLEGHYZA, a market in Hungary Thither Thias, co. Szabolcs 29 m. N. Duxczan with a Greek, a R. Catholic and two Protestant churches, soda and salt-petre works, mineral springs and a trade in agricultural produce, and important animal fairs. Pop. 15740.

NYKELIK, a tn. Holland. See NYKELIK.

NYKÖPING (Lat. *Nycochia Falerina*) a tn. and seaport, Denmark, on the Guldbergund in Falster with a harbour and three quays, at one of which vessels drawing 10 ft. can lie. A great deal of corn is shipped here. P. 1200.

NYKUPING, a seaport in Sweden, cap. lan. of same name, on a bay of the Baltic, 64 m. S. W. Stockholm. It is traversed by the Nyköping, is regularly built, has several courts and public offices, three churches, a new castle an old castle, now in ruins, an hospital, manufacturers of linen, cotton, and woollen cloth, hosiery, tobacco, needles, and various articles in steel and brass, machine-works building yards, and a paper and several other mills. P. 8486.—The Lika is bounded on the N. by Lake Mälare, separating it from Westerdal, 1 psal, and Stockholm, N. E., Stockholm; N. and S. the Baltic and Lundköping and V. Örebro. It is well wooded in the lower districts, and in the lower so fertile as to have a surplus of corn for export. rears great numbers of excellent cattle, and possesses valuable minerals, including iron, copper, lead, and cobalt. The principal exports, for which the bays on the coast afford great facilities, are corn, cattle, metals, and timber. Pop. 105,072.

NYLKA, a vil. and com. Belgium prov. and 13 m. E. S. E. Antwerp, 5 m. N. E. by R. Lier inhabitants chiefly occupied in weaving. Pop. 1766.

NYMET ROWLAND, par. Eng. Devon 595 ac. P. 99.

NYMPHENBURG, a tn. Upper Bavaria, 8 m. N. W. Munich with important manufactures of porcelain and painted glass, and with the gardens attached. Pop. 1110.

NYMPHFIELD, par. Eng. Gloucester; 1473 ac. P. 417.

NYMPTON — 1. *(Stoke)*, A vil. and par. England, co. Devon, 3 m. E. S. E. Milton with a handsome parish church, and manufactures of serge. Area of par. 3677 ac. P. 1346.

— 2. *(St. George)* a par. Devon, area, 3240 ac. P. 223.

ATNEHEAD par Eng. Somerset, 1448 ac. P. 557
ATNE or **ATNE**, a tn. Switzerland. *See* **ATNE**, N. W. bank lake and 13 m. N. W. E. Geneva. It is an old, irregularly-built place; has several educational establishments, an old Gothic castle, on a height, manufactures of leather, an important pottery for porcelain and delftware, and a good trade. Pop. 2464.

ATNE [*anc. Aemona*], a valley in France, dep. Indre, once one of the strongest places in Dauphiny, on the **ATNE**, here crossed by a bridge. It is poorly built, but has a large square, with arched piazzas, forming an agreeable promenade; manufactures of soap, leather, woollen stuffs, and pottery; and a good deal of silk is both raised and spun. The bridge over the **ATNE** is a remarkable Roman structure, built of heavy stone, and consisting of a single arch of about 100 ft. in span, and 65 ft. in height. Pop. 2559

ATNE, a market in Hungary. *See* **ATNE**.
ATNE, a market in Hungary. *See* **ATNE**. It has a trade in corn and several annual fairs. Pop. 7217

ATNE, par **ATNE** Kerry 6547 ac. Pop. 640
ATNE'S BRIDGE, a vil. and par. Ireland, co. Clare, 7 m. N. E. Limerick, on the Shannon, here spanned by a bridge of 12 arches. It has a church, grange-mill, and school. Area of par. 11,289 ac. Pop. 3121.

ATNE par **ATNE** Kerry 4542 ac. Pop. 1138

ATNE, or **ATNE**, a dep. Mexican Confederation, comprehending the S. portion of the Isthmus of Tehuantepec, and the table-land of Nizatlan. lat. 15° 40' to 18° 20' N. lon. 94° 15' to 98° 15' W. length 270 m. along the shores of the Pacific breadth, at the widest part, 170 m. area, 31,522 sq. m. bounded, W. by dep. La Puebla, S. Vera Cruz, E. Tehuacan, Chiapas, and the Central American state of Guatemala, and E. by the Pacific. It is of uneven surface, and in many parts mountainous but is one of the most beautiful and best-cultivated districts in Mexico. Its principal rivers are the Atravado, which runs near the centre of the department, and after a winding course terminates in a lake in Vera Cruz, the Rio Grande and Verda, both of which fall into the Pacific, near the W. extremity of the department. At the E. end are several smaller streams, most of which fall into the Gulf of Tehuantepec. The mines of silver and gold are not important. The climate is agreeable and salubrious, and the soil remarkably fertile. Its productions are wheat, maize, cochineal cotton, sugar, honey, coconuts, plantains, and other fruits. The inhabitants are chiefly Indians. Pop. (1850) 525,101.

ATNE, or **ATNE**, a tn. Mexico, esp. above dep. near L. bank Verda, 210 m. S. E. Mexico, 4800 ft. above the sea. It is well built, of an oblong form about 2 m. in length by 1½ m. in breadth, including the suburbs, which are full of gardens and plantations of cochineal, for which this city is celebrated. It has wide and well paved streets, houses of stone, some good squares, a number of handsome and richly-decorated churches and monasteries, a town house, and bishop's residence. The inhabitants are industrious, manufacturing silk, cotton, sugar, and chocolate. Pop. (1850) 25,000.

ATNE, par **ATNE** Somerset; 865 ac. Pop. 168

ATNE, par **ATNE** Devon, 5464 ac. Pop. 525

ATNE or **ATNE**, a market tn. and par. England, esp. co. Bedford pleasantly situated in the vale of Ouse, on the Melton-Mowbray canal, and the **ATNE** and Peterborough railway 35 m. N. W. London. It has a fine old church, with tower, terminating in a lady's shrine. Baptist, Catholic, Independent, and Wesleyan chapels; national

ATNE, a tn. Russia. *See* **ATNE**.
ATNE, a tn. and seaport, Russia, Finland, gov. and 26 m. N. W. Åbo, on the Gulf of Bothnia, where it has a good harbor. It has manufactures of linen, coarse woollens, and hosiery; and a considerable trade in linen, provisions, and timber. A peace was concluded between Russia and Sweden in this town in 1721, and bears its name. P. (1864) 5781

ATNE, a seaport in Denmark, lat. Lolland 56° and 13 m. S. E. Marbo, on a small bay. It has a good and capacious haven admitting vessels which draw 10 ft., and protected against silt by a high breakwater of stone. Pop. 1000.

ATNE, or **ATNE**, a vil. Hungary, co. and 19 m. N. W. Gömör. It has a Protestant church, a trade in corn and cattle, and an iron-mill. In the vicinity are mines from which some gold is obtained. Pop. 1125.

model schools in a handsome Elizabethan building a free grammar-school, an old castle, partly fitted up as a county hall a handsome agricultural hall and new-roofed and manufactures of silk shag for hats. Geoffrey Hudson the celebrated dwarf was born here. Area of par. 3130 ac. Pop. 3681.

ATNE, a town and market-house, and three schools. Area of par. 9559 ac. Pop. 2105. —(Local Correspondent)

mammoth, down and whole skins of various kinds of geese; done chiefly at the great annual fair.

OBIE, *Obi*, or *Ovi*, a large river Siberia, having its source in the Altai mountains lat. 50° 32' N. lon. 89° E. From this point it flows N W and S N W to Katsunika, under the name of the Chozoy, or Tobolsk, to the first instance, and subsequently of the Katsunika. At Katsunika it is joined by the Bie, and is thenceforth called the Obi. Its course is very tortuous, but with a general tendency to the N W, till it reaches Samara, lat. 60° 30' N. lon. 68° E., whence it flows N, in a double channel to the Gulf of Obi. The area of its basin is estimated at 1,837,000 sq. m., and its total course to be 3900 m. Its principal tributaries are the Irtysh, Tobol, Tura, and Tishulim.

OBED, *Be-Omed* *Obaid* or *Obaid*, a tn. T. Africa, cap. Kordofan, lat. 15° 16' N. lon. 30° 7' E. It is a straggling collection of mud huts, composing six different villages, each forming a separate quarter, inhabited by a distinct class of men, and standing in a vast plain. The houses are mere huts of straw and mud with exception of a few built of clay, and have to be rebuilt almost annually, after the rainy season. There are five mosques in the town, only one of which is built of brick, three barracks, an hospital and governor's residence, one of the largest buildings in Obaid, and a market-place, which, during the day presents a scene of great bustle and animation. As soon as night sets in, there is a furious howling of wild beasts, leopards, and hyenas, all round who are kept off by strong abatis of thorns, with which the houses are surrounded, and belied which the dogs yell their defiance. Water sometimes is very scarce, and the wells are nearly 100 ft deep. Pop. exclusive of the military estimated at 12,000.

OBEN-AMERZ, a vil. Baden, circle Middle Rhine, bail. Achen, with a church, oil press, and other mills. P. 1136.

OBEN-AMERZ, or *Oben-AMERZ*, a market in Bohemia, circle Taber on the Igla, 4 m. from Bistula, with a church, a school, an hospital, a saw and other mills. Pop. 1769.

OBEN-AMERZ, a market in Austria Illyria, circle and 40 m. N W Villach 1 bank Drave; with a church, and the ruins of the castle of Drauburg. Pop. 3000.

OBEN-AMERZ, a vil. and par. Switzerland, can. Valais, r. bank Rhone, 8 m. from its source, in a glacier 49 m. N E E. Sea, 4360 ft. above the sea. It has a handsome church, the remains of an old castle, and some transit trade. Pop. 237.

OBENBERG, a vil. Switzerland, can. and 11 m. N E. Bern, with manufactures of fire-engines, and smitheries. Near it are the mineral springs of Fönshald. Pop. 1907.

OBENBERG, or *ObenBERG*, a vil. Würtemberg, circle Neckar near Maulbronn with a Protestant church. Pop. 1920.

OBENBERG, a vil. Bavaria, circle Swabia, 37 m. N W Würzburg with two churches, a castle, Latin school hospital, manufactures of linen and articles in wood, and a trade in cattle. Pop. 1001.

OBENBERG, a vil. Baden, circle Mittelrhein, on the Rhodol, 7 m. N E. Offenburg; with a bathing establishment, manufactures of paper, starch, and tiles. P. 2000.

OBENBERG, or *ObenBERG*, a market in Austria, Carinthia, circle Aachenberg, 13 m. S W W. Laybach. It has two churches, manufactures of linen, and some transit trade. Pop. 1346.

OBENBERG, a vil. Hesse-Darmstadt, Oberrhein, circle and near Friedberg, with a church and a manor-house. Pop. 1779.

OBENBERG, or *ObenBERG*, a once fortified and poorly built town in France, dep. Bas-Rhin, 14 m. N. Schaeferstadt. It has a large town-hall, communal college, hospital, and near it the remains of an imperial palace, and a monastery, main factories of calicoes, leather hats, soap, tins, branks tiles, potteryware, glass, nails, candles, and brandy. Pop. 4823.

OBENBERG, a market in Upper Austria, circle Inn r. bank Inn, 13 m. N W. Boos. It has a market, a church, school, castle, and manufactures of linen. Pop. 1749.

OBENBURG, a tn. Bavaria, Lower Franconia, on the Main and Minsing, 26 m. N W Würzburg with a church, two chapels, some shipping, and a trade in wood, oil, gypsum, and flour mill. Pop. 1773.

OBENBERG, a tn. Würtemberg circle Schwarzwald, 1 bank Neckar, 43 m. S W Stuttgart, with an hospital,

manufactures of firearms, leather, woolen, cotton, and linen cloth, a saw and polishing mill. Pop. 1654.

OBENKIRCHEN, a tn. Hesse-Cassel, Niederhessen, on the Ass, 28 m. S W S. W. Hanover, with a townhouse, and the seat of a mining directory. Pop. 1833.

OBENKIRCHEN, a tn. Bavaria, the HAVENBERG.

OBENKIRCHEN, a vil. Tyrol, circle Inns, with a church, sulphur springs and a bathing establishment. P. 1068.

OBENKIRCHEN, a vil. belonging to the free town of Frankfurt. It lies on the Main, and on the road to Offenbach, and has a church, and a number of handsome villas. Pop. 1878.

OBENKIRCHEN, several places Switzerland, particularly, a vil. and par. can. and 12 m. S E. St. Gall; with a church, and hard by the remains of the ancient castle of Blatten, and also the ruins of the castle of Widenstein. Pop. 3890.

OBENKIRCHEN, or *ObenKIRCHEN*, a tn. Prussia, gov. and 26 m. N W Posen, on the Warta, with two churches, a synagogue, and manufactures of woolen and linen cloth, leather and earthenware. Pop. 1696.

OBENKIRCHEN, a market in Bavaria circle Swabia, near the sources of the Iller E. S. E. of Lindau, with a castle, and iron and steel works. Pop. 1904.

OBENKIRCHEN, a market in Germany, duchy Oldenburg, 8 m. E. N. E. Ruckelshof, on the Nahr, with two churches, a castle, and courthouses. Agate, and other valuable stones and pebbles are found near it, and polished. Pop. 2261.

OBENKIRCHEN, a vil. Würtemberg circle Neckar on the Botten near Marbach with a church, and, on a height in the vicinity the feudal castle of Liechtenberg. P. 1432.

OBENKIRCHEN, a vil. and par. Switzerland can. and 7 m. N W St. Gall with a church, an orphan hospital and some cotton manufactures, but the inhabitants live chiefly by agriculture and the raising of cattle. Pop. 2176.

OBENKIRCHEN, or *ObenKIRCHEN*, several places Switzerland, particularly a vil. and par. can. and 20 m. S. Bern 2710 ft. above the sea, with a finely-ornamented church and schoolhouse. Near it are mineral springs. Pop. 1423.

OBENKIRCHEN, a vil. Schwarzwald circle Rastatt, bail. and near Rastatt with a church and a chapel. P. 1716.

OBENKIRCHEN, a tn. Rhénish Prussia, 1 bank Rhine; 24 m. S. H. Coblenz, with a highly-decorated church, picturesque round tower, and hard by the ruined castle of Beunberg. Pop. 2300.

OBENKIRCHEN, a tn. Saxony circle and 81 m. N E. Zwickau, 2800 ft. above sea-level, with a townhouse, and manufactures of lace fringes, shawl, ribbons, and articles in iron steel and wood. Pop. 1897.

OBENKIRCHEN, a vil. and par. Switzerland, can. and 16 m. N E. Zurich with a large church. P. 2089.

OBENKIRCHEN, a tn. Nassau, bail. Klingenstein on Mount Taunus with iron, copper, salt, paper, and other mills. P. 1956.

OBENKIRCHEN, a river Siberia. See Obi.

OBENKIRCHEN, a vil. Portugal prov. Estremadura, on the lagoon of Obidos, where it receives the Amoz, 47 m. N. W. Lisbon. It possesses an aqueduct of more than 100 arches, and several other antiquities. Pop. 3930.

OBENKIRCHEN, a tn. Brazil prov. and 709 m. N W W. Para, r. bank Amazon, near the confluence of the Oriximina. It is regularly built the streets all centering in a large public square and contains a handsome parish church and exports cacao and cotton manufactures mostly Indian. P. of dist. 6000.

OBENKIRCHEN, a river U. States, rises in N. W. of Tennessee; flows W. E. W. and joins the bank Mississippi, total course 80 m. OBENKIRCHEN, a tn. Russia. See Obol.

OBENKIRCHEN, a tn. Russia, gov. and 88 m. S. Kourak, at the confluence of the Obzanka and Ima, wall built, with two stone and five wooden churches and a considerable trade in corn, cattle, wax, and hogs-lard. Pop. (1849) 4986.

OBENKIRCHEN, a river Russia, in gov. Vitebsk flows S. W. past Dubovsk, and after a course of about 75 m., joins r. bank B. Dvina, 13 m. above Polotsk.

OBENKIRCHEN, a gov. Durst, 500 m. Pop. 144.

OBENKIRCHEN, or *ObenKIRCHEN*, a tn. Prussia, gov. and 17 m. N. W. Posen r. bank Warta, here crossed by a bridge; with two churches and a courthouse. Pop. 1685.

OBENKIRCHEN, a river, Prussia, which rises near town of same name, prov. Posen, flows easterly N. W., through extensive marshes, expanding into several lakes; and joins the bank Warta a little below Schwetzn, total course, 140 m.

OBRESCHIA, or **OBESCHIA**, a vil. Hungary co. Temesvar, on the Danube, 5 m. from Karczewsch. It is the headquarters of a Walachian-Hungarian frontier region. Pop. 1898.

OBRIETZ, or **OBREITZ**, a vil. Lower Austria, near the Pulkas, about 10 m. from Felschdorf with a church, a limestone quarry, and a trade in corn and wine. Pop. 1620.

OBROVACZ, a vil. Hungary Hither Danube, co. Bacs, 8 m. from Illok, with a church, and a trade in wood, corn and cattle. Pop. 1462.

OBROWITZ, a vil. Austria, Moravia, so near Brum as to be properly one of its suburbs. It has a church, a castle, and a mill. Pop. 218.

OBSCIA, or **OBSCIA**, a river Russia; rises in gov. Simlensk, flows N., enters Viatka, and joins it bank Dwina, 20 m. above Viatka; total course, 80 m., part of which is navigable.

OBSEVAZIL, a cape, E. Asia, Gulf of Anadir, lat. 64° 47' 58" N. lon. 177° 59' 55" E.

OBVA, a river, Russia, rises on the frontiers of gov. Viatka and Perm, flows N.E. through Perm, and joins r. bank Kama 50 m. above the town of Perm. total course, 100 m.

OBJ,—1 (or **OBJ**) A small lake, Gulf of Spain 18 m. S. of the point of Cadix; lat. 35° 25' N. lon. 104° 54' E. It is formed of different hills, the highest of which is in the centre, and may be seen from a distance of 45 m. to 50 m. A few families, banished from the continent, subsist here on vegetables and maize, which they cultivate.—2 An old Gulf of Buxm, called False Obj 48 m. N. the former. lat. 35° 58' N. lon. 104° 38' E. (a), about 18 m. from the mainland. In the dry season, junks are employed in carrying water thence to the adjoining continent where it is at times extremely scarce.—3, Two isles. Phil's Passage, Indian Archipelago called respectively Great and Little Obj. Great Obj is about 60 m. long W by N to S. by E. breadth, 10 m. to 30 m. It is lofty, very mountainous, thickly wooded and yields spices and sugar, coats mostly high and safe to approach. Little Obj is situated off the W end of Great Obj lat. 1° 26' S. lon. 137° 17' E.

OCANA two places, Spain.—1, A to New Castle, prov. Toledo, 35 m. S. Madrid. It has numerous squares, a spacious prison several schools, an hospital, nine convents, and two churches. Manufactures of hard soap of excellent quality, cordwainers, bracks and tabor cloths, worsted stockings, and oil. In the plain between Ocana and Los Barrios, the Spaniards, 65,000 strong, and commanded by Aranza, were signally defeated by 35,000 French, under Soult. Ocana was miserably sacked by the French who also destroyed its precious archives. Pop. 3127.—2, A vil. Andalusia, prov. and 81 m. S. Almeria, poorly built, with a church, an oil and a flour mill, and a trade in agricultural produce. P. 4000.

OCANA a town New Granada, dep. Magdalena, in a part of the chain of the Andes, to which it gives its name, and on the Oro, a small affluent of the Leticia or Casanare, by means of which it is enabled to carry on some trade. There are mines of copper in its vicinity. Pop. about 5000.

OCATAHOULA, a lake, U. States, Louisiana, 40 m. W. Natchez, formed by the expansion of a river of same name. Greatest length, N. E. to S. W., 24 m. breadth, 6 m.

OCCHIOBELLO a vil. and par. kingdom of Italy gov. Venice, l. bank Po, 15 m. S. W. Mogio with a court of justice, and several public offices, a parish church and an oratory. Pop. 1168.

OCCHIAIO, a town Italy Piedmont, di. and W. N. W. Alessandria, l. bank Grano with a court of justice, a parish and three other churches, and a trade in cattle. Pop. 2020.

OCOLD par. Eng. Suffolk, 1479 so. Pop. 680.

OCEAN, several islands, Pacific.—1, (or **Cure**) lat. 28° 77' N. lon. 178° 33' 30" E., small, low, and very dangerous, with a reef which, commencing about 4 m. from its W. point, extends N. for 5 m.—2 A group of three islets, sometimes called the Kivadeo or Catherine Islands, lat. 9° 14' N. lon. 167° 2' E.—3, (or **French**) An isl., lat. 10° 58' N. lon. 168° 24' 33" W. 40 to 15 m. in circuit, of a round shape, high in the centre, and with deep water all round, though without any harbours or anchorage. It is well covered with coconut nut trees, and of great fertility. Pop. 450.

OCEANIA a name which has been given to a fifth division of the world and includes all the islands of the Pacific, between Asia on the N. W., the Indian Ocean on the W., the Antarctic Ocean on the S., and America on the E. and W., A

subdivision of Oceania adopted by some geographers is into W. Oceania or Malana, corresponding with what is better known by the name of the Indian or Eastern Archipelago, Micronesia or N. Oceania, Polynesia or E. Oceania, and Melanesia or S. Oceania.

OCHA, or **OKA**, a river, Siberia; issues from Lake Tunda, gov. Tobolsk flows E. N. E., then N. W. W., and joins l. bank Irkut about 20 m. below Tara. total course, 140 m.

OCHAGAVIA, a town Spain, prov. Navarra, 22 m. E. N. E. Pamplona, with a church, hermitage, townhouse, school, old palace, manufactures of woollen cloth and shoes, a flour-mill, and a trade in wool, cheese, and skins. Pop. 1848.

OCHADLANO, a town Spain, gov. Biscay, 5 m. E. Bilbao with a church, a handsome townhouse, churchhouse, and hospital; iron-works, and manufactures of ironware. P. 1164.

OCHEROU HETOU, HAN, so Bow Island.

OCHEL HILLS a mountain range, Scotland, near Stirling co. Perth extending from N. E. about 34 m. into Perthshire average breadth, about 12 m.; highest summit, Ben clouch, in the E. W. about 2500 ft. above sea-level. The Ochils are of basalt and gneiss, and contain copper and uranium ore.

OCHELTREE a vil. and par. Scotland, co. Arr. 3 m. W. W. M. O. Connock with a parish church near the centre of the village, a school and manufactures of acryl and embroidery of muslin. Area of par., 6 m. by 5 m. Pop. 1787.

OCHEIDA a town and lake European Turkey Albania. The town is situated on the declivity of a hill at the N. extremity of the lake, 40 m. E. by N. El Darsan, inhabitants employed chiefly in the neighbouring sulphur and silver mines. P. 2500.—The lake, 18 m. long by 5 m. to 10 m. broad is surrounded by lofty mountains, and gives rise to the Black Tra.

OCHEENDORF or **BORTA** a vil. Austria, Trachy vana, on the frontiers of Walachia with a Greek church and a trade in timber and flint cattle. Pop. 1955.

OCHEENFURT a town Bavaria, Lower Franconia, l. bank Elbe here crossed by a bridge, 10 m. S. E. Würzburg, with two churches an hospital, infirmary, school of design, and an old capuchin monastery, manufactures of woollen cloth, silks, some shawls, and a trade in wine, corn, fruit, and cattle. Pop. 2250.

OCHEENHAUSEN, a vil. Württemberg, circle Donau, built on 8 m. E. E. E. Biberach, with a church, a mineral spring and manufactures of linen. Pop. 1550.

OCHEENWARDER a free in. territory and S. E. Hamburg on a marshy island of the Elbe with a church. P. 2000.

OCHEIA, or **OCHEIA**, a town Russia, gov. and 1 m. E. St. Petersburg, of which it may be considered a suburb, at the confluence of the Ocheia with the Neva. It has two churches, a large powder-mill a mill for boring cannon, and a salt-petre refinery. Most of the inhabitants are carpenters, employed on the docks at St. Petersburg. Pop. about 8000.

OCKBROCK, a vil. and par. England, co. and 5 m. S. by E. Derby, on the Midland railway and the Derby canal, with a Norman parish church, a Wesleyan and Anglican chapel, several schools, manufactures of bobbin and lace thread and extensive cotton-mills. Adjoining the village is a Moravian settlement. Area of par. 1780 ac. Pop. 1768.

OCKENDUN two parts, England, Essex.—1, (Hock), 1696 so. Pop. 338.—2, (Hock), 2007 so. Pop. 1021.

OCKER or **OKER**, a river Germany, which rises in the Harz mountains in the N. of princip. Grubenhagen, Hanover, flows N. W. past Brunszwiek and joins l. bank Aller, 25 m. above Celle total course, 75 m.

OCKHAM par. Eng. Surrey; 2240 so. Pop. 449.

OCKLEY par. Eng. Surrey, 6286 so. Pop. 641.

OCKLEBER a town Hindoostan, prov. Gujarat, 5 m. S. Baruch l. bank Nerunda, near its mouth; lat. 21° 41' N. lon. 72° 13' E. Pop. about 8000.

OCKLE-FRIGGAN, par. Eng. Hereford, 1607 so. P. 221.

OCMULGEE, or **OKMULGEE**, a river U. States, rises in the N. of Georgia, about lat. 34° N. flows first S. E. E. past Macon, Hartford and Jacksonville, then E. N. E., and unites with the Oconee in forming the Altamaha; total course, 300 m., navigable for steam-boats to Macon.

OOONEE, a river, U. States, Georgia, rises in the N. of the state, a little N. W. Athens, whence it flows S. E. N., past

OKANDA, a *to* Japan, N.E. coast, Isl Nippon, 50 m. E.N.E. Yeddo.

OKE-LOCK-ORKE, or **OKLOCKNEY** a river, U States, which rises in the S. of Georgia, flows S.S.W. into Florida, and after a course of about 180 m. falls into a creek of its own name, forming a branch of Applechie Bay.

OKFORD FERRASS, *par* Eng Durest 2533 *ac* Pop. 642.

OKHAMPTON Eng Devon. *See* **OKHAMPTON**.

OKER, a river Germany. *See* **OKER**.

OKHAMUNDEL, or **OKAMUNING**, a dist. India, forming the W extremity of the peninsula of Gujarat, Gujowar's dominion, lat. 22° to 23° 30' N., lon 69° 10' to 69° 30' E. It is a poor sandy or jungle tract, about 80 m. in length, by 15 m. in breadth bounded, N by the Gulf of Cutch W by the Indian Ocean, and E. by a small river or morass, and thus nearly insulated. It contains the towns Dwarka, and Bet or Dasa, with about 50 villages. Its inhabitants are chiefly Hindoos. A few inferior kinds of grain are raised and some salt is manufactured these articles, with ghee and conch shells, a great many of which are sent into Bengal, constitute the principal exports. Most of the land belongs to the Gujowar to whom the district was transferred in 1816 and by whom it is mainly pruned on account of the sanctity of its temples. *See* **DWARKA** Point Jagraoh or Okhamundel forms its W termination. Pop. 11 620—(*Dombay Geograpical Journal*, vi. 5).

OKHOLM a vil Denmark, duchy Schleswig hall and 7 m. N.W. Brasted: protected by strong emplacements from the sea. It has a church and good landing place, though somewhat deficient in shelter outside of the dikes. Pop. 500.

OKHOTSK, a gov E. Siberia, forming a comparatively narrow tract, about 1000 m long with a breadth, varying from 80 m. to about 200 m. stretching along the Sea of Okhotsk, which washes it to the E. and partly separates it from the peninsula of Kamtschatka, and bounded on the E and N.E. by the country of the Tchukotka, and on the N.W. and S.W. by gov Yakutsk. Its coast line is indented by several large bays, among which are those of Fougouk, Gygouk and Tanush and its interior is traversed centrally and nearly throughout its whole length, by the chain of the Stanover mountains, which here form the water-shed between the Pacific and the Arctic Oceans; sending to the former numerous comparatively short and rapid streams, which fall into the Sea of Okhotsk and giving rise to several larger rivers—the Onoul, Kolma and Indigirka which flow N into the latter. Notwithstanding the rigour of the climate, there are considerable tracts of healthy pasture and scattered clumps, chiefly of alder and birch frequented by numerous animals valuable for their furs. The coasts are well supplied with fish and are often visited by large shoals of the whale tribe. The only domestic animals are reindeers and dogs. Amber is occasionally found along the shores of the Gulf of Fougouk. The government is chiefly used as a penal settlement for the most hardened offenders and the inhabitants consist, for the most part, either of them or of their descendants. Pop. about 7000.

OKHOTSK, or **MOSE-OKHOTSKOY**, a *sea* in the E. of Siberia forming a branch of the North Pacific Ocean, and extending from the Kurile Islands N.W. to the coast of N. Korea, about 1000 m., with a breadth between the N.E. coast of Cham and the peninsula of Kamtschatka, of about 550 m. It contains several islands, the largest of which, Saghalien is situated near its S.W. shore, forms a number of large gulfs, chiefly on the N., among others, those of Tanush, Gylghansk, and Fougouk, and receives numerous rivers, of which, however only one, the Amoor or Saghalien, is of great magnitude. The shores are covered with ice from November to April, but

the main expanse continues open throughout the year, and being generally deep, without shoal or mudbanks, affords a safe navigation, notwithstanding the fogs and storms with which it is often visited.

OKHOTKA, a river Siberia, which rises in the S.E. slope of the Stanover mountains, flows S.E. and falls into the sea at the town of Okhotsk, total course, 290 m. It is navigable only by small barges, and even by them merely within the influence of the tide, which gives an additional depth of from 6 ft to 8 ft.

OKHRIDA, a *to* Albania. *See* **OKHRIDA**.

OKI, an Isl group, N Pacific, belonging to Japan, about 50 m. N Cape Isumino, W coast Nippon. It is composed of four large and several smaller islands, extending about 45 m. S.S.W. to N.N.E. The largest island is penetrated in the S. by a large bay on which is its chief town, called Yomaco.

OKLADNIKOV a lake Russia, gov Archangel, 40 m. E. Mosen, length, E.N.E. to W.N.W. about 80 m. breadth nearly 9 m. It receives several small streams, and discharges itself by the Lokina into the Pasa, an affluent of the Mosen.

OKNA a small *to* European Turkey, Moldavia, 1 bank Tatrov on the borders of Transylvania, 89 m. N.W. Galatz. It is well built, and has an extensive salt-mina.

OKNA MARE, a *to* Turkey in Europe Walsheia, 9 m. S.W. Hianuk with five churches, three chapels, and very valuable salt-mines, which are estimated to yield 85000 **OKORMELZI** (Walsheia, Falcen) a vil Hungary, co Marmaros, about 50 m. from Baiget with a Greek church, and a saw-mill. 1 *pop* 1655.

OKOSIV, a small uninhabited Isl, Japan Sea off the S.W. coast of Yesso lat 42° 4' N. lon 139° 24' E. (N.)

OKSU a *to* Little Bokhara. *See* **AKZOU**.

OKUKHANE, a vil Austria, Falcen, on the Helobostina, 1 m. from Podogray. It is the headquarters of a frontier regiment, and has a church, and two mills.

OLAH Sussy Löröth, a vil Austria, Transylvania, military dist. Bistritz, about 16 m. from Borgo-Frunk. It is the headquarters of a frontier regiment, in which the greater part of the inhabitants are soldiers, and has a handsome church. 1 *pop* 1910.

OLAND or **OLAND** an Isl Sweden, Rik Kalmars, in the Baltic, and separated from the mainland by the Kalmar Sound which, opposite to the town of Kalmar where it is narrowest, does not exceed 3 m. broad, but at the N. extremity of the island is 10 m. and at the N. extremity less than 15 m. broad. The island is long and narrow stretching N. to S. 85 m., with an average breadth of not more than 8 m. and consists almost throughout of limestone rocks, which, at several spots on a line parallel with the W. shore form a range of steep, chalky cliffs, but the island is generally low and between the cliffs and the beach there is a stretch of flat and fertile land though in other parts marsh and mud prevail. There are a few small lakes in the N. but neither there nor elsewhere are there any streams of the least importance. Wood is scarce. The pastures are extensive, and a good many cattle and sheep are reared. The wool of the latter is retained and woven into cloth which forms a considerable article of export. The island contains numerous villages, but scarcely anything which can be called a town. Borgholm which may be regarded as its capital has only a *pop*. of 481.

OLAND ISLANDS, Baltic Sea. *See* **OLAND**.

OLASZY, **OLANEN** or **WOLLENPOON** a market N. Hungary, Thutur Thaus, co. Zips with two Protestant churches. Pop. 3400.

OLAU **OLAU**, or **OLAWA** a *to* Prussia prov Silésie, gov and 18 m. S.E. Breslau, on the Olsu, and on the railway to Cracow. It is defended by a castle, has two churches, an hospital, provincial courts and offices, and manufactures of cloth, tobacco, and paper, the works, breweries, and distilleries. Pop. 5999.—The river runs in the mountainous district, in the S. of Silésie, near Bernsdorf; flows first N.N.E., past Strahlen to Olsu, then turns suddenly N.W. and, after a course of nearly 60 m., joins L. bank Oder at Breslau.

OLAVE-ST MANT-GATA, *par* Eng York (N. Riding); 2120 m. Pop. 2970.

OLBA, a *to* Spain, Arago, prov and about 50 m. from Terrel. bank Myrta; with a church, a primary school; manufactures of linen, a paper and a flour mill, and a trade in corn, indifferent wine and a little silk. Pop. 1465.

OLBEGA, a vil and com Spain, Old Castle, prov and 24 m E. Bera, with a church, courthouse prison primary school manufactures of woollen and linen cloth, several flour-mills, and a trade in corn and cattle. Pop. 1305.

OLBERNHAU a vil Saxony circle Zwitzkau, on the Fische, 23 m. E.E. Chemnitz, with manufactures of firearms lace, and cabinet-work. Pop. 2503

OLCANGU a vil and com Italy Piedmont div Novara, 5 m. from San Germano; with an old church the remains of an ancient castle, and a trade in corn and rice. 11020

OLCESE (Rav.) a vil and com. Italy, 1st district, div Genoa near Rapallo, on a slope of the Apennines. It is occupied chiefly by peasants, and has a parish church. P. 2393

OLD or Wold par Eng Northampton, 1650 ac P. 449

OLD CALABAR, a river Africa. See CALABAR

OLD PROVIDENCE, an isl Caribbean Sea, belonging to New Granada, E. coast, Central America, about 12 m from the nearest part of the Mosquito coast, visible from a distance of 88 m to 96 m. Highest peak 1190 ft. near the centre, lat. 13° 21' N, lon. 81° 31' 50" W. It is nearly 4½ m. long and ½ m. greatest breadth of an irregular oval shape, has bold shores, and on the N. separated by a narrow channel from the isl of San Catalina. The soil is exceedingly fertile, yielding plentifully all kinds of tropical products but cotton is the staple, forming the great object of export along with hides and tortoise-shell in exchange for calicoes, cloth, &c. brought from Jamaica. The chief anchorage is on the N. side, at the village of Isabel. Old Providence was long celebrated as a favourite resort of the buccannars.

OLD BERRIOW, par Eng Worcester, 1180 ac P. 40. **OLDBURY** a town and township England co. Salop. In the heart of an important mining district on the Birmingham canal 5 m. N. W. Birmingham. It is irregularly built but has several spacious modern streets, lined with good houses and shops and lighted with gas. A district church in the later English style with a tower. Independent, Baptist, and Wesleyan chapels an endowed school a prison manufactures of chemical products iron and steel works, and extensive iron and coal mines. Pop. 5114

OLDBURY two par Eng — 1. Salop. 806 ac. Pop. 151. 2. (see the 1st) Gloucester, 1842 ac. Pop. 485

OLDCONNELL, par Ireld Kildare, 3587 ac P. 723 **OLDEBOORN**, a vil Holland prov Friesland, 12 m. S.E.E. Leeuwarden. It is a scattered place, with three churches a school, some trade in butter, cheese, and cattle a copper work, iron-work, three building-yards, and several mills. Pop. 1485

OLDEMARKT, a vil Holland prov Overijssel, 17 m. N. W. Haren, with two churches and a considerable butter market. Pop. 823

OLDENBURG, a grand duchy in the N. of Germany, forming the 30th State of the German Confederation bounded N. by the N. Sea or German Ocean, E. Hanover and Bremen, S. and W. Hanover, greatest length N. to S. 61 m. greatest breadth, 44 m. Area, 1567 geo. sq. m. This former Oldenburg proper, but, in addition to it, the duchy possesses three separate patches of territory, distinct both from it and from each other, namely two in Holstein forming the principality of Lübeck, with an area of 128 geo. sq. m. and Birkenfeld, in the E. of Rhenish Prussia, with an area of 108 geo. sq. m. thus making the whole area 1823 geo. sq. m. Oldenburg proper is set throughout, excepting in the S. extremity, where some low hills appear. The principal rivers are the Weser, the Hunte, its affluent, the Jilde, Hase, Emsse, Vahne, and Leda. There are no lakes of great extent. Storms often blow from the sea, and frequent fogs produce a cold, damp air, which occasionally runs even summer of the proper warmth. The surface, in respect to soil is divided into marshy and sandy land. The former has, in many instances, been removed from the sea, and still is only protected from it by means of dikes similar to those erected in Holland and Holstein. It consists generally of a heavy alluvial soil, capable, when properly laid dry, of yielding heavy

crops of wheat, beans, and hay. The sandy land is very light, and of little fertility and not unfrequently is left in a state of nature, forming extensive tracts of barren heath. A considerable part of the sandy districts were once covered with wood. Much of it has disappeared, but there are still several extensive forests. Agriculture employed in raising not only corn but rape, hemp, and flax and including the rearing of horses and cattle is the principal source of subsistence. Manufactures and trade have made comparatively little progress. Oldenburg is governed by a grand duke, whose power theoretically is almost absolute. The inhabitants are generally a patient and industrious race, but habits of intemperance are very prevalent. For administrative purposes, the duchy proper is divided into seven circles — Oldenburg, the capital; Heseburg Ovelgonge Heidenhorst, Foichte Klippenburg and Faver. Pop. (1857) 259,090 Pop. Lübeck 1650 32,146 Pop. Birkenfeld (1849) 30,464 **OLDENBURG**, a tn Germany cap. above grand duchy, 24 m. W. N. W. Bremen, on the Elbe which here receiving the Havel, forms a harbour. It has a castle, with palace, several churches, college, library of 15,000 volumes, picture-gallery, gymnasium, barracks, naval and military schools, several hospitals, manufactures of refined sugar, soap, and musical instruments numerous breweries and distilleries, and a trade in wood wool and cattle. Pop. 7399

OLDENBURG, a tn Denmark duchy Holsten, on the Little Belts, 30 m. N. E. of Flensburg. In trade once considerable, has greatly fallen off and the inhabitants are chiefly employed in agriculture. Pop. 2400

OLDENBURG, a tn Hesse-Cassel, a bank W. near 26 m. R. W. Hanover with manufactures of linen and woollen cloth, shag, tobacco, and leather, and a trade in linen and cattle. Coal is worked in the neighbourhood. Pop. 1563

OLDENBURG, a tn Holland prov Overijssel, 33 m. E. N. E. Deventer. It has a townhouse two churches a synagogue, and several schools wool-combing spinning, and weaving and manufactures of calicoes, making and dye-works. Pop. 2822

OLDENBURG, or Omsburg, a tn Denmark duchy H. J. stein at the confluence of the Elbe with the Trave, 18 m. W. N. W. Lübeck with important manufactures of salt, &c. obtained from brine springs. A paper mill, and a considerable transit trade with Lübeck and Hamburg. Pop. 4000

OLDHAM a parl and mun. bor. and market in Png. land Lancashire on a height near the source of the Irk a little above its junction with the Merdon and on a branch of the Lancashire and Yorkshire railway 6 m. N. E. Manchester. It is of comparatively recent origin and has risen up with wonderful rapidity chiefly in consequence of the valuable coal-mines in its vicinity and the facilities thereby afforded for the export of coal. In 1760, it contained only 60 dwellings, almost all merely straw thatched huts, and has since increased so as to become a large and leading manufacturing town, irregular in its construction but containing many well built and several handsome streets. It contains, however to be rather poor in public buildings. The more important are the churches of St. Mary a handsome modern structure, in the early English style, with a square tower containing 12 fine stained glass windows, and a window of richly stained glass. St. James, a neat edifice, with a tower and campanile turret, and St. Peter, not particularly deserving of notice, several chapels belonging to the Wesleyan and Primitive Methodist Independents, Moravians, Baptists, Friends, Kilhamites R. Catholics, and Unitarians and the Townhall which is at once handsome and commodious. The chief educational and literary establishments are the Blue-Coat school, occupying an elegant building in the early English style erected by subscription, and liberally endowed by bequests of Thomas Hemmery, the free grammar-school the national and infant schools for the poor, the mechanics institute, hall of science, and subscription-library.

The cotton is by far the most important manufacture of the town and employs the greater part of the mills, which, including those of the vicinity amount to about 160, and are all moved by steam. They are, for the most part, only spinning-mills but there are also numerous weaving-factories, producing fusible velveteens, calicoes, trills, and corduroys.

OLIVA.—1, A tn. in the N of Isl Fuentesventura, one of the Canaries, at the foot of a mountain of same name. It has a church with a tower, two schools, manufactures of ordinary woollen and linen cloth, and a trade in corn, fruit, and some cochineal. Pop. 3122.—2, A tn. in Pinar, gov and 6 m N W Damingo, 3 m. from the Baltic, with a palace, and an old Outpost with a handsome church. Near it are a paper-mill and steel, iron, and copper works. Pop. 1500.

OLIVARES, a vil. Spain. Andalus, prov and 8 m. E Seville. It is well-paved and clean streets, a courthouse, two churches, four schools, and several oil mills and rope works. Pop. 2066.

OLIVARÉS, a tn. Spain, New Castile, prov and 20 m. S. S. W. Caceres. It has a church and a school four-mills, and a trade in corn, fruit, wine, and saffron. Pop. 1122.

OLIVIRA, several places, Portugal particularly.—1 (*d'Assencia*), A tn and par, prov Douro, l. bank Antas, 24 m. S. Oporto. Pop. 2000.—2 (*do Barro*) A tn and par, prov Douro, 12 m. S. E. Avaro. Pop. 1602.—3 (*de Cynde*) A tn and par, prov Beira-Alta, 18 m. S. S. W. Viana. Pop. 2000.—4 (*do Hospital*) A tn and par, prov Beira-Alta, about 50 m. from Coimbra. Pop. 1200.

OLIVEIRA, a tn. Brazil, prov Minas Geraes traversed by a stream of same name from the sands of which gold is washed, 40 m. S. Tamaenda with a church built of marble obtained in the district; inhabitants employed in cultivation rearing cattle, and mining. Pop. tn. 1600 dist., 4000.

OLIVH(A), a tn. Brazil prov Bahia, near the sea, 12 m. S. São Jorge with a handsome stone church and a primary school. Inhabitants, Indians engaged in making articles of pottery. Pop. dist. 1000.

OLIVENZA a tn. Spain Extremadura, prov and 15 m. S. Badajoz, l. bank Guadiana. It is protected by a strong wall, in the form of a polygon with nine sides, and is entered by three gates. The town is laid-out into squares and streets of moderate breadth, and has a townhouse, prison, two barracks for infantry, one for cavalry and another for artillery, a military hospital, hospital for indigent persons and foundlings, two schools, an ex-convent, two hermitages and two parish churches—that of St. Mary Magdalene is a sumptuous temple, with a magnificent portico of white marble. Ex. pressing oil, grinding corn, weaving and making earthenware are carried on. Pop. 2291.

OLIVET, a vil. France, dep. Loiret, 3 m. S. Orleans near the source of the Loiret, with manufactures of cotton fabrics and hosiery and an active trade in wine. Pop. 1179.

OLIVETO, two tns. Naples.—1 A tn. prov Basilicata dist. and 25 m. W. S. W. Matera. Pop. 1111.—2 A tn. Principato-Ultra, dist. and 6 m. E. N. E. Campagna with an annual fair of five days. Pop. 4870.

OLIVHANT a vil. Shetly prov and 27 m. W. S. W. Meath, N. coast, r. bank Elbowe with a castle, and a tunny fishery. A little N. W. are the ruins of ancient Tyndaria.

OLIVOPOL, a tn. Russia, gov and 122 m. N. N. W. Kherasov, on a hill near the confluence of the Simuka and Bug. It is defended by a fortress. Pop. (1842) 8200.

OLKANSKAIA, a fort, Russia, gov Orenburg circle and 9 m. W. Buzuluk, on the Olkan. It forms part of the military line of Samara, and consists of several wall formed and regularly-built streets, and is garrisoned partly by regular troops, and partly by Cossacks.

OLKANZ, a tn. Austria, Poland, 23 m. W. N. W. Crows, formerly a large and wealthy place, which furnished a considerable revenue to the kings of Poland, from its lead and silver mines. Pop. 1200.

OLKHON, an Isl. Siberia, gov Irkutsk, W. shore, Lake Baikal, the largest in the lake, length, 50 m.; breadth, nearly 18 m. and not 1 m. from the coast. The shores are generally steep, and the interior consists chiefly of an elevated plateau. The soil is, for the most part, stony or sandy, but considerable portions are covered by forests of pine and birch; and others have good pastures, on which the inhabitants, Bourkats, feed numbers of cattle. Game is abundant, and the fisheries in the lake very productive.

OLLALLA (Sarrat) two places, Spain.—1, A tn. Andalus, prov Huelva, 36 m. N. Seville with a church a prison, and an hospital several four-mills, and a trade in corn and wine. Pop. 1081.—2 A tn. New Castile, prov and W. N. W. Toledo, poorly built, with a church prison house.

Vol. II

pital primary school, manufactures of socks and several oil and flour mills. Pop. 1039.

OLLERIA, a tn., prov and 88 m. S. Valencia, with a townhouse, prison, two endowed schools, a church, and some trade in horses and mules bought in Catalonia, Gallia, and Andalus. Pop. 3664.

OLLERTON, a market tn. and chapelry England, co. and 18 m. N. E. Nottingham, in the forest of Sherwood. It has a modern chapel-of ease, and a Wesleyan chapel, a weekly market and an annual cattle fair. Pop. 777.

OLLIGNIES a vil. and com. Belgium, prov Hainant, on the Dender 17 m. N. W. Mons with manufactures of linen a brewery a distillery two four-mills, and a trade in corn and wool. Pop. 1463.

OLLIOULES [anc. *Oleolu*] a tn. France, dep. Var, 4 m. N. W. Toulon at the mouth of a wild and barren gorge called the Pass of Ollionles well built, with a manufactory of glue, and an active trade in franks and olive-oil. Pop. 1930.

OLLON a vil. and par. Switzerland can. Valais, square, 2 m. S. E. Aigle, on a height overlooking a large and fruitful plain which slopes to the Rhone. It has a church chief employment, rearing of cattle. Pop. 2692.

OLMILLO a tn. Spain, Leon, prov and 25 m. S. Val Isolda, once surrounded with strong walls of which there are some remains. It has a townhouse, a prison, two hospitals a theatre, and six churches, several of which are fine old these manufactures of earthenware, wax candles, and brandy Pop. (agricultural) 2024.

OLMEN, a vil. and com. Belgium, prov and 83 m. E. by 5 Antwerp on the Great Netho. It has manufactures of common woollens a dye-works a brewery a distillery, two four-mills and a trade in butter. Pop. 1856.

OLMPTIO a tn. France, ad. Comers 12 m. N. W. Sartene well built, clean, thriving. It has a new church, and a chapel. Near it are the ferocious thermal baths of Lormet, temperature, 86° Fahr. Pop. 2010.

OLMISLICH, or *Olman*. See *ALBANIA*.

OLMUTZ [Moravian *Holomouc* Latin *Olomouc* or *Aburwe*] a city Austria, formerly cap. of Moravia, 103 m. N. N. E. Vienna with which it is connected by railway on the March which forms almost a complete circle round it. It is extensively and strongly fortified and rises gradually on all sides towards its centre. A well built, has a cathedral a fine Gothic building erected by King Wenzel III., who was murdered here in 1306, and is buried within the church the church of St. Maurice with the largest organ in Moravia, the church of St. Michael, surrounded by a handsome cupola a townhouse with a lofty tower a university possessing a fine library of 50,000 vols. bishop's palace, arsenal barracks manufactures chiefly of linen and woollen cloth, ironmongery and articles in iron wire and a very important trade. Olmutz is the seat of an archbishop, and the seat of several courts of law and public offices and possesses in addition to the university already mentioned, a throned university gymnasium academy high school Capuchin and Ursuline monastery, an hospital and poorhouse. It is one of the strongest fortresses in the Austrian dominions, but was taken by the Swedes in the Thirty Years war. Frederick the Great besieged it for seven weeks with no success. Lefort was confined here in 1794. Pop. 15,512.—The castle is watered by the March, Decauville, Betschowa, Hama, Oslewa, and Flatitz. Towards the N. and W. it is traversed by hills of considerable elevation, particularly by the Bederes and Schneberg, but in other directions is level, and fertile in grain, hemp, and flax. The mountainous districts are rich in iron which is extensively worked. Area, 152 geo. sq. Pop. 366,000.

OLNE, a tn. and com. Belgium prov and 8 m. S. E. S. Liege, on the Vesdre. It has a church a chapel, primary school and workshops for furnishing firearms. A good many of the inhabitants are millers. Pop. 8156.

OLNEY or *OLNETH* a market tn. and par. England, co. and 19 m. N. E. Buckingham l. bank Ouse, here crossed by a handsome stone bridge. It is generally built of stone, and has a large, ancient church in the English style, with a handsome tower and spire, places of worship for Baptists, Independents, and the Society of Friends, national and Lancastrian schools, and a set of almshouses. The making of bone-lace forms the principal business of the town. Area of par., 3140 ac. Pop. 1899.

OLONA a river Italy Lombardy rises N of Varese, prov Como, flows S.E., passing Varese and Milan at the latter divides into two branches, the one of which joins L. Inza Lombaro, at St. Angelo, while the other joins L. bank Po, at St. Zenone, about 12 m. S.E. Pavia total course, about 60 m.

OLONETZ, a gov Russia lat. 50° to 54° 30' N., lon. 39° to 49° 50' E., bounded N and E by Archangel, S.E., Volenga, S., Novgorod, S.W., St. Petersburg and Lake Ladoga and W. of Finland greatest length, N.W. to S.E. 370 m., breadth, 250 m. area, 60,594 sq. m. The surface of this government is generally flat; but in the N.W. some hills of moderate elevation occur and take the name of the mountains of Olonets, while part of the K. is traversed by the dorsal ridge which forms the water-shed between the basins of the Baltic and the Volga. The nucleus of these hills is granite, overlain by conglomerate and clay-slate.

The drainage of the government is shared, in unequal proportions, between the Baltic, White Sea, and Volga the first, through the nucleus of Lake Onega, receives the largest share, and the second, chiefly by the Onega, receives the next largest, the share received by the Volga is confined to a small portion of the E. The most marked natural feature of the government is the immense number of its lakes, streams, and morasses. The number of lakes—one of them Onega, of the first magnitude—has been calculated to amount to 1500 and that of the rivers, great and small, to 800. The climate is rigorous in the extreme. The winter is long and so severe, that quail-hunting occasionally freezes, and the summer heat, though of short duration is very great. Timber constitutes almost the whole wealth of the government, the lakes and rivers are in general well supplied with fish porphyry and marble are extensively quarried between Lakes Ladoga and Onega—iron-ores are worked to such an extent as to supply two blast-furnaces; copper is also partially worked, and hemp and flax thrive in many of the swampy districts where bogs would fail, and may be regarded as, after timber the most valuable vegetable produce of the government. Trade and manufactures have made little progress, and the want of home employment is so generally felt, that great numbers of the inhabitants, amounting in some summers to nearly a third of the whole, emigrate temporarily into the adjoining governments. Education is under the superintendence of the university of St. Petersburg but the very little progress which it has made may be estimated from the fact, that the government possesses only one printing-press, which is in the hands of the state, and nothing that deserves the name of a bookseller's shop. Olonets is divided into seven districts. One military governor presides over both Olonets and Archangel. The capital of the government is Petrozavodsk. Pop. (1859), 168,000.

OLONETZ, a tn Russia, above gov E. shore, Lake Ladoga, where it receives the Olonets 125 m N.E. St. Petersburg. It has eight churches four chapels, and a prison, a great number of saw-mills on the Olonets, and a considerable trade in furskins. The first building-dock in the Russian Empire was established here by Peter the Great, and some vessels are still built at it. Pop (1842) 1061.

OLONA or OLONA (Latin, *Illece*) tn France, dep. Basses-Pyrenees, on the side and summit of a hill near the Gave d'Aillon, here crossed by a lofty stone bridge, communicating with the large suburb or separate town of St. Marie. It has a church, a seminary; manufactures of checked handkerchiefs, much worn as a head-dress by the peasantry of Aragon and Gascony; woollen bonnets, and a trade chiefly in Spanish wool, Bayonne lams, and other salt provisions, cattle and harness. Olona is also a general depot for the metals and other marine timber sent to the Pyrenees. P. 5466.

OLONT, a tn Spain, Catalonia, prov Gerona 55 m. N. Barcelona, 1 hour. Ferria, at the foot of the volcanic hill Montsepe, which, with six others, likewise volcanic, form nearly a small circle, in the S. part of which the town is built. It has regular, but narrow and ill-paved streets, lined with ill built houses; two large squares, schools for primary education, Latin, drawing, &c. two dilapidated prisons, an hospital for indigent paupers, public baths, barracks, a large handsome parish church, with several other churches and chapels, a cabinet of natural history a pretty theatre, and a small circus for bull-fights. Besides the extinct volcanoes, Olont presents a very singular phenomenon in its *lagunas*, a

name given to certain apertures beneath the houses situated at the base of Mount Mont, from which issue subterranean gusts of wind. They blow with greatest violence in hot weather and are then so cold, that they make the thermometer fall from 89° or 94° (the maximum summer heat at Olont) down to 53° Fahr. In winter the reverse is the case for during the keenest frosts, the thermometer rises to 55° when placed in these subterranean funnels. They are termed to account, in summer for preserving meats and for cooling drinks. Cane willows and cottons, linen, paper, leather, ribbons, and dyes, are made. Olont was destroyed in 1427 by an earthquake, but was soon rebuilt. Pop. 2199.

OL Pte, a tn Rhinisch Prussia, gov and 30 m. S.E. W. Arnberg on the Elbe, cap. circle with three E. Catholic churches, a townhouse, copper and iron smelting-furnaces, and a trade in ironware. Pop. 1998.

OLRICK, par Scot. Cathness; 4 m by 3 m. P. 1973.

OLSA, a river Austria, which rises in the Jablunka mountains, on the N.E. extremity of Moravia, flows N.W. through Austrian Silesia, passing the towns of Teschen and Freystadt, and joins r. bank Oder after a course of about 60 m.

OLSENE, a vil and com. Belgium prov E. Flanders, 13 m S. Ghent, r. bank Lys, near the railway and canal from Ghent to Courtray. It has three distilleries, two breweries, several corn and oil mills, and a tobacco-factory but weaving and husbandry are the chief employments. Pop. 2189.

OLSHANA, or OLCHANA, a market tn. Russia, gov and 15 m. W. Kharkov with well-frequented fairs. P. 2030.

OLSHANSKI, a vil Siberia, gov and about 90 m. N.N.E. Irkutsk, on the road to Yakutsk and on an elevated and humid tract, forming part of the water-shed between the Angara and the Lena, to both of which it sends its waters.

OLST a vil Holland, prov Overijssel 6 m. N. Deventer with two churches, and a school, and some trade in bacon. Pop. 821.

OLSTYNKHA a tn. Prussia. See HONESTEN.

OLTEN (Latin, *Ulpian*), a tn Switzerland can and 20 m. E.N.E. Solothurn, cap. dist. at the confluence of the Duner with the Aar which is here crossed by a bridge. It is well built; has a handsome church, a Capuchin convent, and two educational establishments; manufactures of worsted and cotton hosiery and leather and a trade in wine, paper groceries, and cloth. Pop. 1500.

OLT1 a tn Asiatic Turkey cap of the Dulik country pass, and 70 m. N.E. Erzerum, beautifully situated among gardens, on the banks of the Olt, here crossed by a stone bridge. It is a very ancient, but decayed place, defended by a citadel, partly surrounded by a dilapidated wall, and once the residence of the sultans who ruled the country. Numerous ruins attest its former magnificence. 1 op. about 1590.

OLUTORSKOI or OLUTORSK, a cape and gulf, Behring's Sea, E. coast Kamtschatka. The cape, lat. 56° 56' N., lon. 170° 28' E., rises with a steep ascent, and is rendered conspicuous by a mountain with three summits, the loftest 2537 ft. high. The gulf, W.N.W. of the cape, has lofty shores, lined with precipitous cliffs.

OLVERA (gen. *Foppel*) a tn Spain, Andalucia, prov and 53 m. N.E. Lada, cap. dist. at the confluence of the one of which is crossed by an old castle. It is indifferently built, consisting of houses of poor appearance, arranged in steep but spacious and well paved streets; and has a handsome parish church, adorned with marble sculptures; two primary schools, a large courthouse and prison, manufactures of earthenware, several flour and oil mills, and a trade in agricultural produce and cattle. Pop. 3000.

OLYKA a tn Russia, gov Volynia, about 100 m. N.W. Jitomir with a collegiate church, and a seminary. It was almost destroyed by fire in 1792. Pop. 5600.

OLYMPUS (Mount) a celebrated mountain, European Turkey, prov Trikala, about 10 m. from W. shore Gulf of Saloniki and 25 m. N. Larissa. It rises with two peaks called St. Stephen and St. Elias, to the height of 9754 ft. above sea-level, lat. 40° 5' N., lon. 23° 21' E. The ridges forming its S. base are separated from Mount Ossa by the famous Vale of Tempe, a deep gorge through which the R. Strymonia has forced its way to the sea.

OLZAI, a vil, lat. Sardinia, 53 m. N. Cagliari; with a church, school, manufactures of woolen and linen cloth, and a trade in corn, flour, and dairy produce. Pop. 1980.

OM, river, Siberia, which rises in the N of gov Tomsk, traverses the steppe of Baraba, passes the town of Kansk, and at Ogak joins r bank Irkutsk, after a W S W course of about 380 m. Its principal affluents, which it receives on the right, are the Ugakia, Itoha, Kama, and Tartas.

OMAGH, a market in Ireland, co. Lyrone 37 m. S Londonderry on a steep acclivity, has tolerably well-kept streets, lighted with gas; houses generally of stone, and much improved in late years; a handsome county courthouse, county jail, barracks, and poorhouse; a church, a Methodist and two Presbyterian meeting-houses, and R. Catholic chapel and numerous schools. About a mile from the town there is a large lunatic asylum of recent erection, intended for the locurable inmates of the R counties. Pop 3018.

OMAN, a principality, Arabia, between the most E. angle of the peninsula and the entrance of the Persian Gulf and bounded on three sides by the sea. Ras-el-Had, the most E point on the coast of Arabia lat 22° 33' N lon 59° E. is generally regarded as the S commencement of Oman, but in the interior at least, the limits of this country go as far S as lat 23° N. From Ras-el-Had the coast runs, with an undulation W, in a general direction N W for about 100 geo. m. to Muscat thence it sweeps again in a similar curve, for about 350 m. to Ras Musandam lat 26° 27' N, at the mouth of the Persian Gulf. From this point, the Frate-coast as it is named in the maps, runs S for 180 m. but it is not properly included in Oman, the sea-coast of which, 550 m. in extent lies wholly on the Indian Ocean. About half way between Ras-el-Had and Muscat, a chain of mountains runs for nearly 100 m. E. to W, then winds N W and N following the curve of the coast, from which it is generally 25 m. to 40 m. distant. The most S and elevated portion of this chain bears the name of Jebel Akhdar or the Green Mountains.

The principality of Oman comprises the provinces of Dhorrak, Oman, Jallan and Bata, or Batas. S. of Muscat the hills approach the shore, which they border with hospitable cliffs of bare rock, but at some distance in the interior, S.W. of Ras-el-Had, and behind the hills, lies a fertile tract, which forms the province of Jallan. N.W. of this, round the Jebel Akhdar, and embracing Muscat on the sea-coast, is Oman, properly so called. A few miles N of Muscat, the barren hills recede from the coast, and leave a narrow low tract, watered by periodical torrents, which convert it into a garden and date-grave. This is the province of Bata [narrow valley]. On the opposite or S.W. side of the mountains a similar chain of peaks in the hollows which receive the torrents, forms the province of Dhorrak. The provinces of Dhorrak, Oman, and Jallan, are bounded towards the interior by sandy deserts, wandered over by tribes of Bedouins, who keep the adjacent cultivated districts in perpetual alarm.

Limestone appears to be the prevailing rock in the Jebel Akhdar and S. hills of Oman. Near Muscat, the cliffs are formed of serpentine or of clay-slate. At the N extremity of the peninsula, round Ras Musandam, the rocks are all of volcanic origin, steep walls of basalt or trachyte enclosing the numerous deep lakes. The hills on mountains near the coast, sometimes attaining a height of 9000 ft. are uniformly barren and sterile, and it is only round the Jebel Akhdar which is supposed to have an elevation of 6000 ft. that soil has been collected, and cultivation spreads over a considerable expanse. At Kothra, on the S. side of this mountain, are copper-mines, of little value in their present state.

It is said that the Jebel Akhdar is covered with snow in winter, it is more certain, however, that while in the low tracts of Oman rain falls only four or five times in a month, from October till March, it is abundant on the elevated ridges, whence torrents descend to the plains below, and give to all the slopes the verdure from which the mountains take their name. The climate of the plains is intensely hot; and the cultivated fruits—the banana, mango, sugar cane, &c. are those of India. But in the higher valleys of these mountains grow the spruce fig and grapes. A great quantity of wine, resembling that of Rhine, is made in this district.

The maritime provinces of Bata is crossed by numerous periodical streams, and two said to be constant, which, spread out in irrigation, have rendered that tract a cultivated garden. In the interior, the rivers sink in the thirsty earth, and disappear, but they are not thereby wholly lost. Provision for irrigation in the interior of Oman is

made, on a system characteristic of this part of Arabia, and introduced probably from Persia. The water is collected, and led through the cultivated tracts as tunnels or subterranean canals, called *fahs*. These canals extend often for miles and considering the general low state of industry in the country wherein they are found, they must be regarded as very remarkable works. Abundantly watered by means of these canals, the fields and plantations exhibit a rare luxuriance, and all the fruits and grains of Persia and India, as well as of Arabia, are found in perfection. The inhabitants, in order that they may enjoy the light and air above the dense foliage of the tall trees, build their houses very high, and their watch towers also, well built of stone, often rise to a height of 150 ft. In Muscat are two towers 170 ft. high.

Besides Muscat, the capital of the country and Sohar (which are) there are no towns in Oman, respecting which we are enabled to offer any estimate of population. Sohar, on the N. slope of the Jebel Akhdar, and formerly the Sultan's residence, is said to be a large and well built town. Nizawah on the S. side of the same mountain, stands in the midst of the most populous and most productive country. Muscat a little way to the S, is nearly as large as Nizawah, 800 on the sea coast (lat 22° 37'), is but a collection of huts, made with the leaves of the date-palm but its inhabitants, nevertheless, own about 200 barge or coasting vessels, and carry on a brisk trade. Further N, on the coast, are many smaller villages, apparently very poor, yet possessing in trade and industry abundant resources. It is so plentiful as to be used for manure, the cattle are fed on it in the driest state. Dates and other fruits, are exported to India, where the reputation of the fruits of Oman insures them a good price, and cheaper kinds are imported in return. Cotton is cultivated and manufactured for home use, the sugar-cane is cultivated to some extent, and attempts have been made to instruct the people in the art of manufacturing sugar.

The inhabitants of Oman may be distinguished into three classes—Bedouins, Caffies or clans, cultivating the soil and merchants on the coast. The latter class includes many strangers, particularly Jews and Banians, and indeed the antiquity of the intercourse between this country and India, might be inferred from the circumstance that Hindustani is commonly understood by the inhabitants of the coast. The several tribes are ruled by their own Sheikhs, who do not acknowledge the paramount rights, however they may respect the power of the Sultan of Muscat. (Mishbar, Wells's Atlas of Persia, and Eloy Voyages dans l'Orient.)

OMBAOAL, one of the Navigator's Isles. See MALACA OMBAY an ill. Indian Archipelago, Flores Sea, N W lat 10° 10' N lon 124° 27' E. It is separated by Ombay Passage about 18 m wide one of the best routes from Friepe to China,

WORKERS OF OMBAY — From Frequent, Voyage aux Indes Orientales.

lat. (N W end) 8° 56' S lon 124° 27' E. It is about 50 m. in length, E. by N, and W by E, consists of high land, particularly at the E. part; its coasts all around appear bold and safe to approach. It is populous; but the race by which it is

inhabited are said to be fierce and treacherous. They are reported to be cannibals, and when on predatory expeditions attire themselves in pieces of buffalo hide, and adorn their selves with pig's teeth shells, and goats balls. Their arms are bows and arrows, and they carry their food in bags formed of leaves. Fish, coconuts, rice, honey, and fruits, constitute their chief food. The island produces sugar. Some trade is carried on with Timor exchanging bird's nests and provisions, for iron-work Chinese wares, and linens.

OMBERGHEDEN a vil Sweden, Uta. Carlsbad, in the Fyrisdal, on the W side of a lake only deserving of notice on account of the fair annually held at it for eight days, which is one of the largest in Sweden, and attracts from 12 000 to 13,000 persons.

OMBERLEY a vil. and par. co. and 6 m N Worcester on the Severn here crossed by a bridge, consisting of a gigantic iron arch, with stone piers. It has a modern and very elegant parish church, an Independent chapel, and an endowed school. Area of par 694^{ac} Pop. 2364.

OMBNA a tu. kind of Italian Piedmont, N N W Novara, on Lake Orta, with an ancient church an hospital and a trade in wood and charcoal. Pop. 1460

OMEKON a river, Siberia, which rises in gov Yakutsk in the W slope of the Stanovoi mountains, flows N W, and joins r bank Indigirka, after a course of nearly 100 m.

OMER (Br) [Latin *Andromedopolis*], a tu. France dep Pas de-Calais, in a marshy district, on the Aa, which is here navigable, and at the mouth of the canal of Saint-Pierre, 23 m S.E. Calais. It ranks as a fortress, being surrounded by ramparts, and defended by several out-works but its most important defenses are its marshes and the extent to which they can be laid under water. It is a dull place, though its streets are spacious. It contains a great number of well built houses and has a spacious market-place or Place d'Armes a fine cathedral showing the transition from the round to the pointed style the ancient church of the Jesuits, whose convent is now occupied by the college, the abbey church of St. Martin, at one time the noblest Gothic monument of French Flanders, and, though greatly dilapidated in 1794, only made the miserable ruin it now is by the barbarism of the town magistrates in 1831 public library barracks, and several well-endowed hospitals a court of first resort and commerce, a consoling chamber of manufactures, a communal college, a secondary ecclesiastical school, and an agricultural society manufactures of woollen cloth woollen covers thread, starch oil glass, earthen pipes, fishing-nets, salt, leather, paper beer and brandy and an important trade in wool, corn, wine, oil, flax, coal, &c. A summary bureau for the education of English and Irish II. Catholics, had at one time secured considerable celebrity several of the conspirators in the Gunpowder Plot having been pupils in it Daniel O'Connell also attended it, when being educated for a priest. P. 18,424

OMERKUTE, a tu and fort, beside See AMERKOTE.

OMERKUTL of AMARA CATACTA a celebrated place of pilgrimage, Hindostan, prov Gundwana, 28 m N W Bhatnagar and wild, thinly inhabited country rarely visited except by Hindoo pilgrims to whom its site, at the source of the Gomti and the Varanasi, is the chief attraction.

OMETPEE, Ometpeer or Ometpeer, an Isl Central America, W side Lake Nicaragua, about 3 m long N W to S.E. with a maximum breadth of nearly 2 m, connected with the island of Madaya, by a narrow neck of land which, in a strong breeze from the N E., is frequently overflowed. Its most characteristic feature is a lofty mountain 5100 ft. high, and distinguished at a great distance by muzzles on the Pacific. It presents the form of an almost perfect cone, and is said to have a deep crater at its summit. It is inhabited by an indigenous race of Indians, who raise maize, and possess some cattle, and has a small town called Moyogalpa, with a rich and resilient sugar, who manages the whole community by the aid of an Indian council.

OMET, an Isl Ireland, co. Galway, in the Atlantic, 6 m. N W Clifden; 13 m in length, by 1 m. in breadth. The female portion of the inhabitants are generally engaged in spinning wool and knitting stockings.

OMET par fml. Galway, 20,896 ac. P. 6548.

OMMEN, a m. Holland, prov Overijssel, 22 m S E Deventer r bank Vecht with a church, a school, some bleaching, and saw walk out, and some mills. Pop. 1046.

OMOA, a small seaport in and fort, Central America, state Honduras, lat. 15° 47' N, lon. 88° 3' W (2); on a small bay, forming a good harbour, by which most of the European goods destined for Guatemala and San Salvador are imported an unhealthy place, chiefly inhabited by a few mulattoes.

OMOE, an Isl. Denmark, about 5 m long by 1 m broad, on the coast of Seeland, separated from Aggerhus, by a narrow but deep channel, 65 m S W Copenhagen. Pop. 200

OMOLOV a river, Siberia, which rises in the N slope of the Stanovoi mountains, about lat. 62° N; flows first N N W then W, then N W past Kolumak, and, after a course of about 500 m, unites by several mouths, with the Kollima, about 90 m. above its mouth in the Arctic Ocean. Its chief affluents are the Tschukotkanika, on the L; and the Ussura, Rhodolithova, Travianka, and Kalaitina, on the r.

OMOROVICZA, a vil Hungary, Elster Danube, co. Bacs, 4 m. from Hajluk with a Protestant church, and a trade in corn and fine cattle. Pop. 3632.

OMOULEY, or OMOULEY a river, E. Prussia, gov Konigsberg; rises 18 m. N N E. haldenburg, flows S E expanding into several lakes enters Poland, and joins r bank Narev, total course, about 70 m.

OMRAUTTE a tu. India. See AMRAWUTTY

OMSK a prov or gov W Siberia lat. 44° 30' to 55° N, lon. 61 to 122° E bounded, N by gov Iolobsk, N.E. gov Tomsk, E and S.E. the Chinese Empire, S the Chinese Empire and Independent Turkestan, and W gov Orenburg greatest length, N to S.E. about 1100 m., mean breadth about 300 m. It is traversed in different directions by mountain chains, the loftiest of which are in the centre, and on the S and W frontiers, but its general character is that of a steppe which, though interrupted by these chains, occupies a very large proportion of the whole and is, with few exceptions, so very fertile, particularly in the S., as to convert a considerable part of the province into a wheat desert. The principal river is the Irtysh, which flows across the N.E. part of the province, and drains the whole of it, either directly or by its affluents, of which the Irtys is the principal. The lakes are both numerous and of great extent. The largest is the Tengus, in the S., and only partly in Omsk. The most fertile tract is along the L. bank of the Irtysh, and near the town of Omsk. There corn, hemp, and flax are raised but the rest of the province is poorly wooded, and yields only a scanty herbage. Various valuable minerals are found, especially in the central mountains. The inhabitants are composed of Russians, Cossacks and Kirghises. Omsk is divided into four counties—Omsk, the capital Ust-Kamenogorsk, Petropavlovsk and Semipalatinsk.

OMSK a tu. W Siberia, cap. above prov r bank Irtysh, at the confluence of the Om, 280 m. S E. Iolobsk. It has modern fortifications in the form of a regular polygon, flanked with five bastions, and is the most important military station on the line of the Irtysh. It is, on the whole, well built, and has three churches, governor's house, barracks, and military school. The trade, carried on chiefly with the Kirghises, is of considerable extent, and consists chiefly in trawls, tobacco, &c. but which cattle are given in exchange. P. 11,428

OMUN a tu. W Africa, on Isl. of its name, Old Calabar river, about lat. 6° 11' N lon. 8° 15' E. It contains about 5000 inhabitants, who are represented as a happy simple, and hospitable people. There is also a territory called Omun, extending along the L. bank of the stream.

ONA, a River, Siberia, which rises in a mountainous district on the S.W. frontiers of gov Irkutsk, enters gov Yensel, flows easterly N N W, and, after a course of about 280 m. unites with the Tobolsk in forming the Tselove.

ONASEL, an Isl. Fozes group. See Fozes Islands.

ONATE, a tu. Spain, Biscay, prov Guipuzcoa, 19 m S.W. Tolosa. It has a townhouse, two primary schools, an station, an hospital, several churches and convents, and manufactures of looks, sails, awails, agricultural and other implements, which are exported woollen cloth, and plain linens. The court of Don Carlos was long stationed here. Pop. 4905.

ONGHAN or CONGHAN par Isle of Man. Pop. 15,021

ONDA a tu. Spain, Valencia, prov Castellon-de-la-Plana, and 37 m N Valencia. In a hilly locality. It has broad and mostly paved streets, and a considerable number of squares,

in one of which stands the townhouse, with strong prisons attached. It also has a hospital for the indigent, two or three schools, four public churches, several chapels, and an extra-mural cemetery, manufacture of fine and common earthenware, glass, paper, a fulling-mill, 18 flour and 23 oil mills. On the summit of a hill, to the E, the town is defended by a large and very ancient fortress, formerly half defended according to historians, five marching walls and 800 towers. Pop. 4517

ONDARSA, a tn Spain, Valencia, prov and about 60 m. from Alicante, with a church a suppressed convent, a townhouse, prison, and primary school several oil and flour mills, and a trade in agricultural produce. Pop. 1280

ONDAREK, a small ill. Hindostan, outside the harbour of Bombay about 1 m. from the mainland, and opposite to the village of Thull.

ONDARROA, a seaport, Spain prov Biscaya, and 90 m. N E Bilbao, accessible only to fishing smacks. It has a townhouse, prison, small hospital, an endowed school for boys, a church, and seven hermitages. Shooting hares, partridges, and sea fowl, in winter, and fishing are the sole occupation of the inhabitants. Pop. 1178

ONDOD a tn. Hungary Thier Danube, co. and about 9 m. from Bucharest, with two churches. The district is generally sandy and infertile. Pop. 3084

ONE AND A HALF DEGREE CHANNEL, a passage through the Maldiva Islands, in the Indian Ocean. It is formed between Adoumate Atoll, on the N and Nadiva Atoll, on the S, has a width of about 50 m., and, being the narrowest channel of the Maldivas, is frequently used by vessels proceeding to Ceylon, in the W monsoon.

ONEA HAJALA V., or **HVA**, an ill. S Pacific, forming the most N of the large islands of Loyalty group, lat. $10^{\circ} 35' 35''$ S, lon. $168^{\circ} 30' 14''$ E. It occupies about the third part of a beam 16 m. in diameter. It is an upheaved coral island, and presents several tracts of coconuts and yams there. On the N side is a large bay open to the E.

ONEATA, one of the smaller Looeys islands lat. $18^{\circ} 24'$ S, lon. $175^{\circ} 61'$ W

ONEGA, several places, Russia.—1 A tn gov and 90 m. S.W. Archangel, on the bank Onega at its mouth in Bay or Gulf of Onega. It has a small harbour from which a little corn, and considerable quantities of wood and fish, particularly herring, are exported. Pop. 1800.—2 A river issues from N.E. extremity of Lake Ladoga, gov Olonets, flows N.E., and on reaching the frontiers of gov Archangel, turns to N.W., and ultimately falls nearly into the centre of the Bay of Onega, in the White Sea. total course about 270 m., but so broken by falls and rapids that it cannot be considered as navigable. It is much used, however for floating timber, and in spring the descent is sometimes hastened by boats. Its principal affluents are the Volocha and Mocha on the E, and the Kona on the W bank.—3 A gulf, forming the S.W. branch of the White Sea, length about 75 m., width at entrance, about 50 m., it contains a great number of islands, of which Holyer is the largest. At its S.E. extremity it receives the river Onega.—4 A lake, near the centre of gov Olonets, and E.N.E. Lake Ladoga, after which it is the largest lake in Europe. greatest length N.W. to S.E.E., 180 m.; greatest breadth, 50 m. area, about 4000 sq. m. It is of a very irregular shape, particularly towards the N, where it is much indented, and forms numerous creeks, bays, and islands. Its shores are generally rocky, and its waters beautifully clear well supplied with fish navigation much impeded by shoals and sandbanks. The principal streams which it receives are the Migma, the Shola, the Vpila, and the Vytiga. Its only outlet is the Svir, by which it discharges itself into Lake Ladoga; but the Murmokol Canal, by connecting its affluent the Vytiga with the Kaysa, an affluent of Lake Illo, has brought it into communication with the basin of the Volga.

ONEGLIA a seaport in Italy Piedmont exp. prov of same name, on the Gulf of Genoa, and 16 m. from Genoa near the mouth of the Impero, here crossed by a magnificent bridge. It is partly surrounded by walls, and otherwise defended, has a court of justice and several public offices, several churches lined by handsome palaces or mansions, a magnificent square, four convents, a college or gymnasium, a penitentiary, a large general hospital, and manufacture of soap, playing-cards,

and leather. It is well situated for trade, but the harbour is very indifferent. The only export of any importance is oil. Pop. 5504.—The *rovina*, in the N, is covered by the chain of the Apennines, from which it slopes down to the Gulf of Genoa. The staple product is the olive, the culture of which occupies nearly three-fourths of the available land. Pop. 57,475

ONEHOUSE, par Long Suffolk 898 ac. Pop. 437

ONEIDA (LAKE), U States, New York, about 80 to E. Lake Ontario. It has nearly E. and W., is 20 m. long, and 4 m. broad. Its waters find a vent by Oneida river into Lake Ontario at its S.E. corner after they have united with the Seneca, and formed the Oswego river. It is a very beautiful sheet of water, and abounds in fish.

ONEKOTAN, or **AKAKUTAN** one of the Kurile Islands N Pacific off S.W. extremity of Kamshutka lat. $49^{\circ} 34'$ N, lon. $154^{\circ} 58'$ E. Length, 30 m., breadth 15 m. It contains one active volcano, Amakusa-yari, and two of doubtful activity. **ONEKUN**, a river, Siberia, in the country of the Chukchis in the N.E. extremity of Asia, which flows N.E. and after a course of about 90 m. falls into the Gulf of same name forming the estuary of the Anadyr, in Behring's Sea.

ONGAR (LAVANG), a market tn, and par Faglad co. Laos. Its town 10 m. S.W. Chienfong pleasantly situated. It has a bank road up here, accessed by a bridge, has a church, a dissenting chapel, a school, and a school, but no manufactures of any kind, the inhabitants being chiefly employed in agriculture. Area of par 508 ac. Pop. 845

ONGAR (Hien) par Eng Laos 4510 ac. Pop. 1147

ONGHIN a river, Mongolia, rises about lat. 40° N, lon. 104° E, flows S.E. and discharges itself into Lake Kurgan-Ulan Nor on the N. of the desert of Gobi, total course, 700 m.

ONGILAI a river, Madagascar, see Diarocro.

ONGILO, or **ASOULA** a tn. Hindostan, 175 m. N. Madras. It is a small, irregular place, composed of mud huts, but has a detached fort faced with stone, and flanked by round bastions. The district is not very fertile, but remarkably rich in copper ore.

ONGOLOGLER a tn Hindostan prov Orissa, 59 m. W. Cuttack, lat. $20^{\circ} 34'$ N lon. $85^{\circ} 11'$ E. exp. of an extensive secondary fertile in rice, and most of the Indian grains also cult, cotton was formerly, but much of it is still on the land with jungle.

ONIBURY, par Eng. Hants 1699 ac. Pop. 367

ONIL a tn. Spain prov and 40 m. N. Alicante. It has three squares, a townhouse, an hospital, the ancient palace of the Marquis de Los Agnes, two churches and two schools. The inhabitants are scattered over the whole peninsula, as dealers in fruits, both indigenous and colonial and particular drugs, in knowledge of which they excel. Pop. 2090

ONION a river, U States, formed by several small streams in the N. of Vermont flows S.W. 5 S.W. to Montpelier, where it is augmented by a large affluent, runs N.W., and ultimately falls into Lake Champlain 5 m. N. Burlington. Part of its course is through the Green Mountain range. total course, about 70 m.

ONIL, or **ONIA** an ill. Spain off the coast of Lallio, at the N.W. entrance of the Rio de Pontevedra, about 5 m. long and nearly 2 m. broad. It has precipitous shores, and a small harbour defended by a battery.

ONKELZELLE a vil and com. Belgium, prov E. Flandrs, par bank Dender 27 m. S.E. Ghent, with a flour mill, inhabitants employed chiefly in weaving linen. Pop. 1187

ONVAINO, a vil. tunc, par Nord, 4 m. N.E. Valenciennes, on the Scheldt, with native manufacture of linen, sugar, clay pipes, bricks, nails, beer, and cheese. P. 8420

ONO, one of the smaller Fijee isls., a considerable distance S. from the main group lat. $16^{\circ} 45'$ S, lon. 178° W

ONOD a market in Hungary, Thier Thule, on Borsod r bank bago, 40 m. N.W. Debreczen with two churches, a synagogue, and the ruins of an old castle. The Turks were defeated here in 1683. Pop. 2840

ONON, a river Mongolia rises in mountains which mark the N. boundary of Mongolia lat. $49^{\circ} 40'$ N, lon. $110^{\circ} 2'$ E, whence it flows N.E. enters Russia, gov Irkutsk, and joins the Ingoda 30 m. S.W. Nerchinsk, forming with the river just named the Shilka, total course, about 270 m.

ONONDAGA, a lake U States, New York, E of Antwerp, 8 m. long, N.E. to S.S.W. and from 2 m. to 4 m.

breast. Its water is fresh, but it is famous for the salt springs found along its shores. In 1832, the quantity of salt obtained from these springs was 4,525,533 bushels, being an increase, over 1831, of 208,418 bushels.

ONORE, a seaport in Hindostan, prov. Canara. lat. 14° 16' N; lon. 75° 32' E.; near the entrance of a salt-water river. It was formerly a place of great commerce, and has still a considerable trade in pepper, rice, &c.

ONRUT, a small Isl. Indian Archipelago, N coast Java, 9 m. N N W Batavia. It is nearly circular about 4800 ft. in circumference, and about 6 or 8 ft. above sea-level. The Dutch had formerly fortifications here, and also extensive works for the repairing and building of ships.

ONSLLOW HAY, U States, N Carolina, between Cape Lookout lat. 35° 27' N, lon. 76° 30' W (n.) and Cape Fear, lat. 34° 48' N lon. 77° 57' W (n.); distance between the two points, upwards of 90 m. The indentation forming the bay is very slight. A chain of narrow long, and low islands, with shallow inlets intervening, stretch along its front.

ONSTWEDDE, a picturesque vil. Holland, prov. and 25 m. S.E. Groningen, with a church and school. P 893

ONTARIO (LAKES) one of the great lakes of N America, lying along the N.E. side of the state of New York, and forming part of the boundary between the U States and Canada. Its length is its greatest breadth, 50 m. across, and about 490 m. It receives the waters of Lake Erie, by the Niagara, and discharges its waters by the St. Lawrence into the Atlantic, 1000 m. distant. Its surface is 334 ft. below that of Lake Erie, with which it is connected also by the Welland canal. It is navigable throughout its whole extent, and at all seasons as on account of its depth—in some places more than 600 ft.—it rarely freezes. Many ships and steamers are employed upon it. The most important places on its shores are Oswego and Sackett's Harbour in the U States and Kingston, Toronto, Hamilton, and Cobourg in Canada. The Hudson and the Oswego and Erie canals form a connection, through the U States, between it and the Atlantic.

ONTENIENTE [anc. *Fontenelle*] a m. Spain, prov. and 46 m. S. Valencia, r bank Liranzo. It has a good town-house and prison, a palace of the duke of Almodovar, several endowed and various other schools an hospital for the poor, and several other charitable institutions three parish churches, one of which, St. Mary's, has a beautiful square tower of great elevation. For its grapes, granite, and marble are found. Machines for carding and spinning wool are made and there are 5 fulling, 5 paper 19 corn and 53 oil mills, con- siderable manufactures of cloth and linen, brandy, and del- aware, but all in a declining state. Pop. 9529.

ONTONAGON, a river U States, which issues from a lake in the N of the Wisconsin territory, flows N N W and, after a course of about 100 m. partly navigable, falls into the E.W. shore of Lake Superior.

OUANEE, a small vil. W Hindostan prov. Gujarat, 50 m. S.E. Surat. Near it is a hot spring held sacred and resorted to by Hindu pilgrims.

OUCH, a m. W Hindostan, principality and 40 m. W S.W. Beharunpore lat. 25° 11' N lon. 70° 50' E. near the junction of the Ghaghah and Sutlej. It is formed of three distinct towns, a few hundred yards apart from each other and each encompassed by a wall of brick now in ruins. The country around is richly cultivated the tobacco plant, in particular grows most luxuriantly, and, at the season of inun- dation, the tract is one sheet of green fields and verdure. The fig, vine, apple, and melberry are raised, and indigo is suc- cessfully grown. Pop. 20,000.

OODJANA, a large vil. Hindostan, prov. Cutch Guj. lat. 23° 30' N lon. 67° 49' E, surrounded by a mud wall. There is some cultivation near it. Forage is abundant, but other supplies are scarce.

OODHUPPOOR, a m. W Hindostan prov. Gujarat, 20 m. E. by S. Baroda, lat. 23° 12' N, lon. 74° 7' E., on the road from Malwah to Barroch, on the Gulf of Cambay.

OODHUPPOOR, a m. W Hindostan, prov. Malwah; lat. 23° 55' N, lon. 75° 9' E., formerly a place of considerable importance, as is indicated by its extensive ruins.

OODHUP-PA KORE, a small vil. English, lat. 20° 20' N; lon. 71° 14' E., on the route from Moukies to Loua, inhabitants possible, industrious, and skilful agriculturists.

OODUNTOOR, a m. Hindostan, prov. Sindh, 30 m. N E. Purrenabad.

OUEJIN, a m. W Hindostan, prov. Malwah, 550 m. N N E. Bombay, lat. 20° 11' N lon. 75° 35' E. It is of an oblong form, 6 m. in circumference, and surrounded by a stone wall, with round towers, houses of brick, and roofed with tiles sloped after the European manner. The bazaar or principal street is spacious, and paved with granite. The principal buildings are the mosque, temple, and Shudra's palace—the latter a poor edifice, and so surrounded with houses as to be little observed. The wooden fronts of many of the chief buildings are elaborately carved. About 1 m. N from the present town, stood the ancient city of Oujain or Oujan, which, together with 50 other large towns in the provinces of Malwah and Bagur, were, according to tradition, harried by a shower of earth, about half a century before the Christian era—Oujain being, at that time, the seat of empire, of art, and of learning. On digging on the spot where the latter is supposed to have stood, to the depth of 15 or 18 ft. there are frequently discovered entire brick walls pillars of stone, and pieces of wood of an extraordinary hardness, besides utensils of various kinds and ancient coins.

OUL, a m. to Irel. Limerick, 6538 ac. P 3799

OULEN, a vil and com. Belgium, prov. and 21 m. S.E. Antwerp on the Little Scheldt. It has a distillery, rope-works, and a flour-mill. Pop. 1675.

OOLTGENSLAAT, a m. Holland prov. S. Holland lat. Overflakke 1000 m. S.E. W. Rotterdam near the junction of Hollands-Diep, the Harung-Vliet, and the Volkerak, with a townhouse, ci. wroth school, and a harbour. Inhabitants much engaged in madder-growing. Pop. 1589.

OUMNAK, or **OUNAK**, one of the Alenian mts., N Pacific, and next to Oumakela, the largest of the group lat. (S.W. extremity) 55° 50' N, lon. 108° 42' W, about 60 m. long S E. W. to N N E, and its height measured in the same direction till towards the N it becomes covered with very high mountains, among which is an extinct volcano, covered with perpetual snow. Two active volcanoes are also seen the one near the centre of the island Vovvovskoi, and the other about 10 m. from the N E shore, called Tunkel-ko. Hot springs, resembling the Geysers of Iceland, occur in different quarters. Its inhabitants, who occupy several villages—of which that of Katchebnoo about 8 m. from its E.W. extremity is the largest—cultivate potatoes and turnips, and fish are very abundant.

OUN, a m. W Hindostan, prov. Gujarat lat. 24° 15' N, lon. 71° 45' E. It has one long bazaar street, and was once noted for the thievish disposition of its inhabitants.

OONALASHKA **OONALASKA** or **OUNASHKA**, the largest of the Alenian mts., N Pacific, lat. 53° 52' N, lon. 168° 45' W, about 75 m. in length and averaging 20 m. in breadth. It is mountainous, and in the centre rises the volcano Ma- kouchinsk, about 5491 ft. above sea-level. It contains a depot of the Russian fur company. See **ALUTIAN ISLANDS**.

OONERPOOR, a large vil. Sindh, 30 m. N Hyderabad, r bank Indus, considerably elevated above the water.

OONGA, or **OUNGA**, one of the Alenian mts., N Pacific Ocean, off the peninsula of Alaska, lat. (N point) 55° 42' N lon. 160° 50' W. It is the largest and most W. of the Shumagin group, and extends N to S, about 26 m., with an average breadth of 1½ m. Its N.W. side is level, and terminates in a low cape, called Tonkol. Its S. coast is lofty, and presents some very bold cliffs. There are three bays where anchorage may be had—the largest on the N.E. side, with sufficient depth of water, but different shelter another on the E. side, which protection for wind, but is shallow, and a third on the S. coast. The inhabitants grow turnips and potatoes, and rear pigs and poultry. Vases of workable sand are said to have been discovered.

OONIMAK, or **OUNIMAK**, one of the Alenian mts., N Pacific, the most E. of the Fox Island group about lat. 54° 40' N, and lon. 154° W. It is separated by the Strait of Isanoket from the peninsula of Alaska, and is about 56 m. long, by 25 m. broad. It is traversed by a lofty mountain chain, containing a number of active volcanoes; the loftiest of which, called Oukaladine, is a regular cone, and has a height of 9395 ft. The whole island, indeed, appears to be one vast volcano, and, notwithstanding the numerous vents by which the volcanic products are continually dis-

charging themselves, earthquakes are of frequent occurrence. The only part which is low and level, and apparently not volcanic, is the N.E., where a broad bed of gravel extends along the shore, and a village has been built along the banks of a stream abounding with fish.

COCHJARA, a large tn. N W Hindostan prov Ayazur, 8 m S.W. Rangoon, lat. 25° 51' N lon. 75° 53' E. surrounded by a wall, partly of mud and partly of stone, with round towers. The houses are mostly built of stone, and the palace is neatly constructed, and well fortified.

COCHIA, an ancient tn Hindostan, prov Allahabad, 1 bank Betwa, about 3 m S. Jhansi lat 25° 36' N lon 78° 38' E. In remote times, this was a city of great note.

COEDEGEM, a vil. and com. Belgium prov E. Flanders, 10 m. S.E. by E Ghent; inhabitants chiefly engaged in weaving. Pop. 2183.

COEMIA, a tn and lake, Persia. See LICHHTAH.

COEAKI, a tn Japan, sd Nippon, S.E. extremity, near the Kins Channel 250 m. S.W. Yeddo.

COEIMIA—1, A tn Japan, sd Nippon, E coast, at its S. extremity near the entrance to Kins Channel—2, A small but populous island, Japan, off the S.E. coast of Nippon.

COE EXCOLO, a vil. and com. Belgium, prov E. Flanders, 31 m. N Ghent. It has manufactures of linen and a trade in corn, wood, and cattle. Pop. 1064.

COE FALKLE, a vil. and com. Belgium, prov E. Flanders, 3 m N by E. Ghent, with manufactures of starch, chocolate, tobacco mustard charcoal, and oil. Pop. 5260.

COE FERG, a tn Holland, prov Zealand 13 m. S.W. Middelburg with two churches, several schools, a townhouse, and a small market-place, where the four principal streets terminate. It has manufactures of starch and malt, and a trade in grain. In former times it lay on a sea-arm now sailed up and drained and had a harbour and a considerable trade. Pop. 1690.

COE LAMP, a vil. and com Belgium prov W. Flanders, 8 m. S. Bruges, near the railway and canal to Ghent with six flour-mills, and a salt-rubbish, but weaving and husbandry occupy the bulk of the inhabitants. 1 op. 4023.

COE DUY KKEIKAL, a vil. and com Belgium, prov W. Flanders, on the canal from Furnes to Newport 24 m W S W Bruges. It has a flour-mill, P (agriculture), 1067.

COE FALAL, or **COE FALALA**, a river U. States, rises in Tennessee, on the N.W. frontier of Georgia flows N.W. into Alabama, and, after a course of about 100 m. unites with the Etowah in forming the Coosa.

COE LEBEEK, a vil. Holland prov Gelderland, 3 m W Arnhem with a church, and four schools a saw and two corn mills. Pop. (agriculture) 1024.

COE RHOUL, a tn. Holland prov N. Brabant, 5 m. N. E. Brda. It has a townhouse, two churches, Latin French, and other schools, potteries, breweries, tanneries, corn-mills, a building-yard, and a hat-factory; and some trade in grain, cloth, and timber. Pop. 4566.

COE RIELAND, a vil. Holland, prov Zealand, sd Duiveland 6 m. N.E. E. Zierikzee, a cloudy-built good-looking place, with a church, and a most townhouse in the market-place. Pop. (agriculture) 917.

COE RZKELE, a vil. and com Belgium, prov E. Flanders, 9 m. S.E. Ghent; with two breweries two candle-factories two flour-mills, an all mill, and distillery junc weaving, and village. Pop. 3511.

COE RZKELE, a vil. Holland prov Zealand sd. N. Brabant, 9 m. N.E. E. Middelburg; with two churches and a school. Pop. 895.

COE RZKELE, a vil. and com Belgium, prov and 15 m. E. N. E. Antwerp; with manufactures of woollens, corings, and earthenware, brick and tile-works a brewery, dye-works, and a trade in corn, wool, and wood for fuel. Pop. 1115.

COE RZKELE, a vil. and com Belgium, prov W. Flanders, 30 m. S. by E. Bruges. Brewing and the manufacture of tobacco are carried on. Pop. 2547.

COE RZKELE, a vil. and com Belgium, prov W. Flanders, on the Meer, 36 m. S.W. Bruges, with three breweries and two flour-mills. Many of the inhabitants are fishermen and sailors. Pop. 1688.

COE RZKELE, or **COE RZKELE**, a vil. and com Belgium, prov E. Flanders, on the Levee. It has manufactures of linen, a trade in yarn, and a flour-mill. Pop. 1065.

COE RZKELE, a vil. and com Belgium, prov W. Flanders, 27 m. S. by E. Bruges. Weaving, grinding soap, exporting oil and husbandry are carried on. Pop. 2537.

COE RZKELE, a tn Holland, prov Overijssel, 85 m. S.E.E. Zwolle. It has a small but suitable townhouse, two churches, a synagogue, several schools, manufactures of calicoes, bombazines, and chlorey a bleachery and two corn mills. Pop. 1474.

COE RZKELE, a tn and fort E. Hindostan prov Mysore, 48 m. N. E. Seringapatam lat. 12° 57' N lon. 77° 12' E. The rock of Coetradroog forms the northern termination of a chain of hills that intersects the table-land of Mysore.

COE RZKELE, a small tn. Bouchonlatz prov Lus lat. 25° 44' N lon 66° 35' E. 25 m. N. Boncompagne. It is clean and well built, and occupies a pleasant situation amidst groves and fields of grain and cotton which is remarkably abundant and excellent. The inhabitants have large flocks of sheep and goats, besides herds of black cattle and camels. Pop. 2600.

COE RZKELE, or **COE RZKELE**, a tn. S. Pacific lat. 37° 37' 40' S lon 144° 15' W about 64 m. long, and 18 m. in circuit. It presents a cluster of high, craggy mountains, some of them terminating in remarkable peaks and descending, almost perpendicularly to the water's edge, with ravines between them clothed with shrubs and dwarf trees. 1 op. about 1500.

COE RZKELE, or **COE RZKELE**, a market in Austria Moravia, circle and 11 m. S.E. Igau, 1 bank Brznezka, with a parish church and two flour-mills. Pop. 181.

COE RZKELE, a tn. Russian Poland, 100 m. S. Warsaw in a pleasant and fertile district in the Opolewka, with four churches, a synagogue and an important fair 1 (1841) 3416.

COE RZKELE, a vil. and com Belgium, prov E. Flanders, 16 m. S. Ghent; inhabitants chiefly employed in linen weaving, agriculture, and cattle-rearing. 1 op. 2120.

COE RZKELE, a tn. U. States, Louisiana, near the head of the Vermilion about 210 m. W. N. W. New Orleans, with two churches, a college and a considerable trade.

COE RZKELE, a vil. and com Belgium, prov E. Flanders, 16 m. S. Ghent; inhabitants chiefly employed in linen weaving, agriculture, and cattle-rearing. 1 op. 2120.

COE RZKELE, a tn. U. States, Louisiana, near the head of the Vermilion about 210 m. W. N. W. New Orleans, with two churches, a college and a considerable trade.

COE RZKELE, a vil. and com Belgium, prov E. Flanders, 16 m. S. Ghent; inhabitants chiefly employed in linen weaving, agriculture, and cattle-rearing. 1 op. 2120.

COE RZKELE, a vil. and com Belgium, prov E. Flanders, 21 m. S.E. Ghent. It has manufactures of linen, a brewery and two flour-mills. Pop. 1995.

COE RZKELE, a tn. An isolated mountain, peninsular and about 45 m. N. E. N. the town of Malacca, about 5700 ft. in height with a nucleus of granite, traversed by quartz veins, from which much of the gold found in that part of the peninsula appears to have been washed—2 A gold district, New S. Wales, Bathurst co., between the rivers Macquarie and Lewis, 118 m. W. N. W. Sydney.

COE RZKELE, a vil. and com Belgium prov Lunburg 1 bank Meuse 24 m. N. E. Hasselt. It has three breweries, a distillery, a brick works, a saw and two flour mills. P. 1135.

COE RZKELE, or **COE RZKELE**, a tn. Russian Poland, 68 m. S.S.W. Warsaw, 1 bank Drewna, with four churches, and several well-frequented fairs. A battle was fought here in 1656 between the Poles and Swedes. Pop. 1475.

COE RZKELE (Portuguese, O Porto, The Port), a large city and seaport Portugal, prov Douro, on a steep declivity r bank, and about 2 m. from the mouth of the Douro, lat. 41° 11' N, lon. 8° 37' W, 160 m. N. Lisbon. The appearance of the city on a first approach, is very prepossessing; the houses rise one above another in terraces, and being all white-washed give it an air of great cleanliness; but in reality most of the streets are narrow, crooked, and dirty and the houses irregularly constructed. Still there are quarters of the town where the houses are well built, light, neat, and regular, and the streets broad and straight, and shady diversified with gardens full of vines and orange-trees. In one of the principal streets is situated the British Factory-house, a

handsome building of white granite, with a beautiful facade the theatre, also, is a very tasteful structure. There are 11 public squares, called *congoas*; 15 convents; 10 hospitals and 90 churches and chapels, including a spacious cathedral.

The churches are said to be in a very filthy state, and from the custom of burying the dead within their walls they are most unwholesome. One of the most striking architectural objects in Oporto is the Torre dos Clerigos [Tower of the Clergy] attached to the church of same name. Near it is the market called *condemna* which is well supplied with fish fruit, and vegetables—the vendors all women.

Oporto has a good harbor when once gained, but a shifting bar across its entrance renders it difficult of access. There is a quay extending the whole length of the town, on

some manufactories of hats, silks, linen stuffs, and pottery, besides rope-walks and dock yards; but none are thriving. The climate is damp and foggy in winter. The unhealthy season is from the beginning of July to the end of August.

The best during the day is quite oppressive, although a cold wind prevails on the river and a chilling sea-fog comes up the Douro every evening at the turn of the tide. Oporto was capital of Portugal till 1174, when the seat of government was transferred to Lisbon. It was taken and sacked by the French in 1805 who retained possession of it till 1809, when the British crossed the Douro, and compelled them to retire. Having sided with Don Miguel it was besieged in 1831-3 above a year by the troops of Don Pedro, when much of it was destroyed and its trade was for the time annihilated. In 1847 it declared in favour of the Insurrection against the government of Donna Maria.

Pop. including suburbs, 80,000.

OPOTSCHNA is in Russia gov and 78 m. S. Iskov with a wooden church, and a considerable trade in flax. Pop. (1849) 3,068.

OPOTSCHNA, or OPOTSCHNA, a town in Bohemia, circle Königin, r. bank Goldbach, with two churches, a school house, Capuchin monastery, and a fine old castle, with a chapel and cloister. Pop. 1,486.

OTFA a river, Germany, which rises in the Sudeten on the N. frontiers of Moravia. It flows easterly to E.S.E. past the towns of Jägerndorf and Troppa, and forming part of the boundary between Moravia and Prussian Silesia, and joins the Oder about 10 m. S. of Ostrau.

OPPEL, a gov. Prussia, forming nearly the whole of Upper Silesia and bounded, N. by gov. Posen, N.E. and E. by Poland, S.E. by Galicia, S. and S.W. by Moravia, and W. and N.W. by gov. Breslau.

area, 576 sq. m. The surface is generally hilly, particularly in the N. and E. and is extensively covered with forest. It belongs chiefly to the basin of the Oder which traverses it from S. to N. but partly also to the Vistula, which forms its boundary on the S.W. The lakes are both large and numerous. The climate is generally cold and moist, and the soil is by no means fertile, though particular districts produce corn beyond their own immediate wants also flax, hops, and fruit. The minerals are numerous, and include argillaceous sand, iron tin, alum, copper, and coal. Manufactures, with the exception of iron, have not made much progress. The principal

OPORTO.—From Victoria Railway of Portugal and Spain.

one side of which is a street, and on the other a wall, raised for the purpose of fastening ships' masts. The river Douro is subject to extraordinary and dangerous freshes by the rains or melting of the mountain snows. On these occasions boats are placed on the quay to secure the safety of vessels, as no cables will then hold them. During the summer months, the best anchorage is off the city. The principal trade of Oporto is in wine, white and red, but chiefly the latter. The lower articles of export are oil, annise, lemons, oranges, wool, refined sugar, cream of tartar, salt, leather, cork, and linen. The chief imports are corn, beef, sugar, coffee, deals, woolen, cotton, and hardware from England, silk, both from England and New-Brabant, hemp and flax from the Baltic, and rice from N. America. The shipments of red port wine, in 1848, amounted to 80,944 pipes, of which 28,854 were for Great Britain. In 1858 the shipments amounted to 84,908 pipes, of which 30,444 were for Great Britain. There are

trade in wood. The government is divided into 16 cercles. Pop. (1849) 950,912.

OPPEL, a town, Prussia, prov. Silesia, cap. above gov. I bank Oder, here crossed by two bridges, 58 m. S.E. Breslau, on the railway thence to Grotto. It is walled, and has four churches, a synagogue, gymnasia, and several other schools, a deaf and dumb asylum, two hospitals, an infirmary, and several manufactures of linen, and famous glass-ware, a tobacco-factory, and some shipping-trade. P. 7,736.

OPPENAU, a town in Baden, circle Mittelhau, 10 m. E. Oppenau. It is walled, has a parish church, and hospital; manufactures of maps, a brewery, distillery, three dye-works, and a bathing establishment. Pop. 2,100.

OPPENHEIM, a walled town, Hesse-Darmstadt, 15 m. S.W. Darmstadt, I. bank Rhine. It has three churches, one of them a beautiful Gothic structure, in a dilapidated state; a synagogue, hospital, ruined castle, and a trade in wine. P. 2,448.

OPPIDO a tn. Naples, prov. Calabria-Ulbra I. dust, and 4 m. E.S.E. Palmi, the son of a bishop and near the site of a former town, which was almost entirely destroyed by the great earthquake of 1783. Pop. 8000.

OPPOVA, a vil. Hungary, Barant of Temesvar, on the Temes, 16 m. N. Belgrade, with three churches, and seven mills. Pop. 3180.

OPPEBBAIS, a vil. and com. Belgium, prov. Brabant on the Great Goele, 23 m. S.E. Brussels with a brewery, a flour-mill, and a trade in corn, cattle, and wool. P. 1613.

OPWYCK a vil. and com. Belgium, prov. Brabant, on the confines of E. Flanders, 10 m. N.W. Brussels with several breweries, a distillery flour-mills and a trade in agricultural produce. Pop. 3586.

OR, a river Asia, rises in Independent Tertiary in the Kirghis steppe, near lat. 48° 30' N. lon 69° E. flows N. and, after a course of about 190 m. joins L. bank Ural near Orsk.

ORAGAWA a tn. Japan, on a bay S.E. side of Niphon, about 25 m. S.S.E. Yedo. It is a place of considerable importance, and has a custom house, at which all the junk proceeding to the capital must pass. Its harbour could contain 1200 junk, and from the complete command which it has over the trade of the capital, may almost be considered as the key of the empire. Pop. about 20,000.

ORAINSON, or **ARTHOXY KAAH** an isl. S. Pacific, off E. coast New Ireland about 15 m. in circuit, lofty well wooded, particularly with cocoa-trees and well cultivated.

ORAN, a tn. Algeria cap. prov. and on a bay of same name, 302 m. W. S.W. Algiers lat. (light) 35° 44' 15" N. lon 0° 41' W. It stands on both sides of the Oued-el-Bahli and at the foot of the peak of St. Croix or Marguile, one side of which rises in the form of an amphitheatre. It is surrounded with fortifications of considerable strength. It tolerably well built consisting of two principal divisions, separated by a well formed street lined with poplars and has a handsome parish church, formerly a Mahometan mosque another ancient

opulously supplied, still by no means clean. Some magnificent Roman remains still exist, and attest the importance of the ancient Aramo. The principal are the theatre, of which the colossal wall that formed the scena, and the shore of the semicircle is still conspicuous for miles around, overtopping all the modern buildings in its neighborhood adjoining the theatre are some remains of the circus or hippodrome and near it is a triumphal arch. The manufactures consist of linen prints, napkins, and serge, and there are also silk and madder mills. The trade is in corn, wine, brandy, oil, truffles, saffron, honey, wax, madder &c. The title of Princess of Orange, borne by the house of Nassau, is derived from this town. Pop. 5786.

ORANGE, a dust. in the S.E. of France which originally formed part of Gallia Narbonensis, and at the end of the 7th century became an independent county. The last com. bequeathed it as an inheritance to the founder of the United Provinces, William III. of England on whose death Frederick of Prussia obtained the succession, in right of his mother the William's eldest sister and ceded it to Louis XIV. by the peace of Utrecht, in 1713. It has since remained with France, and forms part of dep. Vaucluse. Its capital was the above town, Orange.

ORANGE, a bay Terra del Fuego E. side, Harby Port, lat. 56° 31' S. lon 68° 30' W. It is one of the few excellent harbours on this coast and while large enough to contain a squadron of line-of-battle ships, is not more commodious than safe. The depth close to the shore, is 8 fathoms and nowhere exceeds 20 fathoms, with a fine sandy bottom. Both wood and water are abundant.

ORANGIF RIVER, **GAHSE**, or **GAHSE** a river S. Africa, forming the N. boundary of Cape Colony and falling into the Atlantic in lat. 28° 27' S. lon 16° 18' E. It is formed in lat. 29° 6' S. lon 27° 20' E. by the junction of the Ky Gariep or Vaal Yellow River with the Nu Gariep, or Black or Crocodile River and flows in long sweeps N.W. & W. to its mouth in the Atlantic, where it is about 400 yds across total course, about 650 m. The Ky Gariep, or Vaal or Yellow River rises in the Drakenberg or Quathlamba mountains, W. of Port Natal flows with a great sweep, E. to W. to its junction with the Nu Gariep, receiving numerous affluents in its course of above 400 m. The Nu Gariep, or Black or Crocodile River rises in the same range of mountains, and near the same locality, as the above river and flows, with a long sweep E. to W., to the junction with the Ky Gariep total course, its about 400 m.

ORANGIF RIVER STATION, a recently settled portion of S. Africa, beyond the N. frontier of Cape Colony. It is comprised between the Nu Gariep on the E. and the Ky Gariep or Vaal on the N.W. and N. and borders on Natal on the E. length, 375 m., greatest breadth 250 m. lat. 27° 20' S. lon 24° 15' E. to 28° 45' E., area about 70,000 sq. m. It forms a high table-land having a mean elevation of probably 6000 ft. The W. and N. part stretches out into immense flats, which rise gradually S. to the Wit Mountains, and E. to the Rios Mountains. It enjoys a temperate climate is intersected by numerous streams, and is admirably adapted for the rearing of cattle and woolled sheep. In 1848 it was declared British territory but was subsequently given up, and now forms a republic. P. (of European origin) about 15,000 (total), about 3000.

ORANGIF ISLAND one of the Bonagos, W. coast, Africa lat. (W) and 11° 10' N. lon 18° 20' W. It is of volcanic origin, and very barren, with a sandy soil.

ORANI, a vil. Isl. Sardinia, 31 and 40 m. S. Cagliari with a church, convent and primary school; limekilns, and a trade in corn, wool, skins and cheese. Pop. 1840.

ORANIDO, a valley in N. of Molesburg, near the frontier of Herazgovina. It is about 2 m. long, by 1000 ft. broad and it has been the scene of many desperate combats between the Montenegrins and Turks.

ORANIENBAUM, a tn. Anhalt-Dessau, 9 m. E.S.E. Dessau, with two churches, a castle, and three mills. P. 2010.

THE GATE OF ORAN.—From Bertranger's Algeria.

church, built by the Spaniards in the time of Charles V., and now attached to a large modern hospital, an old castle arsenal, &c., and several fine gardens. The water near the town is shallow, and the anchorage very limited but about 8 m. to the N. of Oran, Mers-el-Kehir has a large and commodious harbour, in which great improvements have recently been made, and at which a considerable trade is carried on. The aggregate value of the imports and exports amounting to about 2700,000. Pop. (1849), 24,845, of whom 17,281 were Europeans.—The **WIT RIVER** forms a long belt of land stretching along the Mediterranean, bounded, E. by prov. Algiers, S. the Sahara desert, and W. Morocco. It is divided into the four departments of Oran, Arzew, Mostaganem, and Mascara, area, 86,899 sq. m. Pop. 600,000.

ORAN, par Irel. Eoccommon; 5181 an. Pop. 836.

ORANGE (Latin, *Arenaria*), a tn. France, dep. Vaucluse, 16 m. N. Avignon. It has tolerably well-built houses, narrow and crooked streets, adorned with several fine fountains.

ORANIENBAUM, a *tu*, Russia, gov and 18 m. W St. Petersburg & shore, Gulf of Finland. It has a handsome imperial palace, built by Menshikov, long the favorite of Peter the Great; a Greek church, a Lutheran chapel, marine hospital, and a fort in a ruinous condition. P. 18449, 101A.

ORANIENBURG, a *tu*, Prussia, gov, Pomerania, 10 m. NW 19 m. N W Berlin; with two churches, an orphan hospital, and manufacture of calico and shirtings, earthenware, and chemical products. Pop. 3368.

ORANIENBURG, a *tu*, Russia, gov and 90 m. S E E. Riazan, at the confluence of the Yagouza and Riazan; with a considerable trade in corn. Pop. 2850.

ORANMOE, a *tu* and par. Ireland, co. Galway. The town 5 m. E. Galway on an inlet of the sea, has a parish church, a R. Catholic chapel, and two schools and was at one time celebrated for its woollen manufactures, by hand-spinning and weaving. Area of par. 17 700 ac. Pop. 5038.

ORAVICA, two places, Hungary, nearly adjacent to each other, co. Krasova, 58 m. S E E. Tamasvár. The less has pop. 1901. The larger called also Nemet-Oravica, is a mining town; contains two churches, and has in its neighborhood silver, iron, and copper works. Pop. 5753.

ORB, a *tu*, Bavaria, circle Lower Franconia, 41 m. N W W. Würzburg the seat of a mining directory and several other public offices. It has a church mill-works, producing annually about 1500 tons of salt; paper, oil, bark, and other mills, and a mill in cattle. Pop. 4469.

ORB (Latin Orbis) a river France, which rises in the Cevennes, dep. Aveyron, flows S W, then S E E. passes Bevers, and falls into the Gulf of Lion, total course, 60 m.

ORBANSAY an island, Scotland Hebrides between Barra and South Uist. Length, 2 m.

ORBASSANO, a *tu* Italy Piedmont, div and 9 m. S W Turin, on bank Sangone, with two handsome churches, a monastery an old castle, and silk mills. P. 8000.

ORBE, a *tu*, and par. Switzerland, cant. Vaud, on bank Orbe, here crossed by a handsome stone bridge, 15 m. N W Lausanne. It is well built, has a church supposed to date from the 6th century and two towers of an old castle. Cardinal Perron and the reformer Viret were born here. Pop. 1873.

The river rises in Lake Rousses, France, dep. Jura, enters cant. Vaud traverses the valley of Joux, forming the lake of that name, and the Lake of Hèrent flows E. to Orbe, then turns N E, and falls in to the lake of Neuchâtel at Yverdon. total course, about 25 m.

ORBEG (anc. Orbecum) a *tu*, France, dep. Calvados, 13 m. S E. Lisieux. It lies blackshale, sandstone, and marble, factories of hosiery, cloths, light woollen stuffs, thread, ribbons, and woollen yarn, and some trade in wool, in woollen fabrics, and in linen thread. Pop. 5910.

ORBETELLO, or **OROVETELLO**, a walled *tu*, Tuscany, gov and 24 m. S by E Grosseto, on a tongue of land projecting into the lake of same name. It has a small harbour, defended by several batteries, and is supposed to be identical with the Roman Rebocum. Pop. 3502. The lake about 5 m. long, by 3 m. broad, communicates with the Tyrrhenian Sea, by a narrow artificial opening.

ORBEY, a *tu*, France, dep. Haut-Rhin, 14 m. W N W Colmar, at the foot of a granite mountain, on which are situated two lakes, Blause and Nole; the former 3425 ft., the latter 3090 ft. above sea-level. Printed calicoes, and other cotton fabrics, are manufactured. Pop. 1705.

ORBY, par. Eng. Lincoln; 2088 ac. Pop. 403.

ORCA, a river kind of Italy Piedmont, which flows S E E. from the Alps to the Po, which it joins, 13 m. N E. Turin. total course, 50 m.

ORCADES, isl., Scotland. See **ORNEY ISLANDS**.

ORLE, a *tu*, Spain, Andalucia prov and N E Granada with a terrace, a castle, two schools, a church, and six hermitages. Pop. (chiefly agricultural), 3308.

ORLE, a *tu*, Russia, gov and 18 m. W St. Petersburg & shore, Gulf of Finland. It has a handsome imperial palace, built by Menshikov, long the favorite of Peter the Great; a Greek church, a Lutheran chapel, marine hospital, and a fort in a ruinous condition. P. 18449, 101A.

ORLE, a *tu*, Prussia, gov, Pomerania, 10 m. NW 19 m. N W Berlin; with two churches, an orphan hospital, and manufacture of calico and shirtings, earthenware, and chemical products. Pop. 3368.

ORLE, a *tu*, Russia, gov and 90 m. S E E. Riazan, at the confluence of the Yagouza and Riazan; with a considerable trade in corn. Pop. 2850.

ORLE, a *tu* and par. Ireland, co. Galway. The town 5 m. E. Galway on an inlet of the sea, has a parish church, a R. Catholic chapel, and two schools and was at one time celebrated for its woollen manufactures, by hand-spinning and weaving. Area of par. 17 700 ac. Pop. 5038.

ORLE, a *tu*, Bavaria, circle Lower Franconia, 41 m. N W W. Würzburg the seat of a mining directory and several other public offices. It has a church mill-works, producing annually about 1500 tons of salt; paper, oil, bark, and other mills, and a mill in cattle. Pop. 4469.

ORLE (Latin Orbis) a river France, which rises in the Cevennes, dep. Aveyron, flows S W, then S E E. passes Bevers, and falls into the Gulf of Lion, total course, 60 m.

ORBANSAY an island, Scotland Hebrides between Barra and South Uist. Length, 2 m.

ORBASSANO, a *tu* Italy Piedmont, div and 9 m. S W Turin, on bank Sangone, with two handsome churches, a monastery an old castle, and silk mills. P. 8000.

ORBE, a *tu*, and par. Switzerland, cant. Vaud, on bank Orbe, here crossed by a handsome stone bridge, 15 m. N W Lausanne. It is well built, has a church supposed to date from the 6th century and two towers of an old castle. Cardinal Perron and the reformer Viret were born here. Pop. 1873.

The river rises in Lake Rousses, France, dep. Jura, enters cant. Vaud traverses the valley of Joux, forming the lake of that name, and the Lake of Hèrent flows E. to Orbe, then turns N E, and falls in to the lake of Neuchâtel at Yverdon. total course, about 25 m.

ORBEG (anc. Orbecum) a *tu*, France, dep. Calvados, 13 m. S E. Lisieux. It lies blackshale, sandstone, and marble, factories of hosiery, cloths, light woollen stuffs, thread, ribbons, and woollen yarn, and some trade in wool, in woollen fabrics, and in linen thread. Pop. 5910.

linked to the Cascade Range. The loftiest mountains occur in the Rocky Mountains, where heights of 6000 ft are not infrequent. The highest elevation of the Cascade Range does not exceed 4000 ft. The territory has been too imperfectly explored to furnish correct data of the capabilities, but there seems every reason to believe that, though the quantity of arable land is comparatively small, the pastures are large enough, and rich enough, to support immense herds of cattle that the forests abound with pines of almost unrivalled magnitude, many individual trees having a girth of 45 ft., and a height of 500 ft., and that the metalliferous fields which have made California so famous, will yet be traced into Oregon. The largest river is the Columbia (which see) which enters Oregon near the centre of the N frontier, whirling through it first very easterly S E W., and then more directly W., to its mouth in the Pacific, receiving in its course the drainage of the greater part of the territory. The settlements yet made have been chiefly along the banks of this river and in the N W., along a remarkable chain of creeks, called Puget Sound, and the heavy crops of grain which have been raised have found a ready market, in consequence of the extraordinary demand created by the gold-diggers of California. The far larger part of the interior is still in the hands of the trapper and hunter to whom the immense quantities of wild animals have furnished profitable occupation. In 1850 the whole population was not estimated at more than 18,393, but many villages and settlements of considerable proportions have already sprung up. One of them, regarded as the capital, and named Oregon city, is situated on the Willamette, about 30 m. above its junction with the Columbia, in the W portion of the territory between the Pacific and the Cascade Range, but being 2 m. above the Clackamas Rapids, has no direct communication with the ocean, so that another village, 12 m. below the falls, is regarded as its port. Oregon takes in its fullest extent reaches to the parallel of 54° 40' N., but by the treaty of partition, in 1846, all to the N of 49° was declared to belong to Great Britain.

OREGON RIVER, a river, N America. See COLUMBIA. **OREGUND** a seaport in Sweden, lin and 71 m. N Stockholm, on the strait which separates Grasseo from the mainland. It is defended by some outworks, has a small harbour with good depth of water but little trade. Pop. 600.

OREL, or **OROGOR** a gov. Russia, bounded N by Tula and Kaluga, N W by Smolensk, W and S W by Chernigov, S. Koursk, S.E. and E by Voronez, and N E by Tambov lat 51° 50' to 54° N. lon. 32° 40' to 38° 50' E. greatest length, N N W to S.S.E., 263 m. greatest breadth, 112 m. least breadth, 28 m. area, 12,740 geo sq m., cap. Orel. Though generally flat, it has high and is intersected by several ridges of limestone, between which deep romantic valleys occasionally occur. The river banks, also, are usually high, though sparingly wooded. The W., and larger portion of the government, is watered by the Desna, and several tributaries, and belongs to the basin of the Dnieper; the central and N portion, watered by the Oka, which here has its source, belongs to the basin of the Volga, the whole of the E portion is drained by the Sema and its tributaries, and belongs to the basin of the Don. The soil, though somewhat light, yields all kind of corn, far beyond what is required for home consumption. Large quantities of excellent hemp, a little flax, and some good hops and tobacco. Cattle are numerous and considerable attention is paid to the rearing of stock, and improving the breed, particularly of horses. Manufactures have made very little progress, and are almost entirely confined to articles of primary necessity, but the trade is considerable, and includes large exports of corn, flour, flax, hemp, honey, iron, steel, and ironware. Education, nominally under the superintendence of the university of Moscow is in a very neglected state. There is only one printing-press within the government, and it belongs to the crown. The inhabitants are very industrious, and generally in good circumstances; but they have little enterprise. Pop. (1850) 1,568,000.

ORELLA, a town, cap above gov. on the Oka, 901 m. S.E. W. Moscow. It is defended by an old fortress and is divided into three quarters, has narrow streets, either not paved at all, or paved badly, and houses generally of wood. It was almost entirely destroyed by fire in 1848, when 1337 houses, 60 of them of stone, four bridges, and immense quantities

of grain, and other merchandise, were destroyed. Previous to the fire, there were 20 churches, 18 of them of stone, but several even of them suffered greatly. It has manufactures of linen, tanneries, ropewalks, worsted-mills, &c., but depends chiefly on trade, for which it possesses admirable facilities, standing on a navigable river, in the centre of a fertile country, and possessing direct communication, by water, with the Baltic Black Sea, and Caspian. It hence forms a great central entrepot for the trade which is carried on with all these quarters and, in particular, is a principal purveyor of corn, cattle, and other provisions, both for St. Petersburg and Moscow. Orel is the seat of a bishop; possesses an ecclesiastical seminary and a gymnasium; and has several important fairs. P. (1840) 32,600; (1851) 35,580.

ORELL, or **ORILLA**, a sluggish, muddy river, Russia, which rises near the S. frontier of gov. Kharkov. Flows S.W. across gov. Poltava, and joins Lake Dniester, 35 m. W N W Ekaterinof total course, 130 m.

ORELLANA, a name given to the **AMAZON** (which see).

ORELLANA (LA VIZCA), a tn. Spain. Extremadura, prov. and 60 m. E Badajoz, on a slope near the Guadiana, with an ancient church, a palace erected in the 14th century a Dominican monastery in ruins, a workhouse, prison, primary school, and manufactures of woollen work. Pop. 1766.

ORELLA, a rd. and soon Finsen, dep. Savoy prov. Moriana, on the Arve 10 m. E.E.F. Moriana with a church iron mines, and a trade in dairy produce. Pop. 1180.

ORENBURG a gov. Russia partly in Europe and partly in Asia, bounded N by gov. Perm, N.W. by Viatka, N. East Simbirsk and Saratov S.W. Astrakhan, S. the Caspian Sea, S.E. and E the steppes of the Khurgh, and N.E. Tobolsk greatest length N.W. to S.E., 800 m. breadth about 450 m., area, 89,800 geo sq m. cap. I. The surface is greatly diversified consisting partly of lofty mountain ranges, partly of elevated plateaus, and partly of low and marshy plains. The principal mountain chain is that of the Ural, which, entering the government in the N. traverses it in a S. but somewhat circuitous direction, and divides it into two unequal portions. The E. portion by far the smaller of the two, belongs wholly to the basin of the Arctic Ocean. Its principal rivers are the Tobol, Aluga, Oul and Mijai. It contains numerous lakes, all, however of small dimensions and is extensively occupied by swamps and morasses. The W portion belongs to the basin of the Caspian which receives its waters partly through the Bala, Samara and other tributaries of the Volga, but to a much larger extent directly by the Ural, and its tributaries Or, Balkanara, Ilek, &c. A considerable part of the government is densely wooded, but a still larger part is occupied by immense steppes, on which trees are rare and natural pastures are ranged over by vast herds of cattle and sheep. The best agricultural districts are on the N.W. where the surface is composed of hill and valley and the soil consists generally of a black fertile loam, capable of raising all kinds of grain, and actually raising it in such abundance notwithstanding the very imperfect culture it receives, that a considerable export into the neighbouring governments takes place. The minerals are extremely valuable, and furnish a large source of revenue to the State. They include the precious metals, particularly gold which abounds along the whole chain of the Ural and in the plains on either side of it, but especially on the E., copper, iron, and salt. The working of these and the different operations connected with them, employ a great number of hands, but manufactures properly so called, have made little progress, though many home made articles are very beautiful, especially light worsted shawls and other fabrics made by the females, similar to those wrought in the Orkney and Shetland islands of Scotland. The trade, however particularly with the nomadic and other tribes, is very extensive. The principal articles are corn, horses, cattle, sheep, hides, furs, honey, wax, metals, salt, tallow, and fish. Pop. (1850) 1,967,000.

ORENBURG, a fortified town, Russia, gov. Orenburg on a slope above a bank Ural. It has miserably paved, but spacious and regular streets, houses, though only a few are of stone, and the far greater number are of wood, of a lively pleasing appearance, a Protestant, a R. Catholic and eight Greek churches all built of stone, two mosques, governor's house, and public offices, exchange, merchant-house, custom-house, Bashkir caravansary, a handsome building, with two towers,

where the business connected with the Bashkire is managed, but no trade is carried on, the agricultural school, and the district and military schools. The manufacturers consist chiefly of woven cloth, part of it army clothing, leather, and soap, and there are very extensive establishments for smelting tallow. The trade with the Khuzestan, and other inhabitants of the interior is very extensive. It is not, however, carried on within the town, but about 2 m. from it, to the E. of the bank of the Ural, where the caravans from Bokhara and Khiva stop and a caravanserai usually called the Tamschhof [Exchange court] or Menovav-dvor, has been erected. In the vicinity of the Tamschhof are immense smelting-houses, in which, in the course of a summer, the tallow of more than 50,000 sheep is melted down. Pop. 1849, 7402.

ORENO, a vil. and com. Italy, Lombardy prov. Milano dist. and 1 m. W. by V. Vercelli, with two churches, and a magnificent palace. Pop. 1427.

ORENSE, a prov. Spain, Galicia, bounded N. by Portugal, E. by Leon and Zamora & Portugal, and W. by Portugal and prov. Pontevedra, area, 4508 sq. m., cap. Orense. It is the smallest and poorest province in Galicia as watered by the Minho, Sil, Avra, and Arnoya, and agriculture, being in a comparatively advanced state, produces rye, maize in abundance, wheat, some oil wine, flax, chestnuts, potatoes, and all sorts of vegetables, besides hemp and hawthorn timber. The iron and copper are found and there are numerous fountains of medicinal waters the best and most frequented being those of Orense and Carballo. The inhabitants are generally engaged in linen manufactures, in agriculture, and in rearing horned cattle and swine. Pop. about 380,000.

ORENSE, a city Spain cap. above prov., 73 m. S.E. Coruña, 1 hank Minho, here crossed by a bridge 135 ft. high, built in 1230, by Bishop Lorenzo. It has generally narrow and short, but well-cleaned streets, primary and advanced schools, a pretty theatre, a townhouse in the principal square, which is surrounded by well-paved colonnades, a prison, an abattoir, and medicinal springs. A cathedral dedicated to St. Martin was built so early as 550 but the Moors in 716 levelled Orense to the ground, and it remained a heap of ruins till 832 when it was rebuilt by Alonso el Casto. The present Gothic cathedral was erected by Bishop Alonso, in 1240. There are several other churches as well as convents. Linen fabrics, leather shoemaking, &c. are made. From Orense, Bonit in vaded Portugal with 28,000 men, and 78 cannon and fifteen he rebated two or three months after being created by the Duke of Wellington. His army reduced to 19,500 stragglers, starved and almost naked. Pop. 4840.

ORERO, a vil. and com. Italy Piacenza, div. Genoa prov. and 8 m. from Chiavari with two churches, and a trade in milk, cattle, and wool. Pop. 1900.

ORESTE, a town Papal States 24 m. N. Rome, on a mountain of the same name, the ancient Soracte, and about 2000 ft. above the level of the sea. Pop. 1460.

ORFAH, or ROMA [anc. Edessa and Justinopolis] a town Asia Turkey gov. and 90 m. S.W. Diarbekir, lat. 37° 8' N. lon. 38° 50' E. It is built on one of two hills and in the valley between them, and is surrounded by a wall 3 m. or 4 m. in circuit. The streets are narrow, but paved, and comparatively clean, the houses and khans numerous, and there are a few excellent caravanserais. It has fifteen mosques and minarets, and manufactures of coarse wools and cotton cloths. Pop. estimated at 50,000, of which about 2000 are Christians, and 500 Jews.

ORFORD, a decayed bor. market tn. and par. England on Suffolk 25 m. E. by N. Ipswich, on the Ore, near the N. Sea. It is much scattered and indifferently built, but its church is a fine old structure, with a square embattled tower. At the W. end of the town are the remains of a Norman castle, supposed to have been built soon after the Conquest. Area of par. 4000 ac. including Havergate Island and God grave. Pop. 1106. Near it are the two Orford Ness lights, 53 ft. above the sea; lat. 52° 4' 8" N. lon. 1° 24' 2" E.

ORGAOZ, or ORGON MOUNTAINS, a richly-wooded cordillera, Brazil, stretching in the direction of the sea-coast, E. to S.E. in prov. Rio-de-Janeiro, São Paulo, and Santa Catharina. The Parahiba in São Paulo, and the Parahibane in Rio-de-Janeiro, separate it from the Serra da Mantiqueira. It derives its name from a series of peaks to the N. of the

town of Rio-de-Janeiro, which at a distance bear a considerable resemblance to the barrels of an organ.

ORGASWICK, par. Eng. Kent; 992 ac. Pop. 6. ORGAZ, a tn. Spain, New Castile, prov. and 16 m. S. Toledo, with a church, a well-fortified and picturesque castle, two schools, a parish church, two hermitages, and two cemeteries. Most of the springs are brackish. In the neighbourhood are numerous quarries of blue and white granite. Manufactures of coarse cloths and saltpetre, brandy, leather oil, and flour are carried on. Doña Jimena, the Cid's wife, was a native of this town. Pop. 7261.

ORGELET [anc. Orgetum], a tn. France, dep. Jura, 11 m. S.E. Les-le-Baudrier, partly surrounded by ancient walls. It has manufactures of leather and cheese. P. 1856.

ORGEND-AB, or URGENDAB, a river Afghanistan, rises in the mountains of Hazar, 60 m. W. Ghuznee, passes S.E.W. not far from Candahar and about 50 m. below joins, or is joined by the Tarnak. The united stream, flowing W., joins the bank Helmand, after a total course of 160 m.

ORGESAN, or URGESAN river, Afghanistan which rises in the mountains of Ghuznee, flows W. through a large district of the same name and, after a course of above 100 m., joins the bank Tarnak.

ORGIVA, or ORIVA, a tn. Spain, Andalusia, prov. and 23 m. S.E. Granada, with several good fountains, two schools, a court, prison, palace, parish church, formerly a mosque, with a fine portico and two very lofty towers, works for smelting antimony distilling brandy and making earthenware, five corn and six oil mills. Pop. 3397.

ORGON, a tn. France, dep. Dordogne-du-Rhône, 15 m. S.E. Avignon. Inhabitants mostly engaged in weaving. Pop. 1907.

ORGOSOLO a vil. Sardinia, dep. Cagliari prov. and 6 m. S.E. Nuoro, with a church, a primary school and a trade in corn, cattle, cheese, hides, and wool. Pop. 2149.

ORIA, a town Spain, Andalusia, prov. and 32 m. N. Almería, with irregular streets, badly-built houses, a church several hermitages, and a school. Inhabitants engaged in agriculture and the manufactures of flannels. Pop. 5600.

ORIA, or URTANA, a tn. Naples, prov. Otranto 22 m. W. S.W. Brindisi, on three hills between two lakes. It has a castle and cathedral, both on commanding positions, and is the seat of a bishop. Pop. 4800.

ORIENT (L.) a tn. France. See LORIENT.

ORIENT-AN-TRUNGKIA, a vil. France, dep. Aisne 6 m. N. Vervins, a bank Thun; well built, and the centre of a very extensive manufacture of woollen work of every description, much of which is exported. Pop. 1427.

ORIGNY (Sts-REMY) a vil. France, dep. Aisne, 10 m. E. St. Quentin, on the Oise. It has manufactures of lace, gauze, cashmere, and cotton stuffs. Pop. 2192.

ORIHUELA, a city Spain, prov. Valencia, 30 m. S.W. Alizande in a pleasant and fertile plain, on the Segura, 300 ft. above the sea. It is a long straggling place, with houses commonly three, some of them four stories. The finest of the entrances to the city is that of the college gate, which opens towards Valencia, with its magnificent and lofty arch, on which is sculptured a pyramidal statue representing the tutelary genius of the city. Among the public buildings, the episcopal palace deserves especial notice, an edifice of modern architecture, whose front extends 200 paces. There are also various other buildings occupied by men of rank and wealth, which, from their size and architecture may be called palaces. In the archives of the court-house are valuable records, going back, with some interruptions, to A. D. 1509 forming more than 1000 volumes; the prison, beside one of the heracles, is large and secure, but rather unhealthy; the cathedral is a small and overcharged Gothic edifice, the principal chapel in one of the three parish churches, that of Santiago, is a museum of art. The Colegio de Predicadores is a fine building of great extent, with spacious cloisters, and a beautiful chapel. The city abounds with monasteries, nunneries and hermitages; and has a theatre, a university, a normal and other schools, a founding hospital, and various other charitable institutions, and several promenades and fountains. The country around is unimpaired for fertility. Agriculture is therefore the chief occupation of the inhabitants, but the arts and mechanical trades which pertain to a large and important town, also flourish. It has manufactures

of lake, scum, leathes, salt-petre, silk for velvets, plush and hemp, with a silk dye-works, and three for cotton, linen and hemp; eight water-mills for corn, 13 wind-mills, and 46 oil-mills. Orichuela was the Gothic Orredia, and was well defended after the battle of the Gaudale. Theodoro here made a stand, and by dressing up the women as soldiers on the ramparts, obtained excellent terms from Abulcaza, and retained his sovereignty for life. Pop. 17,462.

ORIKHOVA, a town, European Turkey, Roumelia, r. bank Maritsa, 25 m. from its mouth in the Grecian Archipelago N W from the Gulf of Enez; the see of a Greek archbishop.

ORINOCO (French *Orénoque*) a large river of S. America, Venezuela. It rises in the Sierra del Parana, near lat. 8° 40' N, lon 64° W. Flows W by S. to lat. 8° 10' N, lon. 66° 20' W, about 30 m. The village of Esmeralda, where it bifurcates part of its waters under the name of the Casiquari (which see), taking a S W course, and falling into the Rio Negro, and part, retaining the name Orinoco taking a W N W course to San Fernando, about lat. 4° N, lon. 68° 10' W. thence it flows first due N, then turns with long sweep N. W. and enters the E. N. E. passing the town of Angostura and falls into the Atlantic by numerous different mouths, between lat. 8° 40' and 10° N. Its whole length being about 1356 geo. m. and the area of its basin 253,000 geo. sq. m. The principal effluents of this great stream descending from its sources are, from the left, the united stream of the Atabapo and Guaviare, which joins about lat. 4° N, lon. 68° 10' W. the Meta at lat. 6° 20' N, the Aracato at lat. 7° 10' N and the Apure at lat. 7° 35' N. Three of these tributaries are larger than the Amazon. Those from the right are the Ventuari, which joins the Orinoco about 40 m. E. of the junction of the Atabapo, the Guara, and the Caroni, which unite with it at lat. 7° 45' and 8° N respectively.

Two remarkable rapids occur in the upper parts of the Orinoco called the Atures and Maypures, or Apures, the one in lat. 5° 5' N or about 80 m. below the junction of the Atabapo and Guaviare with the Orinoco the other about 36 m. lower down. These rapids consist of a countless number of little cascades descending each other like steps, and where numerous islands and rocks so restrict the bed of the river, that out of a breadth of 8000 ft. there often only remains an open channel of 20 ft. in width. Often, in attempting to pass these rapids, the canoes of the natives are dashed in pieces against the rocks, the men having then to disengage themselves with bleeding bodies from the wreck and from the whirling force of the torrent, and to gain the shore by swimming. From these rapids the river is navigable to its mouth. At a distance of 560 m. from its mouth, this majestic river has still a breadth of 6750 yards, or above 8 m. Its waters rise from April to October attaining their greatest height in July and August, which in the Upper Orinoco is 80 ft. to 86 ft. and at Angostura 94 ft. to 25 ft., but in one confined place they are said to rise 120 ft. above the usual level. The vast plains through which the river flows, comprising an area of 160,000 sq. m., are at this season to a great extent overflowed. Both banks of the stream are densely wooded and like the river itself full of animal life. The numerous channels by which the Orinoco lately finds its way to the sea begin to branch off from the main stream upwards of 100 m. from the coast. The most E. and widest of these branches runs directly E., and reaches the ocean by the mouth called Boca de Navies, or Cano Navies, between Point Barma on the S. and the islands of Cangrejos on the N., which are more than 20 m. apart. In front of this mouth is a bar, on which is 17 ft. water, and which is supposed to be nearly 8000 fathoms across. In the month of April, when the water is lowest, the tides are perceptible in the river as far up as Angostura, a distance of more than 240 m. from the sea. The other branches which run N. and divide the delta of the Orinoco into numerous low islands, are imperfectly known.

ORIO a vil and com. Italy Lombardy, prov. Lodi, dist. and 4 m. W Casal Pusterlogio near r. bank Lambro, with a church, and a considerable trade in Lodi cheese. P. 1066.

ORTOLO (anc. *Portus Orsini*) a vil Italy, Naples, prov. Calabria-Citra, dist. and 25 m. N E. Castrovinci, with a fine villa of the Altieri family.

ORISSA, a maritime prov. Hindoostan, belonging originally to the Deccan, and now included in the presidency

of Bengal and Madras, lat. 18 to 22° N. length, roughly estimated at 400 m., breadth, about 70 m. It includes Orissa proper, now wholly comprehended at Cuttack, and several other petty states and is bounded N by prov. Bengal, E the Bay of Bengal, S. the Godavary, and W. prov. Guidermann. The surface along the shore is in general low and sandy, and in the interior wild rugged and uncultivated, consisting of steep precipitous, dense forests, pathless deserts, and swampy, pestilential valleys. The inhabitants are composed chiefly of Orissas the conquerors of the country who speak a tolerably pure dialect of Sanskrit, and of wild hill tribes called Coles, Khonds, and Jours. The largest rivers are the Godavary, Mahanady, and Subarnada, which are well stocked with fish, and swarm with alligators the chief towns are Cuttack, Juggernaut and Balasore.

ORISTANO, a town in Sardinia, div. and 30 m. N N W Cagliari about 1 m. from l. bank Tiri and about 2 m. from the large gulf of its name. It consists of the town proper enclosed by ancient walls, flanked with towers and of several suburbs in the sea of a lagoon, has a court of law and several public offices, a theatre, a plain modern seminary, several other churches, a gymnasium, a normal school, a diocesan seminary, Franciscan monastery, oratorio, hospital, and many features of iron ware, outlay arms, waggons and agricultural implements, an active fishery several distilleries and a trade in corn, wine oil cheese, and cattle. Pop. 6041. The oval is 10 m. in length from Cape San Marco to Cape Trasca, and 5 m. in breadth, and receives the river Uratano, or Tiri.

ORIVALLI, a vil and com. France, dep. Seine-Inférieure, 12 m. S S E. Honen, l. bank Seine, with manufactures of woollen cloth, dye-works, and a considerable trade in walnuts, for which the district is famous. Pop. 1614.

ORLYENI a lake, Russia, Finland, div. Kungö, forming one of the remarkable chain of lakes in the S. E. of the principality. It is of very irregular shape, about 25 m. long communicates with the Purvener and contains several large, and a great number of small islands.

ORIXA, an Isl. Seychelles Archipelago. See Duxia.

ORIXIMBA, a river Brazil. See Tocantins.

ORIZABA a town, Mexico, dep. and 65 m. S W Vera Cruz with wide street, and well-paved streets, manufactures of coarse cloth and several tanneries. The valley in which the town is situated is overshadowed by verdant forests and 5 m. or 6 m. N from the town rises the lofty summit of the mountain Orizaba, 17,878 ft. above the sea.

ORKHON a river Mongolia, rises in the Khangai mountains about lat. 47° 10' N, lon. 101° 30' E. whence it flows N. E. and joins the Selenge, at lat. 50° N lon. 103° 20' E. entire course, about 500 m.

ORKNEY and Shetland, the most N. co. Scotland, comprising two groups of islands called respectively the Orkney Islands and Shetland Islands (which see). Pop. 18531 62 538.

ORKNEY ISLANDS (French and Latin, *Oronides*, Italian, *Oronidi*) a group, lying off the N. coast of Scotland, and separated from it by a channel called the Pentland Firth, about 6 m. to 8 m. broad. They extend from lat. 56° 47' N, lon. 2° 4' W, to 59° 24' N, lon. 2° 23' W, aggregate area, 600 sq. m., or 284,000 ac. of which about 84,000 are under culture. There are in all about thirteen islands of considerable size, with a number of smaller dispersed over the archipelago. Among the larger, the principal are Pomona or Mainland, the largest of the group Hoy, E. and N. Rona, Westray, Sanday, Eday, Burray, Nessay, and Shapinsay. Of the whole, about twenty-seven are usually inhabited, although the number varies frequently, in consequence of single families taking up their abodes in them for a year or two and then deserting them. Hoy is the only island of the group that can be called mountainous, and has the highest elevation is but 1600 ft. None of the rest have hills of any considerable height. Nearly all the larger islands are of exceedingly irregular form; being, in many instances, so worn and pumetted by the sea, as to present rather a series of crooked and shapeless peninsulas, projecting in all directions, than a group of compact insular bodies. In some cases, the coast of these islands are flat and sandy; in others, bold and rocky. These precipices are highest on the W. side reaching, in the island of Hoy, the height of 7000 ft. perpen-

lapins. With exception of a small granitic district, near Strummen, the rocks belong to the old red sandstone formation. The alluvial deposits are neither extensive nor interesting. There is abundance of clay, and, in most portions, of peat-moss in many places used, and in some bog iron-ore. In the peat-mosses, roots of large trees, head-stems of oaks, &c., are frequently found showing that forests formerly existed there, although at present the climate is entirely unfavorable to the growth of trees. There are no streams deserving the name of rivers in any of the islands, but springs of good water are abundant; and there are many lakes, the largest of which, Stennis or Stenhouse, in the island of Pomeroy, is 14 m. in circumference. Chalybeate springs are not uncommon. The climate is moist, but not cold. In winter storms of sleet and rain are frequent, but in summer the weather is generally fine and steady. Agriculture, though it has made considerable progress of late is still in a backward state. The common breeds of sheep and cattle are very small, but some earnest endeavors are now being made to improve them. Rabbits and poultry are numerous. The hunting and fox-hunting companies, in some part, the shooting or delicate development of other resources, and large numbers of laborers are annually sent to London. The principal manufacture carried on in these islands is that of straw-plait for ladies' bonnets in which a few years since, about 2000 girls were constantly employed although, thirty years previously upwards of three times that number were so employed, a good deal of wire-wrought hosiery is also made by females. The building of boats, and making of sails, nets, and cordage, may also be named amongst the manufactures of Orkney.

ORLANS, a town, Germany, Sax-Altenburg on the Saale here crossed by a bridge, 15 m. S. E. Weimar, with two churches, the remains of an old castle, and tile-works. Pop. 1154.

ORLEANAIS [Latin, *Agus Astridacensis*] a former prov. France, which, after forming part of Gallia Lugdunensis, under the Romans, was first incorporated into the kingdom of Neustria, and then annexed to the crown of France, in 987 by Hugh Capet. Philip of Valois erected it into a duchy and gave it to Philip, his son. On the death of this prince without children, Charles VII. gave it to his brother Louis, whose successors enjoyed it till the death of Charles VIII., when it again became united to the crown, in the person of Louis XII. in 1498. Louis XIII. gave it to his brother Gaston with whose successors it remained till the revolution of 1794. It now forms depts. Loir-et-Cher and Loiret, and parts of depts. Eure-et-Loir and Nievre.

ORLANS (Latin, *Genabum or Aurelia*), a town, France, cap. dep. Loiret, 68 m. S. S. W. Paris, with which it is connected by railway, a bank Loire, here crossed by a magnificent bridge of nine arches. From this bridge a splendid street, called Rue Royale, leads into the very centre of the town, and terminates in its finest square, the Place du Martroy one corner of which is adorned with a very different bronze statue of the Maid of Orleans, in the guise of an Amazon. Several other new streets and squares have been formed of late years, but the greater part of the old town is very indifferently built of wood, and has narrow ill-paved, and dirty streets. There are several fine promenades, chiefly in the line of the old ramparts, which have been levelled down, and are well planted. Both sides of the river are lined with handsome quays; and from the extremity of the bridge, on the l. bank, a splendid avenue leads to the pretty suburb of Olivet, which is occupied by handsome villas and nursery grounds. The principal edifice is the cathedral, a Gothic structure, rebuilt in its present form in the 16th century and remarkable for the purity and chasteness of its architecture. Its W. front consists of three rather plain pointed portals, surmounted by three rose-windows, and flanked by two elegant towers, each 160 ft. The nave is flanked by double aisles. The only other buildings deserving of notice are the church of St. Agnes, with a portal and nave in the florid style, and under it a Renaissance crypt, the Palais de Justice with a facade adorned with four Doric columns, the Musée, containing a curious collection of local antiquities, the theatre house of Agnes Sorel and Francis I., both richly decorated the prison, barracks, and general hospital. Orleans is the see of a bishop, and seat of an appeal court for

depts. Loir-et-Cher, Loiret, and Indre-et-Loire; and possesses a court of first resort and commerce, a chamber of commerce and exchange, a conseil de prud'hommes, a university academy, college, gratuitous school of design and architecture, diocesan seminary, secondary ecclesiastical school, public library, botanical garden, and society of sciences, belles-lettres, and art. It has manufactures, not important, of hosiery, hats, woollen covers, small shot, bronzemongery, pottery, pewter vessels, chemical products, glass, &c., several woollen and cotton mills, numerous sugar-refineries, vinegar-works, breweries, and distilleries and a trade, not on the increase, in wine, brandy, corn, flour, fruit-cakes, straw-work, timber, iron, salt, and colonial produce. Orleans was the capital of the Goths, under the name of Genabum, when it was taken and burnt by Caesar. Under the Romans it rose to great importance, and changed its name to Aurelia, probably from the Emperor Aurelian. In 451 it was besieged by Attila, king of the Huns, at the head of nearly half-a-million of men, but the Roman general, Aetius, obliged him to raise the siege, and defeated him in a great battle, in which about 160,000 Huns are said to have been slain. On the decline of the Roman empire, it was seized by Clovis. During the 9th and 10th centuries, it was repeatedly taken and pillaged by the Normans, but the most memorable event in its history took place in 1428, when the English besieged it, and found all their efforts baffled by the heroic achievements of the Maid of Orleans. Pop. (1859), 42,569.

ORLEANS (ISLAND COV.) an isl. Lower Canada, in the St. Lawrence, below Quebec, 20 m. long, and 5 m. broad. It is well wooded, and extremely fertile in almost every part and forms an agreeable place of residence or resort. It is, in consequence, frequented by numerous visitors.

1. op. 2500.—2, Gov. and 80 m. W. S. W. Viatka, r. bank Viatka. Pop. (1859), 3902

ORLOYATE a vil. Hungary Banat, co. and 50 m. S. S. W. Temeswar with a church and three mills. P. 1978.

ORMEA, a tn. Madras States, div. Coim. prov. and 16 m. S. Mondovi 1 bank Tanore, about 3000 ft. above the sea. It is surrounded by ancient walls, in a very dilapidated state has a large handsome parish, and several other churches; an old castle, public school, and hospital, manufactures of candles, and coarse woollens, an iron and two saw mills marble quarries, and a trade in corn, wine, chestnuts, silk, timber cattle and dairy produce. Pop. 5100

ORMESBY, a vil. and par. England co. York (N. Riding), 7 m. E. S. E. Hookham. It contains several well built houses, and has an ancient Norman church. At Port Cleveland, at the mouth of the Tees, about 2 m. from the vil. lags, an extensive trade in grain, coal, &c., used to be carried on. Area of par. 7500 ac. Pop. 851

ORMISTON, a vil. and par. Scotland, co. Haddington. The village, 6 m. S. W. Haddington, r. bank Tyne, consists of one well kept street, in the centre of which is an ancient cross, is well built, has an Established and a Free church, and three schools. The inhabitants are chiefly employed in agriculture. Pop. 861 Area of par. 8245 ac. Pop. 811

ORMSBY, four par. England.—1, (St. Margaret and St. Michael, including Southwell) Norfolk, 3761 ac. P. 1178.—2, (North or New), Lincoln, 2761 ac. P. 181.—3, (South), Lincoln, 3277 ac. Pop. 261

ORMSID, par. Eng. Westmorland, 2480 ac. P. 196

ORMSKIRK, a market tn. and par. England, co. Lancaster. The town, 12 m. N. by E. Liverpool, on the E. Lancashire railway, is clean and well built has a large church, with a tower and steeple detached, and contains the burying-place of the Earls of Derby, places of worship for Wesleyans, Independents, Unitarians, and E. Catholics, a free grammar-school and several other schools. It has long been famous for its gingerbread, but the chief occupations are silk-weaving by hand-loom, rope-making, and hawking Pop. (1851) 5548. Area of par. 80,832 ac. Pop. 14,490.

ORMUZ, or HORMAZ, an isl. Persian Gulf, N. side, near its entrance; lat. 37° 5' N., lon 52° 29' E., about 15 m. in circumference. It has a rugged appearance; is entirely des-

tute of vegetation has several of the high peaks white from an incrustation of salt and abounds in iron, copper-ore, and red-oxides. Orna is one of the emporiums of all the riches of Lulia, the receptacle for the goods of Bessarabia and Bala, and for the manufactures of Europe and Asia. During the prosperity the Portuguese had possession of it, but it has long since been quite neglected. The town of Orna stood on a plain on the N side of the island, though now only a few scattered ruins, it once contained 4000 houses.

ORNAIN, a river, France, rises in N E of dep Haute-Marne, flows generally N W across dep. Meuse, past Bar-le-Duc, and in dep. Marne joins r. bank Marne, 3 m S N W Vary total course, 90 m, not navigable.

ORNANS [anc. Ornanus], a tn. France, dep. Doubs, 11 m. S.E. Besançon, on both sides the Lône, here crossed by two stone bridges. It has regular streets, a large and handsome church, of the 15th century; an elegant townhall, prison commodious and extensive hospital, educational seminary, library, and, on an eminence N W of the town the ruins of a vast and magnificent castle of the Counts of Burgundy, dismantled in 1678. Tanning and the manufacture of stained chaises, are carried on to a considerable extent. Pop. 2089.

ORVE [Latin, Ordania], a river, France, which rises in dep. Orne, about 15 m. N.E. Alençon; flows circuitously W N W, enters dep. Calvados, turns gradually to the N. E., passes Caen, where it becomes navigable; and, about 12 m. below falls into the English Channel. Total course, 90 m.

ORNE, a dep. N.W. France, bounded N. by dep. Calvados, N.E. Eure, E. Eure-et-Loire, S. Sarthe and Mayenne, and W. Manche. Its greatest length E to W 74 m. average breadth about 40 m. Area, 2329 sq. m. It is traversed E to W, by a chain of hills, not exceeding 2000 ft. high and much broken throughout by minor ramifications, which inclose between their ridges a great number of verdant and well-watered valleys. The principal streams are, in the N., the Touques, Dive, and Orne which proceed directly to the English Channel and, in the S., the Ille, Sarthe, Varenne, and Mayenne, belonging to the basin of the Loire. None of these streams is navigable. Lakes are numerous, but they are all of comparatively small dimensions. More than one-half of the whole surface is arable, one-fifth meadow, and nearly one-eighth under wood, including orchards and gardens only one thirty-third is waste. The arable land appears to be only of indifferent fertility, for, notwithstanding its great extent, the grain raised does not furnish more than two-thirds of the home consumption. The principal crops are oats, buckwheat, and rye. The pastures, particularly in the lower valleys, are excellent; and not only graze the young stock raised within the department, but also feed great numbers of cattle which are imported from less favoured districts. A pines grow well, and large quantities of excellent cider are made. Considerable attention is paid to the dairy, and in no department is the breed of horses, for which Normandy has long been famous, to be found in greater purity. The pen of animal husbandry is iron, which is wrought extensively in several counties; and besides employing a considerable number of blast-furnaces, supplies the raw material for the most important branches of industry within the department. Among these may be mentioned the manufacture of steel, needles and pins. Excellent porcelain clay also, is found in many quarters, and has led to the establishment of numerous potteries. A kind of smoky quartz, obtained in the hills of the S. furnishes the precious stones well known under the name of Alençon diamonds. The principal textile fabrics are linen and hempen cloth. Orne is divided into four arrondissements—Alençon, the capital, Argentan, Domfront, and Mortagne subdivided into 38 cantons, and 811 communes. Pop. (1825) 459,884.

ORNOVAISO, a tn. Italy Piedmont, div. and 37 m. N. Novara, prov. Pallanza, 1 bank Ticino with a handsome church, built entirely of white marble, of which there are large quantities in the vicinity. Pop. 1680.

ORONSA Y, an isl. Honduras. See COLOMBIA.

ORONTEA, a river, Syria. See ASANY.

ORONTEA, a vil. Spain, New Castile, 68 m. W Toledo, with a townhouse, a prison, a palace, and castle, an hospital, a Latin choir, two schools, a fine chapel, two universities, a parish church, and a hermitage. Pop. 1708.

OROPERA, a city Bolivia. See COCHABAMBA.

OROBEL, a vil. Isl. Sardinia, div. Cagliari, prov. and 11 m. N.E. Nuoro, r. bank Cedrino. It has a principal, and several minor churches, a primary school, and hospital; manufactures of confectiary and a considerable trade in corn, wine, wool, and cheese. Pop. 1905.

OROBENGA, or OROBENGA, one of the Friendly Is., S. Pacific, belonging to Navigator's Group, lat. 14 14 S., lon. 169° 34' W.; about 3 m. long of coral formation.

OROBHAZA, a tn. Hungary, co. Buda, 40 m. N.E. Szegedin in a fertile district. It contains a Protestant and a R. Catholic church and has some trade in cattle. P. 9681.

OROBZI [Hagy], a market tn. Hungary, co. Nagred, 34 m. N. Pesth. It has a market, once important, though now much decayed and a building establishment. P. 1969.

OROSZLANKO a market in Hungary. See PRIBRKA.

OROSZLANY KEÖ a vil. Hungary. Hildesheim, co. Komern, on the Pense with a Protestant church, an oil and two other mills, linseed, and a potash factory. P. 1578.

OROSZLYNOS, or OROSLANOS (O and Ő), a vil. Hungary, Thither Theiss, co. Torontal 7 m. from Szegedin, in a fertile district. It contains a Greek church. Pop. 3908.

OROSZVÁR, or KALANOS a market tn. Hungary Thither Danube, co. Wieselburg, 60 m. S.W. Pressburg with a church and a fine chateau. Pop. 3094.

OROTAVA a tn. Canary Is. in N.W. of Isl. Tenerife formerly the capital and court of the principal kingdom of the Guanches. It is regularly built, and the streets are arranged in the form of an amphitheatre. It has an hospital, two primary schools, two parish churches, one of them a beautiful edifice with three naves containing a magnificent marble tabernacle brought from Genoa, numerous hermitages, and in a delicious valley E. of the town a botanic garden, established for acclimating the plants of America, and those transplanting them to Spain. Orotava is the native place of the poet Iriarte. Pop. 3815.

OROTELLI, or ORTELLI a vil. Isl. Sardinia, prov. Nuoro, 1 bank Tirso; with an ancient church, a primary school and manufactures of woollen and linen cloth. P. 1386.

ORP LE GRAND, a vil. and com. Belgium, prov. Brabant, on the Little Gette, 23 m. E. R.E. Brussels. It has many factories of cotton twist, two breweries, and two flour-mills. Pop. 1193.

ORPHANO a small maritime tn. European Turkey Macedonia, N.E. shore, Gulf of Constanza, lat. 40° 49' N., lon. 23° 55' E. near the site of the ancient Amphipolis. It has manufactures of cordage, and is guarded by a fortress.

ORPHANO (Gulp. Orp.) European Turkey. See CORINIA.

ORPHIR, par. Scot. Orkney, 19 000 ac. P. 1167.

ORPINGTON par. Eng. Kent, 3477 ac. P. 1508.

ORROLD a filthy vil. Isl. Sardinia, div. and N.N.E. Cagliari, with several minor churches and a little trade in agriculture and dairy produce. Pop. 1704.

ORSA, a vil. and par. Sweden, lon. and 52 m. N. Falun on Lake Orsa, which communicates with the Elga. A quarry in the vicinity furnishes the best grinding-stones in Sweden.

ORSARA a vil. and com. Naples, prov. Capriana, dist. and 6 m. N.W. Bovino. Pop. 3200.

ORSCHEL (Nimetz), a vil. Prussia, prov. Saxony, gov. Erfurt, circle Weimar on the Linke, with a church, a saw and a flour mill. Pop. 1502.

ORSETT par. Eng. Essex 4134 ac. P. 1592.

ORSHIA, a tn. Russia, gov. and 47 m. N. Mohilev at the confluence of the Orshia with the Dnieper. It has three Greek churches a nunnery, founded by the Princess Sophia sister of Peter the Great three R. Catholic monasteries, a synagoga, and an active trade. Pop. (1851) 8198.

ORSHK, a fort, Russia, gov. and S.E. Orshenkov on a hill of jasper, near 1 bank Ural, a 114 ft. above the confluence of the Or. It is a place of considerable strength, and has a handsome church and near it is an observatory, where Euler made observations on the passage of Venus. The inhabitants consist chiefly of 1200 Cossacks and 500 Tartars. The caravans from Asia to Orshenkov have a station here.

ORSOVA (O) or AYT-ORSOVA, a market in Hungary, on the Walachian-Ruthenian military frontier, on the Danube, at the confluence of the Leana, 30 m. S.E. Temesvár, and not far from the Turkish fortress of New Orsova. It is fortified; and has manufactures of Cordovan leather. Pop. 990.

ORSOVA, ARDUBHEIA, or NEW OSOVA, a tn. European Turkey, Servia, 80 m. E. Smederitsa, on an island of the Danube W. of Old Orsova. Both it and the island on which it stands are strongly fortified. Pop. 3800.

ORSOVY, a walled tn. Prussia, gov. and 21 m. NNW Düsseldorf, on the Rhine. It has two churches, manufacturers of woollen stuffs, cashmere, and hats; tanneries; dye-works, and vinegar-works; some shipping, and a trade in wool. Pop. 1468.

ORSHOV, par Eng. Notes 1940 ac. P. 461
ORT, several places, Austria, particularly a market tn. 17 m. E. Vienna, on the Fadenbach, an arm of the Danube with a church, an old castle, and a considerable trade in corn, cattle, eggs, and butter with Vienna. Pop. 1095.

ORTA a tn. Italy Piedmont, div. and 25 m. NNW Nivara and on a mountain slope above the W. shore, Lake Orta. It is old, but well built, has three churches, and an hospital; an elementary ragged and an infant school; manufactures of wax and tallow candles, and a trade in excellent wine. Pop. 1127.

ORTA (Laka. *Chesus*) a lake, kingdom of Italy, Piedmont, W. of Lake Maggiore; greatest length, N. to S. about 7 m., breadth, about 1½ m. By the Sirona it sends its waters N. to the Tose.

ORTE (anc. *Mortuorum*) a tn. Papal States, deleg. and 10 m. E. N.E. Viterbo, on bank Tiber on the site of one of the military colonies of Augustus. It is the see of a bishop and has the ruins of a fine bridge which bears the name of Augustus, and some extensive remains of bath and theatre.

ORTFELSHING, a tn. Prussia, gov. and 80 m. S.E.E. Königsberg, E. shore of a small lake with a castle, Protestant church, house of correction, manufactures of linen, and a trade in wool and cattle. Pop. 1981.

ORTENBERG a tn. Hesse-Darmstadt, Oberhessen on the Nadder 25 m. N.E. Frankfurt with a castle, a church, and two mills. Pop. 1097.

ORTFENBURG a walled market in Lower Bavaria 10 m. W. Passau. It has a castle, and a trade in corn and cattle. Pop. 1501.

ORTHILL, a tn. France, dep. Basses-Pyrénées, 24 m. N.W. Pau, on a hill above the Gave de Pau, here crossed by an old Gothic bridge which resisted the attempt of the French to blow it up as they were retreating before Wellington. The town has received numerous improvements within recent years, and is now well built, has a court of first resort, a communal college, an ancient parish church, a handsome townhouse and a few remains of the old castle of Moncade, in which the princes of Bears used to reside; manufactures of woollen stuffs, copperware, and linseed-oil; extensive tanneries, dye-works, slate quarries, flax and saw mills and a considerable trade in leather, Bayonne hams, feathers, wool flax, timber, horses, cattle, marble, &c. The French, under Soult, were here defeated by the British, under Wellington after a very severe contest. Pop. 5073.

ORTLEBESSTEN, or ORTELSEN, a mountain, Tyrol, belonging to the North Alps, and forming the loftiest summit in the Austrian empire, having a height of about 14,500 ft. Its top was reached for the first time in 1804.

ORTNELLI a vil. rd. Sardina, div. Cagliari E.N.E. Oristano with a handsome church, a primary school, and a little trade in wine and mules. Pop. 1890.

ORTON, a tn. par. Eng. —, Cumberland 4277 ac. P. 519 — 2 (*Cherry or Orton Waterfalls*). Hunts, 1850 ac. P. 802 — 3, (on the *Hill*) Leicestershire 2290 ac. Pop. 880 — 4 (*Long or Orton Langrille*), Hunts 2400 ac. P. 324.

ORTON, or ORTON, a market tn. and par. England, co. Westmoreland, 8½ m. S.W. Appleby on a gentle acclivity, with a fine old parish church, a Methodist chapel, a grammar school, and girls' school and near it is a copper-mine. Area of par. 24,430 ac. Pop. 1456.

ORTONA, a tn. and seaport, Naples, prov. Abruzzo-Citra, on the Adriatic, 11 m. E. Chieti, 11 m. E. a cathedral, and several other churches and convents. Its port, at one time extensive, has ceased to exist, and vessels are obliged to anchor above a mile from the shore, in roads with ample depth of water and a good bottom, but badly sheltered. A great deal of wine is made in the neighbourhood. P. 5700.

ORTONOVY a vil. and com. Italy, Piedmont, div. Geneva, prov. and about 14 m. from Levens; with two parish

churches, a Latin and two elementary schools, and a trade in corn, wine, and oil. Pop. 2150.

ORTEAND, a tn. Prussian Saxony gov. and 74 m. E. Merseburg, with two churches, an hospital, and manufactures of linen, leather and glass. Pop. 1269.

ORUBA, or ARUBA, an isl. W. India, belonging to Holland, off N. coast, Venezuela, 50 m. W. by N. Curaçao; lat. (N. point) 12° 38' N. lon. 70° 8' W. It is about 20 m. long, N.W. to S.E., by 8 m. broad, surrounded by rocks difficult of approach, generally stony on the surface, though in some parts flat and sandy. Yet has some good meadow lands, notwithstanding the want of water under which the island suffers. It yields water-melons, pumpkins, some maize, and feeds cattle and asses brought from Venezuela, and exported to the W. India Islands. Some good iron-ore and a little gold are found. Pop. mostly poor (1854) 8022.

ORUAE a vil. Isl. Sardinia, prov. and N.E. Nuoro, with several churches, a primary school; manufactures of woollen cloth, and a trade in it and in cattle, cheese, hides, and wool. Pop. 1868.

ORURO a dep. Bolivia, divided into three provinces—Poopo, Oruro, and Chacabuco—all situated at the foot of the elevated table land bounded N. by top. La Paz W. Peru E. dep. Potosí, and S. Potosí and Cochabamba. The Lake of Lake Titicaca, lies wholly in this department. Lake Paria has itself no outlet, and its waters are salt, but its banks are well peopled, and indeed the great number and careful construction of the ancient towns still remaining in this elevated district, clearly indicate that it was the most populous portion of the empire of the Incas. Pop. (1854) though much reduced, 118,000 of which two-thirds at least were Aymaras.

ORURO a tn. Bolivia, cap. above dep. on a bleak hill, in a metalliferous district, at an absolute height of 13,000 ft. lat. 18° S. lon. 67° 30' W. It is now surrounded by ruins, owing to the decline of the population, which is reduced to 5000 or less than a fifth of its former amount.

ORUSI, an isl. Sweden in the Slinger Kack, close to the coast of Göteborg, length, E. to W. 16 m., breadth, 1½ m. It is generally low, and partly covered with bog, but the larger portion is covered by a strong but rich alluvium often several yards in depth, productive both of heavy crops of corn and rich feeding pastures. The fisheries on the coast are valuable.

ORVIEITO (anc. *Herzorum* or *Urbis Vetus*) a tn. Papal States, cap. deleg. of same name, near the junction of the Paglia and Cliterna, 60 m. NNW Rome. It stands on a steep hill is walled, clean and well built and contains several fine palaces. The principal building is the cathedral one of the most interesting specimens of Italian Gothic, built of black and white marble, adorned without with fine mosaics, and within with a large collection of sculptures, and several fine paintings. After the cathedral the object of greatest attraction near Orvieto is St. Patrick's Wall, near the fortress, and about 1 m. from the town. The palace most deserving of notice are the Palazzo Qualitieri with a rich collection of cartoons by Domenico Antonio Amadeo Caracci and other eminent masters and the Palazzo Petrangeli, with a fine collection of paintings. The episcopal palace and Jaurat college are also more worthy. The trade is in cattle, corn, and silk. Orvieto, from its strong position, has often proved an asylum to popes in troubled times, and no less than 22 are mentioned as having occasionally resided in it. Pop. 8310.

ORVIGO or ORVIGO a river, Spain, which rises in the N. of Leon flows S., passing a little to the W. of Benavente, and joins r. bank Esla. total course, 80 m.

ORWELL, par. Eng. Cambridge 1850 ac. P. 633.

ORWELL, a par. Scot. Kilmory, 18,500 ac. P. 2569.
ORWELL, a river England, which rises near the centre of co. Suffolk, a little N.E. of Stow Market, flows S.E. to Ipswich above which it is generally known by the name of the Orwell, and enters with the estuary of the Stour in the harbour of Harwich. Vessels of any size ascend within 3 m. of the town of Ipswich, and 500 tons to the town itself, and by means of improvements the navigation has been made practicable as far as Stow Upland bridge, near Stow Market.

ORZI VECCHI, a vil. and com. Italy, Lombardy, prov. Brescia, about 8 m. N.E. Orzi Novi with a church, sacristy, and oratory, and the remains of an old fortress. P. 1322.

ORZINOVI, or (JASNOVI), a vil Italy Lombardy prov and 18 m. S.W. Brescia, near the Olino. It was once fortified, has a court of justice, and several public offices, two churches, a school, directory, and numerous mills. Pop. 4480

ORZIOA, or **ORZIOA**, a large city, Japan, lat. 34° 40' N; lon. 135° 35' E. It is one of the five cities held under the immediate government of the Shogun or military emperor, is fortified, protected by a castle, and is said to contain about a hundred bridges over the Yoddo Gawa and its various branching canals; its citi ness boast of being able to levy from their own population alone, an army of 80,000 men. It has a race-course and a theatre, the latter very large and handsomely decorated. It is the point to which the few foreign goods brought into the country by the Dutch and Chinese are sent, and its own manufactures are considerable, and spoken of with praise. The Dutch traders, in their periodical visits to Yoddo, receive here the goods they previously bespeak for their journey

ORZIOA, a river, U. States, N. America, rises in the Indian territory, about lat. 88° 30' N lon. 96° E flows E. enters state Missouri, about lon. 94° 40' W proceeds still E. but latterly turns N. E., and falls into the Missouri, a little E. Jefferson; total course, about 280 m. It is 397 yards wide at its mouth, and navigable for steam-boats 200 m.

ORZIOA a vil and com. Kingdom of Italy Piedmont, prov and 3 m. S. Pinerolo r. bank Chisone with a handsome church, an ancient, strong castle, a school, an extensive silk-mill and a trade in silk, corn, and hemp. Pop. 1000

ORZIOA a vil and com. Sardinian States, div and 3. Turin with a handsome church, and a trade in corn, hemp, and wool. Pop. 1400

ORZIOA, par Eng York (N Riding) 1740 as Pop. 373

ORZIOA, par Eng Lincoln 1760 as. P. 654

ORZIOA, a vil and com. Austrian Italy, prov and 12 m. N.W. Cremona with a church. Pop. 1180

ORZIOA, a vil and com. Saxony, prov and 31 m. E. Leipzig. It has a law court, several provincial offices, two churches an hospital and manufactures of woollen and linen cloth, tile-works, dye-works, and several worsted and other mills. The peace which put an end to the Seven Years War, was concluded here in 1763. Pop. 6774.

ORZIOA, a vil and com. Prussian Saxony gov and 21 m. S.W. Magdeburg, 1 bank Bode, and on the branch railway to Halberstadt. It is walled has three gates, several provincial courts and offices a Protestant church a synagogue, tile-works, and several mills. Pop. 8778.

ORZIOA, or **ORZIOA**, a vil tel. Sardinia prov and 10 m. N. Oreri, with a handsome church a primary school mann factories of bed covers, and a trade in corn, butter, and cheese. Pop. 8108

ORZIOA, par Eng. Leicester 1220 as. P. 246

OSMOTHERLEY par Eng York (N Riding) 7730 as Pop. 1954

OSNABRUCK, an extensive district or landroast, Hanover bounded N. by Lauropaten Aaruch, and S.W. by Oldenburg, 1760 geo. sq. m. With the exception of a portion of the S.W. which sends its waters by the Venite to the Zuider Zee, it belongs wholly to the basin of the Emsa, which drains a considerable portion of it, directly traversing it from E. to N. and the far greater part of the remainder by its affluent the Hase. The surface is generally flat and sandy and presents extensive tracts of almost level heath, broken occasionally by low sand hills. All the alluvial cereals and a very ungenial soil, and yield a very scanty produce. The minerals, though of little importance include coal which however does not seem capable of being extensively worked to profit as turf continues to be the principal fuel. The manufactures consist chiefly of coarse linens, and the principal trade is in hams, for which the district has long been famous. The landroast nearly corresponds to the bishopric of Osnabrück, and includes the principality of Osnabrück, the Lower county of Lappan, the duchy of Arumburg-Meppen and the county of Bielefeld. It is subdivided into a number of minor jurisdictions, partly urban and partly rural. Pop. 269,747

OSNABRUCK, or **OSNABRUCK**, a tn. in Hanover, cap. above landroast and principality on the Hase and Melle 71 m. W. Hanover. It is walled and entered by five gates houses generally low and of mean construction, but the pavilions pleasant, and are covered with a number of fine villas. The buildings most deserving of notice are the Protestant churches of St. Catherine and St. Mary the E. Catholic cathedral and church of St. John, the Protestant and E. Catholic gymnasiums, the old and new townhouses, the theatre, castle, normal school barracks, infirmary and several hospitals. It is the see of a bishop, the seat of several courts and public offices and has manufactures of coarse linens, to which the town gives its name and there are several paper-mills, bleachfields, and tile-works, and a considerable trade in linen, hams, and cattle. Osnabrück was created into a see by Charlemagne in 838, and in 1082 it was surrounded by walls. It afterwards entered the Hanseatic League, but never rose to be a free imperial city. The negotiations for the peace of Westphalia, which ended the Thirty Years War were carried on here. The bishopric was secularized in 1803, and incorporated with Hanover. Pop. 11,731

OSNABURG — 1, A tn. Hanover see **OSNABRUCK** — 2 Two islands, S. Pacific Ocean — 1 Aerial Low Archipelago; lat. 31° 50' 33" S., lon. 188° 44' 32" W. It possesses con-

52

admirable interest, from the light which it throws on the progress of a coral formation. When discovered by Captain Carteret, in 1787 it was small flat, and so nearly covered by the waves, as scarcely to deserve the name of an island. In 1792, when the *Mendive* whaler, was wrecked upon it, it was described as merely a coral reef. In 1839, when visited by Captain Beatty it was 14 m. in length, and had one of its sides almost completely covered by high trees. It enclosed a lagoon, which has no opening on the E. side, and affords an excellent harbour. It is not inhabited.—*N. Am. Isl. Society* group, and rising to the height of 1507 ft. (called also *Menton* (which see).

OSHAJO a vil. and com. Italy, Lombardy prov and 16 m. S. E. Como; with a church. Pop. 1362.

OSSEFO a tn. Italy Lombardy prov. Friuli, 16 m. N. N. W. Udine, near the Tagliamento with a small fortress, situated on a lofty precipice, and a church. Pop. 1250.

OSORNO a ruined tn., river and lake, Chili, near its S. extremity, Araucania. The town is at the N. W. extremity of the lake, 35 m. N. E. Valdivia.—The river issues from the same end, close by the town, and pursuing a N. W. direction, falls into the sea about lat. 40° 10' S. after a course of 48 m.—The lake is somewhat in the form of a boat, the length of which is about 30 m. in length, and the foot 10 m., with an average breadth throughout of 6 m.

OSORNO [OSCARO or] Patagonia, W. coast, opposite Island Chiloé, 36 m. N. E. the head of Balcones Sound; lat. 41° 0' S. lon. 70° 40' W. It is quite conical from the base to the summit frequently emits smoke and when seen from the sea at a distance of 90 or 100 m. the whole cone, about 5000 ft. high, and covered with snow stands out in the boldest relief from among ranges of inferior mountains.

OSI EDALETTI several places Italy Lombardy — 1. Ospedaletta, or Ospedaleto a vil and com. prov and 6 m. W. Brescia with three churches, and numerous mills. Pop. 1645.—2. A vil and com. prov and 9 m. S. E. Lodi near the Lambro with a church and two chapels, and some trade in cheese. Pop. 1573.

OSPIE (Gk. (Lemart) par Eng. Kent 2798 ac. Pop. 1111.

OSSE, or Os (formerly *Osek*), a market in Holland, prov N. Brabant, 13 m. N. E. Herengovenboet. It is a large, regular, busy, and beautiful town, walled and fortified, and has a spacious market place in which is the townhouse, a large square building is a church, a synagogue, and six schools. Pop. (agricultural) 1113.

OSMA, a tn. Russia, gov and 45 m. S. W. Perm, on the Oumka, near its confluence with the Kama. It contains two churches, and an hospital. The district is rich in iron and copper. Pop. (1851) 2183.

OSMALLIKOWO a market to Russia gov and S. E. Vladimir with two stone churches, a castle, and various manufactures. Pop. 2390.

OSMAGO, a vil and com. Italy Lombardy, prov and 4 m. S. Lodi with three churches. Pop. 1298.

OSMAU (GAVE DU), a river, France, which rises on the E. side of the Pyrenees, dep. Pyrénées Inférieures, flows N. W., and, after a course of about 45 m. unites with the Aspe, at Cleron in forming the Garonne of that name.

OSSEU, or Osmu a vil Bohemia, circle and 22 m. N. W. Leitoms with a magnificent abbey, which has a library of 40,000 vols, and a beautiful church, in the Italian style.

OSSEU or Osmu an Isl. Adriatic Sea, off the coast of Dalmatia, 6 W. Croatia, from which it is only separated by a very narrow channel, over which a bridge has been constructed. It forms a narrow and irregular belt, 3 m. N. N. W. to 1 m. S. E. breadth under 1 m. It produces much corn, wine, and fruit. The tunny and sardine fisheries are also valuable. The pop. resident chiefly in the towns of Great and Little Lusan and the vil. Chisnaki about 3000.

OSSETT a vil. and chapelry England, co. York, on the Manchester and Leeds railway. It is a large and populous place, with a district church, a chapel of ease, Independent and Wesleyan chapels, a free school, manufactures of woollen cloth, blankets, and worsteds; and mineral springs, for which baths have been erected. Pop. 5266.

OSSE a vil. st. Sardinia, div. and S. S. E. Sassari, with a church, two chapels, a primary school, and a considerable trade in corn and wine. Pop. 2108.

OSBINGEN a vil and par Switzerland, can and 19 m. N. E. Zurich. Some land-tortoises are found, and a good deal of bad wine is made in the district. Pop. 1177.

OSBINGTON, par Eng. Notts, 2165 ac. Pop. 225.

OSBONA a vil and par Italy Lombardy prov. Pavia, diot, and 8 m. N. Abiate-Cesate, with a church, and a trade in wine and silk. Pop. 1469.

OSBOREY, formerly a Protestant and R. Catholic diocese of Ireland, co. Kilkenny, and Kings and Queen's co., the seat of which has been transferred since 1834, to Kilkenny.

OSUN, a tn. France, dep. Haute-Pyrénées, 8 m. S. S. W. Tarbes, inhabitants engaged in the preparation and export of hams and bacon. Pop. 3004.

OSTASHKOV a tn. Russia, gov and 110 m. W. Tver on a small tongue of land projecting into Lake Seliger. It has courts of justice, four churches, a nunnery, a gymnasium three hospitals and a large bazaar where all the shopkeepers of the town have their shops, all of brick, the houses generally being of wood. There are numerous malt-kilns, tanneries, and tallow melting establishments and a great many barges are built for the navigation of the Volga. The trade is considerable in corn, wood, salt beef, salt fish, leather tallow wax, and honey. Pop. (1849) 8354.

OSTE, a river Hanover which rises in the W. of principal Lüneburg flows easterly into the past Bremerhaven, and falls into the estuary of the Elbe, 4 m. N. E. Osterndorf; total course, 80 m.

OSTEND [French, Ostende] a seaport in Belgium, prov W. Flanders, on the N. Sea, 67 m. N. W. Brussels, lat. 51° 14' N. lon. 2° 55' 50" E. (n.) It is strongly and regularly fortified, being one of the line of fortresses intended to defend the Belgian frontier on the side of France. Its situation on a low sandy coast, where no trees will grow, is by no means agreeable though it is and has a pure, healthy air, and is much resorted to for sea-bathing. It is entered by four gates, and is, on the whole, well built. The public buildings, some of which deserve particular notice, are the Hotel de Ville, three churches (one Protestant) a prison, a hotel and a military hospital barracks, and an arsenal. There are several promenades, but the most agreeable, from lying open to the breeze, is the Digue a sea-wall, about 1/2 m. long, and paved with benches. The harbour is not easy of access but the basin within is extensive, and forms the terminus of a magnificent line of canals, striking like a network into the interior and furnishing admirable facilities for commerce. The sluices of Slykens, opening from the canal into the harbour are particularly admirable; and the canal itself, as far as Ghent, has a depth sufficient to float vessels of 500 tons. The manufactures of Ostend are unimportant but include linen goods and mill-cloth, lace, oil, soap, hats, tobacco, &c. There are also building-docks, and several other industrial establishments. Cod and herring fishing are carried on to a considerable extent, and an important branch of trade is opium, brought from the English coast, factored here in large salt reservoirs, and transported as far as Paris, under the name of *Acidres d'Ostende*. Ostend possesses a school of navigation, an academy of design and architecture, several primary schools, a theatre, a public garden beyond the walls, a *mont-de-piété*, and several other benevolent institutions. It was founded in the 9th century, walled in 1445, and regularly fortified in 1585 by the Prince of Orange. In the great struggle in which the States-General threw off the yoke of Spain, it sustained a memorable siege from 1601 to 1604, during which the besieged lost about 50,000, and the Spanish besiegers more than 80,000 men. Ultimately, when reduced to a mere heap of ruins, it obtained an honourable capitulation. In 1836, great part of the town was destroyed by the explosion of a powder-magazine. By railway Ostend is connected with all parts of Belgium, with France, and Flanders and steamers ply regularly between it and London and Dover; and it is connected with England by sub-marine electric telegraph. Pop. 12,808.

OSTENFELD a vil and par Denmark, duchy and 16 m. W. S. W. Schleswig; with a Protestant church. The inhabitants are Frislanders.

OSTER, a tn. Russia, gov and 40 m. S. S. W. Cozengor, 1 bank Dniep, at the junction of the Oster with four churches, the remains of several convents, a considerable trade in timber and an active fishery. Pop. (1843) 2088.

OSTER, or Ozer, a river, Russia, which rises in the S. of gov Chernigov, flows W., and joins r. bank Dnepr at the town of Oster; total course, 100 m.

OSTER-BOSONA, a seaport in Norway prov Christian sand, on a tongue of land which projects into the Kattegat, 100 m. S.W. Christiania, with a good harbor important trade, and a trade in iron and wood. P. (1866), 2213

OSTERBURG, a town in Prussia, gov and 47 m. N. Magdeburg, r. bank Elbe, with a Protestant church, chapel, and hospital; a brewery distillery, and a trade in cattle. P. 2285

OSTERBY, a vil. Sweden, lin and 26 m. N.E. Upsala, near the mines of Dannemora, on the lake of that name, well built, and, being intersected by planted alleys, has a cheerful and handsome appearance. The forges, at which the ore from Dannemora is smelted by charcoal, and prepared for exportation are on a large, and even magnificent scale. The manor-house has two wings, one of which is a church. There is also a good collection of paintings, with several originals by Flemish and Italian masters

OSTERBODE—1 A in Hanover, landroest and 88 m. S.E.E. Hildesheim, on the Soes, at the foot of the Harz mountains. It is walled has three churches, a gymnasium, infirmary, and extensive corn cognac manufactures of woollen and linen goods, calicoes, drills, white-lead, shot, soap, needles, and articles in wood, tobacco-factories, tanneries, machine-works, oil, walk, gymnasium, and other mills. P. 1897.—2, A walled in Prussia, gov and 74 m. S.W. Königsberg, on the Dvarena. It is the seat of provincial and town courts, has a castle, erected by the Teutonic knights in 1270, a Protestant church and chapel, manu factories of woollen cloth and lace a brewery, and distillery and a trade in wood and cattle. Pop. 2891

OSTERRICH See AUSTRIA

OSTERUND, a in Sweden, cap. lin of same name, beautifully situated on the E. shore of Lake Stor 292 m. N.W. Stockholm. It is regularly built has a court, and several public offices. On an island in the lake, connected with it by a bridge, the suburb Fjölde with a church, and a handsome town-house. Pop. exclusive of Fjölde, 418.—The Lax river frequently called Jämtland, is bounded N. by Umeå, E. Hernösand and Jönköping, S. Falun, and W. Norway. It is flat towards the E. but becomes mountainous as it approaches the frontier of Norway. It is watered by the Indal, the Ljungan, and the Ljumsa, and their affluents, and possesses many lakes of which Storön is the largest. It does not produce corn sufficient for its own supply, but it raises many cattle. Timber iron, and copper are the chief riches of the lac, supplying numerous saw mills and foundries. Area, 14,400 sq. m. Pop. 49,077

OSTERWIEK, a in Prussian Saxony, gov and 47 m. W.S.W. Magdeburg on the Elbe. It is walled has two churches, manufactures of woollen and linen goods, distilleries, oil, walk, and other mills and a trade in wool and cattle. Pop. 3041

OSTFY ASSONOWA a vil Hungary Thither Danube go. Eisenburg, on the Raab, 18 m. from Fapa with a church, and a trade in corn, cattle, and wool. Pop. 1260

OSTHÄLM, an independent seaport in Sweden, lin and 85 m. N. Stockholm, on a creek in the Gall fjord. P. 500

OSTHEIM, two places, Bavaria, Lower Franconia.—1 (Gross), A market in, 7 m. N.W. N. Obernburg, on the Raab, with a church, two chapels, three mills and a trade in cattle. Pop. 2570.—2, (Klein), dist. Aschaffenburg, r. bank Main. Inhabitants chiefly employed in raising vegetables, cutting turf and rearing bees. Pop. 1104.

OSTHEIM von dem Rade, a walled tn. Saxa-Weimar, dist, and S.S.W. Eisenach. It is well built has a church the ruins of an old castle, and an hospital, manufactures of linen, dyewerks, and numerous mills. Pop. 2450

OSTIA, a tn and seaport Papal States, 14 m. S.W. Rome, near l. bank S. branch Tiber, founded in 830 by Pope Gregory IV. It contains a castle, picturesque situated, a cathedral, and an episcopal palace, which has been converted into a museum of antiquities. The situation is rendered so pestilential by malaria, that, though numerous handsome houses remain, the population has dwindled down to less than 100. Ancient Ostia stood about 14 m. from the modern town. It once contained 80,000 inhabitants; but was completely ruined by an invasion of the Saracens in the 8th century

OSTIANO or I STIANO a tn and com. kmpl. of Italy prov and 27 m. W.N.W. Mantua, near l. bank Olbia. It has an old castle, a church, four chapels and an hospital, manufactures of woollens, hats, and earthenware, and several mills. P. 2595

OSTIGLIA, a tn. kmpl. of Italy prov and 19 m. E.S.E. Mantua, l. bank Po. It is an ancient and well-built place, has a court of justice, and several public offices, several churches, four suppressed convents, an hospital, a theatre, manufactures of various articles in sugar, roots, and leather, work, a large silk-mill, and a considerable trade in corn, wine, oil provisions wood, and silk. Ostiglia is said to have given birth to Cornelius Nepos, and numbered among its magistrates Bernardo Tasso, who was himself a poet, and the father of the more celebrated poet, Torquato. Pop. 5514.

OSTIHAL, two places, Austria, Moravia.—1 A tn circle and 5 m. S.E. Hradisch on the March with a castle, on an island formed by the river and a church. Pop. 1500.—2 A tn, circle Freun 43 m. E.N.E. Olmutz, on the Ostrovitz with a church, and some woollen manufactures. Pop. 1732

OSTRAWITZ, a vil. Moravia, circle Freun, on the Ostrovitz, 30 m. from Freiburg, with a church. P. 1817

OSTRITZ, a tn. Saxony, circle and 30 m. S.E. Bautzen l. bank Neisse with manufactures of linen and tobacco, and tile-works. Pop. 1464

OSTROG a tn Russia gov Volhynia at the junction of the Valtia with the Gorin, 104 m. W. Zhitomir. It is defended by an old castle, and has several Greek and R. Catholic churches, a convent, seminary, riding-school, and a considerable trade. It is the seat of an archbishop, and the place where the Bible was first printed in Slavonic. Pop. (1850) 2538

OSTROGOSK, a tn Russia, gov and 64 m. S. Voronej, l. bank Sooma, where it is joined by the Ostrogolaka. It has ten churches, and a considerable trade in cattle, horses, and tallow. A German colony holding the t. of Ansbach, has existed here since 1768. P. (1851), 5422

OSTROK, a vil. European Turkey, Montenegro 28 m. N.E. Cetinje. It consists almost entirely of two convents and the buildings attached to them. One of these convents occupying a cavern in the side of a perpendicular limestone mountain, is the great stronghold of Montenegro. The other occupies an advantageous position on the slope of the mountain below. The former convent is so inaccessible, and so completely protected from hostile missiles that in 1788 it stood a siege of several months by 80,000 Turks who were ultimately obliged to retire with immense loss.

OSTROLENKA a tn Russian Poland, l. bank Narv have crossed by a wooden bridge, 80 m. W.W. Lomza. It contains a castle, and a numerous monestary inhabitants live by general trading and fishing. In 1831 an obstinate battle was fought here between the Russians and the Poles. P. 1277

OSTROV a tn. Russia, gov and 90 m. S. Vior partly r. bank Velsk, and partly on an island formed by its channel. It is poorly built: but has a cathedral, said to have been in existence for five centuries and two churches. The trade is in wood, corn, and fine flax. Pop. (1849), 1851

OSTROVO a small tn. European Turkey, Macedonia on the shore of a lake of same name, 91 m. E. by S. Monastir. It is picturesque situated, but a miserable place.

OSTROW, a tn Russian Poland, 19 m. S.S.E. Radzyn, on the Tyssmenica. Pop. 1500

OSTROWIEK a tn. Poland, 24 m. N.W. Sandomir Pop. about 3000

OSTROWNO a tn. Russia gov and 99 m. N.W. Mohilev on a lake near l. bank S. Dvina. It has extensive manufactures of hardware and some general trade. Some severe fighting took place here between the French and Russians in 1812

OSTROWO, a tn. Prussia, gov and 67 m. S.E. Posen on the Olschok with a church, and a synagog and manu factories of woollen cloth. P. 735.

OSTUNI, a tn. Naples, prov Otranto 21 m. N.W. Brindisi, on a lofty eminence, the see of a bishop, with a great number of churches and convents. Pop. 5000.

OSUNA (see GONZALEZ GERMANOS), a tn Spain, Andalus, prov and 41 m. E. Seville with churches, brooks, and well-watered streets. It has 18 fountains, all supplied by a subterranean aqueduct of about a mile in length, a general hospital, a considerable number of primary schools, and a college. The

last occupies a building, which belonged to another institution now suppressed, a grandiose edifice, with an entablature of statues, and a spacious court, with double gallery supported by 24 columns. It has also a parish church, with three apseless naves, a magnificent transept, and 11 chapels, with arches and pillars in the Greco-Roman style. It was converted into a castle and magazine by Marshal Soult, and the French carried off more than 5 cwt. of ancient church-plate. There are eight hermitages in and around it, and two fine promenades. Most of the inhabitants are engaged in agriculture, and a considerable quantity of wheat, barley and beans is exported to Seville and Malaga. There are also manufactures of iron, fine earthenware, soap, hats, bricks, numerous oil mills and wine presses. Most of the manufactures of exports used in Andalusia and Extremadura are carried on by the poorer class. Pop. 15,508.

OSWALD (Str) two parts Eng J—1 Chester 6794 ac. P 6759—2, Durham 11 419 ac. P 10,868.

OSWALDKIRK AND ANDERSTON, par Eng, York (N Riding), 5578 ac. Pop. 862.

OSWALTON TOWNSHIP, par Eng, Lancashire, 4 m. N.E. of Blackburn, with a district church, some Dissenting chapels, several schools extensive manufactures of cotton goods, and print works. William Sadler the servant, was killed by falling from his balloon near this place. Pop. 7654.

OSWEGATCHIE, a river U States, rises in the N of New York near lat. 44° N flows first N W then turns suddenly N N E and returns that direction till its mouth in the St. Lawrence at Ogdensburg total course about 180 m.

OSWEGO a town and port U States New York, on both sides of the Oswego (a stream 24 m. long which here falls into the S.E. shore of Lake Ontario), and is crossed by a bridge (90 ft. long) on a branch of the Erie canal, and on the railway from Syracuse, forming a continuation of the great line from New York and Albany 150 m. W by N Albany. It rises finely from both banks of the river, and is regularly and handsomely built, consisting of a number of public squares and streets, 100 ft. wide, intersecting each other at right angles. Among the public buildings are five churches, of which the First Presbyterian and the Episcopal deserve special notice both for the beauty of their sites and the elegance of their structure. A courthouse custom house university academy and flourishing female seminary. The manufacturing establishments include several tanneries, and numerous saw and sawmills for which ample water-power is supplied by the Oswego and its trade, chiefly transit both on the lake and in the interior by canal and railway, is of vast extent, its harbour which next to Rochester's Harbour is the best on the S. side of the lake, has a depth of 10 to 12 ft. making it the natural emporium for the traffic to New York from Canada and the W. On the E. side of the river, near the lake is Fort Oswego, which furnishes a strong defence to the harbour. Pop. 12,305.

OSWESTRY a municipal bor market tn and par England, co. Salop. The town, 202 m. N W Shrewsbury is kept tolerably clean and has some very old houses, but the general air is modern and well built, chiefly of brick. It contains the parish church, a building of great antiquity, another church erected in 1577, are Dissenting chapels, a guildhall, and two handsome and commodious market-houses, one for corn, cheese, &c., and the other for butter, butcher's meat, &c. three public schools—one of which, the national school, occupies a very fine building. Oswestry is a place of great antiquity, and is celebrated in early English. It derives its name from that of Oswald, king of Northumbria and gives the title of baron to the Duke of Norfolk. Pop. 4517. Area of par. 15,078 ac. Pop. 8796.

OSWIECLIM a town, Austria, Galicia, on a height above a bank below the junction with the Vistula, 82 m. W of Racow. It is a very ancient place and has a church, a synagogue, and the ruins of an old castle. Pop. 2872.

OSYK, Ozyk, or Wosyk, a vil. Bohemia, circle Chrudim, in the Dnieu about 7 m. from Ledowichal. It is a long straggling place; and has a school tile-works, a saw and other mills. Pop. 1059.

OSYTH (Str) a vil and par England, co. Essex, 11 m. N.E. Colchester near the Colne. It has a large irregular parish church but chiefly deserves notice for its ancient

monastery of which the quadrangle is still entire, and a fine gateway and several towers still remain. Area of par. 8420 ac. Pop. 1877.

OSZLAN a market tn. Hungary co. Bars, in a fertile district not far from the Neutra, 29 m. W by S. Koszold; with some trade in corn. Pop. 1600.

OSZLOP or Oszlak, a vil Hungary Thibber Danube, co. and about 8 m. from Oedenburg with a church, a mill, and a trade in wine. Pop. 1003.

OSZTERN, or Kiv Komlos, a vil Hungary Thibber Themas, co. Torontal, about 4 m. from Komlos with a church and a trade in corn and maize which are largely grown in the district. Pop. 1640.

OSZTURNYA (Osturna, or Ostorno), a vil Hungary, Thibber Themas co. Zips, on a slope of the Carpathians, near Leutschau with a church. Pop. 1809.

OTAGO or OTAKO, a settlement, N.E. coast, New Munster, or the Middle Island of New Zealand lat. 43° 58' S. lon. 170° 50' E. It consists of a district of 400,000 ac. or 630 sq. m. stretching along the S. Tacebo with a navigable inlet, called Otago harbour forming a good harbour running about 14 m. inland near the N end of the colony. The soil is a black vegetable mould resting on a fertile clay containing a mixture of sand. The Otago block or settlement consists of a chain of rich, perfectly level plains, stretching N to S. namely, the Taeri, the Waihoia, the Tokumairiro, and the Clutha, each with a river flowing in, and surrounded with a hilly country, affording excellent pasture, wool and agricultural produce of every kind are the products of the soil, timber is plentiful the New Zealand flax (Phormium tenax) grows wild, coal and limestone abound and the sea teems with fish. The main part of the population is located on the shores of the inlet referred to, and chiefly in and around the town of Dunedin, near the head of it. A Free church with manse and school house, has been built at Dunedin and several schools have been commenced in various parts of the colony. On Otago harbour, further down than Dunedin, lies Port Chalmers, finely situated, but still in its infancy. Pop. 18611 1740.

OTAPALIE, or Otapal, a S. Pacific. See TAMEI. OTAVALO (or OTAVALO), a tn Ecuador esp. dist. on a slope of the Andes, 85 m. N N.E. Quito. It has two churches a Franciscan convent and manufactures of cotton goods, in which as well as in agricultural produce a considerable trade is carried on. Pop. about 15,000.

OTCHAKOV (anc. Anzons) a tn Russia, gov. Kherson r. bank Dnieper at its mouth in the Black Sea 40 m. E.N. S. Odessa, once a place of great importance, the possession of which was strongly contested by the Turks and Russians. It was besieged and taken by the Russians from the Turks in 1757 and again in 1788. The town has since gone into complete decay. Only a few mud houses, whitewashed are occupied. There is also a Greek church formerly a mosque, and the fort, which commanded the entrance to the harbour, is still kept in good repair. Pop. 1000.

OTEA or GREAT BARRER ISLAND S. Pacific Ocean off N.E. coast New Zealand, forming the E entrance of Hauraki Gulf, or the Firth of Thames about 20 m. lon. N to S, by 8 m. broad. It has very irregular and deeply indented coasts, and a mountainous interior. The hills are generally covered with forests of kauri pine and brushwood; but there is much open ground on the W. coast, where are also several excellent harbours. A copper-mine has been discovered on the island.

OTIVAR a vil and com. Spain, Andalusia, prov. and about 30 m. from Granada with a church, townhouse, prison, primary school manufactures of articles in espargo, oil and wine, and a trade in oil wine, and figs. Pop. 1815.

OTILAKA, a vil Hungary Thibber Themas, co. and 7 m. N by W Arad; with a Greek church and some trade in cattle. Pop. 2520.

OTLEY, a market tn. England, co. and 25 m. York (W Riding), r. bank Wharfe, over which there is a neat bridge of seven arches. It is small but well built, and is partially lighted with gas; has a spacious, airy, parish church, of great antiquity but much altered; places of worship for Independents, Wesleyans and Primitive Methodists, Method-

ists of the New Connection, and the Society of Friends; and a free grammar-school. The principal trade of Otley is in corn which is sent to the manufacturing districts, and in cattle and sheep, for which a large market is held every alternate Friday. Pop. 4623

OTLEY par Eng. Suffolk, 2187 ac. P. 616.
OTQUE, a small ill. New Granada, bay and 30 m S.S.W. Panama, lat. 8° 30' N, lon 80° 20' W

OTRANTO (TARENTO), a prov. Naples, forming the heel of the boot which Italy so remarkably resembles and, excepting a part of the N and N.W. where it is bounded respectively by prov. Bari and Basilicata, is entirely surrounded by the sea—the Adriatic on the N.E., the Ionian on the S.E. and the Gulf of Taranto on the S. greatest length, N.W. to S.E., 106 m., average breadth, about 85 m.; area 3883 sq. m. cap. Lecce. Its extensive coast furnishes a number of large bays and good harbours, and teems with fish. Its interior is traversed throughout its whole length by a branch of the S. Apennines, which forms the water-shed between the Adriatic and Gulf of Taranto furnishes excellent pasturage, on which numbers of fine horses are reared. It has no considerable stream. There is good wine, and the rain is carefully collected in cisterns, but heavy dews favour vegetation. The olive grows in whole forests without culture, and wheat, barley, oats, vegetables, vines, different fruits, cotton, and tobacco, are grown. The chief manufacture is the weaving of cotton. The trade confined almost entirely to the products of the soil is considerable. Pop. (1850) 409,000

OTRANTO (see *Hydruntum*) a tn and seaport, Naples prov. Terra di Otranto, 42 m. S.S.E. Brindisi on the strait of its name, across which is the shortest distance from Italy to Greece. It is tolerably well fortified, but is poorly built and is in a very disreputable state. It contains a castle, whose name has been made familiar by Walpole's romance of the *Castle of Otranto* a very old cathedral an archbishop's palace, and some Roman antiquities. Its harbour is large and commodious, and enables the inhabitants to carry on an active trade with the Levant, particularly in corn, fruit, oil and horses. Pop. 4000

OTRAR, a tn Independent Turkish Khanat Kokan, bank Sic. or Shon, 270 m N.W. Kokan lat. 44° N lon. 87° E. It was formerly a place of considerable extent and importance, and made considerable figure in the history of Asia, but little is known of its present condition

OTRIOLI a petty vil. Italy Umbria, 20 m S.W. Spoleto near L. bank Tiber with the remains of a theatre and other splendid edifices. Near it in 1789, 10,000 French defeated about ten times the number of Neapolitans. P. 800

OTSEGO a lake, U. States, New York, 9 m long and from 1 m to 2 m broad. Its outlet is the source of the Susquehanna.

OTSD, a vil. Hungary Thibet. Thess. co. Beloe, or the Eski 73 m. S.W. Pesh, with two churches. P. 4511

OTTAJANO a tn Naples, prov. and 12 m E. Naples at the N.E. foot of Mount Vesuvius. It has a castle, situated on an adjacent height; and three churches. Inhabitants chiefly employed in agriculture. Pop. 8000

OTTAKRING, OTTOCRON, or ABERKING, a vil. Lower Austria, near Vienna with several splendid mansions. It is a great holiday resort from the capital. Inhabitants chiefly employed in sending milk and fruit to Vienna. Pop. 3690

OTTAWA a river British N. America forming the bound. ary line between Upper and Lower, or Eastern and Western Canada. It rises in the high land which separates the basin of Hudson's Bay from that of the St. Lawrence, about lat. 48° N, whence it flows S.E. and falls into the St. Lawrence, about 20 m. above Montreal. In the upper parts of its course, it passes through Lake Temiscamingue. About 90 m. above its junction with the St. Lawrence, occur the falls of Chaudiere, the principal of which is about 60 ft. high. The whole course of the stream is about 400 m. In its course through the table-land, the banks are generally high, but below the Chaudiere they are much less elevated, and often inundated. It is now navigable from its junction with the St. Lawrence to the falls above named. Much of the scenery on the Ottawa is magnificent, but the land on its banks is generally of poor quality. It is of much importance, however, from the immense quantity of fine timber cut on its banks, and on those of its tributaries.

OTTENAU a vil. Baden, circle Middle Rhine, belt. Gersheim, with a church, and three mills. Pop. 1181

OTTENBACH, a vil. par Switzerland, cant. and 9 m. S.W. Zurich, 1 bank Rhine. It was almost entirely burnt down by three successive fires, in 1788, 1789, 1790, and has since been rebuilt. It has several cotton-works, but the chief employment is agriculture. Pop. 1969

OTTENSEN a well built vil. Denmark, duchy Holstein, W. of Altona and properly only one of its suburbs. Together with Neumühlen, another village properly a suburb of Altona its pop. is 2800

OTTENSBILIM, a tn Upper Austria circle Mühl, on an acclivity above L. bank Danube 5 m. W. by N. Linz. It is well built has a fine old church built in 1465 and an old castle manufactures of leather and wooden articles and a trade in linen yarn, wood and fruit. Pop. 1130

OTTENSBILIN,—1 A market to Brunswick, near the Weser N. Holzminden with a church, brewer's, and a trade in salt. Pop. 1004—2 A tn Rheuss Prussia, gov. and 81 m. W. N. Münster with three R. Catholic churches, manufactures of linen bleachfield, a trade in cattle. P. 917

OTTENBURG, a river U. States rises in Mount Talcott on the S. of Vergennes flows N.W. past Rutland, Middlebury, and Vergennes and 6 m. below the last falls into the S.E. shore of Lake Champlain total course 70 m. It is navigable by the largest lake vessels to Vergennes, and by boats to Middlebury. There are several fine falls upon it.

OTTENBACH (Ottiz and Nixdorf) two adjacent vila. Bavaria, Palatinat, cant. Bernsbach, 12 m. S.S.W. Landau with a church, and a mill P. (1807) 1706 (*Aveller*) 421

OTTENBERG, a tn Bavaria Palatinat, 33 m. N.W. Speyer with three churches, a monastery and the ruins of an old castle manufactures of woollens a tannery, and several mills. Pop. 3580

OTTERBOURN, par Eng. Hants 1608 ac. P. 596
OTTERBURN W. and a vil. and township, England, co. Northumberland, on the Otter 11 m. N.N.E. Bellingham. It is a neat well-built place, in a romantic district with a Presby. terian chapel and is famous for the battle between the Scots and English in 1388 on which the popular ballad of Chevy Chase is founded. The strong tower of Otterburn has been supplanted by a modern castle though some traces of it still remain. There are several tumuli and remains of encampments on the battle-field and a cross, called by a misnomer Percy's Cross has been erected on the spot where Douglas is supposed to have fallen. Pop. 415

OTTERDEN par Eng. Kent 1434 ac. l. 13d
OTTIFORD par Eng. Somerset, 2987 ac. P. 451

OTTERHAM par Eng. Cornwall 3262 ac. P. 193
OTTERHAMPTON par Eng. Somerset 1117 ac. P. 210

OTTERINGTON two par. Eng. York (N. Riding) — 1 (North) 8625 ac. P. 607—2 (South) 1414 ac. P. 412

OTTERNDORF a tn Hanover, dut. and 30 m. h.W. Stade, on the Mosden where it has a small harbour. It contains a castle and a Latin school and has blew-works and lunekilns. Pop. 1864

OTTERSBERG, a vil. Hanover gov. and 37 m. S.W. Stade, on the Wümme. It was once fortified and has manufactures of linen a fishery and a distillery. P. 1055

OTTERBLEBEN (GROSS and KLEIN) two places Prussia gov. and about 3 m. S.W. Magdeburg each containing a church. Pop. (1834, *Klein*) 633

OTTERTON, par Eng. Devon 3479 ac. Pop. 1281
OTTERTY, (St. Mary) a market tn. and par. England co. Devon The town 12 m. N.E. Exeter 1 bank Otter has a large parish church, two Dissenting chapels an endowed grammar school, a national British and Foreign school and several others; manufactures of silk ribbons, handkerchiefs, and silks for dresses, carried on to a very considerable extent, there being upwards of 500 persons thus employed. Devonshire lace is also made in large quantities, and there is besides a very extensive corn mill. Pop. 2534. Area of par., 9942 ac. Pop. 4241

OTTIGLIO a tn Italy Piedmont, div. and N.W. Alessandria, on the torrent Rotaldo, crossed by a bridge. It has two churches, and a trade in wine. Pop. 1900

OTTIGNIL, a vil. and com. Belgium, prov. Brabant, in a valley watered by the Dyle 15 m. S.E. Brussels with a flour-mill, and a trade in agricultural produce. Pop. 1075

OTTMACHAU, a walled in Prussia, prov. Silisia, gov. and 41 m. W.S.W. Oppeln, 1 bank. Niesse. It has a fort, castle, church, chapel, and hospital; a tobacco-factory and tile-works. Pop. 5083.

OTTOBREUNEN, or **OTTENBREUNEN** a tn. Bavaria, Swabia, 41 m. S.W. Augsburg, with a castle, two churches, chapel, parsonage, an old Benedictine abbey and a trade in corn and cattle. Pop. 1480.

OTTOBIANO a vil. and town Italy Piedmont div. Novara, prov. Lomellina, about 6 m. S. Mortara, with an ancient church, convent, school, and a trade in corn and rice. Pop. 2150.

OTTOCHACZ, a market in Austria, Croatia, general ship, and 45 m. S.W. Carlsbad, cap. regimental dist. of same name, on the Glitska. It has a church, two castles, a superior and a girls school. P. 600. — The district, area, 810 sq. m. is well wooded and fertile, produces much corn and wine, and rears great numbers of cattle, sheep, and goats. Pop. 72,440.

OTTOMAN EMPIRE. See **TURKEY**.
OTTOMÉ, a tn. Italy, Piedmont div. and 25 m. N.E. Genoa, in a mountainous district near the Trabbim with two churches, the remains of two old castles; and a trade in wine and in necklaces, and other ornaments formed out of a kind of fibrous quartz, or rock-crystal. Pop. 4290.

OTTOSCHWANDEN a vil. Baden Upper Rhenia, bail and name commending, with a church, and numerous mills. Pop. 1190.

OTTINGHAM, par. Eng. York. E. Riding; 4320 ac. Pop. 63.

OTTWEILER, a tn. Rhensia Prussia, gov. and 36 m. S.E. Treves, on the Biles with local courts, an old castle, two R. Catholic churches a synagogue and manufacturers of woollens, cottons, and earthenware. Pop. 2964.

OTUMBA, a tn. Mexico, in a fertile district, N.E. from Lake Texcoco. It is now in ruins, containing only a few inhabitants, chiefly Indians, but is said to have at one time had a pop. of 90,000, and to have been a place of great importance. Its chief interest is now derived from its antiquities.

OTURA, a tn. Spain, Andaluzia, prov. and S. Granada with a church, townhouse, prison, and primary school, manufacture of linen several flour mills, and a trade in agricultural produce. Pop. 1930.

OTWAY a cape, Australia. S.W. side, Port Phillip, lat. 39° 51' S. lon. 143° 45' E.

OTWAY (PORT) W. coast, Patagonia, W. side, Holloway Sound, about 15 m. N.E. Cape Horn Mouth, lat. 46° 49' 30' S., lon. 75° 18' 15' W. (a) described by Captain Stokes as an admirable port, promising to shipping a rich growth of stout and shapely timber with which its shores, even down to the margin of the sea, are closely furnished, and from which ships of the largest size might obtain spars. On each side of the harbour are some finely-sheltered coves containing inexhaustible supplies of water and fuel.

OU KIANG a large river China, prov. Kweichow, formed by numerous head streams, having their sources in a mountainous district in the S.W. part of the province; flows N., and falls into the Yang-tse-Kiang at Pek, near lat. 30° N., total course, about 250 m.

OUAD or **OUED** (El.), a vil. Algerian Sahara, dist. Bouf. 119 m. S. by E. Biskra. It is miserably built, on a dry and sandy soil planted, however, with numerous date-trees. It is surrounded by gardens, in which cucumbers, melons, onions, and tobacco, are cultivated. Pop. about 2000.

OUADZ-EL-HARJ, a river Morocco, which descends from the greater Atlas, flows N.W., and after a course of about 100 m., joins 1 bank. Morroco.

OUAD-NAGHA, a tn. Egypt. See **WAD-MEDHA**.
OUALAN ISLAND, or **SEMPER'S ISLAND**, N. Pacific Ocean, lat. 5° 21' 30" N. lon. 168° 1' E. It is the most E. of the Caroline group, 24 m. in extent, and of volcanic formation; divided into two unequal parts by a mountain range, which stretches across it W. to E. Mount Bessie on the N., and Mount Crater on the S. portion, have the respective heights of 2160 and 2159 ft. Many other peaked summits are seen rising up from the midst of an impenetrable forest, with which almost the whole island appears to be covered. It has some good harbours, and is abundantly supplied with water. The port where the inhabitants chiefly reside, called Lala, is on

the E. side. Another port on the W. side, called Gogulle, has excellent anchorage, and tranquil water. Pop. 710.

OUARGLA, a tn. Algerian Sahara, coasts of same name, 92 m. E. by N. Gardia lat. 31° 22' N. lon. 4° 6' E., on a marshy soil, in the midst of gardens, and surrounded by a ditch and battlemented wall, crowned by 40 two-storied towers, and entered by six gates. It contains a chateau, about 500 or 600 houses, and is divided into three quarters, each of which has its mosque, and its schools. Ouzgla is the centre of a considerable trade. The people are extremely dissolute in their morals. — (Dauzat, Sahara Algérie.)

OUBA, a river, Siberia, which rises on the W. slope of Mount Ubanak, in the S. of gov. Tomsk, flows W.S.W. into gov. Omsk and after a course of above 100 m., joins r. bank Irtysh 60 m. W. Ust-Kamenogorsk.

OUESA Nua, a lake, Chinese empire, Kalkas territory; lat. 50° N.; lon. 91° 50' E. about 60 m. long and 30 m. broad. Numerous streams from the Tagara mountain pour into it on the N. — Large sturgeons are taken on this lake.

OUICHE (Latin, *Queila*) a river France, rises in the mountains of Jura or Cr., flows in a southeasterly course of about 60 m. N.E., and then S.W. past Dijon, and joins r. bank Saône, about 1 m. above St. Jean de Léone.

OUICHE, an ancient dist. of Upper Normandy France, now included in depts. Eure and Orne.

OUCHES (Lsm) a vil. and com. France dep. Haute Savoie, prov. Faucigny about 8 m. from Chamonix 1 bank Arve, about 2600 ft. above the sea, with a church, and some trade in cattle and honey. Pop. 1713.

OUCHI, Uchi, or **YOUSSE-NINA** a tn. Chinese Tartaristan, 220 m. N. b. Caahgar, with a lofty mountain backing it to the S. and a large river in front facing the N. It is the central locality of an important district, possesses a mint, and carries on an extensive trade.

OUCHITZA, a tn. Russia, gov. Podolia on the Dniester 24 m. E.S.E. Kamenka, with two churches, manufacture of cloth, and a trade in several distilleries. Pop. 1000.

OUCHI-OGANAT, or **MOUNT ST. ANTHONY** an isl. N. Pacific Ocean, off Russian America lat. 59° 23' N. lon. 168° W. It is about 27 m. in extent, and rising from a low shore, forms a lofty and nearly perfect cone, covered with snow and ice, and without any appearance of tree or shrub. It is separated from the mainland by a channel about 6 m. wide, and is so lined by numerous, large detached rocks, as to make landing difficult.

OUCHI a vil. Switzerland can Vaud, on the Lake of Geneva, about 3 m. from Lausanne, of which its haven may be considered as the port. It contains the remains of an old castle, and a little inn in which Byron, while detained by bad weather for two days, wrote the *Prisoner of Chillon*.

OUCKENE, a vil. and com. Belgium, prov. W. Flanders, 17 m. S. Brugge with a brewery. P. 2185.

OUDE or **UNA**, a river Siberia, rises in the S.E. slope of the Stanovoi mountains flows E.N.E., and falls into a large bay of the Sea of Okhotsk, opposite island Folistov total course, 200 m. Its chief affluent is the Gailan, which it receives considerably above the S.W. of Udaok.

OUIDA or **OUAI**, a river Russia, rises in S.W. of gov. Chergassy flows easterly S.W. to the Caspian Sea.

OUIDANULLA, a small tn. Hindoostan, prov. Bengal, Boglipour, dist. r. bank Ganges, 62 m. N.W. by N. Moorshedabad lat. 24° 46' N., lon. 87° 52' E.

OUIDAY a kingdom Africa. See **WADAY**.

OUDDI (native, *Agadaha*) a kingdom, Hindoostan under British protection, lat. 25° 20' to 30° N. lon. 79° 40' to 82° 30' E.; bounded N. by Nepal, and elsewhere surrounded by the N.W. provinces of the presidency of Bengal, length, N. to S., about 280 m.; greatest breadth, 180 m.; area 23,736 sq. m. The surface is mostly level, and highly fertile. It is watered by the Gogga, Gomti, Rye, and other tributaries of the Ganges, all of which have a general S.E. course. The Ganges itself flows nearly all its S. boundary. Wheat, barley, rice, sugar indigo, and others of the richest products of India, are raised in large quantities; and in some districts, a vast amount of nitre and other salts effloresce on the soil. The country was, however, long greatly impoverished, and although some improvement has taken place within the last twenty years, Oude still presents an unfavour-

able contrast to the adjacent British territories. Some parts of the country are in high and fine cultivation; but large tracts are overgrown with jungle, and whole districts have been purloined and depopulated by the official and other robberies and exactions to which the inhabitants have been subjected. Amongst the inhabitants are numerous Rajpoots and many of the population are Mussulman the ruling dynasty being Mahomedan. Oude was formerly a Mogul province, having wider limits than the present kingdom, and was surrounded by the provinces of Delhi Agra, Allahabad, and Bahar. It became subordinate to the British after the battle of Kalpee, in 1766. In 1801, there were annexed from this territory to the British dominions, Gurdaspur and some other B. districts, and, by the treaty of the same year, the Viceroy agreed to maintain in his own pay only four battalions of infantry and 2000 cavalry besides a few guards, armed collectors, and irregular troops and to pay to the Anglo-Indian government an annual subsidy of 760,000 rupees (£76,000) from which the British support a subsidiary force of 10,000 men, including Europeans. In 1819, the Viceroy threw off his nominal dependence on the Mogul sovereign, and assumed the title of king. A disputed succession and partial revolt in 1857 have been the chief events of note in Oude during recent years, if we except the attempt to introduce European arts and learning by the reigning (1858) monarch, who is a member of several scientific associations in England, and under whom various schools and institutions have been founded, including a royal observatory with fine apparatus, at Lucknow, the capital. Political relations are conducted through the British resident at Lucknow after which city the chief towns are Fyzabad, Oude, Barabhoi and Parliabgar. Pop. 2,870,000.—(Trigon. Survey of India Report, 1881).—Oude, a te and the former cap. on both banks the Goggra, 77 m. E. Lucknow large, populous, and greatly increased by Hindus, but its ancient temples are in ruins, and its only structures deserving notice are a mosque, built by Aurangzeb some Mahomedan tomb, and an iron bridge, built with materials brought from England, and lately erected across the river.

OUDE-SCHIED (NED), a vil Holland prov N Holland, lat Texet formerly a place of considerable sea-faring traffic but, since the rise of New-Deerp, greatly fallen off. It has two churches, and a school. Pop. 1085

OUDE-TOWN, a vil Holland, prov S Holland 17 m S E Brude, with a pretty townhouse, two churches, and an hospital. Pop. 2363.

OUDEBARD, a te Belgium See Audebarde.

OUDEBOSCH, a market to Holland, prov N Brabant, 19 m. W S W Brude with a townhouse, church, cemetery, and a small harbor, breweries, tanneries a boat building yard, and a two-nursery, and a trade in grain. P. 1940.

OUDEBOURG, a vil and com. Belgium prov W Flanders, 11 m. W S W Brugge once one of the most flourishing towns in Flanders. It has a tannery, two breweries, brick works three flour mills, and a trade in agricultural produce. Pop. 1583.

OUDEKERK AAN DEN JONCK, a vil Holland, prov S Holland, 1 bank IJssel, 8 m. N E Rotterdam, with a church, school, a boat-building yard, and some hoop-making, but the chief occupation is brick-making. Pop. 2023

OUDEWATER, a vil Holland, prov S Holland 17 m N E Rotterdam, on the IJssel, where it is joined by the Linde; the latter stream here crossed by five bridges. It has an old townhouse, in the fish market a weighhouse, in the great market, three churches, an orphan hospital, a school; considerable manufactures of thread, a tannery, a brewery, and an extensive trade in cheese. Pop. 2001

OUDEHIL, a populous vil Hindostan, prov and 40 m N N W Beeder lat. 18° 18' N lon. 77° 16' E.

OUNN (Fr.), a vil and com. France, dep. Seine, 5 m N W Paris, with a castle, from which Louis XV III, in 1814, issued his declaration which preceded the charter, a manufacture of glass, soap, earthenware, crucibles, and bricks, a fast-mill, and extensive houses which communicate with the Seine, accessible to the largest barges. Pop. 1190

OUNN (Fr.), par Eng Jersey P. 2486.

OUNNANT, an isl. France, See OUNANT

OUFA, a te and river Russia, See Ufa

OUHREVAL, par Ireland, Mayo See Auhreval

OUGHTER (Lough), a lake, Ireland, on Cavan, formed by an expansion of the Erne. It is 5 m. long, by 3 m. broad and contains some large fertile islands.

OUGHTEHARD—1, A vil Ireland, co. and 16 m. N N W Galway within a mile of Louisa Court. It has a church, a B. Catholic chapel, and a small infirmary barracks. P. 982.—2, A par Ireland on Kildare, 2920 ac. P. 440. OUGHTEHARFAGUE, par Irel. Tipperary; 2617 ac. Pop. 669

OUGHITMAMA, par Irel. Clare, 6848 ac. P. 1188.

OUGHLOCH or Ouchron a te Russia, gov and 63 m W Jaroslavl, on both banks Volga. It is partially fortified, and is all built, with narrow uneven streets. The date of its foundation is not known, but, in 1607 it is said to have had 60,000 inhabitants. It was captured by the Poles, who sacked and burned it since which event it has never recovered its former importance. It still contains twenty-five churches, two convents, a seminary, and three hospitals; and has manufactures of leather, paper, candles, &c., and a considerable trade with the interior. Pop. 5600

OUGHREE, a vil and com. Belgium, prov and 8 m. S S W Ledge on the Menne; with manufactures of iron, a common-foundry, a saw, an oil and four flour mills. Coal is worked in the vicinity. Pop. 1560

OUJAE, a bay N Prussia, W shore, lat. Kladak about 12 m. N of the Russian Company's establishment of Carluck, near lat. 57° 14' N lon. 152° W, extending 37 m S S E. An island placed across its entrance leaves an open channel on either side.

OUKE-SIXA, an isl. Anam gulf and prov Tonquin near the entrance of the gulf, and about 7 m. from the mainland lat. 18° 50' N lon. 105° 30' E. It is 26 m. in extent.

OULAN KHUTOR, a te Mongolia, 185 m. W by 1 bank Chertov and about 40 m. from its source.

OULEAL, or OULALAY GROUP, Pacific Ocean, consisting of 23 isls. the S point of the most E of the group Ronger in lat. 7° 30' N lon. 148° 58' E. On the S side of the principal island Ouleal the shore rises with a tolerably steep ascent. The interior is covered with wood, interspersed in all directions by footpaths, and dotted with cleared spots, where scattered houses are met with. Bread-fruit trees abound here.

OULLA-DELLAY, a te Algerian Sahara, 35 m. W by S. Biskra. It is defended by an inclosure with battlements, and surrounded with gardens, pomegranates and woolen stuffs are made, and a general trade in corn, barley, dates, oil, &c., is carried on. The people are notoriously dishonest, and of very loose morals. Pop. 2750.—(Dannan, Sahara Algeria.)

OULASSOUTAI, a te. Mongolia, a bank one of the head-streams of the Jalkan, lat. 47° N lon. 95° 30' E. It contains a Tartar garrison, and is the residence of a Manchoo general.

OULLINS, a vil France, dep. Rhone, 3 m. S Lyons, on the railroad thence to St. Etienne. The fine view to its vicinity caused it to be much resorted to by the inhabitants of Lyons. In the parish church is a monument to Jaquard inventor of the well-known loom of that name, who died here in 1834. One was manufactured. Pop. 2020

OULFON, two parcs England—1, Norfolk, 1849 ac. Pop. 884.—2, Suffolk, 1997 ac. Pop. 742

OULON, a vil and township England, co. York, on an affluent of the Arre, 5 m. S S E Leeds, with a handsome church, and places of worship for Methodists and Baptists. The celebrated scholar, Dr. Bentley, was born here. P. 421

OULTRIE, a vil and com. Belgium, prov E Flanders, on the Malmech, 24 m. S S E Ghent, with a distillery two oil and two flour mills. Pop. 1780

OULEX a te. Italy, Piedmont, div Turin, prov and 18 m. S W Susa. It has a very ancient church, a royal college, of some celebrity, a large and handsome countess, a lofty, old tower and a trade in corn and cattle. Pop. 1600.

OUNALASHKA, OUNASH, OUNASH, OUNASH, Alaska isls. See OUNALASHKA, OUNASH, Alaska.

OUND, a te. Hindostan, prov Arrunghad, 5 m. N W Poonah, with a handsome Hindu temple.

OUNDLE, a market tn. England, co. and 24 m. N E Northampton, on a gentle declivity, 1 bank Reas. It consists of three principal streets straight, and well paved, houses of stone, and well built. It has a very handsome church, principally in the early English style, with a fine hexagonal spire,

310 ft. high three dissenting chapels, three public schools, and a set of almshouses. About 2 m. N from the town is the site of Fotheringhay Castle, in which Mary Queen of Scots was beheaded. One large stone alone remains of the building. Pop. 2689.—(Local Correspondent.)

OUNILA, a vil Russia, Finland, on the road between Prakeuski and N.-Karelia. It is picturesque situated near the Romanzki here crossed by a handsome bridge, and, though small, is a thriving well-built place with a church, an unusually handsome posthouse, very extensive saw-mills, and a considerable export of deals.

OUNDA, or **WONDA**, a river, N Africa, which rises in a mountainous district in the S E. of Senegambia, flows N N W, and joins the Kokoro, after a course of about 130 m. Its chief affluent is the Camoulang, which joins it on the left.

OURAL Russia. See **URAL MOUNTAINS**

OURATEPEH, a tn. Bokhara. See **UNATUPPA**

OURCE, a river France, rises in the Monts Faucilles, in S W of dep. Haute-Marne flows N W across part of depts. Côte-d'Or and Aube, and joins r. bank Seine near Bar-le-Duc total course, 65 m.

OURCO, a river France, rises in E. frontier of dep. Aisne flows westerly S W and joins r. bank Marne, 8 m. N E. Meaux total course, 50 m

OUREM a tn. and par Portugal prov. Beira-Alta, on a lofty height 65 m N N E Lisbon. It is walled, and defended by a castle built by Alphonso I. Pop. 3840

OURGA, or **OURNA** a city Mongolia, r. bank Tola, 720 m N W Peking lat. 49° N. lon. 107° 30' E. with streets so narrow that two persons on horseback can scarcely pass each other. There are numerous temples belonging to the lamas, and a college of Mongolia priests.

OURIQUE a tn. and par Portugal prov. Algarve, on a height, overlooking the extensive plain of Ourique, 42 m. S W Beja. Here, in 1130 a comparatively small body of Portuguese, headed by Don Alphonso Henriques, defeated a vast body of Moors, commanded by five kings. Henriques was in consequence saluted king, and laid the foundation of the Portuguese monarchy. Pop. 2650.

OURIOUKA, a tn Russia, on the Ouriouanka, gov. and 97 m. S. Viatka, with manufactures of soap and a trade in corn and fur. Pop. 1190

OURMA or **OURMA** a river Siberia, issues from a lake on the N W of gov. Tobolsk flows E., and falls into the W shore of the Gulf of Ob total course, 90 m.

OURO-PRATO or **OURA RICA** a tn Brazil cap. prov. Minas-Geraes, and of the mines, situated on a series of heights at the base of the serras of its name 190 m N N W Rio-de-

symmetry, on broken, uneven ground, the town presents an appearance the very opposite of picturesque. The principal buildings are the Governor's residence, a large square structure, about 2800 ft. above the sea, more resembling a fortress than a palace, and partly occupied by the offices of the civil and military authorities of the province, five churches, two of them richly decorated; the townhouse, the treasury barracks, and theatre. It also possesses a public library a botanical garden with a normal school of agriculture attached, two primary schools and a college, with classes of Latin and Portuguese, pharmacy and anatomy. An active trade is carried on with Rio-de-Janeiro, and with the towns in the N and E. of the province. Some gold is found in the streams in the neighborhood, but the quantity is so small that those who search for it and have no other occupation, are generally in miserable circumstances. Pop. 13 000

OURØE, an isl. Denmark, in the W arm of the island, on the N. of isl. Seeland. It is about 4 m. long, by 3 m. broad. **OURUIMADOU**, a vil W Africa, Senegambia, a bank Faldou, about lat. 14° 30' N, lon. 13° 10' W. It is agreeably situated, and occupied by Foulahs, one of the Foulah tribes.

OUTRE, or **Omre**, a river Belgium, formed by two small streams, the one flowing W S W, the other N N E which unite in the N part of prov. Luxembourg the stream flows thence first N W, then N E in a very winding course of 90 m and joins the Meuse near Liège, having previously received the Ambleve and the Vesdre, both on the right. It is navigable for 60 m.

OURY par Eng. Cumberland, 4000 ac. P 295

OURDEN, par Eng. Suffolk, 1200 ac. P 384

OUSE, several rivers, England.—1. Co. York, formed by the junction of the Swale and Yore, near Boroughbridge flows S E. and 8 m. E. Gook, unites with the Trent to form the estuary of the Humber total course about 60 m. for the last 45 m. of which or to York, it is navigable for large vessels, and for barges as far as Lincoln. Principal affluents Wharfe, Aire, and Don from the W., and Derwent from the N.—2. (Great) rises near Brackley, co. Northampton, flows in a general N E. direction traverses the co. Buckingham Bedford Huntingdon, Cambridge, and Norfolk, and falls into the sea at King's Lynn, after a course of about 161 m. for the latter two-thirds of which it is navigable. Chief affluents, Ivel, Cam, Lark Little Ouse, Stook, and Nar.—3. (Little Ouse) rises in Suffolk flows S W and falls into the Great Ouse, on the borders of Cambridge and Oxford.—4. A small river co. Sussex, enters the English Channel near Seaford

OUSE a river Canada West, rises in the high lands, between Lakes Huron and Ontario, about lat. 44° N flows S E. and falls into the N E. end of Lake Erie at "Sawbrook." There is a bar at its mouth with 3 ft. water on it; total course, 130 m. of which 25 m. are navigable.

OUBEURN two pars. Eng. W. York.—1. (Great) 840 ac. P 629 —2. (Little), 4066 ac. P 566.

OUBOLRI a river Asia, rises in the S.E. of Manchuria, near the coast of the Sea of Japan flows almost due N., receiving numerous tributaries both on the right and left, and after a course of about 340 m., dividing into two branches, joins r. bank Amur.

OLST a river France, rises in dep. Côte-du-Nord, flows S.E. and joins r. bank Vilaine, a little above Rennes total course, 60 m. about 25 m. navigable

OSTON par Eng. Leicestershire, 2460 ac. P 178.

OVER-DARWAZ, a tn. England See **DARWAZ**

OVERFLAASER, a vil and com. Belgium prov E Flanders on the Scheldt 15 m. S E Antwerpen with an oil and four flour mills. Pop. 1687

OVERFLAKKER, an ut. Holland prov S. Holland, formed at the mouth of the Maas and Waal; bounded N by the Haringvliet, E. and S. by the Vellekerk and W by the N. See. Including the former island of Goedereede to the W., which was added to it last century by damming out the intervening water, it measures 25 m. N W to S E., with a width of 5 to 7 m. It is very fertile, and yields wheat, barley, colts, and potatoes. Pop. about 17 000

OVERHESSEL, a prov Holland, bounded N by provs. Friesland and Drenthe, E. Prussia, S. prov Gelderland and W Gelderland and the Zuider Zee, about 60 m. N W to S E., by 27 m. broad area, 984 sq. m. It is watered by the IJssel, which separates it from Gelderland, and by the Yssel and its affluents. Except a strip of arid, heathy soil along the IJssel, presenting good arable and meadow land, the province mostly consists of sand and turf, and its chief products are horses, wheat that yield excellent butter, and sheep; though a little corn, oats, barley, buckwheat, and rye is grown in sandy localities. Ruminating by steam-machinery, bleaching, &c. &c.

dyeing, and the manufacture of calicoes, linen, and damask; boat-building, &c., are carried on. In 1851 it contained 328 schools, attended by 54,895 pupils. Chief towns—Ewold, Deventer and Kampen. Pop. (1851), 317 536.

OVERMEIRE, a vil and com. Belgium, prov E Flanders, 10 m. E. Ghent with five breweries and several corn and oil mills. Pop. 2133

OVERFELT, a vil. and com. Belgium, prov Limburg on the Demer, 19 m. N Hasselt, with a brewery a distillery an oil and three flour mills. Pop. 1400

OVERESCHIE, a vil Holland, prov S. Holland, 3 m. N W Rotterdam on both ends the Sohle, here crossed by a bridge, with two churches, an orphan hospital, and a school, and a trade in grain. Pop. (Agricultural), 3187

OVERTON a pari bor and par. N Wales, co. and 21 m. S E E. Flint, 1 bank Dee, here crossed by a handsome stone bridge. It has a fine old church, but neither trade nor manufactures. Area of par. 4398 ac. P (Agricultural) 1470

OVERTON (MARKET), par Eng. Bedford, 2640 ac. P 498

OVERYSCHE-NOTTE-DAMEN-BOEK, a vil. and com. Belgium, prov Brabant on the Yssel, about 9 m. S E. Brussels, inhabitants chiefly employed in agriculture and hewing timber. It has also flour and oil mills, a brewery and distillery 1 op 4667

OVERYSEL, par Holland. See **OVERZAND**.

OVIDIOPOL, a tn. Russia, gov. Kherson, on the Dniester about 15 m. above its mouth, 20 m. S E W. Odessa. It is poorly built and has some trade in salt brought from Akhur man on the opposite coast, and sent into Podolsk. P. 5638

OVIDO, a prov Spain, Asturias, bounded N by the Bay of Biscay E. prov Santander, S. Leon and W. Lago. It is very mountainous and abounds in good pastures on which are raised a great number of cattle, goats, and swine, and is watered by the Valon, Eo, Bella, Navia, Pilois, and Narea. The agricultural productions consist chiefly of maize, wheat, barley, beans, potatoes, peas, rye, and hay, and filberts, oranges, lemons, and other fruits are grown. Linens, woollens, leather, earthenware, nails, mechanical tools, agricultural implements, copper vessels, paper, arms, &c., are manufactured and considerable quantities of coal, raised in the province, are exported. The coast is wild and stormy, and there are few places accessible to vessels from the number of rocks and reefs by which it is lined. Area 6887 sq. ac. P 501 000

OVIDO, a city Spain, Asturias, cap. above prov 230 m. N W Madrid, 20 m. E. the Bay of Biscay. Like most old towns, Ovido was constructed without any plan, and at different times its streets therefore, are very irregular, especially those within the walls. It has one large and nine small squares, and 60 streets, all kept very clean an imposing looking courthouse, a substantial prison, district prison for women numerous educational establishments, including a *Universidad Literaria* (a handsome square Doric building, in which are taught theology law philosophy, mathematics, music, and medicine, and which contains a library of 12 000 volumes, and a museum), various charitable foundations, of which the most conspicuous is the *Hospicio Provincial*, a magnificent edifice of Doric architecture, and one of the best of its class in the kingdom, affording an asylum to blind, orphan, the deserted and leprosy of both sexes. The cathedral, although not large, is very elegant and beautiful. Ovido contains some of the earliest Christian churches in the peninsula. These primitive churches are simple and solid, and usually provided with a projecting shed or roof at the entrance as a protection against the rainy climate. It contains also a number of monasteries, some of them now diverted to secular purposes. A small theatre, a great number of fountains and several fine promenades, of which that called San Francisco is the most beautiful, and has manufactures of hats, leather arms, paper, &c. Ney took possession of the town in 1809 and gave it up to pillage for three days. It subsequently fell again and again into the hands of the enemy. Pop. 9364

OVIOLIO, a tn. Italy Piedmont, div and W S W Alessandria with two churches, one of them an ancient Gothic structure, a courthouse, most-de-piella, and cattle; a court of justice, and a trade in wine and cattle. Pop. 2500

OVING, two par. Eng. 1—1, Bucks, 971 ac. P 442

OKENTON, par England, co. Gloucester 1060, ac. 1 op. 139.

OXFORD, or OXFORDSHIRE, an inland co. England, bounded N. by co. Northampton and Warwick, W. Gloucester, S. Berks, E. Buckingham area 480,000 ac. of which above 400,000 are said to be arable, meadow, and pasture. The S. part of the county presents alternations of hill and dale, the former particularly the Chiltern Hills, being beautifully varied, with the woods, tracts of arable land, and open sheep downs. The central parts are more level, but here also the scene is adorned by numerous woods. In the N. and W. the country presents a less pleasing aspect. The chalk-earl, green-sand, gault, iron-sand, oolite, Kimmeridge clay, and lias, appear at the surface in various parts of the county. Throughout a large portion of the county and N.W. from Oxford, the staple or surface soil is very thin and light, rapid in its yield, and well calculated for the growth of green crops and barley. Towards Gloucester the land slopes gently S. and W. Here grass lands divide the soil with tillage, and hedges and hedgerow timber cover the face of the country as with a network. The corn crops commonly cultivated are wheat barley of which vast quantities of malt are made, and oats and the common turnip and Swedish turnip are both extensively grown. The grass lands in the county being rich and extensive, particularly on the borders of the rivers, dairy husbandry is largely practised, and great quantities of butter made. Manufactures of little importance—the principal are the Wincey blankets, Woodstock gloves and a coarse kind of velvet, called shag, made at Banbury. Principal rivers—Thames or Isis, Thame, Evenlode, Cherwell, Windrush, &c. Oxfordshire returns nine members to Parliament, namely, three for the county two for the city and two for the university of Oxford, and one each for the boroughs of Banbury and Woodstock. Principal city Oxford. Pop. (1851), 176,489

OXFORD a city, England, esp. above on, and seat of one of the most celebrated universities in the world 22 m. W. & W. London on a gentle acclivity, between the Cherwell and the Isis, which here unite, and are crossed by several bridges, the principal of which are Folly Bridge, over the Isis, and Magdalen Bridge, over the Cherwell. In early times it was surrounded by walls, considerable portions of which still exist, and defended by a castle, of which the keep built in the time of Rufus, remains entire and is included in the precincts of the county jail. It is of a very irregular form, and contains only a few great thoroughfares, with a considerable number of narrow and crooked streets and lanes, especially on the W. side occupied by the lower classes of the population though considerable improvements

UNIVERSITY AND ALL ROUTES COLLIERIES AND CHURCHES OF ST. MARY ALL SAINTS AND GAREHAM, HIGH STREET OXFORD.

have recently taken place. The principal street, called High Street has a total length of about 1000 yards, and a wide pavement, but where greatest, about 60 ft. is flanked by some of the noblest structures of the city, and in other parts lined by quaint old houses and elegant modern shops, and is justly regarded as in many respects one of the finest streets in England. The streets in general are well paved,

cleaned, and lighted; and water of excellent quality is abundantly provided.

Oxford being the see of a bishop, of course possesses a cathedral. It contains also thirteen parochial and three district churches; and has places of worship for Wesleyan and Primitive Methodists, Independents, Baptists, and E. Catholics. The cathedral, which originally belonged to the priory of St. Frideswide, and is also the chapel of Christ Church College is a spacious cruciform structure, inferior to most English cathedrals, and unfortunately situated. Its exterior being in a great measure concealed by the college buildings which partly surround it, but forming on the whole a very fine building chiefly in the late Norman style. St. Mary's called also the University Church, finely situated on the N. side, and nearly in the centre of the High Street, and rendered conspicuous by its richly-decorated tower, terminating in a beautiful spire, 180 ft. high still ranks, notwithstanding the incongruous addition of a porch with twisted pillars given to it by Archbishop Laud as one of the finest Gothic structures of Oxford. St. Martin's or Carfax is a modern structure, with an ancient tower, well situated at the crossing of the four great thoroughfares—High Street, Queen Street, St. Aldate's, and Corn Market, and takes its name of Carfax from the French, 'Quatre voies' (four ways), since corrupted into Carfax, but possesses little architectural merit. St. Mary Magdalene presents several beautiful features, and has lately acquired additional interest from the Martyrs' Aisle, which has been added as a fit accompaniment of the Martyrs' Memorial, a splendid monumental pile which stands close to it, near the spot where Ridley, Latimer, and Crammer suffered martyrdom. St. Aldate is chiefly remarkable for its antiquity, and its tower, surmounted by an octagonal spire. St. Giles is chiefly in the early English style, with lancet-shaped windows, and a square embattled tower. The chapel of Merton College consists of a choir and transept, the latter of which is also the parish church of St. John while the choir is the chapel of the college. This portion, though much disfigured by recent painting is one of the most beautiful buildings in Oxford, presenting an exquisite example of the geometrical-decorated of the time of Edward I. It was built in 1277. The E. window is particularly fine, with a large circle, usually called a Catherine wheel, in the head, the piers of the tower are of the same date, but the tower itself and the transept are of 15th century work, but very good. St. Peter-in-the-East, the most ancient church of Oxford, and originally Norman, though subsequently much altered by additions in the early English and subsequent styles is surmounted by a square tower the channel is Norman, with good detail and underneath is a fine Norman crypt with a vaulted roof, resting on four ranges of low massive pillars. St. Thomas originally founded by the canons of Osney Priory in 1141, is surmounted by a square, embattled tower. All Saints, one of the few Oxford churches in which the Gothic style has been abandoned is a Grecian structure by Aldrich, with a tower terminating in a spire, which rises from within a circle of Corinthian pillars. Some of the other churches, both district and parochial, are handsome, and might well deserve notice in any other locality where they were not eclipsed by nobler structures. There are likewise three small cemetery chapels lately erected. The Dissenting chapels are neat and commodious buildings, but with exception of that of the Wesleyans in New Inn Hall Lane, and that of the Independents in George Lane, which is a large and handsome Gothic edifice, possess little architectural merit.

The great boast of Oxford is its University, which, though not unrivalled as to the celebrity of its professors, and the completeness of its educational system, stands pre-eminently distinguished by the magnificence of its buildings and the richness of its endowments. The date of its original foundation is unknown, and it had long existed as an establishment of European celebrity, when it was incorporated by charter of Ed Henry III. A.D. 1244, under the title of the Chancellor, Masters, and Scholars of the University of Oxford. But though thus named as a single body, it does not form one great establishment, contained, as in the case of the Scotch universities, within one enclosure, but consists of a number of separate establishments called colleges and halls, placed under independent management, and occupying not only distinct, but, in some instances, widely distant localities. The

colleges are nineteen, and the halls five in number, but they scarcely differ from each other except in some peculiarities of management, the mode of education being in all essentially the same. They are named as follows:—

| Colleges. | Style of Halls of Honor. | Colleges. | Style of Halls of Honor. |
|-----------------|--------------------------|-------------|--------------------------|
| All Souls. | Warden. | Queens. | President. |
| Balliol. | Master. | St. John's. | President. |
| Brazen Nose. | Principal. | Trinity. | President. |
| Christ Church. | Dean. | University. | Master. |
| Corpus Christi. | Provost. | Wadham. | Warden. |
| Exeter. | Rector. | Worcester. | Provost. |
| Jesus. | Principal. | | |
| Lincoln. | Rector. | | |
| Magdalene. | President. | | |
| Merton. | Warden. | | |
| New. | Warden. | | |
| Oriel. | Provost. | | |
| Pembroke. | Master. | | |

In St. Aldate's is Christ Church College, the largest and grandest of the whole occupying an extensive range of buildings, in the form of three quadrangles, and communicating on the S. and E. with various walkways, and a wide walk, called the Broad Walk, overshadowed with lofty elms, planted in the time of Charles II., which is used both by college and citizens as their favorite promenade. The front along the street has a length of 400 ft. and has, in its centre, a magnificent gateway, begun by Cardinal Wolsey and completed after the design of Sir Christopher Wren, it is in the form of a circular tower, crowned with a dome, and contains the famous bell known by the name of the Great Tom of Oxford, measuring 7 ft. 1 in. in width, 5 ft. 9 in. in depth, and weighing nearly 5 tons. Directly opposite is Pembroke College, with a small elegant Ionic chapel adorned with a beautiful altar-piece. Immediately E. of Christ Church are the colleges of Oriel and Corpus Christi, the former possessing in its library a building of the Ionic order, which, though unfortunately situated is regarded as one of the most perfect pieces of architecture in Oxford, and the latter entered under a square tower with rich carved niches, and containing over the altar of its chapel a fine painting of the Adoration of the Magi, by Rubens. Balliol College is a Norman College, and All Hallows, the former consisting of two quadrangles entered under an ancient embattled tower, and chiefly remarkable for its chapel which has already been referred to as the parish church of St. John. University College, said to have been originally founded by Alfred the Great, occupies an extensive range of buildings, with a front of 200 ft. along the S. side of High Street, the present buildings are of late date. On the same side of High Street, but at some distance W. is St. Mary Hall, consisting partly of antiquated, and partly of new buildings. On the N. side of High Street, and nearly opposite to University, is Queen's College, so called after Philippe, queen of Edward III., consisting of two spacious quadrangles, with one front to the street, containing a central gateway, crowned with an open arcade, enclosing a statue of Queen Caroline wife of George II. On the same side, and near its centre, close to St. Mary's Church, is All Souls College consisting of an old and a new quadrangle, the latter partly occupied by a magnificent library. The chapel of this college is much adorned for the beautiful simplicity of its decoration and the imposing effect produced by its general appearance. Near to Queen's, but a little N., is New College, founded and built by William of Wykeham, in the time of Edward III. It is a good specimen of the perpendicular consisting of a large pile of buildings; among which special notice is due to the chapel, which though stripped of much of the gorgeous decoration, still holds a first place among the sacred edifices of the university. The tower and cloisters are also very fine. The garden of this college, beautifully laid-out, and interspersed with myrtle trees, furnishes a most delightful retirement. W. of High Street is a cluster of four nearly-contiguous colleges—Brazen-Nose, Lincoln, Exeter, and Jesus. Brazen-Nose has a good 12th century gateway tower, but the rest of the buildings are of a very late and mixed style, Exeter and Lincoln have been, in great part rebuilt. Further N. is Balliol College, so called after its founder John Balliol, father of the Balliol who figures in Scottish history, and remarkable chiefly for its fine Gothic gate. To the N. of Balliol is Trinity College, entered under an elegant modern square tower, embellished with pilasters, and surrounded on the top with a handsome balustrade.

The buildings are arranged in two courts, and are mostly modern but little of the original structures remain, the garden front is a picturesque mixture of the Renaissance and Gothic. Still further N. is St. John's College, much admired both for the elegance of its buildings, partly constructed from a design of Inigo Jones, at the expense of Archbishop Laud, and for the beauty of its gardens. The colleges already mentioned though covering a large area, are more or less contiguous, and arranged in clusters, the others are more isolated. They are Wadham College, on the N. side, Worcester College, near one extremity, in the N.W.; and Magdalen College, at the nearly opposite extremity, in the S.E. Wadham presents in its buildings, arranged in an extensive quadrangle, a very pleasing example of the later perpendicular style, consisting partly of a lofty hall, lighted by painted glass, and a spacious and well proportioned chapel, with a beautiful E. window by Bernard Van Limburg. Worcester is remarkable chiefly for its pleasant and retired situation, and beautiful gardens, while Magdalen, placed so as to form a conspicuous object in entering the city by the London road is distinguished alike by the fine cloister of its great quadrangle, the chaste and elegant decorations of its chapel and the extent and beauty of its meadows, gardens, and walks, but chiefly by the tower, an exquisite specimen of rather late perpendicular and one of the most gracefully proportioned buildings in the kingdom.

Besides the buildings of each individual college and hall are others of an equally, and even more magnificent description, belonging to all in common or to the university property as called. Of these the most important are the Theatre, built by Sir Christopher Wren and used by the university on great public occasions, and, though only 30 ft. long by 70 ft. broad, so arranged as to accommodate nearly 4000 persons the Schools, used for the examination of candidates for degrees, and similar purposes, and consisting of a handsome quadrangle, of late or detached Gothic, the buildings of which partly form a picture-gallery and partly accommodate the rich treasures of the Bodleian Library which occupies one side of the quadrangle, the Ashmolean Museum, which, though neither in extent nor value to what might be expected in such a locality is remarkable as being the earliest public museum established in this kingdom and as containing the collections of the Trustees, Elias Ashmole &c., the Radcliffe Library a splendid structure crowned by a dome, which

and Radcliffe Institution, a magnificent range of buildings by Cookwell, recently completed, partly for the custody and exhibition of works of art, and partly as a foundation for the teaching of modern languages. In connection with the University may be mentioned the Botanic Garden, probably the oldest, but by no means one of the best, in the kingdom; but lately much improved, and enriched with the extensive Fielding Herbarium, in addition to the valuable collections before possessed.

The buildings and establishments in Oxford, not connected with the university nor yet referred to, but deserving of notice, are the townhall, a spacious stone building with a basement of rustic-work, used for municipal purposes; numerous parochial, national, and other schools the Radcliffe Infirmary; the lunatic asylum founded by Dr. Radcliffe, stands on Headington Hill, more than a mile out of the town. town and county jails, the house of industry &c. Oxford depends almost entirely on the University, and has no manufactures worthy of mention. In corn, sent into it from the surrounding districts, a considerable trade is carried on and, for the general purposes of transport, great facilities are afforded by the river and the Oxford canal; and by the Great Western, a branch of the London and North Western, and the Oxford, Worcester and Wolverhampton railways.

Oxford is supposed to be an abbreviation of Oxenford, a name said to have been originally given to the town in consequence of the existence of a ford for cattle over the Isis, in its immediate vicinity. The date of its origin cannot be determined. A nursery appears to have been founded in it early in the 8th century and in 892 an act of confirmation by Pope Martin II. describes it as an ancient seat of learning it suffered much from the ravages of the Danes but recovered under the fostering care of King Alfred who often made it his residence, ordered money in it, and added liberally to its privileges and endowments. Parliament repeatedly met in it during the reign of Canute and his son and successor Harold Godwinson, was crowned and died at it. At the Norman conquest, on its refusal to submit, William took it by storm, and gave it to Robert de Oilly or d'Oilly, who, to insure its submission both built a strong castle on its W. side, and enclosed it by earthen ramparts; the keep of which, as mentioned before, still remains. In 1142 the Bayeux March, having taken refuge in it, was so severely besieged by Stephen, and ultimately captured with only three attendants. The council which terminated this civil war by an agreement between Stephen and Henry II. was held here; and various other parliaments were held in subsequent reigns. The discussions occasioned by the doctrines of Wicliffe were carried on with such keenness within the university as almost to threaten its destruction, but at last, when the Reformation was on the eve of becoming triumphant, Oxford, which had previously been included in the diocese of Lincoln, was converted by Henry VIII. into a separate see. On the accession of Mary it was made the scene of some of her worst atrocities and Leland Ridley, and Cranmer, were here consigned to the flames; the first two in October 1555, and the last in March of the following year. During the last great civil war Oxford became the headquarters of the king; and having displayed great zeal in his cause, was so severely handled by the Parliamentarians and the Commonwealth, that it scarcely ventured to lift its head till the Restoration. Oxford claims to be a borough by prescription, and is governed by a mayor, nine aldermen, and thirty councillors; but the members of the university are exempted from their jurisdiction. Both the borough and the university send each two members to Parliament. Pop. (1881), 27,973.

OXHILL, par. Eng. Warwick, 1600 as. S. 81° 10' N. 10' E. 4 m. long, and 1½ m. broad. OXIRA, a river, New Granada. See GARACOL. OXNA, one of the Shetland Islands, Scotland, 4 m. S.W. Salloway. Pop. 21.

THE RADCLIFFE LIBRARY AND ALL SOUL AND MANSER-ROSE COLLEGES, OXFORD.

forms a conspicuous feature in every view of Oxford, and contrasts somewhat strangely though not unharmoniously with the Gothic edifices around it, the Radcliffe Observatory, consisting of wings and a light and elegant centre, surmounted by a tower in imitation of the Temple of the Winds at Athens; the Clarendon, originally built as a printing-office for Lord Clarendon's works, but now used as a geological museum, lecture-rooms, and public offices. University Printing Office, a very extensive building by Blane; and the Taylor

university are exempted from their jurisdiction. Both the borough and the university send each two members to Parliament. Pop. (1881), 27,973.

 OXTON, a vil. and par England, co. Nottingham, 5 m.
 S. W. Southwell with a parish church, a Wesleyan chapel,
 a free school, and manufactures of stockings and linen
 3550 ac. Pop. 850

OXTON, a to. England, co. Chester on a hill, 3 m.
 S. W. Hickenhead with many handsome residences, and a
 church. The principal portion of the inhabitants are Liver-
 pool merchants. Pop. about 2007

OXUS, AMOO, AMOO DABLA, or JIRKON, a large river
 Independent Tarbary issues from the small mountain lake
 Sui-Kol, within the district of Pamir; lat. 37° 27' N
 lon. 75° 40' E., at an elevation of 15,600 ft. above sea-
 level flows S. W. to about lat. 37° N., lon. 58° E. when
 it somewhat abruptly turns to the N. W. which course
 it continues to hold without any very wide deviations, till it
 falls into the Sea of Aral, by several mouths, having traversed
 the territories of Bukhara, Bokhara and part of Klava, and
 drained a basin, with an area of 321,256 sq. m. Its entire
 length from source to mouth is 1314 m. At its termination
 it forms an extensive, marshy delta. It has numerous and
 considerable tributaries but little or nothing is known about
 them. The regions it traverses are for the most part sandy,
 barren, and wholly uninteresting

OXWICH, par Wales, Glamorgan 1602 ac. P 359
 OXWICK, par Eng Norfolk 719 ac. P 70

OYAPOK, a river, S. America, forming the boundary on
 the E., between French Guiana and the Brazilian territory
 It is formed by two head-streams which originate in a moun-
 tainous region about lat. 2° N., whence it flows nearly due N
 and falls into the Atlantic Ocean, a little W. of Cape Orange
 lat. 4° N. lon. 51° 30' W. forming a kind of bay 12 m
 wide, entire course, about 165 m. At its mouth is the small
 town of Orapo, co. St. Louis.

OYCKE, a vil. and com. Belgium, prov. E. Flanders, 14 m.
 S. E. W. Ghent, with an oil and two flour mills. Pop. 1831
 OYGHLEM, a vil. and com. Belgium, prov. W. Flanders,
 1 bank Lys 10 m. S. Bruges with a flour-mill, inhabitants
 chiefly employed in weaving linen. Pop. 1221

OYNE, par Scot Aberdeen, 11,000 ac. P 819

OYONAK, a to. France, dep. Ain, 8 m. N. Nantua
 Toys, snuff-boxes wooden utensils, last, tool for artists,
 &c. are manufactured, and considerable trade is carried on in
 timber. Pop. 2869

OYSTER, J., a harbour W. Australia on Plantagenet,
 off King George Sound; lat. 35° N. lon. 117° 52' E. Its

entrance is narrow, and has not more than 14 or 15 ft. at high
 water abundance of wood and fresh water are to be had
 here.—S. A. bay, W. side Maria Island, E. coast Van Diemen's
 Land; lat. 43° 40' S. lon. 148° 5' E.—S. Ansl. Bay of Bengal,
 off the Aracan coast lat. 50° 12' N. lon. 92° 53' E. (s.)—
 4 Ansl. China Sea, Quamoy Bay a little N. E. lat. Quamoy,
 about lat. 34° 38' N. lon. 118° 39' E

OYSTERMOUTH, a vil. and par Wales, co. Glamor-
 gan, E. side bay and 5 m. S. W. Swansea. It has a parish
 church, Independent, Calvinistic, and Wesleyan Methodist
 chapels; a national school, quarries of limestone. Some of
 which polish like marble, and valuable crystal-fabrics. The
 village is much resorted to for summer-quarters. Area,
 5194 ac. Pop. 1938.

OZAMA, a river, Hayti, rises in the central range
 of the island, flows first S. E. then S. W. and falls into the
 sea at St. Domingo, after a course of above 50 m.; chief
 affluents are the Isabella and the Gaveana

OZARA, or OZONA, a market to. Rimpsy co. Teina, on
 the St. 73 m. S. E. Pesh. It belongs to Prince Esterhazy,
 and contains a fine palace. Pop. 8406.

OZEONA, a vil. and com. Italy Piedmont div Turin
 prov. and about 10 m. from Ivrea r. bank Malonea or Mal
 ome, here crossed by a bridge. It has a handsome church
 a communal school an old castle, a large silk-mill and a trade
 in agricultural produce and fuel-timber

OZERNATA, two ferts Russia, gov. Orenburg on the
 Ural The one about 75 m. E. S. P. Orenburg consists of
 about 200 houses, and is regularly fortified and surrounded
 by a fosse the other distinguished by the name of Nijes
 Chernais, is about 60 m. S. W. Orenburg, and though also
 fortified, is comparatively insignificant.

OZIERI, or OZIERA, a to. tal. Sardinia, div. and 15 m.
 E. S. E. Sassari, esp. prov. of same name, unapparently situated
 in a deep basin open to the N. and surrounded on other sides
 by lofty heights, of which the most conspicuous is that of
 Monserrato, on the N. W. It consists in general of substantially
 built houses, distributed in narrow, uneven, and winding
 streets, in the top of a bulge, the seat of a superior law
 court and has a cathedral several other churches, a discom-
 munity two convents superior, elementary, and infant
 schools, a handsome town-house casino, and prison manu-
 factures of woollen and linen cloth, and a trade in these and
 in wool skins, horses, cattle, and dairy produce. Pop. 8488

—The PROVINCE greatest length, 38 m.; breadth 18 m.
 area, about 500 sq. m., is generally mountainous, watered by
 numerous small streams and possesses extensive pastures,
 on which great numbers of fine horses and cattle are reared

OZLEWORTH, par Eng Gloucester 1114 ac. P 38

PA or BAHAM, a in Tibet, 1 bank Kucha Kiang
 lat. 29° 5' N. lon. 98° 50' E.

PA CHOO, a to. China, prov. Petcheloo, 55 m. S. Peking
 PA CHUANG-SAN, see MANDCHURIAN ISLANDS.

PAAL, a vil. Austria, Styria, circle Judenburg, 44 m.
 from Unnaumart with steel-works, producing steel unap-
 proved for various purposes. Pop. 460

PAANORA, or OCHIAI ISLAND, S. Pacific Ocean lat.
 0° 50' N.; lon. 167° 40' E. (s.), of a circular form, high in
 the centre, about 15 m. in circumference. Cocoa-nuts and
 ferns may be obtained here. Island thickly inhabited

PAAR, a river, Bavaria, which rises near Friedberg, E.
 of Augsburg, flows N. N. E. past Altheim, and joins r. bank
 Danube, 5 m. below Ingolstadt, total course, 70 m.

PAARDORF, or PAPOF, a vil. Lower Austria, 84 m.
 N. M. E. Vienna, with a church and a castle. Pop. 1081

PAGHAT, three mts. Scotland, Scotland—1, Mount
 of Pagh, 54 m. N. Beren, nearly circular; 24 m. long with
 a peak 2965 ft. high. Pop. 35—2 Co. Tyrone, 54 m.

S. Barra, in Pabbay Sound 14 m. by 1 m. Pop. 10.—S
 Co. Inverness, at the entrance of Broadford Bay, Isle of
 Skye. Pop. 14.

PABILLONIS, or PAVILLONIS, a vil., tal. Sardinia,
 div. Cagliari, about 8 m. from San Gavino I. bank Suro
 with two churches, an elementary school, manufacture of
 bricks, tiles, and earthenware, and a trade in wine, fruit,
 cattle, and dairy produce. Pop. 1809

PAELU DE-LOS MONTES, a vil. and com. Spain, New
 Castile, prov. and about 28 m. from Toledo with a church,
 courthouse, prison and school numerous flour-mills, and
 a trade in charcoal. Pop. 1512

PACAJA, or PACAYA, a river Brazil, prov. Para, falling
 into the territory of the Para, opposite Beves, and W. Ostra,
 after a N. course of about 150 m.

PACARAIMA (SERRA), a mountain range, S. America,
 forming part of the boundary between Brazil and Venezuela,
 stretching E. and W. for about 200 m., near lat. 4° N. and
 between lon. 59° and 68° W. Its height does not exceed, in

the E. part, 1500 ft. It is of granitic formation, and for the most part bare of wood.

PAGECO, or PAGECOO, a n. Shilly, prov and 4 pm, S. H. Trapani with a trade in wine, corn, oil, barrels, and salt. Pop. 2000.

PACENTRO a n. Naples, prov Abbruzzo-Ultra II 4 m E. Sulmona, with four churches and a convent. Pop. 3660.

PACHA or **PACHA**, a river Russia, rises in the N of gov Novgorod, flows W to Novikova, then N into gov Peterburg, and joins L bank Svir, total course, 180 m.

PACHACAMAC—1. A group of small islands close upon the coast of Peru, Bay, and 25 m. S. by E. Lima; lat. 15°18' S. lon. 76°56' W (a).—2. The ruins of a tn and temple on the mainland of Peru, directly opposite above islands. The temple stands on the summit of a hill with three terraces, 250 ft. high, the height of the masonry-work being 80 ft., the form is rectangular, the base being 500 ft. by 400 ft. The remains of the town, which has been built of sun-dried bricks, occupy some surrounding ground, of low elevation $\frac{1}{2}$ m. to the N, also forming a rectangle, $\frac{1}{2}$ m. by $\frac{1}{2}$ m. in extent.

PACHINO, a n. Shilly, prov and 22 m S.E.W. Syracuse, with a small harbor and an active tunny fishery. Pop. 1200.

PACHITLA a river Peru, rises in the E. slope of the Andes about lat. 11 S; flows easterly N into the Pampa del Barro Colorado, receiving numerous tributaries, and joins L bank Ucayali, after a course of about 200 m.

PACHUCA, a n. Mexican Confederation, dep. and 50 m. N N E. Mexico, 5112 ft. above sea-level and, next to Taseo, has the oldest mining-works in Mexico. Pop. mining suburb Pachucillo, 5000.

PACHUCACA, or PAMAGACA, a river, Peru issues from a lake on S.E. slope Cordillera de Huamán, flows first N N W past the town of Chalbuanca, then nearly due N and joins L bank Apurimac total course, 130 m.

PACIFIC OCEAN [French, *Océan Austral*, *Mor-du-Sud*, or *Grand Océan Pacifique*, German, *Stilles Ozean*, or *Stiller-Meer*] the far largest of the great divisions of water on the surface of the globe, extends from the arctic to the antarctic circles, over 133 degrees of latitude, and from the W coast of the continent of America to Australia, Papua, Florin, Sumatra, Java, Sumatra, and the E. coast of Asia, over nearly 160 degrees of longitude, area, estimated at 50,000,000 sq m exceeding all the dry land on the globe. It is usually divided by geographers into the N and the S. Pacific, separated from each other by the equator, but another division, which has the advantage of being more distinctly marked by great physical features, is into three regions—a Boreal or N extending from Behring's Strait to the arctic circle to the tropic of Cancer an equatorial, including the whole expanse between the tropics and an Austral or S., extending from the tropic of Cancer to the antarctic circle. The most distinguishing features of the Pacific are the countless number of comparatively small islands spread over the surface, more especially of its equatorial region, and the numerous chain of volcanoes which stretch almost continuously along its shores, and form one vast volcanic circle. In the S. it is separated from the Antarctic Ocean only by an arbitrary line, but in other directions, both its boundaries and its communications with other oceans are well defined. On the E. the Pacific and Atlantic Oceans, after meeting at Cape Horn, and communicating at the Strait of Magellan, become separated by the whole width of the American continent, though, near the centre, where the Isthmus of Panama forms the connecting link between the N and S. divisions, the distance between the seas becomes less than 50 m. Along the whole of the American coast, the indentations formed by the Pacific are more remarkable for number than magnitude. Not one of these is large enough to form an inland sea, and, even among islands, none is only so to the Bay of Panama, the Gulf of California, and the remarkable chain of coasts, commencing in Puget Sound, and stretching N between the mainland and Vancouver's and Queen Charlotte's Islands. In the N., the Pacific gradually contracts in width, the continents of America and Asia stretching out and approximating so as to leave the comparatively narrow channel of Behring's Strait as the only communication between the Pacific and the Arctic Ocean. Between the Strait on the N., the Aleutian Islands on the S., and the

remarkable peninsulas of Alaska on the E., and Kamtschatka on the W., one of the largest and best-defined branches of the Pacific is the Sea of Bering. Still farther W., on the opposite side of the peninsula of Kamtschatka, is the Sea of Okhotsk, partaking still more distinctly of the character of an inland sea; as it has no communication except with the Pacific, through a series of passages, of more or less width, between the islands of the Kurile chain, and one passage leading between the Island of Saghalien and the Sea of Japan. This sea, formed between the continents of Asia and the Japanese Islands, communicates by the Straits of Corea with the Whanghai or Yellow Sea, which itself opens directly into the Pacific. Still farther S., between the Philippine Islands and the coast of Asia, lies the China Sea, with the gulfs of Tonquin and Siam; and among the islands of the Indian Archipelago are numerous enclosed seas, as the Mindoro Sea, Java Sea, &c. (See **INDIAN ARCHIPELAGO**.) With the Indian Ocean the Pacific communicates by the Straits of Malacca, Anjer, Lombok, Alapa, Torres, Bass, &c.

The islands of the Pacific are so numerous, that it is difficult to give an enumeration of them, even in groups. Commencing on the American coast, at the Strait of Magellan, and proceeding N, an uninterrupted chain lines the shores of Patagonia, and terminates in the large island of Chile, off the S. coast of Chili. We have afterwards a long stretch of coast along which many islands occur, but we reach the equator before meeting with any group deserving of notice. That group is the Galapagos, directly under the equator, and about 500 m. W. from the mainland. Another very long stretch N, during which the Revillagigedo, Aljos, Guadalupe, and several other small groups, are met with, brings us to a chain of large islands lining the coasts of British and Russian America, and containing among others, those of Vancouver and Queen Charlotte. Turning W we have the Kodiak Archipelago, at some distance off the E. coast of the peninsula of Alaska, and the still larger chain of the Aleutian Islands, carrying W S W from the extremity of that peninsula, and terminating the groups of the Pacific, as far as belonging to the American continent. On the opposite continent of Asia, the islands commence with the Kurile chain, stretching S.E. W. from the extremity of the peninsula of Kamtschatka, and afterwards continued in the same direction by the far more important islands of Japan, the Philippines, and other large islands of the Indian Archipelago. In the S. region of the Pacific, beyond the tropic of Capricorn the islands are few in number, but include the important group of New Zealand. Between the tropics, the principal groups are, N of the equator the Sandwich, Ladrones or Markama, and Caroline; and S. of the equator, the Marquesas, Low Archipelago, Society, Friendly, Feejee, New Caledonia, New Hebrides, and Solomon.

The mean level of the Pacific, as ascertained by measurements taken in the Bay of Panama and the Gulf of Mexico, is supposed to be $\frac{1}{2}$ ft. above that of the Atlantic. Its depth has not been ascertained, though there seems no reason to doubt it descends much further below than the loftiest mountain heights ascend above its surface. Owing to the vast extent of the Pacific, the operations of nature on its bosom are carried on in the most extensive scale and the general laws by which tides, winds, and currents are regulated, suffer fewer modifications than in narrower seas. The tidal wave commencing at the equator, diverges from it towards the poles, and, proceeding with vast velocity, and without obstruction is scarcely perceptible among the central islands of the Pacific. Hence, in the Low Archipelago, at Bow Island and Tahiti, the rise is only 1 ft., and at the Sandwich Islands 2 ft. It is only when, by the proximity of a mainland diminishing the depth of the water, or by any similar cause the natural scope of the wave is obstructed, or obstacles to its progress are interposed, that an extraordinary influx takes place, and high tides are formed. In the Pacific, however, there are certain the maximum, and the minimum, with some parts of the Atlantic and Indian Oceans are celebrated. In the solitary instance of Fort Kioleskoff, in Cook's Inlet, the rise is as high as 28 ft.; but on all the W. coast of America it is usually below 10 ft., and only in the Bay of Panama varies from 15 ft. to 15 ft. The prevailing winds of the Pacific, like those of other great seas, are divided into regular trade-winds and variables, the former blowing from the S.E. on the S., and from the N.E. on the N. side of the equator, gene-

sally within the tropics, though sometimes as far as 80° on either side of it, and the latter, consisting partly of a belt of variable and light winds, interspersed between the trades, and partly of other irregular winds which blow generally from N.W. and S.W., from 30° of lat. to the poles. In the W. and N.W. parts of the Pacific, the influence of the monsoons of the Indian Ocean is strongly felt and violent typhoons, for which the China Sea is noted, are not infrequent. In the E., along the whole of the W. coast of America, the winds differ so much in direction and character, that it has been thought necessary to divide them into four distinct zones. In the first zone, extending from Behring's Sea to lat. 30° N., the winds blow, in all seasons, in every direction, and no kind of regularity can be traced. In the second zone, from lat. 30° to 5° N. the prevailing winds so strongly resemble, that they may be classed as monsoons, blowing generally from November to April, from the N.W. and N.E., and from May to October, from S. or S.W. and S.E. The regions within the sphere of these winds are subject to violent storms and tempests, occasionally to, about 70 or 100 leagues from land, between lat. 19° 15' and 15° N., they are visited in February and March with remarkable calms. In the third zone, from lat. 5° N. to 80° S. the prevailing winds have the character of trade-winds but, instead of having the same direction throughout, appear to be regulated by that of the coast blowing permanently from the S. along the coasts of Chili and Peru, though sometimes sinking into calms immediately under the equator. In the fourth zone, lat. 30° S. to Cape Horn, the N. and S. monsoons recommence often blowing with such violence, particularly from the S., that vessels are driven from their anchors in the road of Valparaiso still further S., as the Cape is approached, the prevailing winds become S.W. and N.W., and convert the whole tract within their sphere into a region of storms and tempests.

The currents of the Pacific are not generally so strongly marked as those of the Atlantic, but the larger scale on which they are exhibited, free them from much of the complexity attaching to those of the latter and makes it easy to present them under a very simple form. First, the antarctic drift current, flowing apparently from the icy barriers of an antarctic continent, enters the Pacific, and, after proceeding N. to New Zealand, trends E., and retains that direction till it impinges on the W. coast of Patagonia. The obstacle thus encountered divides it into two branches; the smaller of which takes a S. direction, and enters the Atlantic by doubling Cape Horn. The larger branch, to which the name of the *Furuvien* or *Humboldt's* current has been given, proceeds N. along the coast of S. America, till it meets a new obstacle in the Isthmus of Panama, and turns W. Here the whole width of the Pacific lies open before it, and it proceeds, under the name of the S. equatorial current, without meeting with any obstacle, till it reaches its W. boundaries, when one part, striking the coast of America, turns E., and forms the *American* current, another part, forcing its way between the different islands, enters and is lost in the Indian Archipelago, and a third part, reflected by the coast of China, turns N. and, on reaching the Isles of Japan, contributes to form what is called the *Japanese* current. The configuration of the islands and the S. coast of Siberia, as well as a strong current which sets in from the N. through Behring's Strait, come in giving it an E. direction, which again carries it across the Pacific to the N. American coast, to be there again deflected, first S. along the shores of the Atlantic, and then E., when it finally becomes merged in what is called the N. equatorial current. Between the N. and S. equatorial currents, occupying a narrow zone between them, has been traced, and from pursuing an opposite direction, has received the name of the *Antarctic* current. The influence of these currents, particularly that of the *Furuvien* or *Humboldt's* current, in lowering the temperature of the warmer regions into which it is carried, is very marked. While the temperature without the current ranges from 78° S. to 88° S. Fahr. it ranges within it from 59° S. to 69° S. Fahr., and while the mean temperature of 13° S. is in air 79° S. Fahr. and in ocean 79° 70° Fahr., that of Chiloé, under the same lat., was, during its warmest months, found to have a mean of only 56° 26° in air, and 56° 50° Fahr. in ocean. The difference, accounting respectively to 10° 40° and 14° 4 Fahr., can only be accounted for by the modifying influence of the current.

The importance of the Pacific comes primarily in the means of communication which it opens up to the most opposite quarters of the globe, but is not confined to these. The numberless islands spread over its surface, are equally remarkable for their beauty and for the value and variety of their products and its fisheries still continuously to reward the courage and toils of those who engage in them. In addition to the endless varieties of fish adapted for human subsistence, the mightiest dominions of the deep have their several haunts within its bosom; and its whaling grounds though rendered far less productive than they might have been in consequence of the indiscriminate havoc which has prevailed have not ceased to afford remunerative employment to thousands of hardy seamen. The Pacific was seen for the first time by Europeans in 1513. Vasco Nunez de Balboa, the Spanish governor of Darien, proceeding on native information, set out on an exploring expedition across the isthmus, and, having ascended a hill saw the boundless ocean spread out before him. As his view extended chiefly to the S. he gave it the name of the *Mar del Sur* or South Sea. About eight years after the celebrated navigator Fernando de Magalhães, delighted apparently with the calms of its tropical regions, though he had previously encountered stormy weather, and called, as he expresses it, *our great tormenta*, called it the Pacific. The name is not appropriate, but the other names suggested have not found favour, and that of Pacific, having now acquired a kind of prescriptive right, promises to maintain its ground.

PACKANGA a tn. Malay Peninsula, on a river of same name lat. 3° 30' N. It was formerly a place of importance, with a considerable export of gold-dust, tin, and rattans, but is now greatly decayed.

PACKEINGTON three pars Eng. —1, Leicester and Derby 2860 ac. Pop. 1294.—2 (Great) Warwick, 2451 ac. Pop. 801.—3 (Little) Warwick, 1110 ac. Pop. 143.

PACOWOOD, par Eng. Warwick, 1655 ac. Pop. 905. PACO a large and handsome vil. Philippines, at 905 in the environs of Manila celebrated for its church, which contains an image of our Saviour, the object of numerous pilgrimages. Many of the inhabitants are artists, house-painters, and builders. Pop. 6500.

PACHIAHIBA a vil. and par Brazil, prov Rio de Janeiro, 13 in W.S.W. Magé with a church, several bridges and the works, and a considerable trade in fruit. Pop. 3000.

PACORA, a river, New Granada, isthmus of Panama. It unites with the Indio, and forms a broad rapid, and winding stream, which enters the Pacific, 18 m. E. Panama, and is navigable at high water for large vessels to Samang.

PACTOLUS, or *BAGROCK*, a small stream, Asiatic Turkey. Antiochia, and Jek. Alish. It issues from the Dofat dagh, flows first W. and then N.W. past Herak, and, after a course of about 18 m., joins a bank Sarabat. It was celebrated by the ancients for its golden sands, which were fabled to have been caused by the bathing of Midas.

PACUHI two small rivers, Brazil prov Minas-Geraes. The one flows W. about 80 m., and joins a bank Mo-Fran- cisco, a little above the confluence of the Paraetati into the other down W.W. forming part of the boundary between provs. Minas-Geraes and Bahia, and joins a bank Verde, a tributary of the São Francisco.

PADANG a tn. and Dutch prov. W. coast, Isl. Sumatra. The town, near the mouth of the Padang river in the Indian Ocean, lies in lat. 0° 57' S. lon. 98° 2' E. It used to be the most miserable and irregular place in the East inhabited by Europeans, but since 1838, when it became the residence of the provincial governor, and the seat of the courts of justice, and the commission of education, it has greatly improved, and is now a pleasant place, with many well-built houses, among which are a Calvinistic and a R. Catholic church (the latter the only one in the island), and a good school. Some of the inhabitants are excellent goldsmiths. Pop. (1845), 10,000.

—The province is of limited extent. Gambier, coffee, and pepper are cultivated, and a trade in saffron, gold, benzoin, camphor tortoise-shell, trepan, black nut, wax, and oil, is carried on with Penang, Singapore and Holland.

PADANG-RAU is in lat. 0° 56' S., lon. 100° 30' E.

PADANG-MAW, a tn. Sumatra, a bank Eraywind, 10 m. S.W. Prome.

PADBURY, par Eng. Bucks, 1900 ac. Pop. 600.

PADDINGTON, a par. England, co. Middlesex, forming the N.W. suburb of London. It contains numerous fine streets, terraces, squares, and detached houses; three parish churches, a school of arts, and chapels for Baptists, Wesleyans, and other Dissenters. The Great Western Railway commences in this parish, where it has a large and commodious station and the Paddington canal, communicating with the principal canals of the kingdom, and with the Thames at Limehouse, by means of the Regent's canal, has here its chief basin, and extensive wharfs and warehouses. Area, 1777 ac. Pop. 46,950.

PADDLESWORTH two par. Eng. Kent—1 340 ac. Pop. 50—2 200 ac. See **STONELAND**.

PADDOCK-WITH MANES, a hamlet, England, co. York par. and to near Huddersfield, that it is connected with it by a continuous range of houses. It has a neat parish church with a square embattled tower a Friends meeting-house, and manufactures of woollen goods, which employ the greater part of the inhabitants. Pop. 3536.

PADDE, a vil. Hungary Thither Thoma, co. Toronto, on the Thames, 29 m. E. Baginod with a Greek church, and a considerable trade in cattle, sheep, and swine. P. 1857.

PADENOHE, a vil. and com. Austrian Italy prov. Brescia, 5 m. from Lonato, W. side Lake Garda. It has a church, and some trade in wine and olive-oil. Pop. 1485.

PADERBORN a tn. Prussia, prov. Westphalia, 46 m. S. by W. Minden at the source of the Fulda. It is an old and gloomy town, surrounded by a wall, and entered by five gates. It is the see of a R. Catholic bishop, and has a cathedral, a large edifice of the 11th century four other churches, a townhouse of picturesque appearance a R. Catholic seminary and gymnasium, a Jewish school, primary two monasteries, an infirmary and orphan asylum, several law courts and public offices, a historical and antiquarian society manufactures of starch and tobacco, also breweries and distilleries, and a considerable foreign trade. It was at one time a member of the Hanseatic League. The ground on which it stands seems with springs, some of them warm and the Fulda rises immediately below the cathedral, in a stream so copious as to turn a mill at the distance of a few yards. Pop. 9112.

PADERNO, several places, Austrian Italy parishes—1 A vil. and com., prov. Milan, dist. and 6 m. E. Milan. I bank Servino with a church. Pop. 1473—2 A vil. and com., prov. Cremona, and 10 m. E. Vinzaghetto once defended by a strong castle, of which only a few vestiges now remain. Pop. 1987.

PADHAM a small tn. England, co. Lancashire, 4 m. W. Burnley, 1 bank Calder. It built and generally of a very mean appearance but considerable cotton manufactures are carried on, employing the greater part of the population. P. 4509.

PADILLA a tn. Mexican Confederation, dep. Tamaulipas, 20 m. N.W. New Santander and chiefly deserving of notice as the place where Harbide was shot in 1834.

PADRE (San) a tn. Naples, prov. Terra di Lavoro, 9 m. S. Sort. 1 bank Melfi. It has three churches, and an hospital. Pop. 2317.

PADRIA, a vil. Sardinia, div. Sassari, prov. and S. E. Alghero; with several churches, an elementary school, manufactures of woollen and linen cloth, and a trade in corn, wine, brandy skins, and wool. Pop. 1892.

PADREDE, a tn. and par. Portugal, prov. Algarve, 19 m. E. by R. Ovaria, 1 bank Ovaria. Pop. 1870.

PADRON (San, San Flavio) a vil. Spain, Galicia, prov. and 50 m. S. Coruña, 1 bank Iria. It is divided into five districts, comprising 96 hamlets, and has a seminary, a good prison, schools for both sexes, well frequented, especially in winter; and a parish church, which ranks as a cathedral. Agriculture, manufactures of wool and linen,

navigation and commerce, employ the inhabitants. Padron was known to the Romans, flourished during the Hispano-Gothic ascendancy and was at a very early period erected into an independent city. Pop. 6108.

PADSHAPUR, a vil. Hindostan, prov. and 87 m. S.W. Dehagpur, on the Hurroony. It is built of stone, and defended by a fort, situated on a height near its centre.

PADSTOW, a small seaport tn. and par. England, co. Cornwall, S.W. side estuary of the Camel 36 m. N. by E. Falmouth, lat. 50° 33' 30" N. lon. 4° 58' W. (n.) It has a very ancient Gothic church, lately restored and beautified, a Methodist and Bible Christian chapels, a national school, a literary institution, and a neat custom-house. Ship-building and repairing are carried on, and there is a considerable trade in importing hemp, tallow, tar, timber, guano, coal, &c. and in exporting corn, slate, minerals, &c. Area of par. 3364 ac. Pop. 2224.

PADUA [Italian *Padova* Latin *Paduonum*] a tn. Italy gov. and 24 m. W. Venice, with which it is connected by railway lat. 45° 23' 41" N. lon. 11° 53' 48" E. (n.) cap. prov. Padua. In a low flat between the Brenta and the Bacchiglione, the latter of which, dividing into two branches, traverses the town circuitously, and by one of them flows on to the N. into the canal of Flanago. I sits in a triangular shape, and is surrounded by a lofty wall, flanked with bastions, and by a wide, though shallow ditch, which is kept dry but can be filled with water. It is entered by seven gates of which those of San Giovanni Savonarolo, and Falcosetta, are the most magnificent. The loftiness of the houses, combined with the narrowness of the streets, give it a dark and disagreeable appearance, and it has the additional disadvantages of uncleanliness, and bad pavement. The squares, though, like the streets, usually lined with arcades, are irregular in form, and of limited dimensions, with exception of that called the *Prato della Valle* which is at once the largest and the finest, well planted with trees, surrounded by a running stream, and decorated with 74 statues of distinguished townsmen, and other Italians. The buildings most deserving of notice are the townhouse or Palazzo della Ragione, an immense pile, extending along the market-place erected between 1171 and 1219 standing upon open arches, with a lofty roof said to be

MARKET-PLACE, PADUA.—From the Landscape Artist, 1838.

the largest in the world supported by pillars and containing a hall about 280 ft. long, 96 ft. broad and 75 ft. high, and adorned with the mural paintings, about 400 in number, the Duomo or cathedral, which claims Michael Angelo for its architect, but exhibits none of the great characteristics of his genius, being equally deficient in beauty and majesty; decorated, however, with fine paintings and other works of art, and possessed of a fine library which is rich in rare books and manuscripts, and of which Patrick, who was canon of the cathedral, is reckoned one of the founders; the Registry of the cathedral, a fine Lombard building of the 12th century whose walls and apse are entirely covered with frescoes; the church of St. Anthony, a huge structure, bearing a considerable resemblance to a Moslem mosque, the church of

Sancti Spiritus, supposed to have been erected on the site of a Temple of Concord; the Bishop's Palace and the Palazzo del Capitano, occupying one entire side of the Piazza del Signori, with a lofty balustraded tower in the centre, in which is a remarkable clock, which, besides telling the hours, indicates the aspects and phases of the moon, and, after the lapse of five centuries, continues to go as accurately as the day it was made. The most famous establishments in Padua is the university, one of the most ancient in Europe, and long renowned as the chief seat both of law and medicine; several of the most distinguished ornaments in both professions having occupied its chairs. In connection with the university is a botanical garden, the oldest in Europe, containing some of the earliest specimens of trees and plants now rare, but now generally diffused. The manufactures of Padua consist chiefly of ribbons and broad-cloths—the latter to a considerable extent, and the trade includes likewise silks, leather, wine, oil, and cattle, and there is an important annual fair, which lasts from fifteen to twenty days. Padua is the seat of a bishop, and the seat of several superior courts and public offices. It claims to have been founded shortly after the destruction of Troy; by the Trojan Antenor. Under the Romans it became a flourishing municipal town, but on the decline of the empire was sacked, first by Alaric and then by Attila. Its great modern restorer was Charles V. under whose auspices it successfully asserted its independence. In 1515 it fell under the domination of the Carrara family, and in 1406 under that of Venice, whose fortunes it has since followed. Pop. about 50,000.—The PROVINCE OF DELIZIATION, is in general flat and very fertile, but becomes somewhat rugged and elevated in the E., where it is traversed by the Euganean hills. It is watered by the Breno, Bacchiglione, Frassinio and Adige, the last forming its boundary on the S., is traversed by several canals, and yields wheat, maize, hay, garden vegetables, oil, hemp, flax, vms, and some silk. Its numerous cattle are reared on the meadows, and the sheep yield an excellent wool, to which Padua is somewhat indebted for the celebrity of its woollen manufactures. The minerals include copper and good building-stone. This province is divided into 13 districts. Area, 612 geo. sq. m. Pop. 312,785.

PADUCAH, a vil., U States, Kentucky, 1 bank Ohio, 230 m. S W Frankfort; with a courthouse. 1 op. 1000

PADUL, a ta. Spain, Andalusia, prov and 12 m. S. Granada; with a courthouse, several fountains, a parish church, two endowed schools, manufacture of ordinary linen, an oil and several flour mills. Pop. 2849

PADULA, a ta. Naples, prov Principato-Citra, 6 m. S E La Sala; with six churches, and an hospital. P 6000

PADULL, a ta. Naples, prov Principato-Citra, 11 m. W Arzano with a church, college, and hospital. Pop. 2624

PADWORTH, par. Eng. Berks, 1175 m. Pop. 284

PAEJAENE, or **PAIJENJAEW**, a lake, Russia, Finland, circle Helmsing, greatest length, N to S about 50 m., breadth, about 20 m. It contains a great number of islands, of which several are inhabited; receives numerous streams, and discharges itself by the Kymmenjoki, into the Gulf of Finland. It abounds with fish, but is subject to dangerous inundations.

PAEL, a vil. and com. Belgium, prov Limburg, 11 m. N W Hasselt; with four flour-mills, and a trade in agricultural produce. Pop. 2093.

PAERANA, a ta. Italy Piedmont div Cuneo prov and 11 m. W N W Salinas, near the Po, here crossed by a wooden bridge. It has two parish churches, a palace, and an old Ospedale convent, partly converted into barracks, marble quarries, and a trade in corn, cattle, and chestruls. P 6120

PAETE, or **PATA**, a vil. Philippines, Isl Luzon, prov Laguna, W shore of Lake Bay; inhabitants remarkable for the skill they display in making chairs, beds, and other articles of cabinet furniture, with very imperfect implements. Pop. 2505.

PAGHAM, an ancient ruined city, Persia, 1 bank Iraxwah, 130 m. S W Ahwaz, lat. 31° N; lon. 54° 42' E., once the metropolis of a long dynasty of kings, and still famous for its numerous temples, and other remains.

PAGANHO, two vils. Naples—I. Prov Abruzzo-Umbro, 5 m. S. J. J. in a plain. Pop. 1850—2. Abruzzo-Umbro, lat and 12 m. N W Anagni.

Pop. 21.

PAGHAM, par. Eng. Sussex; 4376 m. Pop. 1693

PAGLEHAM, par. Eng. Essex; 1233 m. Pop. 493.

PAGLIETA, a ta. and com. Naples, prov Abruzzo-Citra, dist. and 11 m. N W Il Vasto. It is agreeably situated on a hill, and contains four churches. Pop. 2459.

PAGLIONI, a rivet France, dep. Alpes Maritimes, which flows S. E. W. traverses the city of Nice, and, a little to the W., falls into the Mediterranean.

PAGNANO, a vil. and par. Italy Lombardy, prov Como, dist. and about 8 m. from Como. It is a struggling place, with some manufactures of woollen cloth. Pop. 1803.

PAGO, an isl. Dalmatia, Gulf of Quarnero, circle and N N W Zara area, about 80 geo. sq. m. It has a much indented coast, and a good deal of fertile soil, on which much wine is grown, inhabitants chiefly employed in fishing and in making salt. Pop. 5000. The principal town is Pago, on the Lake of Zadar, in the S. E. part of the island. It has a parish church. Pop. 1800

PAGANJAN, a ta. Philippines, Isl Luzon, cap prov Laguna, on the Pacific, above Manila. It is built with great regularity, partly of stone with tile roofs, but more frequently of a frame-work of wood filled up with clay, and has a pleasing and substantial appearance, a church, and a convent, a governor's house, a chalybeate, and a thermal spring; and a considerable trade. Pop. 4665

PAGUENLMA, a group of five small low coral islands Pacific Ocean, extending about 5 m. by 2 m.; Tapaki, the largest, in lat 7° 4' 40" N lon 167° 56' 80" E. It is surrounded by a coral reef, forming a lagoon inside, into which there is no passage, produces abundance of coconuts and bread-fruits, and the lagoon abounds with fish.

PAHANG, a territory in S. E. of peninsula Malacca; lat 2° 10' to 4° 10' N bounded, N by Lingayat; S by Selangor, from which it is separated by the central range traversing the peninsula S. Johore, and E. the China Sea. Its interior is very imperfectly known, but the coast, which has been carefully explored, consists of a long stretch, not much indented, and presenting alternately bold rocky precipices and low shores apparently swampy for a considerable distance inland. A great number of islands depending on Pahang extend along the coast, throughout its whole length. Like the mainland, the rocks composing them consist, sometimes, of granite, trap, and porphyry, but more frequently of metamorphic schists. Few rivers of any magnitude occur in Pahang, most of the drainage in the S. being sent to the Johore by a number of short and rapid mountain torrents. The rapids of Pahang, though occasionally the Buntars or treasurers of the rajah or sultan of Johore, is in reality independent. Pop. estimated by Newbold at 50,000, but supposed not to exceed 15,000

PAHARPOOR, a considerable town in Afghanistan near bank Attock, 180 m. S E Ghaznee

PAIMBOUF, a ta. and port France, dep. Loire-Inférieure, 22 m. W by N Nantes, 1 bank Loire, hereabout 5 m. broad. It has a custom house, agricultural society school of navigation, and capacious docks for the construction and refitting of large vessels, masted, &c. a commodious harbour with a mole 214 ft. long, manufactures of sails ropes marine stores, bricks, and tiles, fishing, and a considerable trade in grain, wine, timber, and other articles. Most of the large ships bound for Nantes discharge their cargoes here, into lighters. Pop. 8473.

PAIMOGÓ, a vil. Spain, Andalusia, prov Huelva, 73 m. N W Bertha; with a primary school, a castle, a custom house, and a church. Pop. 1690

PAIMPOI, a ta. and port France, dep. Côte-du-Nord, 33 m. N N W St. Briens, with spacious and handsome squares, a tastefully-decorated church, a dock and ship for building and repairing vessels, schools of navigation and mathematics, marine storehouse, a custom-house, a safe but small harbour manufactures of cotton fabrics, ropes, marine stores, leather, refined salt, and oil and a trade in grain, hemp, flax, linseed, wax, honey, salt-fish, butter, and sea-fish. Mackeral-fishing is carried on. Pop. 1794.

PAINTON, a small ta. and par. England, co. Devon, at the head of Torbay, 5 m. N E Dartmouth; streets irregular narrow, dirty, and ill-lighted; houses generally of a wren appearance. It has a large church, and independent chapel, a chapel free for all Christians, several schools, and a

71

small feeding-room. Large quantities of cider are manufactured here for exportation to London, Liverpool, and other markets. Vegetables are raised in great abundance in the vicinity. The cabbage of Painslow is particularly famous. Area of par. 37462 ac. Pop. 37462.

PAINSTOWN, two par. 37462 ac. Pop. 37462. Children and Elders; 2144 ac. P 167. S. 37462 ac. P 900.

PAINTSVILLE, a vil., U. S. State, Ohio, 178 sq. m. N. E. Columbus with three churches, a courthouse, and a jail. Pop. 2580.

PAINSWICK, a market to and par. England, co. and 64 m. S. S. E. Gloucester; with a handsome church, several Dissenting chapels, and a large national school; manufacturers of cloth and freestone quarries. Area of par. 5815 ac. P. 3464.

PAISLEY, a part, and municipal bor. market and important manufacturing in Scotland, co. Renfrew, 7 m. W. S. W. Glasgow on the White Cart, about 12 m. above the confluence of the united White and Black Cart with the Clyde, and on the railway from Glasgow to Greenock and Ayr. Paisley consists of an old and a new town, the former on the W. or 1, and the latter on the E. or 2, bank of the river, and common meeting by three bridges, one of them an ancient structure. The old town, composed anciently of two long streets, the one stretching E. to W. in the line of the high road from Glasgow to Ruth, and the other from N. to S. in the line of road from Innesmill to Neilston, is both irregular in its form and indifferent in its appearance, mean houses, often of a single story, and covered with thatch standing intermingled with others of a more substantial description. This description, however, though true in the main, does not apply to all the streets without exception. In different quarters great improvements have been made, and both George Street and Forbes Street deserve mention, the former for the regularity, and the latter for the elegance of its buildings. The streets of the new town, though not remarkable either for spaciousness or elegance, are decidedly well built. All the streets are well lighted with gas, and tolerably well paved; police and sanitary regulations continued long to be very imperfectly observed, but improvement has commenced and is expected to make rapid progress since one of the alleged causes of neglect, a deficiency of water has been entirely removed by the introduction of an abundant supply from the hills of Glasgow.

Among the public edifices, the first place is due to the Abbey, the original magnificence of which, if not adequately represented, is at least strongly indicated by the well existing Abbey church. It was founded in 1163, by Walter, son of Alan, the first of the house of the Stewarts, for a prior and 12 Cistercian monks, for whom a very liberal endowment was provided, and at the Reformation it was, with exception of Kelso, the most opulent monastery in the S. of Scotland. At this time the buildings formed a magnificent pile, with an enclosure of above 1 m. in circuit, laid-out partly in orchards and gardens, and partly as a deer park, and the church, built in the form of a Latin cross, was surmounted by a very lofty steeple. After the whole was secularized, the temporal lordship formed out of it was gradually subdivided and broken up, and the Abbey itself, which, subsequent to the expulsion of the monks, had been converted into an almost princely residence, ultimately fell into such disrepair as only to afford a few indifferent tradesmen's tenements. The church, too, has shared in the dilapidation. The steeple, as well as the choir, has disappeared, and the transept is only an interesting ruin. The main body, however, consisting of a nave and two aisles, separated from it by ten massive clustered columns, still remains, and forms a truly splendid parish church. Adjoining the S. side of the nave is a quadrangle, of about 60 ft., called the cloister court, from which is an entrance to St. Mirin's, or the Bounding Aisle, about 48 ft. long, by 24 broad. It contains a remarkable monument, called Queen Mary's Tomb, and over its name of 'Bouding' to its powerful echo, the startling effect of which is sometimes exemplified on visitors by the sudden and violent shutting of the door. Besides the Abbey Paisley contains six other churches belonging to the Establishment, six to the Free church, six to the U. Free, and three Independent, two Baptist, one Reformed Presbyterian, one Episcopal, one Wesleyan Methodist, one R. Catholic, one Unitarian, and one New Jerusalem. Almost all these churches are substantial and commodious buildings,

but none of them is otherwise possessed of much architectural merit. After the Abbey church, the only edifice particularly deserving of notice are the County Buildings, forming a quadrangular pile in the castellated style, containing in its W. or front division, a courthouse, county-hall, townhouse, &c., and in its E. range, a house of correction, and common jail, with chapel and suitable arrangements, for the discipline, reformation and moral discipline of the prisoners—and the Nelson educational institution, a large massive edifice in the form of a Greek cross, and surmounted by a magnificent dome; founded from a bequest of about £30,000 left, in 1839, by John Nelson, Esq. of Northwood, and opened in 1853; it supplies gratis an English commercial and classical education to the children of parents resident not less than three years in Paisley and who have died without leaving means to provide a suitable education for their family; and, in addition, a large number of boys and girls receive instruction upon payment of fees. The steeple of the former courthouse and prison still stands near the market-cross, forming at once a conspicuous and ornamental object and the Coffee Room buildings, situated immediately opposite to it, is adorned in its upper part with Ionic pilasters. The scholastic and literary establishments of Paisley include a grammar school, infant, ragged, infantary, and various other schools, a government school of design, Nelson's educational institution, already referred to, Hutcheson's charity school, an academy, a mechanics and a philosophical institute, the latter with a valuable library of scientific works, and a museum. A literary association an artisans' institution, a theological law a medical, and a subscription library. The principal charitable institutions are the town's hospital, with a lunatic asylum attached a dispensary and house of recovery or infirmary, a society for the education of the deaf and dumb, a widow and orphan, a female, benevolent, and various other societies.

Paisley early distinguished itself by its manufactures, and in its staples still remains unsurpassed by any town in the kingdom. Shortly after the Union, in 1707, laid opened up a free trade with England, Paisley goods, consisting chiefly of coarse checkered linen cloth, and checkered linen handkerchiefs, many of them fine and beautifully variegated, came into great demand in the English market. Other fabrics of a lighter and more fanciful kind succeeded, and about 1760, a great number of hands were employed in weaving linen gauze silk gauze was shortly after introduced, and Spitalfields, which had almost monopolized this branch of industry, soon found itself so completely outstripped, as to be obliged to relinquish the manufacture. As early as 1784, silk gauze alone is said to have been produced to the annual value of £250,000, and to have employed 5000 looms in the town and vicinity. The shawl trade was first introduced about the beginning of the present century, and though the prosperity of the other branches of manufacture prevented it for a time from attracting much attention, it continued steadily to advance and now as much from the excellence of the products as from their value, stands at the head of all the other staples. The shawls, chiefly in imitation of those of India, are made of silk, silk and wool, cotton and wool, either separately or in mixture. The Cashmere fabric was long imitated with considerable success, by using what was called Persian yarn, spun from a mixture of fine wool and silk waste for the warp, and a silk warp. A more successful imitation was afterwards made, by the introduction of what was called Tibet wool, made simply of fine worsted yarn from the best of wool, scoured, raised and cropped so as to have a beautiful appearance. To complete the shawl made from this cloth, a rich figured border was sewed to it. These imitations, however, fell considerably short of the real Cashmere; and the possibility of attaining a nearer approximation seemed almost hopeless, when it was discovered that the object had been actually attained in France, by the simple process of employing, not fictitious, but genuine material in the manufacture. This material was obtained both by importation from the Levant, and by the introduction of the Cashmere goat, which has now become acclimated in several French districts. The Paisley manufacturers are now able to make genuine Cashmere shawls, equal in texture to the most celebrated productions of the East, and far superior to them in beauty of design. In addition to those already mentioned, the other most important articles of manufacture are cotton thread, shawlroidery, different kinds of

terran cloth, and carpets; shirt-printing is also earned on. There are also several cotton-factories, a large foundry, with steam-engine, and other machine shops attached; a silk throwing-mill, an extensive tannery a soap-work, several breweries and distilleries, blacksmiths and building-yards, chiefly for river steamers. The weekly market is well supplied, and there are four annual fairs, one of which, called St. James Day Fair, and held in August, is famous for its roses.

Paisley, though it has only become a place of much importance in a very modern time, is of very ancient date, and is generally supposed to occupy the site of the Roman Vindanaria mentioned by Ptolemy. About the end of the 17th century, a large Roman camp in the vicinity would be distinctly traced. Thus, however, was the only evidence of a Roman station, and if any town had previously existed, it had so completely disappeared that in 1165, when the monastery was founded, there seems not to have been even a village at the place. It was first erected into a free burgh of barony in the 1st year of the reign of James IV. but the power of electing the provost, bailiffs, and other office-bearers, was vested solely in the abbot. This right passed to his successors, and continued with the superiors of the lands long after the monastery had been converted into a temporal lordship. In 1558 the burgh having succeeded in purchasing immunity from this thralldom, obtained, among other privileges, that of electing its own municipal authorities. It is now governed by a provost, four bailiffs, a treasurer, and ten ordinary councillors, and sends a member to the House of Commons. Among the more eminent natives of Paisley are—Robert Boyd, successively principal of the universities of Edinburgh and Glasgow the ornithologist Wilson, the poet Tannahill and the comic poet R. A. Smith. Pop. (1851) 47,951

PAJARES-DE-LOS-OTEROS, a town in Spain prov. and S.E. Leon, with a church, a primary school, and a trade in corn and wine. Pop. 1146

PAK PATTAN, or PAK PATTAN (Pur town), a town in Punjab, 98 m. S.W. Lahore about 5 m. W. from the Ravee lat. 30° 20' N. lon. 78° 15' E. It is built on the site of the ancient fort Adwaj, and is celebrated as the place where Tamerlane and several other invaders of Hindoostan crossed the river boundary of the Punjab on the E. It is conjectured to have been the site of the colossal altar erected by Alexander to mark the E. boundary of his conquests

PAKA, two places Bohemia, circle Budechow—1 A municipal town, with a church. P. 2800—2 (44) A vil. on the W. side of the river, N.E. of the town, with a church, a school, two mills, and a mineral spring. P. 907

PAKEFIELD, par. Eng. Suffolk, 771 ac. P. 718.

PAKENHAM, par. Eng. Suffolk, 3696 ac. P. 1184

PAKLA, or UNOR, a river, N.E. of the town, in the country of the Tschukchi. It rises in a mountainous district, flows W. N.W., and, after a course of about 200 m., forms a common estuary with the Tochen, in the bay of that name

PAKNAM, a town in Slam, 4 m. from the mouth of the Meman extending above 2 m. along the margin of the river but with seldom more than two or three houses inland from its banks. Both sides of the river are fortified with batteries

PAKOZD, a vil. Hungary Thither Danube co. and about 6 m. from Stuhlweissenburg with two churches, and a trade in corn wine, cattle and cane. Pop. 1515.

PAKRACE, a market in Austria, Slavonia, co. and 23 m. S.E. of Pecs, the see of a Greek bishop, with R. Catholic and two Greek churches national schools, town-houses, and barracks. Pop. 1120

PAKS, a market in Hungary Thither Danube co. Tolna, near the Danube, 63 m. S. by W. Buda. It is much exposed to inundations, has two churches and a synagogue, and is a steam-boat station on the Danube. Pop. 6700

PAKWAN, a town in China, prov. Chekiang, on the banks of a river which falls into the bay of Hang-chow. It is a large, thriving place but appears, from the number of eating-houses, tea-shops, and pawn-shops, provided for the accommodation of travellers and their goods, to have an important trade. On a canal in the neighbourhood, are two embankments, serving the same purpose as locks, small vessels being drawn up on inclined planes by a windlass

PALACHY, or PALLACHEN, a town, Hindoostan, prov. Coimbatore, 130 m. S.E. of Seringapatam, defended by a small fort. It has a temple, and about 300 houses.

PALACHOS, numerous places, Spain, particularly—1 (del Sal), A vil., prov. Leon on the E. with a church, a primary school, and manufactures of woollen and linen cloth and hoods. P. 1327.—2 (de la Faldarna) A town, prov. and 27 m. S.W. Leon, near the Duerna with two churches, an old castle, town-houses, prison, and primary school and a trade in corn, wine, and wax. Pop. 1748.

PALAEOPOLIS (anc. Ξηιά) a town in Greece, Morea, on the edge of the plain where the Peneus issues from the hills, 8 m. S.E. of Gaidaro. It contains a number of ruins, consisting chiefly of confused scattered blocks, some masses of brick-work, and an octagonal tower. The most remarkable object in the vicinity is the hill of Ellis, rendered conspicuous by its lofty peak, crowned by a ruined tower

PALAEOTRO, a vil. and com. Italy Piedmont div. Novara, prov. Lomellina, 1 bank Sesia with a church a school, and some trade in cattle and dairy produce. P. 1103.

PALAEOLLA, a vil. and com. Spain Catalonia, prov. and 40 m. from Barcelona, with an ancient castle in ruins, a church and a trade in cattle and agricultural produce. Pop. 1130.

PALAEURGELL, a town in Spain, Catalonia, prov. and 20 m. S.E. Gerona with a courteous custom house, theatre, various primary schools, and a church. More than 500 persons are employed in making socks and bungs. Pop. 2696

PALAEONIA, a town in Sicily, prov. and 31 m. S.W. Catania, near Lake Palio, in an unhealthy district. Pop. 3500

PALAEIS (Lap), a town and port, France, dep. Morbihan, cap. and on N.E. side Belle-Ile. It is defended by a fort; has a school of navigation, good quays, a ship, and a steamer anchorage. Pop. 1780

PAI AJA, a town in Tuscany prov. and 18 m. S.E. Pisa, on a hill, crowned by an old castle, and washed by the Roglio. It has a church and a trade in cattle. Pop. 1218

PALALAWANG, an important market town, in Sumatra, prov. Padang. It lies some days' journey from the coast, on both sides the Kamper-hoar, and carries on a direct trade with Singapore

PALAMCOTTA, two towns, Hindoostan Carnatic—1 48 m. N. N.E. Cape Comorin and 200 ft. above sea-level—2 89 m. S.W. Pondicherry

PALAMOS (anc. Παλιόπολις) a maritime town in Spain, Catalonia, prov. and 18 m. S.E. Gerona lat. 41° 51' N. lon. 3° 4' E., on the Mediterranean. It has a church, an ex-convent of Augustines, now appropriated for primary schools, an hospital, a town-house, and a custom-house, but its harbour is rapidly filling up. It was here that Prince L. disembarked for Madrid after his defeat and capture at Pavia, in 1526. Pop. 1698

PALANKA (O. NEMETH and Uj) [or Old German, and New Palanka], three adjacent vills Hungary co. Bacs, on the Danube, 28 m. W. Patzwarden. They contain a Protestant, R. Catholic, and Greek church, and a synagogue, and have a considerable trade in corn, wine, silk and fish. Pop. 6697

PALATTORE, a town, Hindoostan, prov. Gujarat, 13 m. E. Dacca. It is populated by a sect of a small Mahomedan principality, tributary to the Gulowar Comptenances of Ghazni are maintained here, and take their name from the place. Pop. 30 000.

PALAST, or PLATOWITZ, a vil. Hungary Thither Danube, co. Month 3 m. from Ipoly-Bagh with two churches, a fine chateau and numerous mills. Pop. 1193

PALATINATE (German, Pfalz), an ancient territory of Germany, which consisted of two divisions—an Upper and a Lower. The former which had an area of about 2786 sq. m., was surrounded by Bohemia and Bavaria, and now belongs entirely to the latter being included in its modern states of Oberpfaiz and Oberfranken or Upper Franconia. The latter which had an area of 1890 sq. m., and was sometimes called the Palatinate-on-the-Rhine, from extending along both banks of that river is now shared between Rhinish Prussia, Baden, and Bavaria. The part belonging to the last includes a considerable part of the territory on the L. bank of the river and forms the modern Bavarian circle of Pfalz or Palatinate. It is one of the most productive portions of Germany but has suffered much from having been repeatedly the theatre of war

PALATINE, a vil. U. States New York, 56 m. W. Albany, with a Lutheran church, three schools, a hand-pipe factory, and several mills. Pop. 2828.

PALAU, a river Hindooon, rises in Mysore; lat. 13° 30' N. lon. 76° 12' E. flows E. to about 12° 40' N., where it takes a N.E. direction to Anant, then S.E., and falls into the Bay of Bengal, 50 m. S. Malabar; length, about 250 m.

PALAWAN or **PALAGUAS** is an Indian Archipelago, forming the most W. of the larger islands of the Philippine group lat. 8° 27' to 11° 33' N., lon. 117° 18' to 118° 46' E. having the Calamian Archipelago on the N., the China Sea on the W. the Mindoro or Sooloo Sea on the E. separating it from Panay, Negros, and Mindanao, and the Balabak passage on the S., separating it from the N. extremity of Borneo. It forms a long and comparatively narrow belt, stretching about 260 m. N.N.E. to S.S.W., with an average breadth of about 40 m., and presenting no remarkable indentations except one in the N.W., and very little sheltered anchorage. The interior is traversed longitudinally by a mountain range, from which the surface slopes gradually on either side to the shore; is well watered and of considerable fertility and is said greatly to resemble Borneo in its natural productions, which among others are supposed to include camphor. Palawan belongs to a brilliant white, fetch a high peak at Manila. It produces also fruits, wax, honey, rice, fowls, pigs, trapping edible-nests, gold, and pearls. Among the animals, flying and other squirrels are particularly numerous, and porcupines are often leopards occasionally seen. The birds are remarkable for the variety and brilliancy of their plumage, and some of the smaller species have notes resembling those of the nightingale. A great part of the island remains in a state of nature, only a few places on the coast acknowledging the Spanish rule. Among these is Tudy, the capital, prov. Calamian, in which the island is subdivided; it is a miserable place, defended from pirates by a small fort, and so unhealthy that foreigners are sure to be attacked with fever within a fortnight of their landing. The natives remain in a very savage state.

PALAZZAGO, a vil and enno Italy Lombardy prov. Bergamo 2 m. W by S. Alsemo with a large fine church and near it quarries of excellent freestone and whetstones. Pop. 1500.

PALAZZO a m. and com. Naples, prov. Basilicata, 19 m. E.S.E. Mella on a hill covered with rich pasture. Pop. 5163.

PALAZZO-ARMANDO, a m. faculty, prov. Mantova, on a healthy plain, not far from the source of the Calatellota. Pop. 4700.

PALAZZOLO several places, kingd. of Italy particularly—1. A m. and com., prov. and 18 m. W. Brescia, on both sides of the Oglio, here crossed by a stone bridge. It is well built, has a magnificent parish church, an hospital, a theatre, an ancient castle, a large tannery, many silk and other mills, and a considerable trade in corn and silk. Pop. 3500.—2. A vil. and com., prov. Milan, 6 m. S. Bardesano, a bank Beseno with a handsome church with three naves, a charitable endowment for widows, and near it ancient remains, supposed to have belonged to the Roman city Palatium. Pop. 1049.—3. A vil. gov. Venice, prov. Friuli, with three churches, and an oratory. Pop. 1200.

PALAZZOLO, a m. Sicily prov. and 19 m. W. Syracuse numerous interesting remains. Pop. 8000.

PALAZZOLO, a m. Naples, prov. Salerno, 13 m. S. Bene, on a hill with two churches. Pop. 1250.

PALMBANG, formerly a kingdom, now a Dutch prov. lat. Sumatra, S. coast, bounded, N. W. by Jambi, N.E. and E. the Strait of Banca, S. the Lampung districts, and W. Bencoolen. It is divided into several districts, and its chief towns are Palembang the capital, Indrapura, Moara-Kempoh, and Lahat. Towards the coast the country is flat and marshy but inland it is hilly and contains several vil. centers. In 1858, an eruption took place of the volcano of Bokti-Kava, on the Bencoolen frontier, which caused much damage. The province is visited by the Minc, Komang, Ogan, Lamatang, Kalang, Sebangue, Barjos-Lam, &c. some of which are noted by griffins, and many of which, in the rainy season, overflow their banks in the lower grounds. The soil is fertile, and yields pepper, cotton, gambou, various blood, lacquer-wood, benzoin, gambou, &c. European vegetables grow well, and fowls, pigs, sheep, small wild deer, and buffaloes, are better here than in Java. Trade is carried on with Java, Roroo, Singapore, Penang, Siam, and China.—(Van der Aa.)

PALMBANG, a m. Sumatra, cap. above prov. lat. 3° 47' S.; lon. 107° 36' E., on the coast, here called the Palembang, about 50 m. above its mouth. The town is spread out on both sides the river, and along some creeks, so that communication between the various parts must be maintained by boats. Many of the inhabitants likewise, chiefly Chinese, live constantly on the river. Palembang is the residence of the provincial authorities, and is very favorably placed for commerce, the river having a depth of four to nine fathoms, and being affected by the tide. The population, consisting of natives, Arabians, Europeans, and Chinese, amounts to about 50,000.—(Van der Aa.)

PALENA, a m. Naples, prov. Abruzzo Citra, 19 m. S.W. Lanciano, at the foot of a mountain; with an hospital, and manufactures of coarse woollens. Pop. 2000.

PALENCIA a prov. Spain, Leon, bounded, N. by Santander, E. Burgos, S. Valladolid, and W. Leon. It is fertile, watered by the Carrion, Orosa, Pisuerga, and many others, is traversed in its entire length by the canal of Castile, and contains copper-mines, and abundance of shell, gypsum, and saltpetre. Agriculture, although in a comparatively prosperous state is confined to grain, produced in great abundance, wine, vegetables, fruits, oil, and linseed; and a considerable number of sheep and goats are likewise reared. The principal manufactures are blankets, serge, and bala, in which there is extensive traffic with the whole kingdom. The roads are among the best in the kingdom. Area, 4539 sq. m. Pop. about 180,000.

PALENCIA [anc. *Pallencia*], a city Spain, Leon, cap. above prov., 117 m. N. by W. Madrid finely situated 1 h. back Carrion, over which there are several fine bridges in the neighbourhood. On the N.E. and S. the town is surrounded by a wall, 34 ft. high, and 9 ft. thick; and on the W. it is washed by the Carrion, but it is commanded by two hills in the vicinity. It has seven gates, generally broad and well-paved streets, three fountains, several promenades, an episcopal palace, an immense hospital a sumptuous hospital, and a courthouse, a cathedral, of light and elegant Gothic architecture, founded by Don Simocho of Mayorga, king of Navarre, on the site of one more ancient a house capable of containing 600 horses and 1400 infantry; five parish churches, six convents an academy with teachers in philosophy, mathematics, and theology various elementary and advanced schools, a gallery of pictures, and a library. About a third of the population, both male and female is employed in the manufacture of blankets and fannels, with which Palencia not only supplies all Spain and Portugal but also a number of places in other countries. They are all sold on the spot. In consequence therewith are several dye-works, tanneries, and fulling-mills. Next in importance ranks the manufacture of flour, for which there are five large mills; there is also a sugar factory, and one for coarse cloths a brandy and liquor distillery manufacture of wax and tallow candles, cards for wool-combing, and every kind of delftware. Here was held the council which declared to be null and void the marriage between Urzua, daughter of Alonso VI., and her cousin Alonso, king of Aragon. The hospital of San Lázaro founded by the Ord. was previously his palace, and he was married here to Ximena. Juan I. allowed the women of Palencia to wear a golden band on their heads for their second husband in defiance of the city when it was besieged by the Black Prince. It was afterwards frequently occupied, and particularly by Fey in 1812. Pop. 11,470.

PALENCUE, a vil. Mexico, dep. Oajaca 60 m. N.E. Ciudad Real Near it are extensive and magnificent ruins of what is supposed to have been a large city.

PALENCUELA (Valencia m.), a m. Spain, Leon, on the W. frontiers of Old Castile, prov. and 22 m. E.N.E. Palencia. It has two churches, a primary school, coachworks, and prison, some manufactures of woollens, two flour-mills, and a trade in corn, wine, &c. Pop. 1227.

PALEO-CARNO [anc. *Flavio*], a vil. Greece, in the S.W. of the Morea, on an alluvial of the Diapontine, about 8 m. N. Kalamata. It has several remains of Cyclopean architecture, and fragments of a Doric temple.

PALERMO [anc. *Panormus*, *Tromis*, *Palaire*], a seaport m., cap. Sicily beautifully situated on the W. shore of the island, on a wide bay, partly inclosed by lofty hills. Its numerous spires, domes, and towers, give it a very imposing appearance.

seen when approached from the sea. It is of a rectangular shape, surrounded by walls, flanked with bastions, defended by several batteries, and entered by 18 gates. It is built with considerable regularity, and is intersected at right angles by two principal streets. At the point of intersection is a large oblong, called the *Quadrato Cattedrale* (with a beautiful fountain in its centre), lined with elegant buildings in the different

tions are the chapel of King Roger, rich in mosaic, the picture-gallery, the armory and the observatory, from which Piazzi discovered the planet Ceres, the archiepiscopal palace, the mint, custom-house, public library, apparently both well arranged and much frequented, the university in a very declining state, the barracks, arsenal, courts of justice, *monde-petit*, three theatres, four hospitals, and several literary and charitable endowments. The manufactures consist chiefly of silks, cottons, all-cloth, leather, glass, and gloves, made from a material furnished by the *plano-marina*.

The trade has the advantage of an excellent roadstead and harbour. In the former vessels can anchor safely at a short distance from the shore, in 20 to 38 fathoms. The latter, formed by a magnificent mole, which projects about 400 yards into the sea, and has a light-house and battery at its extremity, consists of an inner port reserved for government purposes and an outer port, sufficiently large and with ample depth of water for the largest merchant vessels but somewhat exposed to the N E. The trade, though much more limited than it ought to be, considering the great natural resources of the island, is by no means unimportant, and has in recent times greatly increased. The principal articles of export are shrimps, wine and spirits, fruit, sulphur, skins, oil, moccasins, linens, cream of tartar, liquors, and manna, of import, colours, produce, woollens, cotton, linen, and silk threads, hardware, earthenware, &c. The fisheries on the coast are very productive and carried on with great activity and give employment to nearly 4000 hands.

Palestro is the see of an archbishop and the seat of a supreme court with jurisdiction over the whole island, it is a criminal court for the provinces of commercial and several other inferior courts, and of several important public offices. Its foundation is attributed to the Phoenicians. From them it passed to the Carthaginians, who made it the capital of their Sicilian possessions and the centre of an extended commerce. The Romans obtained possession of it 254 years before the Christian era made it a free town and conferred upon it many important privileges, in consequence of which it increased rapidly and became very prosperous. After the fall of the Roman empire, the Saracens became its masters and kept possession of it till 1072, when it was taken by Roger the Norman, who founded the kingdom of Sicily. Since then it has always continued to be the capital. It has repeatedly suffered from earthquakes. This, and the other vicissitudes which it has undergone, is probably the reason why so few remains of antiquity are to be found within it. Some, however, still exist in the environs, which, both on that account and their own intrinsic beauty are, in many respects, more attractive than the town. During an insurrection which took place in January, 1848, the town was bombarded, and partially destroyed by the King's forces. Pop. (1850), 187,323.

PALESTINE is a prov. in the N of Sicily bounded, N by the Tyrrhenian Sea, E. provs. Messina and Catania, S. Calabria and Girgenti, and W. Trapani greatest length, N W to S E, 86 m. breadth, 45 m., area, 1727 sq. m. Its coast consists of a series of extensive bays and bold promontories. Its interior towards the S is traversed E to W, by a branch of the Neapolitan Mountains. The streams are numerous, but small. It is divided into four districts—Palestro, the capital. Cefalù Corleone and Termini. Pop. 475,574.

PALESTINE, CANAAN, LAND OF ISRAEL, JUDAEA, or HOLY LAND, a country, Asiatic Turkey on the S. W. of Syria, forming part of path. Acra and Damascus, situated, lat. 31° 50' to 35° 50' N. lon. 34° 50' to 36° E. and bounded N by the mountains of Lebanon, S. the Arabian Desert, E. Arabia Petrea, and W. the Mediterranean, length, N to S.,

styles of Grecian architecture, and adorned with numerous statues. The two principal streets are opened into by a great number of others, which are both narrower and of an inferior description; but all the streets, principal and inferior are remarkably well paved with blocks of lava, though the benefit is often lost from the filthy state in which many of them are allowed to remain. Numerous obstructions, also, in the form of booths, workshops, and other projections, block up several of the thoroughfares, and makes the threading of them a task both of difficulty and danger. There are not many squares, in addition to those already mentioned, but admirable places of resort are provided by the Marina, and the Fiume. The former a superb terrace, about 80 yards wide, stretching about a mile along the bay the latter commencing in the E. where the terrace terminates, is a magnificent public garden regularly and beautifully laid-out and adorned with statues, fountains, and rustic temples. The public edifices are numerous, but do not in general display much taste. The most important are the cathedral originally Gothic, but subsequently defaced by a heterogeneous intermixture of the Greek style, crowned by a lofty dome, adorned with numerous sculptures, and containing many fine sepulchral monuments in porphyry, particularly those of the Emperor Frederick II and of King Roger the Norman the church of San Giuseppe, supported by lofty columns of gray Sicilian marble, and overlaid with ornaments, numerous other churches, 64 convents, all in operation in 1853, of which 28 are for women, and 41 for men; the royal palace, finely situated, and surrounded by beautiful gardens, but consisting of a large and irregular pile of buildings, among which the only great attrac-

about 140 m., breadth, about 80 m., area, nearly 10,000 sq m. The surface is generally mountainous, being traversed by branches from the chain of Lebanon, one of which stretches S. in a direction nearly parallel to the coast of the Mediterranean, forming the water-shed between its basin and that of the Dead Sea; while another, turning north to the E. stretches along the left side of the valley of the Jordan. The mountains, composed generally of Jura limestone or oolite, but often capped or pierced by rocks of volcanic origin, attain their greatest height, of about 10,000 ft. in Mount Hermon, where they first become detached from the principal chain. None of the other heights exceed 8000 ft. but many of them have acquired great celebrity from the frequent notices taken of them in Holy Writ, or the wonderful events of which they have been the theatre. The most remarkable are Carmel forming a promontory in the Mediterranean, on the S.W. side of the Bay of Acre, Tabor, or the modern Jebel Tur at the N.E. extremity of the plain of Esdraelon Elal and Gersam, in the valley of Samaria, Gilboa and Nebo or Pisgab, on the E. side of the Jordan; and Zion, Moriah, and the Mount of Olives, in and near Jerusalem. The mountains are separated by deep valleys or level plains and the whole country, though in many parts left almost desert, is rich in natural beauty, and, by the fertility which it displays wherever it is under regular culture, fully justifies the early description given of it as a land flowing with milk and honey. It is watered by numerous streams, but its only river of any consequence is the Jordan, which flows in a valley remarkable for its depth; the Lake of Tiberias, from which it issues, being 84 ft., and that of the Dead Sea, into which it falls, being 1537 ft. below sea-level. The limited extent of Palestine and the insignificant place which it holds as a marine fragment of the European dominions, will not allow it to be made the subject of much geographical detail, but the deep historical interest naturally attaching to it, requires that notice should be taken of the more remarkable changes which it has undergone.

The name Palestine, derived from the Hebrew *Palesteth*, and meaning the land of the Philistines, does not occur in Scripture, and is properly applicable only to the S.W. part of the country stretching along the shores of the Mediterranean. It appears to have been first used by Greek authors, and derived additional currency from its adoption by Josephus and Philo. Its most ancient name was *Canaan*, which is evidently owed to the descent of its inhabitants from Canaan, the fourth son of Ham and a grandson of Noah. When thus named, in the time of the patriarchs, it was parcelled out among a number of independent tribes or nations, the Kenites, Kenizzites and Kadmonites, on the E. of the Jordan; the Hittites, Perizzites, Jebusites, and Amorites, in the hill country of the S.; the Canaanites proper in the centre, from the Jordan to the coast; the Girgashites, on the E. shore of the Lake of Tiberias; the Hivites, in the N. among the ramifications of Lebanon; the Philistines on the S. and the Phoenicians on the N. coast. In the time of Moses, the country E. of the Jordan was conquered and divided among the tribes of Reuben and Gad, and the half tribe of Manasseh. Under Joshua, the work of conquest was carried on to the W. of the Jordan and the whole territory though not to the extent originally promised, allotted to the remaining half tribe of Manasseh and the other ten tribes, the larger portion of the S. falling to the tribes of Judah and Benjamin. Under Solomon, the work of conquest appears to have been completed, and all the land which was originally promised was included within the limits of his kingdom. By the folly of his son Rehoboam, the kingdom was rent in twain, and subdivided into the separate kingdoms of Judah in the S., and Israel in the N. The latter kingdom was often designated by the name of Samaria, its capital. The division of the country into tribes was completely broken up by the captivity which carried away ten of them to Babylon, and supplied their place by a new colony. After the destruction of the Babylonian empire, Palestine fell under the dominion, first of the Persians, and then of the Macedonians. In the time of our Saviour when the Romans had established their supremacy, it was divided into the four provinces of Galilee in the N. Samaria in the centre, Judaea in the S., and Perea, which included all the country E. of the Jordan. Under Constantine, Palestine, now regarded as the Holy Land, acquired new interest, and recovered in some

degree from the calamities by which it had been laid desolate and in 896, on the division of the empire by Theodorus, became a province of the latter. This was its condition at the time when Islamism began to make its conquests. Palestine, unable to offer any resistance, soon fell a prey; and Omar, in 636, after taking possession of its capital, converted it into one of the provinces of his caliphate. The severities exacted towards the Christians having roused the indignation of Europe, gave rise to the Crusades, and Jerusalem became for a time the capital of a Christian kingdom. Ultimately however, Mahometanism prevailed, and Palestine sunk into a degraded state from which, as yet, it has not shown any symptoms of recovering. The sultans of Egypt ruled it till 1517, when it was taken by the Ottoman sultan, Selim I. and incorporated with the Turkish empire. At present, the whole of Palestine W. of the Jordan is divided into seven districts, El-Kode, including Jerusalem, Jericho, and about 200 villages; El Khalil or Hebron and the S. part of Judaea, Gaza, on the E. coast, with the towns of Gaza and Jaffa. Ludd, or the environs of ancient Lydda; Hahlots or ancient Sychar and Samaria; Acre, including Mount Carmel and a part of the plain of Esdraelon, and Safet or Safur, nearly identical with ancient Giddon.

PALÆSTRINA (anc. *Prænestina*), a town, Papal States, 75 m. E.S.E. Rome. It is one of the most ancient Greek cities in Italy and had risen to importance long before Rome was founded. It continued for many centuries to be a splendid city and appears to have reached its highest prosperity during the reigns of the first Roman emperors, several of whom frequently resided in it. The remains of its magnificence are still visible, but the present town is built chiefly on the ruins of a temple of Fama, which stood at the foot of the height which was crowned by the citadel. The only modern buildings of any interest are the deserted Barberini palace of the 17th century, the baronial church of Santa Rosalia, and numerous tombs of the Colomae and Barberini families. **P 439**

PALFA a vil Hungary Thither Danube, c. and 16 m from Tolma, on the Bar. It has two churches, and a trade in corn and tobacco. **P 128**

PALGRAVE, par Eng Suffolk, 1474 as **P 740**
PALHANPOOR, a fortified town, Hindoostan, prov Gujrat, cap principality of its name, 88 m. N.N.W. Ahmedabad lat. 24° 11' N, lon 72° 50' E. It is surrounded by a brick wall flanked with towers; and, being a frontier town on the main route to Rajpootana, is a place of considerable importance. **P 30 000**

PALIANO a town, Papal States, 52 m. E.S. E. Rome **P 5043**
PALIGGIANO, a town, Naples, prov Otranto, 18 m. W.N.W. Taranto. **P 3000**

PALIGHAULT a town, Hindoostan, prov Malabar, cap. dist. of same name, 68 m. S.E. Calicut. It consists of a number of different groups of houses and barns, containing a large population, and clustering round a fort which was built by Hyder on his conquest of Malabar.—The structure, containing about 123,000 inhabitants, is partly covered by dense forests, containing much valuable tank timber.

PALINURUS SIOAL, Arabia. See **AMOL-KUM**
PALISEUL a vil. and com. Belgium, prov Luxembourg, 36 m. W.N.W. Arlon with an oil, a saw, and four flour mills, and a trade in agricultural produce. **P 1069**

PALISSE (La), a town, France, dep. Allier, 22½ m. S.E.S.E. Moulins, on the Beaulieu, with manufactures of cotton fabrics, shoes, boots, &c., and a trade in cattle, grain, hemp, and manufactured goods. **P 1701**

PALK BAY or **GULF**, the strait or channel which lies between the N. extremity of Ceylon, and the S. end of the peninsula of Hindoostan, about 40 m. wide at the narrowest part, and probably about 95 m. in length, having the Bay of Bengal on the N.E., and Adam's Bridge on the S.W. It is not frequented except by boats and small coasting vessels; the water being usually about all over 1, 6 or 7 fathoms in some places, to 4, 5, and 2 fathoms, renders the navigation unsafe for large ships.

PALKOWITZ, or **PALKOWITZ**, a vil. Austria, Moravia, 12 m. from Freyberg with a church. **P 1692**

PALLANZA, a town Italy Piedmont, div. and 82 m. N. Novara, cap. prov. of same name on Lake Maggiore, nearly opposite to the Borromean Islands. It is well built, has several

handsome churches, an ancient massive tower used as a belfry, two convents, a college or gymnasium, in which both the royal and communal schools are accommodated, an infant school, a townhouse, surrounded by arcades, resting on granite pilasters, a theatre, barracks, and a well-arranged prison has manufactories of cotton and starch, a large silk-mill, driven by steam, four saw-mills, dye-works, and a trade in corn, horses, and cattle. Pop. 3000. The town, about 86 m long, by 16 m broad, is generally mountainous, and not very fertile but has quarries of white marble, and of the finest granite in Italy.

PALLASKENRY, a small town in Ireland, co and 12 m. W Limerick, near the Shannon with a Methodist meeting-house and school, and, at a short distance E., a handsome parish church. Pop. 618.

PALLER, a town in Hindostan, Ajmer, on an affluent of the Leroy 40 m S E. of Jaipur. It is a place of considerable commercial importance. Chinese and other European manufactured goods, are imported to a large extent.

PALLING-HEATHES HMA, par Eng Norfolk 905 ac. Pop. 467.

PALLIBER ISLANDS, a group of four isles. Low Archipelago, 8 Pacific Ocean, about lat 15° 47' S., lon 146° 30' W. One of these islands is 15 m long, by 9 m broad another is 21 m long, by about 4 m broad. They were discovered by Captain Cook in 1774.

PALLO, or **RABBIT ISLAND**, a small isl. Indian Archipelago, S. of Sangir Island; lat 8° 2' S., lon 128° 50' E. about 8 m in circumference, inhabited and cultivated.

PALMA, several places, Spain.—1 An episcopal city cap. of Majorca, 180 m S Barcelona, lat 39° 34' N, lon 3° 45' E.

to the bottom of a bay 12 m in length and 16 m in breadth. It is built in the form of an amphitheatre, with a S W exposure, and enjoys an extremely mild and salubrious climate. It is surrounded by a compact built wall, 66 ft thick, with 15 bastions, and 8 gates S fronting the sea and 5 facing the land, on which side the wall is gilt with a dry ditch, while a dense bray protects the seaward portion. The streets are straight and narrow, but a few of them are broad paved, and provided with footpaths laid with tiles. There are several squares.

The Cathedral, which towers majestically over all the other public buildings, was founded by James the Conqueror. The principal facade is very modest and simple, having no other ornament than two beautiful towers at its angles and the portal on the S. side is full of Gothic enrichments. Probably there is not in Spain a finer structure in the Gótico style than the Exchange, begun in 1426 by Guillermo Sagrera, a Majorcan architect, and finished in 1448—with its 13 portals its octagonal towers at the corners and its beautiful and grandiose balustrade surrounding the cornice, and marking the dome. Not less magnificent is its interior divided into three aisles, by lofty and elegant columns, with spiral flutings. The palace of the governor, and the townhouse, deserve particular notice, neither than that the last contains a gallery with portraits of eminent natives of the island. There is a tolerably commodious theatre, a small and old-fashioned theatre, seven parish churches, one of which, St. Michael's was formerly a mosque, a great number of convents, some of them now converted to secular uses and several charitable institutions, and a general hospital founded in 1466 by Alonso V. Palma is also well provided with educational institutions, as well in fact as Madrid itself. Among these may be specified the Academy of Medicine and Surgery, another called the Chirurgical, a normal school, for primary instruction in all kinds of secondary instruction, where the higher branches of education are taught; a national school, and the Colegio de Sanlepe, for poor young men who devote themselves to the church. There is also a school for orphan girls, as well as two others for females, the Colegio de Gracia, founded in 1510, for the education of young ladies of rank, and the Colegio de Puritas, founded in 1808, also for females. In addition to these there are about 80 private schools. There are also two public libraries, and a museum of paintings. At the centre of the port rises the celebrated mole, which, running out from the bastions facing the S., advances into the sea about 900 yards, and on each side of it is the ship-building yard, where numerous hands are employed in the construction of the swift Italian vessels, so well known and highly prized in the Mediterranean. On the E. of the mole is an

open dock, which is, however, rapidly being filled up. On the S. side of the bay there is a fort on St. Carlos point, whose guns command a wide range. Two lighthouses stand at the entrance of Porto Pi, a narrow road, where the largest frigates might anchor in small number however. About midway between the city and Porto Pi, is seen the castle of Silver or an embankment, surrounded by pine groves. The Lascruia, which is spacious and admirably constructed, has the best anchoring ground in front of it.

The industry and manufacture comprises linen, woolen, and silk tissues, soap, glass, brandy thread, besides a number of oil and flour mills. Navigation and mercantile traffic are in a state of considerable activity, and its large importations from the peninsula and foreign countries contribute Palma the mart of the whole island. On an average of the two years, 1844 and 1845, the number of vessels with their tonnage, entered was—vessels, 585 tons, 50,498. Departed—vessels, 517 tons, 48,882. It is said that Melindur conquered Majorca, at all events, it is certain that he brought 8000 Romans from Spain to colonize it. Pop. 40,480.—2 A town, Andalusia, prov and 20 m S W Cordova, in the angle formed by the confluence of the Guadalquivir. It is well built, and has broad, well paved streets, a courthouse, jail, granary, endowed school, church, four hermitages, several convents, an hospital and a promenade. Two flour-mills fourteen oil-mills two potteries, a manufactory of soap, five flourmills, and three brick works and a trade in grain, oil, cattle, fruits, and timber. P. 5598.—3 A vil prov. Maracaibo, 5 m. E Cartagena, on a plain, near the Mediterranean; with a primary school a church, a seminary, and three hermitages. Pop. 2701.

PALMA, two ins. Naples.—1 Prov Lavoro 4 m S E E. Ada, with three churches, two convents, an old castle, and an hospital. Pop. 6786.—2 Sicily, prov and 14 m S E. E. Girgenti. It is well built, has several churches and curves on a brick trade in almonds and capers. To the W. of the town crowning the summit of a hill stands the castle of Monte Churo a large square keep with outworks. P. 8400.

PAI MA (La), the most N W of the Canary Islands; lat. (N point) 28° 51' 18" N. lon. 17° 53' 50" W (a). 38 m. N. to S., by about 15 m broad, cap. Sta Cruz de la Palma, one of the principal ports. The island consists for the most part of elevated mountains, generally covered with snow and furrowed by deep ravines, and in the N the coast is high and precipitous. The climate is agreeable and healthy but the island is subject to the ravages of the locust and to volcanic eruptions by which a new mountain was formed in 1558. In the N. of the island is the largest, though long dormant crater, said to be 18 m. in circumference, and about 2664 ft deep. The highest part of the mountain is the peak called Roques, 8426 ft. above sea-level. Besides a small quantity of grain, La Palma produces abundance of wine, fruits, almonds, leamy wax, and some silk, with which are manufactured taffetas, black cotton, and plain ribbons. Although more populous than Lanzarote and Fuerteventura, it is equally poor and miserable, so that at least three-fourths of the inhabitants live generally on the root of the fern. P. 53,880.

PALMA (La) a town in Spain Andalusia, prov Huelva, 80 m W Seville, on the Penedera and the Mulajar. It has four squares, a public granary townhouse, two primary schools, and a parish church, with a fine tower 100 ft high. Pop. (agrimensal), 3680.

PALMA (NUOVA), a town, kingdom of Italy gov and 56 m N E. Venice. It is regularly fortified, has four churches, an hospital, theatre, barracks; several silk-mills, and a considerable trade in silk. Pop. 2800.

PALMA (Sta Cruz de La) the cap. of Isl. Palma, one of the Canaries. It lies on the E. coast, in a spacious bay 7 to 10 fathoms in depth, and was declared a free port in 1852. It contains several monasteries, a townhouse, an hospital for the sick, a founding hospital, a chair of Anatomy, several schools, and two public fountains. St. Salvador's, the parish church, is a large, handsome, and fine-ornamented building, with three towers. The people, who are very industrious, are employed in weaving the cloth of the country, but they are especially distinguished for their silk tissues. Almost all the girls in the town are engaged in the manufacture of ribbons, stockings, parras, corals, and gloves of silk. The sweetmeats of Palma are also much esteemed; and in ship-

building, its carpenters are famed for the strength, swiftness, and beauty of their vessels. Pop. 5641.

PALMAR, or **LOMAN DE SAN JUAN**, a tn. Spain, prov. and 3 m. S. Murcia, with a public school, a parish church, and a cemetery. Near the entrance of the town stands a handsome Tuscan bridge across a canal for irrigation. Pop. (aggravational), 5561.

PALMARIA, a small isl. Mediterranean, Gulf of Genoa, belonging to Sardinia, lat. 44° 5' N.; lon. 9° 15' E., only about 3 m. long, by little more than 1 m. broad.

PALMAR.—1. Numerous small isl. Brazil, particularly three in prov. Rio-de-Janeiro, one in the bay of that name, a short distance E. of the Governador, a second in the Araripe, on the outside of the same bay, and the third in the B. of the prov., off the coast of dist. Paraíba. They take their name from the palm-trees which cover them, and give them a graceful and picturesque appearance.—2. A river, E. Africa, Zanzibar. Sailing into the Indian Ocean opposite Pemba Island.—3. (Carr.) A headland, W. Africa, Guinea coast, having a fine light lat. 4° 23' S. lon. 7° 44' 15" W. (n.) The harbor here, which is the only one on the coast between Sierra Leone and Beaulieu, is spacious, secure, and protected by a reef from the swell of the ocean.—4. (Lan.) A small isl. New Granada, prov. and 15 m. N.W. Buenaventura, in Choco Bay, on the Pacific, lat. 4° N. discovered by Pizarro in 1527.

PALMAR (Lan.) city, N. E. coast, lat. Gran Canaria, and one of the Canary Islands until 1838, when Sta Cruz de Tenerife was raised to that dignity. It is overlooked by two lofty hills, and extends E. to W. by the small river Gulanque, here crossed by a handsome bridge of three colored arches. Las Palmas is the largest, most beautiful, and most populous town in the Canaries and enjoys a perpetual summer, the range of the thermometer being only from 68° to 91°. In general the houses are large and of elegant and solid architecture, with terraced roofs and balconies and the streets, especially in the N. and more modern part of the town, are straight, remarkably neat and clean, and beautifully paved. There is a fine alameda in the centre of the city and three outside the walls. Among the public edifices, the most remarkable are the townhouse, theatre, the museum in the buildings formerly occupied by the Inquisition, an insignificant cathedral a gigantic mole 584 ft. long by 84 ft. broad, begun in 1811, three parish churches and a chapel of ease, six convents, only one of which still retains its original decoration, ten hospitals, a magnificent general hospital, an hospital for elephants an orphan asylum, a founding hospital, a Magdalen asylum, a poorhouse, an academy of design, two schools for primary education, an institute for the higher branches of education, with a rector and twenty professors and masters, a seminary conducted where the classics, theology and other sciences are taught, and which is resorted to from all the islands, a library and musical society, boards of commerce and agriculture, and two libraries. Outside the town are a B. Catholic and a Protestant cemetery. It has manufactures of hats, equal to those imported from England and France, cloths, soap, delft, woolens, carpets, glass, leather linens, flour, and sailing-tackle but the principal branches of industry are ship-building, fishing, and navigation, and some trade with the neighboring islands, the West Indies, and Europe, to the last of which wine and cochineal, now extensively cultivated, are exported. It was declared a free port in 1852. Pop. 17,382.

PALMEIRAS, a tn. Brazil, prov. Rio-de-Janeiro, near Curitiba. It has a parish church, and some trade in cattle, and the other produce of the district, and near it is a mine of quinquaver. Pop. (district), 3150.

PALMELLA, a tn. and par. Portugal prov. Alentejo, on a height, 16 m. S.E. Lisbon. Pop. 3590.

PALMER'S LAND, Antarctic Ocean, S. from the S. Shetland Isles, lat. (approx.) 68° 25' S.; lon. 57° 55' W.

PALMERSTON, par. Ireland, Dublin; 1518 ac. P. 1521.

PALMERSTON, an isl. S. Pacific; lat. 18° 0' 4" S.; lon. 165° 10' W. discovered by Cook, June 1774.

PALMERSTOWN, par. Ireland, Dublin; 1880 ac. P. 238.

PALMI, a tn. Naples, prov. Calabria Ultra L., on the Gulf of Gioja, 21 m. N.E. Reggio. It is pretty well built; with eight spacious and regular streets, surrounding it is a handsome square, the centre of which is sheltered by a fine colonnade. It has three churches, and manufactures of silk. Pop. 4016.

PAIMOLI, a tn. Naples, prov. Abruzzo-Citra, 18 m. S.W. 11 Velle, on a lofty mountain. It is defended by a castle, and has a convent. Pop. 1480.

PALMYRA (the Father of Sculpture), a ruined city, Syria, past, and 130 m. N.E. Damascus. The ruins, apparently of buildings of the first three centuries of the Christian era, extend S.E. to N.W., in an unbroken line, nearly 1½ m. They comprise ruined colonnades, temples, and arches, and a wilderness of columns. The most remarkable object, however, is the building supposed to have been the Temple of the Sun. It is 124 ft. long, by 47 ft. wide, in a good style of architecture, having a portico of 140 columns. About 300 yards W. S.W. of this edifice, there is a richly-ornamented archway and 13 Corinthian columns, in the best style. The singular sepulchral towers of the Neopropolis occupy the gorge and part of the slope of a hill some are tolerably perfect, but the greater part are quite in ruins; they have generally flat roofs but in some few instances they terminate with a stone pyramid. Amidst these venerable remains of a polished people, appear, at present, about 80 mud cottages, whose wretched inhabitants obtain a scanty subsistence by cultivating a few detached spots whereon to feed their goats and sheep.

PALMYRA, an isl. Pacific, lat. 2° 50' N. lon. 162° 25' W. It is flat, uninhabited, of coral formation, about 14 m. long, E. to W. and 7 m. broad including a lagoon partly around, but there is no fresh water.

PALMYRA, numerous places, U. States.—1. A vil. New York, 105 m. W. by N. Albany with four churches, two academies, fifteen schools, two carriage-factories, and several mills. P. 3000.—2. A vil. and post township, Michigan on the Raisin with a distillery and several mills. P. 628.—3. A township, Ohio, 153 m. N.E. Columbus. Pop. 1829.

PALNACHIE, a vil. Scotland, co. Kirkcaldy, on the Urr 6 m. S.E. Castle Douglas. It has a quay, which admits vessels drawing 17 ft. water at spring, and 19 ft. at neap tides, and carries on a considerable trade, importing coal, lime, &c., and exporting grain to the extent of 1000 quarters annually and other agricultural produce; cattle, timber, bark, &c. Pop. 309.

PALO two places, Naples.—1. A vil. and com. prov. Principato-Citra, 9 m. E. Campagna, near a small lake of same name. It contains a convent. P. 8060.—2. A vil. and com., prov. and 11 m. S.W. Bari, on a height; with two convents, and manufactures of soap. Pop. 6041.

PALO (Ed.) a scattered vil. Spain, prov. and 2 m. from Malaga, with two primary schools, and a church. Agrilure, tanning, fishing, and tin-mining employ the inhabitants. P. 1846.

PALOAN BAY, a bay, Indian Archipelago, N.W. coast of Mindoro. It lies S.E. from Calatagan; is of a semi-circular form, with an entrance 4 m. wide, and extending N. inland 3 m. It affords excellent shelter in the N.E. monsoon, and is convenient for obtaining supplies when passing through Mindoro passage. There are no dangers in the bay, sounding at entrance, 45 to 50 fathoms; best anchorage in N.E. extremity, in 14 fathoms, 1 m. from the beach.—(Nautical Magazine, 1859).

PALONZ, a vil. Hungary, Hither Thems, co. and 7 m. from Ungvár, with a handsome church, a B. Catholic church, and tin-mining. P. 1804.

PALOMAR (San Antonio del), a tn. Spain, Catalonia, prov. and 4 m. N. Barcelona. It has a small, dark church, a Moorish building, a courthouse, a public and several private schools, a steam-factory for spinning, another for weaving cotton, a third for flax-spinning, and several other mills, and six thickets. It is an increasing and industrious place, finely situated, and well supplied with water. Pop. 4545.

PALOMARES-DEL-CANERO, a tn. Spain, New Castile, prov. and 5 m. N.E. Comarca, with a parish church, a handsome townhouse, a prison, and a primary school. Manufactures of woollen cloth, a dye-works, and a trade in corn and olives. Pop. 1860.

PALOMBARA (anc. Comore), a vil. Papal States, 19 m. N.E. Roma. Pop. 3094.

PALOONSHAH, a tn. Hindoostan, prov. Hyderabad, 30 m. N.W. Rajahmundry; lat. 17° 56' N., lon. 81° 5' E. It is of considerable extent, but contains mostly of stone huts; and has a fort of little strength. Writings weapons of various kinds, including muskets, spears, arrows, &c., were at one time manufactured here to a considerable extent.

PALOS, a to., in Chilean Bay, coast, S. side of False Bay, lat. 54° 54' S, with a small Dutch fort and some trade. Pop. above 2000. —The bay formed by a promontory jutting to the coast of the island, is about 18 m N to S, with a width of 6 m.

PALOR, a to., in Spain Andalusia, prov and 4 m S R. Huelva, near the mouth of the Tinto, in a bay of the Atlantic. It is well built, has a parish church and primary school; and a harbor, interesting as the spot from which Columbus sailed on his first voyage to America, August 8 1492. Pop. 848.

PALOTA several places Hungary particularly:—1 A vil Thither Thaus, on Gmünd, 36 m W N W Arad with a R. Catholic church, an elementary school and some trade in cattle, sheep, swine, poultry and fruit. P 8667—2 A vil, co. and about 7 m. from Fecht with a Protestant church P 1434—3 A market, co. Veszprém, 12 m. W Székesfehérvár, with two churches a synagogue, and a handsome chateau; manufactures of woollen cloth, and two mills Pop. 4994

PALE, a to., in Spain Catalonia, prov and 19 m E S E Girona, surrounded by ancient Moorish walls, flanked with towers. It has a church hospital courthouses, and primary school, several flour-mills, and a trade in corn and cattle. Pop. 1898

PALTE or YAMCHO, a lake Tibet 60 m S W Lhasa. It is nearly circular about 100 m in circumference, and inclosed a large island, on which is a Buddhist temple.

PALU or PALOO, a to., in Asia Turkey pers. and 55 m N Diarbekir, 1 bank Maras, the E. arm of the Euphrates. It is badly built contains 1000 families 400 Armenians, and 800 Musulmans. The former are employed either in manufacturing or in general trade 300 looms are worked producing cloths from native cotton and there is a dyeing establishment and a tannery

PALUD (St.), a vil France, dep. Valenciennes, 14 m N W W Orange, near 1 bank Rhone. Pop. 3190

PALLDI, a to., in Naples, prov Calabria-Città, 4 m S E Rossano with two churches Pop. 1770.

PALZZA, a to., in kingdom of Italy gov. Venice prov. Friuli in a mountainous district, almost entirely surrounded by the Julian Alps, 84 m N N W Udine, with four churches and several mills Pop. 1360

PALXI two places, Hungary—1 (Ménester), A vil co. Bihar between Tokay and Debrecen in a fertile district with a Protestant church, and a trade in corn. P 1165—2 (Kozsán) A vil near the former, with a considerable trade in agricultural produce. P 1868

PAMAKANSA, a small dist. and its cap. or nominally, a kingdom, lat. Madaga, forming the central portion of the island between Betsampan and Bengallang. It is reigned over by a prince, with the title of Parumabahan but in reality forms a Dutch dependency of the province of Soerabaya, in Java. The soil is dry and not very fertile. Pop. 18,000—The towns contain a palace of the prince and a fine mosque and carried on a good trade. Pop. 6000.

PAMALANG—1, A to. and river, Java, N coast, prov. Tegal, 75 m W Samarang—2 A cape, 12 m E N E above town.

PAMAOEKAN, a to., Java, prov. Krawang on river of same name, 77 m E by S Batavia, a few miles from the sea, formerly the capital of a principality. Cape Pamaoekan lies 14 m N W from the town.

PAMBEE, par. Eng. Hants, 2150 sq. P. 644.

PAMBUI, a to., in Brazil, prov. and 240 m N W Bahia, 1 bank São Francisco, with a parish church and primary school, inhabitants chiefly engaged in cultivating cotton and raising cattle, near it are mines of silver and copper. P 1900

PAMEL, a vil and com. Belgium prov. Brabant, on the Dender 12 m W Brussels, with two breweries, and a trade in cattle and agricultural produce. Pop. 3840.

PAMIERS (Latin, Agomer), a to., France, dep. Ariège, on the Ariège, 12 m N Poux. It is a cheerful looking place, composed of generally well built houses and of spacious regularly-formed streets, in the see of a bishop and has several fine squares, a cathedral, surrounded by a Gothic octagonal tower of bricks, seven other churches, a Carmelite convent, *général de justice*, episcopal palace, and a very large hospital, a court of first resort, a communal college, diocesan seminary, secondary ecclesiastical school, and agricultural

Vol. II

society manufactures of serge, nails, flax, paper, and liquors; worsted, cotton, saw filling and flour mills and a trade in corn, wool, horse-hair, history du Pop. 5920

PAMIR, or PAMIR, an elevated plateau, Central Asia, independent Tertiary between Shukaban and Tarzhad extending N to the khamsa of Kolan, and S to the mountains of the Hindoo Kooch. The highest point about nearly 18 000 ft. above sea-level, and its centre is the lake of Shikol, from which the Oxus or Amoo takes its rise. The plain extends six days journey on every side of the lake, and is inhabited by nomadic Kirghizes, who feed large herds of cattle on its short but rich pasture. The climate is very cold, the snow never disappearing even in summer from its ravines, and the inhabitants covering their whole bodies even heads and faces, in sheepskins, to defend themselves from its severity. No grain is grown, and the use of it as flour to be made into bread is not known by the inhabitants who subsist on flesh and milk.

PAMLI(X) SOL VD, a shallow lagoon, U States, S E coast, N Carolina. It is 80 m long, 6 to 80 m wide, and separated from the ocean by long, narrow, sandy islands. It receives the Tar and Neuse, and on the N communicates with Albemarle Sound.

PAMPANGA, a prov. Phil. pinas ul Luzon N W Manila, bounded, N by Pangasinan W Zamboanga S Bulacan and E Nueva-Elija length, N to S about 60 m breadth about 45 m, cap. Bacolor. It is the richest and most beautiful prov of the Philippines and has sometimes been surnamed New Castile. It consists of an upper and a lower portion, the former occupying the interior and the latter continued from it to the sea. Upper Pampanga being traversed only by mountain torrents, is indifferently watered and therefore remains, for the most part, in a state of nature, covered by forests the haunts of bears and tigers. Lower Pampanga is remarkable for its fertility and has even a superabundance of moisture, many parts of it being regularly laid under water during the rainy season and exposed to almost continual inundations. Its principal river, which bears the same name rises in the mountains of Caravalla, and after receiving the Dimalay Bagongon, Sator and Opan, joins the Quingoa a little below Cadaval. It is a navigable throughout the greater part of its course, and contains gold among its sands. The principal productions are rice, cotton, tobacco, and indigo. Fruits are very abundant, and of excellent quality. The inhabitants are very industrious, and though chiefly employed in agriculture, display much skill in weaving various textures, and manufacturing different articles of earthenware. Pop. 177 045

PAMPARATO, a vil and com. Italy Piedmont, dep. Cuni prov. S. Mondovì, with a large church palace, a small castle flanked by a tower manufactures of utensils and other articles in wood and a trade in chestnuts and cattle. P 2646.

PAMPAS, a name given to some of the vast plains of S America particularly—1 The plains stretching from Terral Fango, N through Patagonia and part of La Plata, over 27 of lat. or 1900 m, where they meet El Gran Chaco (see CHACO) and from the E slope of the Andes, to the shores of the Plata and Atlantic area 1 620 000 sq m, an extent so great that while their N margin is bordered by palm-trees, their S extremity is almost continually covered with ice or snow. Immense portions of this great plain, particularly N of the Colorado, and extending for 1000 m E to W are nearly as level as the sea, and without a stone, or any other object, except a solitary tree (the *ambo*, which in some vast distances rising like a great landmark. (See PATAGONIA and PLATA) La—2, (del Surazambó) vast plains in the N E of Peru, covering an area of about 60,000 sq m. They are traversed from S to N by the Ucayali and though in parts almost without trees, are in others covered with immense and magnificent forests. Several parts of them have been brought under cultivation, but in general they remain in a state of nature, and are reamed over by various tribes of Indians.

PAMPATAR, a to., Venezuela, S shore Margarita, settled well situated for commerce, and a free port.

PAMPALUNA (Spanish, Pampaluna, French, Pampaluna) a city Spain, cap. modern prov. and ancient kingdom of Navarre, 197 m N E Madrid, on the skirts of the Pyrenees, 1 bank Arga. It has always been regarded as the principal fortified place in Navarre. The citadel, which is separated from the town by an esplanade, and which is occu-

78

structed after the model of that at Antwerp, contains sufficient accommodations for 1000 or 1500 men, and the number of soldiers necessary to garrison the town, in the present neglected state of the fortifications, would be 7000 to 8000. For the most part, the streets are straight, well paved, and clean. There are three large and three small squares, a courtyard, theatre, baths, a circus for bull fights, and several fine promenades. The fortifications are absolutely supplied by a magnificent aqueduct, nearly 15 m. in length, carried through tunnels for upwards of 5 m., and in one portion over 97 arches, 35 ft. in span, and 65 ft. in height. Although the cathedral which is small dates as far back as 1597 its facade, in the Corinthian style, was built in 1783. One of the chapels is dedicated to Ignatius Loyola, who was wounded here in defending the citadel, and who conceived, during his recovery the idea of founding the order of Jesuits. There are four parish churches, also a number of convents, most of them used as barracks, military hospitals, or schools. Pampeluna has always been distinguished for its love of letters and zeal in the promotion of education. It abounds in schools, normal, theological, primary, and advanced, and can boast also of an academy of design, as well as a medical and surgical college. The charitable institutions consist of a large general hospital, a house of mercy, and a foundling and lying-in hospital in one. Besides agriculture, which is limited to a small extent of territory, the only branch of industry worth mentioning is the manufacture of linens, two works of this description having been recently established. In 1512 it was besieged by the Duke of Alva, and capitulated after only two days resistance, again, in 1571 it surrendered to the army of Francis I. In 1608 the French took it by stratagem and held it during the war till it was blockaded in 1813 by the Duke of Wellington after the battle of Vittoria. Pampeluna was again occupied by the French in 1838. Pop. 15,715.

PAMPER, a *tu*. Cashmere. See **PAMPER**.

PAMPILHOZA, a *tu* and *py* Portugal, prov. Beira-Baixa, N. from Thomar, near the Salto, an affluent of the Zesere. P. 9462.

PAMPISFORD par Eng. Cambridge 1500 ac. Pop. 559.

PAMPLEMOUSSES, a *vil* Mauritius, near a stream of same name, about 7 m. from Port Louis. It has a R. Catholic church, a tomb erected to the memory of Paul and Virginia, and an excellent botanic garden.

PAMPLONA — 3 A prov. and in Spain. See **PAMPLONA**. — 3 A *tu*. Nav. (Iruña), dep. Boyona, cap. prov. of same name, on an affluent of the Ebro, in the beautiful plain of Euzkadi. Santo 125 m. N. N. E. Boyona. It is large and regularly built, has a college, several churches, and numerous convents, one of which is gorgeously decorated. Pop. 3200. — The prov. area, 1845 sq. m. produces cotton, corn, sugar, tobacco, and wheat and in the mountains are mines of gold, silver and copper. It sends two senators and four deputies to the Congress, and twelve provincial deputies to the Cortes. Pop. 59,610.

PAMPOLUX, a *tu*. France dep. Deux-Sèvres, 14 m. N. N. E. Melle. Pop. 1350.

PAMPUR, or **PAMPUR**, a *tu*. Cashmere, 1 hank Jaldim, across which there is a bridge of several arches. 7 m. S. E. the city of Cashmere, lat. 34° 5' N. lon. 74° 46' E.; in a level tract of great fertility where superior cotton is grown. It is surrounded by luxuriant orchards and gardens, and contains a bazaar, and two Mahometan shrines.

PAMUNKEY a river U. States, rises in the Blue Ridge, Virginia, where it is formed by the union of the N. and S. Anna; flows S. E. and after a course of about 80 m., unites with the Mattaponi in forming the York, an estuary branching off from Chesapeake Bay.

PANAGUR, a *tu*. Hindoostan, prov. Gundwana, dist. and 11 m. N. Gurrah. It is an ancient place, containing several Hindoo temples.

PANAMA, a city New Granada, on S. coast, Isthmus of Panama, at the head of the bay of same name. Lat. 9° 37' N. lon. 79° 30' W. connected by railway with Chagres on the Caribbean Sea. It lies on a tongue of land, extending a considerable distance out to sea, and the principal streets extend across the peninsula from sea to sea. The buildings, mostly in the old Spanish style, are of stone, generally substantial and the larger have courts or patios. The public edifices comprise a beautiful cathedral five convents, a nursery and a college. The harbour is protected by a number of islands a little way from the mainland, some of which are of considerable size, and highly cultivated. There is good anchorage under them all, and supplies of ordinary kinds, including excellent water, may be obtained from most of them. It has some trade in native produce with S. America, and exports hides, shells, coffee, and gold-dust to Europe, but is now chiefly important as a station on the route to California, and for the mails between Great Britain and various ports on the Pacific Ocean. The site of the old city of the same name is about 3 m. E. from that of the present. The former was sacked and reduced to ashes by the buccannier Morgan. P. p. consisting of a mixed race, about 8000.

PANAMA (DAY OF). See **PANAMA** (ISTHUS OF). **PANAMA AND DARIEN** (ISTHUS OF) a dep. New Granada, called Istmo, forming the connecting link between N. and S. America, and separating the Atlantic from the Pacific Ocean. lat. 7° 20' to 9° 40' N. lon. 77 to 81 W. It has

the shape of an arc curving round E. to W. for about 300 m. with a breadth varying from 50 m. to 70 m. and presenting its convex side to the Caribbean Sea, while its concavity is occupied by the large bay of Panama. This bay which, at its mouth is 125 m. across, and which penetrates inland about 120 m. has, for the most part, low and swampy shores, noted for their unhealthyness contains numerous islands, particularly on its E. side, where the group, called Peric Islands, covers about 400 sq. m.; and is indented by several harbours, of which those of Panama in the N., and San Miguel in the E., are the best known. The bay is usually tranquil, and not disturbed by much wind or sea, but destructive tempests occur

usually occur in it; and during the rainy season W winds send in a heavy swell, the tide rises 2 to 4 fathoms. On the N or convex coast, the most remarkable indentation is the Gulf of Darien, near the E. extremity Port Escoose, and in its immediate vicinity, Caladonia Bay, and Limon or Navy Bay, a little E. of Otago. The latter is very little known. In approaching the N coast from the Atlantic, a range of lofty heights is seen stretching apparently in an unbroken chain, at a short distance from the shore and it was long supposed that the barrier thus presented was characteristic of the whole isthmus, and precluded the idea of forming great thoroughfares across it to accommodate the traffic of the two oceans. More correct information has been recently obtained, and it is now understood that a large part of the isthmus consists of low hills, valleys, and flat or undulating plains, watered by considerable streams generally well covered with excellent timber and capable of yielding all the more valuable tropical productions in tolerable abundance. The minerals also are important, and include, in addition to gold which long was, and is supposed might still be, worked to advantage, rich veins of iron and copper. One great cause of the ignorance which has prevailed in regard to the isthmus was the jealousy of its Indian inhabitants, who, acting upon the maxim which experience proves to be but too well founded that the white man's foot is the Indian's grave, have ever been on the watch to prevent a regular survey of the country and have even been so successful in deterring private adventures from exploring it, that to the more E. part of it no white man has yet (1858) crossed directly from sea to sea. The Atlantic coast of the isthmus was discovered by Christopher Columbus in 1502, but the comparatively short distance across it was not ascertained till 1813, when Don Juan de Balboa, governor of Darien, at the head of a party of which Francisco Pizarro was one, set out on an exploring expedition and from the top of a hill, obtained the first view of the Pacific. In 1698, a Scotch settlement, projected by Patterson, the founder of the Bank of England was formed near the Gulf of Darien on that part of the coast where the names of Caladonia Bay and Port Escoose still mark its locality. Great hopes were entertained of it by the nation; but owing partly to the hostility of the Spaniards, and partly to the jealousy of the West India proprietors, seconded by the English Parliament, it proved a failure, and brought ruin on many families. This settlement, which had almost been forgotten, is apparently about to be revived under better auspices, and on a scale of magnificence which its early founders, however sanguine would scarcely have ventured to anticipate. From recent survey it has been ascertained, that Port Escoose is an excellent harbor, and Caladonia Bay an ample and commodious roadstead and to meet the wants, not of any individual state, but of the whole mercantile world, it has been proposed to cut a gigantic canal, stretching from ocean to ocean, from Port Escoose, in a S.E. W. direction, to the mouth of the Savanna, in the harbor of Darien, communicating with the Gulf of San Miguel (which see). The dimensions suggested, 140 ft. wide at bottom and 80 ft. deep at low tide, are amply sufficient for the passage not only of the largest vessels which now traverse the ocean, but the still larger vessels which have recently begun to be spoken of, but as yet exist only in idea. The summit level, only 150 ft., consists of a narrow ridge of hills, gradually sloping down into a plain on either side the materials to be cut through, though hard, are peculiarly favorable to the security of the banks, the estimated expense is \$12,000,000. Meanwhile the isthmus has become a thoroughfare, and a communication between the oceans has actually been accomplished, by a railway carried in a S.E. direction from Limon or Navy Bay to Panama.

PANAMGOODY, a tn. Hindoostan, Carnatic, dist. Tonoreilly, 31 m. N. N. E. Cape Comorin lat. 8° 31' N. lon. 77° 58' E.

PANANICH or **PANANICHAN**, a vil. Scotland, co. and 99 m. W. Aberdeen, l. bank Dee with chalybeate springs, the water of which greatly resembles that of the German Saline and is very efficacious in gravel, and is scorbutic and scrofulous affections.

PANAOA, a small ill., Philippines, in lat. 10° N., in the Baroque passage between Leyte and Mindanao.

PANARAO, a tn. Naples, prov. Principato-Ultra 9 m. N. W. Avellino; with a church and four chapels. Pop. 1800

PANARIA [anc. *Hyperia*] one of the Lipari Isles, Tyrrhenian Sea, off N. coast, Sicily greatest length, E to W. 3 m. breadth, 2 m. It is rocky and of volcanic formation but in several places very fertile, and produces a good deal of olive-oil. It has a small harbor on the S. Pop. 300.

PANARAO a river, India, rises in Mount Omosa, N. slope Annapurna, in S. of duchy Madras, flows easterly N. N. E. past Bumporito and Tumbal, skirting the W. frontier, and enters the Pegu States and at Bonduzo divides into two branches the one of which flowing E. joins the canal of Canto above Ferrara, while the other forming the main trunk, flows N. and joins the bank Po, after a course of nearly 90 m. It becomes navigable at Bumporito.

PANAROFKAV, a tn. in Java, Strait of Madura, prov. and 17 m. S. W. E. Bascet, on a bay of its name, and in the midst of fertile rice fields. Behind it rises a volcano which continually emits smoke. It is a point whence many ferry to the island of Madura.

PANAU, or **PUNAU** a river, India, runs among the Nussahdroog hills in the E. of the Mysore enters the Carnatic, flows S. E. past Kuningary and Koyota, and after a course of about 250 m. falls into the Bay of Bengal at Cuddalore.

PANAY an ill. Indian Archipelago, the most central of the Philippines, lat. 10° 35' to 11° 50' N.; lon. 123° to 123° 19' E., lying on the S. W. Mindoro, on the E. Leyte, and on the S. E. Negros, from which it is only separated by a comparatively narrow channel. It is nearly in the form of a triangle, with its angles pointing respectively S. W. N. W. and N. E. and is about 110 m. long by 100 m. broad. It is mountainous particularly in the N. E. and S. W. and has a remarkably fertile and well-watered soil maintaining a large number of inhabitants, who are patient, industrious, and intelligent, and have made considerable progress in civilization. In the interior are large forests of the finest timber, the haunts of buffaloes, wild oxen, stags, and boars, as well as numerous birds of the richest and most varied plumage; the plains, generally under good cultivation, raise large crops of rice, maize, sugar, tobacco, coffee, cane, cotton, and pimento. The numerous streams are well supplied with fish, and their mouths are frequented by great numbers of crocodiles and caymans. Excellent turtle are found along the coasts. Many factories have made considerable progress, and a particular species of tissue called *manungg* and *pinat*, are remarkable both for the beauty of their designs and their rich and varied colours. They are woven mostly by the females. The men employ themselves chiefly in agriculture, fishing, hawking timber, and in manufacturing oil and sugar. Many also are employed in commerce, in the prosecution of which they make distant voyages. Panay is divided into the three provs of Capiz, Iloilo and Antique. Iloilo is the capital P. 462,380.

PANBAN a vil. Hindoostan in Malesseeran, opposite the mainland the usual place of landing and embarkation for pilgrims.

PANBIDDIP, par. Scot. Forfar 5½ m. by 2 m. P. 1373.

PANCALIERI, a tn. Italy Piedmont, div. and 8 Turin, l. bank Po with an ancient church, communal schools, an hospital, the remains of an old castle, and a trade in corn, millet, wine, and hemp. Pop. 2840.

PANCHSHIR, a valley, Cabool 8 m. Hindoo Koosh, about 70 m. long, 8 W. to N. E., breadth, usually 1½ m., and somewhere exceeding 2 m. watered by a stream of pure name. Though naturally sterile, and so industriously managed has been brought under cultivation and so industriously managed, maintains a larger population which, confined to within 46 m. of its entrance, is estimated at 7000 families, or about 40 000 individuals. The staple products are furnished by the orchards and mulberry plantations. The inhabitants are of lawless and marauding habits, which they exercise not only on passing strangers, but in perpetual feuds among themselves. The rugged surface of the valley is dotted over with small fortified dwellings, rendered strong both by nature and art.

PANCORBO [*Pons Aquilonis*] a vil. Spain, Old Castile, prov. and 23 m. N. E. Burgos on the high road to France, between two lofty hills, about which the river and the road between them, form for about the space of 1 m., a very striking and picturesque gorge. That on the E. runs into the Pyrenees, on that on the N. there are remains of two castles, both destroyed during the wars of independence, though sub-

consequently repaired, and ultimately laid in ruins the one in 1828 by the Duke of Angoulême, the other in 1835, by the Carlists. Besides two parish churches, the town contains a courthouse, a prison, a beautiful public fountain, a primary

cultivated provinces in the Philippines; and produces abundant crops, particularly of rice and indigo, both of which are exported in considerable quantities. Almost all its streams contain more or less gold among their sands, and yield good returns to those employed in washing them. The inhabitants are very industrious, and excel in many species of manufactures, particularly jewellery, cabinet work, and ship building. In the last flour mill has long been celebrated; and vessels of from 600 tons to 700 tons have been built at the port of Lingayen which is the capital. Pop. 221,805.

PANGBOURN, par Eng Berks, 1295 ac. Pop. 800.

PANGHU an isl. China Sea. See PACADORA ISLANDS.

PANGONG a salt lake, W. Tibet, 100 m E. Loh 14,000 ft above sea-level, length, 100 m breadth 3 m to 4 m area of basin about 7000 sq m. Its water is a strong solution of bitter salt.

PANGONTARAN a small isl. Sooloo Archipelago, lat. 6° 9' N lon. 120° 30' E, about 10 m long, by 4 m broad. It consists of an entire bed of coral, with scarcely any appearance of soil, yet it abounds with coconut trees. Though destitute of good fresh water it is said to be well stocked with cattle,

goats, and fowls and to be well inhabited. It was formerly settled by the Spaniards.

PANIAN or POKAY a seaport m. Hindoostan Malabar coast, 36 m S by E. Calicut lat. 10° 45' N lon. 76° 38' E. It has numerous mosques. A large portion of the population are fishermen. The principal exports are teak-wood, coconuts, rice, and rice, the chief imports, wheat, pulses, sugar, salt, and opium.

PANOCOLO a vil. Naples prov. and 12 m N W Naples, at the foot of Mount Massimo. Pop. 3250.

PANIPUT a tn. Hindoostan, prov. and 60 m S by W Delhi lat. 29° 22' N lon. 76° 51' E, 4 m circumference, and formerly surrounded by a brick wall. It imports salt, grain and cotton cloths. Principal export, coarse sugar which is produced in the vicinity.

PANISIERES, a tn. France, dep. Loire, 20 m N E. Montbrison. Napkins and table-linen are made. P. 1160.

PANJAR a territory Hindoostan. See ICHMAR.

PANJAKO — 1, An isl. off W coast of Malay peninsula, Bay of Lager, E of Selangor and Jember, which it greatly resembles in its features, and from which it is separated by a channel, studded with rocky islets, lat. 26° N lon. 98° 30' E. greatest length 30 m mean breadth about 4 m — 2 A small coral isl. N W coast, Java, bay and 8 m N Bentam. It yields coconuts, bananas and rice. Pop. 256.

PANJIM or New Goa a tn. India. See GOA.

PANKEH, a vil. Denmark, dioc. Holsten, 17 m E. Kiel with a castle, built by the prince of Hesse-Darmstadt. P. 940.

PANKOTA (O and U), two nearly adjacent vils., Hungary, ca. and about 10 m. from Arad the former occupied by Walschians, and the latter by Germans. They contain several handsome mansions have a fruitful soil, and produce excellent red and white wine. Pop. 7300.

PANKOUR, a small isl. Strait of Malacca lat. 4° 16' N lon. 100° 58' E. It produces sugar cane, rattans, trees yielding oil, dammar and crooked timber.

PANNAH, a tn. Hindoostan prov. Allahabad, 37 m S.E. Chatterpore lat. 24° 45' N lon. 80° 15' E. with many handsome temples, several large tanks, and on the margin of the largest, the ruins of a palace.

PANNAL, par Eng. York (W. Riding) 4520 ac. P. 1376.

PANORMOS, two ports, Greece the one on the N. of Isl. Mycon, and the other in Isl. Skiathos.

PANSEN, Bismarck, or Bismarck, a tn. Bohemia, circle Leitmeritz, r. bank Pulmitz, 45 m N by W Prague. It contains two castles, two hospitals, and a saw-mill, and has manufactures of hosiery and paper. Pop. 10066.

PANTAR a tn. India Archipelago. See HANUMANTAN.

PANTAR a tn. India Archipelago. See HANUMANTAN.

PANTAR a tn. India Archipelago. See HANUMANTAN.

PANSEBO VILLAGE AND FARM — From House of Captain's Village Photograph on Engraving.

school, and seven flour-mills. The French army in passing, left a garrison here in 1813, but siege was, by the Duke of Wellington's orders, had to both forts with successful result. The one was taken by storm and the other capitulated. P. 1137.

PANCRAE (87) a par. England, co. Middlesex, forming an extensive portion of the N. division of London and including the suburbs of Camden town, Kentish town, Emsay town port of Highgate, &c. and the terminus of the London and North Western, and the Great Northern railways. Area, 2716. Pop. 166,956.

PANCRAEWEEK or WEEK ST PANCRAE, par Eng. Devon 3722 ac. Pop. 460.

PANCRAZ a vil. Bohemia, circle Brannau, near Grafenstein, with a church. Pop. 1020.

PANCRAZIO (RAN), a vil. and com. duchy and 2 m W Parma, with several fine villas, a primary school, a type-foundry, and a trade in corn, wine, hemp, and silk. P. 3270.

PANCROVA a market in Hungary military dist. Temesvár, and 6 m E.N.E. Belgrade. It has a great number of good houses, occupied chiefly by Greek merchants, and German artists and artisans, contains a R. Catholic and a Greek church, a mathematical and a girls' school has manufactures of best root sugar &c. and carries on an important trade with the Turks. Pop. 11,710.

PAND, a vil. Hungary. Hitler Danube, ca. and 24 m from Perth with a Protestant church. Pop. 1078.

PANDACA a vil. Philippines, al. Luzon, prov. Tondo on an island, formed by the Isang above Manila. It is a substantial place in a fertile district has a powder magazine and raises large quantities of hay for the supply of the capital. Pop. 4622.

PANDINO a tn. and com. Italy. Lombardy prov. and 8 m. N.E. Lodi. It is surrounded by an old wall formerly defended by a castle, of which only four towers now remain. It has two churches. — The district abounds in fruit, and is famous for its peaches. Pop. 1756.

PANER, or BANER, a vil. Palestine. See BANIAH.

PANFIELD, par Eng. Essex 1475 ac. Pop. 275.

PANISSENE, or PANISSENE an isl. Indian Archipelago, off S.E. extremity Celebes, lat. (S. and) 5° 30' S lon. 122° 30' E. about 60 m long, by 16 m broad. Part of it is very low flat, and covered with fine trees, it is also, in general well peopled.

PANGARAN a vil. al. Ceylon on the Mahavalliganga, 88 m S.E. Candy, inhabited chiefly by the Lakkas, a trading class of Mahomedans. It is a place of considerable extent.

PANGASIAN a prov. Philippines, Isl. Luzon, N W Manila bounded, N by prov. Bataan, E. the mountains of Igozina and the river Agno, S. prov. Pangasinan and Zamboanga, and W the Gulf of Lingayen. It is one of the best-

Osney, is called Panter Strait. It extends N. W. E. and S. S. W. about 24 m. It is somewhat rather intricate, and is little frequented by English navigators.

PANTEAGUE par Eng. Mouthmouth 3454 ac. P 2849
PANTELLERIA (anc. *Castro*), an isl. Mediterranean, 60 m. E.S.E. Cape Bon in Africa, and 80 m. S.W. coast of Sicily, on which it depends, forming part of dist. Girgenti; length, N to S, 9 m., breadth, 6 m. It is mountainous, and of volcanic formation, and fertile. It has two coavers, the one very warm and the other so cold, that a vessel of water placed in it is said to freeze in a short time. There are several good roads. The principal town, Pandisella, is built in the form of a semicircle around a harbour, which has an entrance almost closed in with rocks, and is defended by a castle, used as a state prison, and for other forts. Pop. 5000.

PANTICOBA, numero-medieval baths Spain prov and 40 m. N. Huesca, 14 m. N.E. Jaca, near the village of Lantousa. It is one of the highest inhabited spots in the Pyrenees, being about 8000 ft. above the sea.

PANTIN (Latin *Pandion*), a vil. France, dep. Seine, on the N. E. of Paris, and properly one of its suburbs. It is surrounded by fine villas and gardens, and has a parish church, manufactures of covers and hydraulic lime, worsted and cotton mills, and gypsum quarries. Pop. 2941.

PANTON par Eng. Lincoln 1990 ac. Pop. 182.

PANTURA, a maritime village, Leyton, W. coast, 12 m. S. Colombo, a place of considerable trade with a custom-house, courthouse, Wesleyan chapel and school. P. 1109.

PANUCO an ancient town Mexican Confederation, state Vera Cruz, beautifully situated on a river of same name, 18 m. W. Tampico. It is subject to occasional inundations, and now contains only about 4000 inhabitants, but formerly when occupied by the Huasteco, must have been of vast extent and importance, as its ruins can be traced over an area of many miles. Many of these ruins are of great interest, and indicate a high state of civilization.

PANWELL, a Hinduostan prov. Amrughal, 27 m. E. Bombay lat. 18° 59' N., lon. 74° 18' E. on the Pan, 7 m. from its mouth. It is a pretty large place, carries on a considerable trade, and is the grand ferry to Bombay.

PANWORTHILL and **PANWORTH** par Norfolk 1902 ac. Pop. 476.

PAO, a river, Venezuela, rises among the mountains, bordering Lake Valencia flows S.E. and joins the bank of the total course, 120 m.

PAO D'ALBO a town Brazil prov. and 40 m. W.S.W. Pernambuco, on bank Capiziba, with two churches. It exports cotton. Pop. 1400.

PAO D'ASACON (*Sugar Loaf*), an enormous rock of pure granite, devoid of vegetation Brazil rising up abruptly from the sea to the height of 600 ft. W. mile entrance into the Bay of Rio-de-Janeiro. It is of conical shape, and forms a most conspicuous landmark. On the summit on which this rock stands is the fort of São-João, which crosses its fire with that of the forts of Villegallão Santa Cruz, and Lago, so as to defend the passage into the bay.

PAOLA, or **PAULA**, a town Naples, prov. Calabria-Citra, on a height near the shore of the Tyrrhenian Sea, 15 m. W.N.W. Cosenza. It is defended by a citadel, and two towers or forts has three convents, two hospitals, and manufactures of woollen, silk stuffs, and earthenware. Pop. 4800.

PAOLO DE LOANZO (San) *San Lorenzo*
PAOLO (San), two towns, Naples—1 Prov. Capitanata, 8 m. N.W. San Severo, on a hill; with a handsome palace, two churches, two oratories, and a convent—2 A. to. Naples, prov. Lavara, 1 m. S.E. Avia. Pop. 2505.

PAOU, **PAU**, or **SANDEWOOD**, one of the larger Feejee Islands; lat. 17° S., lon. 173° W., greatest length, E.S.E. to W.N.W. 96 m., average breadth, about 25 m. It has a rugged surface, with numerous volcano peaks, and also several deep bays well covered with wood, one of these called Sandelwood Bay forms a large segment of a circle about 6 m. in diameter, and though surrounded by large reefs, has ample space and excellent holding ground for anchorage. The ground around it is low, but immediately behind rises in lofty and picturesque peaks; one of which, called Corobato, is 2000 ft. high. The bay takes its name from the large supplies of excellent sandalwood which were at first obtained from it, but are now exhausted. Pop. about 15,000.

PAPA a market in Hungary Thaur Danube, co. and 87 m. N.W. Veszprém. It contains a Greek cathedral church, a handsome edifice surmounted by two towers, built of immense blocks of stone, two monasteries, two castles, an oil mill and a new the latter a large and handsome structure, with fine gardens a courthouse in which the county meetings are held alternately with Veszprém; a Protestant college, a R. Catholic gymnasium and an infirmary. The principal manufacture is stoneware. There is a mineral spring in the neighbourhood. Pop. 15,000.

PAPA-SVENA, one of the Shetland Islands, Scotland, at the entrance of St. Magnus Bay. It is 2 m. long, by 1 m. broad, flat and sandy but produces good barley, oats, potatoes, and pasture, inhabitants chiefly fishermen. Pop. 82.

PAPA-STROMA, one of the Orkney Islands, Scotland, N.E. Stromas, 8 m. in circumference and remarkably fertile. It contains the ruins of several ecclesiastical buildings. Pop. 28.

PAPA WESTRAY one of the Orkney Islands Scotland 1½ m. N.E. Westray It is 3½ m. long, by 1 m. broad, and fertile. Pop. 540.

PAPAGAI or **PAPAGAYOS**, a group of islets, Brazil, off S.E. coast, par Rio-de-Janeiro between Capas Erio and Busio. Vessels find good shelter among them, its water from 20 to 30 fathoms deep.

PAPAGAYO a Gulf and volcano, Central America. The Gulf is formed by the Pacific on the coast of Nicaragua, extending 115 m. from Point Desolado to Point Santa Catalina, and stretching inland in some places 45 m. The volcano is situated between the Yarcito and the shore of the Gulf.

PAPAL **SILABER**, or **STANZA** of the **GERMAN** (Italian *Stato Pontificio*, *Stato Romano*, or *Stato della Chiesa* French, *Etat Pontificain*, or *Romaine*, or *Etat Papal* or *de l'Eglise*, German *Kirchen Staat*), a state, Italy lat. 41° 15' to 43° N., lon. 10° 50' to 14° E. bounded (before its partial absorption into the Kingdom of Italy) N. by Austria Italy E. the Adriatic, S.E. Naples, S.W. the Mediterranean W. Tuscany and N.W. Modena. Its shape is very irregular N. to S. from the mouth of the Po to Cape Circello its length is about 280 m. greatest breadth, Ancona on the Adriatic to Civitavecchia on the Mediterranean, 140 m. least breadth, from the N.E. corner of Tuscany to the Adriatic coast, nearly on the parallel of Porto, not more than 13 m. area including the isolated territories of Benevento and Pontefructo included by Naples and excluding the small territory of San Marino, which forms an independent republic 11,974 sq. m. For administrative purposes, the Papal States were divided into nine provinces, seven legations (legations) and 20 delegations (delegations) the names of which, with their area and population are exhibited in the following table—

| LEGATIONS AND DELEGATIONS | Area in sq. m. | Pop. 1868 |
|---------------------------|----------------|-----------|
| 1. HOUSE OF CHURCH | 1,885 | 310,535 |
| 2. ROMA | 977 | 349,423 |
| 3. FERMA (Napoli) | 760 | 219,756 |
| 4. NETI | 616 | 203,216 |
| 5. AVENNA | 109 | 105,412 |
| 6. URBINO | 1,747 | 257,800 |
| 7. VALLAUR | 17 | 17,417 |
| 8. DELEGATIONS | | |
| 9. ANCONA | 201 | 110,116 |
| 10. ASINARA | 51 | 10,018 |
| 11. CARACCHI | 751 | 98,418 |
| 12. FERMA | 529 | 104,116 |
| 13. ASOLI | 146 | 86,317 |
| 14. PERUGIA | 7,091 | 210,516 |
| 15. ASOLI | 254 | 121,463 |
| 16. PERUGIA | 267 | 107,018 |
| 17. ASOLI | 618 | 130,070 |
| 18. ASOLI | 278 | 28,141 |
| 19. ASOLI | 546 | 141,500 |
| 20. ASOLI | 382 | 10,510 |
| 21. ASOLI | 382 | 10,510 |
| Area of water and rocks | 11,077 | 2,509,114 |
| Total land area | 11,974 | |
| Urban area | 15 | |
| Total area | 11,989 | |

The coast-line measures about 870 m., of which 210 m. are on the Adriatic, and 100 m. on the Mediterranean and on both

ness is generally flat and marshy, unbroken by a single bay of any magnitude, and not possessed of any tolerable harbours except those of Ancona and Civita-Vecchia. The interior is traversed in a S.E. direction by the central chain of the Apennines, which enters it from the N.E. of Tuscan, and quits it on the N. of Naples, and sends several low ramifications both to the E. and W. The loftiest summits of the chain within the Papal States are in the S., where Mount Vettore, near Castelluccio, rises to the height of 8188 ft. Mount Sibilla, 7210 ft. and Mount Pannico, 6225 ft.

Rivers.—The Apennines forming the great water-shed of the country, divide its waters nearly in equal portions between the two seas—the Adriatic receiving its share by the Po, which flows nearly the whole of the S. boundary the Volano, the Po di Primaro, Lucco, Metauro, Metauro, and Ronco united, Marone, Foglia, Metauro, Metauro, Metauro, and other smaller streams and the Molituro, receiving its share partly by the Marta Sano and tributaries of the Garigliano, but more especially by the Tiber. None of these rivers, except the Po, and the Tiber, is of much navigable importance. They are however exceedingly useful wherever the country is sloping or undulating by the use made of them in irrigation where the ground becomes low, and spreads out into extensive flats, the advantage is lost, and the rivers become the worst scourges of the country by the pestilential swamps which they form. All the lakes of any consequence are on the Mediterranean side of the water-shed. The largest are the Fucinus or Trasimene, the Bolsena, and the Bracciano. After these come Vico, Pila de Lago, Albano and a number of lagoons along the coast.

Geology and Minerals.—The whole of the S.E. part of the Papal States, extending along the shores of the Adriatic from the mouth of the Po S. to Rimini, and inward as far as Bologna and Ferrara, consists of low flats forming a continuation of the diluvial gravels and alluvials which cover the plains of Lombardy. These are succeeded by a belt of tertiary strata, chiefly tertiaries, sandstones and marls which line the whole of the Adriatic shore from Rimini past Ancona to the mouth of the Tevere. This belt, which has its greatest width inland to the W. of Ancona, and between the towns of Utrino and Pesaro, is succeeded W. by a still narrower belt belonging to the upper extremity of the secondary formation, and composed of cherty and other calcareous rocks, which, being older than the other tertiary belt, dip in an E. direction beneath it. Farther W. and still lower in the series, is a large tract almost entirely occupied by the Jura limestone, extending W. from near Ancona to the Tiber and then N. to the vicinity of Borgo San Sepolcro in Tuscany. To the W. of this, a small zone of the tertiary formation already mentioned again intervenes, but soon gives place to a very large development of volcanic rocks. These, composed principally of trachyte, basalt and tuff, stretch from Aquapendente in the N. to the S. of Velletri, extending without interruption between the Lakes of Bolsena and Bracciano, and W. from the capital to the shore. At other parts of the shore the sedimentary rocks and deposits already mentioned again appear—the Jura limestone at the S. extremity where it forms the promontory of Civita or Civitella, the trachyte at Civita Vecchia, and the trachyte and tertiary marls both at Nettuno and the mouth of the Marta northwards and the diluvial and alluvial deposits on both sides of the mouth of the Tiber and to a still larger extent in the Pontine Marshes, and along the coast from Nettuno to Fregene. The only metal which has yet been discovered, in sufficient quantity to justify the working of it, is iron. The other minerals are the stone of Tolfa (so excellent as to have tempted the government to make a monopoly of it) sulphur, asphalt, rock-salt, several varieties of marble, pumice-stone, bitumen, asphalt, alabaster, gypsum, clauis, coal, fuller's earth, and potter's clay. In several localities, the rock crystals and garnets are found.

Climate and Vegetation.—In all the districts traversed by the Apennines and their ramifications, the air, though occasionally keen, is pure and healthy, but, in the lower grounds, pestilential vapours overcharge the atmosphere, and malaria prevails to such a fearful extent, that large tracts have been almost converted into uninhabitable deserts. To the N. of the Apennines, the winter temperature is far lower than on the S. slope; and hence, in the former locality, owing more to this cause than to any deficiency of summer heat, oranges,

lemons, and similar fruit, cannot be successfully grown in the open air, while in the latter locality winter is little felt, the most delicate fruits grow freely and vegetation is never so completely checked, as not to give signs both of life and vigour. The influence of the sirocco is often severely felt on the S. coast, and would be almost insupportable, were it not tempered by breezes from the sea and the mountains. The soil is, in general, possessed of great natural fertility, and, when cultivated with the best skill and industry, produces heavy crops of ordinary grain, maize, pulse, hemp, and flax. Unfortunately, however, large tracts of the richest land owing to their unhealthiness, are left almost in a state of nature, to be roamed over by flocks of sheep, tended by a few shepherds, whose wan and sickly hags indicate the kind of atmospheric influences to which they are exposed. Other extensive tracts—to which certainly, the same objection does not apply—does they are the healthiest in the country—are necessarily excluded from regular cultivation by the stony and rugged nature of their surface. Tracts of this description lie along the central ridge of the Apennines and their loftier ramifications, but fail not to yield profitable returns from the verdant pastures and magnificent forests which generally clothe them. After deducting all the land which, owing either to its nature or the unhealthiness of its climate, cannot be cultivated it has been estimated that the proportion of arable land remaining does not amount to one-fifth of the whole and even of this, no small portion is occupied with vineyards, olive yards, orchards, gardens, &c. It is somewhat therefore surprising that, in ordinary years, notwithstanding the genial warmth and natural fertility, the grain produced barely suffices for the consumption the wonder rather is that it does not fall considerably short of it, since all rural operations are performed in the most sluggish manner, with the rudest implements. Three crops of wheat are often succeeded by one of maize, and another of pulse, and then, as if to complete the scourging process, hemp or flax is taken. The same sterility is displayed in the very end of the process, and instead of the threshing-machine and the flax-press, the grain, when harvested is usually trodden out by cattle, and winnowed by the hand. Both the vine and the olive thrive well, but, though cultivated to a considerable extent, they are too carelessly and unskillfully prepared to create much foreign demand. A valuable product, to the management of which greater attention is paid and from which considerably more profitable returns are obtained is silk which is produced in great abundance, particularly in the N. and along the shores of the Adriatic, and of such excellent quality, that some of it, as that of Fossombrone and Bologna, is not surpassed in Europe. Among subsidiary crops, confined for the most part to particular localities, may be mentioned rice, on the plains of Bologna and Ferrara, tobacco, in the neighbourhood of Ancona, comarion, anise, and maize, in the legations of Forlì and Ravenna and sugar-cane, indigo, and cotton, near Terracina. Besides ordinary fruits, the orange, citron, and pomegranate are common, the date, also, is occasionally met with. Live stock are numerous, but, for the most part, of inferior breed. Sheep and goats appear to be best valued for their wool and fleece than for their milk, from which great quantities of cheese, some of excellent quality are made. Great numbers of swine are reared on the coast of the forests. Game is not abundant and, though the coast is teem with fish, and the number of mackerel-days in the Roman calendar creates an extraordinary demand for it, the fisheries are so much neglected, that the chief supply is obtained by importation. The honey obtained from bees is partly exported, but the wax is scarcely sufficient to meet the consumption.

Manufactures and Trade.—Manufactures have made very little progress, and are chiefly confined to a few domestic articles of primary necessity. Among these may be mentioned the coarse velvets, hangings and linen dresses of Bologna, the silks of Bologna, Rome, and Perugia, woollens and hosiery of the two last towns, artificial flowers, perfumery, leather, paper, screens of tawny, confectionary, stoves and other hats, wax-tapers, beads, crucifixes, false pearls, jewellery, moccasins, &c. Trade is very much hampered by the want of navigable streams, canals, and good roads and more especially in regard to the last, by the numerous banditti which are allowed to infest them. The Apennines forming a sep-

ration between the N and S, and the transport of goods across them being practicable only in particular places, and on the backs of mules, prevents the free interchange of commodities; and hence it is not unfrequently happens that the same article which forms an export in the N figures as an import in the S. In addition to some of the above manufactures, the exports are timber, charcoal, potash, oil, silk, alum, sulphur, gall nuts, wax, cork, tallow, bones, rags, anise, almonds, pears, apples, and works of art, the imports are colonial produce, cattle, provisions, including salt fish, metals, chiefly iron from Elba and lead from Great Britain, woolen and cotton clothes, drugs, &c. Accounts are kept in crowns or scudi—484 divided into 10 pash, and again subdivided into 100 baiocchi. The Roman lb is nearly equal to 12 oz. avoird., the rubbo or bushel varies so much in the different legations, that it is almost impossible to specify it; the worle of wine is 18 gals, and that of oil about 3½ less the foot is 11-73 English inches the palm or palm 3½ of a foot, or nearly 38 inches, and the miliaio 1620 yards, or about 1½ less than the English. The Roman foot is about 7½ English miles.

Government.—The government is of a very peculiar description, not easily reducible to any of the generally recognized forms though in its leading feature, it is an elective monarchy in which the hereditary principle is so completely ignored, that all heirs of the sovereigns body bear the brand of illegitimacy. The sovereign, who bears the name of Pope or Pape, must be at the time of his election, a cardinal-priest, and in chosen for life by his fellow cardinals, who constitute what is called the Sacred College, and must all be priests. The hierarchical principle thus displayed is not confined to the higher offices but is continued throughout the whole series—the priestly being an indispensable qualification for the tenure of any civil office, though in regard to some, the priestly character seems to be more nominal than real, as individuals regarded as priests while in office, are sometimes not truly in orders and again become laymen when the office expires. The number of cardinals, in imitation of the evangelists sent out by our Saviour is limited to 70 and all vacancies must be filled up by the Pope absolutely without control though, in practice, the number is seldom complete. When the Pope dies, the Cardinal Chamberlain occupies his place till the ninth day when the funeral takes place. On the tenth day, the cardinals meet in secret conclave, and are shut up till a majority of two-thirds are agreed as to a successor. Even then the election is not determined, as Austria, France, and Spain have each a veto on one candidate. In the event of their exercising it, the whole process must again be gone over and full scope is given for all kinds of intrigue. The government is administered by boards or congregations, presided over by a Cardinal Secretary of State, as prime minister. The principal congregations are the Camera Apostolica or Treasury presided over by the Cardinal-Chamberlain, the only minister who holds office for life; the Cancelleria or Chancery—presided, the Cardinal-Chancellor, the Dataria, for ecclesiastical benefices the Rota Governor, for municipal police the Congregazione de' Monti, for public debt, the Sacre Consulta, for the political and civil administration of the provinces, the Segreteria or Court of State, and the Sacra Rota or Supreme Court of Justice. The camera of Rota is presided over by a governor who has very extensive powers, and can inflict capital punishment: the provinces, or Legatione and Delegations, by legates and delegates, each seated by a council, consisting of the gonfaloniers of the chief town, and from two to four councillors, nominated by the Pope for five years. The delegations are subdivided into districts (discreti) headed by governors, who act as judges without appeal, in all civil cases under 500 scudi, and subject to appeal in minor criminal cases. The appeal is, in the first instance, to the Collegio de' Rota, which is composed of the delegates, two assessors, an ordinary judge, and a member of the Consistorial Council, and has primary jurisdiction over the whole delegation. Above the Collegiate Courts are three superior Courts of Appeal. One is the Segreteria at Rome, another sits at Bologna, and the third at Macerata. A still higher Court of Appeal is the Sacra Rota, the limit of whose jurisdiction is not very easily defined, as it once extended over the whole Christian world, and is still very extensive in all

countries where the Pope's authority is generally recognized. It is composed of twelve prelates, six of whom are appointed by the Pope, two by Spain, and one each by France, Germany, Tuscany, and Milan. The system of law is extremely defective since it scorns all the modern improvements in jurisprudence, and refuses to recognize any codes but the Canon Law and Corpus Juris. The exact amount of the Papal revenue cannot be ascertained. A great part of it is ecclesiastical, of which no account is exhibited. The secular revenue is estimated at about 21,000,000. About one half of it is derived from customs, excise, and monopolies, all levied on principles which enlightened states have long abandoned. About one-third is derived from taxes on land. Of the remainder, the largest item is furnished by the lottery. The army in ordinary times, amounts to about 14,000 men, of whom 4400 belong to two regiments of Swiss. A few gun-brigs and smaller craft, and two steamers, compose the Papal navy.

Church, Education, &c.—The ecclesiastical establishment, exclusive of Rome, numbers 9 archbishops, 60 bishops, 13 abbots, the number of secular priests is 3500 of regulars or monks 10,000, and of nuns 8000. In point merely of numbers, the thing is evidently overdone, but in point of efficiency for any purpose, religious or moral, the whole machinery is defective in the extreme, and often proves a fruitful source of the vices which it is professedly intended to prevent or correct. The R. Catholic religion is here, of course, completely dominant, and no subject of the Pope is allowed to profess any other at least if he has been baptized. The non-performance of this rite in the case of the Jews, is probably one of the reasons why an exemption is made in their favor, and they are allowed to have eight synagogues. Education is wholly in the hands of the clergy, and makes a good show upon paper the educational institutions including eight universities two primary at Rome and Bologna, and six secondary bishops schools in all the districts rich enough to support them and communal schools, one of which ought to be in every commune. In point of fact, however, instruction is actually provided for not more than one in fifty of the population, and is, for the most part, as very meagre, as to give good ground to suspect that its real object is not so much to educate as to supplant education. Thus, at all events, as its general result, and the state which it creates to be the purest and wisest in Christendom, has the most ignorant, the most lawless and the most dissatisfied subjects.

History.—The Papal States as comprising the nucleus of the last and greatest of the ancient empires which swayed the world, have a history full of interest: but their existence under the very anomalous form which they now present, dates only from the middle of the 8th century. Long before this period the bishop of Rome had acquired vast ecclesiastical influence, and under the name of Pope, claimed to be the supreme visible head, and spiritual guide of Christendom but his temporal possessions lay within a very narrow compass, and he often suffered from the visits of foreign aggressors, who treated him with very little ceremony. One of the most formidable of these was Attila, King of the Lombards. To rid himself of his presence, Stephen II, who was then Pope, and perfectly aware of the majority of the Greek emperor to assist him, applied to King Ispah, who not only warmly espoused his cause and expelled the Lombards, but in 755 granted to the Pope and his successors a right in perpetuity to the territories from which he had expelled them. The Lombards, who were very much dissatisfied with Pagan's donation no sooner learned his death, than they collected an army, and laid siege to Rome. Charlemagne, Pagan's son and successor hastened to the rescue, and not contented with renewing his father's grant, considerably enlarged it. At first the Pope had been contented to hold his temporal possessions under the Greek emperor whose sanction was requisite to confirm his election, and in whose name justice continued to be administered, even in Rome. But this yoke, which was never borne meekly, was, by a series of dexterous manoeuvres and intrigues, gradually loosened and ultimately thrown off. Stephen V, on his election in 816, found himself in a condition to decline his confirmation by the emperor, either of the East or West. His ambition had now five courses, and all the numerous claims which virtually placed the Pope at the head of all sovereigns as their lord paramount, not only in spiritual, but also in tem-

poral things, were shamelessly advanced. Such claims, notwithstanding the ignorance and superstition which prevailed, could not fail to elicit forth strenuous opposition, and accordingly a fierce struggle took place between the pope and the emperor of Germany, and was not terminated for centuries. But when it did terminate, the Pope was victor, having not only succeeded in obtaining a recognition of his most arrogant pretensions, but in adding largely to what was called his patrimony. The temporal supremacy which the Pope had asserted was not allowed to remain a dead letter, and in almost all the despotic successions which arose in Europe, he was seen acting sometimes as the selector, but often as the self-constituted umpire, disposing of crowns at pleasure, and as called his purpose at one time absorbing subjects from their allegiance to their sovereign, and at another excommunicating them for refusing to yield it. The Pope, however, did not always prove victorious in the struggles which it provoked or even escape unscathed. Several of the individuals raised to the papedom were stained with monstrous vices, and thereby greatly weakened its moral influence; others, to advance the interests of nephews or bastards, were not over-scrupulous in carving kingdoms for them out of St. Peter's patrimony, and even disputed elections took place, which threw the rival popes into the hands of sovereigns, who took care not to espouse their cause without stipulating for compensation. In this way the papal sovereignty, though apparently at its very zenith, had been greatly weakened, and in the beginning of the 15th century, symptoms of decay were strongly manifested. Councils had hitherto been the ambulatory tools of the popes, but the Council of Constance boldly asserted its independence and showed a determination either to share in the supremacy of the Pope, or to question its reality. Subsequent to this event, several popes instead of increasing their temporal possessions, found it difficult to maintain them in them. The most important additions were made by Julius II, who regained Ravenna and several other territories which had been lost, and moreover added Bologna. He died in 1513 and was succeeded by Leo X, whose pontificate, though in some respects the most splendid on record, proved the most disastrous to the papacy. During the 16th century the Reformation commenced and ultimately delivered the better half of Europe from spiritual thraldom. The Pope thus not only lost some of the richest sources of his revenue, but was compelled silently to withdraw several of his most arrogant pretensions, and in regard to temporal authority to descend from his lofty eminence as king of kings to the comparatively humble station of sovereign of the Papal States. Since then there has not been much in the history of these States deserving of particular notice. The most memorable events have occurred towards the end of the last, and since the commencement of the present, century. In 1757 the French seized the N. legations and annexed them to their Cisalpine Republic, and in 1810 the whole of the Papal States were incorporated by Bonaparte into his kingdom of Italy and the Pope and several of his cardinals were carried off to France, where they remained under surveillance till Bonaparte's downfall in 1814. The Pope again possesses his temporal sovereignty, though obviously by a very precarious tenure. He could make no official resistance against foreign aggression, and he was recently (Nov. 24, 1848) driven from his capital by civil war. He has returned, but only to occupy a position most humiliating to any sovereign, and scarcely more damaging to his lofty pretensions.

PAPANTLA, a vil. Mexican Confederation, state Vera Cruz, 150 m. N.E. Mexico, E slope Cordillera. It forms the centre of a very rich agricultural district, but owing to the heat and insalubrity of the burning climate, is inhabited almost entirely by Indians, and is only occasionally visited by traders from the coast. The fertility though now thus deserted once contained, at the distance of about 8 m. from the village a magnificent city, the massive ruins of which still exist, and indicate its ancient splendor. Among other remains are those of a beautiful pyramid, one of the most perfect of the old Mexican structures. It is built of sandstone, beautifully squared and jointed, and faced by sand stone, which appears to have been selected. Measures 150 ft. on every side at its base and consists of seven stories, gradually narrowing, and accented by a stair of 57 steps, each 1 ft. high, and terminating at the sixth story. The seventh story

appears to have been the altar on which sacrifices were offered. Trees, plants and vines, which, in course of time have sprung from the joints and crevices of the structure, add much to its singular appearance.

PAPABÉ, a vil and par. Brazil, prov. Rio-Grande-do-Norte, on a lake of same name, 4 m. S. Natal; with a church and a primary school. Inhabitants employed in fishing, and in making various articles of export.

PAPASQUIARO, a tu. Mexican, dep. and 62 m. W N W Durango, 1 bank Culiacan. Pop. about 5000.

PAPENBERG an vil. Japan dividing the harbour of Nagasaki into an outer and a middle portion. Though not above $\frac{1}{2}$ m. in circuit, it is rendered very conspicuous by its lofty height, and presents a remarkable appearance, being planted with a row of trees from its base to its summit.

PAPERBURG, a tu. Hanover, gov. Osnabrück, near 1. bank Ems, 23 m. S.E. Emden with a church, many fixtures of saddleth and cordage, several distilleries saw-mills, and extensive building-yards. Pop. 6250.

PAPENDRECHT a vil. Holland, prov. S. Holland 11 m. S.E. Rotterdam, on the Merwede, with a church and school. Pop. (agricultural) 1888.

PAPHOS, a seaport in Cyprus. See PAPHOS.

PAPOLLE a vil. kingdom of Italy, prov. Venice, prov. Padua, 5 m. S.S.W. Adria, near 1. bank Po, with a church three cruciform and a trade in corn and cattle. Pop. 2600.

PAPPEHHILM, a tu. Bavaria, Middle Franconia, c. bank Altmühl, 33 m. S.E. Anspach; with a handsome chateau of the Counts of Pappenheim, a church, synagogue, Latin school and manufactures of stone and earthen ware, mezzobau pipes, cutlery and needles. At Solenhofen, about 1 m. distant, is the finest quarry of lithographic stones yet discovered. P. 3163.

PAPPELWICK par. Eng. North 5250 ac. P. 807.

PAPRA, a small in Lower Saxony, prov. Soltau, 12 m. W by N. Flieders or Pamp. lat. 6° 15' N. lon. 9° 15' E.

PAPRADNO, a vil. Hungary, Higher Danube on Trent schin, about 24 m. from Silein. It has a 1. Catholic church and quarries of good building stone. Pop. 2377.

PAPUA, **PAPUANIA** or **NEW GUINEA**, a great island immediately S. of the Equator and N. of Australia, between the Asiatic Seas on the W. and the Pacific Ocean on the E., and connecting the Indian Archipelago on the one side, with the Polynesian groups on the other. The general direction of the island is W. N. W. and E. S. E. Its most E. point is Cape of Good Hope, in lat. 0° 19' S. Its most W. point, Cape Salu, opposite to Salawatti Island, from which it is separated by the Straits of Galloway, and about 100 m. S.W. from Cape of Good Hope, is in lon. 131° 2' E. The most S. and also most E. point of the island appears to stand in lat. 10° 24' S. lon. 161° 12' E. The continuity of the land quite so far perhaps, is not yet fully established yet recent surveys have shown that the greater part of the coasts laid down in our maps as Louisaude on the authority of Bougainville (1768) really belong to New Guinea, which has been traced actually from Heath Bay in lon. 150° 4' E., above two degrees beyond, or E. of Cape Rodney hitherto regarded as the S.E. extremity of the island. The length of Papua from Cape Salu to its S.E. extremity is about 1500 m. Its breadth varies greatly, deepest at the W. end of the island dividing it into narrow peninsulas, but from lon. 156° to 146° E. it is compact, and has a breadth of from 200 m. to 400 m. Its area may therefore be estimated, in round numbers, at 250,000 sq. m.

Discovery—As this vast island is as yet known chiefly through the reports of navigators, who have sailed along its shores, and as no Europeans have explored its interior, or penetrated above a mile or two from the sea-shore, and that only at a few points, we have no such acquaintance with it as would justify the attempt to describe systematically its natural features and characteristics. The fragmentary knowledge of these matters actually attained, may be reproduced most advantageously as regards both the mutual relation and juxtaposition of particulars, in connection with, or appended to, the account of the series of maritime discoveries from which it is derived. According to some writers, the first discovery of New Guinea was made in 1511, by the Portuguese navigator, Albuca, but it is more certain that in 1573, G. de Menezes, on a voyage from Goa to the Molucca Islands, was driven by a tempest to these shores. Yet the Spaniards claim the discovery for Alva de Seaveria, who, in 1583,

touching upon, and gave his name to the N coasts about the Cape of Good Hope.

Bavaden's Land extends about 100 m. from the Cape of Good Hope, when the coast turns nearly S at the commencement of a deep bay. A little S. of the promontory thus formed, stands the village of Doré, a point where recent voyagers have gathered much of their information. Cape D'Urville about 200 m. E. by S from Doré, forms the E termination of the great bay which has also a depth S. of 200 m., and is named after Geelvinck, who ran along its eastern shores in 1705. At the bottom of this bay, lat. 4° 28' S., lon 138° 40' E. New Guinea is reduced to an isthmus not above 20 m. wide, and which may be considered as dividing the island into two portions: the E, tolerably compact, and extending through 10° of longitude, and the W 5 in length more broken and peninsular. A great inlet, discovered and examined by M. Ulcer in 1791, enters the portion from W to E about 100 m., and reaches within 40 m. of the W shores of Geelvinck's Bay. If we pass from the Cape of Good Hope round Cape Sialé (the most W point) we come upon the coast discovered by Vinck in 1693, and crossing the mouth of M. Ulcer's Inlet we arrive at the projecting land seen by Pool in 1636. Thence, following a very incurvated coast in its general direction E, we reach Kuyt's Land (1678, which leads to the S. side of the isthmus already mentioned at the bottom of Geelvinck's Bay. This completes the arc of the W and deeply indented portion of the island. Beyond or E of the isthmus, the E coast trends S.E. about 150 m., then turns S and W an equal distance to Cape Vaalkeho (False Cape). A great portion of this tract was traced by the Dutch ship *Duyfhuys* in 1606. E by S from Cape Vaalkeho at a distance of 200 m. is the line of coast N of Torres Strait, which appears to have been first seen by Bampton and Ait in 1793. Again at a distance of 200 m. further E, the shores of New Guinea were seen by Bougainville in 1768. The opposite coast at this (the E) end of the island was discovered by J. Burceux in 1785. The coast adjoining these to the N W was seen by Dampier in 1700 and the remainder of the N coast of the island towards Cape D'Urville, was discovered and traced for a considerable distance as early as 1616, by Schouten and Lemaire. It would be easy to lengthen this list of navigators who claim a share in the discovery of New Guinea, but it is here expedient to pass in silence over the crowd of earlier voyagers (the name of Pomel alone, who in 1776 collected in Doré Bay much valuable information, deserving distinct mention), in order to make room for a rapid exposition of the various important surveys made along the coasts of New Guinea within the last quarter of a century.

Dutch Settlements.—In 1826, the Dutch brig *Douglas*, I commandant Koff sailed from Amboyna, to examine the S.W. coast doubtless with a view to the selection of a site for a colony. About 100 m. N.E. of False Cape, a wide opening discovered was supposed to be the mouth of a great river and received the name of the *Douglas*. The examination of this supposed river was one of the objects of the expedition sent from Batavia in 1828 to the same coast. Captain Biesboom, in the Triton, entered the *Douglas*, but after a tedious navigation in it of some days he returned his course, fearing that delays might mar the execution of another task entrusted to him. A little more perseverance would have enabled him to solve the mystery of the supposed river. He then sailed round False Cape, lat. 8° 24' S., lon 137° 38' E., and arrived E. of Greenwhich westwards. He ascended his order, however, by one degree, and formally took possession of the island from its W extremity to the 141st meridian. He then returned N.W. to Kuyt's Land, and in Triton Bay he erected the fort of De Bus. The scenery round this fort was rich and pleasing, the mountain rising immediately behind it to a height of 3400 ft. But the rankness of the vegetation rendered the narrow and sheltered plain exceedingly unhealthy, so that after the settlement had struggled for a few years, it was found necessary to abandon it. In 1830, another Dutch expedition resumed the survey of the *Douglas*, and this time with success. The supposed river proved to be a strait about 90 m. long, and including the tract which terminates in Cape False. It received the name of the Princess Marianne's Strait, while the low woody tract to the S. and W. was called Prince Frederick Hendrick's Island.

Vol. II.

Recent Surveys.—The French expedition, commanded by Duperrey and Dumont D'Urville (1822-5, 1827-8, 1837-40), have also added not a little to our accurate knowledge of the S. W., and the N coasts including the Bay of Geelvinck. And lastly, two vessels went successively by the British Government—namely, the *Fly*, Captain Blackwood, and the *Redoubtable*, Captain Owen Stanley—to survey the passages through Torres Strait, S to Sydney and E into the Pacific. These expeditions fully accomplished their express objects, and obtained results of inestimable value to navigation. But, besides, they have made us acquainted with a long line of coast on the S.E. side of New Guinea.

Aspect of the Country.—E. of Torres Strait (lon 143° E.), the coast forms a deep bay extending through 7° of longitude, and facing the S. on the E. side of this bay the shore is lined for about 150 m. with a barrier of coral reefs, 5 m. to 16 m. distant, with many openings, and including within them secure and capacious harbours. The coast is in some parts bold, Mount Astrolabe the highest summit of a group rising close to the shore, has an absolute height of 5800 ft. but behind these, at a great distance in the interior a much loftier chain of mountains may be distinctly traced in favourable weather, through an extent of 260 m. These mountains sink to the shore at Heath Bay, lat. 10° 30' S., lon 150° 40' E. Following them N.W. from that point, the chief summits are—

| Mount Sackling | lat 9° 45' S. | lon 148° E. | Height 11,250 ft. |
|--------------------|---------------|---------------|-------------------|
| Mount Ait | " 9° 25' S. | " 148° E. | " 10,100 " |
| Mount Owen Stanley | " 9° 54' S. | " 147° 30' E. | " 18,200 " |
| Mount Yale | " 8° 12' S. | " 146° 40' E. | " 10,000 " |

The W side of the great bay adjacent to Torres Strait presents a totally different character. Captain Blackwood found it to be a great mainly flat, covered with dense forests, and intersected by innumerable fresh-water channels, forming a network of canals, of all sizes, from that of a mere ditch, to a width of 5 m. and depth of 5 fathoms. In short, this coast has, for a length of 70 m. or 80 m., all the characteristics of the delta of a great river. The whole coast is formed by immense mud banks, extending 10 m. or 12 m. out to sea, and having a general depth of only two fathoms. The rivers flowing through these numerous channels seem to be always full and owing to the great body of fresh water issuing from them, they influence the sea to a great distance. The largest of the channels have not width and that which seems most likely to be an arm of a great river, lies in lat. 8° 45' S. A long tract of coast N. of Princess Marianne's Strait, has a similar character. The mud-banks extend so far out, that even small vessels can hardly approach within 10 m. of land. From the isthmus S. of Geelvinck's Bay high mountains are visible to the E. but as the general direction of these chains seems to be from W to E, they recede from the S. coast, and soon disappear. The N. coast of New Guinea is said to be generally mountainous, as well as the W. peninsular portion and it is even surmised that some of these mountains rise above the snow line.

Climate.—Respecting the climate of New Guinea, we possess but few and scattered notices and can only venture to surmise that it is strongly contradistinguished from that of the neighbouring continent, Australia, being as remarkable for abundant humidity, as the latter is for the want of it. This difference is to be ascribed not only to its position close to the line and within the range of the monsoons, and equatorial stream of vapour, but also to its lofty mountains. Hence it is, that Torres Strait seems to separate two worlds of totally different aspects: the one a dry desert, with scanty vegetation and scarcely a palm-tree; the other, covered with dense and varied forests, and spreading out into vast alluvial plains, formed by the continual deposit of great rivers.

Plants.—The forests of New Guinea abound in trees of gigantic size, among them is the *Dryobalanops*, or casuarina-tree (of Sumatra). On the low S.E. shores, the sugar-palm grows on banks of the rivers. The natives cultivate, with more or less care, rice, maize, yams, coco-nut, sugar-cane, and at least three species of banana. Wild nutmeg and other spices are found in the woods, but the only productions of these forests, sought after at present, are the bark of the *Palaus* and *Messop*, which are carried by the Malays to Japan and China, where they are esteemed for their supposed febrifuge and other medical properties.

Amphibious Islands Woody Island, about 8 m. in circuit, covered with some coconut trees, Lincoln Island, the most E. of the Paracombes, and about 3 m. in circuit, Triton Island, or Bank, in the S.W. of the archipelago, and stretching N.W. to S.E. about 3 or 4 m., North, Discovery Valador, and Bombay Shoals Drummond's, Money's, Roberts and Crescent Islands, and Panto Peak.

PARACOMBE, par Eng Devon, 4863 sq Pop. 460 PARADAR, a river, Andalusia, prov and 30 to N. Sevilla, with a small conchosa, two schools, a granary, a church, three hermitages, and two fountains. Pop. (agricultural) 4986.

PARADES, a vil Austria, Styria, circle and near Judon berg with manufactures of ironware, chiefly shovels, and a copper and an iron mill. Pop. 1180.

PARAGA, a vil Hungary Hither Danube co. Desc about 12 m from Hluk with a Greek church and a cradle in corn. Pop. 1010.

PARAGUAI, a river, S. America rises in Bolivia, prov Chiquitos, and proceeding N. forms part of the boundary between that country and Brazil, enters prov Mato Grosso, and joins L. bank Guapore, about 200 m below the town of Mato Grosso, lat. 18 30' S.

PARAGUA, a river Venezuela, rises on the N slope of the Sierra Paracuana flows N., then E. and falls into the Carony, 20 m below Barauimetia, lat 6 50 S., lon 62 50 W. total course, 240 m

PARAGUAY, a river, Brazil rises in the Serra-de Chapada, prov Bahia, and descending from the mountains by a series of lofty cascades, proceeds E. in a very erratic course, passes the towns of Cachoeira and Maragogio, and enters the W shore of the bay of All Saints, by a very wide mouth. It is the largest river which enters the bay and is said to have a course of nearly 900 m. It is navigable by small vessels up to the town of Cachoeira.

PARAGUANA, a peninsula, Venezuela, prov Cora, extending into the Caribbean Sea, lat. 12° N. lon. 70° W. and connected with the mainland by the long and narrow isthmus of Macana. It is about 40 m long by 35 m broad and is mountainous in the centre, with a gradual slope towards the coast.

PARAGUAY, a name at one time used in a very extensive sense, so as to include the whole of the immense regions of S. America between lat 16° S., and the straits of Magal haens and between Chili and Peru, on the W., and Brazil on the E. now confined to the republic properly so called, extending from lat. 21° to 27° 30' S., and lon 54 to 58 40° W. The space thus inclosed forms a very compact territory, nearly in the shape of a parallelogram, about 490 m long, N. to S., with an average breadth of about 300 m. and consequently containing an area of about 86,000 sq m. On the N. its limits with Brazil are only vaguely ascertained but in all other directions it enjoys the advantage of great natural boundaries,—the Paraná on the E. and S., and its tributary the Paraguay on the W. The whole surface thus belongs to the basins of these two rivers, a mountain range of considerable elevation stretching between them N. to S. so as to form nature's water-shed, and send the drainage in opposite directions but nearly in equal portions. The distance of the water shed from the river scarcely anywhere exceeds 100 m., and hence the tributaries by which the drainage is conveyed are more remarkable for their number than their magnitude. By far the largest is the Tihumari, which, owing to an E. bend in the water-shed, has its course considerably prolonged, and being augmented by several large affluents from the N. becomes a noble stream before it reaches the Paraguay. The surface, as already observed, is mountainous in the centre, and also in the N.E. where a mountain known by the name of the Sierra-de-Moracy, or Cordillera-de-Moracy, breaks off from the central chain, and proceeding E. to the banks of the Paraná, interrupts the navigation of that river and forms one of the most remarkable cañons in the world. The river which, above the rapids is 12,600 ft. wide, begins to force its way through a deep, narrow gorge, and becoming suddenly constricted to 130 ft. pours down its immense flood with tremendous fury, and a noise which is heard at the distance of 15 m. From the mountain region the surface rapidly descends, first presenting a finely diversified succession of lower heights, and then spreading out into rich alluvial plains,

which, not infrequently, in the immediate vicinity of the larger streams, are converted into swamps. The climate, though tropical, has its extremes best greatly modified by the inequalities of the surface, but conforms with the natural fertility of the soil in producing a vegetation of almost unqualified luxuriance and grandeur. In the forests are found at least sixty varieties of timber, admirably adapted for all purposes in which elasticity durability or buoyancy is required; eye-woods gums, drugs, perfumes, vegetable oils, and fruits, in almost endless variety. Many of the hills are literally covered with the yuca root (*Yucca Fergensis*) a contemptible substitute for the tea of China, and the principal beverage of one-half of S. America. The larger plains are rained over by immense herds of cattle, which though scarcely required for food in a country otherwise so richly provided, yield valuable products in the shape of hides, tallow, hair, horns, bones, &c. and on all the alluvial tracts where cultivation is attempted with instruments, however primitive and imperfect, sugar-cane, cotton, tobacco, rice, maize, and in short the greater part of the most valuable products, both of the tropical and the temperate zones, are raised in profusion. A country thus highly favoured by nature, has already collected a population estimated at 1,300,000. This though far greater than usually found in S. American states, bears no proportion to its capabilities which if fully developed, would probably furnish a larger amount of human subsistence than any other tract of equal extent on the surface of the globe.

Unfortunately, various political causes have seriously interfered with its advancing prosperity. In the contrast with the mother-country, its isolated position gave it decided advantages, and almost at once, by a single effort, it succeeded in emancipating itself from the Spanish yoke. but it was only to fall under one still more galling. Dr Francia who commenced his political career in 1811 as secretary to the revolutionary junta, having been elected consul exchanged the name for that of dictator in 1814, and thenceforward till his death in 1840 at the advanced age of 84 retained it with a firm grasp, both in name and in reality. Justly regarded as one of the most remarkable political phenomena of modern times, was maintained by a system of espionage so rigorous, and at the same time so widely spread as to bring fear and distrust into every household, and by a strict prohibition of all intercourse with other nations. This thralldom ended with the dictator's life, and a popular government was immediately established by the election of two consuls to serve for two years. This form of government, notwithstanding the obvious defects, has hitherto been well administered, and not only has the restriction on foreign commerce been removed, but the country has been declared free and open both to foreigners and commerce. The benefits of this liberal arrangement have, however, been in a great measure frustrated by the selfish policy of the government of Buenos Ayres, which, taking undue advantage of its command of the outlet of the La Plata has hitherto been so successful in crippling the trade not only of Paraguay but of the extensive regions beyond it abounding in valuable products, to which the Paraná and Paraguay furnish the only available means of transport. The defeat and flight of Rosas, the dictator of Buenos Ayres, in February 1852 have changed this state of affairs. On October 1 1852 in accordance with a decree of the Provisional Director of the Argentine Confederation, dated August 31, the navigation of the Rio-de-la-Plata, the Paraná and the Uruguay, is opened to all foreign vessels under 120 tons register.—(*Bulletin of the American Geographical and Statistical Society New York, 1852, etc.*)

PARAGUAY, a large river S. America. 2 P. 1. (La.) PARAHIBA, a maritime prov N. E. of Brazil, bounded N. by Rio-Grande do-Norte, E. the Atlantic, S. Pernambuco, and W. Ceará. It stretches N. to S. along the coast for about 110 m. length E. to W. about 480 m. area, 51,948 sq m. It is covered by a series of ramifications from the Cordillera-Borborana, which stretches E. to W. Between the ridges are valleys of considerable extent, sloping gradually towards the coast, and each containing a stream of some magnitude, fed by numerous torrents from the ridges which inclose it. The largest of these rivers gives its name to the prov., and drains its central valley. N. of it are the Mananaganga, and the Guaja or Guajoki, the latter forming the N. boundary of the prov., and separating it from Rio-Grande do-Norte to the N.

in the Guyana, separating it on the S. from prov Pernambuco. Much of the soil is of a sandy texture, not capable of yielding good crops under any circumstances, and rendered almost absolutely barren by long droughts, which continue without intermission from six to eight months in the year. The higher grounds are generally of the class known by the name of *cangaço* or *thrupe lands*, covered with trees made dwarfish and deciduous by want of moisture and moisture in some of the low valleys, however, along the banks of streams, tracts of good alluvial soil occur, and are employed in raising sugar-cane and rice. On many of the mountain slopes mandioc, cotton, millet, and tobacco are found to thrive, while the loftiest summits are not unfrequently covered with forests which furnish excellent timber or valuable gums and balsams. Many species of palms, some of them of remarkable height, grow spontaneously on the low flats which line the coast. The principal exports are cotton, sugar, and rum. Parahiba sends five deputies to the general legislative assembly, and appoints two senators. The provincial assembly composed of 28 members, holds its sittings in the town of Parahiba. The educational establishments include a lyceum or college and 46 primary schools. Pop 260,000.

PARAHIBA, a tn. Brazil, cap. above prov r bank Parahiba, about 16 m from the sea, and 65 m N Pernambuco. Its leading streets are paved houses of stone, and roofed with tiles and two copious fountains yield a supply of excellent water. It has an old Jesuit college, partly occupied as the residence of the governor and commandant, and partly by the House of Assembly and the courts of law. Custom-house, where cotton is inspected before embarkation; townhouses *estancadas* seven churches, hospital barracks, and a number of religious houses belonging to the Carmelites, Franciscans, and Benedictines; a lyceum or college, in which Latin and French, mathematics, geography history rhetoric, and philosophy are taught, and two primary schools. The harbour at the town is easily accessible, and much frequented by coasting vessels, which generally load with cotton sugar Brazilian wood, gums, and balsams. Vessels of 150 to 200 tons cannot get farther up than Fort Cabedello about 8 m below. Pop in and dist., 15,000.—The river, rises in prov Pernambuco, in Serra-Jubiana, near the sources of the Capibaribe flows first N.E. then almost due E through prov Parahiba and falls into the sea by two unequal mouths which form the island of Camboas or São Bento. Its mouth has from 9 ft. to 14 ft. water and is defended by two forts—Forto Cabedello on the S., and Forte Velho on the N.

PARAHIBA DO RUI, a tn. and river Brazil. The tn. prov an 170 m N.W. Rio-de-Janeiro, at the mouth of the river of its name, here crossed by a stone bridge, with two churches, and a considerable trade, chiefly transit in coffee, cotton cloth, salt pork, cheese, and other produce. Pop. dist. 2000.—The river rises in E. of prov São Paulo, about 50 m. N.E. Ferns. flows W. and then E. N.E. across prov Rio-de-Janeiro, to the frontiers of Minas-Geraes, where, being joined by the Parahibuna it flows E., separating Minas-Geraes from Rio-de-Janeiro, crosses the Fomba, and continuing its course between provs Rio-de-Janeiro and Espírito-Santo, finally turns E.S.E. and falls into the Atlantic at the town of its own name, after a course of above 500 m. Its channel is much obstructed by cataracts, and large sandbanks almost close up its mouth.

PARAHIBUNA, a tn. Brazil prov and 80 m N.E. São Paulo with a church, and a trade in sugar, coffee, milk, legumes, and salt pork. Pop. dist., 2000.

PARAHITINGA, a sometimes erroneously called São-Luis-de-PARAHITINGA, a tn. Brazil, prov São Paulo, 1 bank Parahiba, a little above the confluence of the Parahibuna, 70 m. W. Rio-de-Janeiro with a church, and a considerable trade in wine, sent to São Paulo and Rio-de-Janeiro. Pop. dist., 4000.

PARAMA D'AMATY a pass. See AMATY.

PARAMARIBO, the cap. of Dutch Guiana or Surinam on the river Surinam, about 15 m from its mouth, lat. 5° 45' N. lon. 55° 35' W. the centre of the Dutch West Indian trade. It is intersected by three canals, and the streets generally lie at right angles to each other. It has a government, and other official buildings, Calvinistic, Lutheran, and R. Catholic churches a Moravian chapel and two synagogues a warehouse orphan-hall a military hospital and large bar-

rack. It carries on an active trade, exporting sugar coffee, cotton, cacao, and indigo and importing grain, salt fish and beef, tobacco, horses, candles, and European manufactures. On September 8 and 4, 1822, above 100 houses and warehouses were destroyed by fire. Pop. (1844) 16,000, of whom 9000 slaves.—(Van der Aa.)

PARAMATTA, a tn. New S. Wales, co. Cumberland on river of same name, here crossed by a bridge in a beautiful and well-cultivated district, 16 m. W. N.W. Sydney. It occupies a large space, consisting of houses built of brick or white freestone, generally detached from each other, and partly surrounded by gardens, and arranged in regular streets, of which the principal one is about 1 m. long. The public building, substantial and well constructed, includes a government-house, pleasantly situated on a height among gardens, with an observatory attached an orphan institution, and a convict lunatic asylum. Woollen cloth, and a soft woollen fabric, which takes its name from the town, are manufactured to some extent and in the vicinity there are large salt works, and copper-smelting furnaces. Pop. 4404.

PARAMITHIA a tn. European Turkey, Albana, 33 m. S.W. Janina, beautifully situated on the side of a rock, on the summit of which is a castle. The streets in the most densely inhabited part are narrow and dirty but in some parts the dwellings are prettily grouped and the appearance of the place is rendered attractive by streams, stone fountains, Greek churches, and mosques, interspersed with cypresses and all kinds of foliage. Pop. 5000.—(Learn's *Journal in Albania and Thracia*.)

PARAMO (Dau-Rui), a vil. Spain, prov and about 60 m from Leon with a church, courthouse, primary school, manufacture of linen, and several flour-mills. Pop. 1296.

PARAMI SHIR, Kurile Islands See POMORSTVO.

PARANA a large river S. America See PLATA (La.)

PARANAGUA, a tn. Brazil, prov and 180 m. S.E. W. São Paulo, S. shore bay of same name. It has a criminal court, four churches a townhouse with prison attached, an old Jesuit college, now used as the custom-house a Latin and two primary schools, a theatre, and hospital an excellent harbour admitting vessels of 800 to 400 tons, and an important trade in timber, rice, flour wheat or Paraguay tea, legumes, mules and huns. Pop. dist. 7000.—The bay is of an irregular shape about 12 m in diameter and is divided into two channels by a low island called Mol, several little hills upon it, which, to vessels at a distance appear like separate islands. It receives several small streams, and is well covered with timber from which a good many vessels are built upon the spot.

PARANAHIBA a tn. Brazil prov and 30 m N.W. São Paulo, r bank Tute with a church, an almshouse, and a trade in cattle, sugar, rum, and cotton Pop. dist. 7000.

PARANAN a river Brazil, rises in prov Goyaz, and flows N.W. receives the Corrente Gallero Almas, Arradas and other streams and joins the Palma in lat. 12° 26' S. The united stream, total course 260 m. takes the name of Paranaíba.

PARANAPANEMA a river Brazil, rises in prov São Paulo, flows N.W. receives the Itapetimga on the right, and the Apitai and Tabagi on the left, and joins r bank Parana, after a course of about 400 m. Owing to the numerous cataracts in its channel, it is nowhere navigable.

PARANG, a mountain pass Patl, in the W. Himalayas, which, at its summit, is 16,500 ft. above sea-level, lat. 32° 30' N. lon. 78° E. In ascending it, high walls of cliffs, displaying a natural section of a multitude of strata, rise on either side at least 1500 ft.

PARANPERA, a river Brazil, rises in prov Minas-Geraes, flows first S.W., then N.W., and, receiving several small streams, joins r bank São-Francisco, about 260 m. below the junction of the Para. total course, about 260 m. Its banks are fertile, and some gold is found in its sands but it is nowhere navigable.

PARANITI, a river Bolivia, which issues from the N.E. extremity of Lake Grande flows E.N.E. and, after a course of about 80 m., falls into the S. shore of Lake Uru.

PARATI, a tn. Brazil, prov and 100 m W.S.W. Rio-de-Janeiro, W. shore, Bay of Angra dos Reis. It is well and regularly built, has three churches, a Latin and several primary schools, a townhouse, an hospital, and an important

trade in sugar coffee, rice, millet, and especially rum, supplied by 165 stills within the district. Pop. dist., 10,000

PARATZ, a vil Hungary, on Tamas, on the river of the same name, with a R Catholic church. Pop. 2692

PARAY, in Moravia [anc. *Paravia*, *Mosavia*], a town, Frances dep. Stone-Loire 15 m. W by N Charolais, 1 bank Bourbince. It is well built, has a handsome Gothic church, erected in 1004, and a communal college. Pop. 2809

PARCHEIM, a walled town, Mecklenburg-Schwern, 1 bank Elbe, near Lake Waken, 21 m. S.E. Schwerin. It has a court of appeal for the whole duchy of Mecklenburg, two churches, townhouse, synagogue, gymnasium, and several elementary schools, a posthouse, hospital, and manufactures of woollen and linen cloth, a chisery factory, worsted mill, tanneries, distilleries, and tile-works. Pop. 8489

PARCHWITZ, a town Prussia, prov. Silesia, gov. and 10 m. N.E. Liegnitz, on bank Katschub, and on the Breslau and Lignitz railway. It is walled has four gates, three churches, a castle, an hospital, a townhouse two mills, dye-works, and tanneries. Pop. 1206.

PARDÓ a river Brazil, formed by the junction of the Sangungunga and the Vermelho in thos. of prov. Mato-Grosso and the first part of its course is almost a continuous series of cascades, of which no fewer than 28 have been counted within a distance of 120 m. After it has passed thence though its current still continues rapid, it becomes a large and majestic river and, after a course of about 280 m. generally S.E. joins the bank Parana, in lat. 31° 36' S. Owing to the rapidity of the current, the descent is made by canoes in six days at farthest, whereas the ascent requires at least 60 days.

PARDUBITZ, a walled town, Bohemia, circle Chlumec on the Elbe, here crossed by a bridge, at its junction with the Elbe, 18 m. S. by W Koniggratz. It has a castle, four churches, a high school three hospitals and manufactures of paper and articles in iron and copper. Pop. 2543.

PAROCHIA, a vil Grecian Archipelago. See PANOS
PAROICIS, a cordillera Brazil in N.W. of prov. Mato-Grosso lat. 16° to 19° S. Its general direction is N.W. to S.E. nearly parallel to the course of the Guapore which it segments by numerous small torrents but it sends out no numerous branches, which nearly over a considerable portion of the province. Within it lie the Seta Lagos (Seven Lakes) in which the Paraguay takes its rise. The principal chain gradually lowers as it approaches the banks of the Maduro, and merges into plains which take the same name, and extend over a space of nearly 800 m.

PARÉDES, several small places, Portugal particularly *Parades-de-Berra*, a town and par. prov. Beira Alta, about 20 m. S.E. Lamego, on a height. Pop. 800

PARÉDES-DE-MAY, a town Spain, prov. and 16 m. N.W. Palencia. It has a townhouse, a prison, two endowed schools, four churches, a monastery an hospital, and three hermitages and some wool-spinning, for the manufacture of the serge of Palencia. Pop. 6014

PARÉDON, or GREAT PARÉDON KAY a small isl., W Indies, in the Balsama Old Channel 50 m. N. Cuba. It affords good anchorage, with shelter both from sea-breezes and land winds

PARÉNZO, a town and seaport, Austria, Illyria, on the Adriatic, 80 m. by W Trieste. It is the seat of a bishop, has an ancient cathedral, a harbour sheltered from all winds except the N. and deep enough to admit large merchant vessels trade chiefly coasting and for the most part, carried on in small vessels from 10 to 80 tons. Pop. 2190

PARÉTO a vil and com. Italy, Piedmont, div. Alessandria, prov. and S. Acqui, on bank Ebro with three churches, a magnificent palace, the remains of three old castles, and a trade in wine and hay. Pop. 2360

PARÉZOW, a town Russia, gov. 47 m. S.E. Stedie, near two large lakes. Pop. about 1200

PARGA, a fortified seaport European Turkey Albania 47 m. S.W. Janina lat. 39° 16' 24" N. lon. 20° 28' 30" E. [n.], on a rocky peninsula which separates two small bays and it is so steep, that the houses almost appear to be constructed one above another. A strong, though small acropolis, defends the town, and the harbour is protected by a small fortified island.

PARHAM, two pars. England—1, Suffolk 2212 ac. P. 563.—2, Sussex, 1264 ac. P. 55

PARIA (Gulf of) a magnificent inlet of the Atlantic, S. America, between an. Trinidad and mainland of Venezuela lat. 10° 30' N. lon. 62° W. 95 m. long, by about 25 m. broad. It communicates with the ocean by two channels, the N. called the Dragon's Mouth, 13 m. wide, and divided by three islands into four passages, and the S. called the Serpent's Mouth, about 10 m. wide. From both channels a current perpetually flows out. The gulf possesses good anchorage, receives several rivers, including some arms of the Orinoco and abounds in fish. It was discovered by Columbus in his fourth voyage, in 1508

PARIMA (SIERRA) an irregular cluster of mountains, Venezuela lat. 4° to 6° 30' N. lon. 64° to 67° W. connected S.E. with the Sierra Paracutina and giving rise to the Orinoco and other large rivers

PARINACOCCHAS, a lake, Peru dep. Ayacucho, prov. same name, 138 m. N.W. Arequipa, 20 m. long N.W. to S.E.

PARIS [anc. *Lutetia Parisiorum*], the capital of France, and after London the largest and most populous city in Europe lat. (observatory) 48° 50' 13" N. and lon. 2° 20' 30" E. [a] 212 m. S.E. London on both sides, and on two islands of the Seine, 111 m. from its mouth. It has recently and the suburbs of about 30 millions of inhabitants, surrounded with fortifications, consisting of a wall 83 ft. in height, bastioned and terraced, lined with a fosse about 40 ft. deep, and embracing both banks of the Seine with a continuous enclosure, and of outworks composed of 14 detached forts. These fortifications take in much of the suburbs, and the even of the surrounding country, but the proper limits of the town are traced by an interior wall, erected at a much earlier date, for fiscal purposes. In this wall are 80 gates or barriers which form the proper entrances of Paris and at which the octroi or duties on goods brought into it, are levied. Many of these barriers are magnificent structures. Among others may be specified the Barrière de Neuilly consisting of two pavilions, and having in front the splendid triumphal arch of l'Etoile the Barrière du Vieux, de la St. Martin, de Fontainebleau de Neuilly de Charente, and de Passy. Outside the barriers and their connecting wall is a large zone, finely planned, which nearly makes the circuit of the town and forms an excellent, though not very much frequented promenade. It receives the name of *Grande Boulevards* to distinguish them from the Inner Boulevards, which form a similar internal zone, consisting in their finest parts, of a magnificent central thoroughfare, bounded on either side with a double row of trees, under which a broad and elevated pathway has been formed and lined by elegant shops and mansions, the whole forming a scene of animated gaiety and splendour which no other capital in Europe can equal.

The Seine traverses the city in a N.W. direction and has a medium breadth of about 450 ft., nearly one-third less than that of the Thames at London. It is shallow and navigable only by barges and small steamers. Its quays are built of solid masonry and form large terraces with a roadway in the centre, and a footpath on either side generally planted. They extend about 11 m. and in addition to the splendid walks which they afford serve the important purpose of protecting the lower parts of the city from inundations, from which, previously to these enclosures, it often suffered. The number of bridges is 27, all of stone, with the exception of seven suspension bridges, three of a combination of stone and iron and one of wood. The most deserving of notice are the Pont d'Austerlitz, or Pont du Jardin des Plantes 400 ft. long by 87 ft. broad with stone piers, and five arches of cast iron from the Pont Neuf, an ancient bridge, the longest of all centrally situated and forming one of the principal thoroughfares the Pont des Arts a light and elegant iron bridge of nine arches resting on stone piers; the Pont de la Concorde or Pont de Louis XVI. adorned with 12 colossal statues of white marble and the Pont de Jena a remarkably handsome structure, consisting of five elliptical arches, and decorated with a cornice imitated from the temple of Mars at Rome and garlands of oak and laurel.

The houses are almost all built of white calcareous stone. Their general height is from five to six stories, arranged as distinct tenements, and reached by a common stair, as still used in the cruets and large towns of Scotland. Very frequently however the stair is not entered immediately from the street, but is preceded by a *porte cochée* or carriage

extremes leading into a court, round the sides of which the houses rise in lofty piles; but of course the more spacious mansions are separate tenements.

Streets and Squares.—The streets in several of the newer parts of the town are straight, wide, airy, and excellently paved, both in the centres for carriages, and on the sides for

foot passengers; but, as a general rule, the streets are irregular in the extreme, cutting each other, not in parallel lines, but at all kinds of angles, and many of them, even in leading thoroughfares, so narrow that carriages have difficulty in passing and persons on foot often run considerable risk of bodily injury. The best streets after the *Grand Boule-*

wards, which have been already mentioned are the Rue de Rivoli on the N bank of the Seine, the Rue de la Paix, continued across the Place Vendôme, and thence by the Rue de Castiglione, the Rue Royale, the Rue du Châtea d'Antin, and the Rue des Pyramides. The squares are neither large nor numerous. By far the finest, both from its position and its buildings and monuments, is the Place de Concorde. It is situated between the gardens of the Tuilleries on the E. and the still larger, if not finer gardens of the Champs Elysees on the W., opens E. on the Pont Louis XVI., which leads directly to the Chamber of Deputies, and N. on the line Royale, terminated by the beautiful colonnade of the Madeleine, and is adorned with various monuments, of which the most conspicuous is an obelisk transported from Luxor in Egypt. The only other squares deserving of notice are the Place Vendôme, an irregular octagon lined by lofty edifices of uniform appearance, the centre occupied by a lofty column modelled on that of Trajan at Rome, and covered with bas-reliefs cast from 1200 pieces of cannon taken in war, the Place de la Bastille, occupying the site of the notorious prison of that name the Place du Chatelet, with a fountain in its centre, consisting of a circular basin 20 ft. in diameter with columns 58 ft. high, divided by bands of bronze gilt, inscribed with Napoleon's principal victories, and the Place du Carrousel, between the Tuilleries and the Louvre, and containing a triumphal arch 45 ft. high by 80 ft. long and 30 ft. broad, designed after the arch of Septimius Severus at Rome consisting of a central, and two smaller lateral arches, the entablature supported by eight columns of red marble over each of which is a statue, while a low attic above the entablature is crowned with a triumphal car, occupied by a female figure, and drawn by four bronze horses, the whole forming one of the finest monuments of which France can boast.

PUBLIC BUILDINGS.—The public edifices and other objects of interest are so very numerous, that an enumeration of the most remarkable is almost all that can be here attempted.

Eglise.—Of these the most celebrated is the Cathedral of Notre Dame, situated on one of the islands of the Seine, called the Ile de la Cité. It is a vast cruciform structure, with a lofty W front, flanked by two massive square towers. These simple perils, composed of a series of retaining arches, covered with figures, lead into the interior, which consists of a nave with double aisles and transepts, and terminates in an octagon. The whole length of the church is 390 ft. width of transept 144 ft., height of vaulting 103 ft., height of towers 204 ft., width of W front 126 ft. The whole building, with exception of some comparatively modern alterations, is in an early and pure style of pointed architecture, sufficiently provided, but by no means overloaded with ornaments, remarkable for their high degree of finish and delicacy. The church of La Madeleine is a modern structure of singular magnificence. It stands on an elevated platform fronting the N end of the Rue Rivoli. Its style is purely Grecian. A colonnade of 52 isolated Corinthian pillars goes completely round it; and on the walls opposite to the spaces between the pillars, is a row of niches filled with colossal statues of saints. The pediment at the E. end, said to be the largest sculptured pediment in existence, exhibits an immense alto-relievo by Lemaire, covered with figures, many of them of gigantic dimensions. The interior consists of a vast unbroken nave, lined with rich marbles, and lighted from above by four circular apertures in a richly gilded ceiling supported by majestic Corinthian columns. The edifice is surpassingly gorgeous, but has none of the solemn majesty which should characterize a church. The church of St. Genevieve, once better known by the heathen name of Pantheon, when it was intended to make it the first resting-place of such gods and demigods as France could furnish, stands on the E. side of the Seine, near the Jardin des Plantes, and makes a conspicuous appearance with its large dome 239 ft. in height. It is exactly in the form of a Greek cross, 336 ft. long by 222 ft. broad, and is entered by a portico of 32 fluted Corinthian columns 60 feet in height,

and six in diameter, supporting a triangular pediment of vast dimensions. The other churches most deserving of notice are those of St. Denis de St. Sacrement, St. Etienne du Mont, remarkable for its square tower and circular turret, a little detached from it, and interesting as the burial-place of Pascal, St. Eustache, after Notre Dame the largest church in Paris, St. Germain l'Auxerrois, with nothing so remarkable as its bell-tower, from which the signal for the massacre of St. Bartholomew was first tolled, St. Louis, St. Germain des Prés, St. Germain, with a chapel regarded as the most beautiful in Paris; St. Laurent, St. Marguerite, St. Medard, St. Mari, St. Nicholas du Chardonnet, Notre Dame de Lorette, a beautiful modern church of small dimensions, St. Paul and St. Louis on an elevated platform, approached by a flight of steps, with a magnificent front fine colonnade, and a lofty dome, St. Pierre du Gros Caillou, St. Roch, the burial place of Corneille and the church of the court during the time of Louis Philippe, St. Severus, with a tower terminating in a singular pyramidal roof, St. Thomas d'Aquin, De Val de Grace, less remarkable for external than for internal beauty with a dome, heavy without, but so finely painted within as to be considered one of the finest frescoes in France, St. Vincent de Paul, a splendid modern church finely situated on an eminence the church of the Sorbonne, so called from having belonged to the celebrated school of that name,

containing the finely sculptured tomb of the Cardinal de Richelieu, and St. Sulpice, a handsome edifice, commenced in the 17th, but not finished till the middle of the 18th century. The Protestants have several churches, of which the best are those of the Oratoire, and Villetaneuse formerly belonging to the E. Catholics, but both ceded by Government to the French Calvinists. There are also two English Episcopal chapels, one of them a modern Gothic edifice, for the use of the embassy a Greek chapel, which the Russian embassy attend and two synagogues.

Palaces.—The Tuileries so called from the tile-works which originally occupied its site, continued for centuries to be the chief Parisian residence of the sovereigns, till France ceased to possess them. It was commenced by Catherine de Medici in 1564 was enlarged by Henry IV and was brought nearly to its present form by Louis XIV. The extreme length of its facade is 1009 ft., and its breadth 168 ft. Owing to the irregular manner in which it has been built it is difficult to class it under any particular style of architecture, but the effect more from the great length and varied outline, than from any excellence of detail, is very imposing. The principal front looks W. through the garden to the Place de la Concorde, and consists of a central facade, with columns on the first, second, and third stories, respectively of Ionic, Corinthian, and Composite orders, and of two pavilions. The flower-garden, immediately

rendered familiar from the occupation of it by the President [Emperor]. It does not possess much architectural merit. The Luxembourg, on the S. side of the Seine, was built by Marie de Medici, on the model of the Pitti palace at Florence. It is a fine structure, remarkable alike for its solidity and the beauty of its proportions, and was the place of meeting of the Chamber of Peers, while that body existed.

Government and Municipal Buildings.—The Chamber of Deputies or Corps Legislatif is held in the Palais Bourbon, so called from having been originally erected by a duchess-dowager of Bourbon, and afterwards occupied by the house of Condé a branch of that family. Its principal front, looking N towards the Seine, is adorned by a magnificent portico of twelve Corinthian columns, supporting a pediment with an allegorical bas-relief, and is approached by a flight of twenty steps. Immediately behind is the chamber itself, a semi-circular hall, ornamented with twenty-four Ionic columns of white marble, and fitted up in crimson cloth and gold. The Palais de Justice, where the principal courts of justice are held, is an immense pile of building situated on the W part of the Ile de la Cité. The principal halls are those of the Court of Cassation, formerly the High Chamber of the Parliament, and the Court of Appeals. The Hotel de Ville, situated in the Place de Grève, notorious for the wholesale murders committed in it during the revolution forms an immense quadrangle, with four splendid apses. The ornaments of the principal front are richly sculptured. Over the

gallery, which is approached by a flight of steps extending along the whole of the W front. The Salle de la Bourbe, where business is transacted, is a large apartment, of the Ducal order, surrounded by arcades. The deeply-curved ceiling is divided into sixteen compartments, covered with fine monochrome drawings, which have the effect of bas-reliefs. The Tribunal de Commerce, and other courts more immediately connected with trade and commerce are located in this building. The Treasury [Hotel des Finances] is an immense building, in the Rue de Rivoli. The Register Office [Hotel des Archives Royales] occupies the former palace of the Prince de Bourbon, and is more interesting from the value of its records, extending over a period of 1700 years than remarkable for the merits of its architecture. In connection with the records of the kingdom, may be mentioned its printing establishment [Imprimerie Royale] occupying the buildings of the Palais Cardinal, so called from having originally belonged to the Cardinal de Rohan. It is one of the largest and best-regulated establishments of the kind in Europe, and possesses so complete an assortment of types, that it has printed the Lord's Prayer in 150 languages.

Museums, Libraries, &c.—At the head of these stands the magnificent collection of the Louvre, the buildings of which have already been described. It forms one of the chief attractions of the capital, and consists of various galleries, to each of which a slight reference must be made. The Museum of Paintings of the Italian, Flemish and French Schools

[Musée des Tableaux des Ecoles Italienne, Flamande, et Française] contains above 1400 pictures and though justly deprived of many of the master-pieces, which had been brought to it from all parts of Europe, by a system of wholesale spoliation is still one of the finest galleries in existence. In addition to it there is another Gallery Française, containing modern French pictures among which that of the *Lots of France* are conspicuous and a large and excellent Spanish gallery. The Salle de Byoux contains curious and valuable cups, vases, porcelain jewellery, precious stones, and many remarkable articles of vertu, belonging chiefly to the middle ages. Adjoining is the Salle des Bep. Chemises, containing copies of some of Raphael's finest frescoes in the Vatican. The Greek Museum [Musée Grec] is particularly rich in Etruscan and Grecian vases, and in articles obtained from Mesopotamia and Pompeii. The Egyptian Museum is enriched with the fruits of the French researches in Egypt, and as regard to all that relates to domestic life in its interior details, is unsurpassed by any other collection. The Collection Standish—so called from an Englishman of that name who bequeathed it to Louis-Philippe—contains some good original paintings, and a library of rare books among others, the Bible of Cardinal Ximenes, valued at £1000. From the ante-room of this collection, a small staircase leads to the Naval Museum [Musée de la Marine], which contains beautiful models of vessels of all classes, both finished and in every stage of construction. Models, also, of the principal naval ports of France, and a museum of Indian arms and ornaments, from the Pacific and N. America. The Musée des Dessins contains about 1800 drawings, including numerous specimens of the great masters of all schools. The Musée des Antiques, entered from the vestibule at the bottom of the grand staircase, comprises a series of apartments on the ground floor, and forms a remarkable and interesting collection of about 1100 articles, consisting of statues, busts, vases, &c. The Musée de la Sculpture Moderne contains the best specimens of sculpture and statuary which the modern French school has been able to furnish, but is poor in those of foreign artists.

The Musée du Luxembourg, contained in the palace of that name, is appropriated to the finest works of living

HOTEL DE VILLE, PARIS.—From a lithograph by Ph. Benoit

central porch is a brass equestrian bas-relief of Henry IV., and in the wall a series of niches filled with statues of the most distinguished French magistrates. The interior court, approached by a flight of steps, is surrounded by an arcade and portico with Ionic columns. The Grande Salle or Salle de Frons, occupying the whole length of the central portion of the building, is very magnificent. The Admiralty [Hotel de Marine] forming the N.E. side of the Place de la Concorde, is a beautiful structure which, under its original name of Grande Mairie de la Couronne, was the place where the crown jewels were kept, and, previous to the revolution contained an immense number of valuable and curious objects. The Mint [Hotel des Monnaies] from the Quai Conti, on the S. side of the Seine, and contains an immense collection of coins and medals, the ground plan includes eight courts, with ranges of buildings in which all the operations connected with coinage are carried on. The Post-office [Hotel des Postes] to the E. of the Palais-Royal, has a handsome front, but the whole building, though well arranged, does not possess much architectural merit. The Exchange [La Bourse] in the Rue Vivienne, is a beautiful modern structure, only completed in 1826. It is in the form of a parallelogram, 212 ft. by 126 ft. surrounded by a range of sixty-six columns, supporting an entablature and masked attic, and forming a covered

French artists, purchased by Government. The Musée d'Histoire Naturelle, together with the Jardin des Plantes or Botanical Garden, in which it stands, is at once one of the most attractive and instructive places of resort in Paris. The museum, properly so called, is rich in the collections of Cuvier and other distinguished names, and possesses, besides animal specimens in all the branches of natural science, a good menagerie. The Musée d'Artillerie occupies five galleries: one containing sets of ancient armour, and the other four arms, instruments, machines, and models of those used by the artillery service. The Conservatoire des Arts et Métiers, occupying the very extensive buildings which formerly belonged to the abbey of St. Martin des Champs, contains a most valuable and interesting collection of machines, models, drawings, &c. relating to almost all branches of industry. The most important library is the Bibliothèque Royale Impériale or Nationale (for it has borne all these names by turns) occupying a vast building, almost devoid of ornament, but containing one of the largest and most valuable collections in existence. The books and pamphlets amounting in number to about 1,000,000, the MSS. many of them of extreme rarity and interest, to 80,000, and the maps and plans to 800,000. In addition to these, there is a collection of engravings, contained in 80,000 vols. or portfolios, with 1,400,000 plates; a gallery of ancient sculptures, in which the most remarkable object is the Egyptian colossus of Denderah, and a cabinet of antiquities, consisting chiefly of coins and medals, to the number of 100,000, many of them rare, and some unique. The other more important libraries are those of the Arsenal, 300,000 vols and 8800 MSS. St. Geneviève, 250,000 vols and 8000 MSS. Mazarine, at the Institute, 200,000 vols. and 3700 MSS. De la Ville, 55,000 vols. De l'Institut, 100,000 vols., De l'Université, 50,000 vols., de l'École de l'Etat, 80,000 vols. De l'École de Médecine, 30,000 vols., Du Musée d'Histoire Naturelle, 30,000 vols. and libraries of greater or less extent, attached to almost all the public institutions, and government, judicial, and municipal offices.

Educational Establishments.—The University of Paris said to have been founded by Charlemagne, and long one of the most celebrated in Europe, was suppressed at the revolution, and an entirely new system of public education adopted. At the head of the system is the University of France, which, properly speaking, is only a body of education consisting of a council of nine members, presided over by the Minister of Public Instruction, as grand master and having under it twenty-two inspectors-general of studies. The most extensive school of Paris is the Academy consisting of five faculties—science, with ten ordinary and eight supplementary professorships; letters, with twelve ordinary and seven supplementary theology with six ordinary and five supplementary; law, with seventeen ordinary and eight supplementary and medicine, with twenty-six ordinary. After the Academy come the Collège Royal de France, with twenty-seven professors; the collége attached to the Musée d'Histoire Naturelle, with fifteen; the colléges de Louis le Grand, Henri IV., Bourbon, St. Louis, and Charlemagne, attended each by about 1000 pupils; the École Polytechnique established in the buildings of the old Collège de Navarre, a celebrated institution, in which the greatest mathematicians which France has produced have been teachers and not a few of them have been formed. The École Centrale des Arts et Manufactures, for the education of engineers, directors of manufactures, builders, &c.; the École Normale, for training professors of a higher grade, and several Écoles Normales Élémentaires, for ordinary male and female teachers; École des Ponts et Chaussées, consisting of about 100 pupils, taken from the École Polytechnique, to be instructed in all the branches of civil engineering; École des Mines, kept in the magnificent Hotel de Vendôme with a full complement of professors in every branch relating to mining operations and a most valuable mineral museum, which fills fifteen rooms, and contains the geological collection of the Paris Museum formed by Cuvier and Brongniart; École des Chartes, in which paleography, or the art of deciphering and studying ancient MSS. is taught; École des Langues Orientales Vivantes (School of Living Oriental Languages), with seven professors; École de Pharmacie, with ten professors, and the sole power of licensing apothecaries, who must practice till examined here; École Gratuite de Dessin, de Mathématiques, et de

Sculpture et d'Ornement, a kind of mechanical institute. École Spéciale et Gratuite de Dessin pour les Jeunes Personnes, in which young women, intended for the arts or similar professions, have the means of studying figures, landscapes, flowers, &c.; Palais des Beaux Arts, in which gratuitous lectures on all subjects connected with the arts are given, by twenty-one professors; École Vétérinaire, a celebrated establishment, not in Paris, but at Alfort, in its vicinity. Conservatoire de Musique et de Déclamation, for the instruction of both sexes in music, singing, &c. by a numerous body of the first professors, male and female, and numerous primary schools, superior and infant schools, &c.

Hospitals.—The civil hospitals of Paris are divided into three classes—general hospitals, special hospitals, and hospices or almshouses. The general hospitals are the Hotel Dieu, the most ancient of all the Parisian hospitals, situated partly on the S. side of the Ile de Cité, and partly on the S. side of the river here crossed by a covered bridge, and forming a very extensive and admirably-managed infirmary, which, on an average annually receives about 11,000 patients. Hôpital de la Pitié with 800 beds, and an average of above 10,000 patients. Hôpital de la Charité with 550 beds, and 8000 patients, and the Hôpital Necker, Cochin, and Bouchon. The chief special hospitals are those of St. Louis for cutaneous diseases. Hôpital du Midi and Hôpital de Lourcine, both for syphilitic complaints. Hôpital de la Maternité. Hôpital des Enfants Malades, and Hôpital des Cliniques. The hospices are the Bœte or Hospice de la Vieillesse, for old men and the Salpêtrière or Hospice de la Vieillesse, for old women. Two similar Hospices des Insensibles, and the Hospice des Enfants Trouvés (Foundling Hospital), a large establishment, in which the abuses notorious in regard to foundling hospitals, notwithstanding some attempts here made to remedy them, continue almost unabated. In addition to the above classified hospitals, are numerous establishments of a benevolent nature, well deserving of notice. The most celebrated of these is the Hotel des Invalides, or asylum for old soldiers, a magnificent establishment, capable of receiving 5000 pensioners. Its gilded dome makes it one of the most conspicuous buildings in Paris and it is also one of the largest and most magnificent, presenting a solid front in three projecting masses 112 ft. long, and four stories high. Among other benevolent institutions are the insane asylum (Maison Royale de Charenton) two blind asylums the deaf and dumb institute (Institution Royale des Sourds Mutes), and a great variety of societies, both public and private, for distributing food and clothing, and reclaiming those who have gone astray.

Prisons and Correctional Establishments.—The former are nine in number, and several of them have acquired a dreadful notoriety from the deeds perpetrated in them during the fury of the great revolution. The principal are La Force, containing 1200 separate cells, and distinguished by its classification of prisoners and excellent sanitary regulations; St. Pelagie, recently converted partly into a political prison and partly into a kind of hulks for convicts whose punishment is of short duration; St. Lazare, a general female prison, which has generally an average of about 1000, and receives annually about 10,000 prisoners; Dépôt des Condamnés for criminals condemned to the gallies or to death and remarkable for being at once light, airy and healthy, and yet one of the strongest places of custody ever erected; and the Maison Centrale d'Éducation Correctionnelle, with very much the air of a feudal castle. The prisons to which the most monstrous interest attaches, are the Palais du Peuple from which Louis XVI. was led forth to the scaffold, the Conciergerie, from which Marie Antoinette was led forth to the same fate; and the Abbaye, the most gloomy of all the Parisian dungeons, and, during the reign of terror, a perfect den of horrors.

Places of Resort and Amusement.—Of the former, several have already been incidentally mentioned, and the only one which seems to call for more special notice is the most celebrated of all—the Champs Élysées. It stretches W. from the Place de la Concorde to the Barrière de l'Étoile for about 1½ m., gradually widening out from 875 yards to 700 yards. It consists of a central road, lined with trees, and with wide walks and open spaces on each side crowded, particularly on holidays, with all grades of Parisian society, and presenting one of the gayest and liveliest scenes which the world has imagined. The public shows all take place here; and, even on

the most ordinary occasions, all kinds of attractions are to be found in the shape of shows, musical bands, panoramas, strolls, &c. The theatres of Paris and its immediate suburbs afford accommodation for 80,000 persons; and the reason for such immensity is so strong and general, that the attendance is usually full. The most important are the Académie Royale de Musique or French Opera, capable of containing about 3000 persons; the Italian Opera, the Opera Comique, the Theatre Francaise, the Odéon, the Theatre de la Gaîté, for vaudevilles and melodramas, Theatre des Folies Dramatiques, Theatre du Vaudeville, Theatre des Variétés, Theatre du Palais Royal, Theatre Porte St. Martin, Theatre de l'Ambigu Comique, Theatre du Pantheon, remarkable as occupying one of the earliest churches of Paris; and the Cirque Olympique. Numerous other places of amusement are always open, many of a more rational, but not a few also of a questionable kind. A place of resort, though certainly not of amusement, furnishing one of the most interesting and impressive sights of the capital, is the celebrated cemetery of Père-la-Chaise.

Societies.—Literary, Scientific, &c.—At the head of these stands the Institut de France, which has acquired such celebrity, that the most distinguished European philosophers covet the honour of being admitted to it as foreign associates. It consists of 224 ordinary members, all of whom receive a salary of about £80 42 francs academically, without salary 33 associates, and 220 correspondents; and is divided into five sections or academies—the Académie Française, specially devoted to the French language, the Académie des Inscriptions et Belles-Lettres, for general literature, learned languages and antiquities, the Académie des Sciences, subdivided into 11 sections, embracing the different branches of physics, mathematics, natural history, medicine, rural economy, &c.; the Académie des Beaux Arts, for painting, sculpture, architecture, engraving, and music; and the Académie des Sciences, Morales et Politiques for history, moral sciences, jurisprudence, political economy and statistics. The Institute overshadows most of the other societies, many of which, however, have distinguished themselves, and are well known under the names of the Antiquarian Philomathie, Natural History Geographical Statistical Photoducase, Asiatic, Anatomical, Medical, and Agricultural Societies, &c.

Manufactures of France.—The Government possesses only two property manufacturing establishments—that known by the name of the Gobelins, celebrated for its tapestry and carpets, made, however not for sale, but the supply of the palace, and for presents and that of tobacco, which the Government holds as a monopoly and carries on in a vast establishment on the R. de la Seine, producing about a fifth of all the snuff used in the kingdom, and yielding an annual profit estimated at £2,800,000. In the other branches which are free, the most important manufactures are articles of jewellery and precious metals, ebony and ivory, trinkets, fine hardware, paper-hangings, saddlery, and other articles in leather, cabinet-work, carriages, various articles of dress, silk and woollen tissues, particularly shawls and carpets, lace, embroidery artificial flowers, combs, machines, mathematical and optical instruments, types, books engravings, refined sugar, chemical products, &c. The value of all the industrial products of Paris, in 1847, was, after a very careful investigation, estimated at £58,545,184. In 1848, during the turmoil of the last revolution, they fell to £37,100,000 in other words, to less than one-half of what they were before. The value of the exports, composed almost entirely of the above articles of manufactures, was declared at the custom-house of Paris in 1848, to amount in value to £1,380,577, and in 1850, to £2,319,189. The estimated revenues of the city for 1852, is £1,860,735, and the expenditure, £1,940,735.

People.—The inhabitants of Paris have long considered themselves at the head of European civilization: and if such an opinion can be gained by mere external polish, they perhaps deserve it. In matters of dress and fashion, the land is conceded to them by a kind of unhesitating consent, and though their manners have suffered considerably by the stormy periods through which they have passed, and the numbers of barbarians accompanying them, their native politeness has not been lost and none succeed better, not only in punctuating the agreeable arts of life, but even in observing the outward decencies of society. Beneath this pleasing surface, however,

a strong and polluted current is perpetually running; and there is no part of the world where the more substantial virtues are more rare, and where so much dissimulation exists within such narrow limits. The principles of infidelity, and the abominations of socialism, have found a hearty welcome in large masses of the population, and prostrate their influence in the lamentable fact, that every third child born is illegitimate, the exact number of the births for 1851 were, legitimate 21,689, illegitimate 10,835. The only virtue in which more northern nations might probably trounce them with advantage is temperance, though the quantity of liquors consumed by each Parisian is somewhat startling. In 1851, there were consumed in Paris:—

| | Gallons. | | Gallons. |
|---------|------------|-------|-----------|
| Wine | 80,788,232 | Cider | 404,693 |
| Spirits | 1,194,231 | Beer | 9,579,844 |

This will give above 29 gals. wine, 1½ gals. ardent spirits, and 8½ gals. beer or cider, to each individual, man, woman, and child, of the 1,031,580 inhabitants of Paris. These quantities are, of course, exclusive of the plentiful libations imbibed by the working-classes on Sundays, and other holidays, outside the barriers, where drinks of all kinds may be enjoyed at a cheaper rate than within the walls, from not being subject to the heavy duties of the city.

History.—The origin of Paris is involved in obscurity, but the account to which most credit appears to be given, is, that a wandering tribe having settled upon the banks of the Seine, built huts upon the Ile de la Cité, to which they retired with their flocks and herds when any of the neighbouring tribes made incursions upon them, which they were otherwise unable to resist. To this natural stronghold they gave the name of Lutetia, supposed to be derived from the Celtic *luton* house, meaning Dwelling of the Waters, while they themselves, for some reason not well explained, took the name of Parisii. When Julius Cæsar conquered Gaul he accordingly here found a tribe of Parisii, with a capital called Lutetia, connected with the shore by two bridges. They defended themselves bravely, but were overcome, and Cæsar, after rebuilding the town, which had been nearly destroyed, surrounded it with walls and further defended it by erecting two forts at the extremity of the bridges. The Gauls were exchanged for Roman divinites civilization made rapid progress, not only in the course of the 500 years of the Roman mission, Lutetia rose to be a place of considerable importance, and became the capital of N. Gaul. In the beginning of the 6th century it suffered much from the northern hordes, and ultimately fell into the hands of the Franks, headed by Clovis, who, having embraced Christianity made it his residence in 508. Under his descendants it became the capital, first of a kingdom of same name, and then of the kingdom of Neustria. In 987 a new dynasty was established in the person of Hugo Capet, from whose reign downwards, Paris has continued to be the residence of the kings of France. In the latter part of the 12th century Philip Augustus mounted the throne, and built the castle of the Louvre and several churches, paved the streets, and enclosed a large part of the buildings with walls, flanked with towers. The various schools which had existed separately became united under the common name of University which now began to occupy a prominent place among the literary establishments of Europe. Under Charles V. new walls and districts were erected, with the view more especially of guarding against the incursions of the English, who made frequent incursions into the suburbs. The fortifications failed to produce the desired effect, for in 1420, during the reign of Charles VI., the English made themselves masters of the city and were not dislodged from it for sixteen years. In 1487 and 1488, under Charles VII. Paris was ravaged by pestilence and famine, and much was the desolation, that wolves appeared in herds, and prowled about the streets. Under Louis XI. a course of prosperity again commenced. The area of the city extended over 1414 a., and its population amounted to 500,000 souls. In 1470 the first printing-press was introduced, and the post-office was established. Francis I. demolished the old castle of the Louvre, and commenced a new palace on its site, rebuilt several churches, opened up better communications between the different districts, and made so many improvements that the whole city assumed a new aspect. But the Reformation having commenced, and created numerous converts in all parts of the

kingdom, bigotry and intolerance in alarm began to do their worst, and the fires of persecution were lighted up. Paris, in consequence, became the theatre of many bloody deeds, crowned at length, in 1872, during the reign of Charles IX., by the horrible massacre of St. Bartholomew. During these transactions the city could not prosper, and though some new edifices were commenced, among others the palace of the Tuilleries, it was not till the wars of religion ceased at least to be openly carried on, after the accession of Henry IV. that the work of amelioration in good earnest again commenced. The Hotel de Ville was begun, the Pont Neuf finished, great additions made to the Tuilleries, and many new streets and quays built. The works began were completed, and many others undertaken during the reign of Louis XIII. and XIV.; the latter of whom, notwithstanding his lavish expenditures at Versailles, was able to rival all that his predecessors had done for the embellishment of Paris. Louis XV. had contributed his share of improvements, and Louis XVI. was proceeding in a better spirit, in the same cause, when the Revolution commenced, and with it the work of wanton demolition, carried on to such an extent that some of the finest edifices of the city were converted into ruins, and many of the most venerable monuments of art completely destroyed. A stop was put to this barbarism, first by the Directory, and afterwards by Bonaparte, by whom, in particular, many works, distinguished alike by utility and splendor were undertaken and completed. During the restoration of the Bourbons, the work of embellishment did not proceed with much rapidity, but from 1830, when Louis-Philippe was called to the throne, to 1848 when the revolutionary spirit once more gained the ascendancy, and drove him into exile, Paris made wonderful advances, both in magnificence and general prosperity. Since then it has been her lot more than once to see bloody battles waged, and hear the thunder of artillery roaring in her streets. Pop. (1846), 1,084,196 (1851) 1,021,630.—(St. Fargnan *Dictionnaire de la France*, Paris, Gallien's *Guide to Paris*, *Annuaire de la France*, Paris, *Le Directeur*, 1853, *de la*.)

PARIS, numerous places in the U. S. The most important are—1, A vil. and township, New York, 95 m. WNW Albany with three churches, three cotton, and two paper factories, two tanneries, two distilleries, and a number of grist, saw, and other mills. Pop. (1850), 1890—3, A vil. Kentucky, 86 m. E Frankfort with two churches. P. 300

PARITA, a gulf, Central America. W side Gulf of Panama, about 80 m. across, by 20 m. deep. The town of Parita, at its S W entrance is a place of some trade.

PARIWARA, ISLAND, S. Pacific Ocean, S E coast, New Guinea, lat. 9° 12' S, lon. 145° 50' E. They are three in number, the largest only three-fourths of a mile in length, of a triangular shape, and rising to a height of 334 feet, with irregular cliffs along the sea margin.

PARKANY, a market in Hungary. Hither Danube, co. Gran, 1 bank Danube opposite the town of Gran with a church, and some trade in wine. Pop. 1374.

PARKGATE, a vil. England, co. and 10 m. N by W Chester, 3 bank Dee, and on a branch of the Birkenhead and Chester railway, commanding a beautiful view of the Welsh coast, with a port, once of importance, but rendered almost inaccessible by a sandbank. It is now chiefly known as a fashionable and much-frequented watering-place.

PARKHAM, par. Eng. Devon, 3808 ac. P. 951

PARKHEAD, a vil. Scotland, co. Lanark, 2 m. E Glasgow, of which it forms a suburb. Inhabitants principally employed in hand-loom weaving. Pop. about 1160.

PARKUR, a vil. Senegal, about lat. 24° N, lon. 71° E, bounded N and N W by the Little Desert, and on all other sides by the Runn of Oudhi; greatest length, E. to W. 85 m., breadth, 20 m. Though of limited extent, it derives importance from being the only cultivated spot within a large tract of country. It is sandy with a range of rocky hills running N and S. near its E. border and during the rainy season is partly under water. It produces scanty crops of bajrae, a kind of millet, and other coarse grain, but few good pastures, which rear a great number of cattle, from the milk of which much ghee is obtained, and partly exported. The only other article of export is the gum of the baobab and other shrubs. The only places of note are Nagger and Yemaron; the former considered the capital, but the latter the more populous.

PAEKUTA, a small fortified Is. Bulu, on the Indus, 25 m. S.E. Iskard; lat. 30° 5' N., lon. 70° 51' E., with a manufacture of cotton and wool, and some trade.

PARLA, a vil. and com. Spain, New Castile, prov. and 15 m. S Madrid; indifferently built; with a church, town-house, primary school, and a trade in corn. Pop. 1087.

PARLEY (Warr) par. Eng. Dorset 3407 ac. P. 886.

PARLOW, a vil. Indian Archipelago, W coast, ind. Celebes on a river which flows into Parlow Bay lat. 1° 1' S. It contains of about 500 houses; is the residence of a rajah and has many workers in gold and silver who make ear-rings and other trinkets. It carries on a considerable trade with Malacca, whence it imports opium, gunpowder, fire-arms, iron, steel brass-wire, and other articles.

PARMA, several places, U. States particularly a vil. and township, New York, 251 m. W by N Albany; with two churches, several schools, and manufactures. Pop. 3683.

PARMA (Ducary) a duchy, Italy comprehending the three duchies of Parma proper, Piacenza or Plasencia, and Guastalla, and the small principality of Lodi. Guastalla forms a minute fraction of the whole, having an area of only 58½ sq. m.; and is completely isolated from the rest by the duchy of Modena, which incloses it on all sides except the N., where it borders on Austrian Italy. Its isolation and small extent make it unnecessary to consider it further in the present article. The other two duchies, usually comprehended under the common name of Parma, form a contiguous and compact whole, somewhat irregular in shape, though with resemblance to that of a square; lat. 44° 30' to 45° 7' N., lon. 9° 20' to 10° 30' E. bounded S. by Austrian Italy, S.W. by Savoy, S. by the States of Parma and Tuscany, and E. by Modena; greatest length, E. to W. 60 m., central breadth, 43 m.; area of Parma proper 1636 sq. m., and of Piacenza, 1051 sq. m. area of whole duchy including Guastalla, 2708 sq. m.

Parma lies wholly between the Apennines and the S. or r. bank of the Po. In the S it is covered by the Apennine chain which here, in the Alps di Suscio, attains the height of 8907 ft.; Ormaiz 8180 ft.; Parma, 8890 ft., and Reggato, 5778 ft. Several other summits exceed 5000 ft. Many of the rivers are more torrents, they all flow N.E. to the Po, which is the only stream available for navigation. The largest of them are the Tidone, Trebbia, Nura, Olivaone, with its tributary Rigo, Arda, Tara, with its tributaries Stirose and Ceno, Parma, with its tributary Baganza, and Enza. The Alpine lakes are numerous, but small, among them may be named Santo, Gemio, Bellano, Verde, and Lago dell'Alpe.

The climate is, on the whole temperate, the air pure and healthy, with exception of the districts near the Po, where the atmosphere is impregnated by noxious vapours. The prevailing winds are N.W. N.E. E., and W. the atmospheric changes are often sudden. violent hurricanes and whirlwinds arise, and hailstones desolate the plains. In the town of Piacenza, on the banks of the Po, the thermometer gives the following results—mean annual temperature, 58° 30' to 59° Fah. greatest heat, 91 to 98 Fah., greatest cold, 25° to 15° Fah. clear days 138 rainy, 38 snow, 14.

The far greater part of the duchy is arable, almost the whole of its softer districts being composed of the chalk and accompanying strata, which form the upper extremity of the secondary formation. To the N. tertiary marls, travertines, and sandstone, appear stretching in a narrow zone, E. to W. across the duchy. The minerals are not of much importance, though they include iron which is worked to some extent; copper, found only in one vein of considerable thickness; salt, of which there are several rich springs at Salto Maggiore. lithographic stone, millstone, whetstone, beautiful marble, and fine rock-crystals.

The loftier mountain ridges are generally covered with forests, chiefly of hardwood trees, among which the most common are the ash, beech oak, walnut and chestnut at lower elevations, elms, poplars, alders, and willows abound. The lower lands are almost covered with vineyards and orchards. From the former, the wine made is both abundant and excellent, from the latter, fruit, in great variety and of exquisite quality, are obtained; but the culture of them is said to have lately declined considerably, in consequence of the preference now given to the mulberry, which is well adapted both for the soil and climate of many parts of the

divers, and yields valuable returns. But the great source of wealth is agriculture, which occupies the far greater part of the population, particularly in the low country, where the soil is remarkably fertile, and is cultivated with care, yielding abundant crops of all the ordinary cereals, together with maize, beans, tobacco, and hemp. Irrigation is well understood and generally practiced. The grass husbandry also receives much attention, and great numbers of cattle are reared, partly for feeding and partly for the dairy. The latter is celebrated, and continues to produce the famous cheeses in which Parma gives its name, though certainly to a much less extent than on the opposite banks of the Po, especially in the province of Lodi. Hogs roam the forests in large herds, and maintain themselves on the mast. Game, chiefly of the smaller sort, including hares, partridges, quails, ducks, and other water-fowl, is very abundant, and the fishery of the Po has been deemed of sufficient importance to be converted into a government monopoly. The other streams remain free, and are said to be well supplied.

Manufactures have not made much progress. They consist chiefly of coarse articles of primary necessity, but also include silk, linen, and cotton goods, paper, gunpowder, hides, tobacco, wax, and earthenware, candles, soap and refined wax. The trade is very limited, and consists chiefly of agricultural produce, cattle, hogs, nut-oil, wine, and linen. In regard to weights and measures, the decimal system of France has been adopted, though in many parts of the duchy old measures prevail and produce some confusion. The standard coin is the *lire*, which is considered equal to a franc. Accounts are kept in it, but the coins of other countries pass current.

Before Parma was incorporated into the kingdom of Italy the government was an absolute monarchic hereditary in the male line. All power legislative and executive resided in the sovereign who appointed all public functionaries, and governed by a ministry accountable only to himself. The laws consisted of a code promulgated in 1820 nearly the same as the Code Napoleon, though not without several modifications. Justice was administered by five courts—the Tribunale Supremo di Revisione, which sat in Parma, and had supreme jurisdiction over all the three duchies the Tribunale di Appello, which sat in Piacenza, and had also universal but not supreme jurisdiction, two Tribunale Civili e Criminali, one in Parma, and the other in Piacenza, and a Tribunale Civile Corregionale, which had its seat in Borgoratto. Besides these courts, there were 48 inferior judges stationed in the different districts of the duchy. The R. Catholic religion is established, and is professed by almost all the inhabitants; other forms of religion are tolerated. Education is under strict regulation, and is wholly in the hands of the magistrature or the priests. For males, there are three classes of schools: 1. The *Superiori* or *Familiari*, established in Parma and Piacenza, and intended to furnish a superior professional education. 2. The *Secondarie*, established in the chief places of each district, and some of the more populous communes they give instruction in Italian Latin, and *belle-lettres*. 3. The *Primarie*, established in all the communes, to give gratuitous elementary instruction. For females, also, public instruction is provided, and is chiefly committed to certain orders of nuns. There seems however to be a considerable number of private female schools. For administrative purposes, the whole territory is divided into two governments—Parma and Piacenza, and three commissariats—Guastalla, Borgo-San-Domenico, and Borgoratto. Both governments and commissariats are subdivided into communes, of which the number is 104. The revenue amounts to £246,867. The army is estimated at 2367 men.

Parma originally formed part of Galias Cisalpine, and Liguria. After undergoing various vicissitudes during the decline of the Roman empire, it became part of the kingdom of Lombardy. Charlemagne having conquered that kingdom, made a present of Parma to the Pope, who long possessed it. In the subsequent quarrels between the popes and the emperors both Parma and Piacenza became independent republics. In 1512 Pope Julius III. regained possession, and in 1545, Paul III. erected them into a duchy in favour of his son Luigi Farnese, whose line became extinct in 1731. Don Carlos, son of Philip, Duke of Parma and Elizabeth Farnese, obtained possession in the face of a protest by the Pope, and kept it till 1756, when he became king of the Two Sicilies.

A claim was now put in by Austria, but the treaty of Aix-la-Chapelle in 1748, gave possession to Philip, another son of Philip V. and Elizabeth Farnese. The victories of the French in Italy, in the beginning of this century, enabled Napoleon to seize the duchy, and attach it to his kingdom of Italy, under the name of the department of the Taro. After Napoleon's downfall, it fell to the Archduchess Maria Theresia for life, and afterwards to the Duke of Lorraine. Emp. (1851), 487, 548.

PARMA, a city in Italy, cap. above duchy, on the Parma, which divides it into two unequal parts, and is crossed by three bridges, 73 m. S.W. Milan. It is of a circular or oval shape, surrounded by walls flanked with bastions, defended by a canal, and entered by five gates. It has a gay and animated appearance, everything indicating prosperity and a rapid course of improvement. It is laid out with considerable regularity. The old Roman Via Emilia traverses it centrally throughout its whole length E. to W., forming the principal street, while several others take the same direction, or cross it at right angles. The principal squares are four, and one of them, the Piazza Grande, near the centre of the town and in the line of the Via Emilia, already referred to, is large and handsome. The houses generally have not much architectural merit, but many buildings both private and public, are well deserving of notice. Among the latter are the Duomo or cathedral partly Romanesque and partly Gothic, in the form of a Latin cross, with a fine octagon tower and dome in the centre the interior of which was painted in fresco by Correggio, decorated by a very lofty campanile and adorned with numerous sculptures and paintings by the first masters the baptistery in the vicinity of the duomo, externally with eight, and internally with 16 sides, cased with Verona marble, and covered in its front with curious bas-reliefs the church of La Steccata, one of the finest of which Parma can boast but not older than the 16th century crowned by a majestic dome the monastery and church of San Giovanni, the latter in the form of a Latin cross, facing the centre of which rises a dome, decorated with some of the finest though unfortunately faded frescoes of Correggio, the church and monastery of the Annunziata, the former a large and handsome structure, and the latter which is one of the most conspicuous edifices in the city, enriched with paintings by Correggio and others the Benedictine monastery of San Lodovico, remarkable chiefly for an apartment called the Camera di Correggio, on the walls of which that distinguished painter was induced, for the gratification of his whims, to exhibit Diana and her nymphs in forms and drapery, beautiful certainly but not more beautiful than vulgarous the old ducal palace, a somewhat gloomy and rambling pile, with a modern facade and adjoining it the Filippi, a large and imposing, though unfinished edifice, intended to form part of a new palace, and leading by a magnificent staircase to the Teatro Farnese, the Museo della Antichita, the ducal library, and the Academy and Gallery of the Fine Arts; the governor's palace, surmounted by a tower; and the townhouse, a fine but unfinished Tuscan structure, the lower part of which is used as a corn-market. The principal educational establishments are the Semple Superiori in which a complete professional education is given the collegio di Maria Luigia, and of St. Orsola, the diocesan seminary and the gymnasium. The benevolent institutions are numerous, and include the Ospedale della Misericordia, occupying a handsome Doric edifice, and capable of receiving 500 patients the lunatic asylum, or central hospital of Pazzi, the orphan, mendicant, maternity, and foundling hospitals the *mont-de-piété*, and infant asylum. The manufactures are of silk, and mixed silk goods, cotton, woollen carpets, fringe, lace, sequins, and common earthenware; hats, carriages, furniture, sword cutlery, glass, wax and tallow candles, glass, confectionery, and musical instruments. There are also several silk-mills, tanneries, dye works, saltpetre works, and paper mills. The trade includes some of the above articles of manufacture, but consists chiefly of corn, silk, poultry, wine, and salted provisions. Parma is the residence of the sovereign the seat of a bishop, the seat of government, of the supreme court, and all the most important offices of the state. It claims to be of Etruscan origin, though in the first notice of it, it is spoken of as a Roman colony. It suffered so much during the French wars, as to become almost deserted, and having been repopled by Augustus, took the name of Augusta Julia Colo-

nia. Its history in more modern times being identical with that of the dusky does not require to be repeated. P 40 986.

PARAHIBA, a tn. and seaport Brazil, prov Piahi. r bank river of same name, about 12 m. from the sea, and 800 m. N.E. of Bahia. The streets are wide, but unpaved. It has a court of law, two churches, a custom-house, and a considerable trade in cotton, beef brought from the interior and dried hides, and is the only seaport of the prov., but admits only vessels of 150 tons. Pop. dist., 10,000.

PARAHIBA, a river, Brazil, which rises in the W slope of the Serra-da-Tahatunga, in the N.E. of prov Goyas, flows N.E. forms the boundary between provs Piahi and Maranhão, and falls into the Atlantic below Parahiba. lat. 2° 50' S. lon. 41° 20' W. total course, about 800 m., of which about 600 m. are navigable. The main streams at its mouth is about 1 m. wide and has never less than 4 yds to seven fathoms water. Its chief affluents on the right are the Urupin, Gorgues, Piahi, Sambilo, and Longa, and on the left the Balas.

PARASSUS, or **IAKHTURA**, now called **ZAGORA**, a mountain, N Greece, Iavdia, about 65 m. N.W. Athens. It forms part of the Hellenic chain which separates the waters of the Ionian Sea from those of the Archipelago and attains the height of 9355 ft. Parnassus was in classic times the sacred haunt of the Muses, and possesses, among other celebrated spots, the Castalian spring and the temple of Delphi, the site of which, on the S. side of the mountain, is now occupied by the town of Gestr.

PARNDON, two pars. Eng Essex.—1 (*Great*) 2211 ac Pop. 488.—2 (*Little*) 584 ac. Pop. 62.

PARNDORF or **PANDORF** a vil Hungary, co Wieselburg, near Bruck, on the Lette, with some trade in corn and sheep. Pop. 194.

PARNELIAH, a tn. Hindoostan, prov and 100 m. W Bagpore, with the suburbs of Pownah.

PARO, a tn. Hindoostan, prov Botan, 28 m. N by W Omba, with a castle of considerable strength, manufactures of images and arms, particularly swords, daggers, and the barbs of arrows.

PARODI, a vil and com Italy Piedmont div Genoa, prov Nov. It is well built, has several churches and a trade in excellent wax. Pop. 5867.

PAROLA, a Hindoostan, prov Candahar 85 m. S.W. Boorhanpour, a large and well-built place, strongly fortified.

PAROAMISAN, **MOLTAINE**. See **APOMAXISTAS**.

PAROS, an isl. Grecian Archipelago, one of the Cyclades 4 m. W of Naxos lat. 37° N lon 25° 10' E length, N.E. to S.W. 18 m breadth, 10 m. on the N where it is indented by two deep bays between which the land projects N and forms a peninsula. It is generally mountainous, but the soil, though often rocky is fertile, and in some places well cultivated, yielding much corn, wine, fruit, and cotton, great numbers of sheep, goats, and swine are reared. Its marble was extensively worked in ancient times and is the material of which some of the most celebrated pieces of statuary are composed, among others the Medusa Venus, and the Lying Gladiator. Paroschia, a wretched place, occupies the site of the ancient Paros. Pop. 8000.

PARAMATTA, a tn. New S Wales. See **PARAMATTA**. **PARRETT**, a river England rises in a mountainous district on the frontiers of Dorsetshire, near Sherborne enters Somersetshire, traverses E.W.N.W. passing Ilchester, Langport, and Bridgewater; falls into Bridgewater Bay, total course, 85 m. Its principal affluents are the Cray in the right, and the Tone on the left. It is navigable to Langport about 20 m.

PARRILLÁ (**SAN-LORENZO-DE-ILA**) a vil Spain, New Castile, prov and 20 m. Lugo; with a townhouse, prison, hospital, primary school, several fountains, a church; agriculture, sheep-rearing and the manufacture of carns for wool-combing, and ordinary woollen and linen. Pop. 3929.

PARRY, or **MAYER**, an isl. S. Pacific Ocean lat. 20° 7' S. lon. 157° 11' W. 2 m. in diameter and not more than 40 ft. above sea-level. It is well wooded, and has a considerable number of inhabitants, who have been converted to Christianity and have made great progress in civilization. **PARRY** (*Clare*).—1 British N. America the N.E. extremity of the peninsula on the E. side of Franklin Bay, lat. 70° 6' N. lon. 125° 35' W (N.).—2, E. coast, Greenland,

lat. 72° 32' N lon 22° 2' W (N.).—3 W. Greenland, S. head of Whale Sound near N. extremity of Ruffin's Bay, lat. 77° 6' N. 71° 28' W (N.).

PARRY'S GROUP a number of small isles and pointed rocks, forming the N. cluster of the Archipelago, or South Islands, N. Pacific Ocean lat. 27° 45' N lon 142° 7' E Their proximity to Japan and also to the great open spaces, whaling ground, renders them important. They were taken possession of for the British crown and a small settlement from the Sandwich Islands has been formed upon them.

PARSON'S TOWN, a tn. Ireland. See **BRN**. **PARSONSTOWN** par Irei Louth 534 ac. Pop. 327.

PARTEHEIM a market tn. Hesse-Darmstadt, Rheinhessen, circle Alsey, with a church, a chapel, a synagogue, a castle, and two oil mills. Pop. 1845.

PARTENKIRCHEN, a market tn. Bavaria, 46 m. S.W. Munich with two churches, a Latin school, a mineral spring and a gymnasium quarry. Pop. 1055.

PARTHENAY (anc. *Parthenon*, or *Parthenocum*), a tn. France, dep. Deux-Sèvres, 25 m. N.E. Niort r. bank Thouet. It is in general badly built, streets very irregular. It has a church erected in the 9th century, a townhall, court-house, hospital theatre, ancient and strong prison, normal school and the gate of St. Jacques, a construction of the 13th century, surmounted by battlements and having two elliptical towers 65 ft. in height, manufacture of coarse cloth, serge, druggists, leather, and a trade in grain and cattle. Pop. 3909.

PARTICK a populous bor Scotland co. Lanark, on the Kelvin near its confluence with the Clyde, 2 m. W.N.W. Glasgow. It has an Established chapel a Free, and two U. Presbyteran churches an academy, and several schools extensive flour-mills and a cotton factory and near it are Newshield, ship-building yards, &c. It is a suburb of Glasgow, many of whose citizens reside here and for whose accommodation numerous handsome and pleasantly situated villas have been erected.

PARTICLES, par Irei Limerick 6490 ac. P. 1688.

PARTINICO a tn Sicily prov and 11 m. W.W. Palermo. Pop. 5000.

PARTNUT, par Eng Lincoln, 919 ac. Pop. 489.

PARTNUT, par Scot. Kirkcaldy, 7 m. by S. m. 808.

PARTIDGE ISLAND, Bay of Victoria, off S. coast, New Brunswick, near the entrance to St. John's harbour with a lighthouse having a fixed light 166 ft. above sea-level lat. 45° 14' 6" N lon 66° 30' W (N.).

PARTSCHEVDORF (Moravia) *Dartosceowice*, a tn. Austria, Moravia, 38 m. E. Olmitz with a church, and three mills. Pop. 2091.

PARU, a river Brazil, prov Para, which, after a S.E. course of about 300 m., enters the Amazon immediately above Almasima, or Paru.

PARUGA, or **PAROSCHOW**, a vil Hungary co. Neutra. It is a struggling place, and so near Neutra as to be properly its suburb. Pop. 3069.

PARVICH or **PARVICOM**, a small isl. Adriatic off Dalmania, circle Zara, between Veglia, on the N.W. and Arbe on the S. Pop. 1000.

PARWIG par Eng Derby 3247 ac. Pop. 493.

PAS DE CALAIS, a dep. France, bounded, N. by Strait of Dover W. English Channel S. by Somme, E. and E. by dep. Nord length, N.W. to S.E. 89 m. average breadth, about 84 m. area, 2505 sq m. The coast is generally flat being only protected from the sea by a series of low sand-hills, of considerable breadth. In the neighbourhood of Boulogne, however, the beach attains a considerable elevation and is composed of a crumbling cliff, which is constantly yielding to the action of the waves. The interior also is for the most part flat, with a general slope towards the N.E., but a chain of hills stretches from Abbeville, and terminates in the cliffs of Boulogne, already mentioned. Its chief streams are the Aa, Lys, Scarpe, Liane, Canche, and Authie most of which are navigable within the department, which has, moreover the advantage of additional water communication by means of the canals of Calais, St. Omer, Ardres, and Le Marck Boulogne and Calais, its best harbours, are both shallow, and by no means easy of access. The soil, though not equally productive throughout, is in general excellent, producing in abundance all the ordinary

cereal and leguminous crops, large quantities of elongated seeds and fresh fish. The seeds also, both natural and artificial, are extensive, but in many parts, owing to the fitness of the surface, and the consequent elongation of the streams, there is a good deal both of marshy ground and peat. The domestic animals are, in general, of inferior breeds. The fishing on the coast, particularly in the neighborhood of Boulogne, for the supply of the Paris market, is very active. A good deal of coal is worked, but the quality is so indifferent, as to be scarcely fit for domestic purposes. There is little iron. Pipes and pottery clay are both good and abundant; and there are many fine quantities of sandstone. The principal manufactures are common woollens, linens, hosiery, stone and earthen ware, paper, leather, oil, starch, spirits, and best-coat sugar. The trade is chiefly in corn, olaginous seeds, oil, wax, and pottery. Pas-de-Calais is divided into 5 arrondissements—Arras, the capital Bethune, Boulogne, Montreuil, St. Omer. St. Pol subdivided into 43 cantons, and 903 communes. Pop. (1853) 692,994.

PARAGUAY, a in Spain, Guipuzcoa, prov. Guipuzcoa, on the Bay of Biscay 5 m. E. N. E. St. Sebastian with two parishes, churches, a Jesuit college, a primary and two private schools, an old castle, a custom-house, a courthouse, and a good harbor at which a considerable trade is carried on. P. 961.

PASARON a tn. Spain, Estramadura, prov. and V. E. Cáceres with a church, an ancient castle, a townhouse place, and primary school manufactures of linen wax, and earthenware and several oil and flour mills. Pop. 1479.

PASAGOUILA a river and sound, U. States the former in Mississippi, formed by the union of the Chickasaw bay and the Leaf and falling into the sound after a S. course of 200 m. for 50 m. of which it is navigable for small vessels and for boats 150 m. The sound is situated off the mouth of the preceding in the Gulf of Mexico, states of Mississippi and Alabama. It is about 55 m. long, average breadth, 8 m. separated from the Gulf of Mexico by a number of low, narrow islands.

PASCO a tn. Peru, dep. Junin 140 m. N. E. Lima lat. 11° S. lon. 75° 55' W. 18,000 ft. to 14,000 ft. above sea-level. It is mostly built, but contains a population fluctuating between 12,000 and 16,000, according to the state of the mine in its vicinity. It is surrounded on three sides, N. E. and S. E., by hills of blue limestone, on the W. the hills are of sandstone, and on the S. W. of a blue slate. In particular spots, the silver is found mixed with lead and copper and at variable depths in different localities.

PASCUARÓ or PATZUARÓ, a tn. Mexico, dep. Michoacan, E. bank lake of its name, 50 m. S. W. Valladolid. Near it are copper-mines. Pop. 6900.

PASEWALK, a walked tn. Prussia, gov. and 27 m. W. by N. Stettin r. bank Ucker. It has a court of law, two churches and two hospitals and a distillery. It is an ancient place, and formed one of the towns of the Hanseatic league. In 1760 the Prussians were defeated here by the Swedes. Pop. 7347.

PASIG a tn. Philippines, isl. Luzon, prov. Tondo, on the Pang. E. of Manila. It has a handsome church and a seminary. Pop. 16,440.

PASIG a river Philippines, isl. Luzon, issues by seven branches from Lake Bay flows W. and falls into the bay immediately below the town of Manila, after a course of 16 m. It is of great width and depth at its mouth, and is navigable by vessels of 400 to 500 tons, up to the bridge of Manila and, but for that interruption, might be navigated to a much greater distance. Above the bridge, its channel presents a lively scene, from the number of barges, pinasses, and canoes which are constantly plying upon it, and bringing the productions of the interior to the capital. It is abundantly supplied with fish.

PASIGAN two of the Philippines isla. E. of Leyte, W. of Zebu, and N. of Bohol near lat. 10° 30' N. lon. 116° 30' E.

PASITANO, a tn. Naples, prov. Principato-Citra, on the Gulf and 15 m. W. S. W. Salerno with a church, and a small harbor at which a considerable trade is carried on. Flavio Gioia, who is said to have invented the mariner's compass, was born here. Pop. 4000.

PASMAN, an isl. Austria, off Dalmatia, and S. E. E. Zara, about 9 m. long S. E. to N. W. with several villages. It is well covered with olive plantations and vineyards.

PASO (Rio), a scattered vil. Caceres, lat. Palma, with a prison, a school, and manufactures of household linen; and silk-wool weaving. Pop. 1337.

PASO-MEZ-NOBRE, a tn. Mexican Confederation, dep. and 280 m. N. Chihuahua, 1 bank Rio-Grande, at the foot of the mountains, in a wide and fertile plain. It consists of the towns proper which is a place of some strength, and might be made of much importance as a military post, and of suburbs, stretching for a long distance along the stream, and has an extensive trade in maize, wheat, wine, and a spirit distilled from the grape, and called by the Americans 'Fesa whiskey' Fesa has acquired additional importance since it became a frontier town between the Mexican and the U. States republics, but it is still far from having attained the splendour which, judging from ruins in its vicinity it must once have possessed. Pop. about 10,000.

PASPATA a river Bolivia rises W. of Potosi flows first E., then S. E. and after a course of nearly 200 m., joins 1 bank Pileomayo.

PASSAGE (RAYS and Water) two small seaport tns. Ireland.—1 (Rays), on, and 6 m. S. E. Waterford, r. bank Sid; with a market-house, a Protestant and a R. Catholic chapel and two schools. Pop. 664.—2 (Water) on, and 6 m. S. E. Cork, with which it is connected by railway, with a church, a Methodist and a R. Catholic chapel, four schools and an extensive dock yard. The condition of the people here is, in general miserable. Pop. 2857.

PASSAGE ISLAND W. India. See COLOMBIA.

PASSAGE (Lay), a vil. France, dep. Lot-et-Garonne, 1½ m. from Agen, on the Garonne. Pop. 1338.

PASSAMAQUODDY river N. America, St. Chas. (St.)

PASSAMAQUODDY BAY an inlet, Atlantic, coast of N. America, partly in Maine, and partly in New Brunswick. It extends about 12 m. inland; and at its entrance, which is divided into two passages by the islands of Campobello, it is about 6 m. wide. It is never closed by ice, affords excellent shelter and has throughout a sufficient depth of water for ships of the heaviest burden. Its waters swarm with fish, comprising mackerel, cod, and herring.

PASSARIANO a tn. kingdom of Italy, gov. Venice prov. and 15 m. S. W. Udine with a church, an old castle, and an extensive paper and two other mills. Pop. 3000.

PASSAROVITZ, a small tn. European Turkey Servia, 12 m. E. by S. Semendria, chiefly remarkable for a treaty concluded here between Charles VI and the Porte, in July 1718.

PASSAU (anc. Benederum) a tn. Lower Bavaria in a fertile soil in by high mountains and bustling predilect, at the confluence of the Ill, Inn, and Danube, 91 m. E. N. E. Munich. It stands on the S. E. frontier of the kingdom, and is a place of great consequence, being strongly fortified both by nature and art. It consists of four parts—Passau proper, built in the form of a triangle on the tongue of land between r. bank Danube, and l. bank Inn, Innstadt, r. bank Inn, Anger a suburb l. bank Danube, adjoining Oberhaus, a fort strongly situated on a height 417 ft. above the river, and Ilautz, also l. bank Danube, but likewise traversed by the Ill. These parts communicate with each other by bridges, particularly two wooden ones of great length, across the Danube and the Inn, which are here nearly of equal magnitude. It contains few buildings of much interest; the principal are the cathedral, a handsome modern structure in the Italian style, with a bell-shaped cupola, the bishop's palace church of St. Michael the Jesuit college, now converted into a lyceum the townhouse, gymnasium, library, theatre, assembly rooms, industrial school, lunatic asylum, infirmary, and several hospitals. The manufactures consist of iron, copper and earthen ware, porcelain, crucibles, tobacco and such bones. There are also several extensive breweries. The trade embraces a considerable number of articles, but the most important are linen and ironware. Passau is the see of a bishop, and possesses several provincial and city courts and offices. It is famous for the treaty signed in it in 1552, when Charles V., intimidated by the veterans of Maurice of Saxony was compelled to do justice to the Protestants, and secure them a full toleration. Pop. 10,211.

PASSCHENDAELE, vil. and com. Belgium, prov. W. Flanders, 28 m. S. E. W. Bruges, inhabitants employed in weaving and tailoring. Pop. 5014.

PASSEK.—1, A vil. Bohemia, circle Brunsau, 4 m. from Hochstadt; with a church, a cotton-factory, a saw, and several other mills, and a trade in timber. Pop. 1893.—2, A vil. Meersau, circle Olmitz, 9 m. from Litau, with a church, an oil, a saw, and a flour mill. Pop. 1904.

PASSENHAM per Pop. Northampton; 2980 ac. P 989
PASSENBERG, or **PASSBERG**, a tn. Prussia, prov. and 75 m. S. by R. Königsberg, between lakes Lalsch and Kalben. It has a Protestant church, manufactures of linen, and an active fishery. Pop. 1371.

PASSERO, or **PASSARO** [anc. *Pachymus Promontorium*], a cape, S.E. extremity of Sicily; lat. 36° 41' 30" N. lon. 15° 5' E. (z). It is a low, rocky point, S.W. Passero Island, and forms the E. side of the cove of Porto Paolo the coast has a dreary and desolate appearance. In 1718, an English boat defeated a Spanish fleet.

PASSO-DO-LINHA, a tn. Brazil, prov. on the lake, and 20 m. E. Maranhão, on the São-John, with a church, and a primary school. excellent tobacco, rice, and millet are raised, and some timber cut, and fish caught.

PASSOROROLAN, **PASSOROKAR**, or **PASSOROKWANG**, a prov. E. and, lat. Java bounded, N. by the Strait of Madura, S. the Indian Ocean, E. prov. Bencoolen, and W. Kediri and Soerabaya, about 68 m. long, N. to E., and 40 m. broad, cap. Passorokar. The E. coast is level, but the S. is rocky and uninhabited. numerous small streams enter the sea on both coasts, but none of them is of commercial importance. There is a good deal of barren and waste land in the province, and also considerable tracts of well-cultivated ground the soil, especially in the hilly parts being in general fertile. Coffee, sugar, rice, cotton, tobacco and indigo are cultivated the last only for native consumption. Coconut nut, rattan, bamboe, rice, various gum-trees, passing mango, banana, &c., are among the vegetable products. Dyer, legum. sugar-cane, cayenne, pepper, &c., and about 70 sorts of birds, are met with and fish are plentiful. It is divided into three governments—Passorokar, Bangli, and Malang, and subdivided into 20 districts. Pop. 810,000. The towns on the Strait of Madura, about 30 m. S.E. Soerabaya, is intersected by a river here crossed by a large elegant bridge. Its streets are broad, planted with tamarind trees, and contain a number of good European houses. It has also a church, a government-house, and a school. Numerous residences of native nobles, a money market-place, and an active trade, all contributing to give the place a lively aspect. Its roads are protected by a fort, and vessels passing for Soerabaya here take in pilots.

PASSY a vil. and com. France dep. Haute Saône, prov. Faneogoy 8 m. N.W. St. Germaine on a height above a bank Arve. It has two churches, and a trade in corn and fruit, particularly excellent prunes. Pop. 2040.

PASSY or **PASSY-LES-PAINS**, a vil. France, W. and almost touching the walls of Paris, so as to be properly only one of its suburbs. It lies along the side of an eminence, or bank Seine, overlooking the Champ-de-Mars, and is well built. There is also a considerable number of hotels and taverns, where many of the Parisians spend their holidays, and drink their wine at a cheaper rate than they can do within the barriers. Pop. 5625.

PASTAQA, a river S. America, rising in the Andes of Ecuador near Chumbaro, and after a S.E. course of about 400 m. empties the Amazon in lat. 4° 45' S. lon. 75° 30' W.

PASTRANA, a tn. Naples, prov. Larino, dist. and N. Gasta; with several churches, and an hospital. Pop. 1625.

PASTO, a tn. Ecuador, dep. Cuzco, 8000 ft. to 9000 ft. above sea-level, 140 m. N.E. Quito with a beautiful church, and some traffic in finished wood-work. Pop. about 7000.

PASTON, two par. Eng.—1, Norfolk, 1446 ac. Pop. 808.—2, Northampton 2150 ac. Pop. 1058.

PASTOR-BOM, a tn. Brazil, prov. and 290 m. S. Maranhão, between the Paraiba and the Itapicuru. It has a church, and some trade in cattle and cotton.

PASTRANA, a tn. Spain, New Castile, prov. Guadalupe, 37 m. E. Madrid, with a palace, a cathedral, a church, two primary schools, several convents and hermitages, a flour and two oil mills, and manufactures of hemp, paper, and hats. Pop. 2198.

PASTZO, a market tn. Hungary, Hither Themas, on Hervas, on the Sava, 41 m. N.E. Pesth with a church, a synagogue, and a Cistercian abbey. Pop. 4710.

PATA, two places, Hungary.—1 A vil. Thither Danube, co. Buzsag, 23 m. W. Fünfkirchen with a church, and a trade in corn. Pop. 1074.—2, A market tn. Hither Themas, co. Hervas, 89 m. N.E. Pesth, with a church. Pop. 2390.

PATA, a small ad. Socio Archipelago lat. 3° 40' N. lon. 121° E., inhabited, and contains a good stock of cattle, also some pla. of white sulphate earth.

PATA, or **PATTA**, an isl. and to E. coast, Africa, the latter in lat. 2° 8' S. lon. 41° E. The island lies between Knyd Bay to the N. and Pata Bay to the S., while it is separated from the continent on the W. by a creek named Mocanda. It is about 12 m. long E. to W., and contained formerly three large and busy towns—Siu (now Sivil) Ampass, and Pata. Ampass, or as the natives would call it, Kpda, on the E. coast, was destroyed by the Portuguese in 1507, and seems to have never recovered its importance. Siu, on the inlet N. of the island rarely visited and never yet described by Europeans, is still, we believe, a considerable town, and held out against the Sultan of Muscat till 1840. Pata, on the S. side of the island, often sacked, but never retained by the Portuguese, continued long to rank among the chief places on the coast. Towards the end of the last century when the Arabs of Omda were sorely pressed by the Wahab Pata recovered its independence, and ruled coast from Siu to the river Ota. But in 1817 it was compelled to submit to the Sultan of Muscat, the souvereign chief or Sultan of Pata finding refuge in Kfu, a town on an island about 20 m. up the Ota. Pata is at the present day a small town, widely scattered the stone houses have for the most part gone to ruins, and the inhabitants, from 8000 to 4000, live in huts made of reeds closely interwoven, or of wattles plastered with mud, and roofed with reeds. The industry peculiar to the place, which was once celebrated for its fine cotton cloth, is boat-building. The dhow (skiff) and chaloups, the native coasting vessels, generally about 60 ft. long, and 14 ft. wide, but often larger, are constructed here or in the neighbourhood.

PATAGONIA, the extreme S. portion of the continent of S. America, extending from the Rio Negro, lat. 39° N. to the Strait of Magellan, lat. 53° S. 970 m. with a breadth varying from 420 m. to 200 m. It comprises two regions, differing in surface and climate, the one lying on the W. side of the Strait of Magellan, and the other on the E. and called respectively Eastern and Western Patagonia. The latter comprehends a number of large islands extending from the W. extremity of the Strait of Magellan to Cape Tres Montes, lat. 47° S. The principal are the islands Adelaide, Haavoor, and Wellington the last 150 m. long and in some places 80 m. broad. All these islands are rocky and high, rising from the shores with a steep acclivity. The coasts which front the Pacific are bare being almost continually washed by rains, and beaten by violent winds, but those parts which lie opposite the mainland are wooded, and in some places the trees are high, and of vigorous growth. E. Patagonia, though generally low and level is not one universal flat, but a succession of slightly horizontal plains, called pampas, at higher and higher levels, separated by long lines of cliffs or escarpments. The ascent, however, is but slight, being not more than 8000 ft. above sea-level at the foot of the Andes. The Patagonian plains are dreary and sterile, and, though here and there intersected by streams, the latter fail to fertilize the bleached soil. They are strewn throughout their whole extent with huge boulders. The plains, which extend along the coast for hundreds of miles, are tertiary strata, in one great deposit, above which lies a thick stratum of a white pumaceous substance, extending at least 500 m., a tenth part of which consists of marls. Indurated. Over the whole lies the shingle, spread over the coast for 700 m. in length, with a mean breadth of 300 m., and 50 ft. thick. These myriads of pebbles chiefly of porphyry, have been torn from the rocks of the Andes, and water-cours at a period subsequent to the deposition of the tertiary strata. The ports on the R. coast are difficult of access, and afford little security to any but small vessels. The tide here rises from 30 to 50 ft., increasing in height S. The principal known ports are Gallegos, lat. 51° 39' S.; Port Santa Cruz, lat. 50° 7' S.; Port San Julian, lat. 48° 12' S.; Port Desire, lat. 47° 6' S.; Nuevo Gulf, lat. 48° S.; and Port St. Antonio, lat. 41° S. The climate is very cold, especially S. of 45° Frost frequently occurs as soon as the sun has passed N. of

the equator in summer the heat is excessive. The transition from the extreme of temperature is rapid after hot weather passing winds often rush in hurricanes over the desert, which even the native sheen. Rain seldom falls during three-fourths of the year and even during the three winter months very little falls from time to time it rains two or three days in succession. The prevailing winds are from the W. S. of 45° vegetation is nearly extinct, a tree or spot of green herbage appearing here and there only in some hollow places and ravines a few dark-looking shrubby bushes grow, but no trees can be discerned over the wide story plains a few withered shrubs, and a yellow kind of herbage, is all in the way of vegetation that can be seen in these dreary regions. In the more N parts a solitary umbel, the only tree that grows there, is observed at vast distances in those N parts where some vegetation is found, guanaco, cavies, armadillos, and muses abound. There are also pumas, wolves, and dogs and along the coast of the Atlantic, seals of various kinds are met with. Fish abound on the coasts.

The aboriginal natives of E. Patagonia, though by no means so large as they have been described, few of them exceed six feet and some inches, are a tall and extremely stout race. Their bodies are bulky, their heads and features large,

NATIVES OF PATAGONIA.—From Henry De la Harpe, 1845.

but the hands and feet are comparatively small. Their limbs are neither so muscular nor so large-boned as their height and apparent bulk would induce one to suppose. Their colour is a rich reddish-brown. Nothing is worn upon the head except their rough, leath, and coarse black hair which is tied above the temples with a fillet of plaited or twisted awns. A large mantle, made of skin sewed together loosely gathered about them, hanging from the shoulders to their ankles, adds to the bulkiness of their appearance. In general, the women's stature, physiognomy and dress, so much resemble those of the men, that, except by their hair it is difficult for a stranger to distinguish them. The mouth is large and coarsely formed, with thick lips, but the teeth are often very good. They are generally of good dispositions, but like other Indians, are utterly reckless in moments of passion. Their arms are balls, lances, bows and arrows. The balls are two or three round stones, made of hardened earth or metal. They are connected by thongs of hide, and are thrown, after a brief rotary motion, with such precision as to insure the entanglement of their victim. The Patagonians are excellent horsemen, and perform extraordinary feats of dexterity on horseback.

W. Patagonia, in direct contrast to the E. country, is wholly a mountainous region; the mountains half sunk in ocean,

barren to seaward, and impenetrably wooded inland. The climate is so disagreeable as to render the country almost uninhabitable. Clouds, wind, and rain are continual in their annoyance, and the dreariest land is never tried up by evaporation better fresh showers fall. No part of the country is cultivated—the inhabitants living on their horses, and by the chase of the wild cattle which are found in the N districts.—(Voyages, *Adventures and People, Jour Roy Soc. Soc., etc.*)

PATAJ, a market in Hungary, Rither Danube, ss. Feeth with two churches. Pop. 8778.

PATAK, two places, Hungary:—1 (or *Potok*) A vil. Rither Danube, on Neograd, with a church. P. 1177.—2 (Gurce, *Nagy, or Zettel*) A market in Rither Theiss, on, and 14 m. S W Zemplin on the Bodrogo, here crossed by a bridge with two churches, a castle, Protestant college, R. Catholic head national school, and Jews school, and a considerable trade in corn, wine, cattle, and fish. Near it is an extensive quarry from which excellent millstones are obtained. Pop. 6008.

PATAKA several places, Hungary particularly:—1 (Mona) A vil., on Neograd on the Elpai, about 7 m. from Zelene, with a church a mineral spring, a saw and a flour mill, and a trade in timber. Pop. 1804.—2 (Ozka) A vil., on Rither on the Bago with a church, a handsome chateau, with a park in the English style iron-works, and valuable iron and copper mines. Pop. 967.

PATAN a vil. Cashmere 25 m. N W Srinagar lat. 34° 7' N lon 74° 31' E. with the remains of two ancient buildings containing well-carved and graceful figures of Vishnu and Lohani.

PATANAGO a to Burmah 1 bank Irrawadi, 78 m. N by W Prome. Near it are noted asphaltum wells.

PATARA, a ruined city, Asiatic Turkey, 37 m. S S E. Makra, in the valley of the Xanthus, whose estuary to the N of the town, once a splendid bay, is now a desert of moving sand, through which the river winds its way to the sea. It was long an important place, with a famous temple of Apollo, but now, among its extensive ruins, contains few early Greek remains.

PATANY [Patani] a prov. Malay peninsula, E coast, extremely fertile in rice. Salt also is obtained in abundance. Its principal town, of the same name, is in lat 7° N, lon 101° 25' E. N. E. the town at the entrance of the Gulf of Siam, in Cape Patany, lat. 7° 4' N, lon. 101° 15' E. (1) **PATAPCO**, a river U States, Maryland, flowing S. E. and falling, by a broad estuary into Chesapeake Bay between Points North and Bodkin. It is navigable 14 m. far above drawing 18 ft. water.

PATAY [anc. Paternum], a vil. and com France, dep. Loiret, 14 m. N W Orleans, with manufactures of woollen covers. It is famous for the defeat of the English by Joan of Arc in 1429. Pop. 1178.

PATCHEAM par Eng. Sussex 4993 ss. P. 490.

PATER, or **PATEROS DOCE**. See **PATEROS**.

PATFENA, several places, Spain, particularly:—1 A tn. Andalusia, prov. and 20 m. N W Almeria, with a church, prison, primary school a mineral spring an oil and several flour mills, and a trade in agricultural produce. P. 1294.—2 A tn. Valencia, prov. and about 89 m. from Alcoicete with a church courthouses, prison, primary school, several mills, and a trade in corn, wool, and wood. P. 1165.—3 A tn, prov. and 8 m. W N W Valencia, 1 bank Turia, with a church, an old castle of the Marquis of Murofona a courthouses, prison, primary school manufactures of linen and cotton cloth, numerous flour-mills, and a trade in corn, maize, and fruit. P. 1805.—4, (*del Campo*) A tn. Andalusia, prov. and 6 m. N E. Huelva, with a church, a suppressed Carmelite monastery, now used as a school, an old palace in ruins, a tavern-house, hospital, and a trade chiefly in corn, but partly also in oil, wine, and honey. P. 1678.—5, (*de la Sierra*) A vil. Andalusia, prov. and 54 m. E. Cadix, with two schools, two foundries and a church. Pop. (aggregated) 2468.

PATERNO three tns. kingdom of Italy:—1 A tn. prov. Calabria-Citra, dist. and 5 m. S Cosenza, with five churches, and a convent. P. 2090.—2 A tn. prov. Piamonte-Ultra dist. and W N W San Angelo de Lombardi, with six churches. P. 2400.—3, [anc. *Ephra Major*] A tn. Sicily, dist. and 10 m. N. W. Catania. It is a very motley place, and contains, among other antiquities, a tomb, the remains of

baths, a grotto which bears the name of the nymph Thalin, an aqueduct, and the ruins of a large bridge over the Simeto. Near it are numerous mineral springs and a salt-works. P 9808

PATERMOSTERS (Great and Little) the former an extensive group of islands in the Java Sea. lat. 6° 25' to 7° 42' S; lon. 117° to 118° E. separated over a space of 190 m. in length, N. E. to S. W. and 80 m. in breadth, the latter a similar but less extensive cluster in the Macassar Strait, between Celebes and Borneo lat. 2° 8' S. lon. 117° 58' E. (h) They are covered with trees and have navigable channels between them but the anchorage is uneven.

PATERSON, a town in the State of New Jersey on the Passaic, near its celebrated falls, communicating by two bridges with Manchester which may be considered as its suburb, and on a branch of the Erie railroad 17 m. W. N. W. New York. Among its buildings and establishments are 15 churches, a courthouse and jail, a philosophical society with a valuable library, a mechanics society with a library and philosophical apparatus, an academy, and numerous schools. The great command of water-power early led to the selection of Paterson for the erection of numerous public works, among which are 20 cotton and several woolen factories dye and print works, machine-shops gunneries saw paper and filling mills, &c. The falls are situated on a basaltic precipice about 60 ft. high over which the river after rushing over its rocky bed is precipitated into a chasm, and afterwards emerges through a fissure. They have lost much of their original grandeur especially in the dry season from the diversion of the water by a dam to supply the numerous factories. 1 op. 11,839

PATERSON or **YIMLANE** a river New S. Wales rises in a mountainous district in N. E. of St. Durham, about lat. 32° S. lon. 151° 30' P. flows S. E. E. and joins the bank Hunter at Hinton. Its chief affluents are the Allen, which joins its L. bank, and the small town of Paterson.

PATERSON or **MANGALAZETTA** a group of islands in the Pacific, Marshall Archipelago, lat. 8° 53' 48" N. lon. 167° 43' P. They have a very fertile appearance, presenting one continuous chain of coconut trees.

PATHEHEAD, two places, Scotland — 1 A town in Fife, forming the E. suburb of Kirkcaldy. It is regularly built and has a handsome Established chapel a Free and a C. Presbyterian church and several schools. Many of the inhabitants are non-farming people, but the generality of them are handloom weavers, the manufacture of toiles and shawls being carried on here to a great extent. Near it, on a bold projecting rock on the Firth of Forth stands the old castle of Ravenscraig formerly the seat of the St. Clairs, Earls of Orkney 1 op. 3977 — 2 A village in Edinburgh, 4½ m. S. E. Dalkeith 1 op. 1840

PATIA a river, New Granada rises near Popayan flows S. W. and N. W. forming part of the boundary towards Ecuador and falls into the Pacific by several mouths, the chief of which are at Point Mariano and Point Guacacoma total course, 200 m.

PATIBRON a village in Hungary on Odenburg, on Lake Neusiedler with a considerable trade in wine and wool. Pop. 1840

PATJITAN, a prov., S. coast of Java bounded N. by prov. Madag. E. Kediri, W. Boenkarta, and S. the Indian Ocean about 55 m. long E. to W. by 90 m. broad. Its coast is rocky, and to the interior it is mountainous, and not well suited for agriculture. Of its many streams, none of them important, the chief are Patjitan, Kotjan, Lotrok, and Panggel. A trade is carried on with the neighbouring provinces in buffaloes tobacco, gambier iron, oil, cotton, hides, and dried fish. Patjitan at one time formed part of the kingdom of Djogjakarta, but was ceded, in 1812, by the Sultan to the British.

PATJITAN, a vil., Java above prov. at the mouth of the river and on the bay of same name. It has a roadstead

Vol. II.

protected by a fort and the products of the interior may be shipped here direct to Europe. — The bay is large and roomy and open to the S. On its E. side there is good anchorage and behind its N. point is Pollux Bay which is well sheltered from the S. wind.

PATKA a vil. Hungary Thither Danube on Strahlsweinsburg, with two churches. Large cars are taken in a lake near it. Pop. 2020.

PATMOR, or **St. Giovanni in Patino** an isl. Turkey in Asia, in the Grecian Archipelago, about 23 m. S. S. W. Samos, lat. 37° 17' N. lon. 26° 25' E. greatest length N. to S., 12 m.; breadth nearly 6 m. circuit, about 28 m. It is very bleak and mountainous, consisting of an irregular mass of rock, unwooded, bare and barren. Where there is soil deep enough to admit of cultivation it is not fertile, and produces some corn, wine, and vegetables, though in quantities far too limited to meet the consumption. The inhabitants have some manufactures of cotton the material of which is chiefly grown on the island, but their chief subsistence is derived from fishing and commerce. For carrying on the latter they have the advantage of several good harbours, among others, that of La Kala, which, protected by projecting capes is one of the safest ports in the Sporades. The principal town takes the name of Patmos, and is sometimes also called St. John. It stands on the edge of a mountain, and is reached by a steep and rugged ascent. It consists of about 200 houses, built of a white brown stone generally adorned with balconies, and presenting a pleasing appearance. On a height above the town stands a large convent, surmounted by several irregular towers and resembling a fortress. In a grotto belonging to the convent is the supposed abode where the apostle John who had been banished by Domitian to the island A.D. 94, saw the visions which he has recorded in the book of Revelation. Pop. vil. about 4000.

PATNA a city, Hindoostan, presid. Bengal cap. prov. Behar and a dist. or collectorate, and the seat of one of the seven circuits courts of the presidency. It is on the bank of the Ganges, about 800 m. N. W. Calcutta lat. 25° 57' N. lon. 85° 10' E. The city proper surrounded by decayed Hindoo fortifications, is little more than 1½ m. in length by about half that extent in breadth but with its large suburbs, Patna stretches 9 m. along the Ganges and presents externally a striking appearance from the river many large and handsome flat-roofed houses with arched balconies, being interspersed with temples, mosques, Saracenic gateways of red stone, wide ghats or stairs from the water and bastions projecting into the stream the whole backed by a height on the land side. On its E. side is a large suburb in which are many large storehouses, and

PATNA.—Four Deaf's View in India

the palace and extensive gardens of Jaffer Khan, on the W. is the suburb Bankipore where are the E. I. Company's offices, and most of the residences of the European inhabitants. Internally the city has but one broad street, the others throughout are adapted only for pannycars or howdahs, or on elephants. The dwellings of the middle classes have much

of a Chinese character, each stage being surrounded by a verandah. The adjacent restaurants at Dinapore are handsome, and well laid out, in addition to a native house, a coral restaurant is stationed there. Patna is a stronghold of Mahomedanism in India; the Mussulmans are more fanatic there than in Bengal, and they celebrate their festivals with great magnificence, meeting sometimes around the monument of Shah Aram in the centre of the W suburb to the number it is reported, of 100,000.—(Bengal Chron.) A large trade is carried on in rice, opium, saltpetre, wheat, indigo, sugar and provisions generally amongst the manufacturers are table-linen, wax candles, bequested wares, talo goods, and bird cages, which last display much delicate workmanship. At Haseepoor on the opposite side of the Ganges a large fair is annually held, to which shawls, pearls, gems, gold ornaments, and all other kinds of Indian products are brought, and where visitors from the city and elsewhere live in camps, luxuriously fitted up during its continuance. Pop. of Patna (1837) 284,182.

—The territory of which it is the cap. is enclosed by the Ganges, and the dists of Shahabad and Bahar Area, 1828 sq. m. After Patna its chief towns are Dinapore, Phatuka, Bakrampore and Phoolwara Pop. 1,200,000.—(Trigonometrical Survey of India, Hamilton, Scroogers, Handbook of India, Roberts, second and 4th editions.)

PATNEY par Eng Wils 830 ac. Pop 184
PATNIAA, a tn. Bahawalpur and 50 m. E.S.E. Lahore, near 1 bank Amoo-Darya. It consists of about 100 houses, and is inhabited by Usbecks and Barts, who live chiefly by agriculture, and the sale of salt, obtained about 20 m. distant.

PATNA, a tn. Brazil prov and 300 m. W Parahiba, on the small river Espinassara with a church a school and a trade in cotton. Pop. 2000.

PATNA LUGANA prov a lake, Brazil, in S.E. of prov São-Pedro-do-Rio-Grande about 180 m. N.F. to N.W., near the coast, and in a direction almost parallel to it, with a width varying from 12 to 30 m. It receives the waters of Lakes Vinha and Mirim, the latter by a channel called the Rio-de-São-Gonçalo. On the S.E. it discharges itself into the sea by another channel which is about 4 m. broad, and is known by the name of Rio-Grande, though its length does not exceed 8 m.

PATNAH, or BAHABANDIA [see Patna] a seaport town, Greece, in N.W. of Morea, E. side gulf of Messenia, 10 m. S.E. W. Lepanto. It consists of several small villages, intersecting each other at right angles, several of them lined with arcades. Many of the houses are large, but the majority are only of one story, being built thus low as the best precaution against earthquakes, which are here very frequent. The public buildings include several churches, two hospitals, and a celebrated castle, of great strength, which the Turks after they had lost the rest of the country continued to hold during the greater part of the war of independence. The manufacturers consist chiefly of capotes made of a mixture of goat hair and wool, and famous throughout Greece, both for their quality and cheapness and the trade is chiefly in corn, wine, oil, fruit, particularly raisins, silk cotton wool and hides. Pop. about 7000.—The Gulf lies between the NW part of the Morea and Lysia, formed on the W by the capes of Sciroph and Papas, and communicating on the E. with the Gulf by the Strait of Lepanto greatest length, E. to W., about 30 m.; greatest breadth, 14 m. It is exposed to heavy swells, which makes its navigation difficult and somewhat dangerous, particularly in winter.

PATNEE, a tn. Hindostan, prov Gujarat, 44 m. S.E.E. Rajahmundry lat. 23° 7' N. lon. 71° 31' E. It is large and populous, defended by three walls in a state of decay.

PATRIA [see. Liburna Palus] a lake, prov and 18 m. N.W. Naples, about 1½ m. in circuit. Near it are the ruins of the ancient Lagna and the tomb of Scipio Africanus, who spent here the last seven years of his life.

PATUN a modern tn. Hindostan prov Ameer, 58 m. S.E. Kotah, lat. 24° 32' N. lon. 76° 16' E. It is well and commoditously built the streets are wide and regular and intersect each other at right angles. The whole is surrounded by a substantial wall, 8 ft. or 10 ft. thick, and from 12 ft. to 16 ft. high with round bastions.

PATUNAGEE a vil. and com. Belgium, prov Namur, 5 m. S.W. Mons. It is a scattered place, with numerous coal-pits near it, in which the inhabitants are mostly engaged. There are also a steam-engine factory, four breweries, and a corn-mill. Pop. 6866.

PATUXENT a river, U States Maryland, flows chiefly S.E. E. and enters Chesapeake Bay by a broad estuary, total course, 90 m. for 40 m. of which it is navigable for vessels of 250 tons.

PATZAU, or PATZOW a tn. Bohemia, 16 m. S.E. E. Tabor, with a castle, a church, townhouse, hospital school, manufactures of woollens, a dye-work, and three mills. Pop. 2621

PATYUM, or PATYUS, a tn. Central America, States and 40 m. W. N.W. Guatemala. Pop. 5400.

PAU (Latin, Paulus), a tn. France, cap. dep. Basses Pyrenees, on a lofty ridge, a bank Garonne de Pau, here crossed by a fine bridge, 56 m. S.E.E. Bayonne, lat. 43° 12' 30" N. lon. 0° 23' 30" E. and commanding a magnificent view of the W. Pyrenees. It has several squares, of which the Place Royale, with a finely planted promenade, and a marble statue of Henri IV. and the Place-de-la-Comedie, communicating with a suburb by a bridge which spans a deep ravine, are the most

deserving of notice. The most conspicuous and interesting edifice is the castle in which Henri IV was born, overlooking a lofty peak at the W. extremity of the town, and overhanging the Gave. It is a huge, angular, and irregular structure, flanked with towers, of which five still remain, the highest, or donjon, having a height of 100 ft. and another called the Tour-de-la-Monnoye being the traditional asylum which Margaret of Valois gave to Calvin and other persecuted reformers. Great part of the castle was restored in good taste, and provided with antique furniture acquired at great expense by the late king Louis-Philippe. It has a court of appeal for *deux Basses Pyrénées*, *Hauts Pyrénées*, and *Landes*, courts of first resort and commerce a university academy college, agricultural society, and society of sciences, literature, and art. The manufactures consist of tapestry, yarn and excellent table linen, rags, carpets, paper, and leather. The trade is in wine, Bayonne ham, salt provisions excellent chestnuts, printed cottons, iron &c. Pau has given birth to two sovereigns, Henri IV and Bernadotte. Pop. (1852), 14,541.

PAU (GAVE DE), a river France, formed at 1,500 ft. dep. *Hauts-Pyrénées*, by the junction of the Gave de Gavarnie, from Mont Pardou, and the Gave de Bages flows first N N W past Argenteuil, then N W across dep. Basses Pyrénées, and past the towns of Pau and Oloron enters dep. *Landes*, and turning almost due W joins 1 bank Adour after a course of about 85 m. Chief affluent, the Gave de Oloron.

PAUGARIMBO, a m. prov. and river Peru. The town situated upon the river and cap. prov. is about 60 m. E N E. Cuzco. The river consists of an extensive valley enclosed by the Andes is well wooded and is of considerable fertility producing wheat, barley, maize, fruits of various kinds, and cane. The river, called also Tambiri after a R. h. W. course of nearly 300 m. joins the bank Ayurmac. Its chief affluent is the Vilambamba.

PAULILLAC, a m. and port, France, dep. Gironde, 27 m. N N W Bordeaux, 1 bank Gironde. It has a pilot station, lighthouse, and good anchorage. Vessels too large to ascend laden to Bordeaux, usually discharge here and on-tow-ward bound ships take in provisions and water. The chief trade is in timber, grain, cattle, building-stone and the well known Medoc wines. Pop. 1850.

PAUL, two m. Eng. Cornwall 3433 n. Pop. 3448 —2, York (E. Riding), 1864 n. Pop. 864.

PAUSA, a m. Saxony circle and 24 m. S W Zwettau, with manufactures of linen hosiery and leather a bleachfield, dye-works and bathing establishment. Pop. 2760.

PAUTKA, a river S America, which rises in the E slope of the Andes, in the N W of Potosi, not far from Guayaquil flows N E and joins 1 bank Amazon a little above S. Fran. cisco de Borja, after a course of about 170 m. Its chief affluent is the Zamora, after receiving which, it becomes very gable, and is called the Santiago.

PAYENHAM, or PAYENHAM par Eng. Bedford, Bedford, 1840 a. Pop. 556.

PAVIA (anc. *Ticinum*) a city, Italy Lombardy, gov. and 19 m. S S W Milan, cap. deleg. of same name, beautifully situated 1 bank Ticino which here forms the boundary between Austrian Italy and the Sardegnian States, is crossed by a magnificent covered bridge of eight arches, and about 5 m. below the town falls into the Po. It is surrounded by ancient walls, which have a circuit of about 3 m., including a far larger space than its present inhabitants require and giving it in connection with numerous palaces either ruinous or untenanted, a deserted and melancholy look. It consists of a principal street, called the *Strada Nuova*, or *Corso*, which traverses it centrally, contains its most important edifices, and constitutes its great thoroughfare and of a great number of minor streets placed at right angles to the *Corso*, and occasionally opening into squares. Within the last 60 years 47

ecological edifices, including three of the largest and finest churches, have been demolished. Of those which remain, the most important are the Cathedral, a large, heavy unfinished structure, crowned with a lofty dome, remarkable chiefly for the air of gloom thrown around it, giving its interior the appearance of a vast cavern above ground, but containing some good paintings, and a beautiful side chapel, with the tomb of St. Agostino. San Michele, a heavy marble edifice, apparently of Lombard origin, and supposed to belong to the 6th or 7th century. Santa Maria del Carmine an enormous Gothic church of imposing exterior built in 1378, and possessed of good paintings; Incoronata, or Santa Maria de Capanovra, in the cinque-cento style by Bramante and San Francesco, built of the finest brick work, and presenting a beautiful specimen of pure Italian Gothic. The only other edifices particularly deserving of notice are the Castello, erected by Galeazzo Visconti 1480-50, on the site of the old palace of the Lombard kings once celebrated for its grandeur and magnificent collections, but now only a gloomy ruin partly fitted up as a barracks; the theatre, and several towers, once so numerous, that Pavia was nicknamed the city of the hundred towers. Of the few still existing those of Belorodi and Malino are the most conspicuous, and are each about 190 ft. high.

Among the educational establishments, the great boast and chief ornament of Pavia has long been its university which is one of the oldest in Italy having been founded by Charlemagne, and in its palmy days about the beginning of the 16th century was attended by about 3000 students. Its students still average 1600. The buildings which it occupies have little to recommend them beyond their size, and the regularity of their construction but the library of about 50,000 vols. is valuable, and the collections include among others, one of the best anatomical museums in existence. Beside the university there are three colleges connected with it, a gymnasium, an ecclesiastical seminary a school of painting a school of design and sculpture, an institute of fine arts, two superior and five minor elements, and two infant schools. Beyond the walls, but connected with its educational establishments, are botanical and agricultural gardens. The chief charitable endowments are a large and well-endowed general and two orphan hospitals, a *montepieta*, a house of industry and reform, a female penitentiary, &c. Pavia has not a single manufacture of any importance and its traffic is almost solely confined to the supply of its own local wants.

Pavia was a place of considerable importance during the reign of Augustus. It afterwards came into the possession of the Lombard kings who made it their capital and erected many edifices, more remarkable for magnitude than taste. Near it in 1525 the Imperialists defeated the French and took their king, Francis I. prisoner. Pavia has given birth to many distinguished men, among whom are, Pope John XIV. and Lanfranc, a celebrated theologian afterwards archbishop of Canterbury. Pop. 28,169.

PAVILLY [anc. *Pavilacum*] a town in France, dep. Seine-Inférieure, 13 m. N.W. by N. Rouen with manufactures of cotton goods. Pop. 5,122.

PAVLOV (or Pavlova), Russ. gov. and 45 m. S.W. Nijni Novgorod a bank Obs. Many of the houses are well built of brick, and there are several extensive establishments for the manufacture of various articles of hardware. Hence the town is sometimes called the Russian Birmingham.

PAVLOVSK two places, Russia.—1. A small town, gov. and 20 m. S.E. St. Petersburg, of very limited extent, but well built, with straight, well laid-out streets a small fort, which Peter the Great took from the Swedes a very pretty church a marine arsenal, and a military and a lying-in hospital. Its great attraction, however, is its imperial palace or chateau, with an extensive garden, laid out in the English style.—2. A town gov. and 68.5 E. Voronez a bank Don. It is well fortified and has four churches. The women work a great many worsted stockings and mittens. The trade is in fish, wine, and molasses. Pop. (1851) 3728.

PAVONE a vil. and com. Italy Lombardy prov. Brescia 4 m. N. Lecco, a bank Mella with three churches, and several mills. Pop. 1471.

PAVONI a town, Italy, Piedmont, div. Turin prov. and S. Ivrea with a Roman church and the remains of an old castle, and a trade in corn vegetables, and fruit. Pop. 2440.

PAWEKA a town, W. Africa, Gambia, on the route from the coast to Dahomey composed chiefly of low square huts, very neat and clean. It has several large markets, well supplied with provisions and different articles of manufacture, including native cloth, and English chequered handkerchiefs. Pop. about 16,000.

PAWLETT par. Eng. Somerset 8566 ac. P. 586.
PAWLUCKETT, a town U. States, nearly 7 miles south of Providence in Rhode Island, on both sides of the river at the falls (50 ft. high) of same name, and on the railways from Boston to Providence, and from Providence to Worcester. It occupies a pleasing site has seven churches, numerous and extensive cotton-mills, print-works and machine-shops considerable manufactures of boots, shoes, carriages, chairs, and cabinet-making building-yards, and an extensive trade. The first factory for weaving cotton cloth by water-power in the U. States, was erected here in 1790.

PAWTUCKET a vil. and port of entry U. States, Rhode Island, on both sides the Pawtucket, here crossed by a bridge, 5 m. S. Providence. It has two churches an academy three cotton and two woollen factories, and several grist-mills. The harbour is safe and convenient.

PAXO one of the Ionian Islands, 10 m. S. the S.E. extremity of Corfu and 7 m. W. of the S.E. coast of Albania, about 6 m. long N.W. to S.E. and nearly 3 m. broad surface extremely rugged and stony the chief products are olives, almonds, and vines. Considerable numbers of oxen and goats are reared on the pastures and fish are very abundant on the coast. The best harbour is in the channel between the S. shore of Paxo and the small island of Antiparo but the most frequented harbour as well as principal town, is Cayo on the S.E. side. Pop. about 5000.

PAXTON two par. Eng. Hunts —1. [Green], 1120 ac. P. 410.—2. [Lent], 2040 ac. P. 324.

PAYENDWEN a valley Burmah. See HUKONG.

PAYERNE or **PAYERNEN** a town and par. Switzerland, cant. Vaud a bank Broye here crossed by stone bridge bearing a Roman inscription, 10 m. W. Yverdon. It is an ancient place, surrounded by walls and thought, on the whole, poorly built, has two churches one of them a modern structure the other belonging originally to a Benedictine abbey founded in 961 by Bertha, Queen of Burgundy and now only used as a female school. Payerne has few manufactures, but, being centrally situated carries on a considerable transit trade, Pop. 3723.

PAYHMBURY, par. Eng. Devon 2698 ac. P. 544.
PAYN-GARDA or **WAIN-GURGA**, a river Hindostan rises in high table-land N. of prov. Gundwanah flows very circuitously first E. then S. and then S.W. and, after a course of above 200 m., joins a bank Wurda. Its chief affluent is the Khahan, which it receives on the right.

PAYTA, a seaport in Peru prov. Tuzillio, lat. 5° 5' 30" S., lon. 81° 5' 30" W. (x) between Seelins Bay and Cape Blanco. It is built on the alluvial and at the foot of a hill S.E. side of the bay, and at a distance is scarcely visible, the houses being of the same colour with the surrounding soil. They are slightly constructed of an open sort of basket-work which when the air blows freely at all times, blows the roofs, which are high and peaked are shatched with leaves. Some of the walls are plastered with mud, but, generally speaking they are left open. The town is said to contain 5000 inhabitants, and is the seaport of the province of Payta. The port is the best on this coast, and is frequented by vessels of all nations, who call there for cargoes, principally cotton, bark, hides, and drugs.

PAZ (La), a dep. Belvis, comprising, for the most part, those valleys of the Cordilleras, the streams from which combine to form the Rio-Bent. Its provinces are La Paz, Potosi, Sucre, Yungas, Oruro, Cochabamba, and Misiones, which extend from lat. 12° to 17° S. between the Andes and the Rio-Bent. Its population may be estimated at 240,000.—The provinces embrace the abrupt slopes which descend from the elevated plateau down to the palm forests and rich plains of the Yungas.

PAZ (La) DE AVACUCHO a city Bolivia, cap. above deep and prov. built in a deep ravine the Quebrada-de-Chucobachu, 620 ft. below the level of the Lake of Titicaca, lat. 13° 15' S. above sea-level, lat. 16° 39' 54" S. lon. 68° 30' 30" W. The ravine of La Paz descends S.E. in a diurnal formation, the stream which flows through it, from and round Illi-

ment the snowy summits of which are seen E. by S. is one of the chief sources of the Amazon. The city is built in an amphitheatre on both sides of the river, but the public edifices are chiefly on the E. bank. Nine fine bridges cross the two quarters; each of which is subdivided into several other sections by deep ravines. Of the fifteen churches in the city the Sagrario or cathedral claims most attention being large, and effectively, though somewhat coarsely ornamented with figures of angels executed in basalt. Opposite to the cathedral is the Plaza Major or principal square. There are also a college of sciences, a seminary a school of mechanical arts, a university, and an academy of jurisprudence. Since the death of the inhabitants are Ayacucho Indians, whose national customs, as well as language, prevail in it. The foundation of Nuestra Señora de la Paz dates from 1548. The town, being situated conveniently between the fertile valleys of the Yungas and the port of Arica, soon rose to importance. In 1805 it was made the seat of a bishopric, and in 1820 changed its name to La Paz de Ayacucho, in memory of the victory which completed the liberation of the republic. Pop. (1847) 45,000—(Certeira, *Proy. de las Fases* 1890, 48,000).

PAZMAAD two places Hungary.—1 A vil Thidher Danube on about 14 m N Stuhlweisensburg on an eminence, with a church and a chateau. P 1691.—2 A vil Thidher Danube on, and about 4 m from Raab, in a hilly district with a Protestant church. 1 1088

PAZONY a vil Hungary Thidher Thesus on Szabolcs about 8 m from Nyir Eghyazs with two churches. P 1271
PE (Br), a tn France dep. Haute-Pyrénées 8 m N N W Argelès, with a large and handsome church, school, and manufactures of cloth, handkerchiefs, nails, combs, and implements of husbandry. Near it, copper and lead are mined. Pop. 1516

PEACE a large river British N America, rises near the W coast, about lat. 51° 20' N lon 127° W; flows generally S.E., then N.E. to near Athabasca Lake, where, turning N, it is named the Slave River and falls into Great Slave Lake, near lat. 61° N lon 118° W total course 800 m

PEACH a small ill N America, near the Canadian shore of Lake St. Clair, chiefly a soil on a fishing river

PEAK or Huan Peak a div. England forming the N W angle of Derbyshire and consisting of a wild and romantic tract, full of mountains and moors, and celebrated for its limestone caverns and grottoes, containing many remarkable natural curiosities

PEAKIRK, par Eng Northampton 830 ac P 329
PEARL, an isl. S. Pacific, near the centre of the Gambier group, lat. 23° 7' 58" S lon 134° 55' 21" W, about 6 m in length elevated particularly towards its S. extremity, where Mount Duff rises to the height of 1248 ft. It is well clothed with trees, and evidently of volcanic formation, though surrounded by a coral reef.

PEARL,—1 Anisl N America, off the W coast of Newfoundland, Bay of Islands.—2 Isl. New Granada, bay and about 80 m S.E. Panama. They consist of the isle Del Rey Pedro Gonzalez and San José with a number of small islets. The pearl-fishing is successfully pursued

PEARL, a river, U. States, rises near the centre of Miss Mississippi, flows S. by E. forms for some distance the boundary between Mississippi and Louisiana, and divides itself into two arms, one of which falls into Lake Borgne, and the other into Lake Pontchartrain; total course, about 240 m. for 180 of which it is navigable for small craft, but it is much obstructed by trunks of trees, sandbars, and shallows.

PEDRAZA, a small tn. Yucucula, prov and 40 m. W. Yucucula. Pop. 3000.

PEDREMA a tn. Spain, Andalusia prov and 58 m. S.E. R. Sevilla with a modern church, townhouse, prison, primary school, manufacturers of articles in export, several oil-mills, and a trade in oil and corn. Pop. 1247.

PEDREIGLO two places, Portugal.—1, (-Grande), a tn and par., prov Beira-Alta, 36 m. N.E. Thomar & back Zamora, here crossed by a bridge of remarkable height. It contains a Dominican convent, and near it are important iron-works. Pop. 2640.—2, (-Pequeno) A tn and par. 1 bank Zamora, almost opposite to the former. Pop. 1244.

PEDRU, several places, Spain.—1, (-Abad), A tn Andalusia, prov and 30 m. from Cordova with a church, court-house, prison, two primary schools, manufacturers of woollen and linen cloth and several oil and flour mills. P. 1506.—2, (-Barrado), A vil Spain, OM Castilla, prov and 32 m. S.W. Avila with townhouse, prison, parish church, primary school, several fountains, and two hermitages, flour oil and fuling mills, dye-works, and manufactures of ordinary cloths, laces, aprons and apandras. P. 2110.—3, (-de-Barrado) A vil, prov and S.W. Leon with a church, a primary school and numerous ironed oil mills. P. 1287.—4, (-de-Medina) A tn New Castile prov and about 55 m. from Ciudad-Real with a church, court-house, prison, and primary school and several flour-mills. P. 1960.

PEDRU (Sic.) numerous small places, Portugal.—1, The most important, (-de-Sul) a tn and par., prov Beira-Alta, 12 m. N.W. Viseu at the confluence of the Sul with the Vouga. Pop. 1700.—2, A prov Brazil. See Rio-Pedro.

PEDROCHE, a tn Spain, Andalusia, prov and 32 m. N.N.E. Cordova with a church, manory suppressed convent, court-house, hospital Latin and primary schools, manufactures of woollen and linen cloth and a trade in corn and agricultural produce. Pop. 1044.

PEDROLA, a vil Spain, Aragon, prov and 22 m. N.W. Saragossa with a court-house, and prison an endowed school, a church and two hermitages. Pop (agricultural) 1770.

PEDRONERAS, a vil Spain New Castile, prov Cuenca 82 m. S.E. Madrid regularly built, with two court-houses, two prisons, a primary school, a church and four hermitages, manufactures of pures, garters, swaddling clothes, etc. of silk, cotton, and fine wool, two fuling and seven flour mills and a trade in manufactured goods, grain, etc. Pop. 3185.

PEDROSO (L.) a vil Spain, Andalusia, prov and 28 m. N.E. Sevilla, with a court-house, prison, primary two schools, an hospital, and a church, manufactures of iron, a soap-works, two flour and oil mills, and brandy distilleries, tilage and male-driving also occupy a number of the people. P. 2094.

PEDROSO a vil and par Portugal prov Douro 8 m. from Oporto. Pop. 3570.

PEEBLES, **PEEBLESBURGH**, or **TWEEDDALE**, an island co Scotland bounded S. by Dumfries, S.E. Halkirk, N. to S.W. Edinburgh and W. Lanark greatest length, N. to S. about 80 m., greatest breadth, rather less than 32 m., area, 204 150 m. of which 34 782 are cultivated. The greater part of the surface consists of mountain moor, and the first prevailing to such an extent as to render the general elevation greater than that of any other county in the S. of Scotland the highest summits varying from 2400 ft. to above 2900 ft. This portion of the county contains much wild and striking scenery. The prevailing rock is whinstone, or greywacke, much of it of excellent quality but a great part of it of so laminated a structure as to be unfit for building. White and red freestone are common in the N. part of the county and both coal and limestone have been long wrought at various points. The Tweed is the only river in Peebles-shire of any note, but there are numerous rivulets, tributaries of the Tweed. Most of these abound in salmon and trout. The county returns a member to Parliament, principal town, Peebles. Pop. (1851), 10,788.

PEEBLES, a royal burgh and market tn. on a high above county 20 m. S. Edinburgh on a slightly-elevated tongue of land formed by the junction of the Eddleston water with the Tweed. Its houses are generally of whinstone, two stories in height and built of solid masonry. It has a county hall and jail, the Elizabethan style, erected in 1644, a townhall, an established a Free, and two t. Presbyterian churches, a pent. Episcopal and a R. Catholic chapel, a grammar and several

other schools, an institution for instruction in literature and science, and a reading-room and library attached, and a museum. Inhabitants principally dependent on the retail trade, and on agricultural employment, and the various branches connected with it. Pop. of par. 2678 of tn 1969.

PEESHILL, a vil U. States New York, 100 m. S. Albany, 1 bank Hudson, with eight churches, an academy, six iron-foundries, and two tanneries. Pop. 2000.

PEEL, a small airport to Isle of Man W coast, lat. 54 13' 38" N; lon 4 42' W (n), chiefly remarkable for the remains of its ancient castle and cathedral, the former standing on a small rocky island, separated from the town by a narrow channel. It has a church, and Methodist chapel, and an endowed grammar-school. The harbour and pier are now utterly neglected. Pop. 2342.

PEEL (De) an extensive elevated peat tract, Holland, provs. N. Brabant and Limburg, giving rise to numerous streams flowing in all directions. It extends N. to S. about 80 m., with a width of about 10 m.

PEEL RIVER.—1, A river E. Australia, rises in the mountains which form the S. boundary of Liverpool Plains, near lat. 31° 40' S. lon 151° 20' E., and pursues a circuitous course, in a N.W. direction to its junction with the Darling at Pockstaro. It receives numerous affluents of which the most important appear to be the Connolly, and its tributary Turrahall which join it on the l. bank. In the first part of its course, it flows to the way through a mountain pass, and then downwards through a valley into an open country. In the lower part of its course, it is better known by the name of 'Kany'—2, A river N. America, formed by a number of torrents descending from the W. slope of the Rocky Mountains, about lat. 63° N; and lon 130° W. flows N.W. and joins 1 bank Mackenzie, at the commencement of its delta, near lat. 67° N., and lon 135° W.

PEEL ISLAND and S. Pacific, belonging to the Archipelago of Borneo group, lat. 27° 2' S.; lon 143° 10' E. It is the largest island of the group, is situated near its centre, and has two bays one of which on the S.E. is clear and deep, and has good though somewhat exposed anchorage. This bay called Port Lloyd abounds with sharks.

PEEN, a river, Germany issues from a lake of same name, in Meklenburg Schwerin flows first N.E. past Daumitz into Prussian Pomerania, then S.E. and after a course of 70 m. falls into the Little Haff near Usedom.

PEER PUNJABI a tn. Souda N. Sehwan lat. 27° 5' N., lon 68° E. 8 m. W. from the Indus.

PELAGAJAR, a vil Spain Andalusia, prov and 7 m. E. Jaen with a court-house, a prison, primary school, an hermitage church, and numerous oil and flour mills. P. 2516.

PEGAU, a tn Saxony circle and 14 m. S. by W. Leipzig, 1 bank Elster. It is walled and has manufactures of woollen and linen cloth, and particularly sheet in which it carries on a considerable trade. Pop. 3593.

PEGU a vil. and town. Italy Piedmont, div. Genoa, 3 m. from Voltri on the Gulf of Genoa with two palaces, three churches, and manufactures of silk goods, a silk mill, a fishery and several flour-mills. Pop. 8560.

PEGLIA, a vil France dep. Alpes Maritimes, div. Nice, 9 m. from Beaura, with a church and a trade in wood and a kind of green sand which is made into paint. Pop. 1800.

PEGNITZ, a tn. Bavaria, Upper Franconia, on the Pegnitz, 30 m. N.E. Nürnberg. It is walled, has two churches, a tannery some trade in fat cattle, and three mills. P. 1904.

PEGO a tn. Spain Valencia, prov and 44 m. N.E. Ali cant. It has clean and commodious streets, four squares, a court-house, primary hospital for the sick poor, two endowed schools, a church, two hermitages, and several mills for rice, oil, and flour. The only article exported is raisins. Pop. 5385.

PEGU a country of India beyond the Ganges, formerly a powerful and independent kingdom, and subsequently a province of Burmah, but in 1868 annexed to the British Indian empire. It occupies the S. extremity of Burmah lat. 18° 45' to lat. 19° 30' N. and extending E. and W. from the Salween to the Bay of Bengal. It thus comprises the whole delta of the Irrawaddy. There are several ranges of mountains in the province, but generally speaking, it may be considered a level country. The soil is naturally very fertile, but cultivation has been almost entirely neglected

since the conquest of the country by the Burmans, although, previous to that event, the Peguans were industrious and skillful agriculturists. The minerals of the province comprise iron, tin, and lead, rubies, sapphires, and rock-crystals are also met with. Besides the numerous branches of the Irrawadi, which overpreads as with network the whole S.W. surface of the country, several large rivers called the Senging, the E. course, and falls into the Gulf of Martaban. The Salween, as already mentioned, forms its E. boundary. Amongst the natural productions of the country is teak timber. The principal object of cultivation is rice, which is raised with little trouble. Tigers, elephants, buffaloes, deer and other animals abound in the woods, and in the extensive tracts which have been left to be overrun with jungle. The principal parts of Pegu are Bassein and Rangoon. The Peguans are called by the Burmans *Talawa* or *Talaga*, and by themselves *Monsu*. Pop. estimated at about 70,000.

PEGU, an ancient city and cap. above prov. 1 bank Irga river about 70 m N Rangoon, lat. 17° 30' N lon 96° 30' E formerly a place of great importance with a population of 150,000 and forming a quadrangle, each side of which measured 1½ m. The present town is on the site of the old, and consists of but two streets, one parallel to the river, and the other leading out to a great pagoda, a huge structure occupying the summit of a fine hill having a gradual ascent. It is a pyramidal building composed of brick and mortar on a base, and spiral at the top, each side of the base measuring 162 ft. Pegu was stormed and taken by the British, June 4, 1852.

PEI HO, or NORTH RIVER, a river (China, prov. I of cheboi, rises near the great wall flows S.E., and joins the Eu ho and Hoan-ho 70 m S.E. Pekin and 80 m above the mouth of the united stream in the Gulf of Petcheloo. It is navigable for boats to within 30 m. of Pekin.

PEILAL, a town in Prussia, prov. Sillesia, gov. and 33 m. S.W. Breslau, chiefly inhabited by Moravians. It has a castle, church, manufacture of linen and cotton goods, and several mills. Pop. 4126.

PEINE, a town in Hanover principality Hildesheim 7 bank Fusa, 21 m N. by E. Hanover. It is walled has a R. Catholic church, Capuchin monastery, hospital and old castle now used as a house of correction manufactures of linen and tobacco, a flax-mill and a trade in yarn and cattle. P. 2991.

PEINGHIE, a town Pegu, bank Irrawadi lat. 18° 1' N lon. 94° 50' E. Near this place a great part of the teak timber is procured, which is exported from Rangoon to British India. Large ships have been built here, though at the distance of 200 m. from the sea.

PEIPUS, or PETERBOROUGH-CHERO, a lake, Russia, between gords Peterburg, Revel, and Laryna, greatest length, 50 m breadth, 30 m. The depth is considerable, and has floated 24-gm frigates. It receives the Embeth and Kosa on the S.W., the Tchernia on the E., and the Jettaba on the S.E. and discharges itself on the N.E. by the Arova into the Gulf of Finland. It is well supplied with fish. In 1702 a naval engagement took place on the lake between the Swedes and Russians. The latter had the advantage.

PEISERA, or PRANOV, a town Russian Poland 84 m N.W. Kalish, bank Warta here crossed by two bridges. It has a R. Catholic and two other churches, a synagogue, monastery, two schools, and a military hospital manufactures of linen and leather; and a trade in cattle. P. 1841 3316.

PEISEY, or PEASAY, a vil and com. France, dep. Savoie, prov. Tarentaise in a mountain valley of same name, 11 m N. V. Montdun. It has a church, and a considerable trade in Gruyere cheese. In the top of the valley at the height of about 6000 ft. above the sea, are the celebrated argilliferous lead-mines of Passay, discovered in 1714, worked first by an English company, then by a Scotchman and a Dutchman, and still employing about 274 miners, though not nearly so productive as when first opened. Pop. 1700.

PEISKRETSCHAM, or PRANOVIC, a town Prussia, Sillesia, gov. and 33 m. S.E. Oppeln, on the Drama with two churches, a castle, synagogue, and hospital a spinning and a rolling mill, and a blast-furnace. Pop. 3864.

PEITZ, a town Prussia, gov. and 80 m. S. Frankfurt-on-the-Oder, bank Mala, with a church, manufactures of woollen and linen cloth a spinning mill, and iron works. Pop. 2844.

PEIZE a vil. Holland prov. Drenthe, 11 m. N by W Amer, with a church. Pop. (agricultural), 1161.

PEKALONGAN, a N prov. Java, bounded N by the Java Sea, E prov. Samarang 8 Banjoemas and W Tegal, length, E to W 80 m breadth, 18 m cap. Pekalongan. It is a hilly island flat towards the coast, and generally well-watered and healthy, the chief products are coffee and rice. In the hills there are thermal springs, and sulphur is found. Some trade is carried on in native produce, partly through its three ports, Pekalongan, Batang and Pabean, which are only suited for small vessels. Manufactures of indigo and sugar and in gold, silver, iron and copper, pottery ware and in other ordinary articles of native industry, are carried on. Many Hindoo antiquities are scattered over the province. Pop. 224,000. — The town is a pretty small place, on the coast at the mouth of the Kalu-Pekalongan, with an open roadstead. Many of the houses are built of stone, and the river is crossed by an elegant bridge, and on the one side of the stream in the government-house, and on the opposite a fort. An active trade is carried on with Batavia.

PEKELA, two contiguous vils. Holland, prov. and 31 m. S.E. Groningen 1—1, (Nieuwe) 1 bank Asa with three churches and a school two boat-building yards, two blacksmiths and some boat traffic and turf-cutting. Pop. 4048—2, (Oude)—It has two churches, a synagogue, and two schools, some boat-traffic, and turf-cutting. Pop. 5908.

PEKIN, or Peking (Chinese *King-tse*, or *King-tse*, the residence of the court) the cap. of the Chinese Empire, prov. Petcheloo on an extensive, barren sandy plain, between the rivers Pei Ho and Hoan Ho lat. 39° 54' 13" N lon 116° 27' E. It is about 40 m. from the great wall and 100 m. from the Gulf of Petcheloo. The appearance of this vast city in approaching it, is by no means unimpressive, little or nothing of the buildings inside the walls being seen. The entire circuit of the walls and suburbs of Peking is reckoned at 25 m. The wall is 30 ft. high, and 35 ft. thick at the base, diminishing to 12 ft. at the top. It is faced every 100 paces with large bricks, laid in a mortar of lime and clay which in time, becomes almost as durable as stone. Square towers, projecting 50 ft. from the outer side of the walls, occur at intervals of about 60 yards and the whole is surrounded by a ditch. There are in all 16 gates leading into the city.

The present city of Peking consists of two portions, the N. or Tartar city, called *Nse-Chang* and the S., called *Nin Kiang*. The former is built in the shape of a parallelogram facing the four quarters of the globe, and consists of three inclosures, one within the other, each surrounded by its own wall. The innermost inclosure or area is called *Kin-Chung* [prohibited or forbidden city] and contains the imperial palace, and buildings connected with it, in which the emperor and royal family reside. It is about 2 m. in circumference is surrounded by a solid wall faced with glazed bricks and covered with yellow tiles. The second inclosure is an oblong square about 6 m. in extent, surrounded by a wall about 20 ft. high. It was originally intended for the officers of the court, but is now occupied by Chinese merchants and tradesmen. The third inclosure comprises the open city, which presents all the evidences of an industrious people, intent on the pursuit of gain, mercantile bustle pervading every corner of it. Many of the principal streets of Peking are spacious, being more than 100 ft. wide, but they are unpaved, and in rainy weather impassable from mud. Amongst the principal public buildings of Peking, besides those already mentioned, are the Temple of Eternal Peace, belonging to the Empress, and to be the largest and most splendid temple in Peking, the Mahometan mosque, the observatory, the church of Heaven a Lord, with a convent attached to it, considered one of the finest specimens of architecture in the city, but now going to decay. There are also religious edifices, appropriated to many forms of religion, the principle of tolerance being here carried to the utmost extremity—amongst these are the Greek and Latin churches, Islam mosques, Buddhist temples, besides temples dedicated to Confucius, and other deities mortals. Amongst the more valuable institutions of Peking is the national college, *Han-lin yuen*, where all Chinese learning and literature are concentrated, also Manchoo, Chinese, and Russian, all religions, though some of them are proscribed, share the honor of being sanctioned within its precincts. The other learned and mercantile institutions of note are the medical

college, astronomical board, and the imperial observatory. Peking is situated solely by its being the seat of government, having no trade, except that which is produced by the wants of its vast population. The principal part of the provisions required comes from the R. province, or from the flocks reared in the N. part of Petchelo, the adjacent plain producing but a small amount of the food demanded. A considerable portion of the taxes levied upon the productions of the whole empire is paid in kind, and is here stored up; the amount of rice alone in these granaries at one time of the year is enormous, but they are often empty before the new crop is gathered, so that a great many die for want of food. The large establishment of the emperor and the numerous persons in the employment of the government, who are paid out of the public revenue, absorb a great portion of the grain.

Peking is regarded by the Chinese as one of their most ancient cities, but it was not made the capital of the country until its conquest by the Mongols, about 1262. Pop. about 2,000,000.—(Guthrie's *China Opened*, *The Middle Kingdom*, Martineau's *China*, &c.)

PELAGO, a group of islands, 80 m. W. S.W. Flores, with a church and an old castle. Pop. 1067.

PELDON par Eng Essex 2184 ac. P. 502.

PEL ESTRINA a tn. kingd. of Italy, gov. and 11 m. S. Venice, centre of island of same name, which lies outside of the lagoons, and is about 7 m. long by 1 m. broad. It contains a townhouse, and three churches. Pop. 7026.

PELEW ISLANDS a group, Caroline N. Pacific Ocean, lat. 8° to 9° N. lon. 150° to 155° E. They are about 30 m. in length, extend nearly N. & S. W. 87 m., and are completely encircled by reefs. The largest island is Babelthop forming the N.E. part of the chain 24 m. long with a high hill on its W. side. Most of the other islands are rather low but cultivated. The inhabitants are a tribe of Malays. They wear no clothes. Their huts are very simple, but they show some ingenuity in the construction of their boats. Several vessels have been nearly cut off when touching at these islands.

PELHAM three par. Eng. Herts. —1 (*Great*) 1601 ac. P. 238—2 (*Little*) 2335 ac. 1 638—5 (*Stocking*) 626 ac. P. 138.

PELLAGROD a vil. Ceven 5 m. N.E. Colombe which it supplies with coffee, jaggedy arrow-roots, beet leaves, and different sorts of fruits and vegetables. It contains a Protestant and a R. Catholic chapel, and a school. Pop. 800.

PELLICAN ISLAND, an isl., N.E. coast Australia, Princess Charlotte Bay, lat. 13° 50' S. lon. 143° 42' E. 2 m. long low and sandy frequented by great numbers of pelicans, great land-neck plovers, gulls, and sand-pipers. Fertil, also, are next to none.—(*Legage of the Baidan*).

PELLING ISLANDS—1 Yellow Sea, off coast of Corea, lat. 38° 24' N. lon. 124° 28' E., 10 m. long, by 4 m. broad.—2 Indian Archipelago near E. coast Celebes lat. 1° 50' S. lon. 123° 15' E. (a.) about 50 m. long by 15 m. broad. On its E. coast are many smaller isles, with numerous rocks and shoals.

PELLISSANNE [anc. *Pellissane*] a tn. France dep. Bouches-de-Rhone, 16 m. W. N. Aix r. bank Toulon, well built with a spacious square, and manufactures of silk, cotton, pottery ware, and olive-oil. Pop. 1887.

PELLA, an ancient city, Turkey in Europe, Macedonia near the Varadar or Axius, about 6 m. S.E. Jendge-Varadar its site is merely attested by a few ruins but it is celebrated in Grecian history as the place where Philip of Macedonia was brought up, and his son Alexander the Great was born.

PELLEGRINO, a tn. and com. dioc. and 22 m. S.W. Parma; with a suppressed convent, primary school and a trade in cattle. Near it are salt-works. Pop. 5312.

PELLERD a vil. Hungary co. Baranya, 2 m. from Fünfkirchen with a chateau, and some trade in sheep, corn, wood, and wine. Pop. 1109.

PELLEK, or *Pelanes*, a vil. Bohemia, circle Casanau, about 16 m. from Deutsch-Brod with a school and extensive iron-works. Pop. 1158.

PELLEW ISLANDS (Sir Edward) a group, Australia, close on shore, S.W. coast Gulf of Carpentaria. The largest are named West Island, S.W. Island, N. Island, Centre, and Vanderlin Island. The N. point of N. Island is Cape Pellow lat. 15° 30' S. lon. 141° 2' E. (a.) See *Pelaw*.

PELOPONNESUS. See MORIA

PELOPOTAS, or *PELOPONNESO-DE-PAULA*, a tn. Brazil prov. São-Pedro-do-Rio-Grande, on R.W. extremity of Lake Patos, with a church and a harbour whence are exported dried beef, hides, horns, tallow, and other produce. P. 2419.

PELSALL, a small vil. England co. Stafford, 8 m. N.E. Wolverhampton, containing two chapels and a school. P. 1133.

PELWORM an isl. Denmark 8 m. off S.E. coast Schleswig. It is of a compact and somewhat triangular shape, but has so low, that it requires the constant efforts of its inhabitants to guard against inundations. Previously to the great flood of 1834 Pelworm formed part of the island of Nordstrand. Area, 19 sq. m. Pop. 2000 chiefly pea-sants, fishers, and pilots.

PELYNG par Eng Cornwall 4688 ac. P. 739.

PEMBA, or *HUTUNKA*, an isl. E. Africa, coast of Zanzibar, N. from Zanzibar, lat. (N. W. point) 4° 53' S., lon. 39° 44' E. about 40 m. long, by 10 m. broad. It is low well-wooded, and fertile; rice is cultivated and carried to Zanzibar, the E. shore is nearly straight in a N. & S. & S.W. direction. The W. shore is irregular and deeply indented in its outline, having a chain of islands and reefs fronting it, by which several bays and harbours are formed.

PEMBOYR, or *PEMBOYA*, par Carmarthen 6876 ac. Pop. 1271.

PEMBREY par Wales, Carmarthen 26736 ac. P. 3310.

PEMBRIDGE, par Eng Hereford 7077 ac. P. 1319.

PEMBROKE several places. U. States.—1 A vil. and township New Hampshire, 5 m. S.E. Concord with a town-house, academy and various factories. Pop. 1886.—2 A vil. and township Massachusetts 26 m. S.E. Boston, with two churches, 13 schools, and a number of saw mills. P. 1258.

PEMBROKE, or *PEMBROKESHIRE*, a maritime co. S. Wales, forming the extreme W. of the principality bounded, N.E. by Cardiganshire, E. and S.E. Carmarthenshire and bay, S. Bristol Channel and W. & N.W. St. George's Channel area, 610 sq. m. Its coast line is extremely irregular being deeply indented with numerous bays and inlets, and studded with islands. The shores also are, in general high and the cliffs perpendicular. The surface is generally undulating and greatly diversified with alternate hills and dales, decorated with rich meadows and corn-fields. The hills, however do not attain any great elevation the highest summit, Ffrin Top, being but 1754 ft. above sea-level. The substrata are stone-coal tract bisects the county. It is a continuation of the great coal basin of S. Wales, which extends over the whole coast of Carmarthen Bay. Copper-ore has been found in small quantities, but slate and coal are the only minerals worked. In the S. part the limestone and old sandstone formation afford soils of excellent quality, but in the coal and slate districts the land is very inferior. The climate is humid and very mild. The soils approaching the sea-shore have long been celebrated for the production of barley, wheat, oats and potatoes are the principal crops some of the first is said to be of very superior quality and remarkable for an extraordinary degree of transparency. Black cattle are fattened and sent to the London market. The horses are small-sized, but much esteemed. Manufactures unimportant chiefly domestic coarse woollen articles of clothing the fisheries are valuable, particularly those of herring and salmon. Chief towns—Haverford West, Pembroke, St. David's, and Tenby. The county sends a member to Parliament. Pop. 94,140.

PEMBROKE, a pari and municipal bor. and seaport tn. S. Wales, co. Pembroke, on a creek of Milford Haven, 206 m. W. London; lat. 51° 41' 48' N. lon. 4° 57' 15' W. (a.) It has a townhall custom-house, several churches, and several places of worship for Dissenters, and a small endowed grammar-school. At the W. extremity of the rocky ridge on which the town stands, are the fine picturesque ruins of an ancient castle or fortress, erected in 1092, the remains of which give evidence of its former magnificence and grandeur. About 2 m. N. from the town is Pater or Paterchurch, where is situated Pembroke dock. The dock-yard comprises an area of about 60 ac., and is inclosed by a lofty wall of stone, which includes various public offices, a chapel, and residences of the principal officers. It contains 13 ships for ship-building. The town, recently built here, consists of several streets of neat and well built houses partially paved,

with numerous good shops, and a neat isolated market-place. Pop. 10,101.

PEMBURY, par Eng. Kant 8481 ac. P 1114.
PEMPFLFORT a vil. Prussia, gov and almost close to the walls of Düsseldorf, whose inhabitants have here a number of handsome villas. Pop. 2360.

PEN or **PAGO**, a lake, Itzama, gov Tver S W Ostashkov length, N to S, about 15 m., greatest breadth 3 m. forming the source of the Vaga.

PENACASILLLO, a vil. Spain, prov and 2 m from Santander with a church, a primary school, and a trade in maize, corn and fruit. Pop. 1041.

PENACOOVA a vil and par Portugal prov Douro 10 m. N N E. Coimbra, r bank Mondego, from whose sands some gold is washed here. Pop. 8300.

PENAFIEL, or **AREXIPANA DE BOURA**, a tn Portugal prov Douro, c bank Tamega, 19 m. E N E Oporto. It has a beautiful parish church, adorned with an elegant portal, and supported within by Ionic columns. a handsome townhouse, two hospitals, and a school of rhetoric and philosophy. Pop. 3500.

PENAFIEL a tn Spain, Leon, prov and 50 m E by S. Valladolid on the Duraton in an angle formed by it and the Douro. It occupies a height, crowned by an ancient, but strong and well-preserved castle, is nearly surrounded by a stone wall and ditch; and has three churches, a nursery, two primary schools, two hospitals, manufactures of woollen cloth, bone-hoals, earthenware, &c. dyo-works and flour mills, a trade in manufactures and in agricultural produce. Pop. 3453.

PENAFLOR, a vil Spain, Andalusia prov and 42 m N E Seville, r bank Guadalquivir. It has a courthouse, prison, granary two schools and a church with a very handsome tower. Pop. (agricultural) 1785.

PENASQUILA, a vil. Spain, prov Valencia, 20 m. N Almona. It has a small castle, built by the Romans a courthouse and prison two endowed schools, a church three blanket manufactories, a tanning and six flour mills. P 1280.

PENALLY par Wales, Brecknock, 1893 ac. P 594.

PENALSORDI, a tn. Spain, Biscaya prov and about 80 m from Badajoz with a church townhouse hospital, and primary school, manufactures of linen, a flour-mill, and a trade in cattle and corn. Pop. 1728.

PENALTH par Eng Monmouth 2284 ac P 467.

PENALVA D ALVA, a tn and par Portugal, prov Beira-Baixa, on a height above r bank Alva, about 20 m. S N E Coimbra. It has a grammar-school and manufactures of common woollen. Pop. 1500.

PENAMACOR, a tn. Portugal prov Beira-Baixa, 23 m. S S E Guarda, on a lofty rock. It is a place of considerable strength, being surrounded with walls, and defended by a castle. Pop. 1836.

PENANG or **PRINCE OF WALIS IMANJO** [native, *Jailo-Pinang* or *Pinang*, from the abundance of the areca-tree on it] a British settlement, Strait of Malacca, dependent on the presidency of Bengal, consisting of an island situated between lat 5° 14' and 5° 39' N., lon 100° 8' and 100° 25' E off the W coast of the Malay peninsula, from which it is separated by a channel 2 m. to 5 m. across. The island is of oblong shape about 16 m. in length, N to S and 8 m. in breadth, area, 150 sq. m. Its surface is uneven and rocky it is intersected by a hill range, mostly covered with tall trees and jungle and Captain Woods, who surveyed it in 1840, found West-hill to be 2715 ft., Mount Macaluter or Government hill, 2550 ft., and Mount Elvira, 2384 ft. above the sea. From the coast, the height declines to the E and W and low narrow flats again bordered by a belt of coconut trees, frange the shore. The island has two or three villages.

Soil, Climate, and Products.—The highlands are of granite and gneiss formations, traversed by veins of mica and quartz; the lower hills are chiefly of laterite the subsoil of the slopes consist of gneiss detritus or reddish clay, covered by a thin vegetable mould the flats on the E. and W sides of the island are wholly alluvial. Tin-ore is abundant, but little wrought, a whitish clay of decomposed felspar, and well adapted for making broken pottery is very plentiful. The climate, though not so fine as that of Malacca, is remarkably agreeable; in the higher districts it resembles that of Malacca; the morning and evening breezes are invigorating, and gales elsewhere fall at intervals throughout the year. The temperature on the lower lands ranges between 64 and 90°, the mean

Vol. II.

annual temperature of the island being 79° Fah. The regular wet season begins in September and ends in November. Rain is then scarce, and is raised in February or March, and in seasons sufficiently moist, the seed often yields seventy-five fold, in unseasonable years the deficiency in rice is made up

for by plantains and bananas. Malacca is the only other coral product cultivated. Some apices, in particular, seem to flourish here better than in any other part of the world. nutmegs, cloves, peppers, pimento, and ginger, grow luxuriantly the nutmegs, mace, and cloves are considered superior to those of Banda and Ambona and two crops of pepper are gathered annually—one in January and the other in June. Tobacco, coffee and cotton are raised only for home consumption. The sugar-cane thrives and the tea-plant grows wild. Many of the ordinary kitchen vegetables of Europe are abundant and cheap. native products include yams and sweet potatoes, and amongst fruits the mangosteen rambutan durian, guava, pineapple, orange, lime, mulberry, grape, &c. Amongst large timber-trees are the tank, mulberry (*Melodierus Ambonensis*) wood-oil or dammar-tree, mouthhouse, cypress, and numerous varieties of bamboos and rattans besides urucios and gigantic trees. Tigers, civets, and wild cats, numerous species of monkeys, lemurs and bats, wild cats and dogs, peacocks, parrots, adjutants, &c. are native as are a great variety of small birds of brilliant plumage, the preparation of which for export to England, forms a somewhat important branch of native employment. Buffalo and cattle are extensively reared for dairy or farm purposes, and hogs in great numbers by the Chinese for food. Goats and sheep are scarce. poultry are plentiful and salted ducks-eggs are an important mercantile commodity. The coast abounds with fish, twenty varieties of which, caught principally by the Malays, are sold in the markets. Numerous varieties of crabs, oysters, &c. abound, together with sea and river turtles, the eggs of which are much prized by the natives.

Trade.—Before the establishment of Singapore as the chief port of transhipment between Europe, India, and the Eastern seas, Penang had a very extensive transit trade with all the countries of the Indian Archipelago and Chinese seas, as well as with the ports of British India, Europe, and America. At present, however, its trading connections are much more limited, and chiefly with the E. coast of Sumatra, Java, and the ports of the Transvaal provinces, the islands and W side of the Malay peninsula, and with Singapore. Its imports consist of pepper, benzoin, camphor, gold-dust, screw-nuts, rice, rattans, sago, sulphur, tin, arrack, sugar, oil, tobacco, edible swallows, nuts, tramping, and ivory, in return for which

78

It exports British and India piece-goods, cotton, opium, iron, steel, coarse woollen and worsted cloths, and coarse cutlery. The total exports in 1849 amounted to 6,346,600 rupees (262,466), and the imports to 7,219,928 rupees (271,932). Penang is also the depot for the tin wrought at Junkinny, and places in the Malay peninsula, of which metal it exported in 1850 about 30,000 tons (1195 tons).

George Town, the cap, which stands on a promontory near the N.E. extremity of the island, lat. 5° 25' N. lon. 100° 19' 46" E. (s.) is of considerable extent, neat, clean, and built in regular streets, with a few good European houses, but the majority of wood, roofed with palm-leaves, and raised from the ground on posts, as in other Malay towns. The plan around it is dotted over with pretty bungalow, surrounded by well planted gardens. The public buildings comprise an English church, St. Catharine and Armenian chapels, the government-house, exchange, arsenal, and storehouses, good barracks, a post-office, and a civil hospital, with a jail and convict hospital in the island suburbs. The port has two commodious piers for landing and shipping goods, and the harbour is very safe and well sheltered having a depth varying from 5 to 8 fathoms, accessible for vessels of 400 tons to within a few yards of the shore. It can be entered, however only from the N. side of the island. Further south on E. side island, is the small but pretty village of James Town, opposite the hilly island of Pulau Jawa, which is within a mile from the shore.

History.—Penang was made over by treaty to the E. I. Company in 1789, and in 1804 it was erected into a separate presidency. In 1830 however four years after Malacca and Singapore were incorporated into the Straits settlements, the whole three were united under a governor subordinate to the Presidency of Bengal.

Population.—According to the official census made in June, 1851, there were 43 148 inhabitants, distributed as follows:—

| | Male | Female | Total |
|-------------------------|--------|--------|--------|
| English and descendants | 179 | 160 | 347 |
| Malays | 8,711 | 7,669 | 16,380 |
| Chinese | 13,152 | 5,204 | 18,356 |
| Malabares | 5,614 | 5,084 | 10,698 |
| Macassar | 1,487 | 1,973 | 3,460 |
| Total | 28,643 | 14,720 | 43,363 |

(Newbold's Malacca Crawford, Pinlay, Davidson Jour. & I. Archæology, Singapore Free Press and Penang Gazette Documents in the E. I. Company's Library)

PENARANDA DE-BRACAMONTE, a sn. Spain, prov. Leon, and 26 m. S.E. Salamanca. It has a courthouse and prison, two schools, an hospital, a church, a Franciscan convent manufactures a kind of frieze, consumed in Murcia, Andalusia, and Galicia saddle-bags of every kind pack-saddles of silk and wool saddle-girths, and hats. In 1811 the French here defeated the Spaniards. Pop. 3468.

PESARIYA, a vil. Spain prov. Aragon and 48 m. from Teruel, with a courthouse, school, and church. Pop. 1567.

PENARTH, par Wales, Glamorgan 1507 as P. 105.

PENAS or **SAN PEDRO**, a to Spain, prov. Murcia, and 16 m. S.E. Albacete, surrounded by a slight wall. In the square stand the courthouse, the prison, and the clock-tower. It has also two schools, and a parish church. Perched on the summit of a hill, immediately above and commanding the town, stands the well-known fort of some name, considered almost impregnable. There are a chocolate and flour mill soap-works, manufactures of ordinary linen, &c., and a trade in wine, cotton, sheep, and wool. Pop. 7263.

PENAS (Gut or) an inlet, Pacific coast of Patagonia, between Wellington Island and the peninsula of Tres Montes, lat. 47° 30' S. lon. 75° W. It is 65 m. wide, extends inland about 65 m., and includes the Guaymas Islands.

PENDBRYN (Lower and Upper), par Wales, Brecon, 12,766 as P. 1777.

PENDINE, par Wales, Carmarthen; 1278 as P. 161.

PENDJICHEHER, or **PUNJANNA**, a river, Afghanistan, which descends from the S. side of the Hindu Koh, flows first S.W., then S.E., and after a course of about 180 m. joins the bank Cabool. Its chief affluent is the Ghorubra.

PENDELBURY a vil and township, Essex, co. Lancaster, par the Bolton and Hurry Canal and the Manchester and Bolton Railway; with a square-built Norman church, an independent chapel several schools, and manufactures of plan and printed cotton. Pop. 2198.

PENIDLETON a suburb of Manchester N.W. side of that city on an acclivity. It consists chiefly of a continuation of the principal street in Salford and forms part of the main road leading from Manchester to Liverpool, Bolton, &c. It has a church, an Independent, and three Methodist chapels several schools, a mechanics' institute, and extensive cotton spinning calico-printing, bleaching and dyeing establishments, in which the inhabitants are chiefly engaged. Pop. 14,224.

PENDOCK, par Eng. Worcester; 1168 as P. 802.

PENDOMER, par Eng. Somerset; 1090 as P. 78.

PENDOLAN, par Wales, Glamorgan 5504 as P. 363.

PENEDO a to Brazil, prov. and 60 m. S.W. Alagoas 1. bank São Francisco, 20 m. from its mouth. It has three churches a townhouse, a Franciscan convent, and a Latin, and a primary school. The inhabitants raise large quantities of cotton, rice, millet, legumes, and manioc. P. dist. 14,000.

PENEDONO a to and par Portugal, prov. Beira-Alta, 89 m. N. by W. Guarda, with some Roman antiquities. P. 690.

PENEGOS, par Wales, Montgomery, 8065 as P. 928.

PENELLA two places, Portugal — 1. A to and par, prov. Douro, S.E. Coimbra. Pop. 1460.— 2. A to and par, prov. Beira-Alta, 18 m. N. Trancoso. Pop. 719.

PENFIELD, a vil and port township, U. States, New York, 223 m. N. by W. Albany, with three churches, an academy, a museum and several mills and factories. P. 2842.

PENGUN ISLAND see COCKET ISLAND.

PENHA, a vil. and par Brazil, prov. Minas-Geraes, on the Itapuaçu, 80 m. S.W. Minas-Novas; with a handsome square, in the centre of which is a church. Pop. 1000.

PENHA, a vil. Brazil, E. shore of Ilha Parica, opposite the town of Bahia, with a stone church, and two primary schools.

PENHOW, par Eng. Monmouth 1784 as P. 273.

PENHURST par Eng. Sussex 1423 as P. 120.

PENKICKE, a to Portugal, prov. Estremadura on the coast of the Atlantic, 47 m. N. by W. Lisbon. It ranks as a fortress of the first class, more, however on account of the strength of its natural position, than of its fortifications. It has a small harbour, and carries on an active fishery. P. 2596.

PENIG, a to Saxony, circle and 35 m. S.E. Leipzig. It has a small harbour, and carries on an active fishery. P. 2596.

PENIG, a to Saxony, circle and 35 m. S.E. Leipzig. It has a court of law a castle, with a park, and important manufactures of bookery, woollens, and calico, and bleachfields a paper, cotton, and other mills. Pop. 8996.

PENISCOLA a maritime to Spain, Valencia, prov. and 41 m. N.E. Castellon-de-la-Plana, on a rock about 240 ft. high. It is a place of strength of the second rank, but it is greatly neglected, and the streets are narrow, crooked and ill paved. It has a courthouse a government house, two endowed schools, a church, and several hermitages. Navarro, who was governor in 1810, betrayed the place to the French. Pop. (agricultural) 1891.

PENISTONE, a market to and par England, co. York, 7 m. S. Don, and a station on the Manchester and Sheffield Railway 8 m. W. S.W. Barnsley. It is well and regularly built, has a parish church, Independent, Friends, and Wesleyan chapels, a free grammar-school; quarries of pavement, of which large quantities are sent to London, collieries, and manufactures of linen. Area of par. 21,580 as P. 6803.

PENITENCIA, an isl. Brazil. See BARRAGUA.

PENJAB the five rivers. See PUNJAB.

PENJINA, a river, E. Siberia, rises on S.E. side of the Stanovoi Mountains, flows S.E. past the town of Penjing, and a little below falls low the bay of that name, after a course of about 160 m. It receives the Akien on the right.

PENJIREK, a gulf, Siberia, in N.E. of Sea of Okhotsk, formed on the E. side by Kamtschatka, and on the W. by a peninsula which separates it from the Gulf of Gilytsk. It is about 150 m. long, by 80 m. broad and at its N.E. extremity, at a town of same name, receives the Penjina.

PENKRIDGE, a small ancient town, par. England, co. 53 m. S. S. Wal, on the F. & S. It has a church, in the Gothic style. A Primitive Methodist chapel, a national school, and some small churches. Races are held here in September. Area of par. 19,605 ac. Pop. 8816.

PENLIMMON, a name sometimes applied to a mountain range of S. Wales, which curves round from E. to W. for a distance of 49 m. separating Montgomeryshire from Shropshire on the E., Radnorshire on the S., and Cardiganshire on the W. but is more frequently confined to the mountain mass which forms the W. termination of the range. It is situated on the frontier of co. Denbigh and Montgomery and consists chiefly of three summits, the loftiest of which has a height of 1465 ft. is composed chiefly of shale, containing no minerals of any value, and gives rise to both the Severn and Wye, and several other minor streams.

PENLLINE, par. Wales, Glamorgan 1784 ac. P. 838.

PENMACHNO, par. Wales, Carn 11,208 ac. P. 1261.

PENMAEN, par. Wales, Glamorgan 1638 ac. P. 114.

PENMAEL, par. Wales, Glamorgan 8395 ac. P. 498.

PENMON, par. Wales, Anglesey 7189 ac. Pop. 226.

PENMORF, par. Wales, Caernarvon 10,157 ac. P.

1109

PENMNYDD, par. Wales Anglesey 8102 ac. P. 666.

PENN a vil and par. England, co. Stafford near the Wolverhampton canal 2 m. S.W. Wolverhampton. It has a parish church with a square tower, an almshouse, and manufactures of locks, keys, nails, &c., for Wolverhampton. Area of par. 3986 ac. Pop. 1160.

PENN par. Eng. Bucks 4870 ac. Pop. 19-4.

PENN Yr, a vil. U. States, New York, 173 to W. Al. bay; with five churches, an academy, a courthouse, a jail and manufactures of carriages and ploughs, flour and saw mills a tannery and two printing-offices. Pop. 1800.

PENNA, a mountain, Parma, on the confines of the duchy of Piacenza. It is one of the loftiest summits of the Apennines in the duchy having a height of 5880 ft. The Taro and the Ceno have their sources in it.

PENNAJ, (LOWEN and UFFEN), par. Wales, Merioneth 7461 ac. Pop. 306.

PENNANT, par. Wales, Montgomery 5000 ac. P. 740.

PENNAR, a river Hindostan, rises among the low dryrock mountains prov. Mysore. lat. 13 25' N., lon. 77 21' E. flows N. to lat. 15' N. when it bends round and flows E. to the Bay of Bengal near Nellore, at lat. 14 35' N. lon. 80 12' E. Entire length, 800 m. The channel is in general sandy, but also rocky in many parts.

PENNARD, two pars. England, Somerset—1 (East) 2829 ac. Pop. 675.—2 (West) 8068 ac. Pop. 671.

PENNARD, par. Wales, Glamorgan, 2229 ac. P. 849.

PENNICUK, a vil. and par. Scotland co. and 9 m. S.W. Edinburgh on the E. It has a neat parish church, in the Gothic style, a Free, and two L. Presbyterian churches, a parochial school and extensive manufactures of paper. During the war, Penicuik had a very large depot for French prisoners. Area of par. 20,000 ac. Pop. 3003.

PENNINGHAM, par. Scot. Wigton, 16 m. by 6 m. Pop. 3672.

PENNINGTON, par. Eng. Lancaster; 2787 ac. P. 489.

PENNSYLVANIA, one of the U. States of N. America. lat. 39 45' to 42° 17' N. lon. 74 44' to 80° 54' W. bounded N. by New York, N. W. Lake Erie, W. Ohio and Virginia, S. Virginia and Maryland, and E. Delaware and New Jersey. greatest length, E. to W. 810 m. greatest breadth, 163 m. area, 44,000 sq. m. It has been shaped out with so much regularity, that except on the E., where it has two large projections and indentations, its sides form an exact parallelogram facing the cardinal points. The surface is decidedly mountainous, being traversed S. W. to N. E. by the Allegheny chain and covered by many smaller ranges, which are more or less parallel to it, and take the local names of Blue Mountains, Balding Hill Laurel Hill, &c. On the E. side, the Alleghenies are rugged and steep, but on the W. descend very gradually and then stretch out into an extensive table land. In the S.E., the surface loses its mountainous character and becomes hilly or undulating. The principal rivers are the Delaware, which forms the E. boundary of the state, and runs within it the Lehigh and the Schuylkill the Susquehanna, with a continuous series of rapids during the last

50 m. of its course, and the Allegheny, which rises within the state, runs so far to the east that of New York and then returns to unite at Pittsburg with the Monongahela coming from the S., in order to form the Ohio. The climate in the S.E. is subject to frequent and sudden fluctuations; in the N. among the mountains it is more settled, but often in winter very keen and to the W. of the Alleghenies, owing chiefly to the prevalence of S. E. winds is milder than toward the E. The transition from summer to winter is decidedly marked, but spring is short, frolic, and uncertain. Autumn is the pleasantest season, and though sometimes oppressive from excessive heat, is for the most part serene and beautiful. The thermometer at Philadelphia ranges from 6° to 88°, and at Pittsburg from 10° to 94°. The variations of the climate do not impair its salubrity and Pennsylvania is one of the healthiest states of the Union. The soil has various grades of fertility, but is in general well adapted for agricultural operations. The richest and most highly cultivated tract is S.E. of the mountains on both banks of the Susquehanna. The most important crops are wheat, oats, rye, and Indian corn. barley may be regarded as almost a failure. Potatoes and tobacco are largely grown and flax more partially. Live stock, including oxen, cows, sheep, and swine, are abundant and large quantities of dairy produce are obtained for export. Next in importance to agriculture are the mineral products of the state: coal, iron, and salt occurring in almost inexhaustible abundance. In the whole of the mountain districts of the S. and E. to the W. of the Susquehanna, an anthracite coal field occurs over an area estimated at 976 sq. m. while to the W. of the Alleghenies a vast bituminous coal-field, of which Pittsburg may be considered the centre, has been traced over an area of 21,000 sq. m. The coal strata of both these fields contain many valuable seams of ironstone and both the smelting and working of iron have long been regarded as perhaps the most important interest of the state. The number of iron works in the E. field is 264, and in the W. 140, and in 1847 the production of pig-iron was 358,500 tons, and of malleable-iron, 268,700. This great production, however, was greatly owing to a high price of iron, and has since rapidly declined in consequence of its inability to compete with the iron of Great Britain. In some branches however as in making cut nails and boiler-plates the Pennsylvania iron masters are still able to defy competition. After iron, on the manufacture of which, in its various forms about a tenth of the whole population is still supposed to depend, the most important manufactures are woollen and cotton goods that of maple-sugar also is so extensively carried on that the annual production is estimated at 7,000,000 lbs. Both the foreign and inland trade has been largely developed. In 1851 the exports, nearly all composed of domestic products, amounted in value to £1,115,840, and the imports to £2,951,325. The total shipping of the state is 258,939 tons, of which 64,305 is registered for foreign trade. The inland trade has been greatly promoted by important works of internal improvement, more especially canals and railroads, forming a complete network in the E. portion, and thence W. across the centre of the state, the former, for a length of 1860 m. and the latter to the latter for a length of 1087 m. The largest religious denominations are first, the Methodists next the Presbyterians and Baptists, and lastly, the Episcopalians, E. Catholics, Congregationalists, and Quakers. The higher educational establishments are chiefly the Philadelphia University, the Western University at Pittsburg Dickinson College at Carlisle, Jefferson, Allegheny, and several other colleges. The common schools, exclusive of those of Philadelphia, which are placed under a separate management, amounted, in 1849 to 8576, each attended on an average by 43 scholars. The legislature, chosen by the universal suffrage of the white citizens of a Senate of 38 members, elected for three years, a third retiring annually and a House of Representatives, of 100 members, elected for one year. Harrisburg, though an insignificant place compared with Philadelphia and even with Pittsburg continues to be the capital. The first settlement in the state was made by a company of Sweden in 1639. The Dutch afterwards gained possession but it was wrested from them by the English in 1664. A subsequent settlement was made in 1681 by the celebrated Quaker William Penn, from whom the state has derived its name. Pop. (1850), 2,311,786.

PENOBSCOT, a river and bay, U States, Maine. The river, formed by the union of several streams in the W part of the state, flows mostly S. and, after a total course of about 340 m. falls into the bay of same name, 40 m. below Bangor, to which place it is navigable for vessels of heavy burden. Its principal affluents are the eastern Penobscot, the Westmanung, and the Piscataqua. The bay is about 30 m. long, and as many bays at the entrance. It contains numerous islands, of which Deer and Fox islands are the principal. **PENPONT** a vil. Deer and Fox islands are the principal between the Bear and the Hills, 2 m. W S W Thornhill. It has a plain but neat parish church, a Reformed Presbyterian, and a U Presbyterian church, two parochial schools two free-trade quays, and vestiges of an ancient castle. Extent of par. 21 m. by 5 m. Pop. 1411.

PENQUENNE, the Ardennes.

PENREUX, two pars. Wales—1, Carnarvon 555 ac. Pop. 112—2 (Llwyd) Anglesey 8994 ac. Pop. 552. **PENRHYN**, an isl., S. Pacific Ocean, lat. (N point) 8 58' N., lon. 168° 6' W. (N.) of coral formation, low and densely covered with trees, it is about 9 m. long N N E. and E S W. and about 5 m. wide, with an extensive lagoon having in it many coral patches. The inhabitants, who are numerous, are of a most savage and ferocious disposition.

PENRICE, par. Wales Glamorgan 2246 ac. P 398

PENRITH or **PENRITH**, par. Wales, Pembrokeshire 5081 ac. Pop. 431

PENRITH a vil. New E. Wales, co. Cumberland, 25 m. N W Sydney, on the Nepean, with a Protestant and a R. Catholic church.

PENRITH a market in and par. England, co. Cumberland, 17 m. S. by E. Carlisle, a station on the Lancaster and Carlisle Railway, and overlooked by the ruins of an ancient castle. The houses are generally well built of stone, and it has two churches, one of which is of recent erection, and remarkably handsome two Methodist chapels Primitive, Independent, Presbyterian, and R. Catholic chapels, and several schools, including a free grammar-school. Inhabitants engaged in weaving cotton, linen, and woollen goods, and in brewing and tanning. Area of par. 7644 ac. Pop. 7287; of par. 2668.

PENROSE, par. Eng. Monmouth 2696 ac. Pop. 363. **PENRYN** an ancient bor. market in, sea-port, Cornwall, co. Cornwall 2 m. S W of the head of a branch of Falmouth harbour. It has a townhall and market-house a church, places of worship for Bryantines, Independents, and Wesleyans a free grammar and national schools. The port is a member of Falmouth, and has a considerable trade in exporting granite, which is worked a few miles from the town. The manufacture of paper, woollen-cloth, arsenic, and gunpowder is carried on and in the vicinity are some extensive, breweries and saw-mills. Pop. 5857.

PENSAZOLA, a seaport in U States, Florida, on a bay of same name in the N of the Gulf of Mexico, on a low sandy plain. It is built in the form of a parallelogram with regular streets and public squares, and is the principal port of entry in Florida, though the harbour is too shallow to admit vessels drawing more than 8 ft. There is, however, good anchorage below, and one of the most valuable navy-yards belonging to the Union. Pop. 2800.

PENSELWOOD, par. Eng. Somerset 1101 ac. P 431

PENSFORD (or **THOMAS**) par. Eng. Somerset Pop. 516.

PENSHURST, a vil. and par. England, co. Kent, on the Eden, near its junction with the Medway 6 m. W S W Tunbridge. It has an ancient but handsome church, with many fine monuments; a Baptist chapel two national schools, a fine old manor near the vil., called Penshurst Place; several almshouses, manufactures of paper and stone-quarries. Area of par. 4626 ac. Pop. 1698.

PENSHURST, a vil. England, co. Stafford, on the Stour-bridge and Stourbridge Extension Canals, 2 m. W S W Dudley with a handsome modern church, Wesleyan, and New Connexion Methodist chapels; and some of the largest iron-works in South Staffordshire. Pop. 4874.

PENSI HORPE, par. Eng. Norfolk 758 ac. Pop. 11.

PENSTOW, par. Wales, Mont., 1290 ac. P 110.

PENTECOST ISLAND, one of the Cumberland Islands, off N.E. coast Australia lat. 20° 23' 10" S. lon. 145° 58' 30" E. It rises abruptly from the sea to the height of 1140 ft.

PENTELE (*Doria*) a vil. Hungary, Thither Danube, co. and about 85 m. N Stuhlweisensburg, near the Danube, with a church. Numerous Roman antiquities have been found here, supposed to have belonged to the ancient city of Alantaria. Pop. 2193.

PENTELICUS, a mountain, Greece, forming the E. extremity of the Hellesus point, 16 m. N E Athens and a little W of the Bay of Marathon, celebrated for its quarries of white marble, which furnished the materials of some of the finest structures of the capital and are still worked to a limited extent. Height, 3600 ft.

PENTENISIA, a group of islets, Greece, in the Gulf, and about 7 m. W N W of the island of Egina.

PENTERY, par. Eng. Monmouth 479 ac. Pop. 34.

PENTIMA a m. Naples, prov. Abruzzo-Ulteriore II dist. and 6 m. N W Sulmona. It occupies the site of the ancient Corfaen famous for the war which the inhabitants maintained against the Romans. It contains two churches. P 1600.

PENTLAND FIRTH, a channel separating the main land of Scotland from the Orkney Islands. It is about 17 m. long, E. to W., and 6 m. to 8 m. broad. At its E. extremity are the Pontland Skerries, two small islets, and several adjacent rocks, which were formerly the scene of numerous shipwrecks. On the larger of these, about 4½ m. N by Drummuir Head, is a lighthouse, with two fixed lights 100 ft. apart—the one 170 ft. and the other 100 ft. high lat. 58 41 12 N lon. 7 55 0' W (N).

PENTLAND HILLS, a range, Scotland, co. Edinburgh, Peebles and Lanark, commencing 4½ m. by W Edinburgh, and extending S W for about 16 m. The highest summit, East Carnethy Hill about the centre of the range is 1578 ft. above sea-level.

PENTLOW, par. Eng. Essex 1847 ac. Pop. 880.

PENTNEY, par. Eng. Norfolk, 535 ac. (Griffith), 1988 ac.

PENTON two pars. Eng. Northampton 1044 ac. P 310.

PENTREVOELAS, par. Wales, Den., 8144 ac. P 561.

PENTRICH, par. Eng. Derby 8889 ac. Pop. 3657.

PENTRIDGE, par. Eng. Dorset, 1764 ac. Pop. 256.

PENTRYCH, par. Wales, Glamorgan, 8975 ac. P 1569.

PENWORTHAM a vil. and par. England, co. Lancaster on the North Union Railway, which has here a magnificent viaduct over the Ribbles consisting of five arches, each 180 ft. apart, about 1 m. S W Preston. It is an ancient church, on a height overlooking the valley of the Ribbles a Wesleyan chapel, a free grammar-school, and a charitable endowment. Area of par. 11,317 ac. Pop. 5723.

PENYCLAWDD, par. Eng. Monmouth 514 ac. P 42.

PENZA, a gov. Russia, bounded N. by gov. Nijnes Novgorod, W. Tambov S. Saratov and E. Simbirsk greatest length, E. to W. 170 m. greatest breadth 145 m. area, 12,392 geo. sq. m. As a whole, it is an extensive flat, somewhat monotonous, but occasionally intersected by small hills, which in the S. W. form the water-shed between the basins of the Volga and the Don. To the latter basin only a very small portion of the government, drained by the Kloppe and its tributary Vorona, belongs the affluents of the Volga are the Sours, Insars, Ias, Moksha, Vad, and Vicha. The climate is mild and salubrious, though the winter cold is occasionally severe. The soil is fertile, and well adapted for raising all kinds of grain and roots. Hemp and flax are extensively, tobacco and hops occasionally grown. The principal fruits are apples, pears, and cherries. The forests are extensive and consist chiefly of birch, oak, beech, and alder. Considerable attention is paid to the rearing of cattle, particularly horses, of which several good breeding studs are kept. The rearing of bees is so general as to form one of the most important branches of rural economy. All kinds of game abound, but fish are very scarce. The principal mineral is iron, of which valuable mines are worked in the neighbourhood of Trilist. Millstones are quarried extensively. The manufactures are chiefly confined to the cottages of the peasantry where great quantities of flax and wool are spun, and coarse stuffs woven; but there are several blast-furnaces and other iron-works, saw-works, glass-works, sugar-refineries, tanneries, and above all distilleries, which are both numerous and on a large scale. The chief exports are corn, fowl, tallow, leather, soap, wax, honey, pomace, wool, and timber. Education, nominally under the superintendence of the university of Kazan, is miserably

neglected; and the only printing press in the government belongs to the crown. Pop. (1860) 110,000.

PENZA, a *tu*. Russia, cap. above gov., on a height near the junction of the Pensa and Soora, 510 m. S.E.E. Nijne Novgorod. It is mainly built of wood, with the exception of the cathedral, which is of stone. Besides the cathedral, there are 11 parish churches. The principal manufactures are leather and soap, and in these a considerable trade is carried on. Penza is the residence of the governor the see of a bishop conjoint with Samara, and possesses several courts of justice, a theological seminary, and gymnasium P. 13,000.

PENZANCE, a municipal bor., seaport, and rapidly improving market in England, co. Cornwall, on N.W. side Mount's Bay 24 m. S.W. Truro lat 50° 7' N lon. 5° 31' 30" W (n). The situation of the town is exceedingly picturesque, standing on a beautiful shore finely curved and surrounded by rocky eminences. It has two churches, both of which are fine buildings. Baptist, Independent, Bible Christian, E. Catholic, and three Methodist chapels, an elegant townhall, market-house, custom-house, and near the last 300 ft. in length with a high house at the extremity. Penzance is the head-quarters of the Royal Geological Society of Cornwall, which has a splendid collection of minerals. It has a natural history and anti quarian society a mechanics institution, a public library a grammar, and numerous other schools, and several benevolent societies. The trade of the town is considerable tin and copper which abound in the vicinity are exported in large quantities as are also china clay and pitchblende. The imports consist chiefly of timber, iron, hemp, tallow, hides, &c. The fishery in pilchards and other fish is carried on with great activity. Tin-smelting, tanning, and manufactures in serpentine, are carried on. The climate is mild and the environs abound in beautiful scenery. Lord Exmouth and Sir H. Dary were born here. On June 23 St. John's or Midsummer's Eve, and on June 28 or St. Peter's Eve, at dark, tar-barrels are placed along the centre of the principal streets, about 100 ft. apart these are simultaneously set fire to, and the space on either side is traversed by boys and girls with long tar-torches, which are lighted and swung round the head. This seems to be a relic of the ancient sun worship. Pop. 9214.

PENZING, a *tu*. Lower Austria, 1 bank Vienna W. Vienna with a number of fine villas belonging to outcasts of Vienna, a parish church, a military barracks, and a bathing establishment and two cotton and silk print-factories. P. 4135

PENZLIN, a *tu*. Mecklenburg Schwerin 41 m. S.E.E. Güstrow. It has a market place, a church manufactures of vinegar, and earthenware, and a trade in tobacco P. 2033.

PEORLETON, par. Eng. Worcester, 1474 ac. P. 286.

PEORIA, a *vil* U. States, Illinois, r bank Illinois River 68 m. E Springfield with six churches, an academy four schools, a courthouse, and a jail saw-mills, a tannery, a brewery, and two printing-offices. Pop. 1467. —PEORIA LAKES an expansion of the Illinois, extends about 20 m. N by E. from the village.

PEPER-HARROW par. Eng. Surrey 1454 ac. P. 139.

PEPPARDINTOWN, par. Ire. Tipperary 4719 ac. Pop. 900.

PERERRELLI, a *vil* and township, U. States Massachusetts, 88 m. N.W. Boston, with two churches, an academy, and eight schools paper manufactures, and several grist and saw mills. Pop. 1571.

PEREA, a suburb of Constantinople, occupying the summit of the promontory bearing its name, on the opposite or N shore of the Golden Horn, and immediately above and beyond Galata. From its elevated and healthy situation, it is a favorite place of residence with the European inhabitants, and with the merchants generally, who have their places of business in Galata. It is the head-quarters of diplomacy and the residence of the Dragoman. Some of the foreign embassies also had palaces here, but were driven from it by a great fire which occurred in August 1831, and by which their residences were destroyed. To calamities of this kind Pera is singularly subject. In 1849, 300 houses, and 50 shops were consumed in the richest and most populous quarter of the town, inhabited exclusively by Europeans, and on the following day 500 more buildings were destroyed in what is called the Christian quarter. Between 1841 and 1848, there were 18,750 houses consumed by fire, accompanied by an immense loss of property.

PERAK, a territory or kingdom, occupying a considerable part of the W. of the Malay peninsula, having Koda-Koda N. Galesapoor S. the Strait of Malacca W. and the central range which traverses the peninsula longitudinally on the E. It is partly mountainous, but has also rich and beautiful plains, with an alluvial soil. It possesses rich veins of tin, and gold is washed from many of its streams. Pop. exclusive of unknown tribes in central region, estimated at 35,000.

PERAK, a river, peninsula of Malacca. It rises in a mountain range in the S. of above territory flows W. S.W., and falls into the Strait of Malacca total course, 80 m.

PERALADA, a *vil*. Spain Catalonia prov and 24 m. N.E. Gerona, 1 bank Llobregat with a school an ancient castle, a palace of the counts of Peralada, and a church. P. 1295.

PERALEDA DE LA MATA, a *tu*. Spain, Extremadura, prov and 55 m. N.E. Caacere, with a courthouse, prison, two schools, a church manufactures of coarse grey cloth three oil three water and four flour mills, and some trade in sheep and hogs. Pop. 8590.

PERALTA, a *tu*. Spain prov Navarra, 23 m. S Pamplona, on the Arga. It has spacious and well-kept streets, three squares, a courthouse, two primary schools a church, a flour and several oil mills. Pop. (agricultural) 3304.

PERANZANES, a *vil*. Spain, prov and about 70 m. from Leon with a church, courthouse, and prison, a flour-mill and a trade in cattle. Pop. 1887.

PERASTO a *tu*. Anetua Dalmatia, 6 m. N.W. Catara, on the Gulf of Cattaro with three churches, and a dale guarded castle inhabitants generally seafaring, and in very different circumstances. Pop. 1800.

PERAWA, a small *tu*. Hindostan, prov Malwa lat 24° 10' N lon 76° 5' E irregular and mostly built.

PERAY (St.) a *tu*. France, dep. Ardèche, 8 m. S. Tournon in a valley noted for the richness of its wines. P. 1678.

PERBETE a *vil* Hungary, Thither Danube, co and 14 m. N. Komorn, with two churches, and some trade in cattle, wood, and wine. Pop. 1581.

PERCHIE (La) (Latin, *Cenosaues-Persici*) a dependency of *am* prov. Mainz, now united in dep. Sarthe, Orne, Eure-et-Loire and Loire-Cher. Its capital was Mortagne.

PERCK a *vil* and com. Belgium, prov Brabant, 9 m. N.E. Brussels with breweries, a flour mill and famous nurseries. Pop. 1069.

PERUT ISI ANDS an is group, N.E. coast Australia, Northumberland group lat. 21° 31' S. lon 150° 18' E (n). The largest is about 12 m or 14 m in circumference. It consists of a series of hills running in ridges many of them covered with gum-tree scrub and all with long grass growing in tufts. A species of pun, and a few subgum-palm grow on the island. The birds include black and white cockatoo, swamp pheasant, and crowns. Turtles frequent the shores. —(*Voyage of the Endeavour*).

PERDJANSK a seaport in Russia, gov. Ekaterinav on the Sea of Azov, between Mazarul and Taganrog. It is of recent origin, but having a good harbour, has increased rapidly and carries on a considerable trade chiefly in wheat and fine wool. Pop. about 2500.

PERED a *vil* Hungary near Danube, co. Presburg 12 m. from Tyrnau, on the Hollig. A good deal of pastel or wool is grown in the district. Pop. 1823.

PEREIRA, two places Portugal prov Douro —1 A *tu*, and par. 6 m. W. Coimbra. Pop. 1590 —2, (Jussam) A *tu*, and par. 30 m. S.E. Oporto. Pop. 938.

PERLKOP or *On Kari* (anc. *Typhro*) a *tu* in Russia, gov. Taurida, 86 m. N.W. Simferopol, on the isthmus of Perakop. It has irregular fortifications of wood, with a kind of castle built of stone, and contains a Greek church and a mosque. Its site is very unhealthy, and malarial fevers are common. The chief trade is in salt, of which immense quantities are annually sent into S. Russia. There are several large fairs frequented particularly by Nogai Tartars. —The straits, about 20 m. long by not more than 4 m. wide where narrowest, connects the peninsula of the Crimea with the mainland, and separates the Sea of Azov from the Black Sea, having the Gulf of Sivash in the former sea on the E., and the Gulf of Perakop in the latter sea on the W.

PERELLA, a *vil*. Spain, Catalonia, prov and 80 m. S.W. Tarragona, in a valley with a courthouse, church, two primary schools, and four oil-mills. Perello is strongly situated,

and in the insurrection of 1640, made a vigorous resistance to the Catholic army under Vandecastria. Pop. 1144.

PERREY, or PERREY, a vil. Hungary, Hither Thulia, co. Abaszar 12 m. from Kassa; with two churches. P. 1097

PERREY-SALAMON, or PERREY-SALAMON, a vil. Russia, gov. and 75 m. N W Vladimir, E shore of Lake Pleskovo. Its eastern rampart has been converted into a promenade, and has a cathedral, numerous churches, three monasteries, a nursery, manufactures of linen and an active trade with St. Petersburg. Pop. 3000.

PERREY-SLAV, a tn. Russia, gov. and 150 m. W N W Poltava, at the junction of the Alta and Truboch. It is surrounded by an earthen wall, and defended by a dilapidated fortress, and is very indifferently built. It has a cathedral, and nine other churches, a monastery, a school, manufactures of brandy and a trade in corn and cattle. Pop. 7000.

PERREY-SLAV, a tn. Turkey in Asia. See BASSANO.

PERREY, a ruined city, Asiatic Turkey, about 50 m. S.E. Smyrna. Its site, between two hills washed by the Cestrus, and backed by the mountains of Taurus, is extremely beautiful, and the remains include a palace of vast extent, a theatre, about 330 ft. wide, with its seats for the most part entire; and a stadium almost perfect, but now used as a place for running camels.

PERREY, a tn. Austria, Tyrol circle and 7 m. S.E. Trent. It is a wall built, has two churches, a castle, hospital, and Capuchin monastery. Pop. 8056.

PERREY, a tn. Italy, the Marches, deleg. Urbino a Pesaro, on the Cosaro. 16 m. S.E. Urbino; with manufactures of cloth and tannery. Pop. 8000.

PERREY, a small lake, Sicily, prov. Caltanissetta, N of Piazza. From the banks of the lake, according to fable, Proserpine, while gathering flowers was carried off by Pluto.

PERREY, or PERREY (Latin, Perreus) a vil. Hungary, Thither Thulia, co. Torontal, on the Maros, with a church and some manufactures of corn, wine, and wool. Pop. 3045.

PERREY, a vil. Spain, Andalusia, prov. and 30 m. from Malaga with a courthouse, an endowed school, a church, an octagon, and three fountains. Pop. (agricultural) 2778.

PERREY-PATAM, a tn. Hindooon state Mysore, 37 m. W Srirangapatna lat. 12° 12' N lon. 76° 11' E with ruined fortifications.

PERREY-PATAM, or PERREY-PATAM a river Lower Canada, flows S.W., and falls into N shore Lake St. John.

PERREY, a tn. France, dep. Moselle, 10 m. N by E Contancourt, with a considerable trade in clover-seed. P. 2098.

PERREY (L.) [Latin, *Petrus corvus* *Agar*], an aze. prov. France, with which name dep. Dordogne. Periguenx was its capital.

PERREY-LUX (Latin, *Perreus*) a tn. France, cap. dep. Dordogne, on a slope forming a bank L. Isle, here crossed by a fine bridge, 66 m. E.N.E. Bordeaux. Its internal appearance is far from prepossessing, and in some respects it is a dull dirty place. The exterior is bordered by several green alleys, and there are good promenades, adorned by bronze statues of Faneon and Montaigne. The principal edifices are the cathedral, a Pyrenean structure in the form of a Greek cross, with a tower 127 ft. high, and five cupolas surmounting the four squares formed by the arms of the cross, and a larger square in the centre the public library containing 16,000 volumes the prefecture, a handsome modern edifice, the palace de justice, hospital barracks, theatre museum &c. Periguenx is the see of a bishop, and possesses a court of first resort and commerce, an agricultural society and communal college. It has manufactures of hosiery, serge, honey fine liguers, cutlery and sells also marble-works, a variety of distilleries, and manufactures of leather, and particularly a kind of parchment and tuffin pie, extensively exported, and well known by the name of *pele de Perreus*. It was one of the eight towns needed to the Protestants, for security, by the peace of 1576. Pop. (1827), 11,970.

PERREY, a tn. Venezuela, dep. Zula, prov. and 83 m. N.W. Maracaybo, 1 bank Paria, 20 m. above its mouth, in Lake Maracaybo. Pop. 8000.

PERREY, or PERREY an isl. Strait of Bahama, about 4 m. off the coast of Yuma in Arabia; length, 6 m.

PERREY, or PERREY (Latin, *Perreus*) a vil. France, dep. Alpes Maritimes 26 m. S.E. Nice, with a beautiful

church, and a monastery; a trade in wine and oil, both of first-rate quality. Pop. 1660.

PERREY, or PERREY, a mountain range, Brazil prov. Goyas. It contains the loftiest summits in the prov., part of which it traverses E. to W. nearly in lat. 16 S. and forming a kind of centre to the great Cordillera of Brazil, sends out numerous branches in different directions. It furnishes the source of various rivers, some of which flow N to the Tocantins, and others S. into the basin of the Parana.

PERREY, par Eng. Middlesex 686 ac. Pop. 23.

PERREY (Nagy) a vil. Hungary, Thither Danube, co. Stuhlweissenburg, 4 m. from Adony with a church, a castle and a trade in corn, cattle, and wine. Pop. 2464.

PERREY, or PERREY, a market in Hungary Thither Danube, co. Zala, 16 m. N.W. Koprivnica; with a church. Near it a good deal of silk is produced. Pop. 2570.

PERREY-VAHOS, a vil. Hungary Banat, dist. Temeswar and 36 m. E. Peterwaradin, with a R. Catholic, and three Greek churches. Pop. 2674.

PERREY-BERG a walled in Prussia, gov. Potsdam, 78 m. N.W. Berlin on the Stupetta. It has a Protestant church and chapel several courts and public offices and manufactures of woollens and chert. Pop. 6143.

PERREY, a to of about 500 houses, Turkey in Europe Macedonia, 21 m. N.E. Monastir, on the Kendrari. PERREY, an E. gov. Russia, bounded, N by Volga and Tobolsk, E. Tobolsk, S. Orenburg, W. Yuzka, and N.W. Volga, lat. 56° 13' to 61° 55' N lon. 53° 50' to 64° E greatest length N.W. to S.E. 620 m. breadth, about 400 m. area, 90,000 qvo. sq. m. This government being traversed N to S. by the Ural chain is divided into two unequal portions, a W and an E. the former, of course, in Europe, and the latter in Asia. The Asiatic portion, the less of the two belongs to the basin of the Arctic Ocean which receives its waters through tributaries of the Obi. Of these, the most important are the Yenisey, Lena, Tura, Nura, Irkutsk, Selenge, and Irtys. In the E. it contains several lakes, of which the largest is in the Bayan. The European portion belongs to the basin of the Caspian, with exception of a small portion in the N.W., drained by the Petchora, and of course belonging, like the E. portion, to the Arctic Ocean. By far the most important river in the European portion is the Kama, which, entering the government on the N.W. proceeds through it in a very circuitous direction receiving numerous tributaries on either bank of the course, the largest are the Yama, Kama, Koria, Olva, and Tschudra, with its affluent Silva. From the principal Ural chain the surface descends in a succession of parallel terraces. On the loftiest summits snow and ice continue for nine months in the year, and hence the climate, naturally rigorous, from its high latitude and inland position, has its rigour greatly increased. Beyond the 60th degree, regular culture becomes impossible, and the far greater part of the surface is occupied by forests and marshes. Extensive forests also stretch far into the S. and the soil being generally not very fertile, large tracts remain uncultivated. The government is rich in minerals, and possesses extensive auriferous tracts, on which vast numbers of the inhabitants are employed in collecting gold and also apparently inexhaustible beds both of iron and salt. The vast quantities of fuel required in order to work these extensively and to advantage give a great additional value to the timber of the forest and make the surface covered by it of far greater value than it could be in any other form. Game, both large and small, is common in the forests, and many of the inhabitants gain a livelihood by hunting fish, including bothurgeon and salmon, abound in the rivers. With exception of several branches of industry immediately connected with the mines, there are few manufactures. The chief are soap, leather, tallow-candles, potash, and glass. The trade derives great facilities from the Kama and other navigable streams, and has acquired some importance. The principal articles are metals, marble, wool, salt, fur, tallow and tar. Nearly three-fourths of the inhabitants are Russians, and belong to the Greek church, the rest consist of Tartars, Tatars, Bashkirs, &c. and though many of them have nominally embraced Christianity, not a few are Mahomedans, and among others different forms of paganism are said to prevail. The governments of Perm and Kams are under one military governor. Some exertions have been made to extend education, but the number of scholars to the

population is only 1 in 994. For administrative purposes, Perm is divided into 12 circles. Pop. (1880) 1,676,560

PERM, a Russia, cap. above gov. r bank Kama, at the confluence of the Jazguchelka 960 m. E. by S. St. Petersburg. It is built with considerable regularity in straight and spacious streets, and has two churches, several other public edifices, surrounded by a square, a gymnasium, theological seminary, a civil and military hospital, extensive copper and iron smelting and refining works and a considerable trade with the island districts. Pop. (1861) 15,362

PERAQUA or **PARANANHA**, a Br. Brazil prov. Piahi E. side of a large lake, 250 m. S.S.W. Oeiras. It is the residence of a justice of the peace, and has an elegant church built of stone. Near it the best tobacco in Brazil is grown and in it, as well as in horses and mules, there is a considerable trade. Pop. dist. 4000

PERNAMBUCO, a maritime prov. Brazil bounded N by Coara and Paraíba, E. the Atlantic, S.E. prov. Alagoas, S. Sergipe d'El Rey, Bahia, and Minas-Geraes, W. Goyas, and N.W. Piahi, area, 109,896 sq. m. It is of very irregular shape, forming a long and comparatively narrow, tract, curving round N.E. to S.W. becoming very much contracted towards its centre, from which it gradually bulges out on either side, so as to have a considerable width at both extremities. The coastline, forming the whole of its E. boundary has an extent of about 180 m., lat. 7° 35' to 5° 50' S. It is low and uninteresting, lined towards the sea by long and dangerous coral-reefs, and towards the interior generally well covered with wood. The country beyond gradually rises, and ultimately becomes mountainous being traversed by several chains, of which the Caldeia in the N, the Piahi and Tabatinga in the W and S.W. are the loftiest and most extensive. The far greater part of the province belongs to the basin of the São-Francisco, which forms its boundary on the E and S for many hundred miles, and drains it both directly and by numerous affluents, of which the most important are the Corrientes and Grande. In the N.E. another basin of much less extent is formed and sends its waters directly to the sea by the Capibaribe, Ipojuca, and various other streams. The climate is hot and moist, and the soil generally fertile. The principal cultivated crops are the sugar-cane and cotton, the latter extensively exported to Europe. The forests, which cover almost all the mountainous parts of the province as well as much of the lower ground, yield inexhaustible supplies of timber, both for ship-building, carpentry and ornamental purposes. Dry-woods also of superior quality and trees which distil balsams, gums, and resins of the most valuable descriptions, abound. Some gold is found, and excellent quarries of marble might be opened in several districts. Manufactures, of marble so called do not exist; but great numbers of the inhabitants are employed in the sugar-works and distilleries. The extensive export of sugar, rum, and cotton, naturally leads to a corresponding extensive import, chiefly from Britain and the U. States. The province sends 15 deputies to the general legislative assembly, and appoints six senators. P. 500,000.

PERNAMBUCO, or **PARANÁ**, a Br. Brazil, cap. above prov., on the most eastern part of S. America, at the mouth of the Capibaribe lat. (Fort Fleck) 5° 58' S., lon. 54° 51' 45' W. (A.) It consists of three distinct parts or parishes—Recife proper, or São-Pedro-Condado, occupying a sandy and somewhat elevated peninsula, which stretches along the shore, and is separated from the mainland on the W by the Biberibe. Santilmo-Sacramento, occupying the Isle of Santo-Antonio, between the peninsula and the mainland, with the former of which it is connected by a stone and with the latter by a wooden bridge, while two others are washed by the Biberibe and Capibaribe, previous to their junction; and São-Vista or Sacramento, situated on the mainland W of the other two parts, on uneven ground, and built in the form of an amphitheatre. Recife proper, the principal seat of business, is composed of brick houses, generally of three, some-

times of four and even five stories, but the streets, though paved, are narrow. The houses of Santo-Antonio are well built, but not so regularly as those of Recife. Its streets, however, are wider but unpaved, have side-walks, and are lined with the principal shops. São-Vista is the most modern quarter and has the greatest number of showy buildings, but the streets are irregularly formed, and the houses want uniformity. The whole three divisions are extremely dirty, and though surrounded with water are deficient in drainage. Good drinking-water can only be obtained by bringing it in barrels from a cascade of the Biberibe, near Olinda. The harbour consisting of a natural basin lies within a line of reefs, which form a kind of breakwater, though the sea in high storms throws its surges partly over it, and dashes in with great fury through certain openings in it. It has from 16 ft. to 50 ft. of water, but the best-sheltered part has from only 10 ft. to 12 ft. It is defended by several forts, and provided with a lighthouse, visible about 12 m. off. The principal buildings are the old Jesuit college, now occupied by the governor's palace, the provincial legislature, and several public offices, a large pile, of gloomy appearance, with walls of enormous thickness two parish churches, several convents provided with churches, the episcopal palace general and orphan hospital, a lyceum, in which English, French Latin, rhetoric, and philosophy are taught various primary schools, and an hospital. The trade which is of great extent, consists in raw sugar, timber both for ordinary and ornamental purposes, dyed woods and above all cotton of superior quality. The chief imports are cotton and linen tissues, hardware and earthenware. Pop. in, 12,000 dist., 88,000

PERVAU, or **PARAVO**, a Br. Brazil, gov. Livonia, at the mouth of the Pernau, in the N.E. corner of the Gulf of Riga, 102 m. N.N.E. Riga. It is defended by a castle has a Greek and two Lutheran churches, a superior and four elementary schools. A harbour which though too shallow to admit large vessels, enables it to carry on a considerable trade in flax, hemp, corn, linseed, hemp-seed, and leather. Owing to the lowness of its site, prevailing winds from the S.W. expose it to dangerous inundations. Pop. (1849), 5740

PERVES [anc. *Puteves*] a Br. France, dep. Vendée 4 m. S. Carpentras, l. bank Neque, with manufactures of silk, brandy, and wine. Pop. 2613

PERNIE, a vil. Holland, prov. S. Holland on the Merwede 18 m. W.N.W. Dordrecht with a church and a harbour, inhabitants partly engaged in fishing and partly in flax culture. Pop. 1485

PERONNE [anc. *Pervone Peromacorus*] a Br. France, dep. Somme, 32 in E. by N. Amiens, r. bank Somme, on the slope of a hill, surrounded by extensive marshes, strongly

HERBY AND MARKET-PLACE PERONNE.
From Hatcher in Taylor: Voyage dans L. Antenne France.

fortified, and commanded by a castle, now ruinous. Its principal public buildings are the church of St. John, a town-hall, communal college, hospital, theatre, convent, and convent

bell-tower. It has manufactures of woollen fabrics, cambrics, lawn, leather, sugar, oil, brandy, and spirits; and a trade in grain, wool, and brandy. Perouse was formerly a town of considerable importance, and from its ruins having been taken, obtained the name of La Pucelle [The Virgin]. The early kings of France had a palace here, and several of them are interred in the church. Attributed to the castle is an ancient tower, Tour Herbert, wherein Charles-le-Simple died in confinement, and Louis XI was detained by Charles-the-Bold. It is supposed a chivalrous treaty called The peace of Perouse. Pop. 9540.

PEROS-BANHOS, a group of villages. See CHAGOS.

PEROSA two places, Italy. Piedmont.—1, A. in the 25th W. S. W. Turin, 1 bank Chiasso here crossed by a stone bridge. It has a church, communal school, and a trade in corn, cattle, and sheep. A great many of the inhabitants are fatuous, and affected with goitre. Pop. 1500.—2, A. in the 25th W. S. W. Turin, prov. and about 5 m. S. Ivrea, with a tower and some other remains of an ancient castle, and a trade in corn and dairy-products. Pop. 750.

PEROTE, a town in Mexico, dep. and 72 m. W. N. W. Vera Cruz, with a castle, used as a state prison. Near it is a lofty mountain of same name. Pop. about 7500.

PERFENAAD a maritime town in Hindoostan prov. Malabar lat. 11° 8' N., lon. 75° 54' E. with houses mostly of stone, and greatly superior in many respects to those generally to be met with in India.

PERPIGNAN [Latin *Perpignanum*] a town in France, dep. dep. Pyrénées-Orientales, partly on a gentle slope, and partly in a wide and fertile plain, 8 m. S. W. Perpignan. It is surrounded with lofty walls flanked with bastions, and defended by a citadel, occupying a height which completely commands the town. Guarding the entrance from Spain into France by the E. Pyrenees it has been fortified

FORT NOTRE DAME CATHERINE, PERPIGNAN
From *Notice de l'Etat* by Victor Hugo, 1840.

with the greatest care by the most celebrated engineers, and ranks as a fortress of the first class. It is nearly in the form of an oval, the shorter axis of which exceeds 1 m., and the longer 2 m., and is by no means well built. The streets are narrow and almost closed over in many places by the wooden balconies of the houses, which attract less attention by their architectural merit, than by the Moorish form of their structure, and the peculiar physiognomy of their inmates. Almost all the public buildings date from the period of Spanish rule, and are either of brick or rounded pinnacles. The principal are

Go cathedral, founded in 1524, the church of St. Jean Le Vieux, of much more ancient date; the church of St. Paul, the library, containing 13,000 volumes; university, palace-de-justice, hotel de ville, college, hospital of St. John, prison, mint, and arsenal occupying an old Carmelite convent. It is the see of a bishop, has a court of first resort and com munes, communal college, diocesan seminary, society of agricultural arts, and commerce, nursery, and botanical garden; manufactures of broad-cloth and other woollen stuffs, playing cards, candles, chocolate, and whip handles, leather and brandy; and a trade in wine, brandy, white honey, iron, wood, oil, iron, silk, cork and some other products of the S. It was the capital of the former province of Roussillon, and was not united to the French crown till the treaty of the Pyrenees in 1659. After the lapse of nearly two centuries, it still bears strong indications of its having long been under Spanish dominion. Pop. (1855), 17,512.

PERRAINDA, a large town in Hindoostan prov. Ayrangabad 70 m. S. E. Ahmednagar lat. 18° 18' N. lon. 75° 54' E. PERRANARWOTAI, par. Eng. Cornwall 1796 ac.

Pop. 1624.
PERRANUTHNOE, par. Eng. Cornwall 1182 ac. Pop. 1229.

PERRANABULOE, or PERRAN-IN-DE-SAND a vil and par. England, on Cornwall on the Bristol Channel, with a small harbour 7 m. W. N. W. St. Michael. It consists chiefly of detached cottages, inhabited by miners, and has two churches, a Wesleyan chapel, extensive mines of tin, copper, lead, and zinc, and a plebeian factory. Area 11,840 ac. Pop. 3114.

PERROT two par. England.—1, (North), Somerset, 1248 ac. Pop. 299.—2, (South) Dorset, 1451 ac. P. 374.

PERROT an isl. North Canada, in the St. Lawrence, N. W. of the isl. of Montreal between the Lake of the Two Mountains and the Lake of St. Louis. It is about 7 m. long N. W. to S. E., and contains several villages.

PERRYBURG, a vil U. States, Ohio at the head of steam-boat navigation on the Maumee, 117 m. N. N. W. Columbus with three churches, a courthouse, a jail, and manufactory of various kinds. Pop. 1055.

PERRANT, a river. France which issues from a lake near St. Nizier, prov. Pomerania, flows easterly N. W. past Belgard and Gorbis and falls into the Balte a little below Colberg total course, 50 m.

PERSBERG, a vil. Sweden, lin. Carlstedt, 5 m. N. W. Philadelphia. It is celebrated for its iron-mines, about 12 in number, which have long been worked, and to a great depth in a hill, which appears to be almost one mass of ore.

PERSPOLIS (Persian *Esfahan*) an anc. city Persia, prov. Farsistan long the cap. of the Persian monarchy is a beautiful plain near the Araxes, 82 m. N. N. E. Shiraz. Its early history is lost in obscurity but it had long been one of the most important cities of the East and had reached its highest splendour when it was taken and destroyed by Alexander the Great; according to some in a drunken frolic, and according to others as a just retaliation for the devastation which the Persians had committed in Greece. The ruins still lie scattered over a large surface, but the only one which particularly attracts attention is an immense pile of buildings supposed to have been the palace of Darius which Alexander burned. It occupies a platform 1450 ft. long, by 802 ft. wide, is approached by flights of steps out in the rock, and exhibits vast portals, one of them formed by two enormous sphinxes, pillars, walls, and staircases, adorned with elaborate sculptures, and base-reliefs, and covered over with various cuneiform inscriptions.

PERSERIM, Turkey in Europe. See PERSERIM.

PERSHORE, a market in England, co. and 8 m. S. E. Worcester s. bank Aven. It has two churches, of which that of the Holy Cross consists of a portion of the old abbey of Persore, and is a noble structure, a Baptist chapel, national schools for boys and girls, and a mechanics institute. The chief trade is wool-stapling, thrashing-machines are manufactured to a considerable extent. Immense quantities of fruit and vegetables are raised in the vicinity for the markets of Manchester, Birmingham, and other large manufacturing towns. Pop. 2717.

PERSHORE, two par. Eng. Worcester.—1, (St. Andrew) 9266 ac. P. 2356.—2, (Holy Cross), 2580 ac. P. 2028.

PERSIA (Ariana and Persia, Iran, French *Persie*, German, *Perisien*), a kingdom of W Asia, lat. 35° 40' to 38° 50' N lon 44° 20' to 61° 30' E; bounded, N by Russia, the Caspian Sea, and Independent Turkey, E by Afghanistan, S.E. Baluchistan, S. the Indian Ocean, Strait of Ormuz, and the Persian Gulf and W Asiatic Turkey; greatest length, N W to S.E. 1150 m., greatest breadth, E.W. to S.W. 860 m. It is divided into the provinces of Aserbaïjan, Gilan, Mazandaran, Astrabad, Ardistan, Kermanshah, Irak-Ajemi, Khorasan, Fars, Luristan, Kerman, and Laristan; total area, 935,846 sq. m. Pop. about 8,000,000. Principal towns, Teheran, the capital, Isfahan, Tabriz, Astrabad, Baluchistan, Kermanshah, Kerman, Hamadan, Bushahr, &c.

General Features.—Persia belongs to the vast and elevated table-land, which, commencing in the W, on the E frontiers of Asiatic Turkey, stretches E without interruption into Afghanistan and thence to the borders of India. The W part of this table-land forms the far larger portion of the Persian dominions. To the E, where it is only politically separated from Afghanistan, it does not possess any natural boundaries; but has its limits in other directions well defined by lofty mountain ranges, which descend, with more or less rapidity on the N towards the Caspian, on the W towards the plains of the Tigris and Euphrates, and on the S towards the Persian Gulf. Persia may thus be described, in general terms, as consisting of an extensive central plateau, occupying at least three-fourths of the whole surface, a series of mountain chains encircling the plateau on all sides except the E, and an outer border of more or less width, consisting for the most part of gentle slopes, low valleys, and level plains. The E part of the plateau forms the great deserts of Khorasan and Kerman, and is one of the most desolate regions of the globe (see *KHORASAN* and *KERMAN*). Towards the W the plateau improves in appearance. Saline incrustations are there of less frequent occurrence, the quality of the soil improves, and the surface, being both more diversified and more broken by lofty heights, obtains more moisture, and is consequently cultivated. This indeed, holds true generally, in regard to the interior edges of the plateau, where the mountain ranges begin to rise, tracts of considerable fertility extending along their bases, and to some distance up their slopes, but it is only on the outer edges of these slopes, and downwards towards the plains that a rich varied and magnificent vegetation is found. This, however, does not apply to the S. mountains, which, approaching close to the Persian Gulf, leave only a narrow tract, with a S. exposure, and so extensively hot, as not only to wither up the plants but to be scarcely fit for human habitation and applies only in part to the plains of the W where moisture is often in excess and forms extensive swamps, from which pestilential vapours arise, but holds particularly true of the valleys and plains which have a N exposure, and slope towards the Caspian.

Mountains.—These have already been referred to as forming the lofty barriers which encircle the central plateau. The N chain, commencing far E, at the Hindu Kush, by which it becomes linked to the Himalayas, traverses Afghanistan and enters Persia on its E E frontier near lat. 61° N, W of the town of Herat. Here it forms a mountain region, in some parts 200 m. wide, though in general much narrower, and under the name of the Mountains of Khorasan, proceeds across the N of the province of that name first in a W N W and then in a W S W direction. While pursuing the former direction, the height nowhere exceeds 4500 ft., but in the latter, as the Caspian is approached, a much greater elevation is attained. The chain now takes the name of the Elburz Mountains, entering prov. Irak Ajemi and Mazandaran on the E, and shortly after, on the borders of these two provinces, attains, in Mount Damavand the height of 14,600 ft. From this point, which is the culminating point of the range, and exhibits on its declivities unequivocal signs of volcanic formation, the Elburz stretches W N W in three separate ranges, still maintaining an elevation so lofty, that several of its ridges continue covered with snow till the beginning of June. The Elburz chain which many consider as terminating nearly opposite to the S W corner of the Caspian is succeeded by the Masius mountains, and then by Mount Savellus, which, attaining the height of 12,000 ft., throws out numerous ramifications, by which it becomes linked with the

mountains of Ararat. These, which, in the celebrated mountain of same name, situated, as a common property, on the borders of Russia, Persia, and Turkey, possess the loftiest summit of W Asia, form the common link by which the N and the W ranges of Persia are united. The latter commencing in the N W, in the mountains of Koordistan, is continued E. in a broad and elevated belt, till it reaches lat 34° N; then it changes its direction to S.E. and, under the names of the Mountains of Laristan, Awa Bakhtiari, and Farsistan, spreads out and forms several separate ranges. One of these, proceeding E. between prov. Fars and Laristan, and across prov. Kerman, forms the S. range already referred to, as separating the great plateau from the shores of the Persian Gulf. It is more remarkable for its length and width than for its elevation which, apparently never rises above 5000 ft. higher than the plateau forming its base.

Rivers and Lakes.—Considering the extent of Persia, its rivers are both few in number and insignificant. Not one of them is of anyavigable proportions, except the Euphrates; and even it cannot well be called a Persian river, as it only waters a small portion of the S W frontier. Its important tributary the Kerah (which see) however has its whole course in Persia. The Karoon range to the W of the Kerah, pursues a course nearly parallel to it and, after receiving several considerable affluents, falls into the N W extremity of the Persian Gulf which, from that point E. though extending for several hundred miles, and forming the only basis for the S drainage of Persia, does not receive a single stream deserving of notice. Throughout the central plains, the total absence of running water is still more apparent. From the S. slopes of the mountain ranges, which rise from its N edge, much water, partly the produce of perpetual snow, necessarily descends in numerous streams which soon reach the borders of parched and sandy deserts and are immediately absorbed. The N slopes are so near the basin of the Caspian, to which they all belong that the water which they supply though often in such excess as to inundate the plains below, has too short a course to allow it to accumulate into rivers. The principal exception is furnished by the Rind Rud or White River which, rising in the mountains of Koordistan, has found, or worn for itself, a channel, generally several hundred, and sometimes 1000 ft. below the general level of the table-land in which the first part of its course is performed, then bursts its way across the mountains of Masius, into a long valley, intersected between two of its ranges; and finally worked its way to the Caspian across the Elburz, at the celebrated Rudbar pass, where a course of about 550 m. Almost all the fresh-water lakes which Persia possesses are situated in prov. Mazandaran. They are numerous, though individually of limited extent. The salt lakes, on the contrary are few in number but remarkable for their magnitude. The principal are Bakhtegan or Mirz, in the E of prov. Fars and Shahr or Urmia, in the W of prov. Aserbaïjan. The latter in particular, is 80 m. long by about 25 m. broad. The water is much saltier than that of the ocean, and, though generally shallow is safely navigated by vessels of considerable size.

Geology and Minerals.—The geological structure of Persia has not yet been carefully and completely explored. The whole of the interior with very few exceptions, appears to be occupied by strata belonging to the tertiary formation. On the E a belt of secondary strata stretches N to S., near the frontiers of Afghanistan and on the W a similar belt has been traced among the mountains, which there form the boundary of the great plateau. Gneiss and crystalline schists form great part of the mountains which extend from Laristan E. across the S. of Kerman into Baluchistan. The same rocks are more largely developed in the mountain ranges of the N, where, besides forming the nucleus of the principal axis, they cover a considerable width, both on the N and the S. slopes, and along the base. The only remarkable interruption to the continuity of the gneiss and schists of the N is in the chain of the Elburz, in which the effects of recent volcanic agency are strongly manifested. The rocks which bound the alluvial plain of Lake Urmia on the W., are also volcanic. The most celebrated of the mineral products of Persia is the turquoise, the most valuable mines of which, producing gems of surpassing beauty, and in considerable quantities, are in the vicinity of Nishapur, to the W of

hunted. Among the metals, iron, argilliferous lead, copper and antimony, are said to be abundant, though they have not yet been mined to much extent. Rock-salt may be obtained in unlimited quantities in almost every quarter, and sulphur is dug almost solely from the crumbling cone of Mount Demavend. Naphtha is found in many places; a celebrated gum or bitumen, called musk, is collected in Fars; and not only is marble of the finest quality quarried, but coal also is said to have been discovered in Aserhizan.

Climate.—The extremes of heat and cold are most sensibly felt on the central plains, where the winter is as rigorous as the summer is hot. The typhoons of the atmosphere, however, make the air generally pure, and the sky cloudless. The shores of the Persian Gulf are scorching up in summer by a burning heat, and become so unhealthy that all the inhabitants who have the means abandon them, and retire to the adjacent mountains. On the S. side of the N. mountain range, snow falls early in November. In such situations, as at Teheran, ice is seen up to the middle of March. Cold winds from the N. prevail in April, and, even during summer, great and sudden changes of temperature are not uncommon. On the S. side of the mountains, in the regions of Gilan and Masanderan, the climate is that of a tropical region, in which a dry and a rainy season regularly alternate and vegetation has a luxuriance not often met with in much lower latitudes.

Vegetation, Agriculture, Zoology, &c.—The general barrenness of the interior of Persia, particularly in its E. and S. regions, has already been referred to. The long belt of sandy shores which line the Persian Gulf is nearly as barren as the desert table-land, but is often interspersed with plantations of date-trees, which have had a genial climate, and grow to great perfection. Among the mountains of Khuzestan, Bakhtiari, and Laristan, forests of oak and other trees are not uncommon, though in general they are stunted in their growth, and degenerate into a low jungle. The only true forest-land of Persia is the S. side of the lofty ranges which overlook the Caspian. There all the mountain sides are covered with dense and magnificent woods of oak, beech, elm and walnut, intermingled with box-trees, cypresses, and cedars. Along the slopes extensive open glades often occur where the ground becomes covered with a rich herbage, on which numerous herds of cattle, chiefly for the dairy are reared. Lower down, though still at some thousand feet above sea-level, wheat and barley are extensively cultivated. In the level and rich plains below, vegetation of every kind is remarkably luxuriant. The sugar-cane and orange come to perfection, and are common; the pomegranate grows wild, the cotton plant and mulberry are extensively and successfully cultivated, large tracts are occupied by the vine, and orchards, loaded with exquisite fruits—figs, apricots, peaches, plums, cherries, apples, and pears—occur in every quarter. Even the swampy shores of the Caspian are covered with a tall growth of saline plants and canes, available for building, and many other domestic purposes. In these low plains, the only grain under extensive and regular culture is rice; and the principal auxiliary crops are cotton, indigo, sugar, madder and tobacco. An other rice district, of large extent, occurs in Aserhizan, where large rice fields, producing rich crops, occupy the greater part of the low lands which surround Lake Urmia. Irrigation is well understood, and is extensively practised, and in lands generally of no great fertility good returns are by this means obtained. In the most pastoral districts, and more especially on the fertile slopes and plains at the foot of the S. side of the Elburz chain, where luxuriant meadows are often seen, considerable attention is paid to the dairy. The stock, however, is generally of an inferior description, though black cattle, of great size and beauty, distinguished by the Indian hump, are not uncommon in Masanderan. Sheep and goats are much more numerous. The former, chiefly of the large-tailed variety, furnish the greater part of the animal food which is used, and no considerable portion of the clothing; the wool being not only extremely soft and warm, but often allowed to remain on the skins, which are formed at once into cloaks and jackets. The latter particularly in poor Kerman, yield a wool little inferior to that of Cashmere. The other domestic animals are more, generally of a large and superior description, namely, remarkably strong, hardy, and sure-footed, and used, more than any other animal, for transport; horses, much improved by crossing with those of Arabia, and famous for strength, speed,

and beauty; and camels. The more remarkable wild animals are the lion, occasionally seen in Farsistan, and a few other places; leopards, including the cheetah, used for hunting; tiger-cats, lynxes, bears, wild boars, hyenas, wolves, &c. porcupines, ermine or mountain sheep, and less or mountain goats. Birds in numerous flocks are found only in particular spots. Among others are pheasants, frequenting the plains on the S. E. corner of the Caspian; pelicans and bustards along the sandy shores, and often far in the interior of the deserts; blackbirds, thrushes, and other well known songsters, but more especially the bulbul or eastern nightingale. Among destructive insects the locust is noted for the fearful ravages which it often commits. Flies abound only in the Caspian, and on the shores of the Persian Gulf. At the mouths of the streams which fall into the former valuable sturgeon fisheries are carried on chiefly by Russia. The rivers contain few fish and Urmia, the largest of the lakes, is wholly destitute of them.

Manufactures and Trade.—The manufactures of Persia are more numerous than important, though in a few articles they continue to retain some of the celebrity which they acquired in early times. Among them may be mentioned various kinds of silk goods, as taffetas, velvets, and broadcloths, made especially at Isfahan, Kashan, Astrabad, Yezd, and other places, not only for home consumption, but export, particularly to Turkey and Russia. Carpets and felts in Khuzestan, and many of the central districts of Irak Ajemi. Arabian cloaks, and woollen stuffs, made in Khuzestan, and in large demand in the country as well as Arabia, shawls, in imitation of those of Cashmere, made of the fine wool of the goats of Kerman, the treasuries of Kermanshah, the swartz daggers, and other cutlery of Isfahan, Shiraz, and Meshed; the copperware of Kashan the gold brocades of Isfahan. Coarse woollens and cottons, once made to a very great extent, for the clothing of the poorer classes, have in numerous instances been entirely supplanted by the cheaper and better products of Great Britain and Russia. The internal trade is wholly carried on by caravans. The principal articles imported from the East, are muslins, leather, lamba skins, stuffs of camels hair, shawls, ambores, rhino, glass, hardware, amber, coral, precious stones, saffron, indigo, spices, &c. The exports to the East, are velvets, silk and cotton stuffs, &c., from Isfahan and Yezd; articles in gold and silver bronze, brass, copperware, &c., from Kashan; musk, lacquered ware, ivory ornaments, dates, lemons, and tobacco from Shiraz, and shawls and some other articles from Kerman. The Caspian and the Persian Gulf furnish many important items. The traffic of the former, carried on chiefly at the ports of Enzeli, Balfrouh, and Astrabad, is almost entirely monopolized by Russian subjects that of the latter formerly carried on chiefly at the port of Gombourh, but now much more at that of Bassorah, employs a considerable number of vessels, owned, for the most part, by Arsenian, Arab, and Indian traders. By the latter alone, Great Britain imports to some extent, broad cloths, and other woollens, cotton goods, shawls, jewellery, arms, cutlery watches, earthen and glass ware, metals, &c. receive chiefly in return, silk, gall-stone, madder and other dyes. Though Persia has a considerable extent of sea-coast, both along the Caspian and the Persian Gulf, it possesses very few vessels of any description, both its coasting trade and its more distant commerce being almost entirely carried on in foreign bottoms.

Government, People, and Language.—The sovereign of Persia is an absolute and uncontrolled despot. His principal ministers are the Vizier, Assem, or Grand Vizier, and the Amser a Dowah or lord high treasurer the former commands the army in the sovereign's absence, and manages all foreign affairs, and the latter superintending the collection of the revenue, and whatever relates to the interior. Both ministers, though the more slaves of the master, are, in regard to all other persons, as absolute as himself. Each province is governed by a Beglarbey, or Sarkar, generally a prince of the blood, or high noble, who appoints his lieutenants or Hakims, under whom there is a long series of subordinates. For the administration of justice there are two classes of courts, one called *Sheriah*, which decides according to the Koran, and the other, called *Urf*, which decides according to customary law. Between the two the chance of justice to the subject is very small. The revenue, chiefly

derived from land and poll taxes, import and export duties, tributes from nomadic tribes, etc. has been estimated at from 21,500,000 to 22,000,000. The standing army consists of about 15,000 men, who have received European discipline, but the chief force consists of irregulars, who on emergencies may exceed 200,000 men, a large proportion of them being cavalry, who perform feodatory service. The population, about 8,000,000, contains a considerable mixture of other nations, particularly Turks and Arabs; but the Persian portion of it is still strongly marked by distinctive features. The stature is generally shorter and the whole frame of a more slender make than the European standard. The complexion is fair but the hair, long and straight except on the beard, which is bushy is almost invariably jet black. Their intellectual qualities are naturally of a high order and enabled them, at a very early period, to take a lead in civilization, but their moral qualities are very defective. Under the most plausible exterior, they often conceal the deepest cunning, dishonesty, and deceit. Their remark, however, applies more especially to the fixed population, for among the nomadic tribes, the opposite virtues are by no means uncommon. The celebrated fire-worship of the ancient Persians has still some followers, particularly in the S. provinces of Farsistan and Kerman; but Mahometanism is the established religion and is followed by the great body of the people. Polygamy, of course, is both authorized and encouraged, and all the vices which it engenders are everywhere displayed. Persian forms one of the principal branches of the great family of Indo-European languages. It is remarkable for its softness and harmony, which admirably adapt it for the higher forms of poetry, and has the same written character as the Arabic, which in other respects, it greatly resembles. It possesses numerous works both in literature and science; these in the former bear a high reputation; those in the latter with the single exception, perhaps, of mathematics, are of a very unsatisfactory and juvenile description.

History.—Few nations began at an earlier period to appear on the great stage of the world and few have continued so long to perform a prominent part upon it. According to the description of Persian geographers, when their country was in its greatest glory its territory comprehended four seas—the Caspian Sea, the Black Sea, the Red Sea, and the Persian Gulf and six great rivers—the Euphrates, Tigris, Araxes, Phasis, Oxus, and Indus. Passing over a series of fabulous dynasties, we arrive at that of the Achæmenides, or Kianians which commenced about 720 B.C., and furnishes the first records which can be considered authentic. Shortly after this period, Persia appears to have been merely a province of the Assyrian empire, on the dissolution of which it fell under the power of the Medes, A.C. 706. Darius, the founder of the Median monarchy was followed at some distance by Cyaxares, whose successor was Astyages. With his death, A.C. 560, the Median dynasty terminated, and the true founder of the Persian monarchy one of the most distinguished characters of ancient times, appears upon the stage. Cyrus the Great having established his ascendancy over the Medes, carried his victorious arms into the west, overthrew Croesus, king of Lydia, and settling a series of remarkable European colonies, by the conquest of Babylon and its dependencies, extended his empire to the shores of the Mediterranean. An expedition against the Scythians proved fatal to him, A.C. 529, and he was succeeded by his son Cambyses, the most important event of whose reign was his conquest of Egypt. On his death, an impostor pretending to be his brother Smerdis, mounted the throne, but shortly after, on the discovery of the fraud, was slain by the soldiers, who then gave the crown to one of their own number called Darius Hystaspes, who pushed his conquests into the East as far as the Indus. In the West, the lands of Asia proved too narrow for his ambition, and he passed over into Europe. Here, after making various conquests, he encountered the Greeks, by whom he was defeated on the field of Marathon. His successor Xerxes, having marched toward Greece at the head of the most gigantic armament which the world has yet beheld, first at Salamis, and then at Plataea met with even greater disaster than those which had befallen his predecessors, and with difficulty saved his life by almost solitary flight across the Hellespont. Greece now assumed the offensive, and after many years of struggle, almost always disastrous to Persia,

a new conqueror appeared in Alexander the Great, and completed her downfall. The Macedonian empire was soon broken up by the death of its founder, and Persia, becoming only one of its fragments, was long passed from hand to hand among contending competitors. About A.C. 174, it fell into the hands of the Parthians, and was ruled by Mithridates I., under whom the Parthian power extended from the Indus to the Euphrates. Rome was now in her full career of conquest, and Parthia was well fitted both to tempt her ambition, and try her prowess. The first direct intercourse between these two powers A.C. 93, when Mithridates II. sent an embassy to Syria. In less than 40 years after war between them had commenced, and though by no means always to the advantage of the mistress of the world, the greater part of Persia was ultimately held as a fief of the Roman empire. Struggles for independence, however continued to be almost incessantly made, in the times both of the Greek and Roman emperors, and Persia produced several native princes whose fame as warriors or conquerors of their country is still held in lively remembrance. They belong to what is called the Sassanian dynasty which commenced as early as A.D. 226, and continued though under circumstances of greater or less depression, till 551 when it succeeded in surmounting all obstacles and attained its highest prosperity under the celebrated Khosru Nushervan, who swayed the sceptre over realms scarcely less extensive than those which Persia possessed in the time of Xerxes. At a later period (A.D. 590-628), another Khosru, distinguished by the name of Khosru-Parviz, after commencing his reign by a series of brilliant and extensive conquests sustained a number of most disastrous reverses and at last perished by the hand of his own son. The partrials were not long permitted to benefit by his crime; death overtook him six months after, and during the confusion which ensued a new party, destined to change the face of Persia, and greater part of the East, appeared. The Arabs had now commenced their career of Mahometan conquest, and by the decisive battles of Cadesia A.D. 638, and Nahāvand, A.D. 641, extinguished the Sassanian dynasty, and substituted that of the Caliphs, during whose supremacy for the two subsequent centuries, the history of Persia being blended with that of Arabia and the other realms subject to these potentates, ceases to be national. The long period, however, did not pass away without vast changes among which the most astonishing is the extirpation of the ancient religion and the general adoption of Mahometanism. About the middle of the 9th century, the spirit of independence revived and a new dynasty arose in the person of Kader Ibn Laili, who threw off allegiance to the Caliph and regained sovereignty at Shiraz over territories nearly identical with modern Persia. It is impossible here to follow in detail the numerous changes which have subsequently taken place. In the beginning of the 11th century, the Seljuikian Turks made their descent from central Asia and succeeded in placing their Sultan, Toghril Beg, on the Persian throne. His successor retained possession till the last of the line was slain in 1194 by the Shah of Khawasm, who had secretly established a Khawasmian dynasty, which the famous Genghis Khan made his appearance at the head of 700,000 Mongols, and crushing all opposition ruled Persia with a rod of iron. The Mongol ascendancy was maintained after his death in 1258 first by his immediate descendants, and afterwards by the hereditary nobles, who throwing off allegiance to a common head, divided the country into a number of separate and hostile independent states. This state of matters was suddenly terminated in 1501 by the invasion of Tamerlane and his Tartars, who spread devastation wherever they appeared. All Persia was completely at his feet, when he was carried off by death in 1504. The anarchy of petty independent states returned but was finally suppressed in 1502 by Ismail Shah who, partly by valor and partly by the reputed sanctity of his race as descended from Mahomet, worked his way to the Persian throne, and founded the Safi or Scoofee dynasty, which reached its greatest prosperity during the reign of Abbas the Great (A.D. 1588-1657). This prosperity faded away during the feeble reigns which succeeded, and in 1722 a successful revolt of the Afghans, followed by a series of victories, enabled them to place the Persian crown on the head of their chief Nader-Mahomed. The Afghan ascendancy soon yielded to the prowess of the celebrated Ghalib, Nadir-

Kooli, who, after fighting profusely in defence of the Southern dynasty declared it at an end, and formally assuming the sovereignty which he had long virtually possessed began to reign in 1786, under the title of Nadir-Shah. His extraordinary talents raised Persia to a remarkable degree of power and influence. One of his most memorable exploits was the invasion of India in 1789, when he took Delhi, and obtained booty which has been valued at above 450,000,000. His greater abilities were counterbalanced by cruelty and avarice, and he was assassinated in 1747. A period of confusion succeeded, and was not terminated till 1795, when *Age-Mahomed-Khan-Kajar* of Turcoman origin, ascended the throne, and became the founder of the Kajar dynasty. The very common fate of Persian sovereigns awaited him, and in 1797 before he had reigned two years, he was murdered by his attendants. His nephew Babak Khan, succeeded him under the name of Fath-Ali Shah. The most remarkable events of his reign were two disastrous wars with Russia, the one ending in 1813, with the loss of extensive territories along the Caspian, and the other in 1828 with the loss of Erivan and all the country N. of the Araxes. In 1833, he was succeeded by his grandson Mahmud Mirza.

PERSIAN GULF [*Lahm Persicus Sinus Mare Babylo-nense*], an arm of the Indian Ocean, between lat. 25 and 30° N. and lon. 47 and 56° E., and separating Persia from Arabia greatest length 560 m. medium breadth about 120 m., and communicating with the Indian Ocean by the straits of Ormuz, 35 m. wide. The only river of importance which it receives the Euphrates but numerous small streams descend from the mountains on the Persian side, where the coast is bolder than on the Arabian side. It makes numerous small indentations on both coasts but has no important harbours except Meshine on the Persian coast and Bussorah, which lies at some distance above the mouth of the Euphrates. It contains many islands of which the largest are those of Kishun and Ormuz, near the strait of that name, and the Bahrain Isles, on the coast of Arabia. In the same locality, and also in various other places coral reefs are very common.

PERTALUGHGURH two places Hindostan:—1 A fortified town Malwa lat. 24 2 N lon 74 51 E. The surrounding country is very rugged, and much covered with jungle.—2 A tn. Odia r bank Gya, 90 m E Lucknow surrounded by a decayed wall and possessing a famous citadel. Pop. (agricultural), 10,000

PERTENHALL Eng. Bedford 1805 ac P 405
PERTH, a tn. Van Diemen's Land co. Cornwall 12 m from Launceston on the South Rail.

PERTH, the cap. of W. Australia, and of co. Perth r bank Swan River, 10 m above its mouth in the Indian Ocean lat 31° 57' 24 S. lon. 115° 58' 45' E. (A.) It is merely a large, straggling but finely-situated village.—The country, 40 m. long, by 38 m. broad, is intersected by the Darling range, from which several offshoots run N E and S W. In its N E W part are numerous lakes around which is good pasture. The principal rivers are the Swan and the Helms.

PERTH, a tn. Upper Canada, cap. dist. Bathurst, on a height above a stream of same name, which by means of two locks has been made navigable to the Rideau Canal 43 m N N E Kingston. It is regularly laid, and has an Episcopal, a Free, a Methodist, Baptist, E. Catholic, and two Scotch Presbyterian churches a handsome court-house, and jail. Several of the houses built of stone or brick, are ornamented with white marble, which abounds in the neighbourhood. Pop. (1852) 1916.

PERTH, or **PERTHMANNA**, a large central co. Scotland bounded, N. by co. Aberdeen and Inverness, E. by Forth, W. co. Argyll, Stirling, and Dumfriesshire, and S. co. Stirling, Clackmannan and Kinross with a small detached portion on the N shore of the Firth of Forth, between the co. of Clackmannan and Fife, 5 m. long, by about 3 m. broad. Extreme length E. to W. 63 m., breadth, N. to S., 60 m. Estimated area, 1,689,320 ac. of which 31,000 ac. are water. Its surface is beautifully diversified with mountain and valley, wood, rock, lake and river alternating with wide and fertile plains, in a high state of cultivation. In short, all the more striking characteristics of the finest and most picturesque scenery of Scotland are concentrated in this single county, embellished with the most favourable specimens of its pastoral districts. The part of the Grampian chain in Perthshire com-

prises some of the highest summits in the kingdom three of which approach 4000 ft. above sea-level, while several others are between 3000 ft. and 3000 ft. the highest in the county is Benlawers, estimated at 8945 ft. The beautiful and extensive valleys or Straths of Perthshire, are no less remarkable than its mountains. The principal of these are Strathallan, Strathmore, Strath Tay Strath Atholl, and Strathmore, the last extending into Forfarshire. Next come its fertile and picturesque Glens, Glen Affric, Glenorchy (Glenorchy), Glendun, and numerous others. The N W and N parts of the county belong to the great primitive district of the N. of Scotland many of the mountains, including some of those in the Grampian range are composed of mica-schale, interstratified with hornblende-schale and quartz rock, and in some parts with a small portion of crystalline limestone. The Ochil Hills, in the S E part of the county, consist chiefly of porphyry and gneiss. The principal rivers are the Tay, the basin of which comprises nearly the whole county, the Forth, Earn, Tullis, Lyon, Garry, Traqual, &c. The chief lakes are Loch Tay a magnificent expanse of water 15 m. long Loch Leven, Loch Rannoch, Loch Katrine, and several other smaller but not less beautiful lakes. The cultivated land in the county is estimated at about 660,000 ac. or about one-third of the whole surface. The most valuable tract of low land is what is called the Cairn of Gowrie, being the district bounded by the Tay on the S. and W. the Sidlaw Hills on the N. Its soil is mostly a deep rich clay and in point of fertility it is not, perhaps, surpassed if equalled, by any land in the kingdom. The lower part of Strathmore consists of a similar soil and is hardly less fertile. In the Cairn of Gowrie, and other more fertile tracts, wheat and beans are the principal objects of cultivation. In the midland districts, barley and m. the higher ones, are the principal crops. Potatoes and turneps are also extensively cultivated. Considerable quantities of fruit are produced in the vales, particularly in Gowrie. The linen and cotton manufacture are carried on to a certain extent in the county still on the whole, Perthshire may be regarded as an essentially agricultural district. The sheriffs on the Tay are about the most valuable in Scotland. Perth returns two members to Parliament, one for the county, and one for the city. Principal towns—Perth, Orfitt, and Dunblane. Pop. 138,680

PERTH, a city and royal bor. Scotland cap. above co., beautifully situated r bank Tay, here crossed by a simple but elegant bridge of nine arches, 850 ft. long by 22 ft. wide, and at the common junction of the Dundee, Forth and Aberdeen Junction, the Scottish Midland Junction the Scottish Central and the Perth line of the Edinburgh, Perth, and Dundee railways, 33 to N by W Edinburgh. From whatever quarter it is approached, it presents a very striking and attractive appearance, owing partly to its noble river partly to the verdant slopes and well-wooded hills by which it is surrounded and partly to its spacious and beautiful meadows, situated on its N. and S. sides, and called, respectively, the North and South Loch, the former skirting the margin of the river and partly converted into a level race-course, and the latter intersected by the main entrance by the Edinburgh road, surrounded with rows of stately trees, and with stately villas. The town, once surrounded by walls, flanked with towers, of all of which no vestiges now remain, is laid out with considerable regularity, and contains several spacious streets, crossing each other at right angles, and some handsome terraces and crescents. The principal thoroughfare called, accordingly Prince Street, John Street, and George Street, commencing at the bridge, stretches from S. to N. across the town, nearly parallel to the river and is lined with substantial and handsome houses, built of freestone. It is intersected by High Street and South Street, which are equally well built and many of the more modern residences in other quarters are in a style of elegance not often seen in provincial towns. All the streets are well lighted with gas and an abundant supply of water filtered from the river, and raised by steam into a lofty circular tower, is distributed by pipes both to public fountains and private dwellings. The public buildings include St. John's, a very ancient structure, in the pointed style, with a massive square tower, surmounting it a spire, originally forming only one church, but now converted into three parish churches, St. Paul's, also a parish church, of modern erection, with a lofty steeple, three Scotch

lished chapel, an Episcopal church, in the cathedral style, now in course of completion, one Original Secesser, one Baptist, four Free, three U. Presbyterian, and two Independent churches the County Buildings, an elegant Grecian structure, facing the Tay, with a portico of 12 fluted columns; immediately behind it, the City and County Prison, the Penitentiary or General Prison, forming one of the largest edifices of the kind in Scotland, originally fitted up as a depot for French prisoners, greatly enlarged since; the City and County Infirmary, the Royal Lentic Asylum, finally situated on N. side of Kinnaird Hill in a park of 12 ac.; the Academy occupying a handsome building in the centre of Ross Terrace, and furnishing a superior course of education; the Grammar and various other schools; the Antiquarian Society occupying a handsome building called Marshall's Monument, which contains a public library in addition to the museum of the Society; a neat theatre, and cavalry and cavalry barracks. The principal manufactures consist of cotton coloured goods, intended specially for umbrella covers checked and striped gingham, wigwags, and pale plaids imitation Indian shawls, many of them for the Turkey market handkerchiefs scarfs and trimmings, ink, carriages, castings, and various articles in iron. There are also several breweries and distilleries, bleach and print fields, dye-works, tanneries, rope-walks, a large flax and several flour mills, and building-yards, at which both steamers and sailing vessels are constructed. The trade, favoured both by the numerous railways which centre here, and the river which in consequence of important improvements now admits vessels of 300 tons to the town, is large and increasing. The imports from foreign ports, and more especially from the Baltic, are timber, cheese, clover, and linseed, flax, spirits, indigo, bark, small, madder, tea, bones, &c. and, coastwise, coal, lime, salt, manure, &c. The foreign exports are chiefly, but, coastwise include large quantities of potatoes, chiefly to London, corn, timber, and dates. In 1850 the registered tonnage of the port amounted to 58 vessels carrying 4930 tons; the vessels entered were, coastwise, 148 (10,445 tons), colonial 1 (311 tons), and foreign 55 (3989 tons); and cleared were, coastwise, 155 (10,218 tons) and foreign, 8 (593 tons).

Perth is generally supposed to be of Roman origin, and to have had Agricola for its founder. Its earliest known charter is dated 1108 but it was first erected into a royal burgh in 1210, by William the Lion. Till the death of James I. in 1437, it was the capital of Scotland for which its central locality made it admirably adapted, and both then, and subsequently it became the scene of some of the most remarkable events in Scottish history. Among others may be mentioned its capture, and the carrying off of its records by Edward I. of England in 1296, the murder of James I. in 1437, the various meetings and events connected with the progress of the Reformation, the repeated visitations of the plague, the Gowrie conspiracy or Raid of Ruthven in 1600, the capture of the town by Montrose in 1644, after his victory of Tippermuir; its capitulation to Cromwell in 1651, and its occupation, first by Viscount Dundee in 1690, and afterwards by the Highlanders in 1715 and 1746. Perth, as a royal burgh is governed by a corporation of 4, a dean of guild, a bailie, a treasurer, and 19 councillors, and sends a member to the House of Commons. Many distinguished individuals have been born or less intimately connected with Perth; but among its natives, it seems unable to number any higher name than that of Patrick Adamson archbishop of St. Andrews, who possessed some merit as a poet but it better known for his truckling and tergiversation. He both invented the name of teleian bishop and afterwards exemplified it in his own person. Pop. 24,035.

PERTH AMBOY a tn and port of entry U. States, New Jersey, at the head of Raritan Bay 42 m. N. E. Trenton. It has three churches, two schools, and a pottery and is much resorted to in summer by the inhabitants of New York. The harbour is easy of access, safe, and commodious. Pop. 1803.

PERTUIS [anc. *Perthusium*] a tn France, dep. Vaucluse, 18½ m. S. S. E. Apt on the Loze. It is surrounded by ramparts, and has a handsome church, communal college, and some distilleries. Pop. 5793.

PRESTWOOD (France), par. Eng. Wilt. 480 a. P. 29. Several places, U. States of America.—1, A vil and township, New York, 153 m. N. Albany, with two

churches, 13 schools, a woolen factory, two tanneries, and several saw and grist mills. Pop. 513.—2, A vil. and post township, Ohio, 98 m. N. Columbus, with a church 14 schools, a distillery, two flour and two saw mills. Pop. 2000.

PERU [French, *Pérou*, in ana. chronicles, *Pirú*] a republic, S. America, formed out of the former Spanish viceroyalty of same name, bounded N by Ecuador, B. and E. Bolivia, W. the Pacific Ocean, and E. Brazil, lat. 2° 50' to 12° 25' S. lon. 68° to 81° 20' W. area, about 487,120 sq. m., though the exact of a settled boundary on the N. precludes the possibility of stating its area with precision, length, N to S., about 1200 m., width E. to W. varies much where greatest it is about 700 m. The coast-line extends through 1500 m.

According to the *Correio Penseiro*, of July 80 1845 Peru is divided into the thirteen departments of Amazonas, Arequipa, Arequipa, Ayacucho, Callao, Cuzco, Huancavelica, Junco, Libertad Lima, Moquegua, Puno, and Tarma and subdivided into sixty-three provinces with a total population of 1,736,850. The chief inland towns are Lima, the capital, Arequipa, Cuzco, Huancavelica and Puno and the principal seaports are Huancavelica, Callao, Arica, Lambayeque, Pisco, Payta, Iquique, and Talca.

Gen. rel. View—This country exhibits great varieties of physical character, and all on a great scale. But from every point of view its grandest feature is the Cordillera of the Andes, which seen from the coast, has the appearance of a vast wall, apparently impassable. The region between the Andes and the Pacific Ocean, has a width of under 100 m., but of its whole surface, only a very small portion is habitable. It is generally rugged, and covered with mountains or hills, from 10,000 ft. to 6000 ft. in height projecting in rapid descent from the Cordillera to the sea, and generally consisting of bare rock, wholly devoid of life or vegetation. It is only where streams force their way across this tract, from the Andes towards the sea, that verdure makes its appearance, and the cultivation of the ground becomes practicable. Hence this region, in which only the transverse valleys, under favourable circumstances, are fit for the abode of man, is generally distinguished as *Los Valles*. But the streams from the mountains, though full and rapid above, generally sink in the dry, sandy ground lower down, and seldom reach the sea. While most of them are but occasional torrents, flowing during the rainy season (of the highlands) and dry nine months of the year. On the most favoured portion of the coast, these valleys are, on an average, 12 m. wider, but they are more frequently separated by intervals of 15 or 20 m. Towards the N. they are more widely separated, so that between Lambayeque and Sechura, there intervenes a dry desert of 90 m. Above the maritime Cordillera, between the ridges of the Andes, nature assumes quite another aspect, and there, *Las Sierras*, as the elevated region is generally called, is now the chief, as it was anciently almost the exclusive seat, of the population of Peru. Beyond or E. of the mountains, the country sinks into boundless plains, watered by numerous and great rivers, which attempts are now being made to open to foreign commerce, by a company formed in the U. States, and covered to a great extent with impenetrable forest.

The name given to this country is *Montaña*, or the wooded region. It is but imperfectly known and many ages will probably elapse before it becomes occupied by men of European race.

Mountains and Highlands—The Andes of Peru (see *Andes*) include the nearly extinct smoking volcano of Arequipa and numerous other lofty peaks, forming two ranges, between which is the table land, or *sierra*, naturally diversified into regions differing widely in character. The chief are the heights of Pisco, of Cuzco, the valleys of the Rio Junco, and of the Marañon. The first of these lies at one of those points where the branches of the Andes unite, the ridge sinking into an elevated plain which has here a general height of 14,000 ft. This region is traversed by chains of hills from 500 to 1000 ft. high, and has everywhere a rugged and forbidding aspect. Though the climate is the most disagreeable and comfortable possible, and the Puna, or difficulty of respiration, is severely felt, yet the value of the precious metals, with which this region abounds, have attracted to it a comparatively dense population, and it has been more frequently visited, and more fully described by strangers, than

the smiling and luxuriant regions lower down. The table-land of Cusco, extending from the S. frontier of Peru, to lat. $13^{\circ} 30' S.$ has a length of about 180 m., and a width of 100 m. At the city of Cusco, lat. $13^{\circ} 30' S.$ it has an absolute elevation of 11,800 ft., but sinks rapidly towards the N., so that at the border of the Rio Marañon it is not probably more than 9000 ft. above the sea. On the heights of Pasco there is no cultivation whatever. But here, between the S. and most elevated part of Cusco, where the quinoa (*Chenopodium quinoa*) is cultivated, to the plantations of sugar-cane at Inca we find most of the grains and fruits of Europe in the greatest perfection. The valley of the Juncos adjoins the table-land of Pasco, descending rapidly S. about 100 m., and resembles in general character the lower portion of Cusco. It is perhaps the most populous portion of Peru, and at the same time the least known. The valley of the Marañon from lat. 10° to $5^{\circ} S.$, is for the first 100 m. little more than a narrow defile descending rapidly, it then becomes, for 300 m. a wide and fertile valley, having a mean absolute height of about 3000 ft. The Pongo of Rontema, at its northern termination, is but 1250 ft. above the sea. A great portion of this valley has all the characters of the tropical regions.

Lakes and Rivers.—On the table-land of Pasco, lie at no great distance summer, the Lake of Lauricocha, whence issues the Mantaro or Tumpucana (the latter name is but little used) the Lake of Chichicocha, 13,500 ft. above the sea, from which the Huallaga flows S. E. and the Lake of Quinacocha, which gives birth to the St. Juan, lower down called the Mantaro and one of the chief tributaries of the Apurimac. These rivers all unite some hundreds of miles lower down, greatly increased in magnitude and together with the Ucayali, which rises further S. and takes a wider sweep to the E. form the grand but simple system of the waters of Peru. The Mantaro river, as has been stated, on the table-land of Pasco, and runs for 400 m. between the Cordilleras of the Andes during the first 150 m. of its course in a narrow rocky valley it descends about 10 000 ft., thence to the Pongo of Rontema, 1235 ft. in height it flows about 250 m., with a fall of 1800 ft. Within this distance it is navigated in canoes and balsas. Below the rapids at Tormepeda, close to the Pongo of Rontema, the river flows N. E. and then S. E. for 150 m., till it descends the rapids 7 m. in length at the Pongo of Maricobla. At the foot of these rapids is the town of Boya, in Maynas, a province of Guano where it may be navigated downwards in small vessels. The Huallaga, on leaving the highlands, takes a tortuous course of 500 m., collecting numberless small streams, till it joins the Marañon, in lat. $5^{\circ} S.$ and lon $76^{\circ} W.$ It flows for the most part, between hills covered with dense forests, but for the last 100 m. it winds through level, marshy plains. The Ucayali is, after the Marañon the greatest of the Peruvian rivers. At their junction it is indeed apparently the greater of the two, the streams which form it are chiefly between lat. 11° and $16^{\circ} S.$ The Uruambá and Tambo the latter uniting the Apurimac and Mantaro or Rio Juncos, join to form the Ucayali, which, just below the junction, descends a violent rapid called Yacolla del Diabla. It is supposed to be navigable for 500 m., but its course through the plains is little known. Among its chief tributaries from the mountains, is the Pachico which is reported to be navigable a long way up, so that were it not for the fierceness of the wild tribes inhabiting its banks, and the difficulty of navigating them from their impenetrable forests, it might afford a convenient access to the central portion of Peru. Lake Titicaca, except that of Maracaybo, the largest lake in S. America, is partly in Peru and partly in Bolivia.

Climate.—The very peculiar climate of the maritime region of Peru, excited the wonder of the European discoverers of that country and remains to this day but imperfectly explained yet may be accounted for by the position of the mountains and prevailing winds. On a portion of that coast an iron has fallen within the memory of man; and on most of it a shower of rain is a remarkable phenomenon, generally supposed to be connected with an earthquake. For six months, from November to April, the sky is cloudy, and the burning rays of an almost vertical sun would convert the country into bare rock or dust, if it were not that this is the rainy season in the higher regions, whence copious streams

pour down to fertilize and beautify the valleys. These torrents soon dry up on the cessation of the rains in the mountains; but then the sky along the coast becomes overcast, the heat of the sun is intercepted by a thick mist, called garúa, which falls like a heavy dew, and freshens the vegetation, while it mitigates the heat. The cool oceanic currents, and the streams of air descending from the snowy heights of the Andes, come, with their united influence, only mitigate agreeably the heat of the coast, which, on the sea-side, is often excessive. In Lima, 600 ft. above the sea, the thermometer varies from 60° in winter to 85° in summer. In the region refreshed by the garúa or small rain, extending to the height of from 1800 to 3000 ft. above the level of the sea, various tropical plants, including the banana, sugar-cane, cotton, and sweet potato, grow with considerable luxuriance. To this zone succeeds the perfectly rainless region, reaching to the elevation of about 7000 ft., where it is bounded by the rain-line. This region, which is absolutely rainless, consists of piles of barren granite rocks, broken, however by narrow valleys, formed by the mountain streams, in which the orange, plantain, and other tropical fruits ripen. These valleys or ravines give access to the region of the *Sierre*, which lies above the rain-line and constitutes the temperate zone of Peru. Vegetation produced by the influence of natural rain now first begins to clothe the W. side of the Andes. Pastures likewise appear at first scanty, but gradually increasing in luxuriance, in conjunction with the growth of wheat barley maize, potatoes, fruits, &c. which are all cultivated on the temperate plains and slopes of the Sierra up to the height of 10 000 ft. From the upper limit of this zone to the height of 14,500 ft. extends the domain of grasses, with a character wholly alpine, past-mosses often covering a great extent. This country in general is available only for sheep pasture. Still higher up, alpine plants and lichens continue to flourish, to an elevation in some cases up to nearly 17 000 ft. If we proceed to the E. slope of the Andes, we find there an important general change in the elements of climate. On the W. side, the prevailing wind during nine months of the year is from the S.W. The S. wind predominates during the other three months. These winds are both cool and dry. But E. of the Andes, the regular equatorial winds from the E. come loaded with humidity and checked by the mountains pour down copious and in some places perpetual rains. The W. side of the Andes is almost destitute of trees, with the exception of a few belts of wood in the ravines or along the rivers that traverse the valleys at the foot of the mountains. On the E. side the tall forests cover the low plains and ascend with hardly diminished magnificence to a height of 5500 ft. where the tropical character of the woods ceases. The temperature on the E. side of the Andes is higher than that on the W., making a difference in the limits of the vegetable zones of about $2000^{\circ} F.$ (8° or $7^{\circ} F.$) and at the height of 3000 or 4000 ft. *la oja de la montaña*, the brow of the forest, as it is termed by the Peruvians presents one of the most charming spots on the earth enjoying a delicious and equable temperature, matchless fertility with forest and mountain scenes of incomparable grandeur.

Earthquakes.—The coast of Peru enjoys a perpetual aerial calm, its atmosphere is never darkened or disturbed by heavy rains, by thunder-storms, or hurricanes. But, on the other hand, it is peculiarly subject to subterranean convulsions. Earthquakes have frequently laid Lima in ruins, and experience shows that 45 smart shocks may be expected there in a year. Devastating earthquakes have likewise occurred twice in a century. The last took place in 1806; that of 1746 was the most destructive. On that occasion, the sea retired to a great distance, then suddenly rushing back, overwhelmed the town of Callao, the port of Lima, the site of which appears to have sunk with the shock. Of its inhabitants, about 3000 only 16 survived the catastrophe.

Geology.—Accurate geological observations have as yet embraced but a small portion of the wide surface of Peru. Red sandstone frequent on the coast, is also the prevailing rock in the plains of the interior, where it is associated by the deposits of rock-salt, the latter occurring in the valley of the Huallaga alone, an area of 1000 sq. m. It occurs also on the coast, and is not wanting even on the heights of the Andes. Granite and porphyry, appearing on the coast, ex-

and also to the highlands, but the prevalent rocks on the sierras are—trachyte, andesite, porphyry and diorite. The sides of the valleys between Titicaca and Cuzco, are formed chiefly of clay-slates. Round Arequipa, and thence to Titicaca, the soil is all volcanic, yet there is no active crater in the neighbourhood, though the cone of Arequipa still smokes smokes. In the S. of Peru, chiefly in the maritime provinces of Tumbes, and in the neighbourhood of Iquique, an extensive deposit of salt, nitre, and salts of soda exists, the sandy region over which it extends nearly 3° (lat. 19° to 22° S.), in length, N to S. is a barren desert. In many parts, the houses and molasses for cattle are built of blocks of salt. Of the nitrate of soda, the supply of which may be said to be inexhaustible, 289,580 tons have been exported from Iquique, from 1880 to 1886. The observations of Mr Darwin have led him to the conclusion, that the coast of Peru has risen 65 ft. since it was first inhabited. Since the great earthquake of 1746, the coast near Lima, which was raised on that occasion, has been constantly sinking. The water-courses further N., near the base of the Andes, furnish abundant proof of natural convulsions, many of them exhibiting the wear of centuries, now laid dry.

Mines.—It is said that gold may be found in all the passes, and nearly all the rivers from the Andes wash down auriferous sands. The richest gold-mines or diggings are about Huaylas and Tarma. It is difficult to estimate the amount of gold actually obtained, the business of washing the sands being carried on almost wholly by Indians, without capital or machinery, and with much secrecy. Little of the gold is coined, and probably the larger portion of it is smuggled to the coast. It is known however that, in four years, 1835-8 duty was paid on 2698 marks (about 280 000) which is supposed to be a fourth of the actual produce. Silver also which is the chief metallic production of Peru, is very widely distributed, and small mines of it are worked secretly in all parts of the country. But the chief mines of silver which having attracted the attention of capitalists, and become centres of Indian population, are fully known, are those of Huancayo, near Miraflores. Huancayo, in Huamanga, Pisco, Lachana, and Huancabamba. The treasures contained in the Cerro de San Fernando at Hualgayoc, were first discovered in 1771. There are now 1400 bocaninos or pits opened in the hill, through which veins of silver run in all directions. Cerro de Pisco is hardly inferior in mineral wealth to Potosi. The town stands at the height of 15 678 ft. above the sea, and the hill on which it stands is all hollowed out, so that were not earthquakes here very rare, the whole would be soon reduced to a heap of ruins. Most of the bocaninos or mouths of the mines are within the houses of the miners in the town itself, some of them serve as dwellings. They are generally shallow, and not above 500 out of some thousand openings deserve the name of shafts. In the Cerro de Pisco are two very remarkable veins of silver, the one going from N to S has an ascertained length of 8600 ft., with a breadth of 415 ft.; the other stretching W N W to E. S. E., is 6400 ft. long, and 850 ft. wide and is supposed to intersect the preceding vein exactly under the market-place in the town. The silver produced from 1830 to 1856, has been calculated to amount to 1283 millions of Spanish dollars (\$297 000 000). In eight years, 1836-43, the silver coined in Lima alone amounted to 24,000,000. The great height at which the mines are in many instances situated; the impossibility of conveying machinery to them on the backs of mules, the want of timber, the high price of all the necessaries of life, present great difficulties in the way of carrying on of mining operations with spirit and profit, even were the needed capital brought to bear; consequently the mining of Peru is still in a very low state. Quicksilver is abundant, and chiefly found at Huancabamba in the interior, copper, lead and iron are also found in various places, but in a country where the cost of carriage is so excessive none but the most precious products can yield a profit. In 1835, English miners discovered good coal at Cerro de Pisco, at an elevation of 14,700 ft. Brown coal is also found on the sandy deserts of the coast, N. of Arica; and in the province of Tumbes has a buried forest underneath the sand, the wood of which is neither charred nor petrified. It affords excellent fuel, and is much used in the preparation of saltpetre, the chief production of that coast.

Vegetation.—In botanical species, Peru is incomparably rich, owing to the various natural regions comprehended in it, each of which has its own flora. W Peru is poor in plants, especially in trees; R. of the Andes, the species are exceedingly numerous, and most of them affect the subarborescent form. The character of a tropical vegetation becomes more perfectly developed as we descend the mountains; and in the plains, the forests closely resemble those of equatorial Brazil. On the higher parts of the E. Andes are to be found the representatives of families (in the Geniales), which are elsewhere rare in S. America. On the W coast, palms are hardly ever found wild, the cultivated species are the Jubas from Chili, the date-palm and the coco-nut. On the E. side, each of these kinds has many and varying representatives; the tree ferns also are peculiar to the lower slopes and plains E. of the Andes. Among the characteristics of the forests on this side, may be mentioned the prevalence of the Cunehos, which occur nowhere else in such numbers and variety. From these forests Peru derives, in general little advantage. The cinchona yielding the Peruvian or Jesuit's bark (called in Peru, Casacalla, the yellow bark of commerce, from which the well known febrifuge quinine is extracted) is almost the only article drawn from them for exportation. Another production, which thrives in the same zone as the cinchona, but extends much lower down and succeeds best in the plain and swamps in the hottest places, is the coca (*Erythroxylon coca*), the leaves of which are chewed, as a stimulant by the Indians and which being consumed in immense quantities is a very important article of the inland trade. Tobacco, formerly monopolized by the crown, is now generally cultivated, and being excellent, finds a ready sale in Chili. The sea-board also produces excellent sugar, which not only supplies home wants, but is largely exported. Cotton also is produced in considerable quantity, and is nearly all exported. Fruits are abundant—the banana, orange, pineapple, papaya, chinampa, guava, &c. as well as culinary vegetables and grama, from the yam and yuca, to barley and the rice, which latter grew at an elevation of even 15 000 ft. The vine is cultivated on the W coast, merely for the production of brandy. Agriculture in Peru is in the lowest condition; the excessive dryness of the W coast, the natural barrenness and devotion to mining which characterizes the across the remoteness of the Montañas, or E. side of the Andes, with the deficient means of internal communication, all tend to discourage its progress.

Zoology.—Extensive tracts may be found on the W side of Peru in which life seems to be wholly extinct, and not even insects are found in the sand. Yet that region has and may be said to have a few very destructive to flocks of sheep, a mephitic animal or polecat or other, some opossums, and gigantic scorpions. The birds of W Peru are few, with exception of the sea-fowl which inhabit the shores in countless multitudes. A few deer and wild swine, which attain a great size in the valley of Lima, are the chief mammals. Iguanas and hounds are the chief reptiles; the serpents are small and rare, and excepting one species, harmless. The plants in found only on the highlands, where the poor Indians, unable to purchase or support mules, still carry it as a beast of burden. The knurled species—the gummo, the alpacas, and the vicuña—remain wild in the mountains. Above their haunts are to be found only marmosets in the hollows, and the condor nestling in the highest rocks. Of the animals inhabiting the forest region, the only one that braves the cold of the sierras is the puma or lion, as it is often called which sometimes attacks the sheep on the highlands, and occasion ally extends his excursions even to the coast. The E. side of the Andes is so remarkable for its abundance of the W for its want of animal life. Parrots on the W are few on the E. they are disagreeably numerous. About twenty species of them are found in this region and here also, in the forests, the monkeys are innumerable, only one species, the black coatid ascends as high as the Cajas (about 4000 ft.). At this elevation is found also the S. American bear; the larger animals, the tapir, sloth, wet-eater, woodrat, &c., belong to the low forest. Here also become great numerous, and on the banks of rivers, are unnumberable. Alligators swarm in the rivers; and, in the inundated plains, the boa constrictor attains a terrific size. Pastoral husbandry has made as little progress in Peru as agriculture; and, indeed, it is equally

repelled by the natural circumstances of the country. In the maritime region the scarcity and dearth of water as well as of fodder, make it impossible to keep cattle. All the lucerne which can be grown by irrigation barely suffices for the mules, which are indispensable. On the E. side, where nature is more bounteous, the mules, and still more the vampire bat are fast to cattle. A considerable number of cattle, however, are reared in some parts of the sierras which abound in rich pasturage. In Huananga and Cuzco likewise are to be found good herds of cattle, and some attempt at dairy farming. The feeding of sheep on the uplands is for the most part abandoned to Indians.

Trade and Commerce.—Peru exports chiefly precious metals, nitrate of soda, alpaca and sheep's wool, quinquina bark, sugar, cotton, Chinchilla skins, hides, straw hats and gum; and imports all kinds of manufactured goods, wines, tobacco, and spirits. With the interior and the neighbouring states, a trade is carried on in bulky grain, corn, tobacco, &c., besides the chief articles already named. Two-thirds of the foreign trade are carried on with Great Britain from which cotton goods were imported, in 1849-51 as follows:—

| | Cottons (spins). | Cottons (yards). |
|------|------------------|------------------|
| Yrs. | Tons. | Tons. |
| 1850 | 4,128,791 | 18,771,814 |
| 1851 | 6,214,060 | 11,248,517 |
| 1861 | 10,786,535 | 17,689,869 |

The exports of guano, the supplies of which are, practically speaking, inexhaustible, might be greatly increased were a more liberal policy adopted. The quantity exported to Great Britain was as follows, in 1847-50:—

| | | | | | |
|------|-------|--------|------|-------|--------|
| 1847 | tons. | 5 7/8 | 1848 | tons. | 567 |
| 1849 | | 61,085 | 1850 | | 56,983 |

The total quantity exported in 1865 amounted to 428 1/2 tons, and was of the value of \$2,126,864. The total value of the exports in 1865 was \$2,245,461.

People, Habits, Education, Religion.—Fully a half of the population are probably Indians, a fourth white men or creoles, and the rest coloured people of mixed blood, the negroes being nearly all on the coast, are now reduced to a few thousands. The Peruvian Indians—that is to say those

INDIANS OF HUANCAYELLO, AND OF THE COAST AND MENTACA
From De Poth. Pictura. Voyage autour du Monde.

descended from the subjects of the Incas—are to be found chiefly in the highlands. They seldom descend to the E. side of the Andes. In physical characters they scarcely differ from the Indians of the E. forests, to whom they are superior in civilisation. In Peru they have preserved, in some degree, their nationality: most of the small towns on the highlands are inhabited wholly by them. Their language is the Quechua, though, towards the S., the Aymara becomes prevalent. Large districts occur in which few

understand Spanish; the Quechua being adopted even by the creoles. Agriculture is the favourite occupation of the Indians; but, in towns, they carry on also some trades in a lazy manner merely to provide for their wants, and never with a view to making fortunes. Their work is slow, and they have little inclination to increase their property by habits of civilised life. They are content with poverty and wretchedness, and cling pertinaciously to the customs of their ancestors. Only a few of their noble families still possess estates. In the missions of the E. plains, Quechua is the adopted language; the Jesuits having soon perceived the necessity of discouraging a multiplicity of tongues. The Peruvian army, in the wars of the revolution, was composed almost entirely of Indians, who fought well, and underwent fatigues which no European would have encountered. By the laws of the republic, the Indian is on a level in political rights with the white men, yet the creole, though conscious of his own superiority, still looks down with contempt on the Indian who fought his battles. The Peruvian creole is tall, but slender and feeble, while levity, scholasticism, and incapacity of mental labour show his want of moral strength. The creole females lose their bloom totally at an early age.

Education is in a low condition. The university of San Carlos, at Lima established in 1570 and the most ancient of the American universities had, in 1851, only 400 students. As to the education of the lower orders it is wholly neglected and in the interior men qualified to fill public offices, by being able to read and write, are not always to be found. The dominant religion is R. Catholic, but a fair amount of toleration is granted to other creeds.

History, Government, &c.—Peru was the greatest and most civilized state of S. America at the time of the discovery of the New World. When treated by the Spaniards from the Incas, whose dominion extended along the Andes through 18 degrees lat. 2° N to 28° S it became with some reduction of the four vice-royalties of Spanish America. In 1718 the province or as it was called, the kingdom of Quito was separated from Peru and annexed to the newly-created vice-royalty of New Granada. In 1778, again, the provinces of La Plata, Potosi, Charcas, Chiguito, and Paraguay, were withdrawn, in order to form the vice-royalty of Buenos Ayres. It was the last of the Spanish American colonies which broke loose from the mother country. In 1821 a patriot force of Gillians and Buenos Ayriens, under General San Martin, entered Peru, and after a succession of engagements, obliged the Spaniards to retire into the interior when the independence of the country was proclaimed. The contest, however, was obstinately continued, until the desperate battle of Ayacucho in 1824 which was soon followed by the final expulsion of the Spaniards. Its limits remained, for the most part, unchanged by the revolution the provinces dismembered from it, in the N. forming at first part of Colombia, and afterwards the republic of Ecuador while those on the S. were united in Bolivia. In 1826, Peru, harassed by contending factions, solicited the aid of Santa Cruz, president of Bolivia, who came with an army, and succeeded, after a series of sanguinary actions in tranquillizing the country, whereupon a co-federation was formed, composed of N. Peru, S. Peru, and Bolivia, Santa Cruz being named 'Supreme Protector.' This state of matters continued until 1828, when in consequence of a bloody battle fought at Yungay, Santa Cruz was driven out of the country, and the confederation brought to a close, and both countries—Peru and Bolivia—returned to their previous limits and forms of government. The republic of Peru was, until of late, continually distracted by parties struggling for power but more powerful and more prevalent now and dealings with maritime nations were more freely invited by the liberal tariff of 1853. The constitution, adopted in 1826, is a copy of that of the U. States. The legislative power consists of a senate and a chamber of deputies; in the proportion of one deputy to 20,000 inhabitants, and five senators to each province. The chief executive power is in the hands of the president, to whom is joined a vice-president. In 1850 the revenue was \$2,100,000; expenditures, \$1,807,000; and the public debt, \$3,718,000. In 1861, the revenue had risen to \$4,949,166; the expenditure to \$4,590,336; and in 1863 the public debt to \$6,507,348.

PERUGIA [see Florence] a m. Papal States, cap. diocese of same name, on the left and summit of a lofty eminence

worked by the Tiber 84 m. N. Rome. It is surrounded by high walls, and defended by a citadel; has frequent but spacious streets, and many remarkably handsome buildings. Its chief edifices are the cathedral, a fine old Gothic edifice of the 15th century, and possessed of a valuable library, rich in works and MSS connected with biblical literature; eight churches, all of these interesting structures the convent of Sant'Agnes, the confraternity of San Bernardino, the convent of San Severo, containing the first fresco painted by Raphael, and the Benedictine monastery of San Pietro de' Carmine, a magnificent establishment, within ancient church, supported by marble and granite pillars taken from a heathen temple and so rich in pictures as almost of itself to form a gallery; the Palazzo Comunale, a majestic edifice of the 18th century; the Sala del Cambril or Exchange, no longer required for that purpose, but interesting from the number of its frescoes with which Perugia has covered its walls; and two fine massive gates, the one the Arch of Augustus built of massive blocks of travertine without cement, and the Porta Marsia, an interesting specimen of Etruscan workmanship. Perugia possesses a university, which is one of the oldest in Europe, a sumptuous cabinet of antiquities, museum, botanical garden, public library of 80,000 volumes an academy of fine arts, and a lunatic asylum, one of the first in which the efficacy of the system of non-restraint was proved. The manufactures, not of much consequence, consist of velvet, silk stuffs, brandy, &c. The trade is in corn, wool, spun silk, and cattle. Perugia, under the Romans, was one of the 12 principal cities of Etruria. Having taken the part of Mark Antony in the war between him and Augustus, the latter took and sacked it. It had recovered the disaster when Tullia, one of the northern barbarians, took it after a siege of seven years, and put many of its inhabitants to the sword. Popilius Rufus, king of France took it in the 8th century, and made a present of it to the Pope. It suffered much during the contests between the Guelphs and Ghibellines, and both in the 14th and 15th centuries was fearfully ravaged by the plague. The celebrated painter, Pietro Vannucci or Perugino, though born in Città della Pieve, long made Perugia his adopted home and died in it a victim of the plague in 1514. Pop. 18,301. The municipality extends to the N. 11 m. by 6 m., breadth 54 m., area, 1094 sq. m. is traversed in all directions by officers of the Apennines. The principal stream is the Tiber which here receives the Chisoneo and Nestore. In the W is the Lake of Perugia. The soil is fertile, producing in abundance corn, wine, fruits, oil, and silk. Cattle, sheep, and swine are numerous, and the rearing of poultry and bees is an important occupation. Manufactures have made good progress, and consist chiefly of cotton, woollen, and silk goods, parchment, hosiery and leather. The trade in these articles is considerable. Pop. 210,316.

PERUGIA (Lago di) or LAIGO TRAVENCO [anc. *Trasi meane Lacus*] a lake, Italy near the E. frontiers of Tuscany, deep and 9 m. W Perugia, about 8 m. long, varying in breadth from 7 m. to 4 m., surrounded with olive plantations. It contains three islands—Isola Maggiore, Isola Minore, and Isola Felice and abounds in fish. It has no visible outlet, and its surface has been gradually rising from the deposit of alluvial matter constantly carried into it. Humboldt gained a signal victory over the Romans near its shores.

PERUWELLE, a tn. and com. Belgium, prov. Hamant, 16 m. W by N Mons, generally well built, with a square, a chapel, several schools, manufactures of hosiery, leather, tanneries, dye-works, taweries, quarries, limekilns and other works. Pop. 7342.

PERVISE, a vil and com. Belgium, prov. W Flanders, on the Yser, 19 m. S.W. Bruges, with two breweries, an oil, and two flour mills; and a trade in corn and cattle. P. 1218.

PERWEE, a vil and com. Belgium, prov. Brabant, on an affluent of the Great Geste, 25 m. S.E. Brussels, with manufactures of velvety, a brewery, a tannery, three mills; and a trade in cattle and swine. Pop. 3577.

PERWUTUM, a tn. Hindoostan, N.W. extremity of the Kurnool territory, 1 m. N. Kurnool, 65 m. S. by E. Hyderabad; lat. 16° 13' N., lon. 78° 5' E. It contains several Hindoo temples, which are inclosed in an oblong square, 669 ft. long by 570 ft. broad, the walls of which are covered by an infinite variety of sculptures.

Vol. II

PERZAGNO, a vil. Austria, Dalmatia, 3 m. from Cattaro, on the shores of the Adriatic, is a very fertile district. It has a parish church; inhabitants engaged in commerce. Pop. 1500.

PERALÉ, a large vil., lat. Caylen, 6 m. N.W. Massara, long a port of entry and export, with a custom-house which was abolished in 1822. It has a church. The inhabitants employ upwards of 200 canoes in the fishery. According to tradition the R. Catholic missionary Francis Xavier, first landed here on his mission to India.—(*Ceylon Gazette*.)

PERASU [anc. *Perasura*] a tn. and export, kind of Italy, along Urbino e Pesaro, on a rocky and wooded height, near the mouth of the Foglia, in the Adriatic, 18 m. E.N.E. Urbino and the sea of a bishop. It is well walled, defended by a citadel, and has clean and well-streets, a marketplace, adorned with a marble statue of Urban VIII. a cathedral of little architectural merit, several other churches, more or less enriched with paintings the ancient palace of the Dukes of Urbino, now occupied by the legats, a library, the mineralogical museum, and a botanical garden. The manufactures are almost confined to a few articles of primary necessity though the pottery early made here was long famous. The harbour formed by the mouth of the Foglia, has become shallow, but the trade in the wine, fruit, particularly silk, oil, silk, and other products of the district, is considerable. Pop. 17,519.

PESCADORIS—1 (*Peloo Islands*) An isl. group, China, in the Fokien Channel, between Isl. Formosa and the mainland. They extend N and S about 60 m. and none of them rises 300 ft. above sea-level. Between Pangin, the largest island, lat. 23° 32' N. lon. 119° 35' E. (a), and Fisher Island, the next in size, is a good harbour, and in the former are several villages and a Chinese garrison. The N. extremity of the group consists of black rocks and coral reefs. Population of the group is estimated at 8000, of whom a large part are fishermen.—2 An isl. group, close upon the coast of Peru \ from Callao lat. 11° 47' S. lon. 77° 20' W. (a)—3, Three groups N. Pacific Marshall's at Arunapalag, lat. (mid group) 11° 19' N. lon. 167° 35' E. (b).

PESCARA, [anc. *Aternus*]—1 A tn. Naples, prov. Abruzzo-Ultra II., 5 m. N.E. Chieti on the Aterno, where it falls into the Adriatic. It has a good fortress, and contains five churches, four monasteries, a seminary, and two hospitals. The fishing on the coast is abundant. Pop. 2260.—2 A river Naples. See *Aterno*.

PESCAROLO a tn. and com. Italy, Lombardy, prov. and 10 m. E by N Cremona, r. bank Asceve, with a church and three chapels, and some trade in corn and flax. Pop. 1508.

PESGHE or *Pescini* a tn. Naples, prov. Salerno 4 m. E.N.E. Ischia, with an annual fair. Pop. 1480.

PESCHICI a tn. Naples, prov. Capitanata, 57 m. E.N.E. San Severo on a lofty height near the Adriatic. Pop. 1600.

PESCHIERA, two places kind of Italy.—1 A tn. and com. prov. and 30 m. N. Mantua, at the S. extremity of Lake Garda, where the Mincio issues from it. It is a straggling place, but is defended by a strong castle and has two churches, a custom-house, and a considerable trade. Pop. 1611.—2 A vil. and com., prov. and 5 m. W. Milan, between the Adda and the Lambro, with several mills, and a trade in corn and cattle. Pop. 1062.

PESCHIO AGRICOLA a tn. Naples, prov. Abruzzo-Ultra II., S.E. Civita Duale with six churches 1 1833.

PESCIA, a tn. Tuscany, prov. and 30 m. W.N.W. Florence, on the Pesa, here crossed by two elegant stone bridges. It is well built, is the see of a bishop, has a court of justice, and several public offices; a cathedral, with a fine painting by Raphael two other churches, several schools and charitable endowments; numerous silk and paper mills, several tanneries, and a trade in silk, wine, and oil. P. 6205.

PESCINA, a tn. Naples, prov. Abruzzo-Ultra II., 10 m. S.E. Aversa, near the E. shore of Lake Fucino. It has a handsome cathedral a church, a monastery, and a seminary, a foundling and an ordinary hospital. Cardinal Masani was born here. Pop. 2000.

PESCO, several places, Naples.—1, (*Costanzo*), A tn., prov. Abruzzo-Ultra II., S.E. Belmonte, with seven churches and a convent.—2, (*de-Massa*), a tn., prov. Principato-Ultra, 16 m. W.N.W. Ariano; with a sulphurous spring. P. 1740.—3, (*Lecce*), A tn., prov. Salerno, 9 m. N. Lecce.

78

Pop. 1000.—4, (Pague), A. to, prov. Badajoz, S.W. MIRA, on a lofty eminence; with four churches and a convent. Pop. 4000.—5, (Amazones), A. to, prov. Abruzzo-Ultra I, S. Clivio di Fiume, with a convent. Pop. 850.—6, (Passeo), A. to, prov. Santa M. N.E. Isernia. Pop. 1000.—7 (Jole), A. to, prov. Lugo, 3 m. N.E. Sora, at the foot of the Apennines. Pop. 3400.

PERSEQUIRO an island, Portugal, off the coast of prov. Alentejo, 40 m. W. Oporto. Its defended by a strong castle.

PERHAWER, or **PERHAWER**, a territory Afghanistan, but now incorporated with the Punjab; lat. 33° 27' to 34° 25' N. lon. 71° 29' to 73° 12' E.; and bounded, N. by Suwat, and the country between it and the Indus E. part of the same country, the Indus and the Belt or Kala range; S. the other territories of the Afghans holding the same range and W. the Khyber mountains and the Afghan province of Jalalabad length, 55 m.; breadth, 50 m.; area, 1800 sq. m. The soil is naturally fertile, and being well watered by the Indus, Cabool River, and other streams, yields two very productive harvests every year. The one, sown in wheat and cut about the end of April, consists chiefly of wheat, barley, jowar, and the usual staples of colder climates; and the other, sown as soon as the ground is clear of the former, and reaped in autumn consists chiefly of rice, maize, millet, and the staples of warmer climates. The rice in particular called Bara, because grown on ground irrigated by that river, is the finest in the world. Other crops, more or less extensively cultivated, are radishes, cucumbers, pumpkins and gourds of various kinds, ginger, turmeric, tobacco, cotton, various oil plants, the sugarcane, only to be used as a sweetener, and numerous fruits, all of them however with the exception of the guinea, more remarkable for their abundance than their flavour. The great route from Khorasan and Cabool into India, lies through this province by the Khyber Pass and across the Indus. Pop. roughly estimated at 500,000.

PERHAWER, or **PERHAWER**, a tn. Punjab, cap. above territory, on the Bara, 36 m. W. by N. Attock, lat. 33° 52' N., lon. 71° 40' E., 13 m. E. from the E. extremity of the Khyber Pass. It is called at intervals there are strong bastions, so that it is capable of making a defence at the same time, it is commanded by the fort, whose garrison has the power of preventing the citizens from being refractory. The principal thoroughfare or street, the only good one in the town, is very broad, and has houses of one story on both sides of it, and communicates with a large open area, used for a gunpowder. A little further E. is another open space of a circular form, the prettiest part of the town, surrounded by regularly-built houses with a circular row of arcades in front. A third area afterwards occurs, occupied by silk and cloth merchants, saddlers, and mill makers, &c. To the right and left of the main thoroughfare described, the town covers a large space of ground, the by-lanes are very narrow, dirty and offensive, and the houses generally uncleanly in appearance. The manufactures are but trifling, consisting chiefly of lozenges or cords of cotton, dyed light-blue, with borders of bright coloured silk. Salt is dug in large quantities in the vicinity, where there are also two rich lead-mines. Nitre and sulphur are likewise obtained. Perhawer has greatly fallen off, both in wealth and population, since the beginning of the present century. Since then, its once numerous mosques, many built in a splendid style of Oriental architecture, have been miserably polluted by the Sikhs, and are going to decay, while extensive ruins in many parts speak of violence and recent violence. In the same time, the population has fallen from about 100,000 to 45,000.

PERNITZEROPEN, a vil. Austria, Styria, circle Marburg, on a stream of same name, near Jahring. It has a castle, and some trade in corn and wine. Pop. 1510.

PEPULINA, a vil. Hungary, co. Komlós, 56 m. from Nagy-Ménfő with a fine mill, and a trade in corn. P. 1140.

PERQUERA, a tn. Portugal, prov. Beira-Alta, near Viseu, 1. bank Douro; with an annual fair. Pop. 1700.

PERQUERIA GAYON, a vil. Mexican Confederation, dep. Nuevo Leon, 30 m. N.W. Monterey, and formerly celebrated for its silver-mines and salt-works.

PESTONANALIA, a river, Siberia, rises in the S. of gov. Tomsk, flows N.W. and joins 1 bank Obi, about 80 m. below Kyska; total course, 100 m.

PESTH, a co. Hungary, Higher Danube, bounded, N. by Honch and Neograd, N.E. and E. by Hova, S.E. Little Kumania, S. Bacs, W. Stuhlweissenburg, and W. Komorn and Gran, area, 2069 geo. sq. m. In the N. and N.W. it is much broken by hills, but in all other directions presents the appearance of an extensive flat. It is traversed by the two most important rivers of Hungary, the Danube and the Theiss, and yet is very imperfectly watered. The Danube is chiefly confined to its W. frontier, the Theiss flows only through a small portion of the E. and hence, between the two, there is a large space left overcharged with stagnant water, and extremely covered with swamps, but scarcely cultivated by a running stream. The soil is of very indifferent fertility, but where not covered with sand and heath, or consisting of morasses, it is in general carefully and skilfully cultivated, and good crops both of corn and tobacco are raised. Along the right bank of the Danube are vineyards, from which an excellent red wine is made. The only minerals of any consequence are marble and building-stones.

PESTH, **PASTINIA**, or **PAST** the most populous tn. of Hungary, cap. above co., on the E. or 1 bank Danube, across which it communicates with Buda or Ofen by a noble suspension bridge, 187 m. E. Vienna. It stands on a flat, and consists of the town proper and of four suburbs. The former, also called the old town, is irregularly built, and has dark narrow streets, the gloom of which is occasionally relieved by handsome mansions. The suburbs mostly of modern construction, are much more agreeable and regular, particularly the one called *Nemestadt* or *Leopoldstadt*, forming the N. division of the town. The new market-place within it is remarkable for its extent, and the regularity and beauty of the buildings by which it is surrounded. The largest building of Pesth, called the *Josephinische* or *Neupolstadt*, is in this division, and forms a huge pile, used partly as artillery barracks, and partly as military magazines. One of the finest parts of the town, is the bank of the river along which a quay about 14 m. long has been erected, and lined with handsome, lofty houses, brilliantly whitewashed. The public edifices are neither numerous nor interesting. Those most deserving of notice are the parish church, a Gothic structure, the uni-

THE TOWN HALL SQUARE, PESTH.—From Buda-Pesth Illustr.

versity, with 40 professors and 1600 students the church attached to the university, one of the finest in the town, with a lofty tower and fine tracery; the national casino, a national theatre, capable of admitting 3000 persons; the museum, the cabinet of coins and medals; the university library, with 80,000 volumes; the county building, observatory, botanical garden, gymnasium, school of surgery, various high school, English female institute, the house of invalids, and several other hospitals and benevolent establishments. The manuf-

tures consist of silk and cotton goods, various instruments, wool, best-kept sugar, leather, jewellery, &c., and the trade, which is very important, and makes Pesto, after Vienna, the most important commercial town on the Danube, is chiefly in corn, wine, wool, wood, and cattle. Pesto, though not the capital of Hungary, is the seat of its oldest judicial tribunal, called the *Kisbánya* Trial and September Trial, which together constitutes the supreme appeal court of the kingdom. Near it is the *Rakos*, a plain where the Diet, the great national assembly of the Magyars used to be held in the open air, and the deputies attended by their vast retinues of vassals, sometimes swelled to the number of 100,000 men, who remained encamped in tents during the continuance of the sittings. At the first of these assemblies held in 1458 *Matthias Hunyadi* was elected king. The *Rakos* is now famous for its annual horse-race. Pop. (1840) 100,500.

PESTO or PESTUM (anc. *Pestum*), a ruined in Naples, prov. *Fringipato-Citra*, dist. and 19 m. S. S. W. *Campagna* in a plain on the Gulf of Salerno. It was first a Greek colony, and fell under the power of the Romans, a.c. 275. After the fall of the empire it continued to flourish, but was ultimately destroyed by the Saracens towards the end of the 9th century. It still retains part of its walls, consisting of large blocks joined together in the most perfect manner without cement, and one of its four gates forming an arch 46 ft. in height. Among the buildings are a temple of *Nephes*, the four sides of which have a range of 88 pillars, surmounted by an architrave and frieze of the Doric order; a large and imposing edifice, called the *Basilica* for want of a better name but supposed to have been a temple of *Ceres* a theatre and amphitheatre of which however there are only a few traces. **PESEAK**, a vil. Hungary Thither Thesse, co. *Torontal* 12 m. from *Komlos* with a church, and a trade in corn, maize, and wine. Pop. 3045.

PETRELIE, *Petrelia*, *CHURCH*, *PETRELIA*, or *PETRELIA*, the most important prov. of *Chios* proper and containing the capital of the empire lat. 36° to 41° 25' N lon. 113° 40' to 116° 45' E, area, 58,949 sq. m., bounded, N by *Mongolia* and prov. *Leontio*, the great wall forming part of the frontier, E the Gulf of *Petrelia*, S provs. *Shantung* and *Homan*, and W prov. *Shansee*. It is generally level and very flat, especially along the coast and in the S. parts, though a few ridges of hills traverse the N and W portions. It is populous and well cultivated, yielding millet, wheat, pulses, fruits, and a little rice, though by no means fertile, and only producing a small proportion of the food required for the capital. It is well watered by the *Pu-ho* and its numerous affluents, has several considerable lakes, and contains coal, marble, granite, and brick and potter's clay. Besides the capital, the provinces contain several large cities, of which *Pantung-foo*, the residence of the governor; and *Tsientin-foo*, the entrepot of the trade which comes through the *Pu-ho*, are the most important. Through the latter a large trade is done in salt. Pop. 27,990,871. — The *Giza*, formed by a large mass of the Yellow Sea, stretches N to S 160 m., and penetrates inland 180 m.

PETCHENEGH, a tn. *Russia*, gov. and B. *Kharkov*, 7 bank *Southern-Dnieper*, with five churches. Pop. 7000.

PETCHORA, a river, *Russia*, rises in N of gov. *Pern*, on W slope *Ural Mountains* flows almost due W, then turns N across E. part of gov. *Vologda*, enters gov. *Archangel*, and, on reaching lat. 66° N, makes a long curve S W to lon. 39° E, when it suddenly turns due N and falls into a bay of the Arctic Ocean by a great number of mouths. Total course about 900 m. Its principal affluents are the *Rima* and *Ussa*.

PETEGHEM, a vil. and com. *Belgium*, prov. *S. Flanders*, 15 m. S. S. W. Ghent, near L. bank *Scheldt*, with a brewery, dye-works, pump manufactory, and some corn and oil mills. Weaving and handiwork occupy most of the inhabitants. Pop. 2384.

PETEN, a lake, *Central America*, state and 172 sq. m. *Guatemala*, near the frontier of *Yucatan* about 70 m. in circumference, and in some places has a depth of 80 fathoms. It includes several islands of which *Peten*, the most considerable, was formerly a principal seat of the *Maya* Indians, and contains the modern town of *Flores*.

PETER, see *FRANCA*.

PETER and PAUL (fr.), esp. *Kamtschatka*. See *FRANCISCA*.

PETER BOTTLE MOUNTAIN See *MACINTOSH*.

PETER I. an isl., E. *Antarctic Ocean*, discovered in 1851, in lat. 68° 57' S. lon. 9° 46' W. It is about 24 sq. m. in extent, and attains the height of 4000 ft.

PETER (St.), several par. *England*. — 1. *Wales*, *Cardiff* par. 5155 sq. m. Pop. 16,924. — 2. *Dorset*, 5741 sq. m. Pop. 15,528. — 3. *Hampshire*, 60 sq. m. Pop. 2830. — 4. *Hants*, 5749 sq. m. Pop. 5748. — 5. *Jersey*, 3571 sq. m. Pop. 2467. — 6. *East*, *St. Peter*, par. 1. — 1. (*Thames*), 3512 sq. m. Pop. 3575. — 2. (*Cheshire*), 59 sq. m. Pop. 1198. — 3. (*Essex*), 81 sq. m. Pop. 875. — 7. (*Devon*) *Guernsey* Pop. 1152. — 8. *Essex*, 1836 sq. m. P. 3404.

PETER (St.), two par. *Scot.*, co. *Orkney*. — 1. *P. 457*. — 2. (*or North*) *P. 3544*.

PETER (St.), a lake, *Lower Canada*, an expansion of the *St. Lawrence*, 9 m. S. W. *Three Rivers* 21 m. long, 15 m. to 20 m. broad, and in many places not exceeding more than 10 ft. or 11 ft. deep. It includes numerous islands, and receives several rivers. Its waters abound with fish.

PETER (St.), numerous places, *Hungary* particularly. — 1. A vil., co. and 9 m. from *Komorn* with two churches and a trade in corn and wine. Pop. 1860. — 2. A vil., co. *Temesvar*, on the *Körös* with a church. Pop. 1840. — 3. A vil. *Thither Danube*, co. and 8 m. from *Wieselburg*, with a church. Pop. 1898. — 4. A vil. *Tranyavala*, dist. and 8 m. from *Kromatitz*, with a Protestant and a Greek church. Pop. 1594. — 5. A vil. *Tranyavala*, on an affluent of the *Maros* about 95 m. from *Radnot*, with a Protestant and a Greek church. Pop. 1028. — 6. (*Baz*) A vil. *Thither Danube*, co. *Pressburg*, on the *Mlava*. Pop. 1532. — 7. (*Kapany*) A vil. *Thither Danube*, co. and 30 m. N. E. *Stuhlweisburg* in a fertile valley with a Protestant church, and a synagogue P. 1889. — 8. (*Ratiz*) A vil. *Thither Thaim*, co. *Torontal*, on the *Maros*, 37 m. N. W. *Temesvar*, with a church, and some trade in cattle, wine, and wool. Pop. 3567. — 9. (*Sopos*) A market in *Thither Thaim*, co. *Borsod*, 3 m. N. W. *Miskolc*, with a Protestant and a R. *Catholic* church, a school, and some trade in corn, wine, and cattle. Pop. 8225.

PETERS ISLANDS. — 1. An isl. N. *Atlantic Ocean* near the coast of *Newfoundland*, lat. 46° 41' N. lon. 55° 57' W. — 2. Two small isls., S. coast *Australia*, lat. 32° 21' S. lon. 133° 39' E. — 3. An isl., S. *Pacific*, lat. 68° 57' S., lon. 90° 46' W. Height upwards of 4000 ft., named after the emperor *Peter I.* by *Bellingham*.

PETERS POINT (St.) a tn. *Channel Islands*, cap. *Is. Guernsey*, on the shore of a bay E. side, occupying the slope of a hill, and presenting a very attractive appearance from the sea, but which is not maintained by a nearer inspection. The streets are narrow steep, and crooked, but mostly well paved, and lined by old looking dusky houses. The environs are exceedingly beautiful, being studded with the handsome residences of the gentry who all live outside the town. The most interesting buildings are St. Peter's church, with a tower in the centre, surmounted by a low spire; St. James church, Elizabeth college, public hospital and the fish-market, one of the handsomest and most commodious to be seen anywhere. There are here two or three chapels of ease, and several places of worship for dissenters a public library assembly-room, mechanics institute, courthouse, prison and several banks. The harbour, formed by two piers, is small, but sufficient for the trade of the place. The roadstead affords convenient anchorage. Port George, a regular fortification on the heights, stands about half-a-mile from the town. It is considered to be of great strength. Pop. 15,779.

PETERS (St.), a small tn. and par. *England*, co. *Kent*, 1 m. from N. B. point *Isle of Thanet* on the North Foreland, and 2 m. S. by W. *Margate*. It has a church, Baptist and Wesleyan chapels, a set of well-endowed almshouses, and a charity and other schools. Area of par. 8112 sq. m. Pop. 2975.

PETERS (St.), four par. *Ireland*. — 1. *Louth*, 3428 sq. m. Pop. 18,789. — 2. *Roscommon*, 7898 sq. m. Pop. 5603. — 3. *Wexford*, 1406 sq. m. Pop. 1164. — 4. (*and Part* of), *Limerick*, 4074 sq. m. Pop. 1160.

PETERBOROUGH, a tn. *Upper Canada*, esp. *dist. Col. born*, on the *Ontario*, about 25 m. N. W. *W. Coburg*. It is well laid out, presents a handsome appearance, and has seven churches and chapels, a substantial court-house and jail, and several mills, foundries, and distilleries. Pop. (1850) 2151.

PETERBOROUGH, an episcopal city, and genl. bor. *England*, co. and 23 m. N. by E. *Northampton*, L. bank *Great*.

with stations on the Great Northern, Eastern Counties, Northampton and Peterborough, and Midland Counties railways. In the old town the houses are various in height and extent, yet mostly and substantially built, some of the streets are spacious and the whole well paved and lighted with gas, and the market place is a fine square area, not inferior to any in the kingdom. The W. suburb, or new town, consists of most modern dwellings. The entire city is supplied with good water from rock wells. The principal building is its cathedral, founded by Paula, son of Paula, fourth king of Mercia,

PETERBOROUGH CATHEDRAL, West Front. - From Bellin's Cathedral.

in 855, and destroyed by the Danes in 870. Being rebuilt in 936, the valuable gifts bestowed upon it by Edgar saved the name of the city to be changed to Glidenburgh, the golden city, which title ultimately gave place to its present name, derived from the saint to whom the church is dedicated. In 1116 great part of the edifice was destroyed by fire, and in the following year its restoration was commenced, but not till the opening of the 16th century did the structure assume its present aspect. The prevailing character of the building is Norman but it exhibits examples of transition, early English, decorated English and perpendicular styles. The most commanding feature of the building is the W. front (shown in the engraving) consisting of three magnificent pointed arches, 90 ft. high, surmounted by pinnacles and pinnacles, and flanked by towers with spires and pinnacles. The whole front forms a square of 150 ft. in height and breadth. Catharine of Aragon, wife of Henry VIII., was interred in this cathedral, also Mary Queen of Scots, but the remains of the latter were afterwards removed by James I. to Westminster. The winter processions show the remains of a cloister, a fine perpendicular gateway leading to the cloister, a massive tower and gateway connecting to the bishop's palace, and an old chapel, now used as the free grammar-school. Peterborough contains only one parish church, but has also places of worship for Baptists, Independents, and Methodists. The other public buildings of any interest are the townhall, the new jail, the corn exchange, and the stations of the Great Northern, and Northampton and Peterborough, and Midland railways. The educational scene of the city comprises the grammar-school an endowed charity school, a national school for both sexes, infant schools, and a number of private academies. The education includes the mathematics, music, public disputation, and other useful branches. There are a theatre room, and a literary and philosophical institution. The chief

trade of Peterborough consists of coal, corn, wool, and timber which are conveyed along the Nene in barges; but it has received an impulse from the facilities of railway transit, and live and dead stock, and agricultural produce, are now sent in considerable quantities by rail, to London and other districts. It sends two members to Parliament. Thorpe Hall, a fine old mansion, formerly belonging to the Fitzwilliam family, is in the immediate neighbourhood. Pop. 3075.

PETERBOROUGH par. Eng. Harbord, 5069 ac. P. 720. PETERBULTER, par. Scot. Aberdeen, 7 m. by 4 m. Pop. 1351.

PETERFALVA a vil. Hungary Bitter Thesst, co. Neutra, 40 m. N Pressburg; with a church, a townhouse, and three mills. Pop. 1116.

PETERHEAD, a seaport in Scotland, co. and 96 m. N N E Aberdeen on a peninsula, the west E point of Scotland, connected with the mainland by an isthmus, nearly 1/2 m in breadth, and 1 m E. of the mouth of the Ugie, is the Thurman Ocean. It is built in the form of a cross, and consists of five principal and several minor streets; the former well formed, well paved lighted with gas, and lined with houses, for the most part substantially built of granite, and often of handsome appearance; it is lighted with gas, and abundantly supplied with water. The buildings and other objects chiefly deserving of notice are the parish church, a handsome granite structure, with a spire 116 ft. high, a chapel of ease, a large and elegant Episcopal, a Free & U. Presbyterian, a Wesleyan, a R. Catholic, and two Independent churches, a town house, of a quadrangular form, and surmounted by a spire 110 ft. high, a market-cross, consisting of a granite pillar of the Tuscan order, a custom-house, an academy, a parochial, a ragged, and various other schools, a mechanics institute, a valuable museum of natural curiosities and antiquities, and a subscription and a mechanics' library. The manufactures, which are unimportant, include some woollen and other goods, woven chiefly for houses in Aberdeen, castings, cordage, uricels, and glass. In the building yards a considerable number of boats and large vessels is constructed. The trade is extensive, and has the advantage of two good harbours, the one on the N., and the other on the S. side of the peninsula; the water in the former being at spring-tides, about 15 ft., and in the latter from 12 ft. to 14 ft. The access to both harbours, though not naturally difficult, is greatly facilitated by a light-house on Bunken Ness, and in addition to other important improvements, which have been executed at an expense of 250,000, free communication between the harbours has been effected by cutting across the isthmus, and thus enabling vessels to get out in all states of the wind, while the communication with the mainland is still maintained by a cast-iron swing-bridge. The principal imports are lime, wool, timber, salt, flour, and general goods, the exports, gram, meal, pork, butter, cheese, eggs, fish, oil, and granite. The granite is obtained from excellent quarries, extensively worked in the vicinity, the fish, including both herrings (of which in 1851, there were cured here 65,563 barrels), and white fish, are chiefly obtained from the productive fisheries on the coast, in which a considerable number of boats is employed. The Greenland whale-fishery is among the most important interests of the town, the vessels fitted out for the whale and seal fishing in 1855, were 27 carrying 7855 tons. In 1851 there entered 80,841 tons of shipping of which 8599 belonged to the foreign trade; and there cleared 27,501 tons, of which 8175 were in the foreign trade. During the summer, Peterhead is much frequented by bathers, for whose accommodation both hot and cold baths have been provided, and in the vicinity are mineral springs, the principal of which, called the White Well, from the sparkling of its water, contains mixtures of iron and lime, and common and glacier salt, and is in high repute for cases of indigestion, internal obstructions, and nervous disorders. The only places of interest near the town are the ruins of the ancient castles of Boddam and Ravenscraig. As a borough, Peterhead is governed by a provost and 11 councillors, and milnes with Banch, Cullen, Inverury, and Kintore, in sending a member to parliament. Its port, which formerly ranked only as an appendage of that of Aberdeen, is now separate and independent. Pop. 7528.

PETERHOF a vil. Russia, gov. about 70 mi. N. & W. St. Petersburg. Its green and airy atmosphere is its imperial palace, built in 1711, by Peter the Great, on the plans of the

southeast Le Blond. It is a large but not very regular island, situated on a height on the Gulf of Finland, and surrounded by beautiful gardens, adorned with fountains, cascades, and groves. Pop. (1849) 3300.

PETERSBURG, a handsome town and port of entry, U. States, Virginia, 34 m. S. Richmond, on bank Appomattox, 19 m. above its entrance into the James. It has seven churches, a courthouse, and a jail. Flour, grist, and saw mills, ropewalks, tanneries, and printing-offices. It is one of the most commercial towns in the state, and carries on an active trade in the export of flour and tobacco. The river is navigable to this place for small craft, and the falls immediately above it afford extensive water-power. Pop. (1850) 14,800.

PETERSBURG (Sr), a gov. Russia, bounded N. by Finland and Lake Ladoga, N. E. Olonets E. and S. E. Novgorod, S. Pskov, W. Lake Peipus, gov. Riazan and Esthonia, and Gulf of Finland, greatest length, N. E. to S. W. 385 m. breadth, 90 m., area, about 12,800 sq. m. It is, for the most part, a low flat, covered, to a considerable extent, with lakes and swamps, excepting small portions of the N. and S. the former being broken by the low hills of Olonets, and the latter partly covered by a ramification of the Valdai mountain.

The whole of its drainage is carried into the Gulf of Finland, either directly by the Neva, Loupa, and Narova or indirectly by the Volkhov, Sissa, Pacha, Svir and Osta, which have their mouths in Lake Ladoga. The climate is severe, and the soil by no means fertile. Not above one-third of the surface is under cultivation, and the corn produced falls far short of the consumption. The forests are very extensive. There are no minerals of any consequence. Manufactures have advanced by rapid strides, particularly in the capital and trade, both foreign and domestic, is very extensive. For administrative purposes, the government is divided into eight districts. The greater part of it belonged to ancient Ingria, which during the war between the Swedes and Russians, in the time of Charles XII. became the principal theatre of hostilities, and in consequence suffered dreadfully. Ultimately Peter the Great succeeded in conquering it, and it was finally secured to Russia by the peace of Nystad. Pop. (1850), 991,000.

PETERSBURG (Sr) the capital of the Russian empire, near the mouth of the Neva, in the Gulf of Finland. lat. 59° 56' 30" N, lon. 30° 18' (observatory) E. (n.) The site is

elise. The Neva, on approaching the termination of its course, turns first N. and then W. After proceeding a short way in the latter direction, it divides into three main branches the first of which, under the name of the Great Neva, proceeds N. the next, or central branch, flows W. S. W., under the name of the Little Neva, and the third, forming properly a continuation of the main stream, and therefore called the Great Neva, flows S. W. and incloses a large tract of peninsula surrounded by water on three sides, and contiguous with the mainland only on the S. The branches form a number of islands, the two largest of which, separated from the peninsula by the main stream and Great Neva, are the Aptekarski or Apothecaries Island on the N., and the Vasilievsk or Basilisk Island on the W. In the N. W. subterranean arms of the river form a number of smaller islands, of which the more important are the Petrovskii, Krestovskii, Kausanskii, and Klugovskii. These islands particularly the two largest, a small portion of the N. bank, and the whole of the peninsula on the S. bank, forming a series of flats which, taken as a whole, have nearly an oval shape, and are so low as to be constantly exposed to inundation, compels the site of St. Petersburg. The Neva, though a broad, lively and pellucid stream, is generally shallow, and at its mouth is enumbered by a bar with not more than 9 ft. water, so that the large vessels which are built at the city docks can only be transported as keels, to be fitted out at the great naval station of Cronstadt, about 16 m. below. Though an attack of the city by sea may be all but impossible, the approach by land presents no obstruction to an invading force, except a deep ditch or canal, stretching across the S. part of the peninsula, and a diad, situated on a low island, so near the centre of the city, that its guns, so far from defending, could not be used without demolishing it.

The larger and finer part of St. Petersburg being built on the peninsula, takes the name of the Hololaka Storov or Great Side. All the rest to the N. on the islands and S. bank, is designated the Peterborough. The communication between the former and the latter is maintained only by one stone and three boat bridges, but the deficiency is supplied by numerous ferry-boats of smooth shape and fantastic colouring, which are constantly plying to and fro. Owing to the lowness of the site, though the loftier pinnacles and domes are seen at a considerable distance, the city whether approached by land or water cannot be said to become distinctly visible before it is actually entered, and hence the general impression produced is greatly heightened by a feeling of surprise. The stranger suddenly finds himself between noble granite quays, bordered by edifices of almost unrivalled splendour or in spacious streets of apparently interminable length, straight as an arrow unbroken by the slightest unevenness, and lined with lofty buildings of uniform structure, often lavishly adorned, and, in colour at least resembling marble. It is true that the impression is somewhat weakened by a narrower inspection, the greater part of the houses proving to be only of wood or brick, garnished with plaster. As it is impossible to obtain a complete view of the city from without, recourse is often had to the numerous towers, on which watchmen stand sentinel day and night, to give the alarm of fire; but by far the best station is the tower of the Admiralty, centrally situated on the N. W. part of the peninsula and S. bank of the Great Neva, and provided with galleries, from which all parts of the city may be seen in succession to the greatest advantage. Looking S. over the peninsula from this commanding station three small narrow streets, the Moika, next the Ostrova, and last the Fontanka, may be traced stretching aerolically from E. to W. and dividing the whole space into three quarters called respectively, the First, Second, and Third Admiralty Sections.

Radiating immediately from the towers Admiralty Sections canals, and spanning them by handsome granite bridges, are the three principal streets, the Nevski Prospekt or Neva Prospekt, on the right, the Gorkhovskii Prospekt or Puss Prospekt, in the centre, and Vomonskii Prospekt or Resurrection Prospekt on the right. The eye wanders along these streets from

road to and without obstruction. They are all of great length, width, and beauty, but the finest way, and the greatest thoroughfare of the city, is the Nevskoi Prospekt, which is 7 m. long and 150 ft. wide, and has a double carriage-way

PROSPEKT NEVSKOI ST. PETERSBURG.—From Dvortsov, Vantage-Point on Beach, etc.

with foot-paths paved with granite, or avenues shaded with lime-trees. Beyond the Fontanka Canal, both on the S. and E., and bounded in the former direction by the city fountains, and on the latter by the main stream of the Neva, is a large space, almost entirely covered with buildings, and forming in addition to the three Admiralty sections already mentioned, the Narva, Karakozni, Kugotranskoi and Fomny quarters. Considerably to the E., on the S. bank of the river, may be seen the large villages of Great and Little Okhtia. Turning now to the opposite side of the town and looking N., the busy scene presented by the river immediately below first attracts the eye, which then wanders along the splendid quay which lines the E. side of the Yastitskovy, and is bordered by a succession of noble edifices. The buildings of this island are chiefly confined to its S. and E. portions, the W. and N.W. forming the far larger portion of the whole, is covered with trees or is under grass cultivation. On the N.E. the most conspicuous object is the ornate situated church on the small island of Petersburg, but also possessing an extensive outwork on the island of Aptekarskoi, from which it is only separated by a narrow channel. N. of this outwork, another quarter of the city commences, and takes the name of the Petersburg quarter. It is much less compactly built than the Admiralty sections, the buildings gradually becoming more isolated, and giving place to extensive parks and gardens. The same remark is still more applicable to the islands of the N.W. which are chiefly occupied by places of amusement, public gardens, villas, and country seats. On the N.E. beyond the Neva, and on the S. bank of the river is the Viborg quarter which has already acquired considerable extent, and is rapidly advancing in importance. Few cities surpass St. Petersburg in public edifices.

Churches.—The first in rank is the metropolitan church, or cathedral church of the Kenna Mother of God, in the Nevskoi Prospekt. It is in the form of a Greek cross, and has in front a large convex porch of Corinthian columns. From the centre of which a tower, somewhat deficient in elevation, rises, and is surmounted by a gorgeous dome. In the interior, 56 gigantic iron pillars support the roof, and in niches along the sides are colossal statues of the Grand Duke Vladimir, Alexander Nevsky, St. John, and St. Andrew. The Isaac church, finely situated a little S.W. of the Admiralty, in one of the largest open spaces of the capital, is much admired for its

simple but lofty style of architecture, its grand proportions, and noble positions. The mere foundation of it, formed of piles sunk in swampy ground, is said to have cost \$200,000. It is in the form of a Greek cross, and has five grand vestibules, each approached by three broad flights of steps, and each whole flight composed of an entire piece of granite. Each entrance has a superb portico, with round monoliths of polished granite, 30 ft. in height and 7 ft. in diameter supporting an enormous frieze, above which, to twice the height of the porticoes, rises the chief and central cupola, glistening with gold, gilt on copper and supported by 30 granite columns. The Smolnoi church, situated to the N.E. of the peninsula, and originally belonging to a convent which still forms a vast pile, is built of white marble, and ornamented by five blue domes spangled with golden stars. The Frochorsky church, or Spass Frochorsky, is one of the largest in the city, belongs to one of the oldest regiments of the guards, and is overladen both without and within with military trophies. The railing around the church-yard is formed of 800 French and Turkish cannon, mounted in three on granite pedestals, while every niche and recess of the interior is crammed with captured colours and banners, pushed horse tails, &c.

The church of St. Peter and St. Paul situated on the N. side of the channel, is rendered conspicuous by its lofty and elegant gilded spire, but the building itself has a dingy and wretched appearance, and an interior which from the number of keys of fortresses, captured eagles, pushed horse tails, and batons of officers, looks like an arsenal than a church. The chief object of interest is the imperial vault, where the remains of Peter the Great and of all his successors repose. There are numerous other Russian churches not deserving of particular notice. The church of the English factory, situated W. of the Admiralty, is a splendid building, richly fitted up and seated for 1500 persons. The Dutch church is remarkable for its ample revenues, derived from grants of land made to it by Peter the Great, and afterwards built upon. Of the several churches possessed by R. Catholics, the principal one, situated in the Nevskoi is an elegant structure, with a Corinthian colonnade and a finely proportioned dome. In connection with the churches may be mentioned the monastery of St. Alexander Nevskoi, the only one in St. Petersburg; it is among the most celebrated in Russia, ranking next after that of the Trinity in Moscow and of the Cere in Kiev. It was founded by Peter the Great, and contains within its walls, churches, towers, monks cells, and gardens. The great attraction here to the Russians, is the monument containing the remains of the saint, a consecrated grand duke. It is in the form of a pyramid 15 ft. high, of solid silver, and with the ornaments around it, also of silver is said to weigh 5000 lbs., or considerably more than two tons. The principal church or cathedral, built by the Empress Catherine, is of large dimensions, and surmounted by several domes. The interior is richly decorated with Italian marble, and the ornaments and treasures are of vast value. The long red cloisters which cluster round the church have a dreary look, and are occupied by between 50 and 60 monks, who superintend a diocesan school, at which the average attendance is about 1000.

Palaces.—These are both numerous and remarkable for their colossal dimensions. The Winter Palace, while the emperor resides in it is said to be inhabited by 8000 persons. It is situated immediately E. of the city, and is in the form of a vast square, the angles of which nearly correspond to the four cardinal points. It is the largest palace in the world, being one-third larger than that of the Emperor of Austria, and is not surpassed in point of splendour. It was so completely destroyed by fire in 1839, that it was necessary to rebuild it and one of the not least remarkable feats connected with it is, that its present form was the work of two short years. The interior is gorgeous, almost beyond description, consisting of suites of splendid halls, filled with statues, arabesques, precious stones, vases, and pictures. To the E. of the Winter Palace, and connected with it by several covered galleries, is the Hermitage, built by the Empress Catherine, in a style similar to that which made Frederick the Great build his Sans Souci, as a place where she might lay aside the cares and toils of state. Its principal facade faces the Neva, but possesses little architectural merit. It is loaded, however, with precious objects of art and sword, and has a very valu-

able picture-gallery. The Marble Palace, not very appropriately so called, since far less marble than granite and iron has been used in its construction, lies considerably E. of the Hermitage, near the Tsvetnoi bridge; it has a dark gloomy look, and its walls are of such massive blocks as to suggest the idea of a fortress rather than a palace. About 1 m. further E., on the banks of the Neva, stands the Taurida Palace; it is a long low building, of no merit; and is only remarkable for a ball-room of the extraordinary dimensions of 320 ft. long, by 70 ft. wide, and requiring 30,000 wax-candles to light it up completely. The Amvtschikoff Palace, on the Great Prospekt, near the Fontanka Canal, claims the brilliant range of buildings of which that street is composed. Though handsomely built, and now the favorite residence of the Imperial family, and the place where the emperor receives ambassadors and holds the greater number of his councils, it does not possess much interest. The New Michaeloff Palace, so called to distinguish it from the Michaeloff Palace, or rather castle, built by the Emperor Paul, and now occupied by the school of engineers, is the residence of the emperor's brother, and is thought to be the most elegant building in St. Petersburg. Attached to it are fine ranges of offices, in one of which a celebrated riding-school is kept, the youth of which often perform feats and tournaments in the presence of the Court.

Government Buildings.—The Admiralty, to which as furnishing the best station for obtaining a full view of the city, reference has already been made, is an immense brick building, situated on the N. side of the square of arms name, and surmounted by a slender tower with a gilt cupola. The main part of the building, from the centre of which the tower rises, lies parallel to the river with its N. side but has its principal facade on the S., facing the square. The length of this facade is nearly $\frac{1}{2}$ m., and at right angles to it are two sides stretching from its extremities Δ towards the river the E. side fronting the Winter Palace, and the W. the Isaac Square and Senate house, and each 450 p. in length. A large portion of the Admiralty is occupied as school-rooms for naval cadets, immediately below it, on the N., being the Russian quay are

Bostrais of ancient Rome, from which the approach of shipping may be observed. This citadel, with its bastions and bristling embrasures, mounted with 100 cannon, and defended by a garrison of 3000 men, forms a very conspicuous object. Besides the church of St. Peter and St. Paul, which has already been described, it contains within its inclosure the Mint and in its vicinity presents an object of great interest in the wooden cottages of Peter the Great, consisting of three small apartments, one of them his chapel and containing, among other relics of that extraordinary man, the little boat which he constructed, and which may be considered as the germ of the powerful navy which he afterwards formed. Among the many other government edifices to which a general reference must suffice, the arsenals and ranges of barracks are particularly deserving of notice.

Libraries, Museums, &c.—The Imperial Library occupies a large building, near the Kasan church. In one of the finest squares of the city lying the Hermitage Prospekt. It contains 400,000 printed volumes, and about 15,000 MSS. It has derived the greater part of its treasures from the spoils of Poland. The Oriental MSS. are particularly valuable and extensive. The only other libraries entitled to particular notice are those of the Academy of Sciences, 100,000 vols.; of the Hermitage, 120,000 vols. of which 10,000 are in Russian and of the Alexander Nevskii Monastery, which, though very limited in extent (only 10,000 vols.) has collections of MSS. of very great rarity and value. The principal museums are those of the Academy of Sciences, occupying a large portion of the magnificent buildings of that celebrated body, on the Vasilievskoye on the banks of the Great Neva, opposite to the Admiralty and including an Asiatic museum, rich in all kinds of curiosities relating to the East—an Egyptian museum, with a few fine specimens of papyrus, but not otherwise interesting; an ethnographic museum, enriched by the collections of various Russian travellers and navigators, and a general collection of coins and medals, in which the Russian series is very valuable and complete; a good mineralogical, and a remarkably fine botanical collection; a museum of natural history containing an admirable collection of birds, exquisitely stuffed and well arranged, and among the larger fossil animals of which Siberia furnishes numerous specimens, a mammoth perfect, with the exception of one of the hind feet, 18 ft. long, exclusive of the trunk and at least 2 ft. higher than the elephant. The Academy of Fine Arts, also situated in the Vasilievskoye, on the banks of the Great Neva, has a portion of its magnificent apartments occupied as a picture-gallery; but is better known as an artistic school. A much more extensive and celebrated gallery is that of the Hermitage Palace, which occupies 41 rooms and contains splendid specimens of almost all the great masters. Two separate rooms are filled with an extraordinary collection of jewels, amethysts, pearls, snuff-boxes, ivory carvings, &c., and in the rooms more especially appropriated to pictures may be seen exquisite specimens of malachite and violet jasper, in the form of vases, candelabras, &c. The other more important collections are the Basmoff Museum containing a large collection of minerals, models and antiquities; and the museum attached to the Mining School, containing a large collection of fossil conchology, models of mines, mining instruments, &c., but distinguished particularly by its mineralogical treasures, unequalled in Russia, and thought not to be surpassed anywhere.

Educational Institutions.—At the head of these is the University only founded in 1819, but provided with 68 professors, and attended by about 500 students. The Chirurgical Medical Academy, founded by Peter the Great, receives about 600 pupils, and enjoys a high reputation. Military education, in all its branches, regarded as one of the first interests of the state, forms a conspicuous feature in the educational system of Russia, and is provided for liberally in

ST. ISAAC'S SQUARE AND SENATE HOUSE, ST. PETERSBURG.—From Dumbell, Vopys
Photography in Russia, &c.

the extensive dockyards, and in the immediate vicinity are a number of important public buildings, among others, the Holy Synod, where all the higher concerns of the church are regulated, the Hotel de l'Est Major or head department of the army, adorned with a triumphal chariot and the War-office, conspicuous by its profusion of gigantic columns. On the opposite side of the Great Neva, stands the Exchange, and W. from it, fronting the Little Neva, the Custom-house, both large and imposing structures. Immediately adjoining are two high and slender towers, adorned like the Columns

numerous institutions. The Mining School, whose admirable mineralogical collections have already been referred to, is one of the most remarkable establishments of the capital. It occupies a grand and imposing structure, so situated as to form a very conspicuous object from the sea, and maintains above 300 pupils, who, after remaining eight years, and receiving a very liberal education, are sent to superintend the Government mines, or placed in the Mint. The Academy of Fine Arts has a school, fronting the Neva, 400 ft. long, and 70 ft. high, adorned with columns and pilasters, and surmounted by a central cupola, on which a colossal Minerva sits. This academy is already mentioned, is partly appropriated as a picture-gallery, but also occupied as a school of art, in which 300 pupils are maintained and educated. In addition to these, it furnishes residences to the professors, academicians, and other artists, so that the whole number of persons accommodated under its roof is estimated at not less than 1000. The other principal schools are, the Technological Institute, in which 215 pupils, men of respectable tradesmen, receive a general education, and special instruction in the various mechanical arts, cotton-spinning, weaving, carpentry, &c. the Central Polytechnical Institute or normal school, two gymnasia; the Female Institute of Smolnoi where 500 young ladies are carefully and gratuitously educated; the Ecclesiastical Academy the principal Protestant, the agricultural, commercial, veterinary, and various other schools.

Sciences.—This only one of these which can be said to have acquired a European reputation is the Imperial Academy of Sciences, which has long been distinguished for the valuable papers published in its *Transactions*. Most of them, however, are not the production of native talent, but of such celebrated foreigners as the government has had the wisdom to attract by the liberality of its patronage. Numerous other societies of repute exist, under the names of Russian imperial medical pharmaceutical mineralogical, economical agricultural, educational military, philanthropic, and artistic.

Hospitals, &c.—Of these, by far the richest and most splendid are perhaps to be seen in the least beautiful in the Vostokhinskiy Dvori or foundling hospital. It is situated close to the Fontanka Canal in the best part of the town; has the air of a palace and, with its courts, gardens, and dependencies, covers a space of 28 acres. It was founded by Catherine II. The number of children received at first did not exceed 300 but has increased so rapidly that the number of annual admissions now exceeds 7000. No question is asked of those who bring them, but the simple one, whether or not the child has been baptized. The mortality is very great but, in consequence of the constant influx, the number of children of all ages, under the charge of the institution, exceeds 25,000. The largest ordinary civil hospital of St. Petersburg is the Obukhovskii, situated on the Fontanka Canal; it receives all applicants, but makes a small charge on those able to pay it. The military hospital is capable of containing 3000 patients. Various other hospitals are found in different quarters of the town.

Theatres, and Places of Amusement.—In addition to the theatre of the Hermitage, there are three of large dimensions—the Bolshoi or Great Theatre; the Alexander Theatre, and the French Theatre. The three, as well as all similar establishments, are under the immediate management, and kept up at the sole expense of the Government. The passion of the Russians for scenic amusement is strong, and hence the attendance is usually full. Besides these theatres, there is a large wooden one in the island of Kammenoi, open only in summer. On the same island, and some other smaller islands adjacent, besides the numerous villas to which the greater part of the families who can afford it retire to spend the summer, are public gardens, with coffee-houses and taverns, swinging-yolks, Russian mountains, and other national amusements, which, on holidays, attract crowds of citizens, and afford the best opportunities of seeing Russian life in many of its most characteristic forms, and without disguise. In other quarters, however, and nearer the city or within it, the more noisy and frivolous amusements are excluded, and the gardens are laid out so as to furnish admirable promenades, or even serve a higher purpose. Of the latter description is the admirable Botanical Garden of the Aptekarskii Island, which is open to the public on holidays, and is one of the most interesting sights of the capital; but, at a mere

promenade, the Summer Garden takes precedence of all others. They are situated close to the Trinitof Bridge, and though not very extensive, being only $\frac{1}{2}$ m. long, by $\frac{1}{4}$ m. broad, they form the great lounge of the population. Among the festivities which take place here the most extraordinary is that of Whit-Monday when a fair, which both bears the name and has the reality of a *gift-market* or *bride-show*, is held, the sons and daughters of the tradesmen assembling in their best attire to fix their partners for life. The whole affair seems so odd, that one cannot help feeling somewhat incredulous; but Erasmus, who witnessed it, gives the following description:—The marriageable girls, decked with Oriental profusion of ornament, are ranged along the alleys of the garden, with some members of their respective families and the swank or match-makers behind them. The men, passing along are at liberty to enter into conversation with any of the girls, and the acquaintance thus commenced often terminates in marriage.

Public Monuments.—Two of these are particularly deserving of notice. The one is the equestrian statue of Peter the Great, by Falconet, and the other the column by Montfard erected in honour of the late emperor Alexander. The statue, situated near the S. extremity of the Isaac bridge, facing the Neva, represents the emperor with head uncovered, and encircled by laurel, in the act of mounting a precipice, one hand holding the reins, while the other is calmly outstretched as in the act of benediction. The composition of the Caracaras statue with the very impetuosity of the horse, which stands on its hind legs springing forward while a serpent lies trodden beneath its feet. The pedestal a granite block, brought from a Finnish village 2 m. from St. Petersburg, and originally 45 ft. long 30 ft. high, and 25 ft. wide, was unfortunately broken in the cutting, and so much diminished, that it now forms two jointed blocks, 35 ft. long, 20 ft. broad, and only 14 ft. high. The height of the emperor's figure is 11 ft., and that of the horse 17 ft. The brevity and simplicity of the inscription in Russian and Latin harmonizes with the spirit of the statue.—*Petrus Magnus, Caesaris Virovici.*—*Petrus Primus, Catharina Secunda.*—*ANNO MDCCCXXXI.* The column stands in the open space between the Ritz Major and the Winter Palace, and is the greatest monument of modern times. It consists of a single shaft of red granite upwards of 80 ft. high, and computed to weigh nearly 400 tons, placed on a pedestal composed of an enormous block of the same red granite, about 35 ft. each way, and surmounted by a capital formed of Turkish cannon, above which the statue of an angel 14 ft. and of a cross 7 ft. are placed. The height of the whole is 150 ft.

Residence and Markets.—These are remarkable enough in themselves to justify a separate notice, and derive particular interest from the insight which they give into the Russian mode of doing business. The principal one, to be found in almost all Russian towns of importance, takes the name of *Gostinnii Dvor*, or *Merchants' Inn*. That of St. Petersburg has one of its four sides in the Nevskii Prospekt, and is of irregular form, the longest being 1300 ft., and the shortest not more than 250 ft. A colonnade, of the height of the first story, goes round the building, and has a flat roof from which, as the pavement, access is obtained to the magazines above. The court within is intersected by lanes and alleys, and partitioned off into many hundred compartments, in which every variety of merchandise is displayed, but with this peculiarity, that each separate quarter has its particular class of goods, and hence, according to its class, takes the name of Iron Row or Feltrow Row, or Book Row, &c. It has been estimated that in the Gostinnii Dvor, and dependent buildings, the number of dealers cannot be much less than 10,000. The most of them are men in blue coats and blue caps, with black hair and brown hands, who keep up the approach of customers, and impervious to the purchase. There are two other principal houses, called the *Apreshin Block* and the *Tchukhla Dvor*, containing about 5000 booths, tents, and stalls, but though, in some respects, even more characteristic than the Gostinnii Dvor, they resemble it so much, in arrangement and general features, as to make a separate description unnecessary.

Manufactures and Trade.—Several of the most important manufacturing of St. Petersburg belong to the Government, which they interfere with least; not so much, it is said, for the profits which it yields—though these, especially when meta-

police exist, are very considerable—but for the purpose of furnishing model establishments by which all other parts of the empire may be instructed. One of the oldest and most splendid of the Government factories is the Spalerno where Gobelin tapestry and carpets are made; the latter partly for sale, but the former only for the furnishing of the Imperial palaces or for presents. Other important Government factories, celebrated either for their magnitude or the excellence of the articles produced in them, are those for the manufacture of playing cards, a monopoly at which 3000 hands are employed; porcelain, where the fine vases presented by the Emperor to foreign princes are made, and many objects of great value and beauty are exposed for sale, and plate and cut glass. The Government has also a very extensive cotton-factory, and iron-foundry chiefly for casting cannon and other ordnance. Several of these establishments are rivalled by those of private individuals, the most of whom are British. The principal articles, in addition to those already mentioned, are woollen, silk and linen tissues, carriages, leather, and articles in leather, paper, mathematics, and musical instruments, wax and tallow, cartage, soap, tobacco, cabinet work, jewellery, watches, and various articles in gold, silver, mixed metals and bronze. Ship-building also, is carried on to a great extent for the navy, in the public dock yards and for commercial purposes at several private yards. The shallowness of the river and the bar at its mouth, not admitting the passage of vessels which draw more than 9 ft. water might seem, at first sight to oppose an insurmountable obstacle to the building of ships of the line, but the advantages of being able to carry on the more important parts of naval architecture within the capital under the immediate eye of the Government are so great, that large sacrifices are made for the purpose, and the hulls, when finished are floated down, by means of canals, and other ingenious and laborious contrivances, and the other equipments transmitted by lighters to Cronstadt, where the ships are finally fitted out for sea. In 1863 there entered the port of St. Petersburg 2384 vessels—aggregate tonnage, 460,000 and there cleared, 2201—aggregate tonnage, 441,890. The shallowness of the river, and consequent want of a good harbour in the capital is a serious hindrance to trade. Other advantages however compensate for this defect. With exception of Riga, there is no other proper port by which Russia is accessible on the W while the system of inland navigation by rivers and canals, is so complete and extensive as to give uninterrupted communication with the Black and the Caspian seas. The trade accordingly is of vast extent. The principal exports (value £3,429,016 in 1863) are tallow, hemp, and flax, metals, grain, hempseed, linseed, timber, vegetable oils, hides, leather, furs, skins, polish, tar, bristles, waxes, and coarse linen cordage, wax, currier, salmagundi, &c. The imports (value £11,864,488 in 1863) consist of mineral produce, raw cotton, cotton yarn, cotton stuffs, fine linen, woollen and silk goods, hardware, dyes, lead, tin, coal, wines, &c. A very large share of this extensive trade is engrossed by the British.

St. Petersburg, having been founded by Peter the Great, in the beginning of the 18th century, is entirely modern, and has nothing so remarkable in its history as the rapidity with which, in spite of natural disadvantages, it has advanced to its present magnitude and magnificence. Instead of being situated in the heart of a beautiful and fertile district, the whole country around, when not forest or swamp, consists of morass and waste, or of poor arable land, from which the utmost exertions of industry fail to procure grateful returns, while the city itself is so low that whenever at the time when the volume of the river is augmented by melting snow and ice, a strong wind sets in from the S.W. as to retard its current, inundation, to a greater or less extent, almost invariably lays part of the lower streets under water, and has sometimes risen to such a height as to cause fearful calamities. In one of these inundations, which happened in 1824, and the height of which is indicated by marks upon the houses, above 16,000 persons are said to have perished. One great evil inseparable from this swampy alluvial site is the want of a solid foundation for the buildings. Water is found a few feet below the surface, and continued digging never succeeds in getting beyond a bed of mud. The consequence is, that all the houses must be built on piles, and an enormous expense incurred before they begin to appear above the

Vol. II

surface. Peter the Great, however, was not the man to be daunted by ordinary difficulties. Even in his infancy, St. Petersburg not only received the name, but secured the appearance of a great capital. Its progress was not very rapid under his immediate successors, who were disposed to give Moscow the preference, but his later descendants, counting it an honor to follow in his steps have carried on their embellishments on a scale of almost unexampled magnificence, and none of the oldest and proudest of European cities have much to boast of when brought into comparison with St. Petersburg. Pop. (1858) 527,841.

PETERSDORF — A vil. Novavia. circle Olintha; with a mill. Pop. 1181 — 3 A vil. Austria, Silesia, circle Troppau, with a parish church. Pop. 1376.

PETERSDORF vulgarly Prazdnok, a tu. Prussia, Silesia gov. and S.W. Legnitz with a church numerous mills and bleachfields and a trade in timber. Pop. 3015.

PETERSFIELD a pari bar England co. Hants, 33 m. E. N. E. Southampton with a fine equestrian statue of William III. a town hall, a church, an Independent chapel, a college for boarding and educating, and a national school. It sends a member to Parliament. Pop. 6550.

PETEUSHAGEN a tu. Prussia, Westphalia, gov. and 6 m. N. N. E. Muelen, L. bank Weser with a Protestant church a castle, and normal school manufactures of linen and tobacco and an active fishery. Pop. 8004.

PETERSHAM par Eng. Surrey 680 ac. I. 668.

PETERSHAM a vil. and township, L. States, Massachusetts, at the source of the West Brook near its confluence with the Swift, 60 m. W. by N. Boston. It has a Baptist and two Congregational churches, several schools, two taverns and a number of saw and flour mills. P. 1850, 1527.

PETTELSTHAL a vil. Baden circle Middle Rhine, bail and 9 E. Oberkreuz with a chalybeate spring and a bathing establishment, which is much frequented. Pop. 1510.

PETTERSTON — I A par Eng. Monmouth, 8284 ac. P. 151 — 2 A par-Edgh. par Wales Glamorg. 8010 ac. I. 222.

PETTERSTON par Eng. Lancashire, 1544 ac. P. 276.

PETTERSTON a vil. Baden circle Leinhardt on the frontiers of Saxony 21 m. S. E. Dresden with a church, manufactures of spoons and five mills. Pop. 2390.

PETTERSTON (Mittel) a tu. Prussia, Silesia, gov. and S.W. Breslau with a castle, two churches, saw-works, and saw and other mills. Pop. 2364.

PETTERSTON par Eng. Devon, 3500 ac. P. 561.

PETTERSTON a market in Hungary. Higher Theres 10 Heves 15 m. N. W. Erlau with a church an elegant chateau, and some trade in corn and wine. Pop. 1680.

PETTERSTON (Ladin) Petterstons, a tu. Austria, Slavonia, my regimental district of same name 45 m. N. W. Belgrade. It stands partly on a steep rock and partly on a flat below and is the strongest fortress on the Danube. Opposite to it is the town of Nussau with which it communicates by a bridge of boats. The fortifications are extensive and contain barracks for a garrison of 10,000 men, but the town itself is very small. It has a church, four churches a military hospital, an arsenal an gymnasium, and three normal schools and a trade in wine and fruit. Extensive marshes in the neighbourhood make the air unhealthy. A great victory was gained here in 1716 over the Turks by Prince Eugene. Pop. exclusive of garrison 4083. — The district forms an irregular belt of land, about 100 m. long but on an average not more than 30 m. broad; and consists generally of an extensive marshy flat bounded by the Danube on the N. E. and E. and the Save on the S. The only product deserving of notice is the wine of Carlowitz. Area. 245 sq. m. Pop. 167,800.

PETHAM par Eng. Kent 3255 ac. P. 630.

PETHERICK (Larzel) par Eng. Cornwall, 1215 ac. Pop. 235.

Taunton has a handsome church, with a lofty tower and an endowed school for twenty boys. Area. 10,885 ac. Pop. 3845.

PETHREWIN, two pars. Eng. —1, (Jard), Devon; 8187 sq. m. 54° 42', (Sewell) Devon; 1884 sq. m. 53° 54'.
PETICOMAC, a town, New Brunswick. See **COMBAC**.
PETINA, a village, prov. Francisco-Ordo, S. E. Caucasus, at the foot of Mount Albanus. Pop. 1500.

PETIT BORDAUX, a vill. and com. France, dep. Haute-Loire, div. Fagnancy 5 m. from Bessèze in a valley of its own name. It has a church, a mass of lignite, and a trade in cattle, butter, cheese, charcoal, and articles of wood. Will. Fichet, a professor in the University of Paris, by whose care the first printing-press in that capital was established, was born here. Pop. 3260.

PETIT CACAT, a seaport tn. and dist., W. Indies, Isl. Guadeloupe, on a bay of same name, W. coast Grande Terre, about 9 m. N. E. Pointe-à-Pitre. It has a considerable export of sugar and the district feeds a great number of cattle. Pop. 6990.

PETIT KASHMIR a vill. and com. Belgium, prov. Hainaut, 17 m. N. E. Mons; with manufactures of lace, a brewery, an oil, and two flour mills. Pop. 2109.

PETIT RACON, a vill. and com. Belgium, prov. and 12 m. E. Lodz; with extensive manufactures of woollen cloth, numerous dye-works, a brewery two brick works, and hardware and pavement quarries. Pop. 1651.

PETLAUD a large town in Hindostan prov. Gujarat 15 m. N. by E. Cambay lat. 22° 58' N. lon. 72° 57' E. with a good stone rampart.

PETROONE, a town in China, Manchouria, on bank Amur 75 m. N. W. Kirin-Ola, a place of banishment.

PETRA, a ruined city, formerly cap. of Arabia Petrea, to which it is supposed to have given its name in a narrow valley of the Wady Musa, surrounded by lofty and for the most part, precipitous mountains, about 110 m. S. S. E. Jerusalem. It is mentioned in Scripture (2 Kings xiv 7, Isaiah xvi 1) under the name of Sephar, was taken by Amarah king of Judah, who changed its name to Jekabael and from the notices of it by Strabo, Ptolemy, Josephus, and various Christian writers appears to have been a place of considerable extent and great magnificence, and to have at one time commanded a large share of the traffic of the East. It contains a number of remarkable excavations, and covers a large space with its ruins, but the only building actually standing though in an imperfect and dilapidated state, bears the name of Pharon's House, and seems to have been a palace. It is in the form of a square 34 yards each way. The river walls are nearly entire, and the E. one is surmounted by a handsome cornice. The front facing the N. was adorned with a colonnade, of which four pillars are still standing, and behind the colonnade is a piazza, from which three apartments are entered, one of them by a noble arch from 55 ft. to 40 ft. high.

PETRA a tn. Spain, Isl. Majorca, 6 m. from Palma with a courthouse several schools, two churches, an oil and numerous corn mills and a brandy distillery. Pop. 2669.

PETRALIA SOTTANA, a tn. Sicily prov. and 8 E. Palermo, near it are bituminous schist, iron pyrites, asphalt, and petroleum. 1 op. 6490.

PFEDDERBREIM, a tn. Hesse-Darmstadt, circle Rhein-essen, 4 m. W. N. W. Worms. It is walled, has a court of justice, three churches a ruinous old castle, and several mills. Pop. 2031

PFEFFERS, **Präfixen**, or **Präfixen**, a tn. and par Switzerland, cant. and 81 m. E. St. Gall. It lies between the lakes, situated in the vale of the Tamina, about 4 m. above the village, in what has been described as one of the most extraordinary spots, even in Switzerland. The baths are situated on a narrow ledge of rock a few feet above the impetuous torrent, and the buildings which form them, consisting of two piles connected by a chapel are so deeply sunk between the rocks that the sun, in the longest summer day, is visible above them only from ten to four o'clock. From 100 to 800 patients can be received at a time. The spring has a temperature of 85° Fah. and the baths which are vapour are 12 or 14 shallow wooden pans, each large enough to allow several patients to take them simultaneously. Their great efficacy is undeniable, but is not easily explained, as a pint of the water contains scarcely three grains of saline particles. The spring generally ceases to flow in winter but continues from spring to autumn. The water has little taste or smell, and is drunk as well as used in baths. A little farther up the stream is the ancient Benedictine abbey of Pfäfers only recently suppressed. It is a vast edifice, built in 1605 in place of another destroyed by fire, and is much more remarkable for its splendid site than for its architecture.

PFEFFIKON and **Präfixen** a vil. and par cant. and 11 m. E. Zurich, at the extremity of lake of same name. It has two small spinning-mills. Pop. 8011

PFORTE, or **BONNENFÖRTE**, a vil. Prussia, prov. Saxony gov. and 16 m. S. W. Merseburg, on the Little Saale, with a parish church and a celebrated school, at which from 180 to 190 scholars are maintained and educated gratuitously.

PFORZHEIM a tn. Baden, circle Middle Rhine, at the confluence of the Enz and Nagold, 15 m. S. E. Karlsruhe. It is walled, has a castle and castle church, a high school, deaf and dumb institution hospital, and several other charitable establishments manufactures of woollen and linen cloth, ordinary and morocco leather, trinkets chemical products copper and iron ware, and several spinning, oil saw, and other mills. Haulchen one of the most distinguished precursors of the Reformation was born here. Pop. 7200

PFREIMD, a tn. Bavaria, Oberpfalz, 50 m. E. Nürnberg; with three churches, a castle Franconian almshouse, infirmary and Latin school a mirror-polishing establishment, and a trade in cattle. Pop. 1592

PHULLYNDORF a tn. Baden, Lake circle, on a hill above the Gellbach, 19 m. N. Constance. It was once an imperial town, governed by its own counts but was almost destroyed in the Thirty Years War. It contains an hospital, and has some manufactures and trade. Pop. 1700

PHULLINGEN a tn. in Württemberg circle Schwarzwald 4 m. S. Stuttgart, with manufactures of hosiery, paper-mills, and a trade in fruit and cattle. Pop. 4017

PHULDS, a vil. Austria, Tyrol, circle and 23 m. S. S. W. Innsbruck, in apposite to Stibben with which it is connected by a bridge at the entrance of the famous pass of Fieschertal. It has a church and an hospital. Pop. 1319.

PFUNGSTADT a tn. Hesse-Darmstadt prov. Starkenburg, 8 m. from Bensheim well built, with a church, a synagogue, and numerous mills. Pop. 3038

PHYV a vil. and par Switzerland cant. Thurgau, on the Thur, here crossed by a handsome bridge, 10 m. S. W. Constance. It stands on a lofty eminence, in a fertile district has a church, which is used in common by Protestants and R. Catholics and an old castle. Pop. 1006

PHALSBURG (mo. *Zeichelsheim*) a tn. France, dep. Meurthe, 12 m. E. N. E. Sarrebourg, strongly fortified by Vauban and commanding the passes of the Voeges. It has a large and richly-decorated church of the reign of Louis XIV., a handsome townhouse, communal college, formerly a Cistercian convent; a barracks, extensive arsenals, and manufactures of brandy, liquors, bricks, tiles, &c., and a trade in grain, wood, wine, cattle, and building-stone. Pop. 2512

PHARI or **PARMORA**, a fortress, Tibet, towards the British border, lat. $29^{\circ} 45'$ N. lon. $80^{\circ} 14'$ E. It is an irregular stone building, famed of great strength by the natives.

PHILADELPHIA, Ohio. See **PERSEPOLIS**.

PHILADELPHIA, a to. Turkey in Europe. See **PERSEPOLIS**.

PHILADELPHIA, a vill. Greece. See **PERSEPOLIS**.

PHILADELPHIA, Turkey in Asia. See **PERSEPOLIS**.

PHILADELPHIA, a city U. States, Pennsylvania, next to New York the largest city in the American Union, 125 m. N. E. Washington, 40 m. S. E. New York, on the E. bank Schuylkill, on the W., and on the bank Delaware, on the E., 5 m. above their confluence lat. (Statehouse) $39^{\circ} 57'$ N. lon. $75^{\circ} 50'$ W. (a). The river, bending towards each other approach till not more than 2 m. asunder, and form a neck of land rising gradually from either bank to the height of about 64 ft. above ordinary high-water mark. The city is built on this neck of land, stretching continuously over the whole space between the river, and to a considerable distance N. and S. particularly along the Delaware, so as to have a total perimeter of about 9 m. It consists of the city proper and of several districts or suburbs, which nearly equal it in extent, and are immediately contiguous to it, though placed under different municipal jurisdiction. Both city and suburbs are remarkable for the regularity and uniformity of their structure. The city in particular consists of a parallelogram formed almost with mathematical exactness, except on the E. and W. sides, where the streets facing the river have been allowed to deviate a little in following the line of their banks, and in laid-out in long lines of streets cutting each other at right angles, and running as nearly as possible in the direction of the cardinal points either E. and W. or N. and S. The whole area is thus subdivided into a great number of isolated blocks, so uniform in appearance as to produce somewhat of a monotonous effect, and occasion considerable perplexity to a stranger from the want of distinctive features to mark out the different localities. The two principal streets, Broad Street and Market Street, meeting a little W. of the centre of the city cut it longitudinally and transversely into four nearly equal sections. The former running N. and S., is 150 ft. the latter extending E. and W. from river to river 100 ft. wide. With the exception of Broad Street and Market Street, already noticed, Mulberry or Arch Street 66 ft. and the two Front Streets, each 60 ft. wide, all the other principal streets have a uniform width of 50 ft. Some of the blocks made by the intersection of the streets, instead of being built upon, have been formed into squares. Among others may be mentioned Independence Square, laid out in shady walks and grass plots Washington Square, affording an elegant promenade Frank In Square, with a magnificent fountain in its centre and Penn Square. Many of the streets are well planted with rows of trees, and all of them are well paved well cleaned by an excellent system of sewerage, for which the gradual slope to the river affords great facilities well lighted with gas, and abundantly supplied with water raised from the Schuylkill at Fairmount by powerful and ingeniously-contrived water-wheels. The houses are substantial buildings, chiefly of brick, and generally with few pretensions to elegance of architecture but from the splendours of white marble obtained in the neighbouring counties of Montgomery and Chester, many of them are approached by flights of steps and rest on basements of the material. The different colours of the basement and superstructure thus form a pleasing contrast, the effect of which is heightened by outer railings, often topped with brass.

The public buildings for the most part either constructed throughout or faced with the beautiful white marble already mentioned, are generally handsome, and do not suffer by comparison with those of any other city in the Union. The first notice is the more however on account of its venerable anti-

quity and historical recollections than its architectural merit, to the Statehouse, in which the Declaration of Independence was framed and signed. Independence Hall, which has been carefully preserved without any alteration of its appearance at the time when the founders of American freedom sat in it, contains a statue of Washington, which, though only of wood, is said to be an excellent likeness. The Custom-house, built originally for the U. States Bank, is a beautiful Grecian structure, modelled on that of the Parthenon at Athens, entered through a fine Doric portico of eight marble columns, 43 ft. in diameter and 37 ft. high. For outline and proportions, few edifices of the city can vie with those of the bank. The Pennsylvania Bank, built of white marble has, on each front, a portico of six Ionic columns. The General Bank is covered with a marble front, and adorned with a Corinthian portico; and the Bank of North America, deserving of notice as the first institution of its kind in the U. States, has lately erected new premises, conspicuous both for the taste and elegance displayed in their architecture. The U. States Mint has two Ionic fronts, each 123 ft. long and adorned with Ionic porticoes. The Merchants Exchange is distinguished by a semi-

MEERCHANTS EXCHANGE, PHILADELPHIA. — From a Lithograph after A. G. KILMER.

circular portico on its E. front, and an imposing Corinthian colonnade rising from an elevated basement. The Eastern Penitentiary, in the N. W. corner of the city, occupies a square of 16 acres, surrounded by a wall 80 ft. high with turrets at its angles, and is built on what has been called the Egyptian principle, the different cells so radiating from an octagonal tower in the centre, that the sentinel placed there has them all at once within his view. The U. States Navy yard, in the S. E. quarter of the city, incloses an area of about 12 acres, fronting the Delaware, and in it some of the largest ships of the Union have been built and fitted out.

The churches of the different denominations number above 100, of which 28 are Methodist, 27 Episcopal, 25 Presbyterian, 16 Baptist, 13 R. Catholic, 7 Friends, 5 Lutheran, 4 Reformed Presbyterian, 4 Associate Presbyterian and the remainder miscellaneous. Among these are 12 exclusively appropriated to coloured persons. The Jews have three synagogues. Several of the churches stand out as prominent ornaments of the city, but the far greater number are devoid of towers or steeples or any other features to distinguish them from the other buildings. Among others, notice is due to the Episcopal church of St. Stephen, a fine specimen of Gothic, and ornamented by two octagonal towers. Christ Church, also Episcopal, the oldest church in Philadelphia, having been founded in 1691, and conspicuous by its spire, 195 ft. high, containing a chime of bells. St. John's, R. Catholic, a Gothic structure, flanked at each of its front corners with square towers; the First Presbyterian, said to be modelled on a Grecian temple, and entered by a portico of six Ionic columns and the Fifth Presbyterian, distinguished for the beauty of its architecture.

Among the educational and literary establishments are the

University, occupying two handsome edifices, enclosed by open grounds, and comprising three departments—the academic, collegiate, and medical—the last the oldest and largest in the Union, having an attendance of 400 to 500 students. Jefferson Medical College, Pennsylvania Medical College, and Howard College for orphans, named after its founder who left funds so ample that he directed half a million sterling, or more if necessary, to be expended on the buildings alone, but coupled the bequest with the very singular restriction that no ecclesiastic, missionary, or minister should hold any appointment in the college, or be admitted for any purpose or as a visitor within its premises. The directions as to the buildings have been fulfilled both in the latter and the spirit, and the grand central edifice, or the college properly so called, and the side edifices, where the teachers and pupils reside, form together by far the most magnificent establishment for instruction of which the Union can boast. The restriction presented a greater difficulty, because it seemed to intimate an intention on the part of the founder to exclude the objects of his beneficence from the privilege of religious instruction and to train them up in a kind of practical heathenism. The difficulty has been happily surmounted by an ingenious interpretation of another part of the deed, which directs that pains shall be taken to instill into the minds of the scholars the purest principles of morality. From this it has been inferred that he could not have intended to exclude the use of the Bible, where alone the purest morality can be learned or a general course of religious instruction, by which alone the practice of pure morality can be successfully enforced and hence the directors of the institution have felt themselves justified in bidding the president to have family worship morning and evening and to perform regular religious services twice every Sunday, either personally or by some competent layman. In addition to the colleges now mentioned, a comprehensive and efficient system of public education has been established the city and county of Philadelphia having for this purpose been erected into a separate school district. This system includes a high school in which under a principal and 10 professors, a superior course of education is given, embracing ancient and modern languages, mathematics, science—natural, mental, moral, and political—drawing, &c. next grammar, next secondary, and last primary schools. In these schools there are about 400 female and 100 male teachers, and not less than 50,000 pupils, the whole maintained at an annual expense of not less than \$40,000. The principal literary and scientific associations are the American Philosophical Society possessing a valuable library of 20,000 vols., a cabinet of minerals, fossils and antiquities and has published several volumes of transactions the Academy of Natural Sciences, occupying a new and splendid hall and possessing a library of 19,000 vols., and a cabinet of natural history supposed to be the best in the U. States, and particularly rich in birds, of which the specimens are about 25,000 the Athenæum, which occupies a fine building in the Italian style, and has a library of 10,000 vols., the Historical Society of Pennsylvania, accommodated in the buildings of the Athenæum and the Franklin Institute, for the promotion of the mechanical arts. The largest and most valuable library of the city, founded in 1731 chiefly through the influence of Dr. Franklin, now contains above 60,000 vols.

Among the numerous benevolent institutions are the Pennsylvania Hospital, a spacious and well managed establishment, consisting of a centre and two wings, with a large and beautiful area, in which are placed the statues of William Penn has been placed the U. States Marine Hospital, occupying an extensive and elegant edifice of white marble, with a fine Ionic portico, and intended to provide for invalid officers and sailors of the navy, the Almshouse, a very large structure

of imposing appearance, situated within an enclosure of 16 acres, intended to provide for the poor of the city and adjoining districts, and containing on an average not less than 3000 inmates, the Institute for the Deaf and Dumb, the Institute for the Blind and many other humane establishments.

Manufactures are carried on to a large extent, and employ numerous industrial establishments—saw-mills, foundries, machine shops, woolen and cotton factories print and dye works, ropewalks, tanneries, distilleries, breweries, potteries, sugar-refineries, building-yards, &c. Other articles produced are cutlery and hardware, plate, and various articles in precious metals—brass and copper wire, glass, paints and drugs, furniture, books, including a great number of periodicals, newspapers, &c. Trade is still more extensive and continues to make rapid progress, in consequence of the admirable facilities already possessed or in course of development. In the Schuylkill and Delaware, it possesses the advantage of a double port the former for domestic or internal trade and the latter chiefly for foreign commerce. That of the Delaware, in particular the channel of which is here nearly 1 m wide, admits vessels of the largest size directly from the coast, though at the distance of 120 m. The facilities internal communication, three bridges span the Schuylkill—one a handsome suspension bridge, among the first of the kind erected within the Union, another a wooden bridge 1550 ft. long and a third, which in magnificence of structure far surpasses the others, and is so spacious as to serve both for a railway and an ordinary thoroughfare. This railway is only one of a number by which Philadelphia has been brought into immediate communication with the most important cities of the Union and made theemporium of a vast and increasing traffic, chiefly with the S. W. and N. W. The exports in 1852 consisting chiefly of wheat and Indian corn in flour and grain, beef, pork, hams and other provisions, lead from manufactures, woolen manufactures, candles, tallow, whale and sperm oil, bark, cotton in bales, coal, tobacco, furniture, &c. amounted in value to nearly one million sterling, the imports in 1851 exceeded two and a half millions. In 1864 the number of vessels which arrived at the port was 618, of 138,938 tons and departed 506 of 158,738 tons.

Philadelphia was founded by William Penn in 1682, and laid out on a plan which, in its outline and divisions, is seen

ually the same as that which still exists. In this plan, he is said to have attempted to realize the idea he had formed of ancient Babylon. Owing to the wisdom of its founder, and his strict observance of equity in dealing with the native

Indiana, the city had comparatively few obstacles to struggle with, and was made in its site advantages of which few cities can equally boast, made rapid progress. One of the most fortunate events in its history was the selection of it for a residence by the celebrated Dr. Franklin, to whose practical wisdom and philanthropy it is indebted for many of its most important improvements. It made an important figure during the Revolutionary war, the Declaration of Rights having been adopted in it in 1774, and the Declaration of Independence passed from it in 1776. In 1777 it fell into the hands of the British, and remained in their possession for about nine months. In 1787 the Convention which arranged the Constitution of the U. S. met in it. In 1790, the first Congress under that Constitution, by selecting it for their place of meeting eventually made it the capital of the Union, which it continued to be considered till 1800, when it was supplanted by Washington. Pop. of Philadelphia (1880) 408,762.

PHILATES, a. in Turkey in Europa, Albania, 34 m. S. by E. Delvino, houses mostly separated from each other by gardens of vines, and regularly peered with locusts for masonry. The vicinity is fertile and produces much corn, oil, and tobacco. Pop. about 4000.

PHILIP ISLAND a British royal settlement S Pacific Ocean, S. from Norfolk Island lat. 29° 5' S. lon. 107° 47' E. (N.) of considerable height, and on the N and W very rugged, has few trees and these much cut by the S E winds.

PHILIP ISLANDS—1. Two small isls. Caroline, 5 m apart lat 8° 0' N lon 140° 32' E. They are nearly united by a long sandy spit above water they are low covered with shrubs, but few tall trees—2. A small isl., about 12 m. long and 8 m. broad. 34 m. from the landing place Sydney Bay. On its S. side is a remarkable peak.—3. An isl. Low Archipelago 32 m. long and 120 m. in circumference. It is low and incloses a lagoon. Its few inhabitants are of docile disposition. Lat (W point) 16° 27' S. lon 144 1 W

PHILIPPEVILLE a fortified tn. Belgium prov and 23 m. S.W. Mennin. Its barracks can accommodate at least 5000 men. It has a church a chapel a communal house, and an hospital manufactures of earthenware, quarries of marble, and saw mills both for marble and wood. Pop. 1165

PHILIPPEVILLE a. a seaport and recently-formed city Algeria, prov and 393 m. N. E. Constantine, near the ruins of the ancient Blunidia, at the head of the Bay of Stora. It is well laid out, has several spacious squares, and fine streets, a large military hospital with a handsome chapel a parish church, and a chamber of commerce, and a brisk trade. Pop. (1849) 7245 of whom 6058 were Europeans.

PHILIPPI a ruined an. European Turkey Macedonia in a plain 10 m S E Drama. It took its name from Philip

Augustus and Antony on the other and from his having afterwards become the scene of the execution and labors of the apostle Paul, who founded his church under the remarkable circumstances recorded in Acts xvi., and addressed one of his epistles to it. It is now a heap of ruins, of which the most remarkable are the remains of the Acropolis, crowning an isolated height, and consisting of three ruined towers, and considerable portions of walls and those of a kind of palace, the original splendor of which is attested by existing pilasters, and capitals of the finest white marble.

PHILIPPINES, or **PHILIPPINE ISLANDS**, an archipelago in the Pacific Ocean, of a triangular form N E of Borneo, saving W. the China Sea, E the N Pacific, and E. the Sea of Celebes; lat. 5° 32' to 19° 38' N., lon. 117° 21' to 128° 5' E. It consists of 40 islands of considerable size, and a large number of smaller ones. Of the former the chief are Luzon, Mindoro, Samar, Panay, Leyte, Zebu, Negros, Bohol, Misamis, and Palawan (which see). The shore-line and internal surface of the larger islands are extremely rugged and irregular. Their magnificent mountain ranges are clothed with a gigantic and ever-teeming vegetation, and between these the extensive slopes and plains of the interior fertility watered by numerous lakes and rivers, which afford abundant means of irrigation and transport. On the W. parts it rains from June to September but in October a change of wind transfers the rains to the E. parts. These rains are so intense as to make vast lakes of the low grounds, and to render the highways impassable. The heats are tempered by perpetual moisture, and by the alternations of the land and sea breezes. The climate on the whole is healthy. Earthquakes are frequent, and often very destructive.

Metaliferous mountains everywhere occur. Gold is procured in the sand of the rivers. Iron stone is found yielding 80 per cent of iron, and rich specimens of copper attest its presence. Among the numerous volcanoes, extinct or active abundance of sulphur is found. Coal exists in some spots, but is not worked to any extent. There are vast deposits of limestone and marble, and negro-producers of magnesian and alumin. The mountains are covered with gigantic timber. Among plants cultivated for use are the abaca (from which the fine-cloth (Bambusa bambusa), the calumpog-roots (Bambusa pumila) for their filaments, the cocon, and other palms, the cotton, coffee, and cacao-tree the sugar-cane, indigo, tobacco, and the tamarind. Cassia, clove, the wild nutmeg and the red and black pepper vines are found in Mindanao. Rice is raised in large quantities, both for home consumption and export. To these add maize, wheat, yams, the sweet potato, and a great variety of delicious fruits, oranges, lemons, &c.

The buffalo is employed in tillage, and as a beast of burden. Both it and the ox are found in a wild as well as domesticated state. The Philippines produce small but spirited horses, deer, hogs, goats, and sheep diminutive foxes and gnuelles several varieties of monkeys, wild cats, the *logus*, a kind of flying cat &c. The woods are full of game-cocks, pigeons, eagles, pelicans, herons, wild ducks, quails, and the smallest-sized falcon known.

The jungle swarms with humming birds, parrots, and the rhinoceros-like *manis* (On the shores are found the sea-swallow, whose nests are so prized by the Chinese as food. The lakes and rivers teem with crocodiles and fish. Fish, also, including crustaceans, are found in great variety in the seas and there is no lack of serpents, lizards, insects, and reptiles.

The natives are of diverse origin. Wild tribes, some of which are extremely ferocious, still haunt the mountains. The chief mountain tribes are the Negritos, diminutive negroes, who have given their name to the island Negros, though not confined to it, and the *Alus*, or *Ins*, a dusky or copper-colored race, which, like the Dyaks of Borneo, slay men for the sake of procuring their heads. But the great mass of the aborigines of Spain are divided into the Tagals, inhabiting Luzon, and the *Manilas*, who inhabit the other islands. These speak respectively the Tagal

RUINS AT PHILIPPOLIS.—From Capt. Scriver's, R. F. Sketches in Macedonia.

of Macedonia by whom it was fortified rose to be a place of considerable importance and possessed great historical interest, both from the memorable battle fought in its vicinity A.D. 42, between Brutus and Cassius on the one side, and

and Bataan tongues, each of which has a variety of dialects. The Tagalos are more addicted to agriculture than the Bataenos, who, like the Malays, are attached to a sea-life and fishing. Both Tagalos and Bataenos unite the indolence and the artistic ingenuity of the Hindoos, with the vindictiveness of the Malays and their passion for cow-slaying. The Chinese play an important part in the Philippines. Restricted to tillage by the law, their activity and address make them indispensable as mechanics, shopkeepers, and traders. They have civil regulations and a police of their own conform to the British church, celebrate with great magnificence the festival of their patron saint, St. Nicolas and being envied and hated by the Imlans, aid the Government in maintaining that balance of opposing interests to which mainly it looks for the support of its own institutions. Half-castes, Indo-European and Indo-Chinese, engross much of the business and wealth of the islands. The independent tribes are partly Mahometans and partly heathens. The subjects of Spain are professedly Roman Catholics, and under a hierarchy with the archbishop of Manila at its head.

The textile productions of the Philippines are 52 in number, from the delicate and costly *pinas* mullins, made from the pine-apple fibre and *asesame* made from it, mixed with the abaca filament to coarse cottons, stockings and the beautiful muslin made of the abaca and grommet palm fibres. Hats and cordage are manufactured to a considerable extent, and as a Government monopoly, sugars European art is successfully imitated by the natives in ship-building and coach building in the dressing and varnishing of leather, and in the manufacture of cordage. An extensive trade, which has increased rapidly since the dissolution of the Company of the Philippines in 1884 is carried on in exporting sugar, tobacco Manila hemp, indigo, coffee, birds'-nest, trepang eye-woods, hides, ratons, mother-of-pearl, gold dust, &c. and in importing manufactured cotton goods, muslin stores, wines and liquors, porcelain, cutlery, minerals, drugs, &c.

Luzon is distinguished as a grand division from all the other islands these being called Bisaya. All, however, are, together with the Mariana Islands, under the same central government at Manila. The whole Spanish dependencies are divided into 33 provinces, but some parts of these are only nominally subject to Spain. The provinces are divided into *provincias*, or townships.

The supreme civil and military government is in the hands of a governor-general appointed by the crown. Besides being commander-in-chief of the land and sea forces he is president of the supreme court of justice, vice-patron (that is, viceroy) and sub-delegate judge of criminals, posts and expenses. In the discharge of these functions he is assisted by ministers and justices with whom to advise or to whom he may delegate his powers. An alcalde mayor or corregidor is appointed directly by the crown for each of the provinces, as administrative, judicial and fiscal officer. The regulations for their conduct are excellent, but the execution bad. Each pueblo under a native *gobernadorcillo*, or mayor popularly elected and these again are assisted by inferior officers, chosen also from lists presented by the inhabitants. The Chinese and Chinese half-castes are allowed magistracies of their own. Both army and marine consist almost entirely of natives.

History.—The Philippines were discovered by Magellan in 1590, and after repeated expeditions, several of which proved disastrous, were finally annexed to the Spanish dominions, and named after Philip II. They were designed as a field rather of missionary than of commercial enterprise, at some, if possible, for the subjugation of enemies practised by the Spaniards in America. Hence, the religious orders have from the first had great influence in the establishment and institutions of the colony and to them the land chiefly belongs. In 1763 Manila was taken, and for a short time held by a British fleet. Since the loss of her occidental American possessions the Philippines are now of great importance to Spain and their production and trade are in a state of rapid development. The total population has been estimated at 5,000,000 but, from more accurate data, is found to be 3,979,800.—(Mallet's *Los Islas Filipinas*, M. Miching, Wilkes.)

PHILIPPOLIS, a vil. S. Africa, in the Griqua country, on a flat surrounded by remarkable hills of basalt. It consists of a single street of mud cottages, a Dutch missionary chapel built of stone, and a number of mat huts.

PHILIPPOPOLIS, or **PHILIP**, a town European Turkey, Roumetia, on an island formed by the Maritsa, 86 m. W. N. W. Adrianople. In 1818 it was almost totally destroyed by an earthquake, but it has since recovered through its trade and manufactures in silk cloth. Pop. 80,000.

PHILIPPOVA, a vil. Hungary, on Bacs 8 m. from Kala, with a church. The soil is strongly impregnated with sulphate. Pop. 1167.

PHILIPPSBURG, a town Baden drele Unterhein R. bank Rhine, in a marshy and unhealthy district, 16 m. N. Carlsruhe. Its fortifications, once strong were demolished in 1799 after a bombardment by the French. It contains a superior burgher school and has some trade in cattle and wool. Pop. 1840.

PHILIPPSBURG or **GRAND BARR**, a seaport town, W. India, cap. St. Martin one of the Leeward Islands on the Dutch portion, S. W. coast. It is a large place, with a good harbour, a considerable trade and three large ponds, where salt is manufactured for export.

PHILIPPI AND (St.), an isl. Holland in the N.E. corner of prov. Zealand. It is fertile contains a village of same name a church and a school. Pop. 654.

PHILIPPIAD or **FRITZBERG**, a town Sweden, ldn and 38 m. N.E. Carlsbad on a stream which flows out of Lake Lärmo Lake Duglas. It is a handsome church, and a trade in iron. Pop. 540.

PHILIPSTOWN three parts Ire. Lond. — J. 1038 & Pop. 418 — 2. 8890 & Pop. 1809 — 3. 2900 & Pop. 85.

PHILIPSTOWN a small market in Ireland King's co. on the Grand Canal 4½ m. W. by E. Dublin, with a hand some court-house and cavalry barracks the parish church of Kilderry, a R. Catholic chapel and two schools. P. 748.

PHIL LACK par Eng Cornwall 8387 & P. 4590.

PHILLEIGH or **FILLEY** par Eng Cornwall, 2393 & Pop. 446.

PHILIP (Durr) Australia. See MELBOURNE.

PHILOE, an isl. in the Nile Upper Egypt, above the first cataract, and near the confines of Nubia. 6 m. S. S. W. Assuan. It is of small extent, but contains some of the finest Egyptian architectural remains in existence, including four temples a long colonnaded avenue several obelisks, a Roman triumphal arch and many other remains of antiquity.

PHU-YANG or **LO YANG**, a lake, China, in the S. of prov. Kiangsu, about 80 m. long N. W. to S. E. by, about 92 m. broad. It receives the Kanhsong on the S., and discharges itself on the N. into the Yang-tse-Kiang. It is subject to violent storms.

PHOCÆA, a town Asiatic Turkey. See IROCHIA.

PHOCHIA or **PHOCHIA**, two nearly contiguous towns Asiatic Turkey Anatolia 28 in N. W. Smyrna. The one called Phochia Vachia is magnificent, but the other Phochia Nova is a place of some importance defended by a citadel and with pop. 4000.

PHOENIX, a group of small isls., S. Pacific Ocean lat. 3° 8' N. 171° 50' E. 174° 40' W. of coral formation.

PHOENIXVILLE, a town U. States Pennsylvania, in the valley of French Creek, at its junction with the Schuylkill, and on the Philadelphia and Reading Railway, 24 m. N. W. Philadelphia. It has a neat church an academy, and other schools several extensive manufactories, rolling mills, and cotton factories, &c. Pop. 8600.

PHOENIX, a town Hindoostan, principally Behawalpoor close to the Chinese frontier lat. 29° 11' N. lon. 78° 4' E. It is a good bazaar, but little trade. A fort with very high walls in great decay and an antique palace.

PHOONGA, or **PONGA**, a town Lower Siam at the S. extremity of a point of land N. of Junkieslay, lat. 6° 18' N., lon. 96° 25' E. The tin and other produce of the island just named are carried hence on elephants, and by the river Bandon to Chaiya in the Gulf of Siam and thence to Bangkok.

PHOUHIN, a town Siam W. shore Gulf of Siam, on the mouth of a broad and rapid river called the Thakhan, on the road from Ligor to Bangkok. It is famous for the excellence of its steel and iron. Pop. about 1200.

PHU YEN-TRAM or **PHOUYAN**, a town and harbour, dist. of same name, Annam, E. coast lat. 16° 28' N. lon. 109° E. A bank and near the mouth of a river. There are here three different anchorages for vessels and the harbour itself, on which the town is situated, is land-locked.

PHUKOK or KOK DUO, an isl. Gulf of Siam. See KOK DUO. See also PHUKOK.

PIACENZA, *prov. Piacenza, or Piacenza, French, Piacenza*, a town in Parma, cap. duchy of same name on a large and fertile plain, 7 bank Po, a little below the confluence of the Trebbia, and nearly equidistant from Parma and Milan being about 86 m WNW of the former and 87 m SE of the latter. It is fortified entered by five gates, and has three principal squares, and a large number of spacious, and many narrow winding gloomy and deserted-looking streets. Among the principal edifices are the cathedral, built in 1192 in the form of a Latin cross with a tasteful Gothic facade; Santa Antonina, the most ancient church of the town and once its cathedral; Santa Maria di Campagna, said to be after the designs of Bramante, crowned with a magnificent dome, and particularly rich in paintings; San Sisto, a beautiful and elegant church, once attached to a Cassinese monastery with a noble facade adorned with statues and a fine portico; the townhouse or Palazzo del Comune, generally regarded as one of the most magnificent structures of the kind in the 18th century though only about a fourth of the original design has been completed, and presenting a fine front crowned by turrets, and adorned with an arched and pillared portico, opposite to which in the Piazza de' Cavalli, are bronze colossal equestrian statues of dukes Ranuccio I and Alessandro Farnese the governor's house, or Palazzo del Governo the courthouse or Palazzo de' Tribunali a large irregular pile accommodating not only the civil and criminal appeal courts, but the law faculty and school of anatomy the custom-house, or Palazzo della Dogana the college of St. Peter in which a complete course of instruction in mathematics and natural philosophy is given and a library of 80 000 vols. is contained various other superior male and female educational institutions, primary and elementary schools an Episcopal seminary a large civil and military hospital occupying with other buildings the suppressed church of San Sepolcro which was designed by Bramante two orphan and foundling hospitals, numerous other charitable institutions, and two theatres. The main features consist of various descriptions of cotton, goods, leather articles in iron including various mathematical instruments sculptures in stone, and carvings in wood and there are also several silk and paper mills. The trade is chiefly confined to grain and cattle.

Piacenza is the see of a bishop, and the seat of a supreme court of appeal, a superior civil and criminal court, a court of commerce, two courts of primary resort and various public offices. Its origin is ascribed by some to the Etruscans, by others to the Gauls. In the year of Rome, 636 it became a Roman colony and the year after was rendered famous by the battle of Trebbia, fought in the vicinity between Hannibal and Sempronius. About 29 years after it was pillaged by the Gauls, but soon revived, and had been a large and flourishing city when the decline of the empire brought the northern hordes into Italy. After remaining long under their dominion, it became an independent republic in 1128. It lost its liberty in 1254 passed under the hands of various masters, among others the Germans under whom it followed the fortunes of Milan. After the battle of Marignano, in 1512 it became subject to the pope, one of whose Popes Pius III., bestowed it, along with Parma, on his grandson Pierluigi. Its subsequent history is properly identified with that of Parma. Among the distinguished natives of Piacenza, are Lucius Calpurnius Piso, father in law of Julius Caesar; pope Gregory X., Alessandro Farnese, Laurenceo Valla, and Pietro Follistrelli, a celebrated navigator and father-in-law of Columbus. P. 24,637

PIACENZA, *Latin Piacenza*, a vil. and com. Italy, Lombardy prov. and 17 m. N.E. Cremona, near v. bank Olona with a church the remains of an old castle; manufactures of leather, and a famous ropewalk factory. Seechi, or Piazze, the historian of the pope, was born here. Pop. 1485

PIAGGINE, a to Naples, prov. Principato-Città, 10 m. N.E. di Yalio, with two churches and a convent. P. 3042

PIAN CANTARINO DEI MONTI ANIARA, a to, and com. Toscana 11 m. from Arezzo, in E. wall of has a hand some church, an elegant castle, and a trade in timber and fruit, particularly chestnuts. Pop. 3668

PIAN di Non a vil. and com. Toscana, prov. Arezzo, in the upper valley of Arno, 5 m. E. Pignone with two churches and a considerable trade in corn, wine, and oil. Pop. 3685.

PIANA, a river Russia, rises near NW frontier gov. Simbirsk, flows W N W into gov. Nizhn Novgorod, then back S.E. to Simbirsk, passing the town of Bergsk, and joins L. bank Sura total course, 150 m.

PIANA, or PIANA DE GYEN in a Sicily prov. and 10 m S.W. Palermo, inhabited by a colony of Albanians, who took refuge here in the 16th century, and still retain their peculiar manners and religious forms. Pop. 4600.

PIANELLA, a to Naples, prov. Abruzzo-Ulteriore I, 7 m. S.E. Civita-di Furna, with an ancient cathedral two other churches, two convents, and a hospital. Pop. 1469

PIANELLO-CRANZANO [*anc. Pianello*], a vil. and com. Parma 15 m. S.W. Piacenza with a primary school, the remains of an old castle, and a trade in cattle; near it agates, jaspers, and other pebbles are found. Pop. 5328

PIANEZZA a vil. and com. Italy Piedmont, div. and 7 m. WNW Turin, L. bank Dora-Baltea, with a court of justice four churches a convent, and an old castle. P. 2141

PIANFILI a vil. and com. Italy Piedmont, div. Cuneo, prov. and about 10 m from Mondovì on the Fuso. It has a handsome church a public school manufactures of iron implements, and a silk mill. Pop. 1710

PIANO a vil. and com. Italy Lombardy prov. Bergamo, S. part of Val Camonica, L. bank Olona, with three churches. Near it much silk and inferior wine are produced and there are two iron mills, and an excellent millstone quarry. P. 4374

PIANOSA—1 An al Adriatic, belonging to Naples prov. Capitanata, N.E. of the Tarentine group, about 12 m off the shore in lat. 42 14 N. lon. 15 50 E. nearly 2 m long by 1/2 m. broad—2 [*anc. Plesaur*] An al Tuscany, Tyrrhenian Sea, S.W. of Elba about 10 m in extent. It is low but is fertile and well wooded and has marble quarries, which were worked by the Romans. Among other remains is a temple of granite Attyria, the nephew of Augustus, was banished here, and murdered by order of Tiberius.

PIANURA a to Naples, prov. and 4 m. W Naples. Near it excellent wine is produced, and much of the lava used in the building of Naples is quarried. Pop. 1190

PIASCO a vil. and com. Italy Piedmont, div. Cuneo, prov. and about 6 m from Saluzzo with two churches, a monastery a large feudal castle a public school, limestone quarries, and a trade in wine and chestnuts. Pop. 1870

PIASIVA a lake and river Siberia, gov. Yemskensk the lake, intersected by the parallel of 70° N. is about 70 m long N to S, with a central breadth of nearly 40 m. is fed chiefly by the Norilsk and discharges itself by the Piasura, which, averaging from its N. extremity flows alternately N and S into the Arctic Ocean, near lon. 90° E. total course about 280 m. Its principal affluents are the Dudinka, Agava and Pyma.

PIAUCHI a prov. Brazil, bounded N by the Atlantic E by Ceará and Pernambuco, S. L. Pernambuco and Goiás, and W Maranhão area, 109 668 sq. m. It has a coast-line of 70 m, and contains only one harbour and that very small, formed by the Barra-d' Iguaçu, the E. mouth of the Paranaíba. The surface, though partially broken by low hills, is generally flat, except toward the E. and S. frontiers, where the Serra do Dona Francisca rises to a considerable height. The principal, or rather only river is the Paranaíba, which during almost the whole of its course forms the boundary between this province and Maranhão. Towards its bed the surface has a general slope, and accordingly pours all its drainage into it by numerous tributaries the most important of which are the Uruguai the Gorgues Piauch, Canabá, Preti, and Longa. The climate is extremely warm. During the three hottest months of the year the streams and lakes are often laid completely dry. The surface, from its flatness, is well adapted for cultivation, and the soil is generally composed of alluvium is of great natural fertility. Where a deficiency of moisture is not experienced, as on the banks of the larger lakes and streams, tobacco rice, and the sugar-cane, are successfully cultivated, and even in those districts which suffer most from drought, the rainy season lasts long enough for the growth of millet, harvest, manioc, and cotton. The province is not so densely wooded as is common within the tropics, many of the extensive plains having only a covering of shrubs or verdure. The various species of palm, however, are tolerably abundant, and so much of timber for building and other ordinary purposes. Iron, alum-stones, copper, and saltpetre are abundant, the grounds containing the last are diffused

to that of the Adriatic, all the surface belongs. Besides rising within Piedmont, and winding circuitously across its centre, the Po receives within it on the right the Maira, Tanaro, Stura, and Susa, and on the left the Cuneo, Sangone, Dora-Rubia, Stura, Dora-Baltea, Sesia, Agogna, Tediogio and Ticino, with numerous minor streams. Two of these are of navigable importance; but, from the extensive and skillful use made of them for purposes of irrigation, it is almost impossible to overrate the advantages derived from them. In every quarter they are seen acting as an essential agent in the production of most important crops of wheat, maize, rice, beans, hemp, and hay. In all of these, after fully satisfying its own wants, it has a large surplus for export. Wine also is grown, and silk obtained in great abundance and vast numbers of cattle are reared both for fattening and the dairy. The most valuable minerals are iron and marble but there are also mines of argentiferous lead and copper. The manufactures consist of silk, woollen cotton, and flax twines, and there are great numbers of silk mills. The exports are chiefly grain, cattle, silk, linen, wine, wool and iron. The great body of the inhabitants profess the R. Catholic religion but the mountain districts have from time immemorial contained great numbers of Waldensians, attached to a purer faith and well-known throughout Europe for the great vigour with which they have been heated and the heroic patience with which they have endured. Piedmont is divided into four divisions—Turin the capital, Alessandria, Cuneo, and Novara. Pop. (1848) 2 134 165.

PIEDRA BUENA a vil. Spain, New Castle prov and 15 m. W Ciudad-Real with low, alt-bank houses, but regular and paved streets two squares a townhouse, parish church a grammar two primary schools and a hermitage manufactures of linen mattresses, oil mills, and charcoal. Near it are numerous quarries of granite, one of lime, and one of argilliferous sand. Pop. 2800.

PIEDRAS—1 A in Venezuela dep and bank Orinoco 71 m. W N Angostura. 2 A headland La Plata, W shore, estuary of La Plata, and 94 m. N E. Buenos Ayres.

PIELIS or **PIELIMARKKI** a lake, Russia, Finland, in the N E of curde Kuopio greatest length N W to S E about 70 m. greatest breadth about 15 m. It contains several large islands, and discharges itself by a stream of same name into Lake Oulava. The towns of Pielas and its S shore.

PIEMONTE 1. a. in Naples, prov and S E. Naples, with three churches and a convent. Pop. 1200.

PIENZA a walled b. in Tuscany in the Val di Oropa, prov and 24 m. S E. Siena. It is the see of a bishop and has a cathedral bishop's palace, the remains of an old castle, and a trade in corn and dairy produce, particularly cheese. P. 1308.

PIG ILLAND 2-1 An Isl. E Pacific Ocean, Lounaine Archipelago, lat 11° 30' N lon. 103° 15' E composed of small islets with frequent reefs of corals. The hills are highest of which is between 400 ft and 600 ft, although often running in ridges, have a rounded outline, and the soil on the smooth grassy places—comprising three-fourths of the island—is composed of disintegrated rock, mixed with pieces of undecomposed quartz. The grass is very luxuriant, without being rank. The natives are dark copper-coloured, the hair fringed out into a mop, in some instances of prodigious size the physiognomy much varied, some having a savage and ferocious aspect. Their spears are made of polished coco-nut wood, 5 ft. to 10 ft. long, sharp at each end, and nicely balanced. They are a dangerous race, and not to be trusted—(*Voyage of the Rattlesnake*).—2 See CHUANG ISLAND.

PIGHTLESTHORPE, par Eng. See PISTON

PIGNA, a vil and com. France dep Alpes Maritimes, div and 24 m. N E Nice. It has a parish church. P. 2775

PIGNAN a tn, France, dep Herault 6 m. W Montpellier, at the foot of a hill with several distilleries of brandy. Near it is a fine Gothic church, supposed to date earlier than the 12th century. Pop. 3001

PIADUS, a mountain chain European Turkey whist, breaking off nearly at right angles from the Tcherdagh, or Scordus, the W. part of the Balkan, stretches nearly due S. between Albania and Macedonia, and then S. E. through the W. part of Thessaly, where it may either be considered as terminating on the borders of Livadia, or as continued in a S. E. direction under the names of Parmanus, Halicæ, Othæon and other celebrated mountains to Cape Colonna.

Pindus thus defined, takes different names in proceeding from N. to S. Between the waters of the Black Drin and those of Karasus & Rion, the principal mountain of the chain is Kapsari Bora, and Kapsa Patria. Thence to the S. E. of the lake of Oriculus we have the mountains of Grammos and Ezeron, and still farther to the E. and S. E. the mountains of Monaro, to which some geographers give the name of the whole chain, probably because in Mount Metawo it attains its culminating point 8850 ft. The mountains of the chain

appear to consist chiefly of granite and calcareous rocks the former composing their nucleus, and appearing in their loftier summits to the latter lying chiefly along their sides and at their base. They are generally well wooded, and are understood to have valuable mineral deposits. The principal streams to which they give rise are the two Drins, Scomb, Benarion, and Volouca, which fall into the Adriatic, and the Calmasa, Arta, and Aspropotamos, which fall into the Ionian Sea.

PINEGA.—1 A river, Russia, rises in the N of gov Vologda, enters gov Archangel and pursuing a very circuitous course in the main N W, joins r bank Northern Dwina, S S E Kholmogorsky total course, about 300 m.—2 A vil Russia, gov Archangel L bank above river 98 m E S E Archangel, with a church. Pop. 300

PINEBOLO a to langd. of Italy, Piedmont, 21 m S W Turin, cap. prov of its name at the mouth of the valley of the Cissone. It is very irregularly built, but has several squares among which that called the Piazza d'Armi is conspicuous, and forms a finely planned walk. The principal buildings are the cathedral a modern structure of no great merit; the church of San Maurizio, an ancient Gothic edifice several monasteries and numerous, an episcopal seminary, a college and several other schools, an ordinary an orphan and a flourishing hospital a townhouse episcopal palace a theatre, and handsome infantry and cavalry barracks. The manufactures consist of woollen cloths, silks, iron-wares, steampers, vermucelli, liquors, and brandy, and the trade is chiefly in wine silk, hemp, paper wax, and wool for carpentry and fuel. Pop. 18 001.—The road, area about 430 geo sq m is traversed by the Cottian Alps partly on the W N and S The Po waters it on the E and receives its waters in part directly, but chiefly by the Cissone and its tributary Polce. A considerable importation of corn is necessary to meet the consumption but much milk, wine and excellent fruit are produced and the pastures rear great numbers of cattle. The forests also are extensive, and furnish abundance of timber and fuel. Pop. about 110 000

PINIS (name of) an Isl. S Pacific Ocean off S W end of New Caledonia lat. 22° 38' S lon 167° 25' E about 42 m in circumference. Near the shore the land is generally low and rocky with little soil but very thickly wooded about 2 m inland the soil improves and from that, to the centre of the island on the N side, the ground rises with a gentle ascent, with a few hills timber and a rich alluvial soil forming a large clear space of hundreds of acres. From this clear space the land rises gradually towards the peak which is situated on the S E part of the island and is thickly wooded to the top. Many species of fine timber grow on the island particularly pines, which attain a great size. Pop. about 2500

It is walled, and entered by two gates, has a court of law and several public offices, five churches, and an orphan asylum; holding docks, some shipping manufactures of earthenware, earthenware and best-root sugar and a considerable trade on the Elbe. A little above the town on a lofty rock stands the castle of Sonnenstein, originally a fortress and state prison and now converted into a lunatic asylum P. 5178.

PIRITZ, [Moravia, Prussia] a market town, Austria, Moravia circle and 8 m. S.E. Olmütz, on the Strakonka. It has an ancient castle three churches, and two synagogues manufactures of woollen and cotton cloth, a walk mill, and some trade in wool. Pop. 5470

PIRON, an isl. Lomana Archipelago lat. 11° 20' S. lon. 158 20' E., about 5 m. long and 1 1/2 m. broad, of moderate elevation, and sloping gently towards east extreme. It exhibits a range of low grassy hills, with smooth rounded top, a straggling belt of wood—often mangroves along the shore—patches of brush here and there in the hollows, and on the hill tops, scattered along the ridge a few solitary tall, bushy trees, with silvery-looking foliage.—(*Voyage of the Bechuanaland*)

PIETON, three parts. Eng. 1-1. Karia 2560 ac. Pop. 897
—3, Oxford, 5140 ac. Pop. 699 —3 Worcester 1669 ac.
Pop. 388.

PIETRE-MARE, a vil. Hungary, Thutcher Tulas, co. Bihar, in a fertile district 2 m. from Dobron, with a Protestant church. Pop. 1184.

PISA [anc. *Pisae* and *Aplice*, French, *Pise*], a tn. Tuscan ex. comp. of same name, on the Arno here crossed by three stone bridges, one of them a magnificent marble structure, 44 m. W. Florence, on the railway thence to Leghorn. It is surrounded by walls and ditches, defended by a citadel, entered by five gates, and forms a circuit of nearly 6 m. much of the space enclosed being unoccupied. The river is lined by handsome quays, the streets, though not straight, are spacious and well paved, and the houses are always substantial often elegant, and remarkable for the profusion with which marble has been employed in their construction. The most remarkable edifices and establishments are the Cathedral, one of the noblest ecclesiastical structures of Italy built of marble, in the form of a Latin cross richly adorned within and without surmounted by a lofty elliptical dome. The Baptistery an immense rotunda, adorned with numerous columns and in the S.E. end contains an occupied by manifestations of the Apennines, but the N. consists of extensive plains which in the S. W. towards the shore becomes flat, containing several shallow lakes, and forming large and unhealthy swamps, known by the name of *Maremma Pisana* and *Maremma Volturna*. The soil is generally fertile, and corn, wine, oil and fruit, are very abundant. Pop. 346,348.

THE LEANING TOWER AND PART OF THE CATHEDRAL, PISA
From *Le Voyage à la Péninsule*.

white marble, and fronted with 207 columns and leaning over so strongly that it still remains doubtful whether the deviation from the perpendicular is the effect of design or of accident. The *Campo Santo*, the most remarkable edifice of the kind in existence consisting of a rhomboidal court, lined with arcades of white marble adorned with bas-reliefs, frescoes and paintings, by the earliest Italian masters, and full of remarkable monuments; the Grand Ducal Palace the Townhouse (*Palazzo del Comune*) the Courthouse (*Palazzo Pretorio*), the University universally famous, and still one of the most celebrated in Italy the *Bamozza* or college, with six professors, and an attendance of about 600 students, the botanical garden, one of the oldest in existence, the museum of natural history, with many interesting geological specimens the *Fine Casa delle Mercatordie*, a large, well-managed, and well endowed hospital; the infirmary, two flourishing hospitals, a house of refuge, and *mont-de-piété*. The manufactures consist of silk, woolen, and cotton goods; worsted and spun flax, soap, white-lead, vitriol, and glass, and the trade is chiefly in corn, oil, and wood for fuel.

Pisa is the seat of an archbishop, the residence of a civil and military governor, the seat of a court of first resort, and several

important public offices, and possesses several societies, economical literary, scientific and artistic. It became at a very early period an ally, and afterwards a colony of Rome, and was greatly favoured by Augustus, and adorned by Hadrian and Antoninus. On the fall of the Roman empire it was pillaged by the Goths, and afterwards subjected by the Longobards. In the 9th century, under the protection of Charlemagne, it made rapid progress and in 888 having made considerable acquisitions of territory it became an independent republic, and by the 10th century had succeeded, by military prowess and commercial enterprises, in taking a lead among the Italian States. It became mistress of Sardinia, Corsica, and Cerigo, and its fleets ranged the Mediterranean both giving powerful assistance to the Crusaders, and making a faithful traffic by transporting them to the shores of the East. In the 13th century in an encounter with the Genoese, she lost the greater part of her fleet, and the flower of her troops, and almost immediately after became a prey to numerous petty tyrants. In 1406 she came into the possession of the Florentines, and has since followed the fortunes of Tuscany. Pop. (1855) 22,853. — THE COMPASS rose 590 geo. sq. m. or, including Elba and several small islands, 968 geo. sq. m. in the S.E. end and centre is occupied by manifestations of the Apennines, but the N. consists of extensive plains which in the S. W. towards the shore becomes flat, containing several shallow lakes, and forming large and unhealthy swamps, known by the name of *Maremma Pisana* and *Maremma Volturna*. The soil is generally fertile, and corn, wine, oil and fruit, are very abundant. Pop. 346,348.

PISANG (Pelo) a small ill. off S.W. coast, Sumatra; lat. 6° 8' S. lon. 104° 4' E. (n.) about 1/2 m. diameter, where water said to be unwholesome may be obtained by digging down 4 or 5 ft.

PISCIOTTA a tn. Naples prov. Principato-Citra, 9 in 8 II. Vallo, near the Tyrrhenian Sea, with a palace a handsome church a convent, and a successful fishery the environs produce excellent fruit, wine and oil. Pop. 8000.

PISCO a tn. Peru dep. Lima I. bank and near the mouth of the Pisco, in the bay of same name lat. 13° 43' S. lon. 76° 17' W. n. It has acquired some importance by the exportation of brandy and it has recently become more active and populous owing to the near vicinity of the Guano Islands. Pisco has suffered much from earthquakes, and more recently from the war of independence. Several parts of it have been rebuilt and much has recently been done in the way of improving and ornamenting it. The harbor, which is secure, with good anchorage, is about 1 1/2 m. from the town. Pop. about 8000.

PISLIOT a small ill. W. coast, Asiatic Turkey Anadolus 28 m. N. Rhodes about 8 m. long and 2 to 3 m. broad.

PISLIK a tn. Bohemia, r. bank Watawa, here crossed by one of the finest stone bridges in the country. 52 m. S. by W. Prague. It is surrounded by an old and lofty wall. Bunked with numerous towers is well built, and has four churches, a gymnasium military and swimming school barracks and hospital and manufactures of linen and woollen cloth potash and iron-ware. Pop. 5448.

PISFORD, or *Pisford* par. England, Northampton, 2700 ac. Pop. 689.

PISHLI I. par. Eng. Oxford 785 ac. Pop. 192.

PISHNO, a tn. Austria. See *Murauvau*.

PISIA, or *Brouce*, a vil. Hungary co. and 9 m. from Bemesvar, in a fertile district, with the remains of a Roman fort and mineral springs. Pop. 1402.

PISKOREVCEZ, a vil. Austria, Sclavonia, co. Virova; about 4 m. from Deskarer with a church. Pop. 1848.

PISOGNE a tn. and com. Italy Lombardy, prov. and 20 m. E. Bergamo E. shore of Lake Iseo. It is well and regularly built has a fine square, surrounded with arcades, and fronting the lake an old church on an eminence, about 1/2 m. from the town, and a modern church manufactures of iron, which is extensively mined and smelted in the neighbourhood and a considerable trade in corn cattle cheese, wool, iron, wool, lime, and millstones. Pop. 3157.

PISGA, a river, E. Prussia, issues from Lake Wyumyten near the town of that name on the frontiers of Poland, flows easterly N.W., passing the town of Gumbinnen, and at Insterburg unites with the Angerap in forming the Praga, after a course of about 70 m.

PISSEVACHE, a waterfall, Switzerland con. Valais 4 m. N.W. Martigny. It is formed by the Salenne near its confluence with the Rhone, and is chiefly remarkable for its height, which is nearly 800 ft.

PISTOCIO, a town and com. Naples, prov. Basilicata, dist. 20 m. S. Matera. Pop. 5780.

PISTONJA (anc. Pistonja), a town Tuscany 20 m. N.W. Florence, with which it is connected by railway near 1 hour. Ombrone. It is surrounded by lofty walls, which have a circuit of nearly 3 m. and entered by four gates. It has several large and handsome squares, spacious, well-paved, and well formed streets; is the seat of a bishop, and the seat of a court of first resort, and several public offices, contains a cathedral of ancient date, faced internally and paved with marble, and adorned with fine sculptures and paintings, the church Dell'Umilia, with a magnificent dome, several other churches, a townhouse, courthouses, cabinet of natural history several schools and hospitals, and has manufactures of woollen and silk goods, tapestries, silk-walls and a trade in silk, straw bonnets, and cattle. Fine rock-crevices, called Fieschi diamonds, are found in the vicinity and pistoles are supposed by some to have been first made here. Pope Clement IX. was a native. Pop. (1858) 11,411.

PISUREGA, a deep and rapid river Spain which rises in prov. Palencia flows E. and S.W. and falls into the Douro, about 8 m. S.W. Valladolid, total course 125 m. direct distance principal tributaries the Arlanzon Arlanza and Carrion. It is a river Siberia, rises in prov. Iruyausk, near lat. 60° N. and lon. 97° E. flows S.W. past the town of Pitsa, and joins the Yenisei, 12 m. below the town of Tolmansk, after a course of about 340 m.

PITANGUI, a river Brazil prov. Minas-Geraes 110 m. N.W. Ouro-Preto nearly 2000 ft. above sea-level with three churches a Latin and a primary school a court of justice; and a trade in rum, considered the best in the prov. sugar cotton, wine, horses, and cattle. Pop. dist. 5000.

PITCAIRN ISLAND an isl. S. Pacific Low Archipelago lat. (Adamstown) 23° 57' S. lon. 130° 52' W. length, E. by S and W by N 24 m. breadth about 1 m. its coast is almost perpendicular throughout its whole extent, and is moreover fringed with formidable rocks and reefs making it impossible to land except at a very few points—ones at the W. and another on the N.E., called Bounty Bay. The last is that generally used, but even it becomes impracticable in strong winds. The island, rising to the height of 1100 ft., becomes visible at a distance of 50 m. and when more nearly approached presents a somewhat wild but beautiful appearance. Its summits are clothed with luxuriant verdure, and the bases of its lofty cliffs are skirted with thickly-branched evergreens. But the interest which attaches to Pitcairn Island is derived far less from its physical than from its moral features. In 1790, 9 British sailors, mutineers of the *Bounty* landed on it with 18 natives of Tahiti 6 men and 12 women. They found proof of former, but no actual inhabitants, and might easily have managed, from the natural fertility of the soil, to subsist in tolerable comfort, but violent dissensions soon arose, and they commenced killing each other and at the end of 10 years the only survivors were John Adams, an Englishman the females, and 19 children. Providentially among the articles which the mutineers had brought with them were a few Bibles and prayer-books and Adams, perceiving the perils of there was strong with remorse for his past life, and became a genuine Christian convert. He immediately commenced the religious training of the little community, and with such remarkable success, that probably since the first planting of the gospel, its genuine fruits have never been produced more purely and abundantly than on this lonely isle of the Pacific. Every successive visitor seems to vie with those who preceded him in lauding the inhabitants for their numerous virtues, social and domestic. Their kindness and hospitality are of the purest and most unalloyed description every indication of surliness can both read and write; dissensions are entirely avoided quarrels in the most remote of the term are unknown; and when disputes do arise, they are either settled at once by a magistrate, usually appointed by the voice of all the males and females above 16, or with the assistance of a jury; and in the rare case of continued misunderstanding, by the final decision of the captain of the first man-of-war that visits the

island. On July 30, 1851, when this interesting community was visited by H. M. R. *Cookstow* it numbered 81 males and 79 females in all, 160 souls. The village in which they are congregated is situated a little W. of Bounty Bay, and consists of well-built, clean, and comfortable dwelling-houses, and a large and substantial building, used both as a chapel and school-room. The women are chiefly employed, in addition to their domestic duties, in cultivating the ground which yields abundance of potatoes, yams, some maize, and many varieties of fine fruit: pineapples, pineapples, bread-fruit, melons, oranges, lemons, &c. These are exchanged for wearing apparel, and other necessities obtained from whale-ships. The men, besides building houses, and doing other heavy mechanical work, spend much time in fishing and in hunting the goats.

PITCHCOMBE, par. Eng. Gloucester 217 ac. P. 145.

PITCHOYIT par. Eng. Bucks 924 ac. P. 69.

PITCHER, a vil and township, U. States, New York, 127 m. W.S.W. Albany with two churches an academy several schools, a woollen factory, two tanneries, and great saw and flour mills. Pop. 1564.

PITCHEFORD par. Eng. Salop, 1645 ac. P. 164.

PITCHELEY par. Eng. Northampton, 8980 ac. P. 610.

PITCOMBE, par. Eng. Somerset 1050 ac. P. 411.

PITTA—1 A seaport in Sweden län N. Bohuslän, cap. dist. 83 m. S.W. Torsholm, on an isl. in the mouth of the Pita, here crossed by a long wooden bridge. It is regularly built, but all the houses are of wood and very indifferent. It has a harbour and docks through the trade is of very limited extent. Pop. 1801. The curvaceous mountains called Pita Lappmark, stretches across the whole kingdom from the coast to the frontiers of Norway. It is extensively covered with lakes and morasses and has mines of argenteus lead but is very thinly peopled.—2 A river Sweden which issues from Lake Pitea, on the coast of Norway flows S.E. expanding into several large lakes and after a course of about 220 m. forms a wide estuary and falls into the Gulf of Bothnia near the town of Pitka.

PITCHECO (anc. Pitconca) a vil and par. Italy above the Omboni, 5 m. N. Pittoja with a church, and a castle. Pop. 1808.

PITTEGLIO, a vil and com. Tuscany 20 m. N.W. Pisa with a church the remains of an old castle, a school and an extensive paper-mill. Pop. 8195.

PITHIVIER (Latin, *Avenium Pitivernum*), a town, France, dep. Loiret, on the ridge and slope of a hill near the Orléans, 25 m. N.E. Orléans. It is a regular well built place, with a very large square and a considerable trade in wool, wine, honey, and particularly excellent saffron which is grown in the district. It is famous for its almond-trees and park-land. Pop. 8893.

PITI a dist. Tibet among the W. Himalayas, belonging to Great Britain and bounded N. by dist. Rupeet, W. dist. Lhalu and Kulu, S. dist. Kousar, and E. the Chinese territories, from which it is separated by the Parang. It consists principally of the valley of the Piti, from which it derives its name, and is both covered and watered by lofty mountains, many of which have an elevation exceeding 20,000 ft. Some fertile alluvial tracts occur chiefly along the banks of the streams, and yield good crops of grain; but the greater part of the surface is naturally sterile, and is rendered still more so by the want of moisture, the climate being almost rainless. The inhabitants show plainly by their features, that they are of Tartar origin. Almost the whole of them are Buddhists. They are comparatively few in number and live in small and distant villages, the houses of which are generally built of unburnt bricks, made of a fine lacustrine clay which is very abundant in the valleys. Their flat roofs are covered with a thick layer of the same material. The principal valleys of the district is Danka.

PITIC, a town Mexico dep. and on the Sonora, 128 m. S.W. Aguascalientes. It is an enterprise for goods of every description imported at Guaymas, and intended for the markets of Upper Sonora and New Mexico. Pop. 5000.

PITIGLIANO, a town and com. Tuscany, 38 m. S.E. Grosseto; with a collegiate church, a castle, a palace belonging to the Grand family, an hospital, two schools, and a trade in wine and oil. Pop. 3450.

PITMINSTER, par. Eng. Somerset 5120 ac. P. 1807.

PITNEY, par Eng Somerset 1500 sq. P 454.
PITTSCHEN [Polish, *Poznań, Bydgoszcz, or Poznań*], a town, gov and 82 sq. N. E. Oppels. It is walled, has a church, two chapels, townhouse, and hospital. Manufactures of wooden and linen cloth, a dye-work tile-work, and several mills. In 1688 Maximilian of Austria was here defeated by Sigismund, king of Poland. Pop. 2074.

PITSEA, par Eng Essex, 1107 sq. P 246

PITSLAGO, par Govt. St. Aust. 84 sq. by 8 sq. P 1801
PITSLAGO (New), a vil. Scotland, co. Argyllshire, 11 m. S. W. Fraserburgh; with a small church, an Episcopalian chapel, two schools and manufactures of linen and cotton goods.

PITSTONE, or **PITSLITTON**, par Eng Bucks; 2836 sq. Pop. 645

PITT or **MARIS**, an isl. N Pacific, Gilbert Archipelago lat. 8° 20' 48" N. lon. 172° 57' E., about 6 m. long, by 1 m. broad; connected by a narrow channel with Taritao, or Touching Island. It is very fertile, the only quadruped is the rat, which is its great numbers: there are few birds. Pop. about 5000—2. See **VAIKUMU**.

PITTS ARCHIPELAGO, a number of islands British America, N Pacific Ocean about lat. 58° 28' N., lon. 135° 48' W. Pitt's Island, the largest, about 80 m. long by 30 m. broad is separated from the mainland by Grenville's Canal, which in some places is not more than 4 m. wide, and from Bank's Island on the S. by the Canal de Princeps.

PITTS STRAIT Indian Archipelago, separating the islands of Borneo and Sulu on the N. W. extremity of Japan. It is about 80 m. long, by 6 m. broad.

PITTENWEEM, a royal and naval port and par Scotland co. Fife 84 sq. by E. St. Andrews N shore, Fifth of Forth. It has a town with a small prison attached a parish and a U. Presbyterian church, and an Episcopal chapel. Inhabitants chiefly employed in the extensive fisheries of the coast. Pittweem unites with the two Anstruthers, Crail, Cupar Kilrenny and St. Andrews, in returning a member to Parliament. Pop. 1450

PITTIEM, a vil. and com. Belgium prov. W. Flanders, 19 m. S. Bruges. The chief manufactures and trade are linen, flax, and wool. Also are exported and there are four breweries, an oil and four flour mills. Pop. 6178

PITTINGTON a vil. and par. England, co. and 8 m. E. N. E. Durham with an ancient church, chiefly in the Norman style, limestone quarries and extensive collieries. Area of par. 6727 sq. Pop. 6241

PITTMACHA, a vil. Austria, Croatia, 12 m. from Retz. It is the headquarters of a frontier regiment and has a church. Pop. 1919

PITTSBURGH, a city in U. States, Pennsylvania, 210 m. N. W. Washington, advantageously situated near the centre of a large and valuable coal-field in the angle formed by the Monongahela and the Allegheny in uniting to form the Ohio, and on the great trunk lines of canal and railway which have been carried westward from the Delaware to the Ohio over the valleys of the Schuylkill and Susquehanna and the intervening mountains. The site of the town is naturally rich in picturesque beauty but its structures, in this respect, are much destroyed by the sulphureous vapours and dense clouds of smoke which are continually rising from the numerous coal used in its numerous factories and give the whole place a dingy, and almost dismal appearance. Pittsburgh consists of the town properly so called and of several large suburbs, with which, when on the opposite side of the river, the connection is kept up both by regular ferries and bridges. Of the latter the one across the Monongahela is 1600 ft. long, while the Allegheny has three, all of them covered, and one of them provided with a foot walk over its top. The first streets of Pittsburgh were built parallel to the Monongahela. Others were afterwards built in like manner parallel to the Allegheny. The interval between was left to be filled up as a rapidly-increasing population might require. The whole space being now occupied, the town has necessarily assumed a triangular form, which, not being in itself favourable to regularity of structure, has been rendered still more irregular from the want of a preconceived plan. Many of the streets, however, lined with houses, for the most part built substantially of brick, have a respectable, and even handsome appearance; and all these are well lighted with gas, while the supply of water obtained from the Allegheny, and raised by

Vol. II.

a steam-engine 116 ft. above its level, is both excellent and ample.

Of the adjacent places which, though separately incorporated, are properly regarded as only suburbs of Pittsburgh, the most important are Allegheny, on the S. bank of the river of same name, and Birmington on the E. bank of the Monongahela. The latter is distinguished chiefly by its manufacturing establishments; the former vies with Pittsburgh in its public edifices, and surpasses it in the elegance of its private mansions, which, often occupying dry and commanding positions, have been selected for residences by the wealthier classes.

Among the public edifices no fewer than 35 churches are counted though their architectural merits scarcely entitle any of them to special notice, except the R. Catholic cathedral which, partly from the elevation of its site, presents a very imposing appearance, and the third Presbyterian church, which is a very handsome structure. By far the finest building is the new courthouse, consisting of a handsome Doric structure, crowned somewhat uncongenially by a dome. Other buildings or objects of note are the banks and hotels, several of which are large and handsome edifices; a museum possessed of many Indian curiosities, and the Western University of Pennsylvania.

Pittsburgh has almost inexhaustible sources of prosperity, both in its manufactures and its trade. Its coal-mines and iron mines, situated generally above the level of the rivers and torrents, are easily worked by means of adits, without deep shakings, or expensive drainage; while its rivers, canals and railways, bring it into immediate communication with the great commercial emporiums of the S. and E., and give it access to the productive regions of the W. Its industrial establishments include 13 rolling-mills, employing 3500 hands 80 large and several small foundries, employing 2500 hands 5 large and several small cotton factories, employing 1500 hands and numerous dist., bottle, and window glass furnaces, employing above 11 000 hands. In addition to these are extensive factories, in which looks, knives, coffee-mills, scythes axes axles anvils, gun-barrels, and numberless other articles in iron and steel are produced. White-lead and soda ash works, copper-smelting furnaces, and a large copper-rolling mill &c. The first steam-boat constructed on the western waters was built at Pittsburgh in 1811 and the important branch of industry thus commenced has made such progress, that for a series of years steam-boats, often so magnificent as well to deserve the name of floating palaces, have been constructed and fitted out at the average rate of one a-week. Almost constantly 80 or 40 of them may be seen along the wharfs destined for various ports on the Ohio, Mississippi and Missouri. Pittsburgh occupies the site of a fort, called Duquesne, which was built by the French about 1764, and was used by them as a central point, from which, in conjunction with the Indians they spread terror along the frontier settlements of Pennsylvania. In an attack on this fort in 1755 the British were defeated, with the loss of their commander General Braddock. For some time Pittsburgh made little progress and in 1775 did not contain more than 30 dwellings within its present city limits. Even in 1796 its inhabitants were only 1386. Its first great start was made in 1811, on the introduction of steam navigation, but it scarcely be said to have entered on its full career of prosperity till the opening up of its rich field of coal and iron. Its pop., which in 1820 was 7248, had increased in 1840 to 21 110 and in 1850 to 50,519. This does not include Allegheny and other suburbs. Adding them, the pop. cannot be estimated at less than 100,000.

PITTSFIELD, a town U. States, Massachusetts, on the frontiers of New York, about 120 m. W. Boston, in a wide valley between the Taconic and Green Mountains, at the confluence of the Potomac and Housatonic, and on the Western Railway from Boston to Albany and two other branch lines. It is well built, and near its centre is a square with an area of about four acres. Fronting on opposite sides of this square are the First Congregational Church, an elegant structure; and the Berkshire Medical Institution, which, as a medical school, enjoys a high reputation, and occupies a handsome and commodious range of buildings. Other offices and establishments of note are the Second Congregational and Baptist churches, both new and tasteful structures; the Episcopal and Methodist churches, a young ladies' seminary, an

25

ecclesies and numerous schools. The manufactures are very extensive and include cotton and woollen goods, castings, machinery cars, and carriages, hats, harness, cabinet furniture, tools, firearms, and musical instruments. The salubrious climate of Pittsford, its easy access and beautiful scenery, make it a desirable residence, and attract great numbers of summer visitors. Pop. (1860) 5872.

PITTSFORD several places, U. States, including—1 A vil. and township, Vermont, 70 m. S.W. Montpelier with three churches, numerous schools, two furnaces, and two saw-mills. Pop. 1927.—2, A vil. and township New York, 215 m. W. by N. Albany with two churches, several schools, a tannery, a brewery and a flour-mill. Pop. 1983.

PITZTHAL, a vil. Tyrol near Lust in a long and black valley of same name with a church. Pop. 1148.

PIUGUENT a tn. Spain, Isl. Mallorca, 6 m. W. Palma with a church with a Gothic tabernacle, a richly laboured and very remarkable work of the 13th century, a primary school and a trade in corn, wine, fruit, and cattle. Pop. 1164.

PIUMHI, or **LEVAMETZ**, a tn. Rossi prov. Minas Geraes, 58 m. W. & W. Fortuna with a church. The district is of great extent, and very mountainous.

PIURA a tn. Peru cap. prov. and on a river of same name, 240 m. N. W. Truxillo, in a district remarkable for its salubrity. It carries on a considerable trade in wool, cotton sugar fruit and other produce of the province.

The river rises in the W. slope of the Andes, flows W. & N., then S. W. past the towns of Piura and Sechura, and falls into Sechura Bay in the S. Pacific, after a course of about 100 m.

PIVERONE a vil. and com. Italy Piedmont div. Turin prov. (Ivrea), with several churches. Pop. 1668.

PIVNICA, a vil. Hungary. Higher Danube co. and 11 m. N. E. Raas with two churches and some trade in corn cattle, and furs. Pop. 210.

PIWNICZ a tn. Austria. Galicia, circle and 28 m. S. Haidau, on the Pappad near the frontiers of Hungary. It has a church manufactures of linen and damask, and a paper-mill. Pop. 2080.

PIXLEY par Eng Hereford 655 ac P. to **PIZZARRA** (Sta), a vil. Spain, Andalusia prov. and about 15 m. from Malaga. It is regularly built has a church and a palace of Count Vis. Manuel. Inhabitants chiefly gardeners or milkmen. Pop. 1496.

PIZHTIGHTON, a tn. Italy Piedmont, gov. Milan prov. and 12 m. W. & W. Cremona on the Adda. It was once a fortress of great importance and still looks strong though the fortifications have been partly dismantled. At present it is chiefly used as a military place of corn and a powder magazine for Lombardy. It contains four churches and a tower in which France I. of France, after his capture at the battle of Pavia, was detained 79 days preparatory to his removal to Spain. Pop. 3888.

PIZZO (Is.) a tn. and seaport, Naples, prov. Calabria Ultra II. dist. and 6 m. N. E. Monteleone on the Gulf of St. Eufemia with an indifferently sheltered harbour and a considerable trade. The fishing particularly of tunny employs a great number of the inhabitants. In 1815 Murat, shortly after landing, was made prisoner and shot near this town.

PIZZOFFRATO a tn. Naples, prov. Abruzzo Ultra, 28 m. S. & W. Lanciano, with three churches. Pop. 1070.

PIZZOLI, a tn. Naples prov. Abruzzo Ultra II. 7 m. N. W. Aquila at the foot of a high mountain with three churches. Pop. 3800.

PLABENNEL, a vil. and com. France, dep. Finistère 15 m. N. N. E. Brest, on an eminence commanding a very extensive view, near it is a remarkable Celtic cemetery. P. 3555.

PLACANICA a vil. and com. Naples, prov. Calabria Ultra I. dist. and 17 m. N. E. Gerace. Pop. 1428.

PLACENCIA or **PLACENCIA**—1 A tn. Spain, Biscay, prov. Guipuzcoa, 8 W. St. Sebastian. It has a church a townhouse, a prison, and school, a royal manufactory of weapons and firearms, in a very desolate state, and four saw-mills. Pop. 1812.—2 A city Spain. See **PLACENCIA**.

PLACENTIA a tn. Italy. See **PLACENCIA**.

PLACENTIA BAY—1 A large inlet, S. coast, Isl. Newfoundland 42 m. at its entrance, between Capes St. Mary and Chipewagan Range and extending inland 60 m. It includes several good harbours, but its W. side is studded

with islands, many of which are low, and surrounded by sunken rocks and reefs, forming a great obstruction to navigation.—2, A tn. and port, E. shore above bay 50 m. W. H. W. St. John. It was the capital when the French had possession on the island, but now consists of a number of small houses huddled together with a church, and a S. Catholic chapel.—3, Little Placentia, a small place, 5 m. N. the above.

PLADA, or **PLADDA**, a small Isl. Firth of Clyde, off S. and Isl. Arran, with a lighthouse, having two fixed lights, 130 ft. above sea-level lat. 55° 25' 30" N., lon. 5° 7' 0" W. (n).

PLAITFORD par Eng Wilts, 1178 ac. Pop. 380.

PLAN three places, Bohemia—1 A tn. circle and 28 m. W. N. W. Pilzen, on the Misa, with a castle, a church, an hospital and a refinery of potash. P. 3809.—2, (Ober or Horst) **PLAN** a vil. circle and about 5 m. from Badweis, 1 bank, Moldau with a church, a chapel manufactures of linen, and three mills. Pop. 1011.—3, (or **Plana**) a vil. circle and 5 m. S. & E. Tabor r. bank Lausnitz with a church, a school, a potash refinery and a distillery. Pop. 709.

PLANCHER (Bas), a vil. France dep. Haute Saône 11 m. E. N. Lure, on the Bohan with a paper-mill. P. 1286.

PLAÑES, a tn. Spain, Valencia, prov. and about 50 m. from Alicante with a church, court-house, prison school, flour and oil mills, and a trade in oil and wine. Pop. 1148.

PLANCHER, a small Isl. France, Gulf of Lyons, 9 m. S. W. Marseilles. It is of a circular form, and nearly 1 m. in diameter. The rocks which surround it make the navigation dangerous a light has been placed upon it.

PLANINA or **ALPEN** a market tn. Austria, Illyria gov. and 19 m. S. & W. Laybach. It is well built, has a church, an extensive factory of needles and several saw and flour mills. Pop. 1574.

PLANITZ, a market to Bohemia circle and 6 m. N. F. Klatzau on the Strazawa with a church castle, townhouse and school some manufactures of woolen cloth a potash refinery tobacco, and three mills. Pop. 1494.

PIANASTADT a vil. Baden, circle Lower Rhine near Schwetzingen with a church a Benedictine abbey and manufactures of wooden holders for lead pencils. Pop. 1565.

PLAQUEMIN a bayou or outlet of the Mississippi 1 Sta. Louisiana, which quits the river about 117 m. above New Orleans and discharges itself into the bayou of Atchafalaya. The Mississippi is always near its extreme height before it sends any water into it.

PLACHER a vil. Prussia.

PLAZENCIA (see **AMBRACA**) a city Spain Estremadura prov. Caceres, 150 m. W. & W. Madrid on the Tago, surrounded by a crumbling wall with 68 strong towers, built in 1197 by Alonzo VIII. of Castile. It is entered by six gates in good preservation has generally good and well-paved streets, and about a third part of the houses are well built among the best are the magnificent palace of the Dukes of Miraval, that of the Marquises of Santa Cruz de Paunaga, and the Episcopal palace. The other public buildings are the bridges, the cathedral new ruins, the townhouse, a large building in the ground-floor of which are several hospitals, a number of elementary schools, a seminary, a conciliar incorporated with the university of Salamanca, in which, besides chairs of Latin and philosophy, there are several theological professorships, seven churches, various convents and burial places, and above all the cathedral, an ornate, delicately sculptured Gothic edifice of granite, but unfortunately unfinished. Water is brought from the sierras of Torno by an aqueduct carried in some places over arches of great elevation.

The manufactures are a factory for spinning silk, a soap-works, various oil mills, three tanneries, 12 flour-mills. Plazencia, one of great importance, never recovered the shock of 1809, when Costa, by neglecting the Duke of Wellington's repeated request, omitted to secure the passes of Balos and Peralba, and thus let Soult come down on Talavera, who in passing plundered Plazencia without mercy. Pop. 6028.

PLANKI, or **PLANKI**, a vil. Austria, Croatia, 81 m. S. & W. Carlsbad, in a beautiful valley. It is the residence of a Greek bishop, has a S. Catholic and a Greek church, and an old castle. Pop. 1164.

PLASSEY a vil. Hingham on the Hooghly 80 m. N. Calcutta. Here on June 25, 1787 Colonel, afterwards Lord Clive, with a more handful of men, defeated 800 Europeans, 2100 Sepoys, and 100 Tupanah, defeated Santa

Doria, with an army consisting of 50,000 foot and 18,000 horse, laid the foundation of the British empire in India.

PLATA A, an inlet, off Ecuador, lat. 1° 16' 30" S.; lon. 81° 15' W (about 8 m. long, covered with large bushes and low trees), and once a favorite resort of the brasses.

PLATA (La).—A. N. New Granada, 55 m. E. Paraguay on an affluent of the Magdalena. It is beautifully situated in the midst of a fertile country well built and has a considerable trade in agricultural produce.—2 Cap. Bolívar. See CUYO.

PLATA (La), UNITED PROVINCES of a confederation, S. America in recent times often called the Argentine Republic. It extends over the immense region bounded, S. by the Rio Negro, W. by the Cordillera of Chili and Bolivia, and N. by Bolivia. On the E. it is washed by the Atlantic Ocean, from the mouth of the Rio Negro N. to the Rueda La Plata, and thence to E. boundary towards the N. is formed by the Banda Oriental del Uruguay, the S. territories of Brazil, and by Paraguay. The mouth of the Rio Negro, the extreme N. limit of the state, is at lat. 41° S. but as that river makes a wide circuit N. the mean latitude of the S. boundary may be rather fixed at 39° 30' S. The N. boundary line between La Plata and Bolivia lies chiefly in lat. 22° S. The length of the state, from N. to S. therefore, is 17° degrees, or in round numbers, 1200 m. Its mean breadth is nearly 700 m. so that it has an area of probably 800,000 sq. m.

Description.—This vast territory forms an oblong quadrilateral, the W. side of which for a distance of 1300 m. is bounded by the Andes. This boundary has never been thoroughly examined. Snowy heights and volcanic peaks have been recognized from a distance but the well-watered hilly regions and habitable low tracts at the foot of these mountains are still for the most part unknown. In some places lateral branches from the high Andes run into the plain to a distance of 160 or 200 m. and these high grounds have been generally selected for settlements. The E. portion also of the state round the river Paraguay is a hilly country. The plains S. and S.W. of Buenos Ayres, at a distance of 100 m. become hilly, and chains of hills (the Sierra Tinta Sierra Tapalquen, &c.) nearly rising 300 ft. above the plain, extend S.E. to W. and farther S.W. the Ventana mountain about lat. 36° S. lon. 64° W. stretches parallel to those hills and joins the Guamin range in the N.W. The highest point of the Ventana is about 2000 ft. above the plain, which rises from 800 ft. to 800 ft. above the level of the ocean. But the mountainous tracts form but a small portion of the whole territory, which generally spreads out into immense uniform plains, called Pampas. It deserves to be remarked however that though the Rio Negro forms at present the southern limit of Spanish colonization and asserted authority, yet the Spanish claims of sovereignty devolving on Buenos Ayres, extend S. of that river indefinitely over Patagonia while, on the other hand a great part of the Pampas within the recognized limits of the state, particularly towards the S.W. is practically Indian territory.

Provinces.—The united provinces of La Plata are in number 18, and form three groups namely the E. or Litoral the N. or central and the W. which formerly constituted the tendency of Cuyo. There are no accurate authentic accounts of the population of the confederate provinces. Approximate estimates, in which the independent native tribes are not included, represent it as follows—

| | | Pob. |
|----------------------------|---------------------|---------|
| E. or Litoral Provinces. | Buenos Ayres | 265,000 |
| | Santa Fe | 30,000 |
| | Entre Rios | 80,000 |
| | Cordoba | 40,000 |
| | La Plata | 90,000 |
| N. Provinces. | Santiago del Estero | 55,000 |
| | Tucuman | 45,000 |
| | Catamarca | 45,000 |
| | Salta and Jujuy | 80,000 |
| | San Luis | 30,000 |
| W. Provinces. | Mendoza | 45,000 |
| | San Juan | 35,000 |
| Total of the Confederation | | 830,000 |

A rough estimate in 1855 gives the total 1,712,800. The dist. of Green Ohio, containing about 100,000 free Indians and the desert S. as far as the Rio Negro are also considered to belong to the Argentine Confederation; as is also Patagonia.

Rivers.—A country of immense plains, bounded by distant mountains, is likely to feel the inconvenience arising from the imperfect distribution of its waters. This is exemplified in the instance before us. The Pampas are, to a great extent, condemned to sterility for want of streams to irrigate the soil; from their N.W. and N. confines—from the Andes and the mountains of Brazil—rivers of great magnitude descend, and meeting together pour their united waters into the ocean through a common outlet. This outlet is the river La Plata, which is in reality not a river so much as an estuary receiving great rivers. At its mouth, between Cape St. Antonio and Cape St. Mary it has a width of 170 m. About 50 m. higher up, near Monte Video, where it is reduced to a width of 55 m. its waters are already quite fresh. At Buenos Ayres 160 m. farther up the land being low it is not visible from the middle of the stream. The mouth of the tributary rivers and the termination of the La Plata, are situated 80 m. to 40 m. above Buenos Ayres. The current of this great river is perceptible in the Atlantic at a distance of 100 m. or even 200 m. yet the depth of the stream is by no means proportional to its breadth. Above Monte Video its navigable channels are narrowed by sandbanks and so shallow are its southern shores, that at Buenos Ayres vessels of moderate size are obliged to anchor 8 m. to 9 m. from land. Even boats cannot run fairly on shore but are obliged to transfer their passengers to rudely-constructed large-wheeled carts, which convey them over some hundred yards of shallow water. The great rivers which unite to form the La Plata, are the Parana and Uruguay. The former issues from the N.W. by several mouths, the latter descends from the S., in a single channel 6 m. wide at its entrance. Between them they embrace a tract of delta about 80 m. in extent, the middle point of it being in about lat. 34° 15' S. and 40 m. nearly due N. from Buenos Ayres (lon. 69° 40' W.). The Uruguay which is said to take its name from its numerous falls runs near the coast of Brazil, in lat. 27° 30' S. and has a course of 600 m. in its course to the W. and S. through Brazil and the territory of the Misiones, it receives its chief accessions from the E., and lower down the Rio Negro (which also) the chief river of the Banda Oriental falls into it, just before its junction with the Parana. The Uruguay may be ascended in small vessels about 200 m. to the Salto Grande, which is a rapid practicable for boats during the floods.

The Rivers Parana, Paraguay, &c.—The Parana considered with reference to the magnitude and number of its tributaries, which seem however to be somewhat varied by the length of their course, is one of the greatest rivers of the American continent. On the W. it receives the Salado which rises in the Andes, in lat. 28° S., flows N. through Salta, and then turning S. reaches the Parana, after a course of 1000 m. Further N. the Rio Uruguay, collecting the waters of Juny and Tartaj, flows in a general direction parallel to the Salado. The Paraguay, rising in the neighbourhood of Potosi, joins the Paraguay after a course of 800 m. in lat. 25° 30' S. These three rivers drain the Cordillera of the Andes through an extent of 600 m. Further N. on the coast of the continent, the Paraguay takes its rise in Brazil lat. 15° 30' S., among those hills of Mato Grosso which separate the basin of the La Plata from that of the Amazon. Flowing S., it becomes navigable for vessels of 40 tons on reaching the Jauru from the W. lat. 16° 25' S. and 1200 m. from the sea. It drains a great extent of inundated country which during the floods, presents the appearance of a great inland sea, with an area of 20,000 sq. m. and known as the Lago de Paraguay. Lower down it receives the Pilcomayo and Rio Vermelho from the W. besides numerous smaller streams from Paraguay on the E. before it joins the Parana. The name of this river, now given also to a large tributary on its left bank, between it and the Parana, was originally Paraguay, that is, the river of the Paraguayans the Indian tribe who dwell on, and alone navigated the stream. The sources of the Parana are situated in lat. 22° S. about 100 m. N.W. of Rio de Janeiro but some of its N. tributaries rise in lat. 16° S. In its course for the first 400 m. or 500 m. it is chiefly S. then turning S.W. by it forms the E. limit of the country called Paraguay, and meeting again W. unites with the river Paraguay, in lat. 27° 30' S. where it takes the direction of the latter and flows S. Its length from its sources to its junction with the Paraguay, is probably 1800 m., and thence to the sea 600 m. more. In

broadth current, and volume of water, the Paraná has ten times the magnitude of the Paraguay, which is itself superior to the greatest European rivers. But owing to its rapid descent, and the mineralogical character of the country through which it flows, it is not navigable up for more than 250 m. to the Foz de Iguaçu, lat. 25° 50' S. above which for 100 m. the stream is but a succession of rapids and cascades, as far as the Gran Salto, lat. 24° 4' S. where the great river previously changes its breadth, rushes through a channel only 60 yards wide. In the lower part of its course, below its junction with the Paraguay, the Paraná is everywhere deep, broad, and unobstructed, except in the delta, where the deepest channel has often but 1½ fathoms. In general the rivers which join the Paraguay and Paraná from the E., descend with great rapidity and offer little facility of navigation. Those from the Andes, on the other hand, wind slowly through an immense extent of level plain, and are available to a great extent as means of internal communication. The Salado is said to be navigable down from the neighbourhood of Salta. The Pilcomayo has been found to be too shallow even for boats. The Uruguay on the other hand, has been descended from Orán to the Paraná, a distance estimated with the windings of the stream at 1200 m. It has been stated also that one or two of the small rivers which flow into the Paraguay from the country of the Chiquitos, N. of the Gran Chaco, may be navigated. The floods conveyed to the La Plata by its chief tributaries, arrive at different seasons, and tend to equalize its waters throughout the year. This succession of floods at separate periods, is due in some measure to the variation of climate and seasons throughout the wide basin of the La Plata, the margin of which from the Andes at the source of the Salado to the springs of the Paraná near the shores of the Atlantic has an extent of 2400 m. but still more to the difference in the rapidity of the descending waters. The Uruguay is flooded from June to November the Paraná pours down its greatest torrents in December while the Paraguay swelled by the overflowing of the lake of the Xarayá, runs regularly from February to June.

Rivers of the *Pampas*.—The rivers of the plains which do not belong to the basin of the Paraná, have little relative importance, and are for the most part wasted by evaporation and terminate in occasional lakes, marshes, or salt-pans. The rivers Medinas and Tala, rising in Tucumán, unite with many smaller streams to form the river Dulce, which flows by San Isidro del Estero in a S. E. course nearly parallel to the Salado, but long before it approaches the Paraná it disappears in the hollow called the Salt-lake of the Porongos. From the hills of Cordoba, in the middle of the plains, several streams, named respectively Frías, Secunda, Tecoreo, Quarto, and Quinto, wind in a general S. E. direction. The third and fourth of these unite, and reach, at times, the Paraná. The rest spread over and are dissipated on the level plains. The rivers of San Juan and Mendoza and the country farther S. adjoining the Andes, seem to be all lost in lakes, such as the Guana-cabe, Sentero Bavadero, and Lira Langun or Bitter Lake, which, as well as their tributary rivers, the Mendoza, Tunuyán, Desaguadero, Diamante, and Chadi Leuba, though represented in maps as in reality but little known to European geographers. The level plains immediately S. W. and S. of Buenos Ayres, are drained by another Rio Salado, which is dry the greater part of the year. Further S. the hills connected with the Sierra del Volcán, and the Sierra Ventana, send numerous streams to the coast (lat. 39° S.) on the one hand, and on the other to the interior where they end in salt lakes (Nariy in lat. 39° 50' S., at the mouth of the Rio Colorado (Red river) called by the natives Caba Leuba, which has a course of 500 m. or 600 m. S. E. from the Andes, its sources lying between the 56th and 58th parallels E. of Maile in Chili. It is a constant stream, but understood not to be navigable above 120 m. from its mouth.

Salt Marshes.—In this country of vast and level plains, the lakes, lagoons, and marshes, all more or less temporary and periodical, are relatively numerous and extensive. As a general rule, it may be laid down, that all the lakes and marshes S. of the Paraguay and Paraná are fresh; on the W. they are, with few exceptions, salt. Of the former description, the most remarkable is the Lake of Ybura, in the province of Corrientes, extending from the S. bank of the Paraná, where it flows W., to the E. bank of the same river further S.

It is said to be filled by infiltration from the great river without any visible connection with it, and at times covers an area of perhaps 1000 sq. m.; but, like the Lake of Xarayá further N., this apparently great sea has depth of water only for light canoes, and is covered with aquatic plants. The lakes of the W. and S. plains are all salt; but, besides those which have some degree of permanence, there are countless others which disappear soon after the rainy season has closed, leaving the ground incrusted with salt to the depth of some inches. The saline deposits thus resulting from the evaporation of the waters which have washed the surface of the plains, vary in different localities. S. of Buenos Ayres, and also at a distance in the W. near San Lalo, culinary salt (sulfate of soda) is found in great abundance, and is used in curing provisions. In other places are collected sulphates of soda (Glauber salt), and sulphate of magnesia (Epsom or English salt). From the latter which covers the plains round the fort of Melina, W. N. W. from Buenos Ayres, is prepared the magma of commerce.

Pampas.—A country covered with a salt efflorescence, must be obviously dry and sterile; and such in truth is the general character of the plains of La Plata. If we consider the whole extent of the claimed territory of the confederation from the Strait of Magalhães to the frontier of Brazil, we shall find it broadly distinguishable into three regions—the Patagonian plain, extending from the Strait of Magalhães to the Rio Negro thence the Pampas N. to the Rio Salado, S. of which and W. of the Paraguay, the desert named the Gran Chaco, runs as far as the country of the Chiquitos, within the Brazilian limits. The Patagonian plain is everywhere covered with coarse shingle, lava, or volcanic ash, and may be appropriately called a stony desert. It is true that some herbaceous plants and a few low thorny bushes may be discovered on it by an attentive eye but these do not suffice to hide its nakedness or to change its original character. This formation of coarse gravel composed chiefly of fragments of porphyry probably extends a good way N. of the Rio Negro, at the W. side of the plain along the foot of the Andes. On the E. it terminates at the mouth of that river, where begins a deposit of fine sand and clay which covers the plains round Buenos Ayres and some way up the Paraná, and clearly marks the extent of the ancient estuary. This is pasture land not insubstantial, but of immense extent. As we advance N. in the Pampas and Gran Chaco, the increasing frequency of thorny mimosa and the cactus indicate the change of climate. In general the cultivable land of the confederated provinces is confined to the banks of the rivers, or rather to their mouths, for the banks of the Paraná alone are habitable throughout; and to the country at the sources of the rivers. The intermediate tract between the most E. offshoots of the Andes and the Paraná, is more or less arid and barren and even the W. states are separated from each other in some cases, as Cordoba and Santiago del Estero the latter and Rioja, by salt deserts 100 m. or more in breadth, and raised but little apparently above the level of the sea.

Geology and Mineralogy.—The rocks which show themselves above the general plain of La Plata, in Entre Rios, Cordoba, in the Ventana, R. of Buenos Ayres, and in the islands of the Paraná, are chiefly granite. In the Ventana, the granite is covered to some extent by rocks of pure white quartz. The Patagonian plains, the Pampas, and Gran Chaco, are all characterized by a great diluvial formation which varies but little throughout in nature or in age. It consists of a calcareo-argillaceous conglomerate, in horizontal strata, and in the Patagonian plains exhibits a succession of terraces rising towards the interior the eastern declivity of each terrace presenting the appearance of an ancient sea-shore. The lower terraces are capped with lava, the blackness of which is strikingly contrasted with the glaring brightness of the cliffs and plains below. Extensive tracts in the interior are covered with volcanoes or with pumice, the latter in some even found stratified on the sea-shore hundreds of miles from the mountains. In the lower diluvial strata are found marine remains, partly of extinct, partly of existing species. These occur on the Patagonian coast, and for some distance inland, in the cliffs at Bahía Blanca, in those of the Paraná, at the E. foot of the Corrientes, and even in some instances on the mountains themselves, at the height of nearly 14,000 ft. In the strata above the preceding, are imbedded the fossil

remains of extinct mammals, generally of colossal size, and bearing striking analogies to the existing Fauna of Africa. These fossils also have been discovered throughout the plains and Pampas from Patagonia to the hills of the Chiquitos. From the lower part of the Rio Colorado N. the steins disappear not over a public being found in the soil for some hundred miles S. and W. of Buenos Ayres. In this extensive tract, a fine alluvium has been deposited in the old estuary of the Parana, on the diluvial formation of the Pampas. The deposition of fine sediment still goes on rapidly in the Plata, and in a few centuries perhaps that wide but generally shallow estuary will be converted into a delta of low islands, resembling in soil the plains on its S. shores. The *Asociación Cordillera*, which separates Tucuman from Catamarca, and reaches the limit of perpetual snow (about 15,000 ft.) abounds in mineral treasures in gold, in silver, and copper ores. The Famatina range also, in the province of Rioja, has the reputation of containing silver-ores equalling in richness those of Potosi. The iron of the Pampas, the true nature of which is but imperfectly known, merits a brief consideration. The large mass (weighing 1400 lbs.) which figures in the British Museum as metallic iron, was brought from the plains of the Gran Chaco, near the Rio Salado, about 300 m. E. of Santiago. When it first arrived at Buenos Ayres it weighed, perhaps a ton and yet it was but a fragment of a much larger mass imbedded in the ground. Chemists, guided by analysis, pronounce it to be of meteoric origin, but those who saw the original mass never doubted that it was a ferrous rock projecting from the ground. Similar masses of iron, containing nickel, and similarly placed, occur also in the desert of Atacama.

Climate.—In so extensive a region as that embraced by the confederate provinces of La Plata, there must naturally be a considerable variety of climate; yet there is one character which, with some slight modification, seems recognizable throughout—namely dryness. The rains earned from high latitudes by S.W. winds, are arrested by the Andes, S. of Chili. Those of the equatorial regions from the E. reach but a short way beyond the S. tropic, or are exhausted long before they arrive at the plains of the interior. Thus, while the country S. of Chili and W. of the Andes is deluged, and that E. of the Parana abundantly refreshed with rain, the plain between this river and the Andes labours under a deficiency of moisture. The drought is greatest in the Patagonian plains. At Carmen the Spanish settlement on the Rio Negro, in lat. 41° S. and not far from the sea, the rains are still very precarious, and sometimes two years pass over with scarcely a shower. As we advance N. over the plain in the interior, towards the triple the humidity of the air increases, but owing to the increased evaporation and the prevailing levelness of the ground, there is still a deficiency of fresh water. Buenos Ayres, with the country immediately about and some way S. of it, has a climate differing widely in respect of humidity, from that just described for it is exposed to frequent and warm N. winds, which, blowing from the tropic down the valley of the Parana, over the extensive marshes of Entre Rios and across the Plata, are loaded to excess with vapor, affect the health disagreeably and make everything damp. The mean annual temperature at Buenos Ayres, is about 54° Fahr. the means of summer and winter heat being respectively, 72 and 52. In ascending the Parana, a rapid increase of temperature is experienced, and in the W. provinces, near the Cordillera, the local climate varies continually as might be expected, with the circumstances of height and exposure. The elevated plains of Mendoza are celebrated for their agreeableness and salubrity. Though Buenos Ayres stands in low level plains, close to a shallow estuary and surrounded by marshes it is exempt from the severe incidental to such situations but its perfect salubrity is yet doubtful; since the constitution there acquires an irritability which renders the slightest wound or dislocation dangerous; the most trifling hurt is apt to terminate in lock-jaw. Though the temperature is equable, the sides are not always calm. The Pampero or S.W. wind sometimes blows with tremendous violence, driving back the waters of the Plata for miles from its shores, and bearing clouds of dust that completely intercept the light of day. Should rain then fall, as is often the case the dust descends in a shower of mud. The mouth of the Plata appears to be one of the points on the

earth's surface most frequently visited by violent thunderstorms near its shores, hailstorms and lightning are particularly destructive.

Zoology.—The colossal animals of the Patagonian plains and the Pampas—the giant armadillos (*megatherium* and *glyptodon*) the llama, as large as a camel; the American horse, the elephant, toxodon and oblipterygus—are now extinct yet, with a few exceptions, animals of the same type but diminished size still remain. The guanaco or wild llama, is the characteristic animal of the plains. Towards the N. it has been displaced by colonization and cattle, though it still occurs with two species of deer. The vicuña, a kindred species, is hunted in the mountains of the W. provinces. The largest of the rodents—the giant of its tribe—is the capybara (*hydrochaerus* or water-pig). The tapir is met with frequently in the N. part of the state. The cougar or puma (American lion) the jaguar or tiger and the canoe are more widely distributed. Two species of catfish roam over the open plains the larger kind which is still inferior in size to the catfish of the Old World is rarely found S. of the Rio Negro. *Elle blanchi* and *taconito*, both allied to the marmoset, burrow in the plains, they live in numerous communities, and plainly undermine the ground which thus becomes dangerous to horsemen. The armadillo, of several species, and the agouti are often eaten. Of the birds, the most numerous and remarkable are of the predaceous kind. The condor, gallinazo and caracara vulture, attack wounded animals. The Turkey buzzard feeds on zeals and shell-fish. Three species of parrots inhabit the Pampas. Further N. at Salta, the Gran Chaco, and along the banks of the Parana and Paraguay parrots become numerous, and the endlessly varied plumage of the tropical region begins to make its appearance. But the animals indigenous to these vast plains have been expelled, and superseded to a great extent by introduced species, chiefly the horse and horned oxen of the Spaniards. It is supposed that the province of Buenos Ayres alone possesses 4,000,000 head of cattle. The horses are not quite so numerous. Of the latter the greater number roam in the wild state in droves of from 6000 to 8000. Sheep also are numerous in the W. provinces, where the country is elevated. The horse of the Pampas is small and coarsely formed, but at the same time active, and capable of great labour. The multiplication of the horse has completely changed the manners of the aboriginal tribes who are now wholly equestrian and subsist chiefly on mares' flesh.

Botany.—The plants of La Plata collectively present but scanty vegetation and few species. These vary considerably from S. to N. N. of the Rio Negro, where the coarser shrubs of the S. plants grow very to the soil of the Pampas, herbage grows more abundant than in S. latitudes and even thickets or as they are there called woods composed chiefly of a kind of willow occur in some places. The deficiency of trees is still apparent in Entre Rios, but the banks of the Parana are clothed with fine timber, and, on approaching the tropics, as well as the Cordillera, the vegetation becomes varied and luxuriant. Still the most common plants of Gran Chaco are thorny mimosas, and varieties of cactus. It is at the foot of the Cordillera, in Salta and Mendoza, that palm-trees and the usual ornaments of tropical forests are first met with. The indigenous plants as well as animals of this region have been to a great extent superseded by introduced species. The apple-tree, which now forms great forests S. of Chili from Valdivia across the Andes to the sources of the Rio Negro, has been planted by the Indians fur or N. also at the E. base of the Cordillera. The peach-tree found also more rarely in the same situations covers the lands towards the mouth of the Parana, and supplies Buenos Ayres with fuel. It is planted for this purpose, in preference to every other tree, on account of its rapid growth. But the most dominating plants are the carob (a wild arbutus) and the thistle, which occupy thousands of square miles W. and N.W. of Buenos Ayres. The thistles grow to such a height as to conceal a man on horseback, and so rapidly that travellers, surprised in the interior of the thistle region when the plant first shoots up, have little chance of extricating themselves from the miniature forest which in a few days surrounds them. The cactus thickets further N. are almost equally formidable. In Mendoza, the vine finds a congenial soil and climate, and excellent wine could be made if a demand existed for it.

Production.—The chief wealth, it is obvious, of the provinces of La Plata, consists in the droves, herds, and flocks, spread over the Pampas. The agricultural products likewise available for exportation, is of little importance. The herds of the Pampas furnish annually for export above 8,000,000 hides to these must be added about 250 000 horse-hides. The following quantities were imported into Great Britain in the years 1845-1851:—

Skins and Hides Imported from the river La Plata.

| Importation | 1845. | 1846. | 1847. | 1848. | 1849. | 1850. | 1851. |
|-------------|---------|--------|---------|---------|---------|---------|---------|
| Leopard. | 268,240 | 48,206 | 162,570 | 120,300 | 298,776 | 107,100 | 178,800 |
| Lion. | 219,500 | 18,6 | 181,300 | 300,000 | 300,000 | 188,200 | 236,300 |
| Ostrich. | 86,800 | 11 610 | 36,300 | 44 100 | 86,600 | 117,000 | 81 900 |
| Total. | 564,540 | 67,806 | 580,170 | 720,300 | 673,076 | 494,800 | 505,400 |

The preserved or jerked beef (*chekyru*), that is dried in the air, exported in the year, averages about 500,000 cwt. The bones, horns, and hair of the cattle are also exported with goat and sheep skins, the fine furred skins of the otter and beaver. The yearly export of tallow may be estimated at the value of £200,000, that of wool at from £200 000 to £700,000. The wool has been improved of late years, and much of it now of a very fine quality. The total value of the exports may be taken in round numbers at £4 000 000. The value of the imports is not so easily estimated, but may probably be taken at about the same amount as the exports. The following table shows the quantity of British cottons, silk laces and woollen manufactures imported into the river La Plata for four years:—

| Year | COTTON MANUFACTURES. | | | Silk and other fine manufactures. | Woolen manufactures. |
|------|-----------------------|---------------------------------------|-----------------------|-----------------------------------|----------------------|
| | Yds. of Cotton Cloth. | Yds. of Cotton Cloth and other goods. | Yds. of Cotton Cloth. | | |
| 1846 | 13,200,000 | 7,645,469 | 476 | 6,593 | 30,258 |
| 1849 | 12,750,000 | 1,701 918 | 10,282 | 40,408 | 8 694 |
| 1850 | 11,995 173 | 9,045,519 | | 18,926 | 18 893 |
| 1851 | 6,462,737 | 6 585,736 | 18,610 | 5,014 | 55,978 |

The number of vessels employed in the trade of La Plata in 1849 and 1850 averaged 483 of these 91 were British, the other foreign flags success according to their number in the following order:—the U States, Havana, Germany (Hamburg chiefly) Brazil and France.

People and Manners.—The provinces of La Plata labour under a misfortune common to all the S. American States, namely that of being occupied by a heterogeneous population, susceptible of intimate cohesiveness. The indigenous tribes belong to three races—the Ayacuzans, which includes the Patagonians, the Pampas, and others, who now roam o r the plains as far N. as the Rio Salado, the Peruvians, speaking the Quechua language which now reaches E from the Cordillera as far as Santiago. To this language belongs the word *Pampa*, which signifies a treeless plain. N of the Salado and E of the Parana the predominating race is that of the Guaranis or Warunas which extends a long way N through Brazil. The Spaniards though comparatively few are now the dominant race. From their mixture with the native women have sprung up coloured races, differing according to the descent of their mothers, and forming, in the remotest districts, the majority of the population. In Buenos Ayres, and about the shores of La Plata, negro slaves were formerly numerous but at present only a few negroes remain, the slave-trade having ceased at the revolution, and slavery being abolished, but their progeny are still distinguishable among the coloured population. To the three races here mentioned, and the various coloured offspring of their intermixture, are to be added the Europeans of various nations (chiefly English, French, German, and Italian) who, as merchants or emigrants settlers, reside in the metropolis and form, in the remotest districts, the majority of the population. In Buenos Ayres, the better class of people are rapidly adopting European dress and manners. Their imitation of foreigners may be traced even to domestic arrangements, and the management of their houses. They consume their time in smoking the *siesta*, and promenading in the cool of the evening. The business and industry of the place are almost wholly in the hands of foreigners. The inhabitants of Buenos Ayres have but little education and are by natural constitution ex-

travely susceptible, of such peculiarity a curious proof is furnished by the fact, that the number of violent offences committed hereinafter considerably during the prevalence of the humid and disagreeable N winds. The lower orders, who are mostly of mestizo, and still more of *Mestizo* descent, unite the dissipation and love of gaming of the superior class, with the simple and rude mode of life of the Gaucho or rustic who is the true type of the Spanish-American in and around the Pampas. The Gaucho wears a jacket of coarse cloth or sheep-skin, and breeches of the same material, open at the knees. His poncho or mantle is a square woollen cloth, with a slit in the middle to admit the head. A coloured cotton handkerchief is tied over his head, and is surmounted by a wide straw hat. His boots are without a seam, being drawn without ripping from the hind legs of a horse, the angle at the hook-joints forming the heel of the boot. His ornaments are his spurs with immense rowels of silver and silver buckles on his breast and at his knees the handle of the large knife stuck in his waist-belt is also sometimes studded with silver. The women dress like the men in most respects, but their arms and neck are bare, and they are delighted when they can wrap themselves in shawls of the brightest colors. The ranch or hut of the Gaucho is constructed of sticks interwoven with oaters and plastered with mud the roof covered with straw rushes or cow hide, a hide or horse-skin covers the doorway. Within, the only vessels or utensils are some horses a small space paved with sheep trotters serves for a hearth the skulls of horses for stools. The Gaucho subsists almost wholly on beef and water pumpkins and the flesh of game, if within his reach, are luxuries little valued. He may be said to live on horseback, galloping perpetually over the plains, collecting his herds and droves, taming wild horses, or watching and slaughtering cattle. In such avocations he acquires a marvellous dexterity in throwing the lasso or noose, and the bolas or balls. This wild man is one of the most independent and proudest of mortals and covets with some traditional courtesy and dignity of demeanor the sentiments of a savage. His unrestrained mode of life, with abundant excitement, and few wants has its charms, and there are therefore many rich proprietors who live in houses in the better than ranchos and adopt all the rude, uncivilized habits of the Gaucho. In short, the spirit of the Gaucho who sleeps in the open air who spends his time in smoking, galloping or gaming and cares little for social development or political union pervades the confederate provinces of La Plata.

History.—In 1535 Don Pedro de Mendoza, on his way to Paraguay built a fort on the present site of Buenos Ayres, but that was soon destroyed by the Indians and it was not till 1580 that Don Juan de Garay took formal possession of the country and founded the city. At that time, and for nearly two centuries afterwards, the whole country, from the mouth of the Plata to the Pacific Ocean, Paraguay included, was comprised in the viceroyalty of Peru. The only advantage then recognized in the provinces connected with the Parana, was, that they afforded a communication with Peru. But the expectations thus conceived proved delusive, and La Plata became the channel not of a legitimate as much as of a contraband trade. In order to check this evil by vigorous government, La Plata, comprehending all the Spanish dependencies E of the Cordillera, was severed from Peru in 1776, and erected into an independent government. In 1809 the conquest of Spain by the French released the Spanish American governments from their ties with the mother country, and the revolutions which then ensued narrowed the limits of La Plata, Tarija, and some other districts on the Cordillera, being annexed to Bolivia, while Paraguay became independent. The commercial prosperity of the interior provinces associated with Buenos Ayres depended wholly on the latter, which commanded the entrances of the Parana and the intercourses with Europe. But Buenos Ayres failed signally in the attempt to establish freedom on a basis of domestic order and stability and in respect to the associated provinces, it was always actuated by a selfish policy. Hence the discontent and disorders of the state. Between 1810 and 1886, Buenos Ayres had no fewer than thirty-six changes of government. In 1834, a general congress, decided by a large majority in favour of union, in preference to federation. But, as the government of a united republic would probably consist for

the general advantage, whereas the government of Buenos Ayres, studying its exclusive interests, would be sure to rule in a confederation, the vote in question was practically annulled by the violent opposition of the latter state. Buenos Ayres, awayed by predominant local interests, was unwilling to renounce its control over the navigation of the Paraná, or to cease to be the sole port of entry and thus Death to the savage nationalists because the popular watchdog of the state. In 1835, Don Juan Manuel de Rosas, whose successes, achieved against the Indians in the Pampas had made him the idol of the Gaucho population, was elected dictator of Buenos Ayres, with unlimited powers. He possessed the stern energy requisite for the management of his half-civilized countrymen but he was as incapable as they of comprehending the prospective benefits of a liberal and enlightened policy. Rosas, though secure from within, he provoked numerous enemies from without. His obstinate contest with Monte Video gave rise to the blockade of the Buenos Ayres waters by the British and French and to the alliance of Brazil with his enemies in Uruguay, and finally to the invasion of Buenos Ayres by Urquiza, the governor of Entre Rios, when Rosas being defeated (February 1852) fled to England. The immediate consequences of this was, of course, that the navigation of the Paraná was declared open.—*History of the Viceroyalty of Buenos Ayres*, ed. by Gen. H. Wiedemann, 1807. *Buenos Ayres*, and the *Provincias de La Plata*, by Sir Woodbine Parish (2d edition) 1852. *Two Thousand Miles Ride through the Argentine Province*, by Wm M Lann 1858. *Coleccion de Obras y Documentos relativos a la historia Antigua y Moderna de las Provincias del Rio de la Plata* por Pedro de Angelis, 1836 &c. *Essays de la Historia civil del Paraguay Buenos Ayres y Tucuman*, por el Don Gregorio Funes, 1816. *Gegenwart und Zukunft der Plata-Stadt*, etc Hamburg 1852.

PLATA (Rio Tr.) See PLATA LA (UNITED STATES)

PLATAEA an ancient in Greece, near the modern vil Kolia, 30 m N W Athens. The whole circuit of the ancient walls may yet be traced and the acropolis, probably of the date of Alexander the Great, is very distinct.

PLATAMONA [ann. Heraclea] a small maritime town in European Turkey, Phrygia, W side Gulf of Selomuk 17 m S E Mount Olympus with a strong castle or citadel on a rock.

PLATANA a small maritime in Asiatic Turkey on the S E coast of the Black Sea, 10 m N Trebizond where the ships that trade with the latter port find anchorage in the winter season.

PLATANI [ann. Comana] a river Sicily rises on N slope Neptunus Mountains near Val dell Olmo, flows S. and W through provs. Catanzaruta and Girgenti and falls into the Mediterranean after a course of 75 m.

PLATANOS a town in Turkey in Asia S coast Samos in a healthy district. It consists of about 300 houses, and has two churches.

PI AHER, a town in Prussia, gov and 86 m N E. Steklin 1 bank Rhine, with manufactures of woollens and serge and a general trade. Pop. 17,1.

PIATIGORVA a vil Austria, Slavonia 23 m P W Peterwardein with a Greek church. Pop. 1199.

PLATO a pretty little town in New Granada, prov Santa Marta, 42 m N W Mompos on bank Magdalena with a considerable trade. Pop. 8000.

PLATTE —1, A river, U States, rises in the Rocky Mountains by two branches, one on the frontiers of Oregon and the other on the frontiers of Utah 250 m apart, and called respectively the N and S forks of the Platte, they flow E and unite 400 m from their source, when the united stream, flowing mostly E, falls into the Missouri on the frontiers of Iowa, 80 m S Council Bluffs, after a course of about 1600 m. Principal affluents, the Elk horn and the Loup Fork. It is from 1 m to 8 m broad but is so shallow and encumbered with islands, and has such a rapid current, that it cannot be navigated.—2 Little Platte, a river, U States, rises in Iowa, flows S into the state of Missouri and joins the river Missouri 160 m W E W Jefferson City, total course, 150 m.

PLATTEN Flay, on Saxony, a mining to Bohemia, circle and 14 m N Elbogen, on the Plattenberg, with a church, headquaters townhouse, and hospital. Near it are mines of tin and iron. Pop. 1860.

PLATTEN See, a lake, Hungary See BALAZON

PI ATILING a market in Lower Bavaria, on the Isar here crossed by a bridge, 80 m N W Passau with three churches, a trade in cattle, and several mills. Pop. 1219.

PLATTSBURG a town in New York, on both sides of the Saratoga, near its mouth in Chamberlain Bay W shore of Lake Champlain 150 m N Albany. It has recently made rapid progress and has four churches, a lyceum, academy and three schools, a courthouse, and other county buildings, manufactures of leather machinery, woollen and cotton cloth; numerous saw and other mills and a considerable trade. Plattsburg has been selected as a military station, and large stone barracks have recently been erected on the shore of the lake in its vicinity. Some severe fighting, both by land and water took place here in 1814, between the British and the Americans, to the advantage of the latter. Pop. 5618.

PLATZ or STRAZ a market in Bohemia circle and 21 m E N E Budweis on the Vozarka with a castle townhouse church school a paper and an iron mill. Pop. 1823.

PLAL or PLALA, two lakes, Germany.—The one in Mecklenburg Schwerin forms a very irregular expanse, about 9 m long N to S, by 8 m broad, receives the waters of Lake Eiken on the E, and discharges itself on the W into the Fide.—The other in Prussia, prov and a little below Brandenburg. It is an expansion of the Havel and is a main feeder of the canal of Flana, connecting the Havel with the Elbe.

PI AU, a town, Mecklenburg-Schwerin circle Wundsch, and on a lake of same name, 35 m E S E Schwerin. It is walled, has three gates, a Gothic church, savings bank and a dispensary manufactures of woollens and lace, boot building yards, a distillery, some general trade and several mills. Pop. 2625.

PLAUF a town Schwarzenberg-Sonderhausen, 1 bank Gere 18 m E E Gotha with a church, a townhouse an old castle in ruins, manufactures of porcelain a blacksmith and a trade in cattle. Pop. 810.

PLAUVEN, a town Saxony, circle Zwickau in a basin Pöl valley 1 bank Elster 78 m W B W Dresden. It is walled and has a castle, several churches, a gymnasium normal school orphan and two other hospitals manufactures of machinery watches philosophical instruments blood, leather wax-cloth and screens, calico printfields dye works, paper spinning, and other mills and a pitch-oven. 18th century the inventor of Dresden porcelain, was born here Plauen is an ancient place, and in 1430 was pillaged by the Hussites. Pop. (1849), 11,871.

PI AVNA a vil Hungary Hither Danube co and 9 m S W Bacs with a church. Inhabitants employed in agriculture and in fishing. Pop. 124.

PLAYDEN par Eng Sussex 1808 ac. Pop. 314.

PLYM, a river England, which rises in Dartmoor Forest, co. Devon, flows S.E.W. and after a course of 18 m. falls into Plymouth Sound at Plymouth.

PLYMOUTH, a seaport in mun. and pari bor. England, co. Devon, on the Sound of same name between the estuaries of the Plym and Tamar and at the terminus of the South

Devon Railway 36 m. S.W. Exeter; lat. (Mount Wise) 50° 22' N. lon. 4° 10' 15" W. (s.) Taken in its largest sense, it comprehends what are called the Three Towns, or Devonport on the W. Stonehouse in the centre, and Plymouth proper on the E. but as the first is described under its own name, and includes the second in its parliamentary borough, the present article refers only to the third. Taken in this restricted sense, Plymouth covers an area of about 1 sq. m. bounded by the Sound and Catwater harbours on the S. and extending from Mill Bay on the W. to the mouth of the Plym on the E. The site is uneven, and somewhat rugged, consisting of a central hollow and two considerable eminences, one on the N., forming the suburbs, and the other called the Hoe, on the S., partly occupied by the Citadel, and partly laid out as a promenade. The older parts of the town consist of narrow and irregular streets, devoid of architectural beauty and often steep and winding. But great improvements have recently taken place, particularly in the suburbs, where many handsome terraced ranges of buildings, and detached villas have been erected. Among others may be specified the noble pub

of houses forming the esplanade on the Hoe. The market place, well situated near the centre of the town, is approached by three principal entrances, and though irregular in shape has an extent of nearly three acres. Water supplied by a stream brought by the skill and perseverance of the celebrated navigator Sir Francis Drake, from the source of the Mersey in Dartmoor, by a winding channel nearly 24 m. long, is both ample and excellent. The public buildings include, in addition to the two parish churches of St. Andrew and Charles the Martyr, several places of worship connected with the Establishment, and numerous Dissenting chapels, of which

the Independents have five, the Wesleyan Methodists three, the Baptists two the Plymouth Brethren two, the Unitarians, Friends, and several other denominations, one each. The other remarkable edifices and establishments are the Citadel, situated on a bold headland, built chiefly of limestone and granite and flanked by three regular and two irregular bastions; the Royal Hotel and Theatre, a large and elegant pile of buildings in the Grecian style, erected in 1813; the Post-office, on the model of a temple of Vesta at Tivoli in Italy; the Guildhall; the custom-house, a large and handsome granite structure, the exchange, the almshouse; the

mechanics institute, possessed of a well-arranged and highly decorated hall the Plymouth and Cottesdon public library, containing, in addition to 10,000 vols., many of them rare and valuable, a large collection of original MSS., a splendid and entire series of prints and numerous articles of vertu the Grammar, Free, National, and various other endowed schools the Western College, or Congregational Theological Seminary the Public Dispensary Female Penitentiary, Orphan Aid Hospital, Merchant Beaman's Hospital, Eye Infirmary almshouses workhouses, baths, the new borough prisons, the government prison, now partly converted into barracks the Royal Botanic Gardens, and the cemetery consisting of a tastefully laid-out enclosure of 10 acres.

The manufactures include soap, millolite, brushes, Roman cement, earthenware, rope and twine, &c., and there are also building yards, foundries two sugar-refineries, breweries, starch works, and flax, saw and flour mills, together with extensive limestone quarries on the Hoe. The fisheries, chiefly of whiting, hake, and mackerel are very productive. The trade also, both coasting and foreign—the former carried on with London Bristol, Newport, Exeter &c., and the latter chiefly with America, the W. Indies, Baltic, Mediterranean, and Australia, the last subject of especial notice—a very important port. The port of Plymouth includes all the harbours, rivers, and creeks, between the Looe on the W and the river Yealm on the E. The parts of the port chiefly appropriated for mercantile shipping are Sutton Pool and Mill Bay particularly the latter where extensive wet-docks are being formed, and the largest vessels lie in safety along its fine pier and pontoon even at low water. But Plymouth owes its celebrity not so much to these as to its importance as a great naval station, for which the spaciousness of its Road, and the depth of water retained by its arms after penetrating far into the mainland, render it admirably suited. The Sound, however about 3 m. wide at its mouth being open to the S.W. winds, which here blow with great violence and throw in tremendous surges from the Atlantic, left vessels at anchor exposed to the greatest danger.

With the view of protecting the anchorage from this heavy swell, the stupendous national work, known by the name of the Plymouth Breakwater was undertaken, and has been nearly completed, at an expense of about £1,700,000. It consists of a central body of 1000 yards, and an arm or break at each extremity of 550 yards, making the whole length only 60 yards short of a mile. The height is from 56 ft. to 60 ft., the top 45 ft. broad and from two ft. to three ft. above the high water of spring tides, and the contents of the whole mass amount to 9,670,440 tons of limestone, together with 2,512,696 cubic ft. of granite, and other stone used in paving and fencings. On the W end of the Breakwater a lighthouse, 68 ft. above the platform, and visible at the distance of 8 m., except in foggy weather has been erected, but the entrance into the Sound is guided by the still more celebrated Edystone Light-house, which stands on a large cluster of rocks in the channel opposite to it, at the distance of 14 m. To secure the port against hostile attack, St. Nicholas, or Drake's Island, situated within the Breakwater, and connected with the S.W. shore by a range, or as it is called, Bridge of Rocks, uncovered at low water has been furnished with strong fortifications, which together with the citadel already mentioned, and several other batteries, are supposed to make it almost impregnable.

Plymouth, originally a fishing village, bore under the Saxons the name of Tamarworth, which, after the Conquest, was changed to that of Sutton, or South Town. It had been a considerable town under its present name in 1488, when a charter confirming its old, and granting many new privileges, was conferred upon it by Henry VI. In the reign of Elizabeth it obtained a new charter through the solicitation of Sir Francis Drake, to whom it was indebted for other important improvements, and on the threatened invasion of the Armada, equipped as its quota to the British fleet, which had here its rendezvous, seven ships and a 57-gun, a greater number than was furnished by any port except London. George III. with his Queen visited it in 1789, and Bonaparte arrived here in the *Méneclaire* in 1815. Plymouth is governed by a mayor, 12 aldermen and 36 councillors, and sends two members to the House of Commons. Among its more eminent natives are Sir Thomas Edmonds, a distinguished statesman during the reign of James I., Sir John

Hawkins, one of the admirals of the fleet which defeated the Armada; Jacob Bryant the antiquary and the painter, James Northcote, Frost, and S. Haydon. Pop. (1881), 86,419.

PLYMOUTH, several places, U. States.—1. A seaport in Massachusetts, on the N.W. shore of Cape Cod Bay, and on the Old Colony Railroad 40 m. S.S.E. Boston. It is the oldest town in New England, but every house of ancient date or antique form has disappeared and the larger part of the buildings are of modern architecture and have an air of neatness and elegance. The public buildings include six churches, a courthouse, two academies, numerous schools, and Pilgrims Hall. The last, belonging to Pilgrims Society so called because formed to commemorate the landing of the Pilgrim Fathers, is a plain and substantial granite structure, adorned with a Doric portico, and consisting chiefly of a spacious hall, containing many interesting relics of the pilgrims, and a large picture by a Boston artist, representing their landing here from the *Mayflower* Dec. 24, 1620. The manu facturing establishments include saw and flour mills, a tannery and several cotton-factories the cod and mackerel fisheries employ many vessels, and a considerable foreign trade is carried on, chiefly with the West Indies and Europe. The harbour though spacious is too shallow for vessels of the largest class and being only separated by a narrow belt of mud from the full fury of the Atlantic, has only been preserved from destruction by expensive bulwarks Pop. (1880), 6025.—2. A vil. and township New Hampshire, 36 m. N. by W Concord, with a courthouse, a church, an academy, 12 schools, several stores and a number of grist and saw mills tanneries, and potteries. Pop. 1281.—3. A vil. and township, Connecticut, 25 m. W Hartford, with an Episcopal church, 18 schools, a number of grist and saw mills, a tannery a woolen, and a cotton factory. It is celebrated for the manufacture of clocks. Pop. 2205.—4. A vil. and township, Michigan, 25 m. S.W. Detroit with a Presby terian church, 12 schools, a distillery a pottery and a number of flour and saw mills. Pop. 2103.

PLYMOUTH (New), or TALAHEE, a town and settlement, New Zealand, W coast, North Island, on New Ulster on a slope between the Hine-Toki and the Humei, 26 m. N.E. Cape Egmont. The settlement consists of a block of about 700 acres, and the town which has been well laid out, presents a pleasing appearance. It has a substantial granite church, Wesleyan and Primitive Methodist chapels, an hospital, a jail a library institute and public library, a large Wesleyan mission school a tannery, two breweries, three flour-mills and two whaling establishments. The agricultural capabilities of the settlement are described in the most flattering terms, but a serious obstacle to its rapid progress is the want of a harbour. The roadstead though spacious, 10 to 12 fathoms deep, and sheltered on the S.W. by the Sugar Loaf Islands, is exposed on the W and N.W. whence the wind often blows with extreme violence, but the ground becomes so foul, and the water shallow, and the surf increases so much that no vessel of any size can safely approach within 1 m. of the shore.

PLYMPTON (St Mary), par. Eng. Devon, 1893 ac. Pop. 2815.

PLYMPTON EARLS, a small market tn. and par. England, co. Devon, 4 m. E. Plymouth with a station of the South Devon Railway. It has a church, a place of worship for Independent Calvinists, well endowed grammar or free school venerable old guildhall and near it are the remains of a castle founded in the reign of Henry I. Plympton Earls was the birthplace of Sir John Bayly, his father having been master of the grammar school. Area of par., 373 ac. Pop. 883.

PLYMBOCK, par. Eng. Devon; 3650 ac. Pop. 5502.

PLYMPTREE, par. Eng. Devon 1161 ac. Pop. 468.

PO (Latin, *Padanus*), the largest river of Italy, in respect both of its length and its volume of water; and hence styled by the Italians, the Father or King of Rivers. It rises on the confines of France and Piedmont in Mount Viso, one of the Cottian Alps, and flows rapidly towards the character of a mountain torrent, till, after having been augmented by several other mountain streams, it reaches Lombardy. Here it begins to be a majestic stream, and turning N., passes Turin. Shortly after, it assumes an E. course, traverses Piedmont, and reaching the southern of Lombardy, in Austrian Italy, is greatly augmented in volume by the accession of the

Thence on the left. Here, still continuing E, it forms the boundary between Austria Italy and Parma, passing Piacenza on the right, and Gremona on the left. After skirting the N W portion of Modena, it again enters Austrian Italy, first turning suddenly N, and then again resuming its E. course. It afterwards forms the boundary between Austrian Italy and the Papal States, throws off several branches, and finally dividing into two principal arms, enters the Adriatic by two mouths, about 16 m distant from each other, the larger and N arm taking the name of Po di Maestra, and the less, but most frequented, that of the Po di Goro. Its principal affluents are, on the left, the Cinesca, Sengone, Dora Ripaire, Stura, Dora-Baltes, Sesia, Agogna, Terdoppio, Ticino or Tesin, Olona, Lamuro, Adda, Olivo, and Mincio, on the right, the Vraia, Tanaro, Savaria, Bialfara Trabbia, Nura, Taro, Parma, Enza, and Panaro. Its direct course, almost due E is 270 m; its course, including windings, about 450 m. After its first 60 m it begins to be navigable by small barges, but its navigation throughout meets with numerous interruptions. Below Piacenza, it is confined by artificial embankments, which are said to have originated with the ancient Etruscans and notwithstanding the immense sums which have been expended upon them, and the engineering skill which has been exerted in order to render them perfectly secure, the most disastrous inundations have repeatedly taken place. The embankments themselves have in one sense added to the danger. The deposits made by the river are perpetually tending to raise the level of the water. This makes it necessary to make a corresponding increase in the height of the embankment and the effect of these combined operations has been to lift the river so high above its natural bed, that it is actually on a level with the tops of the houses in the city of Ferrara. The Po is well supplied with fish including among others the shad, salmon, and sturgeon. The last is not fished in any other river of Italy.

PO a group of hills, Indian Archipelago. See RO.
PO-YANG a lake, China, in N part of prov Kiangsee. It is about 80 m. long by 40 m. broad and discharges its surplus waters into the Yang-tse-King.

POBLA, several places Spain Catalonia particularly — 1 (de Charvonnat) A vil. prov and N Barcelona, with a new and handsome parish church a primary school, manufactures of paper, cotton twist, copper and cotton ware, a distillery and several flour-mills. Pop. 1186.—2 (de Llet, or La Pobla), A m. prov and 84 m. N N W Barcelona, near the Llobregat with steep, narrow and winding streets a church, a suppressed monastery primary school and the remains of a Moorish castle and manufactures of cotton cloth belts, and worsted. Pop. 1287.

POBLEDA, a in Spain, Catalonia, prov and 22 m. N N W Tarragona with a church, courthouse prison, and primary school flour and oil mills, numerous distilleries and a trade in wine and brandy. Pop. 1753.

POCKINGTON a market in and par England, co and 13 m E by S. York, at the foot of the Wolds. It has a large and handsome parish church in the early English style, places of worship for Independents, Primitive Methodist, and Wesleyans, a R. Catholic chapel, a free grammar and national school, a mechanics institute, and temperance hall. Inhabitants chiefly engaged in agriculture. Arm of par., 4688 ss. Pop. 2761.

POCOMOKE, a river U States, rises in Dismal Swamp, on the confines of Delaware and Maryland, flows S W and falls into a bay of same name, a branch of Chesapeake Bay after a course of about 70 m, navigable to Snowhill.

POCOONIE a in Brazil, prov Mato-Grosso, on a height 60 m S W Curitiba. The houses are made of trunks of trees, plastered over with clay. It has a church, two primary schools, terraces, and prison, and a trade in sugar, rum, and cattle. Many of the inhabitants have from 6000 to 10,000 head of cattle. Pop. dist., 2600.

POCH, or MARIA-POCH, a vil Hungary, Tithier Theiss, co. Szabolcs, 4 m. from Bacher with a Greek and a R. Catholic church, a Basilian cloister, and a national school. P. 2366.

POCEJANY, a in Bohemia See POLONATSKY.

POD-BOLDOK or BODO-KÉO-YARALATA a market in Hungary, co. Abonyvár, 5 m. from Tallya with an old castle, and a handsome chateau. Near it are vineyards, from which an excellent wine is made. Pop. 1367.

PODBORJE, a market in Austria. See DABUWAL.
PODEBRAD or PODERAB, a in Bohemia, 31 m. N. Prague 7 bank Elbe, here crossed by a chain-bridge, and on the Vienna and Prague Railway. It contains a deanery church, with monuments and pictures a townhouse, military hospital and old castle, in which George, king of Bohemia, was born in 1420, and has a breeding stud, several mills, and some weaving and general trade. Pop. 3534.

PODORA, a vil Austria, Dalmatia, circle Spalato, with a church. Pop. 1259.

PODGORITZA, a in European Turkey, Albania, 33 m N Soutari, 1 bank Moritza, at its confluence with the small river Ohluma, over which there is a long wooden bridge. Pop. 6000 four-fifths of whom are Macedonians.

PODGORZE, or JONKRISTANT, a royal free in Austrian Galicia, circle Bochnia, r bank Vistula, opposite to Cracow with whose suburb, Kazimierz, it communicates by a long floating-bridge. It is well built has a handsome market place, a R. Catholic and Lutheran church, a high school, and a considerable trade, particularly in salt. Pop. 1907.

PODHOR (F, or PODARSK, a river rises on the frontier of Austrian Galicia and the Russian gov. Podolsk, flows S here forming the boundary between the Austrian and Russian territories and joins 1 bank Dniester a little above Chotyri after a course of about 100 m.

PODIERAD, a market in Bohemia, circle and 5 m N N W Budweis, on the Moldau, here crossed by a bridge. It has church and a castle, saw mill and a tile work. P. 891.

PODILKINE (Mirons) par Eng Somerset, 280 ss. Pop. 138.

PODKAMITN, a in Austrian Galicia, circle Zloczow, E by N Lemberg, with a Greek Catholic church and a Dominican monastery. 1 op 2800.

PODKILAVA a vil Hungary Either Danube, co. Neutra, 12 m. from Freyenthal, with a church and a flour-mill. Pop. 1042.

PODOI, or PODOLAK a in Russia, gov and 23 m S Moscow on the Tschirch. It has a wooden palace, a church, a district school and some manufactures of silk. Pop. 1000.

PODOLA a vil Hungary, co and 32 m N N W Neutra, r bank Dunay, with a flour-mill. It is situated by Slovakia. Pop. 1217.

PODOLIN See PODLEIN.

PODOLSK, or PODOLIA a gov Russia, bounded N by Volhynia, N E Kiev, E and S Kherson, S W Bessarabia and W Austrian Galicia, lat. 47° 23' to 49° 50' N lon 28° 10' to 30° 55' E. greatest length N W to S E 250 m greatest breadth, 50 m area, 11,808 sq m. The surface, though on the whole level is considerably diversified being traversed from N W to S E by a low branch of the Carpathians, which gradually descends towards the S and is finally lost in a kind of steppe. None of the hills of this branch have a height exceeding 600 ft. They form the water-shed of the government sending its waters on the N E side to the Bug and on the S W to the Dniester and ultimately through both to the Black Sea. There are no lakes of any consequence.

The climate is temperate, bringing both the vine and the mulberry to maturity and the air is generally salubrious, though in some quarters malarious diseases occasionally prevail. The soil is very much unimproved with stones, but is notwithstanding of remarkable fertility, producing corn, which, after satisfying the consumption leaves about one-third of the whole for export. The principal crops after oats, are, hemp, flax tobacco, and hops. The meadows and pastures are extensive, and of great luxuriance, rearing immense herds of cattle, which are of an excellent breed, and much prized in Germany to which they are extensively exported. A large quantity of fine melons, gourds, and cucurbits are raised and the forests furnish excellent ship timber. Manufacturers have made little progress, the chief product is brandy. The trade, in addition to agricultural produce and cattle, embraces a considerable number of small articles, and is almost entirely in the hands of the Jews. Education is under the superintendence of the university of Kiev, and is in a miserably neglected state. There is only a single printing press. 1 odolek is divided into 13 districts, and together with Volhynia, is under the military governor of Kiev. Pop. 1,400,000.

PODOR a vil, W Africa, Fouta-Toro, 1 bank Senegal, lat 16° 30' N lon. 15° W. It is of considerable size, and

chiefly inhabited by husbandmen and fishers. It was formerly an important position occupied by the French.

PODVLK or **PODOLSK**, a vil. Hungary, co. and about 20 m. W. Arva with a church, manufactures of, and a trade in, linen. Pop. 1050.

PODVLK or **PODOLSK**, a tn. France dep. Alpes Maritimes, 37 m. W. Nice, on a gentle slope above 1 bank 1/2 m. near the former frontiers. It was once strongly fortified but is now open, and consists of six squares and eight streets. It has a parish church a civil hospital a school a gratuitous school a charitable endowment, maritime fairs of woollen cloth a falling and several oil mills. P. 1168.

POGGIBONDI, a tn. Tuscany near r. bank Elsa 19 m. S. Florence with a collegiate and several other churches an old castle, a theatre, and hospital and a trade in corn, oil and wine. Pop. 6003.

POGGIO a vil. and com. Italy Venetia. prov. and 18 m. R.E. Mantua. It is a straggling place with a church, and an annual fair. Pop. 8548.

POGGY ISLANDS (N and S.) two isls. off S.W. coast, Sumatra. N. Poggly is about 21/2 long N.W. to S.S.W. and about half its breadth. lat. (S. point) = 8° 5' S. lon. 99° 37' E. (S.) It produces excellent timber for ships masts and spars, many of the trees measuring 97 ft. below the branches. S. Poggly lies S.S.E. the former from which it is separated by a narrow channel called Sikakap Strait; lat. (S. point) 3° 31' N, lon. 106° 41' E. (N.) It is about 86 m. long and 9 m. to 12 m. broad. The sea-coast of both islands, in several places where the land is low, abounds with coconuts, and some small spots have been planted with pepper vines.

POGITELE, a tn. Turkey in Europe Hierapetra 1 bank Narenta, near the frontiers of Dalmatia, 34 m. N.W. Ragusa. It occupies a singular and picturesque position in a semicircular recess on the side of a hill and is inclosed on the upper side by a semicircular wall, terminated at each end by a tower, while, from the projecting extremities, walls stretch down from the summit to the river. The houses stand perched at different stages on the rocky ascent and near the centre of the lower part is a mosque, with a dome and elegant minaret. Pogitel was formerly fortified, and was one of the strongholds of the old duchy of Sabia, taken by the Turks in the 15th century. Though not now capable of a strong defence it is regarded as a place of importance and is always governed by some distinguished person.

POHORELLA, a vil. Hungary Hither Thiers, co. and 41 m. E.N.E. Mesech r. bank Gran with a church and iron works. Pop. 1942.

POHRELTZ, or **POHRELTZ**, a market in Austria, Moravia, 17 m. S. by W. Brün, on the Igau with a church and a synagogue. Pop. 1710.

POINT A FORT, a tn. W. Indies, Isl. Guadeloupe, dep. Grande-Terre 25 m. N.N.E. Baie-Terre. It is built chiefly of stone, has three public squares, a court of first resort, several public offices, many handsome edifices, and at the mouth of the entrance called Riviere Salée, one of the best harbours and safest anchorages in the Antilles. The trade of the far greater part of the island centres in it. It suffered greatly from a hurricane in 1823. Pop. about 15,000.

POINT DE GALLE, a fortified seaport to Ceylon on a peninsula on the S. coast 25 m. N.W. Matara, and 70 m. S.S.E. Colombo. lat. 5° 17' N. lon. 80° 17' E. The appearance of Galle from the sea is singularly beautiful and picturesque. To the right is the fort, with the old walls and fortifications, jutting far into the sea. In the centre of the town, and rising above every surrounding object, are the two gables ends of the old church built by the Dutch. Further on is the quay surrounded by multitudes of canoes, and on a height is a neat and beautiful St. Catholic chapel while close to the harbour is the active town and bridge wharf, and shaded by numerous trees, the whole backed by verdant hills clothed to the summit with woods, and the most luxuriant vegetation. The fort is more than a mile in circumference, commanding the whole of the harbour but in its turn commanded by a range of hills about 700 yards distant it contains, besides the ordinary public buildings, a great number of houses occupied by Moorch families, and a mosque, a Dutch church, a Wesleyan chapel and some shops. The trade of Galle chiefly consists in coir rope, coconuts, nut oil, arrack, clays, rock, coffee, cotton, steel, every commodity, and various shells. The entrance to the bay

is about a mile wide, the soundings in it from 7 1/2 to 44 fathoms, but rendered somewhat intricate by shoals. The outer road is spacious, and in the inner harbour ships may lie in perfect security in 5 or 5 1/2 fathoms abreast of the town. The mail steamers from Aden to Calcutta and China sail regularly at Point-de-Galle — (Ziridh's *Ceylon, Rangoon & E. I. Directory*).

POINT PALMYRAS a promontory and small tn. Min doucas prov. Oran, on the Bay of Bengali, 90 m. S.W. the mouth of the Haghighy; lat. 20° 45' N; lon. 87° 5' E.

POINT PEDRO the N. extremity of Isl. Ceylon; lat. 9° 45' N; lon. 80° 30' E.

POINT RAZ, a promontory France. See RAZ-DE-RAZ.

POINTINGTON par Eng. Somerset, 10 1/2 m. S. P. 188.

POINTYFAS a small tn. Ireland, co. and 12 m. W. by S. Armagh with a church, R. Catholic chapel and school.

POIRIAO a tn. Italy Piedmont, div. and 14 m. S.S.E. Turin 1 bank Honna. It has two squares a fine public walk a court of justice, four churches, a Capuchin convent, a school, an hospital, a charitable endowment, and two old castles, one of them surrounded by four towers. Pop. 5668.

POIRCHWITZ (Oden and Nuxna), two nearly contiguous vils. Prussia prov. Sillesia gov. and 13 m. S. Jagiutia, with a Protestant and a R. Catholic church a castle, and two mills. Pop. 1975.

POISDORF a market in Lower Austria, 40 m. N.P. Vienna; with a church, a horse, cattle, and corn market. Near it are the interesting ruins of Falkenstein. Pop. 2600.

POISSY (Lat. *Poisson*) a tn. France, dep. Seine-et-Oise 11 m. S.W. Versailles, on the railway from Paris to Rouen, 1 bank Seine, here crossed by a very long and ancient bridge. It is ill built, has a gloomy look and is extremely dirty. It has a weekly cattle market said to be the largest in France. The number of beasts annually sold, almost all for the Paris market, has been stated at 77,000 oxen, 18,000 cows, 45,000 calves, and 330,000 sheep. Poissy is famous for a series of conferences held in 1661 in the vain hope of reconciling the differences between the R. Catholic and Protestant churches — Benx taking the lead on the one side, and Cardinal Feltre the papal legate on the other. The first conference was attended by Charles IX. and his mother Catherine de Medici. 1 op. 9785.

POITIERS (Latin, *Poitennus*) a tn. France, cap. dep. Vienne 179 m. S.F. Paris. This place occupied is far larger than the actual population requires, much of it being laid out in gardens, and even extensive orchards, and hence much of the town has a deserted and lifeless appearance. The only scene of much activity is the market-place, which in general is densely crowded. The principal edifices are the cathedral said to have been founded by Henry II. of England in 1162, a large and majestic structure, in a style exhibiting the transition from the Romanesque to the Gothic. 326 ft. long, 99 ft. broad, and 91 ft. high, and flanked with two towers, similar in shape, but of unequal size the church of St. Radegonde the temple of St. Jean once used as a church and now converted into a Musée or picture-gallery the church of St. Hilaire, the prefecture, the palais de justice, and the public library of 25,000 vols. Besides these are several interesting Roman remains, particularly the imposing ruins of an amphitheatre, larger than that of Nimes, and capable of containing 25,000 spectators. The manufactures, which are not of much importance, consist of coarse woollen cloth, woollen covers, hosiery, lace, leather playing-cards, and vinegar. The trade is in clover, linseed, and sainfoin seeds, corn, wine, hemp, flax, wax, honey, leather, sheep, and particularly goose skins. 1 others is the see of a bishop has a court of appeal for dep. Vienne, Charente-Inférieure, Deux-Sèvres and Vendée a court of first resort and commerce, a consulting chamber of manufacturers, a society of agriculture belles-lettres, science and art, a university academy, a school of law a college, a secondary school of medicine, a free school of design and architecture, a botanical garden, and departmental nursery. Near it, in 723 Charles Martel defeated the Saracens and, in 1356 Edward the Black Prince, with about 14,000 men defeated King John of France, at the head of 60,000. Pop. (1853), 24,495.

POITOU, a former prov. France, bounded N. by Anjou and Bretagne W. by the Bay of Biscay, S. by Brittany and Anjou, and W. by Touraine Berry, and Marche. It was divided into

Upper Poitou, capital Poitiers, and Lower Poitou, capital Fontenay. It now forms part of depts. Vienne, Deux Sèvres and Vendée.

POIX, several small places, France particularly—1 Poix [Latin Pisse] a tn and com, dep. Somme, 17 m S.W. Amiens generally well built, with an ancient church and trade in corn and cattle Pop 1000.—2 A tn., dep. Nord near Avesnes. Pop. 2057

POJNIK a market tn. Hungary Hither Danube, co. Soh! 8 m. E S E. Neusoh! with two churches, and a considerable trade. Pop 1061

POKROVSKAIA, a tn. Russia, gov and 4 m. S E Saratov l bank Volga with an extensive trade in salt which, after being made on the shores of Lake Elton is stored here in large magazines Pop about 1500

PÖL, or **POEL**, an Isl. Baltic, belonging to Mecklenburg
Schwerin, about 1 m. off the mainland 6 m N Wismar
about 6 m. long by 3 m. broad. It is of considerable fertility
and at its S side is penetrated by a bay at the extremity of
which stands a small town of the same name, with a church.
Pop. 1690

3. **POL** (Fr' two places, France.—1. (*sur-Ternove*) [Latin *Sanctus Paulus*], a tn dep. Pas-de-Calais, the intersection of two European highways, 30 m W N W Arras. It was once a place of considerable strength, and it is both irregularly and indifferently built. It has communal college manufactures of soap and caeks several breweries and brick and tile works. Pop. 81428. —2. (*de-Leon*) [Lat *Ruticonensis* Portus], a tn dep. Finistère, 10 m W W Morlaix, on a slope which descends gradually to the sea-shore. It is clean and well paved, but in general ill built. It has two fine churches

—one the cathedral with two towers pierced with long and elegant lancet-windows and terminating in open spires and the other the church of Kreisker with a richly-ornamented square tower surmounted by a gables spire formed of open work, of remarkable lightness and grace, the whole 98 ft high. The only manufacture is linen but the small harbour of Penpol a short way off, enables it to carry on a trade in hemp, flax, thread, linen, paper wax honey &c. Many of the inhabitants are employed in salting. Top 3019

modern town is a poor deserted, and unhealthy place. The only building which deserves notice, and can be called modern though it dates from the 8th century, is the cathedral, which is built on the ruins of a Roman temple, and possesses many ancient fragments columns, &c. *Pop.* 343.

POLA, a river **RUSSIA**, rises on the N E frontier of gov **Pskov** enters **Novgorod** flows N and after a very circuitous course of 120 m joins r bank **Lovat** 2 m S **Lake Ilmen**

POLA DE LEÑA is a town of 1,200 inhabitants, 18 m. S. E. Orledo at the confluence of the Leña and Naredo. It has a handsome modern church, an endowed school manufactures of agricultural implements and a considerable trade in agricultural produce. Pop. 1999

PUELA DE BIERO a tn Spain, Asturias, prov and 19 m.
ENE Oviedo It has a magnificent modern church, two
elegant inns, two schools, a courthouse and prison, manu-
factures of shoes and other articles in leather and two flour-
mills Pop 2500

POLA (SANTA) a tn Spain, Valencia, prov and 12 m. S.W. Alicante, on the Mediterranean R. side east of same name. It is well built, defended by a castle, and has a church, two primary schools, manufactures of esparto and a valuable fishery a harbour and some trade, chiefly in agricultural produce. Pop 2215

POI AA atu Spain New Castile, prov and about 10 m from Toledo near the Tagus, with a church, courthouse, prison primary school and a trade in oil and corn P 1326

POLAND (*Latin* *Seruetus* *Polnia* *Polonia*; *Polish* *Polska*) comprising a *Plat Land* German *Polen* French *Pologne*), an extensive territory of Central Europe, which existed for many centuries as an independent and powerful state but having fallen a prey to Internal dissensions, was violently seized by Austria, Prussia and Russia as a common spoil partitioned among them in the 18th century. It was divided into three dominions. In its greatest prosperity it had about 11,000,000 of inhabitants, and an area of 284,000 sq. m. stretching from the frontiers of Hungary and Turkey in the Baltic, and from Germany to the River Rusek lat 47 to 56° N. lon. 16° to 23 E. Sea territory thus divided formed one vast and remarkably compact kingdom bounded from Great and Little Poland on the north by the Baltic Sea, from the south by the Carpathian and the Ukraine in the E and Lithuania in the N.E. The principal subdivision was into 31 *provinces* and 28 *voivodes*.

The most characteristic feature of the surface is its uniformity. With exception of the Carpathians, forming the S.W. boundary and a ridge of moderate elevation penetrating into it from Illinois, it scarcely possesses a single summit deserving the name of hill, but is truly as its name implies, 'flat land' presenting the appearance of an almost unbroken plain composed partly of gently waving slopes, partly of low alluvial flats, partly of sandy tracts, so barren as to deserve the name of desert, and partly of extensive morasses. The

last century to the general rule occupy the most elevated part of the interior and consist of a broad belt curving irregularly in a N.E. direction from the Hungarian frontiers into Lithuania and thence only from 400 ft. to 800 ft. above sea level forming part of the great European water-shed, the waters on the one side flowing by the Baltic while those on the other side flow to the Black Sea. Its principal streams are the Vistula with its tributaries, Wieprz Bug, and Narew the Warta and Protna, tributaries of the Oder the Nieman and the Dvina, all belonging to the basin of the Baltic and the Dniester, R. Bug and Dniester with its tributary Prut, belonging to the basin of the Black Sea. The soil of the country is admirably adapted for the operations of agriculture, and the fertility of its alluvial tracts is so great, that it has sometimes been termed the granary of Europe. As yet, however its productive powers have never been fully tested and its exports of grain, though large, are probably not a tithe of what they might be under more favourable circumstances. The most important product is timber, which, in several quarters, grows large and splendid forests. The minerals include the precious metals in limited quantity, from insufficient quantity,

**FOLEA** — From Ouma, Voyage d'histoire et d'histoire de Folea et d'histoire

splendid edifices, while its port was one of the great naval stations of Rome. Its ancient magnificence is still attested by numerous remains, particularly by an amphitheatre, which is still in good preservation and forms the most conspicuous object in the town when it is approached from the sea. The

but of indifferent quality, and salt, chiefly in Galicia, where its mines have long been worked on a very extensive scale and are, to all appearance inexhaustible. Owing to the inland situation of the greater part of the country, and more especially to the cold winds which blow from Russia on the E., and from the Carpathians on the S. the winter of Poland is almost as severe as that of Sweden. The summer is abundantly warm, but the general humidity of the atmosphere, and the miasma of the marshes, conjoined with a common neglect of cleanliness and other sanitary precautions, make disease sometimes, under peculiar forms, very prevalent. Little progress has been made either in manufactures or trade the former being chiefly confined to articles of primary necessity, particularly coarse woollen and linen cloth, for the weaving of which almost every family is provided with its domestic loom and the latter which is mostly in the hands of the Jews, who are more numerous in Poland than in any other part of Europe, being seldom on an extensive scale, though including the retail of an almost endless variety of objects.

The Poles are the descendants of various Slavonic tribes, who, in the 6th century having proceeded up the Dniester entered the basin of the Vistula, drove out the Finns—the original inhabitants—and made themselves masters of the whole country from the Warta eastward, and around the shores of the Baltic. As a race they possess fine physical form, and are strong, active, ardent, and daring. Unfortunately, however these original qualities have been, though preserved to a great extent by the privileged classes of the nobility and gentry whose birthright secured them in the possession of personal freedom, have greatly degenerated in the mass of the people, who, having been degraded into mere serfs, have sunk to the level of their condition are ignorant in the extreme and indolent. In this general prevalence of serfdom, it is easy to trace a primary cause of the disasters which have befallen Poland and enabled her enemies to succeed by a series of unprovoked aggressions in blotting her out from the map of Europe. A minority of her people had all the vast majority in bondage, and the latter as if conscious that they had nothing to lose by a change of masters, left the battle of freedom to be fought by those who instead of allowing it to be enjoyed by all as a common boon had selfishly and unjustly monopolized it. The prevailing religion of the Poles is R. Catholic though it has not been permitted to retain its ascendancy without a struggle. The Reformation early took deep root in the country and made such rapid progress that bigotry took alarm and repressed it by lightning the fires of persecution. Since the Russians became masters they have laboured in consistency and systematically to introduce their own religious system, and with a success which seems to intimate that the religious convictions of the inhabitants are held by a feeble tenure, and easily yield to the suggestions of interest. With similar zeal and perseverance the Russians are aiming at the extirpation of the Polish tongue by discouraging the cultivation of it, and not only introducing Russian into the public schools but making the knowledge of it an essential requisite for office. Among the numerous degradations to which foreign domination subjects the Poles, there is none to which they appear more sensible than to the attempt to complete their national destruction by the extirpation of their native tongue, which is said to be one of the richest and sweetest of the Slavonic dialects.

Poland was first raised to the rank of a kingdom by the Emperor of Germany in 1025 when Boleslaus Chrobry became its sole monarch. He belonged to what has been called the Piast dynasty being one of the descendants of Prince Piast, who as early as 840 had been acknowledged chief of all the Poles who dwelt between the Vistula and the Warta. His reign was long and flourishing, and the prosperity which he had commenced was continued and extended under his successors, Boleslaus II and III. The latter, however, courted the good which he had done, and laid a foundation for future disasters by following the practice then common in Europe—of dividing his domains among four sons, with only a nominal superiority in the eldest. The study of the kingdom was thus destroyed and its further development impeded by civil dissensions, which did not terminate till 1385, when the monarchy again became united in the person of Ladislaus I. King, whose merits as a sovereign would have been more conspicuous if they had not been in some measure

obscured by those of his son Casimir, in whom all the qualities of a great prince seem to have been happily combined. At his death in 1370, the male line of the Piasts became extinct, and he was succeeded by his nephew, Louis of Hungary. Louis was anxious to secure the succession to his youngest daughter Hedwig; but as this could not be obtained without innovating on the constitution, he endeavoured to accomplish it by securing the nobility and bestowing upon them privileges with so lavish a hand, as virtually to make them masters of the crown itself. Hedwig was crowned in 1382, and, by her subsequent marriage with Jagiello, duke of Lithuania, united that duchy to Poland. The Jagiello dynasty lasted for about two centuries, and the monarchy was thus truly hereditary though at each succession a diet was held, and the formalities of an election regularly observed but on the extinction of the Jagiellons in 1572 the formal was converted into a real election and when the throne became vacant the nobility and gentry with crowds of armed attendants, sometimes to the number of 100,000, assembled in the vicinity of Warsaw and obliged the candidate on whom they conferred it to bind himself, both by his signature and oath, to observe what was called the *pacta conventa*. Had these been confined to proper constitutional guarantees, they might have proved the safeguards of freedom but consorting, for the most part, of arbitrary and extravagant stipulations intended to confirm and extend the overgrown influence of the privileged class, they left the crown without power and the people without protection.

On the death of Sigismund Augustus, the last of the Jagiellons, Sweden, France, Austria, and Russia, all brought forward their candidates, and endeavoured to carry the election by such appliances as the exigencies of the occasion might seem to justify—by violence, intimidation, intrigue, and bribery. Henry Valois of France was the successful competitor but his reign was short and inglorious, and no great time occurred in the list of sovereigns elected under this monstrous venal system except that of John Sobieski who mounted the throne in 1674. Even before his accession schemes of dismemberment had been suggested, and though the brilliancy of his reign and other concerning causes prevented them from assuming any definite shape the disorganization of the internal government and the anarchy which prevailed at every new election, made it obvious to all but the misinformed Poles themselves, that their extinction was only postponed, and would sooner or later be effected. The first actual partition took place in 1772, and stripped Poland of about a third of her whole territory the respective shares of the apportioning—Prussia 18,337 Austria, 27,000, and Russia, 42,000 sq. m. A second partition in 1793 gave Prussia 22,500 and Russia, 95,500 sq. m. The Poles now availed from their stupor and headed by the heroic Kosciuszko, made noble efforts to regain their independence. But it was too late another partition took place in 1795 and the last king of Poland, degraded into a pensionary of the Russian court, died at St. Petersburg in 1798. A dream of hope appeared in 1806, when Bonaparte effected to take the Poles under his protection and shortly after in accordance with the terms of the treaty of Tilsit, formed the duchy of Warsaw which, increased in 1809 by the addition of W. Galicia, extended over an area of 90,000 sq. m. and contained 8,750,000 inhabitants. But the hollowness of Bonaparte's friendship soon became apparent, and a few blustering proclamations were almost all that she could obtain in return for a lavish expenditure of blood and treasure in promoting his schemes of aggrandizement. The conquest of Vienna, composed mainly of the spoilers themselves, naturally enough confirmed these spoliations, but by an arrangement which in the circumstances looks more like insult than generosity, erected the city of Cracow, with a territory of 460 sq. m. and a pop. of 93,500 into a free and independent republic. The respective positions had given Austria 45,000 sq. m., with 5,000,000 inhabitants; Prussia, 37,000 sq. m., with 2,550,000 inhabitants; and Russia, 180,000 sq. m., with 4,600,000 inhabitants. About two-thirds of the Russian empire was completely incorporated with the general government, and ceased to retain any distinctive appellation; but the remainder, containing about 49,000 sq. m. was erected into what was called the kingdom of Poland, and received a separate constitution from the emperor Alexander, drawn up in a more liberal spirit than might have been anticipated. It appears, however, to have been more liberally derived than reality

annexed and the Poles, taking occasion of the French revolution of 1800 rashly engaged in an insurrection which has only furnished Russia with a pretext for riveting their chains more closely. The name, kingdom of Poland, is still given to that portion of the Russian territories, but the country is now treated, in all respects, as an integral part of the Russian empire. It is bounded, N and W by the territories of Prussia, E by the Russian govt. of Białystok, Grodno, and Volhynia, and S. by Austrian Galicia. It is divided into the govern. ments of Warsaw the capital [anc. *Moscora* and *Kalisk*] Radom [anc. *Mielos* and *Sandomir*], Lublin [anc. *Pollacka* and *Lublin*], Plock, and Augustow, has an area of 87,120 sq. m. and in 1860 had a population of 5,008,000. The republic of Cracow, also, after maintaining a feverish existence till 1846, was seized by Austria and incorporated with her kingdom of Galicia.

POLANGEN, a seaport in Russia, gov. and 180 m. N. W. Warsaw, on the Baltic. It is indifferently built, and has a fishery and a custom-house.

POLAR SEA (N) See ARCTIC OCEAN.

POLAR SEA (S) See ANTARCTIC OCEAN.

POLAN (OBER and UNDER) two adjacent vils. Bohemia, circle Budauius, 60 m. N. E. Prague, with a church, a religious foundation and a school glass-works, potash-refineries, several mills, and a trade in wood. Pop. 3600.

POLCH or POLANSK a tn. Prussia, gov. and 10 m. W. 6 W. Coblenz with a church, two mills, and a trade in cattle. Pop. 1493.

POLERBROOK, par Eng. Northamp. 2730 an. P. 472 POLLESELLA, a market in Italy Venetia, prov. Polesina, 1 bank Po, 7 m. S. S. W. Rovigo with a court of justice, several public offices, three churches, and a harbour. P. 1123.

POLKEINE (Lithu. *Poleiskas Agnės Psk*) a vil. and com. Prussia, duchy Posen, r. bank Po, 24 m. N. W. Larnia. It suffers much from the inundations of the Po, but has a fertile district.

POLKOWORTH par Eng. Warwick 6310 an. P. 3104 POLGIARDI, a vil. Hungary Thier Danube, co. and 12 m. S. S. W. Stuhlweissenburg with two churches a hand some chateau, and some trade in corn, sheep, wine, and wood. Pop. 2409.

POLHORA, a vil. Hungary Either Danube, co. Arva on the frontiers of Galicia, 141 m. N. by E. Pesth. It is a struggling place has manufactures of linen, and different articles in wood, and a saline spring, which is said to be very efficacious in rheumatic affections. Pop. 1449.

POLIA, a tn. in Naples, prov. Calabria-Ultra II., S. Nicastro Pop. 1560.

POLIGASTRO, or PAIDOGASTRO, a vil. Naples, prov. Calabria-Ultra II., 23 m. W. N. W. Cotrone, once a place of importance, and supposed to occupy the site of the ancient Petilia. In 1086 it was destroyed by Robert Guiscard and about five centuries after, when again flourishing, was sacked by the Turks, a calamity from which it has never recovered. The marshes and rice-grounds around it render it very unhealthy. R. Anagnino, 12 m. S. W. 2400—2450 feet. A seaport in Naples, prov. Principato-Citra, dist. and 26 m. S. La Sala, at the extremity of a gulf of same name. It is the seat of a bishop, and has a secure harbour at which some trade is carried on, and a productive fishery.

POLIGNAC, a tn. and com. France, dep. Haute Loire, 8 m. N. W. Fuy. It is built around a hill of volcanic breccia, on which are the ruins of the old castle of Polignac. P. 2134.

POLIGNANO, a tn. Naples, prov. and 20 m. E. E. S. Bari, near the Adriatic. It has three churches, two convents, and a royal abbey.

POLIGNY (Lithu. *Poleiskas*), a tn. France, dep. Jura, 49 m. N. W. Geneva, and in general clean and well built. It has a hotel de ville, an agricultural society and communal college manufactures of cloth, wine, salt-petre and leather; dye-works, and saw mills; a trade in corn, flour good red wine produced in the district, brandy, turnery &c. Near it are quarries of marble and alabaster. Pop. 5581.

POLLILLO, one of the Philippine Is., off E. coast, in Luzon; lat. 15° 4' N. lon 123° 6' E. (S.) It is nearly of a triangular shape, about 20 m. long by 14 m. broad, has a mountain of considerable height called Malolo; several good harbours, particularly one of its own name, on the S. W. coast, and is very fertile.

POLING par Eng. Sussex, 923 an. Pop. 103 POLISTINA, a tn. Naples, prov. Calabria-Ultra I., 33 m. N. E. Reggio, in a healthy and fertile plain, with a church. Pop. 8700.

POLITZ, or POLAZ, a tn. Bohemia, circle and 27 m. N. E. Königgrätz. It is very poorly built, and has a church a townhouse, and a town-school. It has repeatedly been almost destroyed by fire. Pop. 1390.

POLITZ, a tn. Prussia, gov. and 9 m. N. Stettin. It is entered by four gates has a church, a postoffice, and a trade in horses and cattle. Pop. 1907.

POLIZČKA a tn. Bohemia, circle and 27 m. S. E. Chrudim. It is walled, flanked by 10 round bastions, entered by four gates, well and regularly built; and has a handsome square, a townhouse, a statue of Maria Theresa, two churches, a high, a female industrial school an hospital for the poor, and an infirmary. Pop. 3665.

POLIZZI, a tn. Sicily, prov. and 45 m. S. E. Palermo. Pop. 6300.

POLKOWITZ, a tn. Prussia, Silesia, gov. and 24 m. N. by W. Liegnitz. It is walled, has a court of justice, and two churches. Pop. 2018.

POLLA a tn. Naples, prov. Principato-Citra 9 m. N. W. La Sala, with four churches, three monasteries, and a nursery. Pop. 5700.

POLLARDSTOWN par Ire. Kildare 1950 an. P. 234 POLLE, a vil. Hanover princ. Celenburg 1 bank Weser, 88 m. S. S. W. Hanover with a church, manufactures of hosiery a paper mill and a trade in coal. Pop. 1231.

POLLANZA a tn. Spain Isl. Majorca, 28 m. N. E. Palma. It has good and well paved streets, a townhouse church hospital asylum prison, and primary schools, a fine Jesuit college, partly ruinous, the church attached to which is one of the best of the class in Spain. The port and bay of Pollanza are a few miles N. E., defended by the castle of Albufera. Manufactures of wool and woollen laces, plain cloth charcoal and soap. Pop. 6376.

POLLERSKIRCHEN, a market in Bohemia, circle Camas 6 m. from Steuckm. It has a church, a castle, a school manufactures of potash and glass, a brewery, distillery and several glass-pollishing mills. Pop. 959.

POLLNACHOWITZ, or POLNOSOWICE, a market in Austria, Moravia, circle Hradisch near Waldshut. It is an ancient place, and was the first bishop's see formed in Moravia. Pop. 1079.

POLLER, a vil. and com. Belgium prov. and 16 m. E. E. Liège. It has a worsted and two fulling mills quarries of millstone and whetstones and handlooms.

POLLINGHOVE, or POLNOSKOWICE, a vil. and com. Belgium prov. Flanders, on the Yser 27 m. S. W. Bruges, with two breweries, a bark two oil and five flour mills, and a trade in horses and cattle. Pop. 1740.

POLLNO a tn. Prussia, gov. and 22 m. E. E. E. Künig, 1 bank Grabow, with a church, manufactures of cloth, several mills and a trade in cattle. Pop. 1444.

POLLNOK, or EASTROOD, par Scot. Bedford P. 9243. POLLOCKSHAWS, a bor. of barony, and in Scotland, co. Bedford, 24 m. S. W. Glasgow, conveniently situated on the White Cart, and on the Glasgow and Harbrough railway. It has a neat townhouse, two Established and two Free churches, a U. Presbyterian and an Original Secular church and a R. Catholic chapel several schools, a number of friendly societies, and an extensive public library. The inhabitants are principally employed in cotton-weaving, hand and power loom silk and cotton weaving calico-printing, fancy dyeing and bleaching, all of which are extensively carried on. P. 8698.

POLLONE, a vil. and com. Italy, Piedmont, div. Turin prov. and near Biella with a square, and a handsome church. Pop. 1553.

POLLORONE, par Ire. Kilkenny, 3596 an. P. 1619 POLLUTRO a tn. Naples, prov. Abruzzo-Citra, 5 m. N. W. N. Vasto, on a steep rock, with an hospital. P. 1800.

POLLTYAN or KESKI POLTYAN, a vil. Transylvania, 60 m. from Csanád with a Greek church and mineral springs. Pop. 1060.

POLMONT, par Scot. Stirling 6 m. by 2 m. P. 8764. POLNA a tn. Bohemia, circle and 81 m. S. E. E. Camas, with a deanery church, and two mills; inhabitants chiefly employed in agriculture and weaving. Pop. 4916.

POLOCHIG, a vil. Central America, near lat. 18° 35' N., and lon. 90° 30' W., in Guatemala, dep. Vera Paz, some W. then N. E., passing the towns of Coban and Cajalon, then E., then N. and falls into the Gulf of Dulce, communicating with the Bay of Honduras. Total course about 160 m., part of which is navigable.

POLONGA, a vil. and com. Italy, Piedmont, dep. Cune, prov. and about 11 m. N. E. Salusa. It is tolerably well built, has a church and an old castle with a square tower, a seminary, and a small theatre. Pop. 1728.

POLONKA, a vil. Hungary, Hither Themas, co. Gomor, r bank Green 86 m. from Kozsok, with a handsome church, a school, and a trade in cattle. Pop. 2235.

POLOP, a vil. Spain, Valencia, prov. and 11 E. Almona, with a church, courthouse, prison, primary school, has several oil and four mills, and a trade in wine. Pop. 1902.

POLOPUS, a vil. and com. Spain, Andalusia, prov. and about 40 m. from Granada, near the Mediterranean, with a church, courthouse, prison, and primary school, several distilleries, and a trade in wine and brandy. Pop. 1630.

POLOTZKA [anc. Polotsk], a vil. Russia, gov. and 60 m. W N W Vitebsk, r bank Dvina, and both banks Polotska. It has some fortifications of no great strength, particularly a castle somewhat dilapidated, which was built by Stephen Bathory, king of Poland, in the 16th century and numerous churches and monasteries, but most of the houses are old and very indifferently built. The most remarkable edifices are the old Jewish cemetery and college. It has some trade in flour and hemp which is sent to Riga. Pop. (1851) 11,151.

POLPENAZZE, a vil. and com. Italy, Lombardy, gov. Milan, prov. Brescia, dist. and 6 m. S. Salo, on a small lake with four auxiliary churches and two mills. Pop. 1229.

POLPERO, a small seaport, England, co. Cornwall, on the steep rocky sides of a narrow valley, through which a torrent falls into the sea, 5 m. E. Fowey. It has independent Wesleyan chapels, a valuable fishery chiefly of pilchard, wharves, piers, harbor, &c., a harbor, which admits vessels of 150 tons burden, and there is some export of grain, with imports of coal, cotton, and limestone. Pop. 913.

POLSCHATEK or **PRZYKAZA**, a to. Bohemia, circle and 28 m. S. E. Tabor, with a deservy church, an hospital, and some manufactures of cloth. Pop. 2561.

POLSTEAD, par. Eng. Suffolk, 34½ m. S. E. 10 p. 943.

POLTAWA or **POLTAVA**, a gov. Russia, bounded N. by Chernogor, E. Kharkov, S. Platinskaya and Kherson, and W. Kiev, lat. 48° 41' to 51° 51' N. lon. 30° to 26° E.; greatest length W. to W. 212 m. greatest breadth, 145 m. area, 16,000 sq. m. It consists of an extensive and somewhat monotonous flat, highest in the N. E. and gradually declining to the S. W., where the Dniester flows along its whole frontier and directly or by its tributaries, Dniepr, Pivorka and Oril receives the drainage of all its surface. It is one of the most fertile and best-cultivated portions of the Russian empire, and exports about a fourth of its whole produce of wheat, oats, and barley. The meadows are both extensive and luxuriant, and the breeds of the immense herds of cattle and flocks of sheep which graze there are in general of a superior description. The raising of bees is an important branch of rural economy, some peasants have 100 hives yielding refined honey of white colour. Both man and factories and trade are of very limited extent. The former are almost confined to woolens, leather, saltstaple, and brandy, the latter consists chiefly of agricultural produce, including horses and cattle, hemp, flax, tallow, wool, honey and wax. Education, nominally under the superintendence of the university of Kharkov is miserably neglected. Apparently not one in 1000 of the population is at school. Poltava is divided into 16 districts. Pop. (1850) 1,519,500.

POLTAVA or **POLTAVA**, a to. Russia, dep. above gov. on the Poltava, 44½ m. S. E. Moscow. It is walled, defended by a citadel crowning a small height, which rises up near its centre, and has spacious and regular streets, houses generally of wood, though some are of stone and brick. It has 12 churches of which one is a cathedral, a convent, and a school for cadets. The trade, chiefly in cattle, corn, hemp, and wax, is very considerable, and the fairs three in number, are very important. Under its walls, in 1709, Peter the Great, at the head of the Russians, signally defeated the Swedes, under Charles XII. Pop. (1851) 20,071.

POLTEN, or **HIRTOLTA** [St.] a to. Lower Austria, 1 bank Trauen which here divides into several branches, 55 m. W. S. W. Vienna. It is somewhat of a circular shape, has three public squares, irregular but spacious, clean and tolerably well-paved streets. It is the see of a bishop, has several courts and public offices, a cathedral, and two other churches, an Episcopal palace, palace of the prince of Ansbach, and of Count Bismarck, a seminary, a diocesan seminary, a military academy, English female institute, superior high school, borough hospital and infirmary, manufactures of plains and printed calicoes, matches and earthenware, paper, cotton, and other mills, tile-works, dye-works and breweries. P. 5600.

POLTIMORE, par. Eng. Devon, 1710 ac. Pop. 281.

POLWARTH, par. Scot. Berwick, 8 m. by 2 m. P. 281.

POLYAN (MAEYAN and MAERT), two nearly contiguous vil. Hungary, Hither Danube, co. Veszprim, 6 m. from Pápa, with a church, tile works, a mill, and a trade in wine and cattle. Pop. 1128.

POLYANKA (Bakan), a vil. Hungary, Hither Themas, co. Zemplin, on the Tolya, 6 m. from Vassa, with two churches, and a trade in iron. Pop. 1045.

POITYCANDRO [anc. Pholyandros], an isl. Grecian Archipelago, one of the Cyclades, 18 m. S. E. E. Molo, greatest length, N. W. to S. E. 9 m., breadth, 8 m. It is mountainous, and the ground generally stony and barren. Corn and wine are raised in sufficient quantity for the consumption of the inhabitants. The town has same name stands near a rugged rock, about 2 m. from the shore.

POLYNESIA [Greek Πόλις, many and Νεσος, an island], the name given to the N. E. and E. parts of Oceania, and consisting of the numberless islands scattered over that part of the Pacific Ocean, both singly and in groups. Of the latter the principal are the Sandwich, Marquesas, Society Navigator, Friendly and Feejee islands, and the islands of New Zealand.

POLZIN, a to. Prussia, gov. and 30 m. S. S. W. Kottbus, with several courts and offices, a church, an hospital and a tailoring establishment, manufactures of cloth and other wool, iron, studs, waggons, leather and tobacco, several mills, and a trade in cattle. Pop. 2394.

POMARANIE, or **PRIMORANIE**, a to. and com. Tucumán, 12 m. S. E. Valterra. It is walled, has a handsome church of three naves, with some good paintings, a town house with a tower, an hospital and theatre. Pop. 2600.

POMARINO, a to. Naples, prov. Basilicata, dist. and 12 m. S. Matera, with a convent, some good cotton is grown, in the vicinity. Pop. 5427.

POMARO, a to. and com. Parma, dist. and 18 m. S. W. Piacenza, near the torrent, Lavento. It is beautifully situated, and has a church, and a trade in corn, wine, and timber. P. 5119.

POMATA, a vil. Bolivia, dep. and 97 m. W. N. W. La Paz, 10 m. shore of Lake Titicaca, 18,040 ft. above sea-level with two churches.

POMAZ, a vil. Hungary, Hither Danube co. and 12 m. N. Pesth, with three churches and a chateau. Pop. 2739.

POMBA BASIN, or **POMBA**, one of the finest harbours on E. coast Africa, Moumbeia Channel, lat. 17° 27' 30" S., lon. 40° 25' E. The entrance, between two rocky points, is only 18 m. across, but the basin into which it opens is 9 m. long by 6 m. broad, and has almost everywhere sufficient water for the largest ships.

POMBA (Vila da), a to. Brazil, prov. Minas-Geraes, 1 bank river of same name, 60 m. E. S. E. Ouro-Furo, with a church, a townhouse, and a trade in sugar, rum, and wax. Pop. dist. 12,000.

POMBAL, two to. Brazil — 1, Prov. and 260 m. W. Paraíba, on the Pinaro, 4 m. above its junction with the Pinaro, one of the oldest towns in Brazil. It has a fine old church, a handsome townhouse, with prison, two primary schools, and a considerable trade in cotton. Pop. dist., 4000. — 2, Prov. and 140 m. N. N. W. Bahia, with a church, and a primary school. Inhabitants, all of Indian extraction, cultivate cotton, but depend chiefly for subsistence on fishing and hunting.

POMBAL, a to. and par. Portugal, prov. Estremadura, near Leiria, with manufactures of hats. Pop. 5658.

POMBEIRO, two places, Portugal — 1, A to. and par., prov. Minho near Guimarães. Pop. 765. — 2, A to. and par., prov. Beira Baixa near Oca. Pop. 1180.

POMBIA, and **VARALLO-POMBIA**, two nearly contiguous vills. Italy Piedmont, div. Novara, near Borgobello. Pombia is well built and has two churches, a church and the ruins of two old castles. Pop. 1468. Varallo-Pombia has a square a public walk, and several churches. Pop. 1978.

POMERANIA (German, *Pommern*), a prov. and duchy in the N part of Prussia, bounded, N by the Baltic, W the duchy of Mecklenburg, S. prov. Brandenburg, and E. West Prussia; area, 9190 sq. m. It consists of a long and comparatively narrow tract of country, stretching longitudinally E. to W. The coast is generally low and sandy and is lined by a great number of lagoons, separated from the sea by narrow belts of land or low sandhills. The chief of these lagoons are the *Bismarck*, the *Lehasee*, and the *Stettiner-haff*, or *Pommersche-haff*. The last forms the embouchure of the Oder, and communicates with the Baltic by three channels—the *Penne*, *Swine*, and *Davener*. Owing to the general lowness of the coast, where it is not protected from the waves by the downs or low hills already mentioned artificial embankments, like those of Holland, become necessary. Along the coast are a few islands, but none of them, except *Rügen*, *Usedom*, and *Wollin*, are of great extent. The interior is almost a continuous flat, intersected by numerous marshy tracts, with a very gradual inclination towards the Baltic, by which all its drainage is received. The principal rivers are the *Oder*, *Persante*, and *Stolpe*. The soil on the whole is sandy and indifferent, still there are many rich alluvial tracts, particularly along the banks of the rivers and lakes, producing a surplus of grain for export. Much of what is thus exported is of the finest quality and the Pomeranian wheat is well known in the English market, where it often commands the highest price. The domestic animals are numerous, and of tolerably good breeds, those which appear to attract most attention are sheep and swine. The forests are of large extent, and well supplied with game. Fish also are abundant. The only minerals of any consequence are a little iron, salt, and alum. Manufactures early made considerable progress, in consequence of the influx of French refugees, on the evacuation of the *edict of Nantes*, who introduced the manufacture of woollens and other fabrics. The possession of the *Oder* enables the province to carry on a considerable trade, both general and transit. The principal exports are corn, cattle, wool, wax, and fish; the principal imports are iron, sugar, coffee, and sugar, and other articles of colonial produce. Pomerania appears to have been originally inhabited by Goths, Vandals and Slaves. The first mention of it in history is in 1140. It long remained an independent duchy and was of much larger extent than at present. In 1827 on the extinction of the ducal family, the electoral house of Brandenburg claimed possession, but was obliged to give way to Sweden. On the death of Charles XII. the electoral house again claimed possession, and the whole was finally ceded to it except a part, which received the name of Swedish Pomerania. This part having been ceded to Denmark, was by it given up in exchange for the duchy of Lauenburg to Prussia, to which the whole of Pomerania now belongs. For administrative purposes, it is divided into three governments (*Gouvernements*), *Stettin*, *Köslin*, and *Stralsund*. Pop. (1846), 1,164,078.

POMEROON, a river British Guiana, which, after a tortuous N course, enters the Atlantic 35 m N W the estuary of the Essequibo.

PUMBOY, a vil. and par. island, on Tyrona, 8 m. N W Dungeness, with a N Catholic chapel, and a Benedictine monastery. Area of par. 1583 a. Pop. 7044. vil. 505.

PUMPTREY a market in England. See **PORTFRAITH**.

POMIGLIANO a town, in Naples, prov. and 7 m. E. N. E. Naples with two churches. It was sacked and burnt by the French under Charles VIII., for having remained faithful to Alfonso of Aragon. Pop. 4700.

POMMEROLLE, a vil. and com. Belgium, prov. Hainaut, on the Haine, 11 m. W Mons, with manufactures of soap, refined salt, and leather, a brewery two oil and two flour mills. Pop. 1784.

POMONA, or **MANHATTAN**, an isl. Scotland, the largest of the Orkney group, to the Atlantic on the W and E., but separated by channels from Rona, Rhinns, &c., on the N and from Hoy, South Ronalds, &c., on the S. greatest length, N W to S. E., 23 m.; breadth, where greatest, about 15 m., but when penetrated from opposite directions by Kirk-

Vol. II

wall Bay and Scapa Flow not more than 2½ m. It is extremely irregular in shape, and on all sides, except the W, which is nearly continuous, is deeply indented by bays and creeks among which, after the two already mentioned, the largest are Inganess Bay, Dear Sound, Holm Sound, and another on the S. W. entering from Hoy Mouth, and communicating by a very narrow strait with a large and beautiful expanse called the Loch of Stennis. The coast is bold and elevated on the N W and W, particularly the latter, on which the waves often break with tremendous fury, and shipwrecks are not infrequent. Here, and in other parts, the action of the water has produced several remarkable caverns. The general slope is eastward and in that direction the beach often becomes low and sandy. The interior is well diversified with hills, valleys, and lakes, but wants the beauty which woods would give it, though in many of the more sheltered spots considerable plantations have recently been made. The loftiest summit does not average above 400 ft. but Wart Hill, in the parish of Orphir, rises to the height of about 700 ft. Almost all the rocks belong to the old red sandstone formation, and in some places are rich in remarkable fossil fishes. They are often intersected by whitestone dikes. Granite forms a chain of moderate hills, extending N from the shore of Stromness, and terminating in a bold precipice on the W coast. Many of the hills are covered with heath, but several of them are clothed with grass, yielding good pastures. In the valleys a loamy soil, of good quality, occurs, and both in them and the lowlands near the shore there is a considerable extent both of arable and meadow land. The principal crops are oats, beans, and deer. Improved breeds of sheep have been introduced, and large herds of swine are fed on the commons. Fish of almost all the kinds common in Scotland abound on the coast. The capital of the island, as well as of the county, is Kirkwall. The other principal town is Stromness. Pop. 16,751.

POMPEII, or **POMPEJA**, an ancient in Italy about 1 m. from the gulf and 14 m. S. E. from the city of Naples, at the S foot, and 6 m. S. from the crater of Vesuvius, by an eruption of which it was completely entombed, A. D. 79. It had remained thus buried and almost forgotten, for nearly 17 centuries when it was accidentally discovered by peasants engaged in cutting a dike. Excavations were commenced in 1770, and have been perseveringly continued till about a third of the whole area has been exposed. The walls, about 20 ft. high, and 20 ft. thick, and faced within and without with blocks of lava have been traced throughout, so as to show that the city was in the form of an oval, with a longer diameter of about three-quarters, and a shorter diameter of about half a mile and thus covered an area of 160 acres. The walls were pierced with six gates, and flanked with lofty towers; the streets are generally from 18 ft. to 20 ft. broad, one-third of which is occupied by side pavements, though one street, called the Street of the Bilemenitis, has a central width of 25 ft. with two side pavements, each six ft., making the whole width 40 ft., and the houses frequently only of one, and seldom of more than two stories, when viewed in connection with the whole area of the town and the dimensions of its streets, seem to indicate that the population may have amounted to 20,000 or 25,000. The excavations of Pompeii derive their chief interest from the light which they have thrown on its domestic life and manners of the Romans.

POMPORESCO, a vil. and com. Italy Venetia, prov. Mantua, dist. and 3 m. E. Viadana, I. bank Po. an ancient place, with a considerable trade in dressed skins, and in linen and hempen cloth. Pop. 3100.

PONANY a seaport in India. See **PANJANY**.

PONDERANO a vil. and com. Italy Piedmont div. Turin, prov. and near Biella, once defended by a strong castle. It has a parish church. Pop. 1515.

PONDICHERRY (French, *Pondichéry*), a town, cap. of the French possessions in Hindustan E. or Coromandel coast, 85 m. S. by W Madras lat. 11° 55' 41" N. lon. 79° 51' 48" E. Its territory is surrounded on the land side by the British dist. South Arcot. It stands on a sandy beach, and consists of two divisions, separated by a canal. The White Town, or European quarter on the E., facing the sea, is very regularly laid out, contains a spacious square, in which is the government-house, handsome planted boulevards, and between 400 and 600 well-built houses, stuccoed white or yellow,

mostly with terraces on their summits, and surrounded with a colonnade below. The Black Town or native quarter, on the W. beyond the canal, contains about 2800 houses or huts, of brick or earth, and a few pagodas. Its streets are broad and shaded by palm trees, but as usual with Hindu towns, it is filthy. A large house, two churches, a high school, a public library, college for European children, several other public schools, a botanic garden, and a government pawn-bank, are the chief edifices and institutions. The fortifications, formerly strong, were destroyed during the war with the British, and by the treaty of Paris, they are not to be rebuilt nor is Pondicherry to be garrisoned by a native French force. The authority of the governor extends over all the French possessions in Asia. The territory around the town, 5 m. in length, N. to S., by 4 m. in breadth, is partly watered by the Ganges river but is not very fertile: some rice, indigo, tobacco, betel nut and coco-nuts are raised, wheat, with gunnies, or fine cotton cloths dyed blue, India handkerchiefs, and cotton yarn, form the chief exports: the total value of which in 1843 amounted to £117,611. The imports in the same year amounted to £124,069 in value. The trade is declining, there being no harbour, but only a roadstead on which the craft lie almost as strongly as at Madras. The settlement was purchased by the French from the Bepapour rajah in 1677 and taken by the British in 1761, 1778, 1788 and 1808. Pop. of territory (1849), 81,184 towns, about 40,000.—(*Bureau Geographique 1841* *Ann. du Central Pac. de l'Inde* *France*, Hausmann's *Voyage en Chine* &c.)

PONFERRADA, a town Spain prov. and 57 m. W. Leon, situated by the rivers Sil and Boma. On the opposite bank of the former is a large suburb, connected with the town by a bridge of one arch. On the bank Boma is another suburb also communicating with the town by means of a bridge. The streets are regular, clean, but rather narrow: two of the squares are provided with fountains. It has a handsome but uncommensurate townhouse, two elementary schools, a general hospital and a foundling hospital maintaining 300 children, a theatre, a Franciscan monastery four churches, and a chapel two tanneries and four potteries. Pop. 4221.

PONG or BONG, a prov. Burmese dominions lat. 26° to 27° N. lon 90° to 98° P. bounded N. by Tibet E. the Chinese province of Yunnan and W. Upper Assam chief town, Moonshee.

PONGAS, or PONGO, a river W. Africa, Senegambia enters the Atlantic by several mouths near lat. 10° S., lon 14° W. The mud bar entrance is practicable at high water for vessels drawing 12 or 14 ft.

PONIKLA, a vil Bohemia, circle and 27 m. N.E. Hofschow, 1 bank Isar with a church and some manufactures of linen where it is worked. Pop. 1099.

PONORGU, a town Java, prov. Madjora 92 m. S.E. Semarang, with an extensive school, in which a large number of youths are taught Mahomedanism and Buddhism.

PONS, several places, France, particularly—1. *Laizy Pons*, A. in, dep. Charante-Inférieure, 15 m. S. S. E. Salines, 1 bank Sèvre, here crossed by three bridges, on a hill crowned by the remains of an old castle, with a lofty tower now used as a prison. It has a secondary ecclesiastical school 100 2720—2. *(St. or St. Pons de Thommes)*, *Laizy, Pons de Thommes*, dep. Ille-et-Vilaine, 56 m. W. S.W. Montpellier 1 bank Jura, which propels a considerable number of mills. Its houses and church are built of variegated marble quarried in the neighbourhood, it has a court of first resort, a secondary ecclesiastical school, communal college, and agricultural society; manufactures of woollen cloth, lace, and leather and a trade in corn and cattle. Pop. 3780.

PONSACCO, formerly PONS de SACCO, a town Tuscany 16 m. S.E. Pisa, 1 bank Cecina, here crossed by an ancient bridge. It is regularly built, and has two churches, and a trade in corn, silk, cattle, and dairy produce. Pop. 2566.

PONSORREY, prov. Eng. Cumberland; 2265 ac. P. 180.

PONT numerous towns, France, particularly—1. *(de Montau)*, *Laizy, Montau Pons*, A. in, dep. Mayenne, 16 m. N. W. Nancy on the Moselle here crossed by a bridge. It has a square, surrounded by arcades, one of the houses of which, called the House of the Seven Deadly Sins, has a remarkably curious facade, adorned with ancient sculptures; also a fine Gothic parish church of the 13th century hotel de ville, cavalry barracks, hospital, and the old Abbey of St.

Mary, now converted into a seminary, a secondary ecclesiastical school, and a communal college. Manufactures of embroidery, some woollens, earthenware, leather, refined sugar, beer, and vinegar, and a trade in corn, wine, brandy, and flax, &c. *Baron*, one of Bonaparte's favourite marshals, was born here. Pop. 6874—2. *(Andenne)*, A. in, dep. Basse 1 bank Rille, which here begins to be navigable, 30 m. W. Evreux. It is walled, regularly and well built and once had a castle, in one of the towers of which, in the early part of the 14th century cannon were used for the first time in France. The only building deserving of notice, is the old church of Notre Dame des Prés now used as a tannery. The staple manufacture is leather, the number of tanneries being 40. The other manufactures are glass, hosiery and the hardware used in saddlery. The trade is in leather, corn, sugar, flax, thread, &c. Pop. 5369—3. *(Orval)*, A. in, dep. Flandre, 18 m. W. S.W. Quimper, on a crumbling cliff about 300 ft. above, and washed by the sea, poorly built, with steep, ill-paved, and dirty streets. Pop. 1416—4. *(de Basseville)*, A. in, dep. Isère, on the Guiters, here spanned by a bold bridge of a single arch, the middle of which forms the boundary between France and Savoy, 24 m. N. Grenoble. The most important part of the town is on the Savoy side. It has manufactures of linen, and hemp twine, and a trade in corn and hemp. Pop. 1949—5. *(de Fosse)*, A. in, dep. Ain, 20 m. N. W. Bourg-en-Bresse 1 bank Rhodane. It has manufactures of cotton stuffs, earthenware, and leather, and a trade in grain, flour, wine, hemp, thread, poultry, horses, and cattle. Pop. 2806—6. *(de Châtenay)*, A. in, dep. Puy-de-Dôme, 6 m. E. N.E. Clermont Ferrand, 1 bank Allier, here crossed by a fine basaltic bridge, 722 ft. long. In the beginning of the 13th century it was one of the strongest places in Limagne, but the most conspicuous object now is a chateau, situated on a height above the river. The port of the town is used by the whole department, and has a considerable trade in wine, hemp, animal charcoal, coal, apples, wood, millstones, cloths, &c. Pop. 2621—7. *(L'Abbaye)*, A. small town and export dock, Flandre, 12 m. S.W. Quimper at the extremity of a creek, which forms a well-frequented harbour. It has the remains of a castle, one of the towers of which is now used as the townhouse; manufactures of linen and a trade in grain, potatoes, house wine, &c. Pop. 2641—8. *(Rodez)*, A. in, dep. Calvados, at the junction of the Puyongue and Calonne, 30 m. E. N.E. Caen. It has a good harbour and iron manufactures of iron and a trade in sugar, cheese, butter, heavy cattle, wood, &c. William the Conqueror assembled here the states which resolved on the invasion of England. Pop. 1911—9. *(St. Mamet)*, A. in, dep. Oise 7 m. S. S. E. Soissons on the Oise here crossed by a fine bridge. It has three good squares, in one of which the church stands, manufactures of cloths and leather, several works for melting tallow, and a trade in corn, wine, and cattle. Pop. 2293—10. *(St. Euphrasie)*, *Laizy, Ponsac*, A. in, dep. Gard 1 bank Rhone 32 m. N. E. Nimes. It is in general ill built, has narrow, dirty streets, and a cathedral built by Louis XIII. to enrich the Franciscans. The most remarkable object is the bridge over the Rhone, and to be the largest stone bridge in the world. It was founded in 1265, and was 45 years in building. It consists of 26 arches, irregular in size, the largest having an opening of 108 ft. and is 17 ft. wide and 2717 ft. long. It has a good harbour; and the trade in wine, oil, fruit, and silk is considerable. Pop. 6164—11. *(Pont-sur-Yonne)*, A. in, dep. Yonne, 7 m. N. W. Sens, on the Yonne, here crossed by a handsome bridge. It has manufactures of coarse cloth, leather, and a kind of silks, well known by the name of Burgundy silks. Pop. 1810.

PONT or PONTE, a town Italy, Piedmont, div. Turin prov. and 16 m. W. S.W. Ivrea. It has a court of justice, two towers, and a castellated gate the only remains of its ancient fortifications, two very ancient parish churches; a worsted-mill, and quarries of white marble. Pop. 4188.

PONT A CHATELAIN, a vil. and com. Belgium, prov. Hainaut, 20 m. E. Mons, with manufactures of nails a distillery, three breweries, two tanneries, several mills and a trade in agricultural produce. Pop. 1748.

PONT DE AURENNE, a vil. and com. Spain, Catalonia, prov. and N. E. Tarragona, with a church, and outposts; manufactures of woollen cloth, cotton twist, and worsted; distillery and several oil and flour mills. Pop. 1400.

PONT DE CAMARÈS, a town France. See CAMARÈS.

PONTA DO CAJU, a sandy promontory, Brazil, which projects into the Bay of Mithoraki, about 4 m. N.W. Rio-de-Janeiro. An imperial palace, admired for the simplicity of its architecture, has been built upon it and many streets of the capital have this village here.

PONTA VERDE, or **PONTA DE JARAGUA**, a promontory Brazil, prov. Alagoas, having the port of Pajussara on its N. and that of Jaraguá on its S. side. The sea breaks upon it with great fury but about a mile outside of it the depth is 11 fathoms.

PONTAQU a vil. France, dep. Basses-Pyrénées, 15 m. S.E. Pau with manufactures of woollen goods, vinegar and leather, and a trade in leather, wool, and salt provisions. Pop. 5039.

PONTAPEL, a vil. Austria, Illyria, circle Villach in a narrow pass on the Fella, here crossed by a bridge, which by a tower built upon it marks the boundary between Italy and Illyria, and communicates with the village of Pontebbia. It has a blast-furnace. Pop. 1427.

PONTAIPRET a to. Spain. See CAMBODIA.

PONTAIRET [Latin, *Pons Artium*] a to. France, dep. Doubs, at the foot of the second chain of the Jura, 2716 ft. above sea-level 25 m. S.E. Besançon. It is regularly built, has straight and well-cleaned streets lined by handsome houses, a cavalry barracks, college, hospital, market-hall, townhouse, public library, and a fine promenade, a court of first resort, and a communal college, manufactures of tannery, scythes, and different implements a blast and a refining furnace, several forges, a copper smelting, a paper and mill, and a considerable trade in wormwood, cherry brandy cheese in imitation of Gruyère, cattle and horses, clock work, timber, marble, gypsum, &c. Pop. 4503.

PONTAIRETTE, or **PONT-A-SIÈVE**, a to. Tuscany, 19 m. E. Florence, on the Sieve, here crossed by a bridge with a court of justice, a church, an old castle, and a trade in corn, oil, and silk. Pop. 1780.

PONTCHARRA, a vil. France, dep. Isère, 33 m. N.W. Grenoble. Near this village, Lesdiguières, in 1691, at the head of 6700 French defeated an army of 14,000 men belonging to the Duke of Savoy. Near it is the chateau, where the celebrated Bayard was born. Pop. 1780.

PONTCHARTRAIN, a lake, U. States of America, Louisiana, a few miles N. New Orleans, communicating with Lake Maurepas on the W. with Lake Borgne on the E. and with New Orleans on the S. through St. John's bayou and a canal length, 40 m. breadth, 25 m. depth, 9 ft. to 18 ft. On the N. it receives several rivers, of which the Tangipah and the Tchoupah are the most considerable.

PONTCHY a vil. and com. France, dep. Haute-Savoie, div. Faucigny, near Bonneville, in a fertile plain. It has a trade in corn, cattle and dairy produce. Pop. 1096.

PON 1 R, numerous places, Italy particularly —1. A vil. and com. prov. and 6 m. N.E. Sanmarco, r. bank Adige, in a district covered with vineyards. Pop. 2738 —2. (de Lombard), A vil. and com., prov. Como, 3 m. N. L. Erba, on the Lambro, here crossed by a bridge with a church, the remains of an ancient monastery, and some silk mills. Pop. 871 —3. (di Legnò), A vil. and com., prov. and 30 m. N.E. Bergamo, with four churches a tannery saw mill smelting furnace, and some trade in milled provisions. P. 1890 —4. (San Pietro) A vil. and com. prov. and 5 m. E. by S. Bergamo, 1 bank Brembo, here crossed by a bridge. It is well built, has a church, five chapels, several dye-works, tanneries, tile-works, lincolnia, a manufactory of crystal and a considerable transit trade. Pop. 1095 —5. (Vico) See PONTREICO.

PONTE, several places, Portugal, particularly —1. (do Lima), A to. and par. prov. Minho, on the Lima, here crossed by a magnificent bridge. It is very well built, inhabitants chiefly employed in weaving linen and spinning flax. Pop. 1860 —2. (do Barco), A to. and par. prov. Minho, near Ponte-do-Lima, on the Lima, here crossed by an excellent stone bridge. Pop. 800 —3. (de São) A vil. and par. prov. Alentejo, 34 m. W.S.W. Portalegre, on the Sor. Its houses are regularly built, and its streets tolerably wide. Pop. 1528.

PONTE-CORVO, a to. Italy, along and 30 m. S.E. from none, in an isolated territory enclosed within the Neapolitan prov. Laverio 1 bank Garigliano. It is the see of a bishop, and has a castle, a cathedral and six other churches. Pop. 5200.

PONTE-DE-FINHEIRO a vil. Brazil, prov., and 26 m. N.E. Rio-de-Janeiro, 1 bank Macaé. It has an important trade in wood and the produce of the neighbourhood, which is shipped here for Rio-de-Janeiro.

PONTE DELEGAÇÃO, a to. S. side St. Michael, one of the Azores lat. 37° 40' N., lon. 25° 38' W. It is founded on the sea-side. W. by the castle of St. Brás, which can mount 90 pieces of cannon, and about 3 m. to the E. by the forts of San Pedro and Rento do Cão. It is built with considerable regularity and the houses have a substantial and cheerful appearance, but the streets are wretchedly paved. The principal buildings are six churches eight monasteries, and four convents, now suppressed, and a neat English chapel. The anchorage in the roadstead has both a bad bottom and is much exposed, and the harbour is so shallow, that vessels require to be loaded by means of small craft, but still the trade is considerable. It is chiefly in the hands of the British, of whom a considerable number are here resident including a consular office exports are wheat, maize, and oranges and the imports, cotton and silk tissues, hardware, &c. The manners of the native inhabitants are very voluptuous, and morals are at a very low ebb. One of the main causes of this was the number of nunneries and monasteries, in which the inmates were not careful to preserve even the semblance of virtue. Pop. 22,000.

PONTE-DELL' OLIO a to. and com. Parma, duchy and 15 m. S. Piacenza, r. bank Nura here crossed by a handsome bridge of eight arches. It has a court of justice, a church, a primary school, a copper two iron and two paper mills, and a millstone quarry. Pop. 5578.

PONTE DO RIO VERDE, a vil. and par. Brazil, prov. Minas-Geraes, 16 m. N.E. Campinas, on the Rio Verde, with a parish church, and a primary school.

PONTEBIA a vil. kingd. of Italy, prov. Venetia, par. Friuli, r. bank Vajcia with a church, and three mills. Pop. 1400.

PONTEDELLA, or **PONTA DELLA**, a to. Tuscany 14 m. E. Pisa, 1 bank Era, here crossed by a marble bridge. It is well and regularly built has two churches and an hospital, manufactures of cotton and mixed goods, cordage, shuttle, rye, corn, tanneries, numerous hucklings and a trade in corn, hemp flax and wine. Pop. 5447.

PONTEDRACI, or **PONTA DRACI**, an episcopate and main factory for and castle in England, co. and 54 m. S.W. York, on a height a little below the confluence of the Aire and Calder, and on the Walsfield, Pontefract and Goole railway. It consists of spacious streets, and houses mostly well built of brick, and has a few remains of a celebrated old castle, which stood on a commanding height, figures much in early history, and was the scene of the murder of Richard II., and several other atrocities. Two parish churches one of them very ancient, and forming a very conspicuous object, both from its tower and its elevated site. Independent, Primitive and Wesleyan Methodist, Friends and E. Catholic chapels a handsome townhall, courthouse, free grammar British national, and other schools a mechanics institute, subscription library, dispensary poorhouse, and several hospitals. The manufactures include hats, iron and brass castings, earthen ware, bricks and tiles, and in the vicinity are numerous flour-mills, productive coal-mines, and extensive gardens and nurseries, partly employed in growing liquorice, which is largely manufactured on the spot. The trade is chiefly in liquorice malle, for which there are several extensive establishments and corn of which large quantities are sold in the weekly market. Pontefract is governed by a mayor, four aldermen, and twelve councillors, and sends two members to Parliament. Pop. 11,515.

PONTELAND par. Eng. Northumb., 10 073 ac. P. 1127.

PONTELANDO a vil. Naples prov. Salerno, 20 m. S. Campobasso. It is walled has four churches, one of which is collegiate, and an hospital. Pop. 4299.

PONTENURE a to. and com. Parma, duchy and 6 m. S.E. Piacenza, near the Nura, here crossed by a modern bridge of five arches. It is a very ancient place, and has a court of justice and a primary school. Pop. 3750.

PONTESBLEY, par. Eng. Salop 10 667 ac. P. 2883.

PONTISTURA, a to. Italy, Piedmont, div. and 35 m. N.W. Alessandria, r. bank I; with a court of justice, had some parish church two oratories and a school. Pop. 1841.

PONTEVEDRA, a maritime prov Spain, Galicia, bounded N E by prov. Lugo, S by Orense, S E by Ferrol, and W by the Atlantic, area, 3382 sq. m. This province is not only the most populous in Galicia, but it is also superior both in soil and climate. Its principal rivers are the Arnoya, Ulla, Lavea, and Octavay, and the Minho forms its S. boundary with Portugal. It is not rich in minerals, the only mines in operation being two of tin. The productions of the soil consist chiefly of maize, rye, wheat, and millet, besides delicious fruits, a great quantity of wine, chestnuts, honey, potatoes, leguminous plants, flax and horseradish in great numbers; horses, mules, sheep, and goats, are also reared and the swine, which are fed on maize, are much esteemed for their delicacy. The coasts abound with fish, especially sardines, which form a source of great riches. Besides flour-mills, there are manufactures of leather, earthenware, coarse woollen hats, linen, paper, tiles, and soap and many of the inhabitants are sailors and seamen, the latter being employed in Portugal and Castile as well as Galicia. Pop. 420,000.

PONTEVEDRA (Latin, *Pons Fovis*) a town, Spain, Galicia, cap. above prov. 240 m. W of Madrid on a peninsula formed by the confluence of the Lavea, Ulla and Orense, at a short distance from their entrance into the Atlantic, through the Bay of Pontevedra lat. 42° 30' N lon. 8° 34' W. It is surrounded with a high old wall 2600 yards in circuit, and is entered by four large gates. On the N a handsome bridge of 12 arches spans the Lavea, and beside it are two wharfs and the prison. The houses are built of granite, spacious, and generally two stories high and the streets are broad, paved, and clean. Some of the squares have colonnades and are used as market places. It has a barracks, a Franciscan convent, where the provincial courts are held and which on account of its commanding position has been used as a school, a normal and other schools, an hospital, two churches, one of which St. Maria is a Gothic structure, is a master piece of its kind. The inhabitants are chiefly engaged in agriculture, though a few are fishermen, and there are some tanneries and flour-mills. Iron, wine, kidney beans, and hides are exported. Pontevedra was ravaged in 1809 by the constant transit of French troops, who sacked it repeatedly (see *Historia*). The sculptor was born here. P. 414.

PONTFOLIO a town and com. Italy, Lombardy prov. and 21 m. from Brescia, near a bank Oglio, at the confluence of the Secchia. It is an ancient place surrounded by walls, and once defended by a strong castle, which still exists in a dilapidated state, contains many good houses, and carries on an important trade chiefly in corn and wine, being an emporium for the traffic of Brescia and its valleys, which here finds an outlet by the navigable Oglio. Pop. 5693.

PONTFOLIO par. Wales, Pembrokeshire 625 ac. P. 41.

PONTIAC, a vil. U. S. state, Michigan, on the Clinton 28 m. N. W. Detroit, with a courthouse, a jail, a church, several mills, an iron foundry, and two printing offices. P. 1000.

PONTIANAK, a town, W. coast, Borneo, on both sides the Pontianak, cap. Dutch prov. and kingdom of its name, almost on the equator line, 109° 20' E. It has some trade in gold dust and birds' nests. The province extends along the W. coast of the island, from the frontier of Sambas, lat. 0° 30' N, to lat. 8° S, and includes the districts or states of Mempawah, Landak, Tayang, Bontol, etc. on its coast are numerous islands. It is ruled by the Sultan, Pontianak and numerous smaller streams; and in its N. part has a large lake, named Malayan or Malaya. It produces pepper, sugar, rice, rattans, sugar, oil, wax, birds' nests, diamonds, and gold, of which last there are several rich mines. Some cotton and silk stuffs are made by the Bagis, and opium, rice, salt, linen, and Chinese wares, are imported. The navigation is now limited to the delta of the river Pontianak. It is marshy and damp, and the temperature ranges from 84° to 89° F. The river runs partly in lake Malayan, and partly in a stream flowing from a mountain range near the centre of the island. It flows W. S. W., in a very crooked course, past the chief towns of the small states of Rajah, Belinharu, Sintang, Sekondo, Bungon, Milow, and Tayang, and falls into the sea along with the Sintang and Sintang, by nine mouths; total direct course, about 840 m.

PONTICELLI, a vil. and com. Naples, prov. and 4 m. N. Naples; inhabitants cultivate kitchen-gardens. P. 5081.

PONTIFICAL STATION. See *PAPAL SEAT*.

PONTINE MARSHES [Italian, *Paludi Pontine*, Latin *Swampes Paludae*, French, *Marais-Pontins*] an extensive tract, Italy, forming the S. W. part of the Ag. Pontine, stretching N. W. to S. E. from the village of Ponte a Terracina for 24 m. with a mean breadth of about 7 m.; area, about 60 sq. m. They existed during the time of the Romans, who, by the construction of the Appian way which traversed them, and cutting numerous canals, had laid a considerable portion of them dry; but the general neglect of the work during the latter years of the empire, and the subsequent confusion, allowed them to return almost to their original condition. Several of the popes, and particularly Pius VI. from 1777 to 1791, made many efforts to drain them, and partially succeeded, but large tracts still remain so unhealthy that they are almost uninhabited. When the draining is so completed as to admit the operations of agriculture, very heavy crops of maize and the ordinary cereals are raised.

PONTINOLO (anc. *Pons Aureoli*) a vil. and com. Italy, Lombardy prov. and 8 m. S. E. Bergamo on the Adda; with two churches, two old towers raised during the dominion of the middle ages; a salt mill, tile-work, and linens. P. 1861.

PONTINGHIGHT or *Canary* par. King Essex 1140 ac. Pop. 454.

PONTIUA, or *Pontia* a vil. and com. Italy, Lombardy prov. Bergamo 1 m. W. Capriano with a noble Gothic church, tile-works, and linens. It makes a considerable figure in the contumacious of the middle ages, and still shows the remains of two old castles. Pop. 1986.

PONTIVY a town, France, dep. Morbihan, 1 bank and canal of Havre, 81 m. N. W. Yarnes. It was once fortified and part of the ancient walls and gates still exist. Great additions were begun to be made to it by Bonaparte, who changed its name to Napoleontville. These works remain unfinished, and give the town a desolate appearance. It has a court of first resort, a college and numerous tanneries, and carries on a considerable trade in corn, linen, thread, leather, butter, horses, and cattle. Pop. 4585.

PONTLEVOY, a town, France, dep. Loire-et-Cher 13 m. S. S. W. Blois. Its Benedictine college early acquired celebrity and still exists, being principally attended by foreigners, the greatest number of whom are Spaniards. Pop. 1170.

PONTLEUE, a vil. France, dep. Sarthe, 2 m. S. Mans, on the Sarthe, crossed by a handsome bridge. It has a fine promenade, manufactures of linen, and some excellent bleach-works. Pop. 1976.

PONTOGLIO or *Ponte all' Oglio* a vil. and com. Italy, Lombardy prov. Brescia, and 4 m. N. W. Chiari; bank Oglio, with two churches and two seminaries. It is surrounded by vineyards and mulberry plantations. Pop. 1468.

PONTOME (Latin, *Pons Fovis*) a town, France, dep. Seine-et-Oise, at the confluence of the Seine with the Oise, here crossed by a handsome bridge, 19 m. N. Versailles. The houses are tolerably well built but most of the streets are narrow and steep. Its chief edifices are the church of St. Meelon, the public library, and a magnificent hospital. It has a court of first resort, and a college, manufactures of chemical products, and a trade in corn, cattle and flour. Pop. 4508.

PONTON, two parts. Eng. Lincoln — 1, (Great), 3980 ac. Pop. 689 — 2, (Little), 1480 ac. Pop. 189.

PONTREUIL, a town, France, dep. P. de la Seine, at the foot of the mountains, at the confluence of the Seine with the Marne, here crossed by two bridges, 81 m. W. N. Florence. It is walled, has six gates and a castle, is the seat of a bishop, has a civil and criminal court, several public offices, a large and handsome cathedral, five other churches, four monasteries, an Episcopal seminary, and several other schools, a courthouse, townhouse, episcopal palace, and three hospitals, manufactures of linen, cotton, hempen, and wax cloth, hats and leather, paper and powder mills, rosoglio distilleries, dyeworks, tile-works, and a trade in wool, silk, cattle, corn, and oil. Pop. 4088.

PONTREUIL-EN-CHATEL (Latin, *Pons Castellus*) a town, France, dep. Maine-et-Loire, 3 m. S. E. Angers, 7 bank Loire, here divided into a number of channels, crossed by four bridges, which have an aggregate length of 2380 yards. The town consists of narrowways lined with houses in the direction of these bridges. Pop. 3626.

PONTPOOL, a market in England, co. and 15½ m. S. W. Monmouth, on a branch of the S. Wales railway. It

is irregularly built, has an Episcopal chapel, places of worship for Baptists, Wesleyans, Independents, Friends, and Catholics. The art of imitating Japan ware, from which the articles varnished were called Japan ware, was discovered here. This branch of trade, with the manufacture of Pottery-pool ware, or articles of polished iron, is still carried on, and a large portion of the population is employed in iron-works and forges, and iron-mills for making tin-plates. There is a considerable trade here in iron and steel. Pop. 3709.

PONZA, a group of islands in the Tyrrhenian Sea, belonging to Naples off coast prov. Lavoro, about 40 m. S.W. Gaeta. The most important are Ponza, Palmarola, and S. Anna. The two last are uninhabited, and covered with rocks and brushwood. Ponza, the largest, is about 4 m. long, N. to S., and rather less than 1 m. broad. It produces wine and figs, and has a productive fishery, extensive salt-works and a harbour capable of holding 50 large vessels, defended by a fort and a battery. The Romans used this island as a place of banishment, and Domitilla, one of the first Christian martyrs, suffered here by order of Domitian. The British took possession of Ponza in 1815, and next year restored it to Naples. Pop. 800.

PONZA FLORES, a tn. and par. Portugal prov. Beira-Alta, near Thomar. Pop. 1288.

PONZON, a tn. Italy. 1 liedmont, div. Alessandria, prov. and 9 m. S. by A. Aquila with a court of justice, a church, and a school. Pop. 5177.

POKIL, par. Wales, Montgomery, 6801 ac. Pop. 4991.

POOL (Bourne), par. Eng. Devon. 4998 ac. Pop. 466.

POOL, or Walsall Pool, par. Wales, Montgomery, 6801 ac. Pop. 4991.

POOLAJEFF, a tn. Balochistan, prov. Cutch Gundava, lat. 23° 3' N. lon. 68° 10' E.

POOLE, a seaport, bor. and market tn. England co. Dorset, on a peninsula, in the N. part of Poole harbour and on the Southampton and Dorchester railway, 20 m. E. Dorchester. It is a very ancient place, supposed to have been frequented as a port by the Romans, had fortifications which were demolished in the reign of Charles II., and consists of an older and a more modern portion, the former of mean appearance, and the latter with several large and handsome houses. Its chief buildings are an elegant modern parish church, a chapel of ease in the Grecian style, Independent, Baptist, Primitive and Wesleyan Methodist, Friends, Unitarian, Swedenborgian and C. Catholic chapels, a townhall, guildhall, custom-house, British, national, and other schools, a workhouse, jail, and several almshouses. The manufactures consist chiefly of cordage and sail cloth. There are also several large building-yards, a valuable place and harbour fishery and a large, safe, and commodious harbour provided with extensive warehouses, and excellent quays nearly 1 m. long. The trade, both coasting and foreign is of considerable extent. In 1851, the coasters which entered were 687, of 46,998 tons and cleared 1773 of 52,898 tons; in the colonial and foreign trade, the vessels entered were 104, of 10,930 tons; and cleared, 102 of 11,947 tons. One of the chief local exports is clay for the Staffordshire and other potteries. Poole is governed by a mayor, five aldermen, and 18 councillors, and sends two members to Parliament. Many barrows and other early antiquities exist in the neighbourhood. Pop. 9265.

POOLE KEVERN, par. Eng. Wilt. 1110 ac. Pop. 192.

POOLE (St James), par. Eng. Dorset 700 ac. P. 6718.

POOLEWILL, a vil. Scotland, co. Ross and Cromarty, par. Gairloch, at the mouth of the Ewe, by which Loch Maree discharges itself into Loch Ewe, 5 m. N. N. E. Gairloch. It has a neat Established, and a Free church, and several schools.

POOLKEE, a ruined city, Afghanistan prov. Sistan, 7 li. S. W. Kandahar, lat. 31° 30' N. lon. 61° 54' E. The ruins cover an extent of at least 16 sq. m., and consist chiefly of ramparts, houses, and gardens.

POOLYARH BAY, Isle of Man. See BALVAGH.

POONAH, a city and dist. Hindoostan, presid. Bombay. The city is a plain about 2000 ft. above the sea, 80 m. E.S.E. Bombay. lat. 18° 50' N. lon. 74° 3' E., stands at the junction of two affluents of the Beemah river, and has rather an European appearance. It is pretty well built, its main street is wide, and lined with buildings ornamented with paintings and architectural carvings; it has numerous pag-

das, a Hindoo college, a British church, public library, civil hospital, arsenal, and barracks for two regiments of infantry, and one of cavalry. The European cantonments are on the E. separated from the city by a line of barracks and on the S.W. is the famed palace of the Peshwa, or head of the Maratha confederacy, whose capital was Poonah. This station is famed for salubrity, and is resorted to by most of the European officers of Bombay during the rainy season. It is an important military post, and has some manufactures of silks and paper, and well-supplied markets. Around it are numerous ruined hill forts on isolated peaks; and good roads connect it with Bombay Ahmednuggur, Satarah, &c. Pop. has been variously estimated it may be 90,000, exclusive of troops.—The distance lat. 16° 30' to 19° N., lon. 78° 30' to 78° E., and bounded N. by the dist. Ahmednuggur, W. by the Ghauts, separating it from the Concan S. by Satarah, and E. by the Nizam's dominions. Area, 5298 sq. m. It is an elevated table-land, watered by the Beemah and its tributaries, and abounding in unmineralised fields formerly covered with strong fortresses. The villages are mostly open, but sometimes surrounded by hedges of cactus. Inhabitants chiefly Marathas. After Poonah the principal towns are Secor, Pandgaon, and Solapur. Pop. 604,990.

POOPO, or Porpo, a vil. Bolivia, dep. and 106 m. S. by E. La Paz, formerly a very considerable place. Its silver-mines are still wrought to some extent. Near it are many curious ancient tombs. Pop. about 1000.

POUBA, a tn. Balochistan 225 m. W. S. W. Kalat, amidst groves of palm-trees yielding fine dates, which form the principal wealth of the inhabitants.

POORALI Y, a river, Balochistan rising in prov. Thalawan flowing S. into Lox, and after a course of 100 m. falls into the Indian Ocean in Sommeas Bay lat. 26° 38' N., lon. 66° 50' E. It is for the most part shallow but when swelled by rains becomes a furious torrent.

POORBUNDH, a large and populous tn. Hindoostan prov. Gujerat, peninsula of that name, S. W. coast, 68 m. S.E. Dwaraka. lat. 21° 30' N. lon. 69° 42' E. It has a large trade, being an emporium for Gujerat and Malwa, with Persia and Arabia. To Mustak the exports are cotton, wheat, oil and millet, the imports thence rubber, rumex, &c. To Bombay the exports are grain the imports sugar, iron, steel, tin, lead, cloths, chinaware, broad cloths, pepper, spices, rice, &c. in small quantities. The modern port of Poorbunder was established on the site of the ancient city of Rudamayura.

POOREE, a tn. Hindoostan. See JUDGEHATTA.

POORETOLK, See PORETOLK.

POORTON (Oxton), par. Eng. Dorset, 644 ac. P. 109.

POORTVLEET, a vil. Holland, prov. Zealand, 4 m. W. N. W. Tholen, with a church and school. Pop. (agricultural) 1118.

POOSHUR, a tn. Hindoostan, presid. Bengal prov. and 4 m. W. Ajmer on the shore of a romantic lake, and a celebrated place of Hindoo pilgrimage.

POOTO, or POTO, an isl. China Sea. See POTO.

POPA (Futo), an isl. Indian Archipelago, Gilolo Passage, lat. 8° E. point, 1° 12' S. lon. 129° 53' E. 15 m. or 18 m. long E. to W. and 9 m. broad. A semicircular hill like a bee-hive, and another oblong hill both near the N.W. end of the island, render it very conspicuous.

POPAYAN, a city New Granada, cap. dep. Cauca, in a fertile plain, near the river Cauca, and near the volcanoes Purusé and Botaro 228 m. S. W. Bogota. It is regularly built, has fine streets, and although greatly diminished from its former magnificence, is still one of the principal cities of New Granada. It is the seat of a bishopric, has a university, a college, an hospital and other public institutions; and formerly had an extensive trade in the precious metals, now chiefly confined to agricultural produce. It was founded in 1536, and almost completely destroyed by an earthquake in 1834. Pop. about 8000, though at one time above 20,000.

POPE, or Porpo, an isl. one of the Moluccas, lat. 4° 15' S. lon. 129° 45' E.; about 50 m. in circumference. It affords supplies of coco-nuts salt and dried fish.

POPERINGUE, a tn. Belgium, prov. W. Flanders, on the Vesterbeque, 34 m. S. W. Bruges. It is walled and tolerably well built: has a handsome townhouse, three churches, and a chapel, an hospital, orphan asylum, college, school of

design, several primary schools, and a medical society. Many features of woollen stuffs, thread, leather, ropes, soap, and earthenware, oil mills, dye-works, blacksmiths, and mill-wheels, and a trade in the excellent hops of the district, and in corn and cattle. Pop. 10,439

POPHAM, par Eng. Hants; 1857 or Pop. 104.

POPLAM, a par England, co. Middlesex, on the Thames, which bounds it on the E., W., and S., 3 m. S.E. London. It takes its name from the poplar-tree with which it is entirely abundant, and is inhabited chiefly by persons connected with shipping. It has a handsome church in the Grecian style, with a lofty steeple, a chapel of ease, with a handsome turret, Baptist, Independent, Wesleyan, and R. Catholic chapels, a sailors' home, national and other schools, a townhall, forming part of the union workhouse, an East India hospital, an institution for the promotion of literature and science, extensive works for the manufacture of plate-glass, machinery, &c., and several iron and brass foundries. The West India docks form part of the parish area, 1490 ac. Pop. 39,384.

POPULAR MARSHES, England. See DOGS (Isle of).

POPO a dist. W. Africa, included in the territory of Dahomey, with two towns on the slave coast, Great and Little Popo. The former lying close to the sea, lat. 6° 15' 36" N. lon. 1° 28' 16" E. (a), consists of mud huts irregularly buddled together, with a population of about 5000, who manufacture earthenware and cotton goods, but are principally engaged in the slave-trade.

POPOCATÉPÉTL, an active volcano, Mexico, dep. and 30 m. S.W. La Puebla. It is in the form of a cone composed chiefly of porphyritic basalt and rising upwards of 17,000 ft. above sea-level. The lower part is covered with forests but at the height of 12,700 ft. all vegetation ceases, and beyond this its sides are covered with juniper and asbes, for the most part concealed by snow. The crater is about 3 m. in circumference and 100 ft. deep. Sulphur of excellent quality is extracted from it.

POPOLI, a tn. and com. Naples, prov. Abruzzo-Ulterior, dist. and 9 m. N.W. Sulmona, with three convents, and two almshouses. Pop. 3340.

POPPELLAU a vil. Prussia, Silsona, gov. and 13 m. N.W. Oppeln, with manufactures of potash and two mills. P. 1512.

POPPELSDORF a vil. Prussia, gov. Cologne, close by Bonn, on the Mühlbach, at the foot of the Kreuzberg and Yennsburg. It has a porcelain factory and a fine museum, and botanic garden in connection with the castle of Clemensruhe. Pop. 518.

POPPELNAUER, a tn. Bavaria, Lower Franconia, dist. and E.B.E. Münchens, on the Leana here crossed by a bridge, with two churches and numerous mills. Pop. 1240.

POFFI a tn. Tuscany, r. bank Arno, 38 m. E.S.E. Florence, with a court of justice, a church, an old castle, a theatre, two monasteries, and two schools. Pop. 1797.

POPFLETON (Newman) par Eng. York, 1150 ac. P. 944.

POPRAD, a tn. Hungary. See DEUTSCHENHOFF.

PORA, (N and S.) two large isls, about 55 m. off W. coast, Sumatra. N. Pora extends nearly N.W. and S.E., about 70 m. lat. (N. and S. 55° S. lon. 99° 35' E. It is generally high land, covered with wood higher in the middle than towards the extremities, with a sandy beach in many parts. S. Pora, which is separated from N. Pora by Sundaflower Channel, is about 26 m. long, and nearly 18 m. broad at the N. end, decreasing gradually to the S. extremity in lat. 3° 25' S. lon. 99° 55' E. It is mostly covered with wood, and rather less elevated than N. Pora. At some points on this island may be obtained wood and water, a few hogs, yams, some poultry and coco-nuts.

POREAC, a vil. Hungary. Either Timis, co. Lipa about 11 m. from Leutaciar, with a Greek church. Pop. 1017.

FORCA a market in Hindostan, prov. Travancore, 125 m. N.W. Cape Comorin. The Dutch East India Company formerly had a factory here for procuring pepper.

FORCAH a vil. and par Tuscany, dioc. of Livorno, near the Lago di Fiesco on an isolated hill above the Lecio. It contains a church, and an old castle. Pop. 2661.

FORLE, a river New Granada, rises in the Andes, flows N.W., and joins r. bank Nechi, 50 m. E.S.E. Cauca, a total course, about 120 m. Gold is washed from its sands.

FORRESTER, a vil. and par England, co. Hants, 2 m. E.S.E. Fareham. It formerly stood close to the sea, and had

a harbour which was one of the principal stations of the British navy, and was defended by a strong castle, situated on a neck of land projecting into the harbour. The castle still exists, though in a dilapidated state, and with its walls includes a quadrangular area of 5 acres, with a broad and deep moat, but the retirement of the sea, and the consequent removal of the navy to Portsmouth, has made Portsmouth entirely deserted. The parish church, a venerable uniform structure, is within the outer area of the castle. Area of par., 3949 ac. Pop. 786.

FORHLOW or Forowor a tn. Russia, gov. and 40 m. E. Pskov, with a church, a school and the remains of an old castle, surrounded by a wall flanked with four towers, and a trade in corn and flax. Pop. 1849, 3894.

FORCO, a tn. Bolivia, dep. and 24 m. N.E. Potosi cap. prov. and near the mountains or cerro of same name, is lat. 19° 50' S. and 16,000 ft. high. It is now an insignificant place, but was long famous for the richness of the mines in its vicinity, from which the Incas are said to have derived the greater part of their treasures. Here too were the first mines worked by the Spaniards after their conquest of Peru.

FORCOS (ILHA DO) a group of isles, Brazil, off coast, Rio-de-Janeiro, in the Bay of Flammengo, 16 m. N.E. Il. St. Sebastian. It is separated from the mainland by a channel which allows vessels to pass, and at several points affords good shelter where they can lie to take in water and provisions.

FORCUNA a tn. Spain, Andalusia, prov. and 20 m. W. Jaen. It has several squares, one of which stands the parish church and the public granary, and these as well as the streets, which are of moderate breadth, are well paved and clean. A townhouse and prisons, an hospital, several primary schools, various suppressed convents, and a number of hermit ages. Near it is a very ancient and extensive fort with walls, several forts and numerous oil mills. Pop. 5227.

FORDENONE a tn. kingd. of Italy gov. and 40 m. N.E. Venice on a plain on the Noceola. It is surrounded with an old wall is a well built, stirring place, with two parish and six auxiliary churches, a theatre, hospital, and workhouse, manufactures of linen, copper, stoneware, paper, and glass, and a considerable trade in corn and wine. P. 4600.

FORETSCHIE, a tn. Russia, gov. and 38 m. N.W. Smolensk, on the Rappia, which here receives the Gosh, and becomes navigable. It has three churches, building-yard, and a considerable trade. Pop. 2500.

FOREITA, or BACIN DELLA FORESTA a tn. Papal States, leg. and 30 m. S.W. Bologna, with thermal baths, which are much frequented. Pop. about 2400.

FORINGLAND two pars. Eng. Norfolk.—1 (Great or East).—2 (Little or West), 1740 ac. Pop. 605.

FORKHÖV, a tn. Russia, gov. and 42 m. E. Pskov on the Chelon with an old castle, a church, a district school, and some trade in corn and flax. Pop. 1800.

FORLEZZA a tn. and com. Italy, Lunardy, prov. and 16 m. N. Como, on Lake Carosio. It has a handsome church and excellent manufactures of glass and mirrors. Pop. 978.

FORLECK a market in and par England co. Somerset near the Bristol Channel in a romantic district, 55 m. W. N.W. Taunton. It is a struggling place, with a hand mill church, the remains of an old castle, and some imports of coal and lime from Wales; area of par. 6019 ac. Pop. 863.

FORNASSIO a vil. and com. France, dep. Alpes Maritimes prov. and about 12 m. N.W. N. N.W. Oreglia, on the top of a well-cultivated hill with a church. Pop. 1153.

FORNIC, a seaport in France, dep. Loire-Inférieure, near Falmbeur on the Bay of Biscay, at the entrance of the Bay of Bourgneul. It has a good harbour, at which a considerable trade in corn and oil, and is much frequented for sea-bathing. Pop. 1324.

FOROMUSHIR, one of the largest of the Kurile Is., S. of Cape Lopatka, about lat. 50° 50' N. lon. 155° E. length N.E. to S.W. about 60 m. It is separated on the N.E. from the island of Sannai, by a channel which does not exceed 1 m. in breadth, and on the S.W., has the small island of Shirinsky. It is tolerably level to the S.W., but very mountainous to the N. Amongst its animals are many foxes, martens, and bears. The inhabitants, consisting of about 70 families, live chiefly by hunting them and catching seals and walrus.

FOROS (see Agbaria), an isl. Greece, S.W. entrance, Gulf of Egina, and only separated from the coast of Argolis

Doric portico, and an elegant spiral 150 ft. high; a commodious engine-house, several schools, extensive manufactures of ropes and sail-cloth, chain cable works, a sugar-refinery, iron and snubber foundries, and building-yards at which many large sailing vessels and steamers are constructed. The harbour, provided with commodious wharves, numerous warehouses and wet-docks, in which vessels drawing 35 ft. water are kept always afloat, affords great facilities for trade, which though at one time greatly diminished by the formation of the locks at Greenock and the deepening of the Clyde, enabling large vessels to ascend to Glasgow, is still considerable, and has for some time been steadily increasing. It is carried on chiefly with the E. and W. India, N. America, and the Mediterranean. Port-Glenape unites with the Kilmacreeb burghs, in returning a member to Parliament. Pop. 6568.

PORT-GLAZWIG, a market in Ireland, co. and 15 m. N.N.W. Antrim on the Bann, here crossed by an elegant modern bridge. It has several well-built houses, Episcopal, Presbyterian, Wesleyan, and R. Catholic chapels, three public schools, manufactures of linen, and a trade in grain, slates, and timber. Pop. 990.

PORT-GORDON, a fishing vil. Scotland, Banffshire, 3½ m. W. S.W. Buckie with a tolerable harbour and a considerable trade in importing coal and salt, and exporting grain.

PORT HORN, a vil. Upper Canada, on a creek N. shore, Lake Ontario 55 m. E. by N. Toronto. It is built chiefly on the sides of a hill, commanding fine views of the lake and the surrounding country has several handsome buildings, including Episcopal, Presbyterian, Methodist, and R. Catholic churches a school two female seminaries, and several breweries and distilleries. Pop. (1852), 2474.

PORT HOWE, a harbour Bahamas. E. coast, Salvador or Cat Island. It was the first land seen by Columbus, who landed here, 15th October 1492.

PORT HUWYRA, a haven New S. Wales, between co. Gloucester and Northumberland, where it is formed by the estuary of the river Hunter, at the town of Newcastle, of which it is the harbour. It is well sheltered and safe, and admits vessels of 800 tons.

PORT HUWYRA, a vil. U. States, Michigan, 59 m. N.E. Detroit, at the confluence of the Black and St. Clare rivers with two mills, a tannery and a printing-office. A considerable business is done in lumber. Pop. 2502.

PORT-JACKSON New South Wales. See SYDNEY.

PORT LOUIS, the cap. of St. Martin, N.W. coast lat. 20° 9' 45" N. lon. 57° 35' E., beautifully situated in a cove, formed by a series of basaltic hills, portions of which are woody, they vary in height from 1058 to 2639 ft. The streets

garden, and an hospital. The town and harbour are protected by batteries. Pop. 35,000.

PORT MACQUARIE, New S. Wales. See MACQUARIE.

PORT MABON, a ta. Minorca. See MABON.

PORT MATAI, S. Africa. See MATAI.

PORT-OF-MONTEBELL, a vil. and par. Scotland, co. and 37 m. W. S.W. Perth with several lakes, among which that of Montebell with its beautiful island of Inchmahome, and the remains of an ancient priory deserves particular notice. The village, a small but ancient place, was made a burgh of barony by James III. in 1446. It has a plain but neat church and a school. Extent of par. 9 m. by 6 m. Pop. 1419.

PORT-OF-SPAIN, a ta. W. India, cap. Isl. Trinity, in the Gulf of Paria, near the mouth of the Orinoco. It has a large and spacious harbour, at which a considerable trade is carried on. Pop. about 7000.

PORT PATRICK, a seaport to and par. Scotland co. Wigton lat. 54° 50' 15" N. lon. 56° 0' 45" W. (a.), in a bay so closely surrounded with high cliffs, that the town, which lies on its shores, has from some points of view the appearance of standing in a large quarry. It has a parish and a Free church, several schools, and a considerable cod-fishery. It was formerly a packet station for conveying the government mails to Ireland, by Donaghadee, about 30 m. distant. The new harbour of Port-Patrick, work of considerable labour and difficulty cost about £200,000, and is after all neither easy of access nor secure. On May 23 1853, a line of electric telegraph was laid across the channel, from Port-Patrick to Donaghadee. Area of par. 9200 ac. Pop. 1083.

PORT PHILIP Australia. See MELBOURNE.

PORT PRATA, ta. Cape Verd Isles. See PRATA (PORT).

PORT RAFFLES Australia. See RAFFLES BAY.

PORT REPUBLICAN, cap. HAVANA. See PORT-OF-PRINCE.

PORT ROYAL, Nova Scotia. See ANAPOLIS.

PORT ROYAL, a fortified N. Jamaica, S.E. coast lat. 17° 56' N. lon. 76° 51' W. on the extremity of a tongue of land, forming the S. side of the harbour of Kingston (which see). Its harbour is the station for the British ships of war and it contains the naval arsenal, hospital, &c. The bulk of its inhabitants are people of colour. It has been repeatedly damaged by earthquakes.

PORT SANTA-BARBARA, a natural harbour, W. coast, Patagonia, N. end Campesina Island lat. 48° 0' S. lon. 78° 30' W. Its shores are rocky with some patches of sandy beach, but everywhere covered with trees, or an impenetrable jungle, composed of dwarfish trees and shrubs. The land in most places rises abruptly from the shore to mountains of basalt some of which are above 2000 ft. high, and are bare to their summits.

PORT-SEAFORTH a vil. Scotland on Firth of Forth, co. and 7 m. W.N.W. Haddington; with salt works, oil cake factories, and a fishery.

PORT SEAFORTH a vil. Canada West. co. Middlesex, at the mouth of Kettle Creek, N. shore, Lake Erie, 120 m. W. S.W. Toronto. It has two churches; a tannery two distilleries, two flour-mills, and a harbour at which farm produce is shipped. Pop. about 600.

PORT SEAFORTH, a harbour, New S. Wales lat. 35° 45' S.; about 13 m. in length, and 2 m. to 4 m. broad.

PORT SEAFORTH a small seaport, ta. and an fishing place, Ireland, on Londonderry 4 m. N.N.W. Coleraine. It has an established church a Presbyterian meeting-house, and a Wesleyan chapel, an infant and a national school, and a dispensary. Pop. 684.

PORT VENEZIA [Latin, *Portus Venetie*] a fortified seaport in France, dep. Pyrénées-Orientales, on the Mediterranean, 17 m. S.E. Perpignan. It has a fine square, with an obelisk about 100 ft. high, in honour of Louis XVI.; and an excellent harbour, with splendid quays and wharves. The trade is chiefly in corn, wine, and brandy. Pop. 1808.

PORT LOUIS, MAURITIUS.—From a French Print.

are rather narrow; they are laid out at right angles, have footpaths with basaltic curbstones, are macadamised, and some of them adorned with magnificent avenues. A mountain stream traverses the town, the borders of which also are ornamented with arking plants. An open space, like a race-course, lies behind Port-Louis, and is called the Champ de Mars; it is bordered by several large villas, neatly and elegantly built. There is a barracks, lesser theatres, public library, botanical

garden, and an hospital. The town and harbour are protected by batteries. Pop. 35,000.

PORT WILLIAM, a thriving vil. and seaport, Scotland, co. and 8 m. S.W. Wigan, E. shore, Lough Bay with a safe and commodious harbour, at which much agricultural produce is shipped.

PORTA-OMBRANA, a vil. and com. Italy Lombardy prov. Lodi, and so near to Crema as to be almost its suburb with a church. Pop. 1184.

PORTACOMARO a vil. and com. Italy Piedmont, div. Alessandria, prov. Vercelli, 4 m. N.E. Asti; partly surrounded by walls, and entered by a lofty arched gate. It has a court of justice, a church, and a school. Pop. 1464.

PORTADOWN a market in Ireland, co. and 9 m. N.E. Armagh, a station on the Ulster railway on the Ham, here crossed by a handsome bridge. Its principal buildings are the railway station an Episcopal church, a E. Catholic chapel, and places of worship for Presbyterians Wesleyans, and Primitive Methodists. It has also a national and other schools, and a benevolent society large corn and flour mills, extensive manufactures of linen and cambric, a manufactory of steam-engines, and other heavy machinery a soap and candle work and a brick trade in com. Pop. 8091.

PORTALBURY, a seaport and market in Ireland, co. Down, near the entrance of Lough Strangford, 7 m. N.E. Downpatrick. It has a neat church, a large E. Catholic chapel and places of worship for Wesleyan and Primitive Methodists, and Presbyterians; a market-house, a dispensary, and two public schools and a considerable trade in agricultural produce, and in coal and timber. The female population is extensively employed in the embroidering of muslin for Glasgow houses. Pop. 2074.

PORTALBERA, a vil. and com. Italy Piedmont div. Alessandria, prov. Voghera, near the Po. It has a large square of regular form, a handsome church, and an extensive palace. Pop. 1516.

PORTALEGRE a tn. in Portugal, prov. Alentejo, on a lofty hill 110 m. N.E. Évora with steep, narrow, and winding streets, a cathedral, manufactures of woollens and druggs, and a considerable trade in timber chiefly cut from extensive woods of chestnut in the neighbourhood. Pop. 5650.

PORTARLINGTON, a par. bar and market in Ireland, King's and Queen's cos. 40 m. W.S.W. Dublin a station on the Dublin and Cork railway on the Barrow here crossed by a stone bridge. It has a market-house, two handsome Established churches (the English and French) an elegant E. Catholic chapel and a Methodist meeting-house, several schools; a medical dispensary, and limited manufactures of soap, candles, and shoes. Portarlington returns a member to Parliament. It was to a great extent formed by the settlement of two colonies of French and English Protestants. The French language was continued in the celebration of Divine service in one of the churches until 1817. Pop. 2728.—(Local Correspondent.)

PORTBURY par. Eng. Somerset 8849 ac. Pop. 648.

PORTOCELLO, ital. one of the Hydrunt (Jabok ac).

PORTEL, a tn. and par. Portugal, prov. Alentejo, 26 m. S.E. Évora, near bank Odega, an affluent of the Guadiana. It has an old castle, once occupied by the dukes of Braganza two convents, an hospital, and a Latin school. Pop. 1770.

PORTENDIK, a French trading port, W coast Africa, lat. 19° 19' N. lon. 16° 2' W (n.), 140 m. N. Fort Louis. The entrance of the harbour is obstructed by two great sand banks. It was strictly blockaded in 1834 by the French, when the trade was ruined.

PORTKERRY, par. Wales, Glam. 1131 ac. P. 142.

PORTICI s. tn. Naples, prov. and 5 m. E.S.E. Naples, on the Gulf of Naples. It is beautifully situated, has a delightful climate, and from its proximity to the capital, is both occupied by splendid mansions, and surrounded by fine country seats. It has a royal palace, a rectangular edifice, three stories high, containing fine frescoes, carefully removed from Pompeii; numerous pictures by the best masters, and a museum enriched with an almost unique collection of antiquities from Pompeii and Herculaneum; also a parish church, a handsome Franciscan monastery, royal stables, barracks of the royal guards, and a large and showy building in which a manufactory of all kinds of ribbons has been established. On the gulf is a fine square, below which is the harbour, formed by a mole, and defended by a castle. Here an active fishery is carried on. Pop. 5480.

VOL. II.

PORTICO, a vil. and com. Tuscan, com. and 26 m. N.E. Florence, 1 bank Arno, here crossed by a bridge; with a church, castle, and school. Pop. 2054.

PORTILLO, two tns. Spain.—1. Leon, prov. and 14 E. Valladolid, with a church, a handsome courthouse and prison, an hospital, a primary school, manufactures of lampen cloth and earthenware, brick and tile works, sugar-refineries, and several madder and other mills. Pop. 1600 —2. New Castle, prov. and 19 m. W. Toledo. It is indifferently built, has a church, courthouse, prison, two primary schools, manufactures of coarse woollen stuffs, two oil-mills. Pop. 767.

PORTISHEAD, a vil. and par. Eng. Somerset, 8 m. W. N. W. Bristol with an ancient church independent, Wesleyan and Friends' chapels, and the remains of an ancient camp. At Portishead Point, within the parish is a battery for the defence of the King's road or that part of the Bristol Channel where ships of war usually anchor. Area, 3388 ac. P. 1064.

PORTLAND, a vil. and township, U. States, on the river of that name, nearly opposite to Middleton, about 13 m. S. Hartford. It has building yards at which numerous vessels for river navigation are constructed, and extensive worked quarries of beautiful reddish sandstone. Pop. 2908.

PORTLAND a seaport in U. States, America, Maine, 100 m. N.N.E. Boston on a peninsula, W. extremity of Casco Bay between the river of that name on the S., and Back Cove on the N., on the Cumberland and Oxford canal, and on the railway to Boston, and the Atlantic and St. Lawrence railway. The ground rising into two heights at its E. and W. extremities, forms a natural amphitheatre, and gives to the town, which is built upon it, more especially when it is approached from the sea, an appearance at once beautiful and imposing. It is laid out with considerable regularity at least in the more modern portions, and the main street, extending along the ridge of the peninsula E. to W. is not surpassed by many in the Union. The public edifices and other institutions include about 18 churches, among which are several rendered conspicuous by their fine situations though few of them can boast of possessing much architectural merit; the courthouse, the city hall, the old custom-house of hammered granite the exchange, an elegant structure, entered through a colonnade of beautiful fluted pillars with Ionic capitals, with a dome and recently purchased by the U. States government for a custom-house, post-office, and courtrooms, the Athenaeum, with a valuable library of 6000 vols., the Society for promoting a Knowledge of Natural History with an extensive museum an academy, a classical, and numerous public and private schools, a theatre, jail, &c. The largest manufacturing establishment is a factory, in which locomotives, cars, and all the appointments of railroads, as well as other articles in wood and iron, are made and there are also several tanneries, potteries, and rope-walks. The trade is already extensive, and is in course of still further development, having received a great impetus from the introduction of railroads. The harbour also is one of the best in the U. States, being of easy access, spacious, safe, deep enough for the largest vessels and rarely obstructed with ice. In 1851 the number of vessels which cleared for foreign ports was 511, carrying 77,725 tons. The coasting trade, carried on chiefly with Boston is also very extensive, and many vessels are engaged in the fisheries. The principal exports are timber, fish, beef, butter, &c. Portland was settled in 1623 but was nearly destroyed by the Indians in 1675. It suffered severely during the revolutionary war from a bombardment by the British fleet in 1775. Pop. [1850] 20,819.

PORTLAND—1, a in Victoria, 200 m. W.S.W. Melbourne, on Portland Bay. The bay is spacious, receives several rivers, and includes a number of islands anchorage in lat. 38° 21' 11" S. lon. 141° 57' 45" E.—2, (Cape), Van Diemen's Land, one of the most northerly points of the island lat. 40° 45' S. lon. 147° 58' E.—3, (Channel), At inlet, W. coast, N. America lat. 56° 30' N. lon. 150° W., straitening inland, and separating British from Russian America.—4, (Islands), a small group, Pacific, W. New Haven; lat. 2° 38' S. lon. 149° 39' E. (n.)—5, (Point), the S. extremity of Isl. Jamaica lat. 17° 43' N. lon. 77° 10' W. (n.)

PORTLAND, par. Eng. Dorset; 8555 ac. Pop. 5786.

PORTLAND (Isle or), England, co. Dorset, 50 m. W.S.W. Southampton, in the British Channel, lat. 50° 51' 24"

N. lon. $1^{\circ} 25' 45''$ W. (n), forming the W. boundary of Weymouth Bay. It is not strictly an island being attached to the mainland by a ridge of shingle, called the Chisel Bank, about 10 m. long. It consists of nearly one mass of freestone, called Portland stone, which is exported in great quantities, and is about 4 m. long by $1\frac{1}{2}$ m. broad, and terminates at its N. extremity in the point called Portland Hill. On the N. side, opposite to Weymouth, is the only landing place on the island, the rest being surrounded by high, inaccessible cliffs. The land is under excellent cultivation, or is kept as pasture for sheep. Fish abound along the coast, particularly mackerel.

PORTIL AW, a manufacturing vil. Ireland, co. and 9 m. W. W. Waterford, on the Clodagh. It has a church, a Catholic chapel and Presbyterian meeting-house; a dispensary, reading-room, national school, and extensive and flourishing cotton-factories. Pop. 4331.

PORTLEMOUTH (East), par. Eng. Dorset 2143 ac. 1 op. 461.

PORTLOMAN par. Irel. Westmeath 1810 ac. P 334. **PORTMAHOMACK**, a small seaport, co. Ross and Cromarty N. shore of peninsula formed by the Dornoch and Murry Firths, 11 m. N.N.E. Tain. It has a commodious and well-sheltered harbour with 12 ft. of water at spring and 9 ft. at neap tides; a considerable export of grain and other agricultural produce, and fish; an extensive fishery particularly of herring and some manufactures of linen and herring cloth. Pop. 479.

PORTMAPROCK par. Irel. Dublin 3084 ac. P 602.

PORTMAHON, a fishing vil. Scotland on Argyll, S.W. point of Islay 21 m. S.W. Bannmore. It has a church, a school, and a harbour. Immediately opposite the vil. is a small inlet with a depth, 100 ft. above high-water. P 1269.

PORTMASCULLY par. Ireland, Kilkenny; 2458 ac. Pop. 1062.

PORTNASHANGAN par. Irel. Westmeath 2724 ac. Pop. 460.

PORTO a city *Portus Saeptor*. **PORTO** [ann. *Portus Trajanus*] a fishing vil. Papal States, r. bank W. branch of the Tiber near its mouth, on the spot where Claudius and Trajan established the great naval arsenal of Rome. The ruins are very extensive.

PORTO, a vil. and com. Spain. Leon prov. and about 66 m. from Zamora with a church, courthouse, prison, primary school, and a trade in corn, fax, and cattle. P 1969. **PORTO-ALAZAR**, three tm. Brazil — 1 prov. Rio-Grande do Rio-Grande, near N.W. extremity of Lake Paton, and the confluence of the Ochi, Sines, and Gravatahi with the Jacaré 150 m. N.N.W. Rio-Grande. It is well and regularly built, but only the principal streets are paved. It has several elegant churches a custom-house, hospital lyceum in which Latin, mathematical philosophy and rhetoric are taught and various primary schools a harbour much visited by merchant vessels, and an important trade. Pop. 13 000 — 2, A small tm. and seaport, prov. Bahia, 130 m. S.S.W. Porto-Begure at the mouth of the Mucuri with a church, a primary school a harbour admitting all ordinary coasting vessels, and a considerable export of timber. Pop. 1000. — 3, A tm. prov. Rio-Grande do Norte, 180 m. W. Natal; a straggling place with a townhouse partly used as a prison. Pop. dist. 4000.

PORTO-BELLO, or **PUEBLO-BELLO**, a seaport tm. Now Granada, on the Caribbean Sea 40 m. N.N.W. Panama lat. (Fort St. Jeronymo) $9^{\circ} 53' 30''$ N., lon. $79^{\circ} 55' 30''$ W. (2). It has a fine harbour discovered by Columbus in 1502. The town, founded in 1584, was for some time the rival of Panama, but its destructive climate caused it to be greatly deserted and it is now a poor and miserable place, although its fine harbour still attracts some trade.

PORTO-BELLO, or **GAMOFRA**, a tm. Brazil prov. Santa-Catherina, on a bay of the same name, 26 m. S. Desterro. It has a church a primary school, and a good harbour W. of the town is Lake Garopana, which abounds with fish. A colony of Italians, founded in the district, under the name of Nova-Italia, in 1838, was almost destroyed by a tempest and hardly, but it has since recovered from this disaster. P 3000.

PORTO-CASALE, or **FRANCIS-CASALE**, a fortified castle, tm. in Venezuela, prov. Carabobo, on m. lat. Gulf of Tristram, 22 m. N. by W. Valencia; lat. $10^{\circ} 43' 24''$ N., lon. $69^{\circ} 4''$ W. (n). It is well built, has a commodious harbour, and though

very unhealthy carries on a considerable trade. In 1847, there entered 151 vessels, of 28,089 tons, and cleared 205 vessels, of 29 488 tons. Pop. 7500.

PORTO-CAIRO, or **BOM SOCORRO**, a tm. Brazil, prov. Alagoas, on the Mangueira, 120 m. S.S.W. Pernambuco; with a church, and a considerable export of cotton, sugar, and rum to Pernambuco. Pop. dist. 3000.

PORTO-DAS-FRASES, a tm. Brazil prov. and 40 m. N.W. Alagoas, near the mouth of the Mangueira; with a parish church its district yields large quantities of cotton and sugar, which are exported to Bahia and Pernambuco. Pop. dist. 3000.

PORTO-FALAS, a tm. Brazil, prov. and 50 m. W. São-Paulo, 1 bank Tiete. It has a church and a healthy, beautiful, and fertile district, in which much sugar and rum are produced, and great numbers of cattle reared for exportation, chiefly to São-Paulo and Rio-de-Janeiro. Pop. dist. 10,000. **PORTO-FERRARO**, a tm. Tuscany, cap. of Elba, on a fine bay > coast. It stands on a promontory and is strongly fortified. It is entered by two gates, is well built; has a court of first resort, and several public offices a handsome church several schools a civil and military hospital, bar rack, and a theatre and an excellent harbour, at which the principal export is iron. Pop. 4245.

PORTO-FINO — 1 A seaport in Italy Piedmont, 18 m. S.S.W. Genoa, at the foot of a promontory of same name, forming the W. side of the Gulf of Rapallo. It has a church, the remains of an ancient castle and a harbour defended by a battery. Pop. 1858. — 2 A promontory S. France.

PORTO-GRANDE, a seaport tm. Cape Verde Isl. N.W. side of St. Vincent consisting of about 80 dirty and uncomfortable mud huts with an excellent harbour, formed by a spacious bay well protected from the N.E. trades. Lime-burning and gathering arch are the chief employments.

PORTO-IMPERIAL, or **PORTO-REAL**, a tm. Brazil, prov. and 40 m. N.N.E. Guyas, r. bank Cosmética, with a church, and a primary school.

PORTO-LIBOURNE a vil. and com. Tuscany on a large and deep bay E. side, lat. Elba with a church a school and a casino finely situated on a height; and a trade in fruit and excellent wine. Pop. 2398.

PORTO-MACRIGIO a seaport in France dep. Alpes Maritimes, 40 m. E.N.E. Nice, S.W. shore Gulf of Genoa. It has several churches a Capuchin convent, public schools, an hospital and theatre. The harbour is defended by a mole, but is very inconvenient and shallow. It has, however, a considerable trade, especially in olive-oil, of excellent quality. Pop. 6481.

PORTO-RE, or **KALIVIERA** a seaport in Austria, Hungarian Littoral, Gulf of Quarnero, 12 m. S.E. Fiume. It is well built has a church, a custom-house, building-yards, and a spacious harbour, defended by two forts, but not much frequented; inhabitants live chiefly by fishing. Pop. 1100.

PORTO RICO (Spanish *Puerto Rico*) one of the Spanish West India Islands, the fourth in size of the Antilles, E. of Hayti and W. of the Virgin Islands lat. (S.W. point) $17^{\circ} 56' 10''$ N., lon. $67^{\circ} 10' 10''$ W. and 90 m. long E. to W., and 36 m. broad. A range of lofty mountains covered with wood runs through the island, E. to W., averaging about 1500 ft. in height its loftest peak is 8678 ft. high. In the interior are extensive savannahs, on which numerous herds pasture; and along the coast tracts of level, fertile land, varying in some places from 5 m. to 10 m. wide, but in others the mountains approach much closer to the sea. Nearly the whole of the N. coast is lined with navigable lagoons, some of them 10 m. long and many of the rivers can be navigated to the foot of the mountains a distance of 1 m. or 2 m. There are numerous bays and creeks, deep enough for vessels of considerable burden; but the N. coast is subject to tremendous ground seas, which beat against the cliffs with great violence. Only three harbours, however, are safe all the year round, namely, Guanico and Horcas on the S. coast, and San Juan on the N. There are no serpents or other reptiles on the island, but numerous large rats often do great injury to the sugar-cane. The climate is generally more salubrious than the other islands of the Antilles. Gold is found in small lumps and in dust, in the streams flowing from the heights. Copper, iron, lead, and coal, have also been found; and there are two salines or salt ponds, worked by the government, which yield about 157 tons of salt. Porto Rico is wholly an

agricultural island its products being sugar, rum, molasses, coffee, cotton, excellent tobacco, hides, live stock, dye-woods, lignum-vita, and timber, ground provisions, rice, salt, &c. Among the leading articles imported are cotton and woollen manufactures, drapery goods and some silk manufactures.

The value of the imports in 1896 was £2,231,119, of the exports, £1,026,418. The quantities of the principal articles exported from Porto Rico in the years 1801, 1866, and 1896, were as follows:—

| Articles. | 1801. | 1866. | 1896. |
|-----------------|-------------|------------|------------|
| Sugar, gals. | 146,028,810 | 146,46,263 | 167,36,165 |
| Molasses, gals. | 4,615,108 | 1,979,645 | 3,564,987 |
| Coffee, lbs. | 14,445,810 | 30,990,475 | 52,724,234 |
| Tobacco, lbs. | 9,384,845 | 6,024,522 | 5,620,559 |
| Hides, lbs. | 275,977 | 627,681 | 723,368 |
| Cotton, lbs. | 161,308 | 226,610 | 5,329,766 |
| Rum, gals. | 899,096 | 265,305 | 161,887 |

The capital of the island is San Juan de Porto Rico, besides which there are numerous other towns and villages, but all of them are small. The laws of Spain as administered in Cuba, are those of Porto-Rico. The island was discovered by Columbus in 1493. It was invaded in 1509 by the Spaniards from Hayti, who exterminated the natives about 600,000 or 800,000 in number, in a few years. Pop. (1894) 357,086, of whom 188,869 whites, 101,575 free mulattoes, 26,124 free negroes and 41,818 slaves. In 1860 563,181.

PORTO-RICO (SAN JUAN DE), the principal city and seat of above Isl. Coast, lat. 17° 06' N, lon. 67° 10' W (a). It stands upon a small island connected with the mainland by a bridge, and is surrounded by strong fortifications. It has six churches and chapels, the bishop's palace, a military hospital, theatre, townhouse, jail, house of correction, custom house, arsenal, &c. and is the seat of the government and superior courts of the island, of a society of arts, and numerous schools. The harbour is very spacious, and capable of accommodating ships of the largest size. P. 10,000 to 11,000.

PORTO-SAN BERNARDO (San Domingo Portia) a seaport in Tucumán N.W. coast of the peninsula formed by Mount Argentino about 6 m WSW Orbeallo with a court of justice, and a church, a fort, and two monasteries. The chief employment is fishing. Pop. 2678.

PORTO-SANCTI, an Isl. N Atlantic Ocean a dependency and 40 to N.E. Madeira, lat. 33° 5' N, lon. 16° 15' W (a), 6 m long, and 2½ m broad. It produces wine and most varieties of grain and vegetables in general use, also oranges and other fruits common to its latitude, but it is remarkably destitute of trees. Live stock and poultry are plentiful, but water scarce. There is a small town on the island at the head of a bay containing a church, and courthouses, and protected by a battery. Porto-Santo was for some time the place of residence of Columbus, after his marriage, his wife having some property in the island, and here his first child, Diego, was born. Pop. between 1600 and 1700.

PORTO-SANTO, an Isl. and seaport, Brazil, prov. and 245 m S.W. Bahia Bank and at the mouth of the Banus bay. It has irregular and unpaved streets and three churches, a townhouse, an hospital with a Latin and a par. mary school, and a prison. The harbour is well sheltered on the S.W., but has only from 10 ft. to 11 ft. of water, though the depth at the mouth of the river which is defended by a fort, is 16 f. The trade is chiefly in dye-wood of the first quality fine building-wood, timber, and fish taken in the Archipelago.

PORTO-VERDE, a seaport in France, E. shore, at Comers, on a gulf of its own name, 81 m S.E. Ajaccio, in a very unhealthy site. It is walled, well built, and has a harbour considered the best in the island, being completely sheltered, and capable of containing a whole navy. Pop. 2015.

PORTOBELLO, a par. bar Scotland, co. and S. to E. Edinburgh, on Firth of Forth and the North British railway. It has Established, Episcopal, Free U. Presbyterian, Independent, and R. Catholic churches several schools, and charitable institutions, extensive potteries, brick and tile works, glass-works, chemical works, and a paper-mill, and is much frequented by the inhabitants of Edinburgh for summer-quarters and bathing, for which both the baths and fine firm sands make it well adapted. It antedate with the Leith district of burghs in electing a member to Parliament. Pop. 8467.

PORTOGRUARO, a town, kingd. of Italy, gov. and 25 m. N.E. Venice in a district rendered unhealthy by the marshes which surround it. It is the see of a bishop and has several courts and offices, a cathedral, and four parish churches, a seminary townhouse, manufactures of leather and hats, and two silk mills. Pop. 4000.

PORTOFINO a market in Austria, Illyria, circle Trieste, on one of the loftiest heights in Italy, 11 m. S.E. Trieste. It has a castle, a church, and a school. Pop. 3300.

PORTONE, a vil. Tucumán 1 m. from Pim, of which it may almost be considered a suburb. It has extensive manufactures of articles in brass. Pop. 3950.

PORTOPIANO a seaport in Hindustan, Carnatic, prov. and 83 m S. Pondicherry lat. 11° 30' N, lon. 79° 50' E formerly a large and wealthy town, but now comparatively poor and depopulated, though still occupying a great extent of space. Large vessels anchor at some distance from the town.

PORTOVENESE (Latin Portus Veneti) a seaport in Italy, Piedmont, div. Genoa, 4 m S. Spina. It is walled and has two churches, an hospital and a communal school. Most of the inhabitants are fishermen. There are marble quarries in the vicinity. Pop. 2794.

PORTQUEROLLES, lat. Mediterranean Sea Hérault.

PORTREATH a small seaport in England co. Cork, on the Atlantic, 4 m N. Redruth. It has a Wesleyan chapel and a pier and basin, which can accommodate 20 vessels of 100 tons, and at which about 35,000 tons of copper-ore are annually exported to Swansea. The inlet to the harbour is defended by two batteries.

PORTREATH, a vil. par Scotland co. Inverness on a small bay, E. shore, lat. 56° 45' N, lon. 4° 30' W. It has a parish church, a parochial school and a good harbour which is regularly visited by Glasgow steamers, and at which there is a considerable export of cattle salmon &c. area of par. 9 m by 5 m. Pop. including that of the islands Fladda, Housa and Ross, 8577.

PORTREATH, a small seaport Ireland co. Antrim, 5 m. N. Coleraine. It is much resorted to for sea-bathing. It has an extensive soap and candle manufactory, a well protected harbour and an active intercourse with Londonderry, Liverpool and Glasgow. Pop. above 800.

PORTSCUETT par Eng Monmouth; 1779 a. P. 137. PORTSEA an Isl. England, in an inlet of the English Channel S. coast, Hampshire, with which it is connected at its N. extremity by a stone bridge, length N. to S. about 4 m., breadth, 1 m. to 2 m. On the S. it lies open to the sea, but has the harbour of Langstone on the E. and the far more celebrated harbour of Portsmouth on the W. It belongs entirely to the tertiary formation possesses considerable fertility and is well cultivated. Besides arable fields which produce excellent corn crops large portions of it are laid out in gardens celebrated for their vegetables. It contains a number of distinct villages, but depends chiefly on its important towns of Portsmouth and Portsea. See Portsmouth.

PORTSLADE, par Eng Sussex; 1906 a. Pop. 755.

PORTSMOUTH, a seaport and market in municipal and par. bar England, Hampshire on the S.W. extremity of the island of Portsea and at the terminus of the London and South-Western and the London Brighton and South Coast railways 68 m SSW London lat. (Royal Naval College) 50° 48' N lon. 1° 8' 15" W (a). It consists properly of the two towns of Portsmouth proper, and Portsea, separated from each other by what is called the Mill dam Creek, and communicating by bridges, and of several suburbs. Both towns, united together so as to form a complete fortress, are surrounded by deep moats, and strong walls flanked by regular bastions, and are moreover defended by a series of formidable outworks. The ramparts, planted with trees, and commanding beautiful views, afford an excellent promenade. Portsmouth, which is nearly in the form of a semicircle, is entered by four handsome gates, one of them designed by Inigo Jones, forming an elegant structure of the Corinthian order, and though composed for the most part of narrow and irregular streets of mean appearance, and very dirty, possesses three or four of a less remarkable character. The best of these is the High Street, which divides the town into two nearly equal parts, and contains the principal shops, hotels, and places of business. Portsea, situated N. of Portsmouth, extending along the harbour, and containing the dock-yard

and principal establishments connected with it, is entered by two gates, both of which, called respectively the Lion and Unicorn gates, from those parts of the British arms employed upon them, are imposing structures. In its older parts it presents even a less attractive appearance than similar por-

has an area beneath in which the market is held, the Philo-sophical Society, occupying a handsome building and pos-sessed of a valuable museum, the grammar, national, British and infant schools, the Athenaeum, the custom house, the different barracks, the theatre, the Royal Portsmouth, For-ess, and Gosport hospital, new military hospital, Sailer's Home, new convict prison,burgh jail, female penitentiary, union work-house, &c. These, however, present little interest compared with the royal dock-yard, which covers an area of 130 ac., and is believed to be the largest and most magni-ficent establishment of the kind in the world. It is inclosed by a wall 14 ft. high, and entered by a lofty gateway; and contains, in addition to the vast storehouses in which all the materials requisite for naval architecture are kept, the machine shops in which they are converted to their proper use by all the aids which modern ingenuity has devised and the ex-tensive slips and docks in which the largest ships of the navy are built or repaired, ranges of hand-some residences for the port-ad-miral and other officials, and a Royal Naval College with ac-commodation for 70 students to whom a complete naval education is given. Outside the dock yard an area of 14 acres contains the gun-wharf where vast numbers of guns and other ordnance stores are kept and there is an armoury with 25 000 stand of small arms and on the mainland, opposite to Portsmouth and communicating with it by a floating bridge is the town of Gosport, to which the Royal Victualling Yard formerly one of the large establishments of Portsmouth has recently been removed. The distance between Gosport and Portsmouth, where the floating bridge piles, is nearly 3 m. wide, and forms the entrance to the harbour which is here de-fended by Southsea Castle on the E. and Monoton Fort on the W. and extends for several miles N. between the W. side of Portsea Island and the mainland, gradu-ally widening out, till near the N. shore it attains a width of about 3 m. It is almost of unrivalled excellence admitting first-rate men-of-war to enter and lie at anchor in perfect safety within its capacious basin, and has the additional ad-vantages of being in the immediate vicinity of the admirable roadstead of Spithead formed by the N. shore of the Isle of Wight and the S. shore of Hampshire.

Portsmouth derives almost all its importance from its naval establishments, and has no manufactures of any consequence except those immediately connected with them, and a few large breweries. Its trade, both coasting and foreign, is of considerable extent, the former consisting chiefly of coals from the Welsh and Newcastle coal-fields, cattle and sheep from the Isle of Wight and the west of England, and large quantities of corn and provisions from Ireland, and the latter of wine from different parts of the Continent, eggs from France and timber from the Baltic. In 1865 the registered shipping of the port amounted to 14,965 tons, the vessels entered in the coasting trade were 1113 (124,471 tons), and cleared 742 (32,355 tons); and in the colonial and foreign trades entered 277 (25 990 tons) and cleared 215 (12,505 tons). The market-days are Tuesday, Thursday and Saturday; and there is an annual fair, which lasts three days.

tions of Portsmouth, but having increased very rapidly in recent times, is more distinguished by modern improvements, and has several terraces, and one well-built open space called St. George's Square. Both towns are lighted with gas, well paved, and abundantly supplied with excellent water. The suburbs, consisting of Landport and Kingston adjacent to Portsmouth, and Southsea on the E. of Portsmouth, are mostly occupied by artisans connected with the dock-yard. Some of them, however, contain handsome villas and rows of well built houses, and Southsea in particular is not only much frequented as a fashionable watering-place, but has a fine esplanade fronting the beach, and adorned with statues of Nelson and Wellington.

The public buildings include numerous churches and chapels in connection with the Establishment and with Dissenters. Among the former the most conspicuous is the parish church of Portsmouth, a venerable and spacious cruciform structure in the early English style, with a lofty tower and spire, much used as a landmark. Among the latter the Independent chapel in King's Street deserves particular notice, both for its dimensions and the elegance of its structure. Other principal buildings and objects of interest are the Guildhall, a new and spacious building, which accommodates the county court, and

Portovenus was mentioned in the *Season Chronicle* as existing in 501. It appears to have been substituted for Forchester which had been selected by the Romans for a naval station, but became unfit for that purpose in consequence of the receding of the sea. During the reign of Alfred a fleet of nine ships fitted at the port againell debated the Danes, who had landed between the coast, and immediately before the town. The fleet was destroyed, but here to intercept the Normans armament. About 1566, Henry III. assembled a large army here, with a view to embark it for the invasion of France, and in 1577 a counter-attempt was made by the French, who, though numerically defeated with great loss, succeeded in burning the part of the town. This disaster appears to have shown the necessity of fortifying the place, and the works, originally commenced by Edward IV., have continued to be improved and extended during a series of successive reigns, till they have become all but impregnable to man, the sufficient garrison of 18,000 men would be required, but the small garrison consists of only three regiments of foot. The municipality, part, or, including the whole of the island of Portven, except a small portion belonging to the parish of Wynterton and the Salmons, is named Salmons.

governed by a Mayor 12 Aldermen,
and 42 councillors, and sends two members to the House of
Commons. The population of the various sections of the
burgh is as follows —

PORTSMOUTH, New Hampshire, U States: 1. A seaport to New Hampshire on a peninsula, a bank 1 1/2 miles, 8 m above its mouth in the Atlantic, and on the Portsmouth and Concord, and the Boston and Portland railways, 50 m N by E. Boston. Among the public edifices are five or six churches, all of respectable, and some of elegant appearance as academy an ethnium, occupying a handsome brick structure with a library of 7300 vols, and good collections to natural history, an almshouse two market-houses, and a state lunatic asylum. The district includes the towns are a machine-shop and a carriage-manufacture of considerable kind. There is a large steam-hactory for weaving the finer kinds of cotton fabric. The harbour, the only one immediately connected with the sea which the state possesses, is one of the safest and most commodious in the U States. It is formed in the mouth of the Piscataqua, which, opposite to the town, has a width of 3/4 m to 2 m, a depth sufficient for the largest vessels, and so strong a current, that it is seldom obstructed by ice, and is protected by four forts placed on surrounding islands which break the force of storms from the Atlantic. On an island called Concord or Bedloe Island, on the E side of the river, is a fort, and on the N side, on the Atlantic, is another, both of which are well armed. The town has a large harbour for the hull in naval collectors and marine enterprises and a large number of vessels owned by Portsmouth are engaged both in foreign trade and in the fisheries, though the annual trade of the port itself is limited. Pop. (1860) 9789. — 2. A to. and port of entry, Virginia, at the mouth of the Elizabeth, 88 m. E.S.E. Richmond; with a courthouse, jail, five churches, a bank, a theatre, a military academy and a harbour allowing ships of the heaviest tonnage to come to the wharf. At Georgetown, a suburb, is a large cotton-warehouse. U States navy-yard, dry-dock, and hospital ship. Pop. 6570. — 3. A village, Ohio, on the Ohio river, 10 m S.W. of Columbus, on the Ohio with a large steam-hactory, several churches, an academy, a bank, and extensive iron-manufacture. Pop. 4911.

PORTSOY, a burgh of barony, and seaport, Scotland.
-co. Banff, 5 m. E. Cullen. It has Established and Free
churches, Episcopalian and R. Catholic chapels a school, two
libraries, and a trade in grain and herring. Pop. 2042

PORTUGAL [anc *Lusitania*], a kingdom in the S.W. of Europe, forming the W part of the Iberian peninsula, lat. 38° 55' to 45° 7' N; lon. 6° 15' to 9° 50' W, bounded E. and N by Spain, and W and S by the Atlantic, greatest length N to S 845 m, greatest breadth, 140 m. It is divided into seven provinces, of which the names, area, population &c., are exhibited in the following table, along with the Portuguese colonial possessions in Africa and Asia—

Area and Population of Territory, including (a) Maritime Boundary

841 968 foreign possessions, 9.687 228: total 8 017 075

Coasta and Mountains.—Portugal is not separated from Spain, except on a small part of its frontier, by natural boundaries. Its shape is nearly that of a parallelogram. The coast-line, of great length in proportion to the extent of the whole surface, enters at the N in a S & W direction till it reaches Cabo da Roca, the most westerly point of the peninsula, where it turns to the N & E, and follows two lines by the intersection of the various mountain ranges, until it reaches the S. E. corner of the country, where it terminates in Cape Espichel again, surrounded in a S. S. W. direction till it reaches Cape St. Vincent, where it suddenly turns E. To the direction it returns to its termination at the mouth of the Guadiana. It is occasionally bold and rises to a great height, particularly at Cabo da Roca, where it presents a range of giddy cliffs but for the far greater part is low and marshy and not unfrequently lined by sands or rocks, and the sea against the coast is very rough and not protected towards the N. by any barrier.

The number, lakes and small, is counted at 31, but the only one of importance, other than their excellence or the trade carried on at them are those of Lisbon, Oporto, Setúbal, Faro, Figueira, Aveiro, and Viana. The interior is generally mountainous, a number of ranges stretching across the country, either in N. W., or S. S. W. directions, forming a succession of undulating waves, or a series of ridges, and the country is divided into a number of large water-sheds of various oblong, triangular, and other shapes, and enclose many wild and beautiful valleys. The loftiest range of all is the Serra d'Estrela, which may be considered as a continuation of the central chain which stretches across Spain between Old and New Castile, and between Leon and Extremadura. Near the town of Guarda it forms a fork, one limb of which proceeds N. E., and another S. E. while the main chain attains its culminating point at the Serra da Estrela, about 6,000 ft. above the sea level. The Serra da Estrela is the highest point of the N. W. direction to the termination in the lofty cliffs of Cabo da Roca. Nearly parallel to this chain, and at no great distance from it, are on the N the Serra de Alentejo, and on the S, the Serra Morenal. In the N. W., a branch of the Spanish Serra Mamed, taking the name of Peneda, enters Portugal and attains one of the loftiest heights of the kingdom in Monte Geraz. At the opposite extremity, the Serra Monchique, extending across the country as far as the town of Faro, attains its highest point at the Serra da Monchique, the height of 4050 ft. The rugged nature of the surface makes the plains both few in number and of limited extent, but many valleys equally numerous for

beauty and fertility coexist. The chief plains are those of Almeida and the Terra de Beagman, the former in the prov. of Beira-Alta, and the latter in that of Trás-os-Montes; the chief valleys, those of Chaves, Vila Rica, and Bachelo.

Geology.—The nucleus of the mountains is usually granite, overlain in the N. by micaceous schist and other primitive rocks. In the S., particularly in the Serra Mesibiqua, primeval limestone is very abundant. More recent limestones, and schistous sandstones, occupy large tracts in different parts of the country. Volcanic formations are very apparent in the Serra do Caldeira, forming a continuation of that of Mouchique. The mineralogical treasures seem more remarkable for their variety than for their value, though some are, and many more it is supposed, might be, worked to advantage. They include argentiferous lead, from copper, cobalt, bismuth, antimony, fine marble, slate, salt, saltpetre, lithographic stones, mill-stones, and porcelain clay. Some gold also is washed from the sands of the Douro, Mondego and other streams, and in several stores, particularly those of Estrella and Geraz, and many valuable pebbles and rock-crystals are found in a great number of places.

Rivers.—No rivers of importance take their rise in Portugal, and yet few countries in proportion to their extent, are better supplied with large and navigable streams. The Minho is the N. forming the boundary between Spain and Portugal in the lower part of its course, the Douro first skirting the E. frontier and then pursuing its course W. to its mouth at Oporto, and the Tagus all flow E. to W. the Guadiana, the only large river of Portugal, which flows from the general W. direction and flows mainly S. In addition to these rivers, for which Portugal is indebted to Spain she claims as peculiarly her own the Vouga, Mondego, and Sado. Numerous small lakes are scattered over the surface and embosomed in the mountains.

Climate.—The climate is greatly modified by the proximity of the sea and the height of the mountains, the former tempering the excessive heat of summer by refreshing breezes, and the latter making the winter more rigorous than usual in countries under the same latitude. In general, however, winter is both short and mild, and in some places never completely interrupts the course of vegetation. In consequence of this, many parts of Portugal enjoy the benefit of a double spring. Early in February vegetation is in full vigour; the plants shoot forth rapidly attain maturity and either wither away or of economical value, are gathered and harvested. During the month of July the heat is often extreme and, rain seldom falling, the whole country particularly at its lower levels and along the coast, assumes a very parched appearance. The drought generally continues throughout August and far into September but at last the dry which had previously been sunny, becomes overcast, and copious showers descend. The second spring now begins, and the fields again become covered with flowers and verdure. Winter begins at the end of November. In the mountainous districts, the latter months obtain a covering of snow and retain it for a greater or less period according to their altitude, but in all the country S. of the Douro, and at a moderate elevation, snow generally melts away within a month. Deluges of rain however continue to fall, and violent hurricanes and thunder-storms are not uncommon. At the season, too, shocks of earthquakes are sometimes felt, particularly in the vicinity of the metropolis, where the damage produced by it on one occasion was fearful almost beyond description.

Vegetation.—There are few countries with a more varied flora than Portugal. The number of species has been estimated to exceed 4000 and of these more than 3000 are phanerogams. Many of the mountains are clothed with fine forests, chiefly of hardwood, among which the oak, both the ordinary species, or *Quercus robur* and the cork tree, or *Quercus suber*, are conspicuous. In the central provinces, at a moderate elevation, the evergreen oaks are very prevalent. In the S., in the province of Algarve, both the date and the American palm are not uncommon. Fruits of excellent quality are common in every quarter, though it is only in the warmer and better-sheltered districts that the orange, lemon, and olive are cultivated with success on an extensive scale. The mulberry is admirably adapted to the climate, and, by means of it, a good deal of excellent silk is obtained; and a large extent of country is devoted to vine culture, caused

partly by the demand for Portuguese wines in Britain. Agriculture, properly so called, is at a very low ebb; and Portugal fails in ordinary years to raise cereals in sufficient quantity to meet its own consumption. Among domestic animals, the first place is due to the mule, of which very superior breeds have long been possessed, and are carefully preserved. Sheep, goats, and hogs are very numerous but little attention is paid to their improvement. Horses are few, and of inferior description. Game is not abundant, and the fisheries on the coast, though naturally productive, and at one time carried on to a great extent, have fallen off so much, that the greater quantity of the fish used is obtained by importation.

Manufactures Trade, Mines, &c.—Manufactures are very insignificant, and employ few large establishments; but almost every family is so far manufacturing, that it supplies itself more or less with many of the articles of primary necessity. Among the articles made to some extent for sale, may be mentioned woollen at Lisbon, woollen cloth and other woollen stuffs at Póvoa, Covilhã and Tondela, porcelain at Viseu, Alentejo, and ordinary earthenware, at Lisbon, Oporto, Coimbra, Beja, Estremoz, &c.; prints and lace at Lisbon and Oporto, cotton-twist at Thomar, silks at Bragança, Chaves, Oporto, &c.; copper and tin ware at Lisbon and other places, corals, ribbons, embroidery hats, confectionery, fine soap, jewellery, and the cutting of precious stones, glass, paper, wicker-work, and tobacco. Ship-building also is well understood, and a large number of vessels are constructed at Lisbon, Figueira, Oporto, and Villa do Real. Trade has suffered much by the loss of Brazil, but still continues to be of considerable importance. The principal exports are wine, brandy, vinegar, salt, oil, pork, fruit, particularly chestnuts, walnuts, almonds, olives, oranges, and lemons, silk, wool, cork, sumach, kermes, leeches, bones, glass, and porcelain; the principal imports are wheat, rye, barley, and maize, foreign timber salt provisions, particularly old colonial products, woollen cotton, linen, and silk tissues, iron, steel and various other metals, coal tar, and pitch dyer, and drugs. In 1851 the total amount of the exports was £1,922,291, and the imports, £2,431,397, being an increase, since 1845, on the total business done of £1,287,727. The length of sea-coast, with the harbours formed upon it, and the number of rivers, furnish great facilities for trade, but all the other means of internal communication are very defective. Accounts are kept in real, milreis or 1000 reis and conto de reis or 1000,000 reis. The value of the real is so minute, that the milreis is worth only 4s. 6d. The chief linear measures are the league or league of 18 to the degree, the milha, or common geographical mile, the braça, or fathom, = 7 f. 2 in., the vara, or yard, one-half of the former; and pa, or foot, = about 18 in. The weight is the libra, or lb., a little larger than the lb. around the arches = 33 lbs., and the quintal = 4 arrobas. For dry measure, the moyo = 24 bushels and for liquids the alimudo = 4½ gallons, are used.

Government, Army, Language, and People.—The Government is a hereditary constitutional monarchy, which in recent times has undergone so many changes, and is still so unsettled that it is difficult to describe it with accuracy. As at present existing, it contains a very large infusion of the democratic principle. The legislative power is vested jointly in the sovereign and an upper and a lower chamber; but both chambers are elective, meet and dissolve at regular periods, without the intervention of the crown, and when both agreed as to any particular measure or enactment, are not subject to its veto. Justice is administered (or rather said to be administered, for there are few countries in which its essential principles are more frequently overlooked) by a great number of inferior judges, whose decisions are subject to revision in 17 district courts. An appeal court, with extensive jurisdiction, sits at Oporto, and a supreme court, with jurisdiction over the whole kingdom, at Lisbon. The established religion is the E. Catholic, which is completely in the ascendant, Protestantism being almost unknown. It is governed by a patriarch at Lisbon; two archbishops at Braga and Evora, and 14 bishops. It performs its duties very imperfectly, providing efficiently neither for the morals nor the education of the people, the great body of whom are sunk in the most deplorable bigotry and ignorance, while among the more intelligent classes indolence is said to be very prevalent. The revenue, of which the far greater part is obtained by indirect taxation, is about

2196,000. The expenditure, which considerably exceeds it, was estimated in 1850 at 12,524,187 milreis, equal to about \$250,480. The debt amounts to 21,588,711. The army is estimated at 38,100 men. The navy consists of two ships of the line of 80 guns each, five 50-gun frigates, one frigate of 44 guns, eight corvettes of from 20 to 34 guns, eleven brigs from 10 to 20 guns, seven schooners and two steam-vessels. The language is a dialect of Latin, and bears a very close affinity to the Spanish. Its powers have not been much tested but at least in the *Lusad of Camoens* it has proved itself not unequal to epic poetry. The people are by no means prepossessing in external appearance. They are generally small in stature, indifferently shaped, and have irregular tawny features, the very opposite of beautiful. As a nation they are revengeful, sanguine, vain, and mean yet arrogant.

History.—Portugal forms the far larger part of the ancient province of Lusitania, and to have been so called from the *Laet* an indigenous tribe which dwelt between the Tagus and the Douro. Phœnician and Grecian colonies appear to have been planted on its coasts at a very early period, and the Carthaginians subsequently formed several establishments. About 200 A.C. the Romans became sole masters, and continued in possession for nearly six centuries during which they completely changed the habits of the natives, introduced their own language, and exerted a powerful influence on many of which still remain. In the 5th century the *Suavi*, *Vandals*, and *Visigoths* became possessors. In the beginning of the 8th century Portugal shared the fate of Spain, and was overrun by the Moors. The former inhabitants, descendants of the northern invaders, retired to the more inaccessible districts, and succeeded in maintaining their independence. After a long struggle, during which many battles were fought, and many illustrious deeds achieved they regained the ascendancy, and the Portuguese monarchy was formally established by the Cortes at Lamego in 1143. The first king was Don *Afonso Henriquez*, son of Henry of Burgundy who had married the daughter of the king of Leon and Castile, and obtained for her dowry as much of the peninsula south of Galicia as had already been wrested or he might still be able to wrest, from the Moors. The latter part of the dowry was not allowed to continue a mere nominal gift. In 1147 the Moors lost Lisbon and in 1249 their complete expulsion from the kingdom was effected by the taking of Faro. Under the successors of *Afonso*, Portugal advanced rapidly in prosperity though not without serious interruptions from maritime dissensions, pestilence and Spanish wars. In 1286 a new dynasty was established, on the demise of Ferdinand in the person of his natural son, who was proclaimed king by the Cortes, and ascended the throne under the name of John I. With him commenced the long series of maritime discoveries which ultimately placed Portugal at the head of a great colonial empire. He personally undertook an expedition to the coast of Africa, and made a conquest of Ceuta and part of the adjoining country. The spirit of enterprise thus excited became a kind of national passion, and the expeditions fitted out were crowned with brilliant success. In 1418, *Madeira* was discovered in 1482 the *Azores* and in 1486, after a succession of adventures had explored the greater part of the W coast of Africa, the Cape of Good Hope was beheld by *Bartolomeu Dias*. Vasco da Gama, following in the same tract, was still more successful. In 1497 he doubled the Cape, and continuing his course eastward, reached the shores of Malabar. A still more fortunate discovery was made in 1500 by *Pedro Alvarez Cabral*, or *Cabruera*, who while bent on a different course, was driven by a storm to the coast of Brazil and thus led to the formation of a settlement, which has since grown up to be an independent empire. After these successes, and the treasures obtained from them, had raised Portugal to the highest pitch of prosperity, a disputed succession brought it to the verge of ruin, and subjected it to the thralldom of a hated foreign yoke. King Sebastian having lost his life in 1578 in a disastrous expedition to Africa, was succeeded by his uncle *Henri*, who, being a cardinal had no lawful heirs. Among the competitors for the crown was *Philip II.* king of Spain, who, instead of waiting for the decision of the Cortes, took the matter into his own hands, invaded Portugal with a powerful army, and made himself its master. This union, which lasting for 60 years, was terminated in 1640, by a general rising, headed by the Duke of Braganza, who, on the expulsion

of the Spaniards, ascended the throne under the name of John IV. The most interesting events which have since occurred are the close alliance formed with Great Britain in 1703, and which, uninterrupted since, has powerfully influenced the fortunes of Portugal—the invasion of the French in 1807, and the removal of the court to Brazil—the expulsion of the French by the victories of Wellington—the revolution of 1830, which converted the government into a constitutional monarchy—and the subsequent erection of Brazil into an independent empire, thereby robbing Portugal of the richest jewel of her crown, and leaving her scarcely a shadow of her former colonial greatness.

PORTUGALEITE, a seaport in Spain, prov. Biscay, 11 m N N W Bilbao, near the mouth of the Bilbao; with a church, courthous, prison, a primary two schools and some manufactures of coarse linen. The discharging of the vessels here which cannot ascend the river forms the chief employment of the inhabitants. Pop. 1025

PORTUGUESA a river Yemaueia, rises in a branch of the Andes, 40 m. E Truxillo; flows S.E. and joins L. bank Apure, at San Fernando, total course, about 200 m. chief settlements the united Guannarito and Guannaparo, and the Cojuma.

PORTUMNA a market in Ireland co. and 87 m. S. S. Galway, near the Shannon, here crossed by a fine bridge. It has a handsome parish church, with a spire, an elegant R. Catholic chapel, an excellent courthous, a bridewell, a national school, a dispensary, barracks, the ruins of an old castle, manufactures of tobacco, and a considerable trade, conducted chiefly by steamers. Pop. 1633

PUSADAS, a tn. Spain, prov. and 20 m. S.W. Cordova, near the Guadalquivir. It has a church three hermitages and a townhouse. Many of the inhabitants are employed in agriculture, and as millers and there are eleven oil and eight flour mills, three brick and tile kilns, three lime-kilns, and a paper mill. Pop. 3735.

PUSCAATZ, a vil. and com. Austrian Italy, prov. Bergamo, 8 m. E. Zogno with a church, and three *crastores*. Pop. 1238

PUSCHEKHON a tn. Russia, gov. and 70 m. N N W Jaroslavl, on the Sogozha. It has a church manufactures of leather and a trade in corn and general ware. P. 1842 4551

PUSCHIAVO or **PUSCHLAV** a tn. and par. Switzerland, com. Gracioso in a valley of same name, 15 m. N E Soudir 5000 ft. above the sea. It has a Protestant, and a R. Catholic church; a manufactory, and a considerable transit trade. P. 3246.

POBEKA or **POZNA** a tn. Austria, Sclavonia, cap. of same name r. bank Orlyava, 53 m. S.E. E. Kufstein. It is the seat of the bishopric of Aggram, has a spacious and well-built square, adorned with an obelisk, three R. Catholic churches four chapels, a townhouse old castle, R. Catholic gymnasium high school and some trade in tobacco, silk and cattle. Pop. 8850.—The country, area, 738 geo. sq. m. is generally elevated and covered with lofty well-wooded hills from which numerous streams descend. Of these the principal are the Orlyava, Pakra, Biela, and Ilava, which all carry their waters to the Sava. The valleys are fertile and produce much corn hay, tobacco wine, and fruit particularly cultivated apples chestnuts also abound. There are several thermal springs. It is subdivided into the two districts of Upper and Lower Posen. Pop. 92 700

POSEN, or **POZNA** a prov. and duchy Prussia, not included in the Germanic Confederation, bounded, N. by West Prussia, E. Poland S. Silesia, and W. Brandenburg; area, 8564 geo. sq. m. The surface is generally very flat, and is extensively occupied by lakes and marshes. A small portion of it belongs to the basin of the Vistula, which merely touches it on the N.E., all the rest belongs to the basin of the Oder which receives its drainage through the Warta in the S. and centre, and the Netze in the N. The soil is for the most part light and sandy, and considerable tracts are covered with heath, but the far greater part of it either is, or is capable of being brought under the plough, and many parts of it are covered with a rich alluvium or vegetable mould, yielding all the ordinary species of grain, millet, flax, hemp, tobacco, and hops. The pastures are extensive, and feed numerous herds of cattle and swine. considerable attention is paid to the raising of poultry particularly geese, and also to the raising of bees. The minerals, set of much consequence, include bog iron-ore, salt-petre, ironstone, and building-stone. The manufactures

consist chiefly of woollen stuffs, linen, and leather. The trade in these articles is considerable; other exports are corn, cattle, tallow, leather, honey wax, goose-feathers, and hog-lard. The inhabitants include a considerable mixture of Germans and Jews, but the great majority are Poles. Posen being one of the acquisitions which Prussia made by the dismemberment of Poland. It is divided into the two governments of Posen and Bromberg. Posen occupying the N. half, and subdivided into 17 circles; pop. 900,430 and Bromberg occupying the S. half subdivided into 9 circles. Pop. 469,900.

POSEN is fortified to Prussia, esp. above prov. and gov.; on the Warta and Lowna, 149 m. E. by S Berlin. It lies so low as to be exposed to inundations, particularly from the Warta, which flows through it. It is defended by a castle situated on a height, and three forts. It built with considerable regularity, but is more remarkable for the number than for the splendour of its public edifices. Of these the most deserving of notice are the cathedral and the Stanislaus church, both

POSEN.—From the Cathedral Tower.

belonging to the R. Catholics, who have 22 other churches, two Protestant churches, Greek chapel, synagogue, old Jewish college, Episcopal palace, R. Catholic seminary, two gymnasia, normal and other schools, five monasteries, several hospitals and charitable institutions, a theatre, and some elegant mansions of the Polish nobility many of whom reside here. The manufactures consist chiefly of woollen and linen tissues, cloths, calicoe, stockings, sewing wax, carriages, leather and leather articles, lacquerware &c. There are also several breweries and distilleries. Posen is the seat of an archbishop, the residence of a provincial governor, and the seat of important courts of primary and appellate jurisdiction and numerous public offices. At an early period it was the capital of Poland, and was included in the Hanseatic League. Pop. (1816) 24,966, (1849) 44,963.

POTING or HIKU [Lattu, Burmese] a tn. Hungary co. and 12 m. N. E. Presburg, on a small tributary of the Danube with two churches, a synagogue, Capuchin monastery, castle, a sulphate factory, paper-mill, flour-mill, granite quarry and a considerable trade in wood, which is floated to the Danube. Pop. 4850.

POSLENGFORD, a par. England, Suffolk. 2488 ac. 1 op. 81.

POSSAGNO a vil. and par. kingd. of Italy gov. Venetia, prov. and N. W. Treviso, the birthplace of the sculptor Canova, after whose designs and chiefly at whose expense, a magnificent church was erected and nobly decorated. Near the church, on the site of the house where the sculptor was born, a building erected by him has been converted into a museum and contains models of all his works.

POSSSESSION, a bold shaly headland, S. America. N. shore Strait of Magellan, about 260 ft. above the sea; lat. 52 17 S.; lon. 66° 56' 30" W. A bar of the same name, with good anchorage, curves in to the N. round the cape, and extends as far as the entrance of the First Narrows

POSSSESSION ISLAND.—1 An isl. Antarctic Ocean; lat. 71° 66' S. lon. 71° 7' E. and so called from its having been the spot on which the discovery of taking possession of the newly-discovered continent, called Victoria Land, by Sir James Ross was performed. It is composed entirely of igneous rocks, and is accessible on its W. side only. It presents no appearance whatever of vegetation, but is covered with innumerable myriads of penguins.—2, An isl., S. Pacific, near the N. point of Australia, 30 m. N. Cape York; lat. 10° 48' S. lon. 143° 30' E. Here Captain Cook took possession of all the N. E. coast of Australia, in the name of George III. King of Britain calling it at the same time New South Wales.—3 One of the Great Islands (Islands) of the Pacific, or Phoenix, a market tn. Henry Harbour, Danube, co. and 94 m. N. N. W. Nova with a church, a handsome chateau, and a bathing-establishment, supplied by thermal springs in the neighbourhood, which are in considerable repute. Pop. 8660.

POSTIGIONE, a tn. Naples, prov. Principato Citra 8 L. Campania; with a castle, and two churches. Pop. 2580.

POSTLING, par. Eng. Kent, 1860 ac. Pop. 182.

POSTOINA a market tn. Austria, Illyria, near Adelsberg, on the Poik. It contains a church and the remains of an old castle. Pop. 1856.

POSTUPICE, or PORCUM, a tn. Bohemia, circle and S. S. W. Kaurzin with a church, school and manufactures of cotton, a cotton mill, printfield and bleachfield. 1 op. 1893.

POSTWICK par. Eng. Norfolk, 1436 ac. Pop. 275.

POTANULC, a tn. Szabo-Ménlap, dist. Szabolcs with three churches, a townhouse, and hospital, manufactures of woollen and linen cloth, porcelain, and leather; and a considerable trade in these articles. Pop. 8668.

POTENGI, or PORTUG, often improperly called Grande, a river, Brazil, rises in the Serra dos Calvris Novas, traverses prov. Rio Grande de Norte in a N. E. direction, passing the town of Natal and falls into the sea about 22 m. S. Cape St. Roque. Its channel has considerable depth in the rainy season, but in the highlands is obstructed by rocks and in the lowlands encumbered by sandbanks. Coasting vessels get up to near Natal and canoes to the source.

POTENZA, a tn. Naples, cap. prov. Basilicata, on a hill of the Apennines, 82 m. E. S. E. Naples. It is walled, and on the whole very indifferently built, but contains a number of handsome buildings, among others a fine cathedral in the Doric style, two collegiate churches, five monasteries, and a nursery. Potenza is the seat of a bishop, and possesses a civil and a criminal college, a seminary, and royal college. It has suffered much from earthquakes. Pop. (1850), 12,383.

POTTI, or PORTI, a fort, Russia, Trans-Caucasia, dist. Imerethi, near the mouth of the Rioni, in the Black Sea, 66 m. W. S. W. Kutais. It is in the form of an oblong, flanked by large towers, and though the harbour is both insecure and too shallow to admit large vessels, carries on a considerable trade, exporting wine, honey, wax, silk, skins, &c. Pop. 1000.

POTTI or POTTI, a tn. Brazil, prov. Piauí, 1 bank Pernambuco, 100 m. N. Orléans. It has a church, and a considerable trade in cotton, and other agricultural produce.

POTTI or GARATYRA, a river, Brazil, prov. Piauí, flows S. W. and N. W. and joins r. bank Pernambuco; total course, 200 m., navigable in the latter part.

POTOKA, a river, U. States, rises in the S. of Indiana, flows W. S. W. past Columbus and Princeton, and after a course of about 80 m., joins I. bank Wabash, a little below the confluence of the White River.

POTOMAC, a river, U. States Maryland and Virginia, rises by two branches in and near the Alleghany Mountains, and after a tortuous S. E. course of 250 m., through nearly the whole of which it flows the boundary between Maryland and Virginia, falls into Chesapeake Bay between Point Lookout and Smith's Point, by a mouth 10 m. wide. It is navigable for ships of the line to the navy-yard at Washington.

800 m. from the sea. Above this it is obstructed by numerous falls and rapids, which have been obviated by canals formed just there. The Ezequiel is its principal tributary, and the principal places on its banks (besides Washington) are George Town, Port-Roberto, Leonard Town, Harper's Ferry, and Alexandria.

POTOSI, a dep. Bolivia, containing the provinces of Potosi, Porco, Luya, Chayanta, and Obispo, nearly all lying between the sources of the Píscovayo, the table-land round Lake Titicaca, and the sea. It is for the most part a very rugged country intersected by numerous abrupt ridges which increase in height towards the Cerro de Potosi.

This mountain, so celebrated for its unequalled mineral wealth, has the form of a crumpled sugar-loaf, and rises to the height of 15,037 ft. It is often covered with snow, but does not retain it long. In the conical summit of the Cerro are more than 5000 Boon-minas or openings, made in search of silver-ore. The top of the mountain is completely honey-combed and exhausted, lower down springs grow numerous and the richest mines are now filled with water. At the present day, therefore, the manner is content to extract the silver from the inferior ores, formerly thrown out as waste, and richly strewn over the mountain. At a little distance S.W. rises the Cerro de Purco, resembling that of Potosi in its riches, but sooner filled with water. This elevated region is generally of volcanic origin, but the Cerro de Potosi is found to be composed of a quartzose rock, the position of which, in the midst of immense fields of trachyte, cannot be easily explained. The population of this department, which has undoubtedly decreased since the stoppage of the mines, may still probably be estimated at 180,000, of whom three-fourths are of the indigenous race.

POTOSI is a city Bolivia, cap above dep., at the foot of the Cerro; lat. 19° 36' S, lon 65° 24' W. and is one of the highest inhabited places in the world, the absolute elevation of the ground on which it stands varying from 18,402 to 18,694 feet and what renders this fact truly astonishing is that a city founded on the very borders as it were of the respirable atmosphere, should have contained at one time 150,000 inhabitants. Many of these were doubtless Mitayos, or Indians dragged thither by the system of forced labour called mita. But when it is considered that the mines of Potosi are supposed to have yielded, from 1545, when they were first discovered, to 1788, silver amounting in value to \$200,000,000, and that the fortunate proprietors lived in almost inaccessible luxury and splendour, it will be readily admitted that their expenditure alone might collect a multitude of people even in an ungenial situation. At Potosi the sun's rays are intolerably hot, while in the shade the cold is piercing. The country around is bleak and barren. The central square, encircled with the government-house, public offices, church, and convent, still remains, as well as the mint, a large and costly edifice, but the quarters once inhabited by the Indians are now in ruins, and the population, constantly decreasing, was reduced in 1855 to 13,800.

POTOSI (San Lúca) a dep. Mexican Confederation, bounded, N. by Nuevo Leon E. Tamaulipas S.E. Vera Cruz. S. Querétaro and Guanajuato, and E. Zacatecas, greatest length, N. to S., 208 m., greatest breadth, measured near the S. frontier, 185 m., but near the centre not more than 87 m. area, 29,468 sq. m. In the W. its mountains, and towards the E. becomes only broken and hilly, and in the S.E. spreads out into plains. The only important rivers are the Sanander which traverses the state centrally W. to E., and the Panuco or Tampico, which in the S. traverses it in the same direction and forms part of the boundary between it and the Tamaulipas. The climate among the mountains and on the table land is cold, but becomes warm on the lower flats of the E., and at certain seasons is unhealthy. The mountainous districts abound with excellent pastures, on which great numbers of cattle are reared; and the arable districts are remarkable for their fertility, yielding large crops of maize, wheat, and barley. Manufacturers have made some progress, and in choice woollen and cotton fabrics of excellent quality; glass, lace, pottery, and metallic wares. The trade in home pro-

Vol. II.

ducts is limited, but the position of the state makes it the natural entrepot between the coast and the interior for the imports of the U. States and Europe. Many valuable mines have been discovered, and are still worked to some extent. For administrative purposes the state is divided into four departments—San Luis, Rio Verde, Tancanhuita, and Yucundo, subdivided into 10 cantons and 59 municipalities. P. 868, 120.

POTOSI (San Lúca) a city, Mexico, cap. above dep. 92 m. S.E. Zacatecas 6350 ft. above sea-level, regularly laid out and well built, with spacious and well-kept streets. It has six handsome churches, three convents, and an hospital

SAN LUIS POTOSI.—From Hotel, View of the Mountain.

manufactures of clothing, shoes, hats, and different articles of iron are carried on to a considerable extent, and there is some trade with the neighboring departments in the above manufactures, and in foreign imports consisting of brandy wine, silks, woollens, cottons, and hardware. Pop. 40,000.

POTSAY or **POCMAR** a vil. Hungary Thaurer Thaurer co. Bihar, 19 m. S.E. Debreczin, with a Greek R. Catholic and a Protestant church. Pop. 1972.

POTSCHING, or **PRESTERN**, a market tn. Hungary co. Oedenburg, about 6 m. from Gross-Höflein. It has a church a chalybeate spring and a trade in wine. Pop. 1410.

POTSCHINKI a tn. Russia, gov. and 110 m. S.E. Nijni Novgorod, with three churches, manufactures of linen a trade in cattle and a large stand, which furnishes horses to the emperor's body-guard. Pop. 5000.

POTSDAM, a gov. Prussia, prov. Brandenburg, bounded N. by duchy Mecklenburg and prov. Steinh. E. by Steinh. S. by Frankfurt a. M. W. by Magdeburg and kingdom of Hanover area, 6120 geo. sq. m. It is flat, and the soil is for the most part light and sandy. Considerable tracts are covered with heath and moor. It is densely wooded, and well watered both by streams and lakes. Of the former the principal are the Oder, Lake Pulow, Spruce Nette, Pine, Havel, Elbe, Döme Jagelte, Elbe, and Silesia. Of the latter, the Schwielung, Selchow, Wolgast, Seldin, Müggel, Rangsdorf, Schanzke, Seldin, &c. Cultivation is conducted with considerable care and skill and great numbers of cattle, sheep, and swine are reared. Manufactures are prosecuted with great vigour and success, particularly in Berlin and in those places originally settled by the French emigrants who were driven from their homes by the revocation of the Edict of Nantes. For administrative purposes the government is divided into 16 circles. Pop. 1,226,864.

POTSDAM a tn. Prussia, cap. above gov., and the second royal residence of the kingdom, 17 m. S.W. Berlin, with which it is connected by railway on the Havel, which is here crossed by a bridge 600 ft. in length, and expands into a lake, with finely-wooded sloping banks. It consists of the Altstadt or Old Town of an island formed on the E. and S.W. by the Havel, and the N. and W. by a canal, east of the Kottbus or New Town, including Kiste, Friedrichsstadt, Dutch Berlin, and several suburbs. The different parts communicate with each other by bridges, and the whole forms one of the handsomest and most regularly built towns in Germany. It is entered by five land and four water

85

gates, and is laid out in straight, spacious, well-paved streets or large and elegant public squares. Of the latter, which are six in number the most deserving of notice are the Old Market, with an obelisk of white and red marble 54 ft. high, and busts of the great emperor and the first three kings of Prussia, the Wilhelmplatz (William's Place), and the Lustgarten, laid out in beautiful walks and adorned with pavilions, statues, and fountains. The principal edifices are the German church, containing the tombs of William I and Frederick the Great, the Nikolai church, the French church, built after the model of the Pantheon at Rome, the townhouse, with a couple, surrounded by a colonnade of Atlas in copper gilt, supporting the globe, the new Casino, the theatre, the great military hospital, the head guard-house, the post-office, and the royal palace. Educational and benevolent institutions are numerous. Among the former are the gymnasium, normal school, high school, architectural, horticultural, industrial, and numerous other schools and among the latter are orphan and widow hospitals, an infirmary and different asylums. The manufactures include all the ordinary issues of wool, linen, cotton, and silk, leather and langueran, porcelain, carriages, chemical products, wax-cloth, chocolate, vinegar, tobacco, &c. Potsdam is the seat of a bishop, has a provincial high and numerous other courts and offices and several literary and other societies. Immediately to the W outside the Brandenburg gate, commences the gardens of the palace of Sans Souci, laid out in stiff French formal taste, with allées, cut hedges, statues, basins, &c. The palace itself stands at the extremity of a broad avenue, crowning the summit of a succession of terraces, it has a fine colonnade but is a low building by no means handsome, and only deserving of notice from the interesting associations connected with it. Immediately behind the palace is the windmill well known as the subject of a lawsuit, in which Frederick the Great was worsted by the miller. In the same neighbourhood is the New Palace a vast brick building, containing 200 apartments, and exhibiting much gaudy magnificence, erected by Frederick at the end of the Seven Years war in a spirit of bravado to show that the republicans were not exhausted. The most distinguished natives of Potsdam is the celebrated traveller Alexander von Humboldt. Pop. (1861) 41,634.

POTTSBOYE, par Eng. Bedford 1880 ac. Pop. 262.
POTTENDORF a market to Lower Austria, on a canal which communicates with the Leitha, S. Vienna. It has a fine old castle, a Gothic chapel, a handsome church an hospital, and an extensive cotton-mill, which employs above 1600 hands. Pop. 2840.

POTTER, two pars. Eng. —1, (Hassworth) Lincoln 4150 ac. P. 456 —2, (Hagham) Norfolk 2557 ac. P. 477.

POTTER NEWTON, a vil. England co. York bor and about 2½ in N. Leeds, contiguous to Chapel-Allerton, with an Independent chapel, and chiefly inhabited by Leeds men. Chants. Pop. 1284.

POTTEKES (Tann) a det. England in h of Staffordshire, chiefly between Newcastle under Lyme on the S. and Norton-on-the-Moors on the N. area, about 16 sq m thickly studded with villages, and containing a population of 30,000. It is the central locality of the manufacture of china and earthenware, and owes its prosperity in this respect not to the possession of the finest clay, which it is obliged to import from the counties of Devon Dorset, and Cornwall, but partly to its inexhaustible supplies of cheap fuel and partly to the ingenuity of the late Josiah Wedgwood, whose improvements in almost all the varieties of ware, introduced originally at his extensive establishment of Etruria, ultimately enabled the whole district to take a lead in the manufacture, which, notwithstanding formidable competition in other quarters, it continues to maintain.

POTTERNE, par Eng. Wilt, 4566 ac. Pop. 1778.

POTTERFURY, par Eng. Northampton; 3630 ac. Pop. 1784.

POTTER, a vil. and com. Belgium, prov. Hainaut, 10 m. N. Tournay; bank Scheldt; with a church, two townhouses, and a communal school two breweries, a bleaching-green, and several corn and oil mills; some weaving, and a trade in fax cattle and grain. Pop. 2166.

POTTEME, a to Upper Bavaria, N N E. Augsburg; with a church, a castle, a potash-factory, several mills, and a trade in corn and fruit. Pop. 1500.

POTTON par Eng. Bedford, 1900 ac. Pop. 1923.
POTTSTOWN a to U States, Pennsylvania, 8 bank Schuylkill, at the junction of Manaskey Creek, and on the Schuylkill canal, and the Philadelphia and Reading railway, 25 m. N W Philadelphia. It has several handsome churches, an academy two large boarding-schools, a machine-shop, and a car-factory, a tannery, and several extensive flour and saw mills. Pop. about 3000.

POTTSVILLE a to U States, Pennsylvania, 85 m. N W Philadelphia, in the centre of the great anthracite coal-field, at the termination of the Schuylkill canal, and of the Philadelphia, Reading, and Pottsville railway. It occupies a very picturesque site immediately above the gorge where the Schuylkill breaks through Sharp Mountain, and though of very modern origin, having suddenly sprung into existence in consequence of the discovery of its valuable minerals, is now a compact, well-built, stirring place, with five or six churches an academy, a bank, a townhall, and other public buildings. The manufacturing establishments include blast-furnaces, forges, foundries, rolling mills, various steam-engines and machinery factories, and building yards, in which a great number of boats and barges for river-navigation are constructed. Pop. (1850) 7946.

POU-CROO, a to China, prov. Szechuan, on an affluent of the Hoang Ho, lat. 34 54 N. lon. 110° 15' E.

POUANCE a to France, dep. Maine-et-Loire, 16 m. W V. U. Segré with a blast-furnace, and some other iron-works. Pop. 1815.

POUCHING now a to China, prov. Fokien, in a beautiful valley, on a tributary of the Min, here crossed by a bridge. It is surrounded by walls and ramparts, apparently of a very ancient date, and by extensive suburbs, has much the appearance of a large market town, and carries on a considerable trade in tea. Pop. above 100,000.

POUCQUES, a vil. and com. Belgium, E. Flanders, on a stream of same name, 12 m. W Ghent. It has manufactures of linen, a brewery an oil and two flour mills, dye-works, and several brick-works. Pop. 1522.

POUGHKEEP, two pars. Eng. —1 Cornwall; 1947 ac. Pop. 404 —2, Devon; 1663 ac. Pop. 380.

POUGHKEEPSIE, a to U States, New York, beautifully situated bank, Hudson, on a height which stands 300 ft. above the river and just on the N and S. into two bold promontories, 65 m. N New York city. It was settled by the Dutch in 1736, and laid out with as much regularity as the nature of the ground would admit, and presents altogether a very attractive appearance. Among the public edifices are Dutch Reformed, Presbyterian, Episcopal, Congregational Baptist, Methodist, Universalist, Quaker and E. Catholic churches a courthouse, and other county-buildings, a collegiate school, occupying a handsome building, surrounded by a colonnade, and furnishing a superior education; a county academy also of superior description several female seminaries, and other schools, a lyceum, poorhouse, savings and other banks, &c. The large water-power furnished by the Fallkill has led to the establishment of several extensive works, including a silk and several flour mills, a factory for locomotive engines and railroad machinery, one of the largest breweries in the state, brass and iron foundries, iron works, &c. The other manufactures are carpets, guns, pipe, candles ploughs, carriages &c. A company, owning a number of vessels engaged in the whale-fishery, manufactures considerable quantities of sperm-oil. Its central position, nearly equidistant from New York and Albany, marked it out as a convenient spot for popular deliberations in the earlier history of the state. The most memorable of these is the Convention of 1788 at which the federal constitution was formally adopted. Pop. (1850) 13,944.

POUILLY-sur-Loire, a to France, dep. Nièvre, 8 m. S E. Cosne, r. bank Loire. It has a considerable trade in an excellent white wine grown in the district, and there are fine limestone quarries in the environs. Pop. 2018.

POUNIPET ISLAND, an isl. N. Pacific, one of the Carolines; lat. 6° 53' N. lon. 156° 24' E. (n.), about 50 m. in circumference, and rising 2558 ft. above sea-level. It is of basaltic formation, and is surrounded by a coral-reef, and fringed with mangroves. The whole island is thickly wooded, and produces many varieties of good timber fit for houses, ship-building, and other purposes, tree-ferns, bayonet, pas-

denus, and sematras. The soil is composed of a rich red and black loam, and with sufficient cultivation produces bread, rice, coconuts, turk, bananas, yams, sugar-cane, yams, sweet potatoes, pumpkin, tobacco in small quantities, and leuca. The unencultivated productions include wild ginger and wild oranges. There are no traces of any native quadruped, except rats. The flying-fox, or vampire bat, is very plentiful. Wild pigeons are numerous, and fish abound on the reefs. The inhabitants, who confine themselves wholly to the coast, are a small, but fierce and resolute race.

POULABOT, par Eng. Wilts; 1689 ac. Pop. 336.

POULTHEY, a township, U. States Vermont, on a stream of same name 50 m. S. S. W. Montpelier. It consists chiefly of the flourishing village of E. and W. Poultney which have Congregational Methodist, and Baptist churches, a female academy and other schools; a woolen factory three tanneries, and several saw-mills. Pop. (1860) 3329.

POULTON two par. Eng. —1. Kent; 590 ac. P. 28. —2. Gloucester; 1160 ac. Pop. 408.

POULTON LE FYLDE a market tn. and par. England, co. and 30 m. S. S. W. Lancaster on the Preston and Fleetwood railway. It is an antiquated place, has a modern parish church, with an aisle tower, a Wesleyan, and a R. Catholic chapel, a savings bank, and an endowed school. Area of par. 20 686 ac. Pop. 7980.

POUMARON a river British Guiana rises in the mountains of Ymatana, flows N. N. E. then N. W. and after a course of about 100 m. falls into the Atlantic, near Cape Nassau uniting with the Maroubo in forming a broad estuary.

POUNDSTOCK, par Eng. Cornwall 4614 ac. P. 651.

POUR, or Pua, two rivers, Siberia. The one rises in the N. of the Yakutsk, flows E. N. E. and after a course of about 180 m. joins I. bank Obnisk at the town of Malanovka. The other rises in gov. Tobolsk, about lat. 64° N. flows N. by E. and after a course of about 200 m. falls into the S. W. extremity of the Bay of Tazovsk.

POURGAÏN (St.), a tn. France, dep. Allier, 15 m. N. N. W. Gannat with an ancient church, an hospital, theatre, and a considerable trade in wine, corn, poultry, fish, and cattle. Pop. 3890.

POURO-ALCANA, a tn. Brazil prov. Minas-Geraes, on a branch 390 m. S. S. W. Ouro-Preto, with a church, and two primary schools. Within the district are thermal springs with a bathing-establishment, and several mines in active operation. Much excellent tobacco also is grown, and many cattle are reared for exportation. Pop. dist. 4000.

POUZAUGES, a tn. France, dep. Vendée, 28 m. N. N. W. Pouzauges-le-Comte, on the slope of a hill overlooking a rich and magnificent district. It has two churches, a Protestant and a R. Catholic, of the 15th century. Pop. 1181.

POVIGLIO (Latin, *Populium*), a tn. Italy and 18 m. E. N. E. Parma. It has an ancient castle, a courthouse, a primary school, and a trade in cattle, wine, and wool. P. 6334.

POVOA, several places, Portugal, particularly —1. (de Varna), Prov. Douro, near the sea-coast, about 18 m. from Braga. It is defended by a strong castle, and has a grammar school. The inhabitants are chiefly engaged in fishing. Pop. 3300. —2. (de St. Christoval), Prov. Douro, 9 m. N. W. Coimbra, near I. bank Pua. Pop. 510. —3. (de Meadela), A tn. and par., prov. Beira-Baixa, N. Portugal. Pop. 770. 4. (de Beira de Alentejo), a tn. and par., prov. Beira-Baixa, near Castello Branco. Pop. 600.

POVOLEDO, a tn. and par. Portugal, prov. Beira-Alta, com. and about 8 m. S. W. Viana. Pop. 1806.

POWDERHAM, par Eng. Devon, 1947 ac. P. 294.

POWELL'S GROUP, or **SCOTT'S QUADRANT** a group of islands, Antarctic Ocean, lat. 60° 37' E. lon. 44° 38' W. and E. of New Zealand. They present a very dreary and almost terrific appearance, being surrounded by immasurable icebergs and ice islands, apparently destitute of vegetation, and often crowned with jagged towering peaks. The loftiest of these becomes visible at the distance of 15 leagues.

POWERSCOURT, or **STAGHORN**, a vil. and par. Ireland, co. Wicklow, 3 m. W. S. W. Bray, with a handsome modern church, and several schools. Near it is the splendid seat of Viscount Powerscourt. Area, 18,338 ac. Pop. 2458.

POWERSTOCK, or **POWERSTOCK**, par Eng. Dorset, 4676 ac. Pop. 1064.

POWERSTOWN, par Eng. Kilmany-5498 ac. P. 1227.

POWICK, par Eng. Worcester; 5104 ac. Pop. 1834.

POXIM, a tn. Brazil, prov. and 46 m. E. Alagoas, I. bank Poim, here crossed by a bridge about 4 m. from the sea. It has a parish church, and a fertile district. The inhabitants, chiefly Indians in addition to raising the ordinary produce, make large quantities of the oil of manioc, of inferior quality. Pop. about 8000.

POXWELL, par Eng. Dorset; 887 ac. Pop. 69.

POYALS, a river and dist. Central America, Mosquito territory with a settlement on the river lat. 15° 10' N. lon. 85° 10' W. The river falls into the Caribbean Sea, between the Plantain river and Cape Camaron. A colony was established in the district in 1819 by a Scotch military officer of the name of Macgregor, which proved unsuccessful, and was finally abandoned in 1826.

POYALES ext. Hono, a tn. Spain, New Castle, prov. and W. N. W. Toledo poorly built, with a church, a town-house in a dilapidated state, a prison, primary school, and a trade in pimento, oil, and wine. Pop. 1032.

POYNING, par Eng. Sussex; 1643 ac. Pop. 261.

POYDORF or **POYDORF** a market tn. Lower Austria, 37 m. N. E. Korneuburg, with a church and saltpetre-works. Pop. 1500.

POZA, a vil. Spain, Old Castile, prov. and 96 m. N. E. Burgos. It has two primary schools, a townhouse, an ancient and dilapidated castle on a rock commanding the town, and a church. Near it are also beds of coal, quarries of granite, and salt-mines, agriculture, mule-driving, salt-pans, tanneries, and four-mills occupy the inhabitants. Pop. 2006.

POZALDEZ, a tn. Spain, Leon, prov. and 8 Valladolid with two churches, a large and substantial courthouse, prison, two primary schools, manufactures of linen, numerous distilleries and a trade in wine and brandy. Pop. 1726.

POZO-ALON, a vil. Spain, Andalusia, prov. and 34 m. E. Jaen. It has a townhouse, three fountains, three schools, a church, and a hermitage. Near it are forests of pine and oak, which supply a considerable quantity of timber for the arsenal at Cadix. There are four flour and three oil mills. Chocolate rice, dried cod, &c. are imported. Pop. 2189.

POZO-ESTREMO, a vil. Spain, Murcia, prov. and about 8 m. from Cartagena with a church, primary school, and some trade in agricultural produce. Pop. about 1900.

POZO-HONDO, a vil. Spain, Murcia, prov. and 18 m. S. Albacete, with a townhouse, two elementary schools, a beautiful public well, and a church. A flour-mill, and some manufactures of plain linens. Pop. 3620.

POZO-RUNO, a tn. Spain, New Castle, prov. and S. W. Guasca. It is regularly built, has a church, courthouse with prison primary school, and a trade in corn. Pop. 1068.

POZOBLANCO, a tn. Spain, Andalusia, prov. and 36 m. N. Cordova. It has regular and paved streets, an hospital for the sick, a founding hospital, a chair of Latin, several primary schools, a townhouse, a fish market, a church, and several hermitages. Bases were formerly made here in great quantity there being at one time 400 looms employed, now the number of pieces annually wrought does not exceed 6000. There are eight dye-works, a manufactory of earthenware and chocolate, several soap works, flour-mills, and oil mills but the greatest portion of the inhabitants are employed in agriculture, and as mechanics. Pop. 3748.

POZUELO, several places, Spain, particularly —1. A vil. Spain, Murcia, prov. and 15 m. S. W. Albacete, with a primary school, a church and a hermitage, three brick and tile works, a pottery, a dye-works, and five flour-mills. Pop. 2746. —2. A vil. com. Spain, Estremadura, prov. and 46 m. from Cacerea. It is very poorly built, has a church, courthouse, prison, and school manufactures of linen, several oil mills and a trade in oil. Pop. 1434. —3. (de Celorosa), A vil. New Castle Spain, prov. and 6 m. S. E. Ciudad Real, with a townhouse and prison, a fish-market, granary, hospital, three schools, a church and manufactory of lace, and oil-mills, and brandy-tillies. Pop. 2340. —4. (del Rey), A tn. New Castle, prov. and E. Madrid, poorly built, with a church, courthouse, prison, school, and a trade in corn and cattle. Pop. 1223.

POZZALLO, a small but thriving seaport, Sicily, prov. Syracuse, dist. and 9 m. S. E. Modica. Defended by a fort, with a church, a terminal palace, and a small pier, at which much of the produce of the surrounding country is exported.

POZZO DI Goro a *te. Shilly*, prov and 17 m. W S W
Moulton, on the Grengolia. A little E. are the ruins of Tyn
dars. Pop. 2000

POZZOLENGO a *vill* and com. Italy Lombardy prov
Brescia, 6 m. S. E. Lonato; with a parish church. Pop. 2041

POZZUOLO-FORMIGGIA, a *tn* and com. Sardinian States,
div and 80 m. N N W Genoa, once surrounded by walls,
and defended by a strong castle. The latter, an ancient
structure of a quadrangular form, surmounted by towers, still
exists in tolerable preservation. There are also two parish
churches and communal schools. Pop. 3721

POZZUOLI [anc. *Puteoli*] a *tn*, Naples, prov and 6 m.
W S W Naples slightly fortified. The only note-worthy
modern buildings are the cathedral, two parish churches, and
five convents but it is rich in ancient remains, the most re-
markable of which are those of the temple of Serapis, interest-
ing not only to the antiquary, but to the geologist, from the
unconformable proofs which they afford of changes in the level
of the coast the Colosseum, or amphitheatre, which had the
same dimensions as that of Nîmes, the labyrinth of Decula-
lus, the bridge of Calligula, &c. The coast forms a natural
harbour, which is completely sheltered and an active fishery
is carried on. Pozzuoli is the see of a bishop has a civil
court, and a seminary. Near it is the Grotto or cave of the
Sybil of Cumae and Mount Solifera, from which great quan-
tities of sulphur are obtained. A fine cement, formed of a
reddish volcanic gravel found in the neighbourhood, is well
known in commerce under the name of *Pozzuolana*. P. 8500.

POZZUOLI a *vill* and com. Italy Lombardy prov
Milan and 4 m. S. E. Cologno; with two churches, and a
charitable endowment. Pop. 1257

PHA a *vill* and com. Italy Piedmont div Genoa near
Voltri. It is a large, scattered place, and has several churches.
Pop. 3696.

PRACHATITZ, a *tn* Bohemia circle Pilsen, on the
Zwettbach 22 m. W N W Budweis. It is walled is an
ancient place, with narrow gloomy streets a fine church a
townhouse of a venerable and majestic appearance, a court
house, superior German school barracks, and hospital. The
staple manufacture is woody. Pop. 2591

PRACHIN a *circle*, Bohemia, bounded N by circles Pilsen
and Beraun, E. by the S. E. Budweis, S. W. Bavaria, and
W. Kladsko, area. 1244 geo. sq. m. cap. Pisek. In the S. and
S. W. it is covered with lofty hills, in which the Moldau, Wot-
awa and a great number of minor streams, take their rise
in other directions the surface is flatter and tolerably fertile
producing good crops of corn and flax. Wood is abundant, iron
is worked, and iron and glass are extensively manufactured.
Pop. 359 324.

PRADAI UNGA a *vill* and com. Italy Lombardy prov
and 6 m. S. E. Bergamo, 1 hour Serio, with a handsome
church, the works, limekilns, and numerous quarries for
making excellent whiststones. Pop. 1201

PRADANOS on ORENDA, a *vill* and com. Spain, Leon,
prov and about 45 m. from Palencia with a church court
house, and primary school manufactures of cloth, and a trade
in it and in agriculture produces. Pop. 1056.

PRADES a *tn*, France dep. Pyrénées-Orientales, r. bank
Tet, in a rich and verdant valley, 24 m. W. S. W. Perpignan.
It has a large and handsome church a court of first resort,
a communal college, a secondary ecclesiastical school and an
hospital, manufactures of woollen cloth, molasses, leather
and gray paper and a trade in corn, fruit wine, flax, hemp,
horses, mules, cattle, fine wool, &c. Pop. 2650

PRADO a small *tn* and seaport, Brazil, prov Bahia,
120 m. S. Porto-Seguro. It has a church a primary school
and a harbour defended at its entrance. The chief article of
trade is manioc flour. Pop. 6200

PRADO - I. A *tn* and par. Portugal, prov Minho, 8 m.
N W Braga, on the Cávado, in which there is here a con-
siderable salmon and trout fishery. The chief manufacture
is earthenware. - II. A *tn*, Brazil, prov Para, 55 m. W. Monte-
negro.

PRADO (El) a *vill*, Spain, New Castile, prov and 85 m.
S. W. Madrid, with a townhouse, a primary school, and a
church in the vicinity are gunneries and oil-mills. Pop. 2074.

PRADO del Mar a *vill*, Spain, Andalusia, prov and
54 m. from Cadix, with a church, and an elementary school.
The neighbourhood is very sterile. Pop. 2148.

PRADOLUENGO, a *tn* Spain, Old Castile, prov and
30 m. S. E. Burgos; with a church, court house, and primary
school, several mills, and a trade in wool and in cattle. P. 1390.

PRADOS, or SAN JULIAN SANTULLANO, a *vill* and par.
Spain, Asturias, prov and scarcely 1 m. N Oviedo; with a
very ancient church, a primary school, manufactures of
leather, and flour-mills. Pop. 1400.

PRAGA, a *tn*, Poland, r. bank Vistula, opposite to Warsaw
of which it may be considered a suburb, and with which it
communicates by a bridge of boats. The Russians took it by
assault in 1794, and made it almost a heap of ruins, but it has
since been rebuilt in an improved form, and now contains
many handsome streets and buildings.

PRAGUE [Bohemian, *Praka* German, *Prag*, Latin,
Praga, or *Moravia*], the cap. of Bohemia, near the centre of
the kingdom, on both sides of the Moldau, here crossed by
a remarkable stone bridge of 16 arches, and also by a chain
bridge, 158 m. N W Vienna, with which and with Dresden
it is connected by railway. Its site is a regular basin, cut in
two by the river, from the banks of which on either side the
houses rise in succession the upper tier, all they are termi-
nated and enclosed by hills of considerable height. When
viewed from the bridge, no city in Germany surpasses Prague
in the grandeur of its appearance. The town is inclosed

PRAGUE.—From Altmühl's *Monumenten* in *Praguen*.

by a wall and a fosse, and defended by extensive outworks,
but its natural position tends to be a strong fortress,
and the hills which command it on all sides seem to render
it incapable of offering a successful resistance. It consists
of four quarters, two on each side of the river: the *Altstadt*
and *Neustadt* on the right, and the *Kleinseite* and *Essen-
schin* on the left bank, and is entered by eight gates, of which
only two called the *Kaleischer* and *Bromischer* have any archi-
tectural merit. The *Wyschegrad*, immediately to the E. of
the town, and properly its citadel, is sometimes regarded as
a fifth quarter. The only suburb is that of *Karolinenthal*.
The *Altstadt*, which, as its name implies, is the oldest part
of the town, lies along the r. bank towards the N. Its streets
are narrow but along the principal seat of trade and business,
and the special locality of the Jews, contains some of the
best and most showy shops. The *Neustadt* follows the *Alt-
stadt* on the N. E., and S. E., but was originally separated
from it by walls and a ditch, which has been filled up.

Though newer than the other it is still very ancient, having been built by the emperor Charles IV in 1348. It is not the scene of so much activity as the Altstadt, but its streets are wider. On the opposite side the Klementine, occupying the bank and the N. portion, is the aristocratic quarter the chosen abode of the Bohemian nobles and the site of several remarkable palaces. The only other quarter, the Hradchin to the W and S. of the Klementine, occupies the ends of a steep hill is of less extent, and contains far fewer houses than any of the others, but perhaps surpasses them all in interest in consequence of the public edifices which it contains. When the whole quarters are taken together they form a town which, in respect of extent, magnificence, and historical interest, is not unworthy of being the capital of a great, though now to all intents a dependent kingdom. The principal public edifices are the old castle, or palace of the Bohemian kings, situated in the Hradchin, containing 400 apartments, one of them a Gothic hall, in which the Bohemian nobles swear allegiance to their sovereign after his coronation, and finely situated on a commanding height the cathedral also in the Hradchin a structure somewhat shapeless from having never been completed and much dilapidated by the injuries which it sustained from the halls of Frederick the Great during the Seven Years war but rich in Gothic ornament, and containing in its monuments, sculptures, and paintings, a perfect museum of curiosity; the Clementine, close to the bridge on the Altstadt, a huge pile which extends into several streets, containing a series of magnificent halls, in the richest style of Italian architecture, partly used as lecture-rooms in connection with the seminary under the superintendence of the archbishop, and partly occupied by a library of 180,000 vols. and 3700 M.S.s.; the Carolinum, or University of not much interest as a building, but remarkable as the first great public school established in Germany and through Huss, who was for some time its tutor the earliest cradle of the Reformation; the Theatinerkirche a Gothic church, historically interesting as the place where the Bohemian estates made George Prokober their king and to some still more interesting as containing the grave of the celebrated astronomer Tycho Brahe, who spent his last years and died at Prague; the palace of Wallenstein, built by that generalissimo of the Thirty Years war when he was first dismissed from the imperial service originally a structure of great magnificence but now much dilapidated. The Alta Rathaus (old townhall), an irregular Gothic edifice of the 15th century, with a dungeon beneath in which the emperor Wenzel IV was confined for 15 weeks; the old synagogue of the Jews, probably an ancient in date as the end of the 12th century; the military hospital which is a large and magnificent edifice, originally erected by the Jesuits as a college, the theatre the opera, considered one of the best in Germany, the national museum, museum of natural history picture gallery &c. The manufactures consist of gold and silver embroidery, silk, woollen cotton, and linen goods, buttons, hats, paper, soap, refined sugar, vinegar, liqueurs, refined milk, quills, sugar of lead, stearine and tallow candles, machines, musical and mathematical instruments, firearms, porcelain, fine and imitation jewellery. The trade is of great importance Prague owing to its central position its situation on the Moldau, which secures it a free communication with the Elbe, and to its facilities of transport by roads and railway, having the great entrepot for all the traffic of the kingdom. It has also several important fairs, particularly one for wool which lasts seven days, and during which a great amount of business is done; that of St. Winoclass, the old patron saint of Bohemia and that of St. John Nepomuk, who was thrown from the bridge of Prague by king Winoclass, for refusing to reveal what his queen had told him in confession though these two are rather religious festivals than fairs, and are more crowded with devotees than dealers.

Prague is one of the oldest towns in the kingdom, and is supposed to have been founded in the 8th century, but its history does not become important till the middle of the 14th century. At that time the university, the first which Germany possessed, was founded, and soon acquired such celebrity, that it was resorted to from all quarters of Europe, and is said to have had at one time the slightest possible number of 40,000 students. The spirit of free inquiry thus encouraged soon produced its fruits, and under the zealous teaching of Huss and Jerome, some of the grossest occupations of the

church of Rome were boldly attacked, and the germs of the Reformation rapidly developed. Fierce struggles ensued, and were carried on for centuries with varying success, but ultimately persecution did no work, and Protestantism, after having been repeatedly in the ascendant, and on the eve of victory has been all but extinguished. In more modern times Prague has been the theatre of important transactions, and great battles have been fought in its neighbourhood. It has also been repeatedly besieged, and in several of the public edifices still bear marks of its unsuccessful bombardment by the Prussians under Frederick the Great in 1758. Pop (1846) 115,436.

PRAHUTIA a tn. Turkey in Europe, Roumelia, 70 m. E.N.E. Salonica; with about 500 houses enclosed by a wall 15 ft. high. It has manufactures of leather and foundries, &c. which cannot be cut for the Ottoman fleet.

PRABHIL-PU-CHEN a tn U. States, Wisconsin, in a beautiful prairie, about 10 m. long by 3 m. wide, about 180 m. W Milwaukee. It has six churches, an academy, courthouses, and jail and rich copper-mines in which large masses of pure copper are found. Pop. 2498.

PRALBOINO, or **PRATO ALBOINO** a tn. and com. Italy, Lombardy prov. Brescia dist. and 7 m. S. Leno, 1 bank Mella with two churches and an extensive factory, in which all kinds of linen and cotton prints table-cloths, table-napkins, carpets &c. of excellent quality are made. P. 2487.

PRALOGNAN PALAY a vil. and com. France, dep. Savoy div. Tarantaise, 12 m. S.E. Moutiers. It is poorly built, but has some valuable minerals, and a trade in good cheese. Pop. 1043.

PRENN a tn. Russian Poland, 1 bank Niemen, 26 m. E. N. E. Marnast with a dilapidated castle, glass-works, and a paper-mill. Pop. 1214

PRENELAU, or **PRENELOW**, a tn. Prussia, gov. Posen, 57 m N by E. Berlin on the N. extremity of Lake Ucker, where the river Ucker issues from it. It is divided by the river into the old and the new town, and is defended by two forts, and entered by four gates. It is generally well built, and contains seven churches, one of them a handsome Gothic structure; a synagogue, gymnasium, poorhouse, and five hospitals. The manufactures consist of fine and coarse woolen cloth, linen and cotton goods, straw hats, leather,

and tobacco. There are also dye-works and distilleries. The trade is chiefly in tobacco, from Koro, in 1806, after the battle of Jena, a corps of the Prussian army, commanded by Prince Hohenzollern, was compelled to surrender. Pop. 12,751. —The climate, area, 1837 geo. sq. m., is of a light sandy flat, poorly wooded, and by no means fertile. Pop. 52,404.

PREPARIS ISLES, a cluster of small isles, between the Andaman and Cape Negrais, the S W extremity of Burmah lat. 14. 50' N. lon. 95° 20' E.

PREBU, or Pessow a th. Bohemia, cap. circle on the Betschka, 16 m. S.E. Olmitz with an old castle, two churches, a synagogue, hospital, and townhouse. It was the last town which remained in the hands of the Huns. Pop. 3,400. —The climate, area, 1837 geo. sq. m., is rather hilly, but generally fertile, producing good crops of corn and containing excellent pastures. The principal manufactures are woollens. Pop. 399,000.

PRESEA, a lake, Turkey in Europe, Albania, about 9 m. W. dist of Ochrida. It is 7 m. long by 8 m. broad, has several small isles, on one of which a monastery stands, and receives the Bema-su on the N., but has no visible outlet. A small town of same name stands on its W. shore.

PRESCOT, a market tn. and par England, co. Lancaster, 8 m. E. Liverpool. It is long and straggling, and stands principally upon a substratum of coal, several mines of which are connected to its very edge. It has an ancient church, place of worship for Primitive and Wesleyan Methodists, Independents, and Unitarians, a free school, and several other charities; a townhall, session-house, prison, gas-works, and a mechanics institute. Prescott has long been noted for the manufacture of watch-tails, as also parts of the watch called movement-work, together with the hands, and other more minute and delicate parts of the mechanism. The drawing of pin-work originated here and small files of superior excellence are made, and exported in large quantities. The other manufactures are coarse earthenware, which has been long extensively carried on, glass-bottles, nail and rope making. There are also a tannery, and several breweries. The Liverpool and Manchester railway passes about 1 m. S. from the town. Area of par 35,554 ac. Pop. of tn., 45,577.

PRESCOTT, a tn. Upper Canada, cap. co. Granville, on a rising ground above the St. Lawrence, across which, here about 1½ m. broad, there is a steam ferry to the U. States town Ogdensburg. It has Episcopal, Free, Methodist, and E. Catholic churches, a custom-house, and a considerable export of pot and pearl ash, but its trade has not increased much since the opening of the Rideau canal the traffic into a new channel. Pop. (1852), 3186.

PRESEGLIE a vil. and com. Italy Lombardy prov. and 18 m. N. E. Besenigo, with a church, manufacture of linen and hats, and a trade in wool and shurcol. Pop. 1254.

PRESHUTE par Eng. Wilts, 5301 ac. Pop. 1227.

PRESEDO, a tn. U. States, Texas, about 8 m. from L. bank Rio-Grande, opposite to the point where the Mexican bank is occupied by a town of same name, and about 20 m. from Fort Danube. It is the only place of any extent between that fort and Fort Mackenzie, and has a garrison of 200 men, and 3000 inhabitants.

PRESELE, a vil. and com. Belgium, prov. Hainaut, 36 m. E. Mons; with a paper and a flour mill and a trade in cattle and agricultural produce. It is supposed to be the locality where Julius Caesar, A.D. 57 defeated the Nervii, of whom 60,000 perished. Pop. 949.

PRESEBATH, a market in Bavaria, circle Oberpfalz, on a height, L. bank Maindonau, here crossed by a bridge 8 E.

Reibeth with three churches and a castle, manufacture of stone-ware, and several mills. Near it is the extensive forest of same name. Pop. 1566.

PRESEBURG Fiumenau or Pottery a tn. Hungary, cap. co. 55 m. E. Vama, L. bank Danube, which here divides into several branches, and is crossed by a flying bridge. The site of the town is remarkably fine, being in the form of a semicircle, bounded on the S. by the Danube from the banks of which it gradually ascends to the W. and N. towards ramifications of the Carpathians while an extensive plant, covered with gardens, meadows and cornfields, forms its boundary on the E. In the town itself there is not much to attract attention. The fortifications have been dismantled and the streets are for the most part narrow and steep and only partially paved. The houses, however, are solidly built of brick or stone, and of two or three stories, and some of them particularly in the suburbs, are very handsome. The edifices most deserving of notice, are the Royal Palace, on a height which overlooks the town a building

PRESEBURG — From Page's Travels in Hungary and Transylvania.

once of great magnificence, and still rich in historical recollections, but accidentally destroyed by fire in 1811 and not since repaired the Landhaus or hall of the Diet in which the chambers of the kingdom meet, a plain structure the cathedral a huge Gothic pile, with a lofty steeple, and less remarkable as a church than the place where the kings of Hungary are crowned the Capuchin, Franciscan, and Ursula monasteries, each with a handsome church attached the Jesuit church, townhouse, theatre, bishop's palace, orphan hospital and barracks. The manufactures consist of wool, silk, leather and tobacco. The trade, particularly transit, is extensive. Presburg is a place of very great antiquity and had acquired some importance even before the country was subjugated by the Romans. In other times it became the capital of Hungary, and retained the honour till the emperor Joseph II. transferred it to Buda. The peace by which Austria ceded Vukto to France, and the Tyrol to Bavaria, was concluded here in 1805. Pop. (1846), 40,200.

—The country area, 1818 geo. sq. m. is traversed by part of the Carpathian chain in the N. but in other directions is flat and tolerably fertile, though in several quarters covered with marshes. It is watered by the Danube March, Waag, and Dudvass and yields corn and hay; excellent wine is obtained, and abundance of wood. The inhabitants consist of Magyars, Germans, and Slovaks, and are almost all E. Catholics. Pop. 504,600.

PRESEBITE, Fiumenau, or Bessarabia a mining to Bohemia, circle and 10 m. W. N. W. Saz, with two churches, a castle, townhouse, and school manufactures of lace, fireworks, and knitting wires, and numerous mills. Pop. 5127.

PRESEBURY two pars. Eng. —1 Chester 68,125 ac. Pop. 59,265 —2, Gloucester, 2023 ac. Pop. 1514.

PRESTIGE a par. bor. market tn. and par, S. Wales, co. and 6 m. E. by N. Radnor r. bank Llan. It contains a very handsome church-tail, a church of great antiquity, and several dissenting chapels. It has no manufactures, but a considerable quantity of malt is made, and there is some trade in timber. Area of par., 7439 ac. Pop. 473.

PRESTON, or PAMSTON, a to. Bohemia, circle Kletau, 12 m. S. Pilsen; with a deanery church, town school, and several mills. Pop. 1850.

PRESTON, par Scot. See DUNKIN and FARRER.

PRESTON, a bor and market to England *co* Lancashire, 28 m. N.E. Liverpool, agreeably situated on a height above r bank Ribbles, near the head of its estuary and on the North Union, and several other branch railways. It consists of four principal and a great number of minor streets. The former though irregularly formed are spacious, and provided with alleys, passages, flagged and of one, called the Fishergate, nearly 1 m long contains many handsome buildings and well-furnished shops. The houses are almost all substantially built of brick and the whole town is well lighted with gas. The environs of the town exhibit much pleasing scenery are adorned with numerous handsome villas, and furnish several fine public walks. Of these the most frequented is Avenue walk, which has been well laid out, at the expense of the corporation.

The ecclesiastical edifices include 10 churches and 30 Dissenting chapels. Among the former, Christ Church is admired for the purity of its Norman and the parish church is now (1853) being rebuilt in the Decorated style of the 14th century, with a spire 195 ft high. Among the Dissenting chapels are five R. Catholic, one of which, not yet completed, prominent to be the most splendid place of worship in Preston, three Baptist two Independent, two Wesleyan Methodist and one each, Huntingdon Methodist, Primitive Methodist, Associate Methodist, Primitive Episcopalian, Swedenborgian, and Unitarian. The Moravian or Leather-Day Saints have also a place of meeting. The other more important buildings are the townhall a handsome brick edifice in the centre of the town, with a tower and dome, courthouse, well situated, and built in the Doric style the house of correction the custom-house, corn exchange, extensive barracks, workhouse, theatre, assembly rooms, two bridges, one of them a handsome structure of five arches and a magnificent railway viaduct, spanning the river.

The scholastic and literary establishments include a free grammar-school occupying a spacious stone structure, in the collegiate style the blue-coat, commercial or sundry, and various national and infant schools; the literary and philosophical institution, occupying an elegant building in the Tudor style, and provided with a library and museum the mechanics institute, or institution for the diffusion of knowledge, accommodated in a handsome Grecian edifice, and justly regarded as one of the greatest ornaments of the place, and various public libraries. The benevolent institutions include several benefit and provident institutions, a dispensary ladies charity, training and Samaritan societies, &c.

The original staple manufacture of the town was linen, which is still woven to some extent, but has been completely eclipsed by that of cotton, first introduced in 1777 now employs fifty-five mills for spinning and weaving, and mutually consumes about 150,000 bales of cotton. The other principal mills are six for worsted, two for flax, and a large steam saw-mill. There are also several machine-shops on an extensive scale, iron and brass foundries, breweries and melting establishments, ropes, hammers, &c. The horsepower employed in the various mills and workshops has been estimated, on a calculation including only engines above eight horse-power, at 2515. The trade is greatly facilitated

by the river, which, by means of dredging and many expensive improvements, has been rendered navigable, at ordinary springs, for vessels of 800 tons, to Preston quays, where extensive landing warehouses have been erected; and also by extensive railway communication, by which the town has been brought into immediate connection with the most important inland localities. The principal imports are corn from Ireland, iron from Scotland, and timber from the Baltic and America. In 1851 the vessels registered at the port were, 116 sailing vessels, carrying 6812 tons, and 6 steamers, carrying 541 tons, in 1856 the numbers were, 115 sailing vessels, of 6939 tons and 8 steamers of 437 tons. In the coasting trade 460 vessels (26,801 tons) entered, and 540 (30,265 tons) cleared in the foreign trade the number of vessels entered was 11 (1178 tons) and cleared 9 (1001 tons).

Preston dates its foundation from a very early period, and is said to have risen on the decay of Ribchester, the Roman Rigodunum, situated about 11 m. further up the river. Its name, originally Prieston-town, owed to the number of religious houses which it contained in history presents few events of interest. About 600 it was a Saxon settlement; in 1023 it was taken and burnt down by Robert Bruce; in 988 its first parish church was built; in the great civil war it was espoused the Royalist cause, and suffered severely during the contest, having been twice captured by the Parliamentarians, who, on the latter occasion were headed by Cromwell in person. In the rebellion of 1715 it was occupied by the Jacobite forces who erected barricades and made a brave resistance, but were ultimately obliged to surrender at discretion; in that of 1745 the Highlanders, headed by the Pretender, passed through Preston, both on their march to London and on their retreat. It became a burgh by prescription, but obtained the confirmation or extension of its privileges by no fewer than thirteen royal charters the first from Henry II. and the last from Charles II. It returns two members to Parliament, and is governed by a mayor 11 other aldermen and 36 councillors. The only native of the town deserving of special mention is Sir Richard Knevill, the inventor of the "suspension-jack." Pop. bor. (1831) 59,550.

PRESTON, a to. Upper Canada, *co* Waterloo with a Lutheran and a R. Catholic church, a flour-mill, distillery, pottery, masonry and three breweries inhabitants chiefly Germans. Pop. (1852) 1180.

PRESTON, a to. U. States, America, Connecticut, on the Thames and Quinnipiac 40 m. S.E. Hartford. It has a Congregational and a Baptist church, several saw and flour mills a cotton factory and a tannery. Pop. 1805.

PRESTONKIRK, par Scot. Haddington 7 m. by 4 m. Pop. 1894.

PRESTONPANS, a to. and par Scotland, *co* Haddington on the North British railway and near S. shore Forth of Forth, where it possesses a small harbor with about 10 ft. water at spring-tides. It has a plain, substantial parish and a Free church a parochial school, an hospital occupying a handsome building, and endowed by James Schaw for the maintenance and education of 24 poor boys manufacturers of pottery and earthenware, extensive stone-works and salt-works, a distillery a brewery which has long been celebrated for its ale, and valuable oyster fisheries. In the immediate vicinity was fought the famous battle, in which the Highlanders, headed by the Pretender, signally defeated the royal troops commanded by Sir John Cope; when Colonel Gardiner lost his life. Area of par, 2½ m. by 1 m. Pop. 2128.

PRESTWICH-CUM-OLDHAM, See OLDHAM.

PRESTWICK or PAMSTWICK, a bor of burony, Scotland, *co* N.E. Ayr. It is a very ancient but decayed place, with its cross, council-house, and prison and an ancient church, now dilapidated, which serves as a landmark for vessels navigating the Forth of Clyde. Pop. 1890.

PRESTWOLD, par Eng. Lincolnshire; 4730 ac. P. 965.

PRETO, three rivers, Brazil.—1, River in N slope of a branch of the Cordillera of Matto Grosso, prov. Minas-Geraes, flows E., and unites with the Barro in forming the Parahibuna, total course, 150 m.—2, River in the S.E. of prov. Goias, flows W.N.W., and joins r bank Maranhão; total course, 150 m.—3, River in the Serra-de-Figueras, prov. Bahia, flows S.E. 45 m., and joins 1 bank Grande, 150 m. above its junction with the Rio-Pranchado; total course, 100 m.

tion of its affairs are as an independent government. It is administered by an executive, usually composed of nine members, wholly nominated by the Crown. The legislature, composed of six members, is also nominated by the Crown but the Assembly, consisting of 24 members, is chosen by the people. Justice is administered according to the law of England. The number of places of worship is about 67, and the different religious denominations, classified according to their numbers, are R. Catholics, Scotch Presbyterians, Protestant Episcopalians, Methodists, and Baptists. The number of district schools is 232, and in the support of these the colonial government annually expends about £10,000 for superior education there is an academy at Charlotte Town the capital. Who discovered Prince Edward Island is not accurately known, but Cabot is supposed to have seen it immediately after he had discovered Newfoundland. Champlain gives it the name of St John, by which it continued long to be designated and accurately describes both its situation and extent. It was afterwards included by the French in their vast and undivided territory of New France, and in 1664 was granted as a feudal fief to the Duke of Anjou, a French naval officer. Little progress was made in settling the island till after the peace of Utrecht in 1715 when its fertility allured great numbers of Acadians from Cape Breton. It was taken by the British in 1745 restored by the peace of Aix la Chapelle, retaken and finally annexed to Britain in 1758. Pop. (1848) 52,678.

PRINCE LEOPOLD ISLAND, an isl. Arctic Ocean. W. extremity of Barrow's Strait lat. 74° N. lon. 90° W. **PRINCE OF WALES IS.**, a remarkable promontory from the most W. point of N. America, in Behring's Sea lat. 59° 30' N. lon. 167° 50' W. It terminates in a peaked mountain which presents a very bold face to the sea. A very dangerous shoal stretches N. E. from the cape.

PRINCE OF WALES ISLANDS, a cluster of islands Torres Strait lat. 10° 30' S.; much intersected by straits and openings.

PRINCE REGENT BAY—1. An inlet, W coast, Greenland lat. 76° N. lon. 66° W.—2. (Inlet) British N. America lat. 72° to 74° N. lon. 130° to 160° W. leading from Barrow's Strait into Baffin's Gulf. A river, Australia, which enters the Indian Ocean lat. 15° 17' S. lon. 124° 50' E.

PRINCE WILLIAM HENRI or **LOWLANDS ISLAND** an isl. N. Pacific, Low Archipelago lat. (S. E. point) 18° 43' S. lon. 141° 43' W. (S.)

PRINCE WILLIAMS SOUND, an extensive inlet N. Pacific Ocean, Russian America formed by Point Hey and Cape Winked, which are 43 m. apart. It is fronted by a very extensive sand-flat, and diverges into many long arms, generally obstructed by rocks and shoals. The outward coast is formed by Hutzendok and Moutague Island.

PRINCE'S ISLAND—1. An isl. E. pt of India, off W. coast, Africa, 140 m. S. S. W. Fernando Po; lat. (Fort Santa Anna, Antonio Bay) 1° 39' 30" N. lon. 7° 28' 30" E. (S. E.) greatest length N. to S. 9 m. breadth, nearly 5 m. It is of volcanic origin, and though all more or less mountainous, consists of two distinct portions—one covered chiefly with rugged and often elevated summits, one of which appears to exceed 4000 ft., and allowed to remain almost in a state of nature and the other presenting lower heights and acclivities, intersected by deep valleys and ravines, and under good cultivation, having numerous excellent plantations of coffee, coconuts, &c. It has several good harbours, is much visited by vessels for refreshment, and carries on a considerable trade. It belongs to the Portuguese.—2. An isl. Indian Archipelago, at the S. entrance to the Straits of Bunde. It is small and low at its E. end are two eminences, and at its S. W. end it is covered with trees, and contains the town of Pasaendang.

PRINCE'S ISLANDS, a group of nine isls. Sea of Marmora, between the Gulf of Nicomedia, and the entrance to the Channel of Constantinople, and 10 m. to 12 m. S. E. the city of Constantinople. The largest island, Prinkipo, or Prinsipi, is low and narrow. These islands are said to possess beautiful and rich scenery. Lord Byron has described them as an earthly paradisa. Many of the Franks who reside in Constantinople have their country residences here.

PRINCE'S HARBOR, GU, par. Eng. Banks, 4710 sq. Pop. 2417.

PRINCESS CHARLOTTE'S BAY, on the N. E. coast of Australia, lat. 14° 33' S. lon. 144° E. It is 21 m. broad, by about 22 m. deep, and contains a great number of small islands, rocks, and shoals.

PRINCESS ROYAL ISLANDS, a group, W. coast, British N. America, forming part of the immense archipelago which forms the American continent, and has Charlotte's Island on the W.; lat. 63° to 64° N.

PRINCENHAGEN (S) or **HAARLEM**, a vil. Holland, prov. N. Brabant, 1 m. S. W. Brda. with a large market-place, a townhouse, church, and school. Pop. (agricultural), 1850.

PRINLETON, a tn. U. States, New Jersey, agreeably situated 11 m. N. E. Trenton. It also contains the college of New Jersey, (in 1850 attended by 248 students) with 12 professors, and a library of 16,000 vols. the theological seminary of the Presbyterian church, founded in 1812 with five professors, and a library of 11,000 vols. two Presbyterian, an Episcopalian and an African church, a bank academies, and schools, and several mechanic shops. Pop. 5021.

PRINCIPATO-CRISTO, a prov. Naples, bounded N. by Trinitapoli-Ultra, N. W. by Salerno and Naples, W. and S. by the Mediterranean and I. by Basilicata, greatest length, N. W. to S. E. 84 m. greatest breadth, 43 m. area, 1710 sq. m. The coast-line is irregular and juts out into several bold promontories. Nearly a half of it consists of the large curve which forms the Bay of Salerno. The interior is much broken by ramifications of the Apennines but a considerable part of the shore along the Gulf of Salerno is flat, and an extensive valley called the Val di Diano, stretches S. E. to N. N. W., almost parallel with the S. frontier. The principal rivers are the Sele, with its tributaries Negro and Calore. The climate is temperate, the valley of Salerno, enjoying almost a perpetual spring, and the soil generally of great fertility, so that the whole province may be regarded as one of the most highly favoured of the kingdom. The mountains are covered with wood particularly chestnuts, the produce of which is not the least important source of income. Great numbers of swine are fed and on the coast, the fishing of anchovies and tunny is very productive. The chief manufactures worked are marble and gypsum but the province maintains two manufactures, and has three copper-foundries. The manufactures include paper, woolen and linen goods, and the trade is chiefly in timber, rice, chestnuts, dried fruits especially figs, and apricots. The province is divided into four *distretti*—Salerno, the capital, Sala, Campagna, and II. Valle. Pop. 558,809.

PRINCIPATO-ULTRA, a prov. Naples, bounded N. by prov. Salerno, W. by Salerno, S. W. and S. by Principato-Cristo, S. E. by Basilicata, and S. by Campania. Part of the space thus bounded is occupied by the delegation of Benevento, belonging to the Papal States, greatest length, E. to W. 47 m. greatest breadth, 46 m., area, 1064 sq. m. It is mountainous, being covered by the Apennines and is watered by the Carapelle, Calore, Ufite, and Tammaro. The climate is mild and salubrious and the soil, particularly in the deep valleys, fertile and well cultivated. The principal products are maize, olives, chestnuts, and wine, and in these a considerable trade is carried on. The province is divided into three *distretti*—Avellino, the capital, Arzano, and San Angelo de Lombardi. Pop. (1850) 383,414.

PRINCIPAL-INKHRA, a tn. Brazil, prov. Piaui, about 18 m. above the source of the Poti, 106 m. N. E. Oeiras. It has a parish church inhabited by agriculturists or in raising cattle. Pop. of dist., 2000.

PRINCIPOM, PAPA ADAMI, or PAPA DORRHA, a tn. Turkey, on an isl. of same name, Sea of Marmora, 12 m. S. E. Constantinople, inhabitants chiefly Greeks, either sea-faring or agricultural. Pop. 3000.

PRIOCCA a vil. and com. Italy Piedmont, div. Cont. prov. Alba, 24 m. S. E. Turin with a church an ancient castle, several oratories and a school. Pop. 1833.

PRIOIA a vil. and com. Italy Piedmont, div. Cont. prov. and 16 m. S. E. Mondovì, on the Tanaro, once defended by a strong castle, of which the ruins still appear. It has two churches. Pop. 1515.

PRIOR, par. Irel. Kerry; 11,786 ac. Pop. 3923.

PRIORS DEAN, par. Eng. Hants; 1616 ac. P. 181.

PRIORS, two par. Eng. Warwick.—1. (Eardisley), 1000 ac. Pop. 303.—2. (Marston) 3630 ac. Pop. 729.

PROSENYTZ, or **Prosenyow**, a tn. Austria, Moravia, circle and 11 m. S.W. Olmitz, on the Ruma. It has three churches, an hospital and monastery of the brothers of charity extensive manufactures of wools and linen cloth, cassimere and cotton goods, in all of which it carries on an important trade, numerous distilleries of brandy and rum, and one of the largest cork-markets in Moravia. Pop. 5000.

PROTECTOR, an island, V. States, Oregon, lat. 46° 7' 10" N. lon. 122° 76' W. It received its name from Vancouver in consequence of standing in the mouth of Port Discovery, an excellent harbour about 7½ m. long by 1½ m. broad which it covers completely from the N. The shores of its E. side, which is about 2 m. long, form with the mainland a channel of about 2 m. wide, leading into the port, and at the same time forming a most excellent roadstead.

PROTWANOW, a vil. Austria, Moravia, 22 m. N. Brunn, with a church, glass-houses, and two mills. P. 1180.

PRUTY, a river Russia, flows in N. gov. Smolensk, enters gov. Kaluga, flows S.E. past Korovnik, and joins bank (the 9 m. above Serpukov) after a course of about 100 m.

PROVAGLIO, a vil and com. Italy, Lombardy, prov. Brescia, about 2 m. S. Inco, with two churches, and a trade in corn, wine, and silk. Pop. 1217.

PROVEN, a vil and com. Belgium, prov. W. Flanders, 23 m. S.W. Bruges, with manufactures of tobacco, several mills, two breweries, and a trade in corn and cattle. P. 1684.

PROVENCE (J. A.) [Latin, *Provincia Gallia Narbonensis*], a former Roman province was divided into Upper Provence capital Aix and Lower Provence capital Nîmes. It now forms deux Bouches-du-Rhône, Var, Hautes-Alpes, and part of dep. Vaucluse.

PROVENCIO, a vil. Spain, New Castile, prov. and 50 m. S.W. Curres, with a church, courthouse prison, school several flour-mills, and a trade in corn. Pop. 1332.

PROVENCIAL (SAS MARTIN), a vil. Spain, Catalonia, prov. and 4 m. from Barcelona, with a school, church, courthouse, several cottons manufactures of chintzes, a tannery for sea-solvent, Morocco chemicals, potato starch, cordage and three works for dressing cotton thread &c. Pop. 2441.

PROVENCIE, a vil. in and par. Portugal, prov. Trás-os-Montes 10 m. from Vila Real. Pop. 900.

PROVIDENCE, a city and port U. States, Rhode Island, of which it is the largest place and with Newport and South Kingstown the joint capital, on both sides the Providence, or Seekonk, here crossed by two bridges, at the head of Narragansett Bay 40 m. S.W. Boston, with which and with New York city it is connected by railway. It contains a great number of the buildings, particularly in the E. division but in on the whole irregularly and indifferently built, consisting for the most part of wooden houses. One of the busiest, and at the same time most attractive parts of the town, is at the common terminus of the railway stations the buildings of which, not excited by any in the U. States are ranged along three sides of a beautiful sheet of water of an elliptic form, about 1 m. in circuit, communicating with the bay, and having its banks laid out so as to form an excellent promenade.

The public edifices include 80 churches of different denominations, many of them very humble pretensions, and altogether devoid of architectural merit, but several also of a superior description, among which the First Baptist, which though only of wood, displays much taste the First Congregational, built of granite; Grace Church, St. John's, Westminster Congregational, Benedict Congregational St. Peter and St. Patrick's, are all more or less costly and splendid their buildings and objects deserving of notice, are the State House, built of brick, Dexter Asylum or poorhouse, a plain and substantial brick building, situated within an enclosure of 40 acres Brown University, possessed of a library of 23,000 vols a valuable chemical and philosophical apparatus, and other collections, superintended by a president and six professors and attended by an average of 120 students, Butler Hospital for the insane, a splendid and richly-endowed establishment the Athenæum, occupying an elegant and spacious stone structure, and possessed of a library of 12,000 vols., New England Yearly Meeting Boarding-school a richly endowed and well-managed institution, under the superintendence of the Friends; the Old Market-house, a large and well-proportioned brick building, partly occupied as municipal offices the Reform School, recently established for the care

and reformation of juvenile offenders; What Cheer, the quaint name given to a range of buildings, said to have as handsome a frontstone front as any in New England; the Arcade, which, though intended only for mercantile purposes, is one of the most beautiful buildings in the country, and has its front ornamented with massive granite columns, each of a single block 22 ft. high, and set in groups, and a new and elegant theatre. In addition to the educational establishments already mentioned, are 46 public and 50 Sunday schools, the former attended by about 6000 scholars, and maintained at an annual expense of about £8000.

Manufactures have made great progress and employ not only the large amount of water-power furnished by the Pawtucket falls, but about 50 steam-engines. The principal public works are flour and saw mills for sawing and polish the marble cotton and woolen factories, foundries machine-shops printing, bleaching, tanning and dye-works, &c. Other articles manufactured are leather, furniture, carriages, screws, nails, India rubber shoes, jewellery &c. It has foreign trade and a safe and commodious harbour though it is somewhat difficult of access. The coasting trade was first employed in the cod and other fisheries. Providence was first settled in 1638 and incorporated in 1649. During its early existence it suffered much from the ravages of the Indians, in what is called King Philip's War. In 1801 a conflagration laid a large part of it in ashes, and in 1815 a severe earthquake raised the tide 12 ft. above its usual level, by which 300 buildings were thrown down and property nearly to the amount of £300,000 was destroyed. Pop. (1853) about 46,000.

PROVIDENCE, a river, U. States, Rhode Island, formed by the union of two streams N.W. the town of Providence, flows through it, receiving the Pawtucket on the left, and the Pawtuxet on the right and falls into the Bay of Narragansett.

PROVIDENCE, an isl. Indian Ocean, 240 m. N.N.E. Madagascar lat. 9° 10' S. lon. 51° 5' E. about 2 m. long N. to S., with a low surface, covered on its N. part with coconut trees. Turf and land-crabs of large size abound.

PROVIDENCE (WV) See S.W. PENNSYLVANIA.

PROVIDENCE (Ch. Old) See OLD PROVIDENCE.

PROVINCE WELLESLEY, a strip of coast-land, on W. side, Malay peninsula, belonging to the Straits settlements of Great Britain and immediately dependent on the neighbouring island of Penang from which it is separated by a strait 3 m. in breadth, bounded, N and E. by Kedah or Quana, and S. the Karan river, which separates it from the Malay kingdom of Perak about 35 m. long by 4 m. broad, area, about 140 sq. m. The surface is gently undulating, sloping seaward and partly covered with jungle and forest trees. Like Penang it is generally of granite formation the detritus of which is decomposed on the slopes into a rich white clay containing iron. A few sandy strips also occur especially well calculated for coconut cultivation. On and near the coast are many tracts of the richest alluvial soil in some places covered with mangroves, in others laid out in rice-plantations. Good roads made by the British traverse the country, which is intersected also by three pretty large rivers—the Muda, Perak and Jempang, besides numerous creeks. The climate is hot (mean 80° F.) but on the whole not unhealthy and more mild than in Penang, though there are occasional and pretty long droughts. The elephants, rhinoceros, tiger, and numerous varieties of snakes, porcupines and otherwise, are common. Its vegetable and agricultural products are very similar to those of Penang. Its principal town is Bakkah or Bahah on the coast, near the N. frontier pop. with the adjacent Malay village of Pinang, about 1700. This province is governed by a resident councillor subordinate to the British governor at Penang, the jurisdiction over offences committed being in the hands of the recorder at this settlement. It was first settled by the English in 1800. Its population in 1884 amounted to 14,500, of whom five-sixths were Chinese and Hindoo, constituting the labouring class. According to the last official census, June 1 1881, the inhabitants consisted of Malays, 77,603 males, 35,408 females Chinese, 7998 males, 1183 females; Chulias (Malabar) 1568 males, 300 females, and miscellaneous, including British settlers, 558 males, 559 females. Total pop. 144,861.—[Singapore Free Press, July 1, 1881; Jour. Ind. Archipel; Howe's Description of Penang and Prov. Wellesley &c.]

PROVINCETOWN, a seaport in U States, Mass. situated near N W extremity of Cape Cod, in the bay of that name, 85 m. E S.E. Boston. It has Congregational Methodist, and Universalist churches, two academies, and several other schools, extensive salt-works, and an excellent harbor spacious, deep and of easy access, yet completely land locked. Many of the inhabitants are employed in the cod and mackerel fisheries. The harbor derives some interest from being the first port made by the *Mayflower* with the Pilgrim Fathers on board. Pop. (1850), 3157.

PROVINS (Latin, *Amatiorum*), a tin France, dep Seine-et-Marne, 30 m. E Melun. It is surrounded by walls, flanked with towers and generally well built. The principal edifices are a large tower commonly called Caesar's tower, the church of St. Quirinus, a large and handsome structure, with a dome surmounted by a belfry; the church of St. Ayrol, the church of the Holy Cross, the church of Refuge, with curious carvings the general hospital, formerly a convent of Cordeliers, the cellars of the Hotel Dieu and Grange aux Dimes, and the ruins of the college church. The manufactures consist of linsey-woolsey earthenware and of conserves of roses and there is a considerable trade in corn and flour for the Paris market, wool leather and roses called *provins*, which have been cultivated from time immemorial within the district. Province possesses a large and handsome structure, a commercial college, and an agricultural society. Near it are strong chalky saline springs. Pop. 5738.

PRUDENCE an island U States, Rhode Island, forming the largest of a group of islands belonging to the town of Little Narragansett. It is about 6 m long by 2 m. in average breadth, and is beautiful, fertile, and well cultivated.

PRUM, or a Rhineland Prussia, gov and 88 m. N N W Treves, on a small stream of same name it has two churches manufactures of woollen cloth cambrics, and linestones quarries Pop 3322

PRUNA, a tin Spain Andalusia, prov and 40 m. S.E. Seville. It built, but with rather broad and paved streets, two squares a granary prison, two schools, a church, and three oil-mills. Pop. 8276.

PRUNARIEDA, or *Beutenau*, a vil Bohemia, circle and 12 m. W N W Bozen with a church school and castle, a tile-work and numerous mills. Pop. 1076.

PRUSA a city, Turkey in Asia. See *Bursa*.

PRUSSIA [German, *Preussen*, Dutch, *Prussen*, French, *Prusse*] a kingdom of central Europe, consisting of two large territories completely isolated from each other and of several small territories, also isolated. The eastern and more extensive of the two large divisions is situated between lat. 49° 50' and 55° 50' N. and lon. 9° 50' and 21° 50' E. and bounded N by the Baltic Sea N. E. and S.E. Russia S. Austria, Saxony and the Saxon duchies and W Hesse-Cassel, Hanau, Brunswick, Hanover and Mecklenburg. This territory is divided into the six provinces of Prussia proper, including E. and W Prussia, Posen, Brandenburg, 1 pomerania, Silesia, and Saxony and has an area of 97,743 sq. m. The western large division is situated between lat. 49° 10' and 53° 50' N. and lon. 6° 00' and 9° 25' E. and bounded N by Hanover and Holland, W Holland, Belgium, and Luxembourg, S. France, isolated portions of Oldenburg and Mecklenburg, and Rhineland Prussia and E. Hesse-Cassel, Nassau, Hesse-Cassel, Waldeck, Brunswick, and Lippe-Deimold. It is divided into the two provinces of Westphalia and the Rhineland Province and has an area of 13,681 sq. m. Of the smaller isolated territories, three are involved by the Saxon duchies a fourth by Hanover and a fifth by Hesse-Cassel Hesse Darmstadt and Nassau. To Prussia also belongs the principality of Neuchâtel now forming one of the Swiss cantons. The names areas, population &c. of the principal divisions of the Prussian monarchy, are tabulated in the following table—

THE PROVINCES AND GOVERNMENTS OF PRUSSIA. Their AREA, POPULATION &c. IN 1849

| Provinces. | Governments. | A. sq. m. approx. | Pop. 1849. | W. inhabitants. | N. inhabitants. | S. inhabitants. | Others. | Cath. | Protest. | Jews. |

As the two great divisions above referred to are not naturally but only politically connected, it will be necessary to treat of them separately in describing their physical features.

EASTERN DIVISION—The eastern division may be described generally as a vast plain, considerably elevated in the S. and S.W., and thence descending at first rapidly and afterwards very gradually, towards the Baltic and the German Ocean. The loftiest summits are on the S. frontiers of Silesia where the Riesengebirge and the Sudetes form the boundary between it and Bohemia and Moravia, and soon towards several embasements which, without attaining a very lofty height, form wild and romantic scenery averaging about 2220 ft. in height, but lowering northward to an average of 900 ft. after

which the surface loses its hilly character and begins to form extensive plains. In the N.W. the only other quarter which can be considered mountainous ramifications of the Thuringian forest and of the Harz appear and cover a considerable portion of the S. part of the province of Saxony, but here the average height does not exceed 1000 ft., and soon diminishes to less than 500 ft. The large space extending between the N. foot of these mountains districts and the shores of the Baltic, does not present the appearance of a monotonous flat, but though generally low and tame, healthy and fertile, it is often deeply diversified and even rises in some of the highest. Ultimately however in approaching the shores of the Baltic, the general level becomes so low, that large tracts are saved

from inundation only by low sand-hills, or banks of gravel which the waves have thrown up. Behind these hills and banks extensive lagoons or *Haffs* have been formed, communicating with the sea by narrow outlets, and giving to the shore one of its characteristic features. The whole coast, extending for about 500 m. is flat and uninteresting. Very few indentations occur to break its monotony; no bold cliffs appear and the water calms so much, that good harbours are extremely rare. The only large gulf is that of Danzig within which the town of the same name possesses by far the most frequented port. Towards the N W the monotony of the coast is broken by the *Is. of Rügen*, which becomes elevated towards the N and then terminates in the *Is. of Arkona*, about 300 f. high and overhanging the sea.

Rivers and Lakes.—The whole of the eastern part of the Prussian monarchy belongs to the basins of the Baltic Sea and the German Ocean. The share received by the latter is comparatively small and is confined to the W part of the territory. The principal river which drains it is the *Elbe*, which entering from the N of Saxony, traverses it by a series of remarkable bends, mainly in a N W direction, and finally quits it on the frontiers of Hanover. The chief affluents which join the *Elbe* in this part of its course are the *Elster*, *Havel*, *Mulde*, and *Saale*. Minors portions of the W of the province of Saxony belong to the river systems of the *Weser* and the *Werra*. The share of drainage received by the Baltic constitutes about five sixths of the whole, and is conveyed to it by a number of large and independent streams. Of these, the one meeting with the E. boundary of the basin of the *Elbe*, the most important is the *Oder* the only large river which can be considered wholly Prussian, gives its course, with exception of its commencement as a mere mountain torrent, lawfully within its territory which it traverses easterly S. E. to N N W receiving the *Malpansa*, *Barth* and above all the *Warta*, augmented by the *Nette*, and the *Nisse* of *Silesia*, the *Bober* and the *Nemse* of *Lothia*. Next in importance to the *Oder* and communicating with it by a canal between the *Bena* and the *Vistula* is the *Vistula* or *Weichsel* of whose course only the lower part belongs to Prussia, which it enters from Russian Poland. Flowing in a N direction without receiving any large affluents, and throwing off two large branches which enter the *Frische-Haff*, while the main stream continues its course past *Danzig*. Between the *Oder* and *Vistula* a number of small streams, among which the *Roga Persante*, *Wipet*, *Stolpe*, *Lupow* and *Loba* may be mentioned carry their waters directly to the sea, and thus form small independent basins. To the E. of the *Vistula* the first river of importance is the *Pasarge*, and after it, still further E, the *Frage*, with its tributary *Aila*. The last river on the E. is the *Nemese*, or *Memel* which has only a small part of its lower course in Prussia, but penetrating far into *Russia*, forms one of its important navigable outlets. Lakes abound in almost every province, but more especially in those of Prussia proper, including E. and W Prussia, and of Pomerania and Brandenburg. The large lagoons of *Pommersche Haff*, *Frische-Haff*, and *Carliche Haff*, with many others of a similar description along the coast, have been already referred to. The inland lakes are far too numerous to admit of specification. In E. Prussia alone 116 have been counted though their extent individually is so small, that the whole area occupied by them is not more than 238 sq. m. or an average of 2 sq. m. to each. W Prussia contains 68 in land lakes each only averaging about 1 sq. m. in Pomerania 66, Posen 27 Brandenburg 131 Saxony 6, and *Silesia* none deserving of the name. Many of these lakes are well supplied with fish, but generally possess few attractions, either in themselves, or in the scenery around them.

Geology.—In the mountainous districts of the E. part of the Prussian monarchy the loftier summits are composed of granite, gneiss, mica schist, porphyry, diorite, &c. These are most largely developed in the mountains of *Silesia*, and even in some of its flatter parts, and are also seen in the circle of *Schlesinger*, in the Saxon government of *Kröft*, in the *Brocken*, forming part of the *Harz*, and in isolated spots in the vicinity of the town of *Halle*. Transition rocks, graywacke, clay-stone, and limestone extend along the frontiers of *Austria*, *Silesia*, into the Upper *Silesia* of Prussia, as far as the *Oder*, and also W. of the *Wesergebirge*, in the districts of *Salzwedel* and *Waldenborg*, and W. to the *Queen*. Rocks of the

same formation occupy a considerable part of the flatter districts of Prussian Saxony, more especially in the vicinity of *Magdeburg*, and along the banks of the *Oder*. Secondary formations, composed of mountain limestones and the various strata of the carboniferous system, occur in *Silesia*, chiefly in two localities in Upper *Silesia* along the frontiers of *Russia* and *Russia* Poland and among the mountains in the county of *Glinia*, and towards the *Riesengebirge*. Rocks still higher in the series, and including the new red sandstone, and others, enter Prussian *Silesia* from Poland on the E. and extend W. to the *Oder*, near *Krappitz*, and to a considerable distance inland. They also occupy an extensive tract in the province of Saxony covering part of the terraces of the *Thuringian* forest, and stretching along the N and E foot of the *Harz*, to the banks of the *Saale*, *Elster* and *Elbe*. Chalk and its accompanying beds occur in many different localities, more especially on the N side of the *Harz*, and in *Silesia*, both in its higher districts, and on the frontiers of *Poland*. Chalk also appears near *Inowrazlaw* in the province of *Posen* near *Templin* and *Przemlow* in gov. *Poznan*, near *Gutkow* in gov. *Strasburg*, and lastly in the island of *Rügen*, where it forms the romantic cliffs of *Strichenkammer* and *Arkona*. Tertiary formations overlying the chalk, and including masses of *Ignite*, appear at the foot of the *Harz*, in the district of *Merseburg*, on the banks of the *Elster*, *Mulde*, and *Elbe*, in the N W corner of gov. *Leignitz* at seven different localities in province *Brandenburg* in district *Bozenberg* and in the islands of *Wollin*, *Usedom*, and *Rügen*. Volcanic rocks, belonging to the tertiary period, are of rare occurrence, and are almost confined to gov. *Leignitz*.

Climate.—The E. part of the Prussian monarchy, extending over 6° of lat. and nearly 13° of lon. and consisting in one direction of lofty mountains, and in another of low flats stretching along an inland sea, and including between them large tracts of undulating land must necessarily present considerable diversities of climate. At *Kröft*, in lat. 50° 59' N and about 900 f. above the sea, the temperature of the year is 52° F., of winter 34° and of summer 70° F. At *Berlin*, in lat. 52° 30' N but at a much lower level only 130 f., the annual temperature is the very same, though both the extremes of winter, cold, and summer heat are somewhat greater. At *Stralsund*, lat. 54° 19' N, but at a level rather under 50 f., the temperature of the year is 51° 48', of winter 32° 30', and of summer 68° 30' F. The average of a number of places situated between the highest and lowest latitudes gives a mean annual temperature of 52° F. At *Berlin* from 159 to 160 days of the year are rainy from 33 to 34 obscured with mist, and 17 stormy. On the coast of the Baltic the stormy days amount to 30 the greater part of them in summer, and the quantity of rain is also much increased. Least rain falls in *Silesia* and the eastern provinces. The prevailing winds are W and S W.

Western Division.—The western division, consisting of *Westphalia* and the *Rhenish* province, differs so much from the eastern division as, in many respects, to present a striking contrast to it. All the mountainous parts of the former are situated on its S. and W. frontiers, and, on receding from it, long tracts are wandered over in which nothing that can be called a mountain is to be seen. The W. division of the monarchy is much more fully diversified. Its mountains, though far less elevated than those on the frontiers of *Silesia*, are not confined to a particular locality, but stretch across the country in all directions, and form numerous valleys, one of which, that of the *Rhine*, here occupies no inconsiderable portion of the whole surface, and, in point of fertility and beauty, is not surpassed by any other valley in Europe. In the N a mountain range of moderate elevation, forming a continuation of the *Wesergebirge*, stretches across govs. *Minden* and *Münster*. To the E. of it, that of the *Teutoburger-Wald* extends to a N W direction and near *Belefeld* attains its loftiest height, not exceeding 1080 f. This is succeeded, to the E., by a low range, known by the name of the *Harz*, or *Harzwald*, the highest point of which is scarcely 700 f. This range, commencing between *Brilon* and *Soestberg*, stretches W across the N of gov. *Arnsberg*, in the direction, and along both banks of the *Möse* and *Ruhr* presenting to both rivers, and on both sides but particularly on the E., a number of bold and romantic precipices. Still further E. the *Sauerhaud* or *Siedland* mountains appear. In the N E., where

they take the name of the Rothlager or Rothlager, they attain their highest elevation, which, in the Astenberg, is 5925 ft., and in several other summits exceeds 9000 ft. The last range, on the E or r bank of the Rhine, is the Westerwald, which reaches the height of 9000 ft. A part of this range, forming its W termination, stretches along the banks of the Rhine, and presents the remarkable summits known by the name of the Siebengebirge. On the l bank of the Rhine, and on the S. part of the Rhenish province, the principal mountains are the Eifelgebirge, which have their greatest breadth between Andernach and Bonn, stretch from the Rhine westward for about 45 m., and though generally low attain the height of 1500 ft., and the Hunsrück occupying a large space between the Moselle and the Nahe, and attaining in the loftiest summits of the Idarwald and Hochwald, the respective heights of 2300 ft. and 1660 ft.

Rivers.—More than four-fifths of this portion of the Prussian monarchy belong to the basin of the Rhine which, entering it on the S.E. first forms the boundary between it and Nassau, and then traverses it in a N N W direction finally quitting it on the frontiers of Holland, to the N of Cleve. It thus receives a large part of the drainage directed to it, moreover augmented within it by numerous streams, of which the most important are on the r bank the Lahn, which, however, has only its mouth on the frontiers, and scarcely belongs to Prussia the Sieg Wipper or Wupper Ruhr, with its tributary Lenn, the Emsche, and Lippe, and on the left, the Nahe, Moselle, with its tributary Saar and the Elfr. In the N W a considerable space belonging to the basin of the Rhine, though the water is not received by it within the country, is drained by the Moselle, and its tributaries Roer and Meuse. The rest of the drainage, forming a minor portion from the N and E, is shared by the Elbe and the Weser. There is not a single lake deserving of notice for its magnitude. The most remarkable is Laubacher about 6 m. from Andernach, occupying apparently, the crater of an extinct volcano, and, though of small extent, above 214 ft. deep.

Geology.—In this part of Prussia there are no primitive rocks of granite, gneiss, and mica-slate. The prevailing rocks, particularly in the S. are volcanic, and consist chiefly of basalt, augite, porphyry, and similar volcanic products of the tertiary period. Graywacke, transition limestone, and clay-slate are also of some extent. The secondary formation, and more especially mountain limestone, and the overlying strata of the carboniferous system, are largely developed in the N in the circle of Fockenberg in gov Münster at the N W foot of the Sauerlandgebirge, along the Ruhr between Arnsberg and Düsseldorf in the W at the N foot of the Eifel, near Aix-la-Chapelle and in the S in gov Treves, particularly in the neighborhood of Saarbrück. The new red sandstone, with its accompanying rocks and fossils, occupies a considerable part of the higher districts in gov Minden and also occurs on parts of the Eifel, and along the Moselle and Saar in gov Treves. Lias and oolite are found in the N among the hills which lie between the Weser and the frontiers of Hanover. The chalk formation has its largest development in Westphalia, more especially on the W side of the Teutoburger-Wald, in the Sauerlandgebirge, between the Ruhr and the Lippe, and more particularly in gov Münster.

Climate.—Within the same ranges of latitude, and at nearly equal heights above the sea-level, the climate of the W is superior to that of the E. division of the monarchy. The mean annual temperature is about 1 higher, the winter is milder, and the summer cooler, and the range of the thermometer is accordingly confined within narrower limits. The fall of rain, however, is greater, averaging 20 inches in the W and only 15 inches in Silesia and the E. provinces. This, however cannot be considered a disadvantage, as the larger quantity of the W is by no means in excess, and only tends to make vegetation more luxuriant.

The principal physical features of the two great divisions of the monarchy have now been considered separately but it will not be advisable to follow the same course in considering industrial resources, both because the most important statistics relating to the most important branches of industry are so closely connected together, that it is scarcely possible to separate them and the same branches of industry are common to both divisions.

Agriculture.—The whole monarchy is situated between the parallels of latitude under which all the ordinary cereals

are easily matured, and there is nothing in the elevation of the surface, except in a few particular localities, to forbid for general cultivation. In the more S. portions, even though only to a limited extent, the vine thrives well, and yields some wines of good repute. The portion of surface absolutely waste does not exceed 1-50th of the whole. The woodland, chiefly occupying the loftier districts where cultivation on a regular system would be impracticable, but occasionally also, particularly in the E division covering extensive tracts which might be made arable, has been estimated at rather more than 1-4th the arable land at 6-1/2 m. artificial meadows 1 1/10th, natural pastures 2 1/10th, and gardens and vineyards 1-48th. The soil includes all varieties, from light sands, almost carried by the wind to the most obdurate clays, but has been subdivided into the three classes of wheat land, light loams of middling quality, and sandy or stony land. The wheat land, which is in most cases remarkably productive, is found chiefly in the Prussian provinces near the frontiers of Poland, and along the banks of the Memel and Pregel, till the coast is approached, when the sandy soil begins to prevail, in the province of Posen, in the government of Breslau on the E. bank of the Oder and generally throughout Silesia, between the Oder and the mountains. In Brandenburg the wheat land occurs only in isolated spots, with the exception of a rich continuous tract which extends along the Oder, from Frank fort into the N of gov Posen. The same tract, spreading out into a broad sene occupies a large portion of Pomerania, both extending N to its extremity of the isle of Rügen, and W to the Prussian frontier. In prov Hanneu the wheat land occurs chiefly in the S part of gov Magdeburg, where a plain known by the name of the Magdeburger Horde, is considered the richest and best cultivated in the monarchy, and also occupies a considerable part of gov Erfurt. In Westphalia it forms the S. part of gov Minden, where the Warburger Horde is celebrated, extends through part of gov Arnsberg, particularly in the vicinities of Bielefeld and Hallwang. Still more productive tracts are found in the \ half of the Rhenish province, between Aix-la-Chapelle and Bonn, as far as the frontiers of the Netherlands, and in the S districts of gov Treves, along the banks of the Saar. The loams of middling quality prevail in gov Bromberg, the N part of Silesia, generally throughout prov Brandenburg, in the E. part of gov Merseburg, the N of Magdeburg, the S. part of Minden, the whole of gov Münster and partly in gov Coblenz. The sandy and stony land of barren quality is found in large continuous flats in gov. Gumbinnen and Königsberg, where, for the most part, it forms the N boundary of the heavy wheat land. It prevails in gov Danzig and Marienwerder, generally along the shores of the Baltic, along the frontiers of Silesia, particularly in the S. and E. districts. In the interior of prov Brandenburg too though the very heart of the monarchy and in the environs of the capital the soil belongs decidedly to this class, consisting of immense tracts of sand which spread out like a sea, while occasional patches of muddling or even fertile wheat land, rise up and appear like islands in the midst of it. Nor are similar tracts unknown in the W division of the monarchy. Besides small stretches in gov Minden, and a large tract in the W of Münster the sandy and stony ground forms the larger part of gov Arnsberg which lies along the Sauerlandgebirge, whence the very name of Sauerland has been derived from the sturle and sourish nature of the soil. Similar ground occurs in gov Cologne and Coblenz, and on the plateau which reaches to the W. water-wald. The different soils above described, and the extent of the districts over which they extend, furnish us with an easy means of ascertaining the nature of its different products. On the first soil as its name indicates, wheat is the prevailing crop and alternates chiefly with hay and beans. The yearly produce of wheat is estimated at 2 000,000 of quarters, and, after satisfying the home consumption, leaves, on an average, a surplus of about 500,000 quarters for export. The produce of rye, barley and oats is estimated at above 3,000,000 quarters, but the consumption of these is so great, that for grain being far greater than that of wheat, leaves only the small quantity of about 500,000 quarters for export. Another very important crop, the culture of which is more or less extensive in every district, is that of potatoes. Of these above 18,000,000 of bushels are consumed by the distilleries alone. Hemp and flax are also very important crops, more especially the former,

which furnishes large supplies for the home manufactures, though a large quantity still requires to be imported. To becco also, to the extent of above 30 000,000 lbs. is annually raised. Axles and osunum are cultivated on a large scale, particularly in Saxony and Brandenburg. Oil plants are also important objects of culture, both for their oil and for their seed. The latter, particularly linseed, forms an important article of export from E. Prussia, while almost equally large exports of clover and other hay seeds, take place from Brandenburg and the Rhineland provinces. To the latter provinces, also, the culture of the vine is chiefly confined. The largest space occupied by vineyards is in gouv. Coblenz and Treves. The culture, on a smaller scale, is carried on in gouv. Cologne and Aix-la-Chapelle, and also in the E. division of the monarchy in Saxony, Brandenburg, Posen, and Silesia. Beet-root is cultivated to a great extent, and has risen from 1200 tons in 1832 to 1 012,578 tons in 1852 a large proportion of which is used in the manufacture of sugar. In raising these various crops the system of agriculture pursued though much improved in recent times, is still very defective, and not only falls far short of that common in the best-cultivated districts of our own country but is surpassed by many of those on the Continent. The same remark applies to the breeds of domestic animals, in which great improvement still requires to be made, though much has been done by the Government more especially in the case of horses, by the establishment of breeding studs in different localities, and on a general system. The numbers of the chief kinds are shown in the table at the beginning of this article. Considering the large extent of sea-coast the vast number of lakes and the number as well as magnitude of the rivers which Prussia possesses, its fisheries cannot fail to prove an important source of revenue. The whole produce has been estimated at about £1 000 000 sterling of which little more than a fourth is obtained from the sea.

Minerals.—These include among metals silver iron lead, copper zinc cobalt, arsenic, antimony and manganese and among other minerals, salt, alum, coppers, coal lignite, roofing slate, gypsum milstone, limestone, and several varieties of excellent building stone. The silver found only in connection with copper, is worked chiefly in the district of Mansfeld, prov. Saxony and more partially in some localities in Westphalia, and at Tarnowitz in Upper Silesia. The produce has for a long time been gradually diminishing, but still amounts to about one-sixteenth of the whole produce of Europe. Iron is very generally diffused copper is found in the three localities above mentioned for silver and yields about 30 000 tons of ore, lead is found in Silesia the Rhineland province, Westphalia, and Saxony zinc, in the same localities, except Saxony cobalt, in Westphalia and Saxony arsenic, in Silesia, antimony about 90 and osunum about 120 tons. Salt is found in all the provinces except Prussia proper, Posen, Brandenburg and Silesia, but the quantity obtained falls far short of the consumption and requires to be supplemented by imports from England Spain and Portugal. Coal is worked in Silesia Westphalia, and the Rhineland provinces, by nearly 400 pits. Amber which is both found in considerable quantities along the shores of the Baltic, and also obtained by digging at some distance inland.

COMPARATIVE STATE OF THE PRODUCE OF THE PRUSSIAN MINES IN 1831, 1843, and 1852.

| | 1831. | 1843. | 1852. | Tons. |
|----------|-----------|-------------|-------------|-----------|
| Iron | 258 0 | 25,549 | 182,659 | |
| Steel | 6,818 | 11,330 | 17,414 | lb. 4000 |
| Lead | 705 | 1,368 | 4,820 | Tons. |
| Lignite | 1 167 | 466 | 502 | Tons. |
| Zinc | 1 827 | 15,361 | 28,607 | Tons. |
| Cobalt | 1 943 1/2 | 21,825 9/10 | 13,701 1/10 | Quarters. |
| Arsenic | 137 469 | 2,965 5/16 | 6,608 2/3 | Tons. |
| Antimony | 61 877 | 8 739 | 151 561 | Tons. |
| Salt | 1 501 | 5 601 | 8 554 | " |
| Alum | 1 308 | 1 308 | 1 731 | " |

Manufactures.—These have made great progress, and are not confined to any particular districts, but generally diffused over all the provinces. At the head of the ordinary domestic stands linen, which occupies above 810,000 looms. Of these, however only a very small proportion are kept in factories and similar manufacturing establishments, where weaving is followed as a regular trade, and chiefly the finer sorts of goods

are made. The number of looms in such establishments is only about 84,000. Of these Silesia alone has more than one-third, and Brandenburg and Westphalia, which rank next to it, each about one-seventh. All the rest of the looms; to the number of about 275,000 are domestic, and are only used as subsidiary to other employments. In almost all these domestic looms only goods of a coarser description are made. The theme next in importance is cotton, which has its chief seat on the Rhine, particularly in the neighbourly hood of Düsseldorf, but is also carried on to a considerable extent in Silesia, particularly in gov. Breslau and also in prov. Brandenburg. It employs about 70 000 looms. The woollen manufacture employs 26,000 looms, of which scarcely one-third are domestic. The latter are chiefly in gov. Gumblin, where the peasantry weave enough of coarse wools to supply their own wants, but the manufacture, properly so called has its chief seats in Brandenburg and the Rhineland provinces. Next to them are Silesia and Saxony. Silk and mixed silk goods employ about 24 000 looms, of which four fifths belong to gov. Düsseldorf. The greater part of the remainder are at Berlin. Heavy wools employ 2300 looms, and ribbons about 5000. In connection with the above tissues, and properly forming branches of the same manufactures, vast quantities of yarn worsted and cotton-twist are spun. The first continues to be spun chiefly by hand, the flax-mills throughout the monarchy numbering only 17 with about 29 000 spindles, almost all in Silesia. The worsted is chiefly, and the cotton entirely spun by machinery. The former carried on in 2061 establishments, with 457 108 spindles, has its principal seat in prov. Brandenburg especially in gov. Frankfurt and after it in the Rhine province. The cotton-mills, numbering 148 with 194 950 spindles, are situated chiefly in the basin of the Rhine, and to a more limited extent in Silesia. The above manufactures and mills have been estimated to furnish the means of subsistence to about 630 000 individuals, but to these a considerable addition should be made for the great number of persons employed in bleaching fields printfields, and dye-works. The manufactures in metal rank next in importance, and are supposed to furnish the subsistence of 630 000 persons, of whom, however, only about one-third are actually employed as masters and workmen, the other two-thirds being composed of their families. These manufactures are very various. In iron and steel ware the first place belongs to the Rhine province, and the Westphalian gov. Arnsberg. Among particular localities may be specified Solingen for its fine saws and tools Aix-la-Chapelle and Burscheid, Altmünster and Juelich for needles and pins, Memmelsdorf and Hagen for locks and various similar kinds of hand ware. In the same localities, also, brassware, moulding wire and tinblows, are made on a very extensive scale. Berlin has long been famed for its fine cutlery, many of which whether as articles of ornament or utility are unsurpassed. In connection with these may be mentioned typewriting which, as well as printing forms an important branch of industry in Berlin. The leather manufacture is also important, and includes, in addition to ordinary leather the finer varieties of red and white cordovan, and parchment. Pottery, in all its varieties, forms an important branch of industry. For porcelain and the finer kinds of ware, Berlin and St. Martin, near Treves, are the most celebrated localities excellent stoneware, of a more common description is made extensively in the S. of prov. Saxony, in Legnica, and in the Rhineland province. Common pottery is made all the provinces, more especially in those of the E. and centre. One of its most celebrated localities is Bielefeld. Glass does not rank high as a Prussian manufacture. The principal localities are gouv. Treves Minden, and Oppeln. The most important paper mills are in Silesia, Saxony, and Westphalia, but the quality of the paper is still far inferior to that made in Great Britain, France, and Switzerland. Other manufactures carried on to such an extent as to be of national importance, are refined sugar chocolate, chemistry chemical products, and tobacco. Of these, the last is the most important, and is carried on in very extensive factories in the Rhineland province, in Brandenburg and Saxony. The last manufactures deserving notice are beer and spirits, the consumption of which is immense, and might with great advantage be very much diminished. The number of breweries exceeds 8000, that of distilleries 7000. The greatest number of distilleries

is in the Rhine province, which has about one-third of the whole, and Silesia, which has rather more than one-fourth. Taking the whole raw materials used in producing the spirit at 100 gallons from 75, barley 12 and rye 10, and wheat about 10 per cent. The whole produces is about 45,000 000 gallons, and the value about 23,500,000 sterling. Of the brew the Rhine province has above one-fourth, Westphalia and Silesia each one-sixth, and Saxony one-eighth. The produce is about 244,000,000 quarts, nearly 60,000,000 imperial gallons and is valued at about 21,800 000.

Trade.—The principal exports of Prussia are grain, flax, linseed, rape, turpentine, and clover-seed, timber, lime, gypsum, linen and linen yarn, brimstone, coal, earthenware, wool, woollen cloth, hosiery and linen, the principal imports cotton and cotton-waste, colonial produce, particularly raw sugar for refining, potatoes, iron, raw hides, wine, herrings, salt, &c. The establishment of the Zollverein by giving a free interchange of communication between the different states belonging to it, makes it difficult to specify the exact amount of trade which each separate state possesses, but there cannot be a doubt that that of Prussia is very extensive. Both from the nature of the country and the number of navigable streams which intersect it, it enjoys great natural facilities and these have been very greatly extended both by common roads, canals, and railways. The last mode of communication has already great advantages, the length of 1850 m having been completed in 1850. In the E. part of the monarchy and from Berlin as a centre, lines branch off N.W. to Hamburg, N.E. to Stettin, E. to Posen, S.E. to Breslau and thence to Vienna, S. to Leipzig and Dresden and W. through Magdeburg and Hanover and thence to Cologne, the last place forming a centre for the lines of the W. part of the monarchy, though here the railway system is less developed, partly because the natural configuration of the country makes it more difficult, while the admirable means of communication afforded by the Rhine makes it less necessary. The chief line of railways runs W. from Cologne through Aix-la-Chapelle to Brussels. In 1851 the length of electric telegraph lines exceeded that of the railways in operation. The external communications of Prussia are more defective than its internal, the Baltic, notwithstanding its long line of coast, being only an inland sea, with a low shallow coast deficient in good harbours. The shipping however, in 1851, reached the number of 1407 sailing and 90 steam vessels, the former of 158,824 tons burden. Among the foreign vessels which trade to Prussian ports the tonnage of Great Britain is about one-third more than that of any other nation. The second place is occupied by the Dutch, and the third by the Danes. In some of the ports of Prussia ship-building is carried on with activity. Stettin builds about one-third of the whole and also possesses a much larger tonnage than any other Prussian port.

Coin, Weights, and Measures.—Accounts are kept in six dollars (*reichs-thaler*), containing 237 68 gr. fine silver, and equal in value to 2s. 11½d. sterling. This dollar is subdivided into 80 silver groschen, each = 12 pfennigs. Besides the metallic there is a paper currency, in notes of 1, 5, 50, 100 and 500 dollars. The standard of length is the Prussian foot = 1.093723 imperial ft. The foot is subdivided into 12 inches, of which 2½ make an ell. The *juden* (fathom) is 6 ft., and the *rute* 12 ft. The mile contains 2000 ruten = 4.68 miles imperial. For superficial measures the standard is the square of the *rute* or the *quadrat-rute*, containing of course 144 sq. Prussian ft. The most common land measure is the *morgen*, containing 180 *quadrat-ruten*, and = 1.03 ac. imperial. The principal cubic measures are the *scheffel*, = 1.3 imperial bushel, and the *quert* of which 8.9 are = an imperial gallon. The *oster* is = 30, and the *ester* = 150 *querts*. The standard of weight is a Prussian cubic foot of distilled water, at the temperature of 15° Reaumur, or very nearly 60° Fah. It is divided into 66 parts, each of which makes a Prussian *pfund*, or lb = 1.03118 lb. imperial, and the *centner*, or 110 lbs. Prussian, is = 118.881 lb. avoirdupois. The *last*, or *scheffel-last*, used in measuring the tonnage of vessels, contains 4000 Prussian lbs. = 4121 lb. avoirdupois, or 1 ton 10 cwt.

Government and Religion.—Prussia is a monarchy, hereditary in the male line, and from the absence of recognized constitutional checks, was in theory absolute. A more constitutional form of government had long been earnestly desired and

had also been distinctly promised, but various causes of delay or pretexts for it occurred and though the general belief was that it must sooner or later be granted, the wild revolutionary spirit which lately overspread the Continent, and threatened destruction to all constituted authority, threatened to make the period of its promulgation more uncertain than ever. In 1848 however, a National Assembly was summoned, in opening the first session of which, on May 22, the king announced that the ministry would submit a draft of the constitution. This was forthwith produced and vested the legislative power jointly in the king and two houses—an upper house, consisting of the princes of the royal family, and 80 hereditary peers together with 180 members subject to a property qualification, but elected by the people for eight years, and a lower house, the members of which were to be elected, without any property qualification, for four years. This constitution had a very short and stormy existence, and was virtually annihilated by two votes of the assembly one abolishing the order of nobility and the other stopping the supplies. Accordingly, on 8th Nov., the king prorogued the assembly and summoned it to meet on the 37th at Berlin, but at Brandenburg. The absence of those members who had formerly supported violent measures, made it impossible to constitute a house, and the assembly was finally dissolved on 5th Dec. A new election having taken place, the chambers were opened by the king in person, 26th Feb., 1849, but the proceedings of the lower, or second chamber, were nearly as stormy as before, and it was again formally dissolved on 5th April. The constitution, however nearly in its original form, has been maintained, and the new electoral law officially published on 31st May, 1849, makes the second chamber to consist of 250 deputies, chosen by a suffrage which gives one elector for every 250 souls of the population. As a member of the Germanic Confederation, Prussia holds the second place and has four votes in the Bundestag. The only part of its territories not included in the Confederation, are Prussia proper, or the united provinces of East and West Prussia, and the province of Posen. The contingent of troops which Prussia furnishes is 79,484 men.

The revenue of Prussia in 1852 was 214,937,440 sterling of which considerably more than one-third is obtained by indirect taxation, and the expenditure, 214,430,490, but in 1849 and 1850 the disbursements considerably exceeded the income. The far heaviest expenditure is in the military department, which absorbs nearly one third of the whole revenue. The national debt amounts to 533,041,478.

Justice.—This is administered in most of the provinces according to a general code or *landrecht* established in 1794 but in the greater part of the Rhine province according to the French code—subject, however to certain modifications. For each code, a supreme court sits at Berlin the one called the *Geheime Ober Tribunal* which judges in the last resort wherever the *landrecht* is in force, and the other called the *Rheinische Revision und Kassations Hof*, which has similar jurisdiction in all cases decided according to the French code. Over each province a superior appeal court called *Ober-Landgericht*, presides with a power of reviewing all cases decided within it and in each government is an *Oberappellat*, possessing a right of reviewing the cases decided within the government in the courts of primary resort. These last courts consist of a vast number of local jurisdictions, within which justice is said to be for the most part administered cheaply expeditiously and purely, by judges chiefly appointed by the crown but partly also by private parties in possession of certain patrimonial rights.

Religion.—Though the reigning family is Protestant, there is no extensive religious establishment. The principles of religious toleration are professed, and persons of all denominations are alike eligible for public employment, and possess the same civil rights. The state, however, distinctly recognizes the two great bodies of Protestants and R. Catholics, not only protecting them in their respective rights and properties, but directly interfering in their affairs, more especially in regard to the appointment and payment of their ministers, and to their general management. The Protestants form a very considerable majority, amounting nearly to 10,000,000, while the R. Catholics barely exceed 6,000,000. The Protestants are governed by consistory, the head of which are 868 superintendents. The R. Catholics are governed by two archbishops and six bishops.

Education.—Prussia has taken the lead of Europe in the establishment of a complete system of national education, and has certainly succeeded, not only in placing an excellent course of elementary instruction within the reach of the great body of the people, but in inducing and when that fails, in compelling, them to receive it. The consequence is, that the masses of ignorance to be found in almost all the other countries of Europe have no existence here, and that, with rare exceptions, every individual in Prussia can both read and write. This happy result has been obtained first by establishing an adequate number of schools in all parts of the monarchy, and then enforcing attendance by a law, which provides that every child from the age of five years complete, unless certified to be receiving a suitable education at home, or in a private seminary must be in attendance at a national school until such time as the course of instruction therein provided has been received. This course comprises about eight years so that it may be regarded as a general rule that all Prussian children between the ages of six and fourteen are at school. The following table shows the number of schools of various kinds, of teachers and pupils, in 1840 —

| | Number. | Teachers. | Pupils. |
|---------------------------|---------|-----------|-----------|
| Elementary Schools. | 8,191 | 20,868 | 2,487,003 |
| Middle and Higher School. | 604 | 2,889 | 98,393 |
| Upper female School. | 36 | 1,918 | 15,670 |
| Gymnasiums. | 177 | 2,754 | 96,074 |
| | | | 2,808,496 |
| Private Seminaries. | 46 | | 1,001 |
| Laboratories. | 7 | | 4,265 |

In 1849 the number of children between six and fourteen years of age was 3,223,509 of whom, as seen in the above table, 2,903,468 were at school, leaving a balance of 317,954 to be accounted for partly by private teaching partly by the fact that many do not enter school till they are above six years old, and may therefore be found in the fourth and fifth columns, received no education during the year in question. The seven universities are those of Berlin, Bonn, Breslau, Göttingen, Halle, Königsberg, and Münster.

Army and Navy.—From the manner in which the great divisions of the Prussian monarchy are isolated from each other and exposed to the assaults of formidable neighbours, its very existence seems to depend on the maintenance of a strong military force and accordingly not only is the army kept up on a larger scale than the population might otherwise justify but care is taken to keep the military spirit alive among all classes, and make every citizen, for part of his life at least, a soldier. The regular army during peace, consists of 127,742 men, or with the reserve, 225,550, and 30,546 horses and is kept up partly by voluntary enlistment, and partly by a conscription which obliges every citizen after attaining his 20th year to serve in the regular army for three years, and for two years thereafter in the war reserve when, in the event of war breaking out, or other emergencies, he may again be compelled to join the regular army. After the lapse of these five years, he enters the landwehr or provincial army which is composed of two halves a first and a second. In the former of which he continues till he has completed his 32d year, and in the latter till he has completed his 39th year thus making the whole period during which he is liable to be called upon for the defence of the country amount to 20 years. The total force of the landwehr is 249,612. The landwehr includes all the males in the monarchy, from the ages of 17 to 50, not belonging either to the regular army or landwehr. It is called out only in cases of the most urgent necessity when the national existence may be threatened by invasion. The navy consists of one frigate, one corvette, and thirty smaller vessels, and two steamers, mounting in all 180 guns.

People.—The greater part of the people are Germans, but in several quarters the Lithuanian and Polish stock preponderate. Thus, in the N.E. corner of the monarchy between the Deina, Angerap, Goldapp, Prengel, and the Inster and Memel, Lithuanians are spoken, read, written, and taught. The Poles occupy the E. parts of Gumbinnen, Königsberg, and Marienwerder, the greater part of Posen, and no inconsiderable part of Silesia. Their number within the monarchy has been estimated at, at least, 2,500,000. The number of French found chiefly in the W part of the monarchy, but

partly also in prov. Brandenburg, where they are descendants of the French Protestants, who found an asylum here from the tyranny of Louis XIV amounts to about 74,000. The Jews are 218,773.

History.—In the end of the 10th century the shores of the Baltic were inhabited by a number of tribes, chiefly of Alen more E parts, the name of Prussia is supposed to be derived. These tribes were living in barbarism when Adalbert, bishop of Prague, made strenuous efforts for conversion. The work however proceeded slowly and Christianity did not gain a decided ascendancy till 1164. This ascendancy was again lost, and the original pagan possessors were proceeding to make themselves masters of the country, when Christian and Conrad of Masovia, who had previously held it in subjection called in the aid of the Teutonic knights, tempting them with the offer of a grant of all the land which they should succeed in conquering. Herman von Salza, the grand-master of the order, accordingly sent Herman Balk with a force into the country in 1237, and the work of conquest began. Quarrels however, soon arose between the knights and the Poles, and in the wars which ensued, the latter had so much the advantage that at the peace of Thorn in 1466 they obtained a cession in their favour of the W half of the country, and became huge lords of the remainder. With the view of recovering part of what they had lost, or at least securing themselves against further losses, the knights, in 1511, made the noble, Albrecht, grand-master of Brandenburg, nephew of Sigismund of Poland, their grand-master. After various unsuccessful negotiations, he declared war against the Poles. Neither side having gained a decided advantage, a truce was agreed upon in 1521 and the grand-master having made a journey into Germany, became acquainted, first with the reformer, Osiander at Nürnberg and afterwards with Luther himself, who urged him to lay aside the dream of the order make himself temporal prince of Prussia, and hold it under Poland as his fief lord. On his return Albrecht found circumstances so favourable that he followed Luther's advice, and after negotiating with Sigismund, entered peacefully into temporal possession. He afterwards married Anna Dorothea of Denmark, gave powerful support to the Reformation, caused the Bible to be translated into Polish and Lithuanian and founded the university of Königsberg. He died in 1568, and was succeeded by his son, on whose death in 1618, the succession opened to George William, elector of Brandenburg with which electorate Prussia has ever since been united. George William died of the plague in 1640, and was succeeded by Frederick William, usually surnamed the Great Elector who found his dominions devastated by pestilence and war but soon so distinguished himself both in the cabinet and the field, that affairs began to wear a much more prosperous appearance. During a long and successful reign of 46 years he obtained a recognition of his sovereignty over Prussia, and increased it by the addition of the greater part of Hinder Pomerania, the bishoprics of Halberstadt, Minden and Cammin, the archbishopric of Magdeburg, and the territories of Ulster Mark, and Ravensberg. On his death in 1688 he left his dominions in good order, free from debt, and defended by an army of 85,000 men. His son, Frederick III., had none of his father's talents, but became the first king of Prussia by his coronation at Königsberg in 1701. He was succeeded in 1713 by his son, Frederick William I who proved a patron of science and art, encouraged foreigners, who introduced many valuable manufactures, carefully husbanded the resources of the country and greatly improved its agriculture, but is better known for the rapacious and tyrannical conduct which he pursued towards his family, and more especially towards his son and successor Frederick, surnamed the Great, who came to the throne in the year 1740. Under him Prussia became one of the leading powers of Europe. He added steadily to its extent by the conquest of Silesia, and a promising of a far less justifiable nature, the partition of Poland. During his reign, the territory of the monarchy was nearly doubled, but the population, which at his accession did not exceed 2,500,000, rose to more than 6,000,000. He died in 1786, and was succeeded by Frederick William II, who gave good hopes at the commencement of his reign, but ultimately betrayed a despotic tendency, and deprived Prussia of much of the European influence which she had acquired under his predecessor. A great accession of

territory, however, was obtained, particularly by the dismemberment of Poland, which, only partially carried into effect under Frederick the Great, was now completed. But while thus employed in perpetually dismembering an independent kingdom, his own territories became suddenly exposed to a similar fate by the breaking out of the French Revolution and its subsequent progress. In the midst of preparations for opposing it he died, in 1797, and was succeeded by Frederick William III, whose reign, which at one time threatened to be the most disastrous which Prussia had witnessed since she became a kingdom, was ultimately prosperous and glorious. Not only was the independence of the kingdom secured by the overthrow of Napoleon, but its limits were greatly extended and a series of enlightened measures introduced which have contributed in a remarkable degree to its internal improvement. Under the reigning monarch Frederick William IV who ascended the throne at the decease of his father in 1840, Prussia passed more fortunately through the remarkable political crisis of 1848 than many of the central European states, and has received a constitution. See SUPPLEMENT.

PRUSSIA (East) a prov. Prussian States, forming their N. L. extremity, and bounded N. W. by the Baltic, N. E. Russia, E. and S. Poland, and W. West Prussia. Length N. E. nearly 200 m. breadth, 150 m. It is divided into two governments, Gumbinnen and Königsberg, and subdivided into 26 circles. Königsberg is the capital. Area, 12,801 sq. m. Pop. 1,441,499.

PRUSSIA (West), a prov. Prussian States, bounded N. by the Baltic, E. East Prussia and Poland, S. Poland and prov. Posen, S. W. Brandenburg and W. and N. W. Lombrum. It is very irregular in form but has a mean length N. E. to S. W. of about 190 m. with a mean breadth of 70 m. It is divided into govs. Danzig and Marienwerder and subdivided into 31 circles. Danzig is the capital. Area, 7547 sq. m. Pop. 994,881.

PRUTHA, or **PRUTHIA**, a market in Hungary, Lidier Danube, on and 11 m. N. E. Trestsch, near bank Wag with a castle church, and monastery. P. 1950.

PRUTH (anc. *Heponos*), a river, Europe, rises in E. end of Carpathian mountains, in the S. E. of Galatz, flows easterly to E. past Chernovitz, then S. E. forming the boundary between Moldavia and the Russian gov. Bessarabia, and after a course of more than 500 m. joins bank Danube, about 12 m. below Galatz. Its principal affluents are on the right, the *Chernomys*, *Elan*, and *Kagarul* and on the left the *Tchigor*, *Boghiza*, and *Lepushna*.

PRZESMITY, a tn. Russian Poland, 56 m. N. Warsaw, with three churches, two old monasteries, and a general trade. Pop. 1411.

PRZELAUTSCH, or **BRZELAUTSCH**, a tn. Bohemia, circle and 14 m. N. W. Chrudin, on the Elbe, with a church. Pop. 1700.

PRZEMYSL, or **PRZEMISLA**, a tn. Austria, Galicia, r. bank Dan, here crossed by a handsome covered bridge, 56 m. W. by S. Lemberg. It is walled, has tolerably well-built houses, narrow streets and an old ruined castle seated on a height; two Greek cathedrals, and numerous other churches, a museum, theological and philosophical institute, gymnasium, high school, military school, and town hospital manufactures of linen, and articles in wood. Pop. 4000.

PRZETITZ, or **BRZETITZ**, a tn. Bohemia, circle and 12 m. N. N. W. Klattau with a handsome church, manufactures of leather and a trade in fat cattle. Pop. 1638.

PRZEWOZEK, a tn. Austria, Galicia, 75 m. W. N. W. Lemberg, in a fertile plain. It is a well-built, handsome town with a cathedral church, a castle, convent of the Sisters of Mercy school, infirmary and manufactures of linen and cloth. Pop. 2950.

PRZIBRAJA, a mining tn. Bohemia, circle Borsau, 35 m. S. S. W. Prague, on the Litawa. It contains a deanery church, and an archbishop's palace; and is the seat of a superintending director. Near it lead and silver are extensively worked. Pop. 4100.

PRZICHOWITZ, a vil. Bohemia, circle and 55 m. N. E. Buzkow, at the foot of the Riesengebirge with a parish church and glass-works. Pop. 1810.

PRASA, an isl. Turkey. See *TRASSA*.

PRSA, *PRASA*, or *PRSA*, a river, Russia, rises a little N. E. Oborsk, gov. Kozak; flows S. E. into gov. Poltava,

which it traverses almost due S., and joins L. bank Dniester after a course of about 500 m., chief affluents, the *Kharul* and the *Golva*.

PRKOV, a gov. Russia, bounded N. by St. Petersburg, N. E. Novgorod, E. Yar, S. E. Smolensk, S. Vitebsk, W. Livonia. greatest length, N. W. to S. E., 202 m.; greatest breadth, 110 m., area, 11,408 sq. m. The muds towards the S. E. is rather elevated, being traversed by the Valdai Hills, but sinks gradually down near the centre, having only a gentle slope towards the N. and W. Immense numbers of blocks of granite lie scattered in all quarters. The whole government belongs to the basin of the Baltic, the S. Dwina, which drains the S. E., carrying its waters into the Gulf of Riga, and the Volkhova, Chelone and Lovat, with other small tributaries carrying the rest of the drainage into the Gulf of Finland. The soil is throughout of poor quality and can only be made to yield tolerable crops by heavy manuring. Wheat is seldom grown and the principal crops are oats and barley, which are raised in considerable quantities so as to leave a surplus for export. A considerable extent of ground is sown with hemp and flax. Forests also are extensive but the wood is not of the best quality, and oak is seldom met with. Pine is very prevalent and furnishes the means of manufacturing large quantities of pitch. The only other manufacture of importance is leather. Prkov is divided into eight districts. Pop. (1850) 701,000.

PRKOV, or **PRASKOV**, a tn. Russia, cap. above gov., r. bank Volkhova, which here receives the *Licnova*, 105 m. S. S. W. St. Petersburg. It is walled, flanked with towers, all in a very dilapidated state and are also many of the houses. It consists of the Kremlin, the Central city the Great city, and a considerable suburb. All the private houses, and the far greater part of the public edifices, are of wood. The finest buildings are in the Kremlin. Among others are the cathedral of very little architectural merit, but gorgeously decorated and the palace of the ancient prince of Prkov now occupied by the archbishop. The number of churches amounts to 50 but more than a third of them are in disuse. The principal manufactures is Russian leather and there is a considerable trade in hemp, flax, tallow hides &c., with Narva, and other assemblages on the Gulf of Finland. Prkov is the see of an archbishop and possesses a theological seminary a Bible society and a well managed hospital. It is said to have been founded by the Princess Olga towards the end of the 10th century. Pop. 8000.

PRKOV, a lake, Russia, in N. W. corner, gov. Pskov and S. W. corner gov. Petersburg immediately S. E. Lake Peipus, into which it discharges itself by a channel, about 3 m. wide, greatest length, N. W. to S. E. 27 m. greatest breadth 15 m. Its only tributary is the *Valdai*, which enters at its S. E. corner.

PTCHAI SKO or **PTCHAI SKOV**, a river and lake St. born, in N. W. of gov. Yeniseisk. The lake, situated S. of the Bay of Tavock, is about 35 m. long by 15 m. broad, and contains several islands. The river issues from the lake, flows N., and after a course of about 150 m. falls into the Bay of Petchenik, in the Arctic Ocean, between the mouths of the Ob and Yenisei.

PTTICAI, a river, Russia, rises in gov. Minsk flows S. E. and S., and joins L. bank Pripyet, 20 m. above Moser, total course, 200 m. principal affluents, the *Orla*.

PUBLAW, par. Eng. Somerset, 1335 ac. Pop. 810.

PUCH PRZI, a tn. Russia, W. coast Gulf of Sian 72 m. S. S. W. Bankok lat. 12° 45' N. lon. 100° E.

PUCHO, or **POCHOW** a market in Hungary, Higher Danube, co. and N. E. Trestsch, r. bank Wag, with two churches, a castle, manufactures of earthenware and woollen cloth and a considerable trade in the latter. Pop. 1845.

PUCKINGTON, par. England on Somerset 610 ac. Pop. 281.

PUCKLECHURCH, par. England, Gloucester, 2428 ac. Pop. 981.

PUDDINGTON, two pars. Eng.—1 Bedford, 3770 ac. Pop. 612 —2 Devon 1261 ac. Pop. 215.

PUDDLEHINTON See *PUDDLEHINTON*.

PUDDLESTONE—*WATER* par. Eng. Hereford, 1743 ac. Pop. 516.

PUDDLETOWN See *PUDDLETOWN*.

PUDEWITZ, or **PUENMANTA**, a tn. Potosi, prov. and 15 m. E. N. E. Potosi, between two small lakes. It contains a B. Catholic church, and a synagogue. Pop. 1619.

PUDELEIN, or **PODOLIN**, a vi. Hungary, co. Eger, 1 bank Papad, 18 m. N. N. W. Lantashan. It is walled; has a castle, church, Plazet college, and high school; and a trade in hemp and linseed-oil. Pop. 2300.

PUDEMEZ, a vi. Hungary. Nether Danube, co. and 28 m. N. E. Friburg; with a church, manufactures of earthenware, and new-mills. Pop. 1075.

PUDESH, a tn. Russia, gov. Olonets, r. bank Woldo, the navigation of which is here interrupted by a catenat 69 m. E. Petrosavodsk. It has a wooden church and near it is a glass-work. Pop. 1094.

PUDEY, a tn. and township, England, co. York, on the brow of a lofty scabity above the valley of the Aire, 6 m. W. Leeds. It has recently increased from a few scattered hamlets to a considerable town and has a spacious and elegant modern church, with an embattled and gilded tower. Baptist, Independent, Wesleyan, Primitive, and Wesleyan Methodist chapel several schools, including the Moravian institution at Fulneck, a mechanics institution, building stone quarries and extensive manufactures of woollen cloth, in which most of the population is employed. Pop. 10,002.

PUDEYATTA, a tn. Hindoostan, presid. and 220 m. N. S. W. Madras, gov. Carnatic lat. 10° 16' N; lon. 78° 58' E, remarkable for its wide, regular and clean streets. There is here a palace consisting of an irregular congregation of detached cottages with a fine tank, and handsome Hindoo temple, all within the same inclosure.

PUEBLA, several places. Spain.—1. A tn. in Majorca. It has regularly-built houses, straight and broad streets, two squares, a townhouse, fish and flesh markets, church of Com. pante order and several flour-mills. Domestic weaving is carried on. Pop. 3170.—2. (*de Alcora*), A vi. Extremadura, prov. and 80 m. E. Badajoz with a townhouse, a prison, a palace belonging to the duke of Omsa two schools an hospital, a manse, a suppressed Franciscan convent, and a church several flour-mills, and linen-weaving. Pop. 2202.—3. (*de Almoraz*), A vi. New Castile, prov. and 47 m. S. E. Toledo with a townhouse, school, church and large and handsome hermitage flour and fulling mills and some traffic in grain. Pop. 1855.—4. (*de Arco*), A vi. Valencia, prov. Castellon-de-la Plana, on an eminence on the Miguera. It has a townhouse and prison a primary school a church, and a hermitage. Pop. including the suburb of Campoa, 2155.—5. (*de Cazalla*), A vi. Andalusia, prov. and 86 m. S. E. Seville, on the Corbones, the stagnant waters of which generate much disease. It has a good townhouse, a public granary two schools, a church and three hermitages. Live oil and four mills. Pop. agricultural 3361.—6. (*de Dos Pedregas*), A tn. Andalusia, prov. and 60 m. N. E. Granada, with an hospital, a granary, two schools, a townhouse, four churches, linen and hane weaving, two soap-manufactories a fulling and six flour-mills and a trade in cloths, men hosen and other cotton tissues, milk, and hardware. Pop. 5154.—7. (*de Don Rodriguez*), A vi. New Castile, prov. Toledo with a townhouse, prison, granary flesh-market, two primary schools a church, public granary, and two hermitages, and some traffic in fine pottery, hardware, and Valen da ware. Pop. 2945.—8. (*de Guzman*), A tn. Andalusia, prov. Huelva, at the Portuguese frontier with a church, a chapel of ease, two elementary schools, and a granary. Most of the men are employed as muleteers and the women are occupied in manufacturing woollen cloth for home consumption. Pop. 3655.—9. (*de Zifra*), A vi. and com. Aragon, prov. Teruel, 50 m. from Huesca tolerably well built with a church, two primary schools, manufactures of linen, an oil and a flour mill, and a trade in agricultural produce. Pop. 2321.—10. (*de la Calzada*), A tn. Extremadura, prov. and 15 m. E. Badajoz, near the Guadiana. It has a large parish church, with three minarets, a courthouse, school, several mills, and a trade in corn and wine. P. 1960.—11. (*de los Infantes*), A tn. Andalusia, prov. and 40 m. N. E. Seville with two churches a courthouse, school, and several oil and flour mills. Pop. 1495.—12. (*de Lillo*), A tn. prov. and about 30 m. from Leon with a church, primary school, several round towers, manufactures of woollen and linen cloth, and new-mills. Pop. 1128.—13. (*de Montellán*), A tn. New Castile,

prov. and 90 m. W. Toledo. It is very well built; has a parish church, suppressed convent castle, courthouse, primary school, hospital, and beautiful nursery oil and flour mills, and an annual fair. Pop. 4458.—14. (*de Valverde*), A tn. Aragon, prov. and 18 m. S. E. Teruel. It is well built; has a church, a primary school, and some trade in corn and cattle. Pop. 1889.—15. (*de Simco Perez*), A vi. Extremadura, prov. and 40 m. S. E. Badajoz, with a townhouse, granary, two primary schools, a handsome Gothic church, all of marble, and with much fine work on the 8 minarets, an alameda, and a building; an oil and several flour mills, and a soap-work. Pop. 1730.—16. (*de Valdeosa*) A vi. prov. and 10 m. N. W. Valencia, 1 bank Turia, with a townhouse, prison, and parish church. Pop. (chiefly agricultural) 2102.—17. (*del Maestro*) A tn. Extremadura, prov. and 70 m. S. Badajoz with a church courthouse, prison, primary school, hospital, manu factories of soap and an oil and several flour mills. Pop. 1154.—18. (*del Duque* or *Pueblo de Reyes*) A tn. and com. Spain, prov. and about 85 m. from Valencia with two churches, a courthouse, primary school, hospital, manufactures of linen and a trade in corn, wine, and fruit. Pop. 1603.—19. (*de Noya*) A vi. New Castile, prov. and 48 m. W. Toledo, with a townhouse, prison, elementary school, church, hermitage a flour and 22 oil mills. Pop. 2354.

PUEBLA-JUNTO-A-CORRA a tn. Spain Andalusia, prov. and 10 m. S. S. W. Seville, on a height above: bank Guadalquivir. It has a parish church, courthouse, prison two schools, and a beautiful fountain an oil-mill, and a trade in agricultural produce. Pop. 1508.

PUEBLA, (*La*) a city, Mexico (Confederation lat. 16 15 to 30° 30' N. lon. 97° 5' to 98° 30' W. bounded, S. by the Pacific and surrounded on other sides by Vera Cruz and Oaxaca; area, 12 (43 sq. m. Its centre is intersected by the Cordillera de Anahuac, in which is the volcano of Popocatepetl, the highest mountain in Mexico. Its principal river is the Nacsa. The soil is fertile in corn maize, and fruit-trees. Cotton, sugar and other tropical productions also succeed well and there are besides silver-mines and quarries of excellent marble. The principal towns are La Puebla, Tlaxcala, Tepic, and Tehuacan. Pop. 800,000.

PUEBLA, (*La*) de los Angeles or *La Puebla*, a city, Mexico cap. above dep. finely situated on a declivity 74 m. S. E. Mexico, next to which it is the largest in the Confed. nation. It has wide, regular, and well-paved streets, supplied with foot-paths houses generally three stories high with flat roofs, large and elegant squares in the principal one of which is situated the cathedral a magnificent structure. In all, there are 72 religious edifices including 43 large churches, many of them highly decorated and above 100 towers rising above the houses, impart a characteristic feature to the city. There are also several colleges, academies, and schools, and a number of almshouses and hospitals. The principal main features consist of glass, earthenware, and soap. P. 71,631.

PUEBLA-NUOVO-DU-MAT a vi. Spain, prov. and 2 m. L. Valencia, on the sea-coast; 1 bank Turia. It has a townhouse, several endowed schools, a church, and a hermitage. Fishing is the sole occupation of the inhabitants. As no very distant date the site of this village was covered by the sea, and more recently it was occupied by only a few cabins of fishermen. During the heats of summer it is much resorted to for sea-bathing. Pop. 4837.

PUENTE, several places, Spain.—1. (*del Arzobispo*) A tn. Spain, New Castile, prov. and 64 m. W. S. W. Toledo, r. bank Tago, here crossed by a handsome bridge. It has three tolerable squares, a church, archbishop's palace, two endowed schools, an hospital, manufactures of stone and china ware brick and tile works and a considerable trade. Pop. 1015.—2. (*de Gudi*), A tn. Spain, Andalusia, prov. and 45 m. S. Cordova, on a height above the Guadal. It has two churches, a courthouse, prison, and primary school; manufactures of earthenware, brick-works, and several oil and flour mills. Pop. 645.—3. (*de Jesus*) A tn. Spain, Navarre, 16 m. S. W. Pamplona, with straight, well-paved, clean streets, well-built houses two courthouses, a prison; two schools, two churches, and a hermitage; flour and oil mills, and broody distilleries. Pop. (agricultural), 3693.

PUENTEDEUME, a seaport, Spain, Galicia, prov. and 12 m. N. N. E. Coruña, 1 bank estuary of the Dume with a townhouse, an old palace belonging to the counts of Barwick

and Alha a prison, several elementary schools, a magnificent church with three naves, and barracks. The river Euse is here spanned by a very long and handsome bridge, though out of repair, one of the most remarkable in Spain, built in 1885-1886. Fishing is the chief employment, and a small quantity of linen is manufactured. Pop. 1798.

PUEBLO-DE-GARCIA RODRIGUEZ, a tn. Spain, Galicia, prov. and 30 m. E.N.E. Coruña, consisting of a number of well built houses clustering round the parish church. It has an endowed school and hospital. Pop. 1890.

PUEBLO, PUERCO or PESCOA, a river, U. States, rises in E. of New Mexico, to the S.E. of Santa-Fé, flows S.E. skirting the mountain range of Guadalupe, and traversing part of Texas, and after a course of above 400 m. joins the Rio-Grande del Norte about 50 m. above Aguavilla.

PUEBLO, a tn. and com. Belgium, prov. and 11 m. S.W. Awerp, with several breweries and distilleries, a salt-refinery and several corn and oil mills and manufactures of linen, woollen, and cotton fabrics, hats, leather, soap, earthenware, bricks, tiles, &c. Pop. 4096.

PUEBLO-BELLO See **PORTO-BELLO**

PUEBLO-CABEJO See **PORTO-CABEJO**

PUEBLO-DE-CANARIA, a vil. Canary Islands, E. coast, Isl. Fuerteventura, near the port of its name, which was declared a free port in 1858. The residence of various foreign consuls, with a church, a school and exports of produce. Pop. 474.

PUEBLO-DE-LA CAÑA-DE-ONTOYA, a seaport in Canary Islands, S. coast, Isl. Tenerife. It has paved and clean streets, five squares in one of which is a pretty almshouse, a town house a prison an hospital, two churches, and two schools. Agriculture, and rearing silk-worms are the chief occupations. It was declared a free port in 1852. The anchorage is bad; wine, brandy, almonds cochineal silk, vanilla, are exported and sugar, coffee, indigo, saffron, hides, slaves, oil, rice, &c. imported. Pop. 8459.

PUEBLO-DE-LA SELVA, a maritime vil. Spain, Catalonia, prov. and 35 m. Gerona, with a church a school, and two squares, one of them only in good preservation, limestone quarries, and a trade in wine oil, and corn. Pop. 1385.

PUEBLO DE SANTA MARIA [anc. *Menestres Portus*] a city Spain, Andalusia, prov. and 1 m. N.E. Cadix, a bank Guadalete, here crossed by a bridge of boats near its mouth in the bay of Cadix, lat. 36° 35' N. lon. 6° 18' W. The houses are generally built in the case of that city, but are more spacious, and have much external decoration in glass and painting and the streets are generally broad and well paved. It has a pretty theatre, a bull ring where was given the grand bull fight to the Duke of Wellington described by Lord Byron, five promenades, one of them planted with orange and other trees, an asylum for the poor a foundling hospital, an hospital for the sick a granary, infantry and cavalry barracks, a custom-house, a good office near the mole extensive wine-cellars a courthouse, in the ex-convent of Dominicans a public primary school for each sex, and nine private ones, a clear of Lutyens parish church in the Gothic style, chapel of ease, three nunneries, with churches open for public worship besides several other churches and hermitages. Agriculture is the chief occupation, in connection therewith the preparation of wine and liquors for exportation. There are two soap manufactures two of hats, one of starch, one of white-lard one of beer, three of brandy seven of liquors, five tanneries, and four potteries. This is one of the three great towns of wine export, and rivals Jerez and San Lúcar and its vicinity to Cadix, the centre of exchange, is favourable to business. The principal articles of import are wool and iron, chiefly for Cadix. Steam-boats ply regularly between the Puerto and Cadix. Pop. 17,930.

PUEBLO-DE-LA-PADERA, a harbour N.E. coast, Isl. Cuba; lat. 21° 17' N. lon. 76° 45' W. (a). It has a long and narrow entrance, but afterwards widens out, stretching about 9 m. E. to W. and 5 m. N. to S. It affords excellent anchorage, fit for any class or number of vessels, contains several lakes and has few marshy shores.

PUEBLO-DE-SAN-FRANCISCO (MANA SANTA DE), an island city, Cuba, cap. central dep., 835 m. S. by E. Havana. From its inland position, and want of water carriage, the trade of this place bears no just proportion to the number of its inhabitants. Its produce, chiefly sugar and tobacco, is shipped, and it receives its foreign supplies through the Bay of Nuevitas,

which lies 40 m. N.E. It is the seat of the supreme court of justice for all the Spanish colonies in America. Pop. of its jurisdiction (1845) 82,996.

PUEBLO-LA MAN a seaport, Bolivia. See **COMAZA**.

PUEBLO-LA MAN, a vil. Spain, New Castle, prov. and 20 m. S. Ciudad Real; with a townhouse prison, granary, two schools, and a church. extensive manufactures of lace, employing 1200 women two potteries, two flour and three oil mills. Near it are mineral baths of some purity. P. 2590.

PUEBLO-REAL, a seaport, Spain, Andalusia, prov. and 7 m. E. Cadix. It has straight and rather broad streets, several squares, in one of which stand the townhouse prison, and public granary. It also has a church several schools an extory, a courthouse, a mole and ship, and manufactures of coarse linen leather, pottery vermilion, and starch. P. 3981.

PUEBLO-SERRANO a tn. Spain Andalusia, prov. and 50 m. from Cadix, a bank Guadalete indifferently built with a church school and a trade in oil, corn and cattle. P. 1569.

PUFFIN ISLAND an islet, Ireland co. Kerry St. Finian's Bay 3½ m. S. by E. Brae-head, Valculta Island.

PUGET an island U. States, Oregon in the estuary of the Columbia river 4½ m. long dividing the channel into two parts, and affording a navigable passage on either side, of which the N. is deepest, having 10 to 12 fathoms.

PUGET SOUND, an extensive inlet, W. coast, N. America, in N.W. of Oregon territory. It is interspersed with numerous islets and forms the S. portion of Admiralty Inlet, which communicates on the N. with the Pacific, through San Juan de Fuca Strait.

PUGHMAN, **PUGHMAN** or **PAGHMAN** a mountain range, Afghanistan subordinate to that of Hindoo Koosh stretching along its S. base for about 100 m. lat. 34° 40' N. lon. 68° 40' E. Its highest summit is supposed to be 10,000 ft. to 12,000 ft. These mountains are of primary formation, and are black barren, and destitute of vegetation.

PUIG a tn. Spain, prov. and 10 m. N.E. Valencia, with a church, courthouse manufactures of white-lard, and several oil and flour mills. Pop. 1759.

PUIGCHERDA, a tn. Spain Catalonia, prov. and 70 m. from Cervera, with a church, courthouse, gymnasium, and primary school manufactures of woollen cloth and worsted and a trade, chiefly transit, in tallow, wool, and agricultural produce. Pop. 1568.

PULKANZ, **PULKANITZ**, or **ILAKA HANTA**, a mining to Hungary Higher Danube, co. Honth 9 m. S.W. Schenau, the seat of a mining directory its mines of gold, silver and copper ores important, are now only worked to a small extent. A good deal of wine is produced. Pop. 2860.

PULAWY, a tn. Russian Poland 39 m. N.W. Lublin r. bank Vistula, here crossed by a bridge of boats. It is well built, has a beautiful church and a magnificent castle containing a library of 60,000 vols, including many valuable MSS. and other good collections. Pop. 3000.

PULBOROUGH a vil. and par. England, co. Sussex 6 m. N.N.E. Arundel with a church in the early English style, a circular mound and vestige of other ancient buildings and stone quarries, and a weekly corn market. Area of par, 6896 ac. Pop. 1826.

PULFORD, par. Eng. Chester; 2567 ac. Pop. 836.

PULHAM, three pars. Eng. — 1, (Lancs), Dorset. 2370 ac. Pop. 288 — 2, (St. Mary Magdalen, or *Pulhammarket*) with 2, (St. Mary the Virgin, Norfolk. 5055 ac. Pop. 2582.

PULICAT, a maritime in Hindostan pres. and 23 m. N. Madras, lat. 18° 25' N. lon. 80° 24' E., formerly belonging to the Dutch, at the E. entrance of a lake of the same name. The lake on which it stands is an mlut of the sea, with a very narrow entrance on the S. It is 40 m. long, by 8 m. broad and communicates by canal with Madras.

PULKAU, or **BELKA** a market N. Lower Austria, at the foot of the Mauthart with a church manufactures of cloth and some trade in wood and wine. Pop. 1806.

PULLOXHILL, a par. Eng. Bedford 1760 ac. P. 688.

PULO-FRANCO, an isl. Malacca Strait. See **PRANCO**.

PULO-WAT Banda Islands. See **AY** (Pulo).

PULIANO or **PUZIANO**, a vil. Naples, prov. Otranto, 10 m. S.E. Taranto with a convent inhabitants chiefly employed in the culture of cotton. Pop. 1100.

PULSENITZ, a tn. Saxony, circle Bautzen, on a stream of the same name, 15 m. N. E. Dresden; with a palace, church,

and shapel; and manufactures of linen, ribbons, and earthenware. The Emperor Alexander of Russia, and Frederick William of Prussia, had a conference here in 1812. P 2172

PULTAWA a gov. and in Russia. See POTAWA

It has three churches, a synagogue, a convent of the Sisters of Mercy, with a hospital, several old monasteries, a gymnasium, and a castle, a distillery, and some general trade. The Poles were here defeated by Charles XII. in 1708, and the Russians by the French in 1808. Pop. (1841), 4332

PULVERBATCH (Caracas) per Eng Salop, 4063 sq. Pop. 571.

PUNA an island Ecuador dep. and 40 m. S.W. Guayaquil, in the Gulf of Guayaquil, separated from the mainland by a narrow channel. It is 30 m. long, by 10 m. broad, mostly well wooded, and on the N side has the small town of Puna, with a good harbour where ships bound for Guayaquil, that cannot pass the bar of the river, take to their anchors.

PUNCH a small town, Punjab, at the foot of the Punch Pass S. slope of the mountains forming the S. boundary of the Kashmere lat. 33° 51' N. lon. 73° 33' E. The pass is 8500 ft., and the town 5200 ft. above sea-level.

PUNCHESTON per Wales J embrook 1725 sq. P 243

PUNCHSHIR or PUNESHIR, a valley, Afghanistan stretching S.W. along the S. side of the Hindu Kohok for about 60 m. from the Khawak Pass lat. 35° 42' N. lon. 69° 55' E. with a breadth nowhere exceeding 5 m., and generally not more than 1½ m. height above sea-level, at the upper extremity, 13,200 ft., at the lower, about 7000 ft. A river of the same name, flowing through the centre of the valley is fed by numerous streams from its sides. The soil is naturally so sterile that there is scarcely a single tree of spontaneous growth but careful culture has covered the surface with groves and orchards of mulberry and other fruit trees, and every spot capable of yielding grain is turned to account. The chief articles of food is bread made of the flour of dried mulberries. In the upper part of the valley there are said to be lead and silver mines. The inhabitants, considered to be of Persian descent, are expert in the use of fire-arms, and make good soldiers, but except industry cannot be said to possess any virtue beyond a rapacious and sanguinary temper. And their internal dissensions allow them to unite for any common purpose, it has been estimated that they could muster 10,000 fighting men.

PUNCKNOWLE per Eng Durut, 2160 sq. P 467

PUNDERPOOR, a town Hindoostan presid. Bombay prov. Besapor 1. bank Beas, 110 m. S.E. Poonah lat. 17° 42' N.; lon. 75° 28' E. It is regularly and well built has an extensive market-place, amply supplied not only with grain, cloth, and the other productions of the country, but also with a variety of British articles, an entire street being occupied by the native merchants of Bombay and Poonah. Pop. estimated at 25,000

PUNGUDUTIVE, a small island, S.W. Jaffnapatam, S. end of Ceylon, about 10 m. in circumference. It is rocky and unfit for cultivation, but a number of goats are reared, and from their milk, ghee for exportation is made, but the chief employment of the inhabitants is taking fish and oysters, which abound. Pop. 2415.—(Ceylon Gazetteer)

PLVHETE, a town, per Portugal, prov. Baixa-Alentej, 12 m. A.E. Thamar near the confluence of the Zeyre with the Tagus, with some trade, chiefly export to Lisbon in oil, iron, wax, and particularly a fine resin called Malvaena. Pop. 1808.

PUNITZ, a town, Prussia, prov. and 45 m. S. Posen, on the Landgraben, with a R. Catholic church, manufactures of linen, and a brewery. Charles XII. defeated the Saxons here in 1705. Pop. 1685

PUNJ DEEN, or PUNJ DEEN, a Taroom stationery camp, Khorsaan, on the route from Harat to Marva, 150 m. N Harat, lat. 36° 4' N. lon. 69° 41' E. It consists of about 300 tents of black felt, arranged in two squares, among ruined vineyards and fields no longer cultivated, and fitted up with considerable comfort, having fine carpets, and such furniture as is suited to a military life. The inhabitants, though scrupulous in observing the forms of hospitality, are in general dishonest slave-dealers. Punj Deen is a frontier post of the Khan of Khiva

PUNJAB [Persian, the 'Five Rivers'], an extensive territory in N.W. of Hindoostan, formerly under the dominion of the Sikhs, but since Feb. 1849, attached to the presidency of Bengal, in British India, and so called from its position amongst five great affluents of the Indus, which bounds it on the N.W., the Indus forming its W. and the Sutlej its E. boundary. It extends from lat. 29° to 34° N. lon. 71° to 78° E., and is of triangular shape, having its apex at the confluence of the Indus and the Punjab (or union of the five rivers); lat. 28° 58' N.; and lon. 70° 28' E. area (including the Jalandhar Doab and Kala territory) 78,450 sq. m. The territory included under its name is bounded N by the Himachal range of the Himalaya mountains, and W by the Khyber and Soliman ranges, thus comprising the main stream of the Indus as that part of its course.

General Description.—Its extreme northern portion is rendered mountainous by spurs, or offshoots of the great Himalaya system, but with these exceptions, the surface is for the most part an extensive plain, gradually sloping N.E. to S.W., in the direction of the five great rivers, by which it is so abundantly irrigated. These rivers (proceeding W. to E.) are the Jullum, (anc. Hydaspes); Chenab, (anc. Acesines); the Ravi, (anc. Ropar); the Beas, (anc. Bihasta); and the Sutlej (anc. Hindukush) and these together furnish an aggregate navigation through the country of nearly 3000 m., dividing it at the same time into five districts, or doabs (countries between two rivers) namely the Hindi Nagar Doab, between the Indus and Jullum, the Chalcot Doab, between the Jullum and Chenab; the Retchua Doab between the Chenab and Ravi; the Bari or Batta Doab, between the Ravi and Beas, and the Jalandhar or Rhat Doab between the Beas and Sutlej. Of these, the first is by far the largest, but also the most fertile and best inhabited, abounding with beautiful meadows and good dwellings interspersed here and there with rich and fertile valleys. The second doab is mostly level, and described by Burnes as a sterile waste of underwood, the abode of shepherds, and scantily irrigated; the Melotus and Bari Doabs are equally bare and neglected, though susceptible of high cultivation, while the Jalandhar Doab, unlike the rest, is highly cultivated and well peopled, and excelled in all kinds of productions by no province in India. The Sikhs allowed almost the whole country to fall into a state of extreme neglect.

Geology, Soil, and Climate.—The upper regions of the Himalaya present occasional beds of granite, and secondary formations, consisting chiefly of graywacke, compact limestone, sandstone, gypsum, and red clay, and containing all but inexhaustible beds of fossil salt, particularly that mountain chain specially termed the 'salt range', W. of Jalandhar. Gold is found in the beds of the Indus and Chenab. Iron, plumbago, antimony, alum, and sulphur are found in the hill country, nitre is obtained abundantly in the alluvial plains, and coal-beds exist on the left or E. bank of the Indus. The soil of the level country varies remarkably from stiff clay and loam, to sand, mixed with each other in variable proportions, and with vegetable matter, bones which, carbonates and sulphates of soda are sometimes mixed with it in such quantities as to render the land almost worthless. The climate is hot and dry and little rain falls except in the higher country, and under the influence of the S.W. monsoon. The winters are cool even to an European, the temperature varying from 34° to 75° Fah., seldom higher, whereas in summer, the heat is excessive, and more oppressive even than in the most sultry parts of Arabia.

Vegetable Productions.—The indigenous vegetation of the Punjab bears a close resemblance to that in the plains of the Ganges, but, as its natural resources have been but little improved, the cultivated products of the two countries admit of no comparison. According to Burnes, the soil amply repays the labour, for such is its strength, that a crop of wheat, before yielding its grain, is twice sown down as fodder for cattle, and then ears, producing an abundant harvest. The principal grain crops are wheat and barley, of excellent quality, buckwheat and millet, peas, vetches, and mustard, sesamum, and other oil seeds, are extensively grown. Turpe, sorgho, onions, cucumbers and melons are raised in large quantities. The crops of indigo and sugar are very rich, and both articles are plentifully exported. The tobacco plant also grows luxuriantly, especially about Multan, and opium was lately grown pretty extensively. Among the

fruits are the date, orange, fig, vine, apple, mulberry, baum, and mango, but these occur only in a cultivated state, and near the towns. Large trees are scarce and extensive tracts may be passed without meeting anything larger than mimosa, acacia, camel thorn, and other bushes for which rose-wood-fuel is very scarce, being commonly replaced by now dung.

Animals.—The zoology of the Punjab is richer and more varied than its botany. Tigers of enormous size abound in the jungles, nor are lions by any means uncommon besides which there are great numbers of panthers and leopards, wild cats, hyenas, lynxes, jackals, and wolves, with foxes, martins, stoats, &c. The plains also are covered with herds of wild horses, rhyllons, and buffaloes, deer antelope, and goats, both black and white, abundant in the wilder regions. Species of various kinds are common, as well as bats, including the large and hideous vampire. Elephants are sometimes used as beasts of burden; but mules and asses are in far more common use. Among the birds are found eagles and vultures, hawks, magpies many varieties of parrots pea-fowl and jungle-fowls, partridges and quails, water-fowl of many kinds, herons, cranes, and pelicans, with doves, pigeons, and many of the smaller birds, including the bulbul or Eastern nightingale. The rivers abound with alligators, venomous serpents are common, especially the cobra-de-capelle. The silk worm thrives remarkably well, and bees are plentiful producing great quantities of fine honey.

People, Dress, &c.—The population, which according to a recent official return, is estimated at 4,101,000 persons, is composed of various races, partly of Afghans and Patans, holding the Mahometan faith, and amounting in the whole to about a quarter of a million, but principally of Jat Rajpoots and Gahirs of Hindoo descent, who compose the bulk of the inhabitable, while the Khalsas or Sikhs proper, though the dominant race, comprise less than a fourth of the entire inhabitants, and reside chiefly in the Chaud and Betchna Doabs. The Jats form the bulk of the agricultural peasantry, the Gahirs are a pastoral people, addicted to a roaming life, and are described as tall and athletic, with handsome, open countenance, blue eyes, and light hair. The people indeed, generally, are in physical respects superior to those of Hindoostan, and to the full as active as the Mahometans, having stout, well rounded limbs, and an active, graceful carriage, particularly the better classes. The women too are elegantly shaped and very attractive, they wear sumptuous trousseaux, and extraordinarily high conical caps. The male attire consists of a paper or sort of turban, a close-fitting jacket, and large bulky trousers usually terminating at the knee; with a scarf thrown over the shoulder, either with a coloured trimmed border, or consisting of a gaily-coloured shawl; the rest of the dress is invariably white, and kept for the most part very clean. The hair is worn long, and gathered up into a knot at the crown. The Sikhs are almost exclusively a military and agricultural people,—barbarous indeed from want of knowledge, but neither savage nor cruel, being, on the other hand, frank, generous, and loyal. The Sikh soldier is, generally speaking, brave, sometimes even to desperation, active, cheerful, and merry—without polish but destitute neither of sincerity nor attachment. The Sikh merchant or farmer if he be a *Sikh*, differs little in character from the soldier except that he is less presuming and bolder. He also wears arms, and can use them promptly and with effect, when required, and as respects character, he is as intrepid, voracious, misanthropic and artful as any of the lower classes of Hindoos.

The Beligues of the Sikhs is a heterodox form of the Hindoo faith. The notion of a supreme deity, who is both creator and protector, pervades the poetry of Kural and his fellow herds, who are looked upon as the exponents of the national creed, and hymns are chanted at daily services to that deity who is designated by various popular names of the Hindoo god Vishnu. The existence of other Hindoo deities is not disputed, but no divine honours are publicly paid to any of them. An important distinction between the Sikhs and the other Hindoos, is the absence of caste, and consequently of most of the vices inherent in that institution. The Sikhs do not refuse to eat or to intermarry with other Hindoos who have become converts to their form of religion, but they do not extend the same liberality to Mahometans, against whom they have always exhibited great national hostility. The flesh of the cow

is the only article of animal food prohibited by their faith, and on this head their prejudices are stronger even than those of Hindoos of the orthodox Brahminical persuasion. Smoking is prohibited, but *bang* opium, and spirituous liquors, are freely used, and it has been said that no race of people in India is more flagrantly demoralized than that of the Punjab.

Language and Education.—The language of the Punjab is a jargon of various tongues for while a dialect of Hindoostani is spoken in the larger towns, the rural population use the Jaleky sprung from a cognate root and the original language of the country and on the S. frontier there is a considerable admixture of Sindhi. Since the country came under British rule, elementary education has been pretty generally diffused. According to an estimate made in the *Calcutta Review* (Jan. 1856), fully six per cent. of the population are receiving instruction, exclusive of the private education more generally prevailing among the higher classes. Schools also are established for females.

Manufactures and Trade.—The manufacturing industry of the Punjab is far more extensive and important than its agriculture though it is chiefly confined to the larger towns. Amritsar, Lahore, Multan, and Shoolah are distinguished for their silk and cotton fabrics and the silks of Multan called *hals*, and chiefly used for *torcas*, possess a strength of texture and brilliancy of colour for which they are much prized in the Indian markets. The shawls of Lahore too rank only second to those of Cashmere. Broadens, tissues, and carpets resembling the Persian, are also manufactured in the capital. In the E. of the Punjab, about Rohan and Mowatypoor, white cotton goods are prepared of a stronger and more durable texture, as well as cheaper, than those of British manufacture. Swords and fire-arms of all sorts, and of an excellent quality were under the Sikh dynasty made in great quantities at Lahore.

The Punjab enjoys from its position an extensive trade with Lahore, Bokhara, Kandahar &c. as well as a more direct one for the disposal of its produce and the supply of its internal wants. The imports comprise sugar, spices, and other groceries dye-stuffs and cotton woolen and silk fabrics, metals and metallic utensils, cutlery precious stones, ivory glass and suchlike necessaries, safflower seed and dried fruits, wool, horses, &c. The exports—partly of home produce partly in transit—comprise grain, glass, hides, wool, silk and cotton fabrics, carpets and shawls raw silk and cotton, indigo, tobacco, gold, hardware, horses, and vast quantities of hawks.

Government and Revenue.—The government under the Sikhs originally consisted of a sort of republic, or federation of *Sir dars* or chiefs, all holding independent sway and administering the laws in their own districts. But those at length through the rising power of Ranjot Singh became subordinate to the Maharajah, under whom they became feudal chiefs, paying him an allotted portion of the tax or tribute collected within the respective districts. As a usual rule the produce of the land was equally divided between the chief and the farmer, the impost for grain being paid in kind—thus for sugar-cane melons, &c., in cash. The chief, however, never lavished to that extent and in no country perhaps, was the *Zyat*, or cultivator, treated with more indulgence. Commerce, on the other hand, was not a little impeded by the heavy duties levied on goods by the Sardars of the districts through which they passed, and owing to this circumstance, as well as to the long disturbed state of the Punjab, much of the trade from Hindoostan to Cabool and Turkestan was carried by other and longer routes.

The government under the British resembles that already so long existing in the other districts of the Bengal presidency and the revenues are gathered on a similar system in their districts collectorates—those of Lahore, Multan, and Lala, in the S. Jalandhar, Lahore, and Haryana, in the N. The taxes, which were before heavily imposed on both imports and exports, have now been removed from every article of consumption except salt, which pays a duty of two pence per maund. Notwithstanding, however, the abolition of the territorial barons, the revenue, which in the latter years of the Sikh dynasty had fallen as low as six lacs of rupees (£800,000) amounted in 1849 to 21,560,000.

Army and Police.—The army of Ranjot Singh consisted of 37,000 infantry, of whom 15,000 were clad in armour 37,000 cavalry about 700 pieces of artillery and 1000 ele-

plants. The military force, established by the Anglo-Indian government, comprises a force of six regiments, consisting of 7500 men, about one-third of whom are cavalry, besides 6000 men organized into a town and rural police. This force is stated to be in a most effective condition, and though it cannot be pretended that crime has ceased in this long-disordered territory, yet it may be safely asserted that peace and security, such as is not accorded in any part of India, and such as the Punjab has not known for centuries, now prevail in that country.

History.—The Sikhs appear to occupy the geographical locality of the ancient Shona. The Punjab was in remote antiquity the scene of some of Alexander the Great's most arduous exploits, during his expedition against Porus. About A.D. 320, it was overrun by the troops of Mahmood of Ghazna, whose successors held the country for nearly 500 years making Lahore the seat of their government. It afterwards passed by conquest into the hands of Mahmood Sultan of Ghore, after whose death the country was ruled by a succession of turbulent and headstrong chiefs, principally Afghans, till at length in 1519 Babur the founder of the Mogul empire, having obtained possession of the country, ascended the throne, and established the Timurid dynasty, whose sway prevailed for about two centuries. In 1748 Ahmed Shah Durani overran the Punjab with an Afghan army and in 1764 the territory was formally ceded to him by the Mogul emperor. At length in 1788, the Sikhs overran the country E. of the Jallum, establishing military posts in that district. The Durani dynasty however maintained its ascendancy in the S.E. portion till 1809 when on the expulsion of Shah Rujooah, the last of the Afghan kings Runjeet Singh a Sikh of the caste of Jats, established his power over the greater part of the Panjab including the hill-tracts. In 1819, the renowned chieftain stormed Multan and took Faisalpur—in the following year conquering Lahore and the Derajat W. of the Indus and thus in 10 years he succeeded in establishing his power over the whole country of the five rivers, to which were afterwards added, by the conquests of his vassal Gholab Singh, Ladakh or Middle Tibet, and Butistan or Little Tibet. His right to all the territories he thus possessed on both sides of the Indus, was formally acknowledged by the British Government in 1838, and in 1839 Runjeet Singh died, having amassed by war and plunder no less than £10,000,000 sterling of treasure and movable property and leaving the country in a state of excitement and disorder from which it has never since entirely recovered. His son, Kharruk Singh, quickly succeeded but died of a decline a few months after his father, on which Shere Singh, a natural son of the great Runjeet, assumed the sovereignty but was assassinated, 15th September 1843. Dhuleep Singh, a minor son of the former Maharajah, Kharruk Singh, succeeded without opposition, having Herra Singh, the nephew of Gholab, for his viceroy or prime minister, but intrigues and civil disturbances now from time to time distracted the country, and from the close of 1845 to the period of its annexation to British India, the government was in abeyance, or what is worse, in the hands of an ignorant, blood-thirsty rapacious, and barbarous army. At length it became manifest that the Sikhs of the Punjab were preparing for an uprising into the turbulence protected by the British on the E. of the Sutlej. In the end of December 1845 the Sikh forces passed the Sutlej into the territories protected by the British, with a most formidable train of artillery but they found themselves completely routed after the hard-fought actions of Ferozeshah, Alwal, and Sohran. Lahore and other stations were afterwards occupied by British troops the Jalandhar Doab, between the Sutlej and Beas, was permanently ceded to the British, and the division of Cashmere and the other provinces of the Himalayas was vested in the rajah Gholab Singh. In 1849, a conspiracy between several disaffected chiefs and the Afghans re-

sulted in further hostilities against the British, Multan being the centre of their operations. The indecisive battle of Chillianwalla was followed by the capture of Multan in January and the victory of Goojerat in February 1849, since which period the former territory of the Maharajah Dharma Singh have formed an integral part of the British empire in the East.—(Thomson's *Hist. Punjab*, Hugel Vigne, Barnes; Jaccassant, *Journ. Anat. Soc. Bengal*, Jameson, *Report on the Geology of the Punjab*, Todd's *W. India Jour. Roy. Anat. Soc. Calcutta Review*.)

PUNJGOOR, a town Beloochistan, prov. Mekran, lat. 27° 20' N, lon. 62° 55' E, in a fertile valley, and cap. of a petty district of same name.

PUNJNUD (Five rivers), a large river, Punjab, formed by the junction of the Ghazra and the Chenab, and discharging the waters of those streams, and consequently, also those of the Jhelum Ravee and Beas, into the Indus, near Multan knots. It is sometimes described as the lower course of the Chenab.

PUNJSHIR, Afghanistan. *See* PUNJSHIR.

PUNNAIR a river, N. Hindoostan, rises in Mysore, flows S.E. through the Carnatic, and falls into the Bay of Bengal at Cuddalore, 100 m. S.E.W. Madras, total course, about 300 m.

PUNO a town Peru, cap. dep. of same name, 90 m. E. by 8 Arequipa, W. above of Lake Titicaca, 12,870 ft. above sea level lat. 16° 50' 20" S, lon. 70° 21' 37" W. It is a note-looking town, formed of the union of two neighboring villages its principal streets are straight and well paved, and it has a college, an hospital and two churches. Its market is well supplied with mutton the flesh of the llama, and more

PUNO.—From an Original Drawing by Lieut. Asher R.S.

springing with beef. It owes its foundation to numerous mines, which at one time were wrought in its vicinity but the most of which are now abandoned. Pop. 6000.—The DEPARTAMENT, which includes the N.W. part of Lake Titicaca, is rich in pastures, and grows potatoes and barley. It exports annually a considerable quantity of the wool of the sheep, llama, alpaca, and vicuña and some casacilla bark, procured from the valley of Cuzco, which produces all kinds of tropical plants. Pop. 250,000.

PUNTA ENADA, a promontory E. end, Isl. Hayti lat. 12° 4' N, lon. 71° 10' W.

PUNTA LEANA, a town Canary Islands, on a rugged site, E. side, Isl. Palma, with a well-built church a prison, and a trade in grain wine, and excellent fruit. Pop. 1028.

PUNTA-ARCANIA, a seaport, Central America, state Costa-Rica, on the Gulf of Nicoya lat. 9° 55' 45" N, lon. 84° 52' W. (a) The harbour is good, well-sheltered, and admits vessels of moderate burden, and as there is excellent communication with the interior, coffee is largely exported.

PUNTA-DE-PEDRA, a maritime town, Venezuela, dep. and 70 m. E. Caracas, at the head of the Gulf of Paria, with a considerable trade in cacao, sugar, and coffee. Pop. 2500.

PUNUKKA, a town, N. Hindoostan, prov. Booden, 17 m. N.E. Tinsukia; lat. 27° 56' N; lon. 89° 54' E.

PURACÉ, or **PURAMMO**, a vil New Granada dep Caneas, prov and 13 m. E. Popayan. It was a beautifully-situated and well-built place, remarkable for the number and beauty of its gardens and fountains, but was entirely destroyed in 1537 by an eruption of the volcano of Puracé which overhung it.

PURBACH **PONTUN**, or **FERRETER VARIO**, a market to Hungary Hither Danube, co. and 15 m N E Ödenburg near N W shore Lake Neusiedl. It is walled and produces an excellent wine. Pop 1483.

PURBICK (late or) a dark. England, forming the S E. angle of co. Dorset, and consisting of a peninsula, surrounded by the sea on the S. and E. and so separated from the mainland on the N. by Poole harbour and the Frome and on the N W by a rivulet called Uckford Lake, as to be connected with it by only a very narrow isthmus. It is about 12 m. long by 7 m broad is traversed W to E by a chalky ridge, dividing it into two parts—a N. covered chiefly with heath and a S., which is generally fertile. The prevailing rock is limestone, one kind of which being susceptible of a good polish, though deficient in durability under exposure to the air takes the name of Purbeck marble. The only other minerals of any value are a kind of slate, and hard paving-stone, and a very pure potter's clay.

PURCELL anal of W coast, Patagonia from which it is separated by a deep channel about 2 m. wide, lat. 46° 55' 30" S. lon 74° 50' 50" W. It is about 6 m in circuit moderately high and densely wooded.

PURCHENA a tn. Spain Andalusia, prov and 32 m. N Almería, on the Almanora. It is irregular but mostly paved streets many dilapidated houses, a townhouse prison, granary two primary schools, a church manufactures of salt-petre and soap. Pop 4023.

PURCHERECZ, or **PURCHERESZ**, a vil Transylvania 16 m. from Kronstadt with a Protestant and a Greek non united parish church. Pop 1497.

PURDY ISLANDS, a group of islands Pacific S. of the Admiralty Islands, about lat 2° 51' S., and lon 146° 15' E. The largest and most W. of them called Hat Island, is scarcely 2 m long. It is covered with large trees.

PURTON, par Eng Somerset 16.32 sq. Pop. 401.

PURKASA a tn. Hindoostan, presid. Bombay, prov Candahar on the elevated bank of the R. Tapas 84 m. N. N. Murat lat. 31° 32' N lon 74° 23' E. It was formerly a large town and a place of importance as the residence of royal governors but it is now almost in ruins, while few of the houses still standing are occupied.

PURLEIGH, par Eng Essex, 2578 ac. Pop. 1184.

PURLEY par Eng Berks, 877 ac. Pop. 220.

PURM RENDE, a tn. Holland, prov N Holland 10 m N by E. Amsterdam, on the N Holland canal. It is walled has a large square several markets, a handsome townhouse, weigh houses, several churches and schools, a poorhouse, two orphan hospitals, and various other benevolent institutions. The great business of the place is cheese, chiefly Edam. In 1851 the quantity sold was 3,143,364 lbs. Pop 3065.

PURNIAH, a tn Hindoostan, prov Bengal, dist. of same name, lat. 25° 45' N lon 88° 33' E. It extends over a large space of ground, but the houses are so thinly distributed, as to give it the appearance of an assemblage of villages rather than a town. There are numerous places of worship here for Mahometans and Hindoos.—The murree area, 7460 sq. m., is bounded N. by Nepal and Sikkin, and S.W. by the Ganges. In the N. part, the surface is hilly but in general it is mostly level, and tolerably well cultivated. Its principal productions are rice, oil-seeds, indigo, cattle, and timber. Pop 1,862,165.

PURNIAH, two tns Hindoostan prov Bengal.—1. A ruined tn.; lat. 25° 28' N, lon 88° 14' E. Extensive ruins of mosques, and other religious buildings exist here. Purniah having long been the focus of the Mahometan faith in this quarter of India.—2. A tn., dist. Bardwan, 89 m N by E. Calcutta; also with interesting Mughul antiquities, amongst which are a citadel and a lofty round tower.

PURTON par Eng Wilt 6400 ac. Pop. 2833.

PURU, or **PORU**, a river, S. America, rises in the E. of Peru, near lat. 11° S. enters Brazil, flows N.E., and after a course of above 400 m. joins a bank Amazon, by several mouths, about 100 m. above the confluence of the Madeira.

Vol. II

PURUVESI a lake, Russia, Finland, in the S. of circle Kuopio. It is about 24 m. long, by 15 m. broad; contains several islands and is remarkable for the impidity of its water which is said to be efficacious in scrofulous affections.

PURWASH, a vil Afghanistan, valley of same name, S. side, Hindoo Koonh. lat. 35° 0' N. lon. 68° 15' E. It acquired some celebrity during the military operations in Afghanistan in 1840, as the scene of a severe check sustained by the British in some queues of the dastardly conduct of a native regiment of Bengal cavalry.

PUSBY par Eng Berks, 1070 ac. Pop. 152.

PURIANO a vil par Italy, Lombardy prov and 10 m E Como \ bank lake of same name, near Mount Como. It is a vil with a parish church. Pop. 550.—The lake about 3 m long rather more than 1 m. broad, and in some parts nearly 30 fathoms deep, is supposed to be only part of a much larger lake mentioned by Pliny in his *Natural History* under the name of Eupidi.

PUSPOKY several places, Hungary, particularly—1. A market in Hungary Thutier Theas, co. Bihar, 3 m. N W Grosswarden with a Protestant and a R. Catholic church and a trade in corn and cattle. Pop. 2303.—2. (or *Blackchöf*) A market in Hither Danube, co. and S.E.L. Freising at the S. W. extremity of the vale of Soltil on the Danube with a church and a chateau belonging to the arch-bishop of Gran. Pop. 1213.

PUSHERIAL with *ESAL*, or *BRUEKKER KARIA*, a circle Tyrol, forming its E. extremity and bounded N. by Unter Innthal and Salzburg E. Villach, S. Lombardey, and W. Hohen area, 1090 sq. m. It is covered almost throughout with lofty mountains, from which numerous streams descend and between which lie a succession of romantic valleys, generally clothed with verdant pastures. The principal valley from which the circle takes its name though not the finest, is one of the largest in the Tyrol. In some of the lower valleys a good deal of corn and flax is grown wood is abundant and the minerals include from some of which is magnetic, cobalt, arsenic copper and fine rock crystals. There are several cold and thermal mineral springs. The chief manufactures are linen and lace. The inhabitants are almost all Germans. The circle is subdivided into 14 districts. Bruneck is the capital. Pop. 104,000.

PUTHIL a martime tn. Mysore, prov and 16 m E. by N. St. Andrews lat. 11° 49' N lon 78° 15' E. It contains a palace the residence of the prince com. &c. of Puthur, with a fine park theatre and excellent and much-frequented sea baths. P. 550.

PUTILALX [Latin *Ustul*] a tn. France, dep Seine 1 bank Seine 6 m N Paris. It has manufactures of printed calicoes, dye-works, worsted and silk mills, and paper-mills. Almost all the ground in the neighbourhood is laid out in kitchen gardens, or employed in raising roses, the leaves of which are sold to the Parisian perfumers. Pop. 3623.

PUTIOL a tn. Naples. See *1* *OSTIOLA*.

PUTFORD two par Eng Devon—1. *East* 2980 ac. Pop. 194.—2. *West* 2820 ac. Pop. 424.

PUTIGANO a tn. Naples, prov and 36 m S. E. Bari. It contains five churches, four monasteries, two convents and an hospital and has manufactures of cotton muslin and coarse woollen stuffs. Pop. 8400.

PUTIWL a tn. Russia, prov and 100 m W.S.W. Koursk on the Sem at the confluence of the Putiwl. It is an ancient place, tolerably well built, has three stone and sixteen wooden churches, a monastery, and three poorhouses, a vitrol, salt-petre, and tile works, and an extensive trade in agricultural produce, wool and silk. Pop. (1849) 4810.

PULIAM, or **POOTALAMA**, a small seaport on or vil Ceylon W. coast, 73 m N Colombo, with which it is connected by canal. It has one large and several small mosques; and was formerly a place of considerable trade and manufacture, and was much resorted to by coasting vessels with cargoes of pice goods, which were exchanged for arnee-nuts and pepper. At present its trade is chiefly confined to Colombo and Kurrungalla. Some coarse cotton cloth for the Kandian market, and large quantities of salt, are manufactured.

PUTLEY par Eng Hereford 589 ac. Pop. 182.

PUTNEY a vil par England, co. Surrey, 3 bank Thames, opposite Fulham, with which it is connected by a wooden bridge. It has two churches, one of them with a

restored ancient tower, an Independent chapel, a college of civil engineers, an endowed school, an almshouse, and other churches. Gibbes the historian was born, and the great earl of Chatham died here. Area of par. 2176 ac. Pop. 2880

PUTNEY a vil and township, U States, Vermont, a bank Connecticut, near the confluence of Rockwell brook, and on the railway which proceeds N along the Connecticut to Lake Champlain, 9 m. N Brattleboro. It is a well-built cheerful and thriving place with Congregational and Baptist churches, several schools, woolen factories, tanneries, paper, saw, and flour mills. Pop. 1425

PUTNAK, a market on Hungary Hither Thais, co. Glouster and 27 m N by E Erlau, 1 bank Rajo, with two churches. Pop. 2480.

PUTO or **POO-SO** an isl. China Sea, prov Chekiang lat. 30° 25' N. lon. 122° 40' E. It is about 8½ m long, and lies about 1½ m from the E. point of Chusan. It is almost literally covered with monasteries, pavilions, temples, and other buildings appropriated to religious uses, besides grotesque and other monuments of superstition, in which at least 2000 idle priests chase the praises of their idols, and live in ignorance, idleness, rvice, and dirt. No females are allowed to reside on Puto, nor any besides priests unless in their employ.

PUTT a vil and com. Belgium, prov and 16 m. S. E. by E. Antwerp; with three breweries, three flour-mills, and several brick and tile works. Inhabitants chiefly engaged in weaving.

PUTTIE, a Pungab, 36 m S. E. Lahore. It is well built of brick, and the streets are paved with the same material. Pop. about 5000

PUTTLANGE or **PUTTLINGER** a m. France, dep. Moselle 8 m W S W Nervegennes on the Moderbach. It has manufactures of cotton cloth, silk velvet, and sling and glass. Pop. 2032

PUTTEN a vil. Holland, prov Gelderland 23 m N W Arnhem with a church and school. Pop. 164.

PUTTIN, a vil. HAM shire, Eng. lat. 51° 11' N. lon. 0° 50' E. Pop. 142-2, near 1898 ac. Pop. 59.

PUTTERLOO or **PUTTERLOO**, a vil. Holland prov S. Holland, 4 m. W by S. Dordrecht with a townhouse, church, school and a trade in flax. Pop. 1085.

PUTTOLA HILLA See **PUTTOLAN-HILLA**.

PUTTUN-SOMALIN, Hindostan. See **MOHALLIN**.

PUTUMAYO or **ICA**, a river Ecuador rises in E. slope Andes at a town of same name, about lat. 2° N. flows S. E. L., receiving numerous affluents, enters Brazil, and joins I bank Amazon at the town of Ica, after a course of about 600 m. A good deal of gold is washed from its sands.

PUTZIG a Pungab, where the river of same name falls into the Baltic, 27 m N W W Danzig. It contains a Protestant and a Catholic church, and a synagogue has manufactures of chueory a fishery some shipping, and a trade in wood and cattle. Pop. 2156

PUTXON par Eng. Somerset 618 ac. Pop. 151

PUY DE DUNE, a dep. France bounded, N by dep. Allier W Creuse and Corrèze, S. Cantal and Haute-Loire and W Loire lat. 45° 30' to 46° 10' N. lon. 2° 51' to 4° 15' E. It is a compact and somewhat rectangular shape, greatest length, E. to W., 73 m; greatest breadth, 59 m; area, 3029 sq. m. It has a general inclination towards the N and consists of an immense undulating basin, called the valley of Limagne, extending longitudinally N. to N., and flanked on the E. and W. by lofty ramifications of the Cevennes. The highest mountains are in the W., and are divided into two principal groups—that to the N. consisting of a great number of volcanic rounded cones, comprehended under the general name *Monts-Dômes*, of which the culminating point is the sublimated mountain *Puy-de-Dôme*, 6565 ft. (peak top) and that to the S., consisting of a fine number of lofty peaks, known by the name of *Monts-Dômes*, of which the culminating point *Puy de Sancy*, 8225 ft., is the highest mountain in the interior of France. All these mountains have a nucleus of granite, overlain by sedimentary rocks, many of these comparatively recent formation, but the great agency which heaved them up, and gave them their present form, is evidently volcanic. Many of the extinct craters are so distinctly marked as those of existing active volcanoes, and the course of the streams of lava which flowed down their

sides may be traced for miles, filling up deep valleys, and forming elevated plateaus. The far greater part of the waters of the department are carried by numerous small streams into the valley of Limagne, already mentioned, and being received by the Allier which traverses it longitudinally, belong of course to the basin of the Loire. In the S. W. however, a small portion of the surface is drained by affluents of the Gironde, and thus belongs to the basin of the Gironde. In the lower localities, the vine is partially cultivated, and immense crops of grain particularly wheat are grown which far more than supply the home consumption; also flax and hemp. In more elevated localities rye and oats are the prevailing crops, and the largest forest-trees come to perfection, in particular chestnuts, from which the inhabitants derive a considerable part of their food. Still higher are fine tracts of verdant pasture; many of the loftiest mountains containing clothed with grass above the forest summits. On these pastures vast herds of cattle, and almost innumerable sheep, are fed. According to a general estimate the whole surface of the department may be thus divided—arable land nearly one-half, waste one-fourth, wood rather more than one-tenth. The domestic animals are in general of very inferior breeds. Game of almost all kinds abounds. The wild boar and deer are not uncommon and hares, rabbits, and wild fowl are very numerous. In the highest mountains straggles eagles, vultures, and other large birds of prey are frequently seen. The wolf, though much rarer than formerly still retains his appearance, and flocks are found in every quarter. The mineral of the department are not of much importance. Traces of almost all the metals are found but none of them exist in such quantities as to make the working of them an object of economical importance. Coal however is worked to advantage in three or four places. Mineral springs both cold and thermal, are very numerous. The principal manufactures are hempen cloth, ribbons, camlet, bombazine, satin, blouses, lace, paper and playing cards with and without candles, cutlery, and other kinds of hardware, glass, pottery, salt-petre, and chemical products. The trade in addition to these articles, includes corn, wine, brandy, liquors, dried fruits, and confectionery; oil, hemp, wool, cattle, Auvergne cheese, wood, especially fir-planks, &c. &c. For administrative purposes, *Puy-de-Dôme* is divided into five *arrondissements*—*Clermont*, the capital, *Amber*, *Issoire*, *Riom*, *Thiers*; subdivided into 20 cantons, and 443 communes. Pop. (1827) 596,897

PUY DE DÔME, a mountain, France, nearly in the centre of the dep. to which it gives its name rising 4946 ft. above sea-level. It is in the form of a truncated cone, the upper part of which rises majestically from the table-land around to the height of 1000 ft. It is composed of a kind of trachyte, so much as peculiar to this locality the name of *Dôm* has been given. It is of a crumbling nature, and so porous that all the moisture which descends from the clouds is absorbed and disappears. Hence not one spring of water is found on its sides. The surface, with exception of a few spots, is covered with verdure. It was on the top of this mountain that the weight of the atmosphere was first practically determined, and a foundation laid for the construction of the barometer. The experiments were made under the direction of the celebrated Pascal the author of the *Provinciales* letters, by M. Perrier his brother-in-law.

PUY LA-ROQUE, a vil. France, dep. Tarn-et-Garonne, 21 m. N. E. Montauban with numerous tanneries of calf leather. Pop. 1517

PUY L'ÉVÊQUE, a m. France, dep. Lot, 10 m N N W Cahors on a peninsula, formed by r. bank Lot. Pop. 1185

PUY (La), (Latin *Ancus Pylagorae*) a m. France, dep. Haute-Loire, 270 m. S. E. Paris. It is built in the form of an amphitheatre, on the S. slope of Mount Anis, and at a distance, is one of the most striking and picturesque towns in France. Covering the mount, and overtopping the houses, is seen a vertical rock with a tabular summit, consisting of volcanic breccia, resting on a calcareous base, and called *Roche de Corbelle*. Of still more remarkable appearance, though much less lofty is the *Roche de St. Michel*, an isolated rock of basaltic tuff, of a conical shape, rising up abruptly from the stream of the Borne to the height of 326 ft., with a thickness at the base of 500 ft., and at the top of only 45 ft. or 50 ft. These rocks appear not to have been projected from their present base, but to be merely the remains of

a plateau of tuff, which has gradually crumbled down, or been worn away by the action of water which the superior hardness of the still subsisting rocks has enabled them to resist. The Rocher de Cornelle is surrounded by the ruins of a castle, and the Rocher de St. Michel by a small chapel in the Romanesque style, approached by a winding stair, partly cut in the rock. The chief part of the town consisting of white

are exports chiefly of provisions, and imports of coal and groceries. It unites with the Comarvon district of burghs in sending a member to Parliament. Pop. 2700.

PYCHMA a river Basia, rises in gov Fern, E. slope of Ural mountains, not far from Ekaterinburg, flows E. past Kazyshelewa, and joins r. bank Tura, 20 m below Timmen, total course, 280 m.

PYLISTAAPT'S ISLAND the most E. of the Friendly Islands, lat 22 14 45" S., lon 176° & W (n). Its outline is irregular and rugged for some distance below the summit, which is 780 ft high the ground is bare, below which the level ground appears to be well cultivated and regularly inclosed, trees of considerable size fill the valleys. It produces in abundance bananas, coconuts, yams, sweet potatoes, papaw, apples, sugar-cane, and cave root. Pop about 150.

PYRAMID a lake, U States, territory Utah, lat. 40° N lon 119 50' W; greatest length, about 25 m; breadth, about 30 m. It lies surrounded among lofty mountains at the height of 4800 ft above sea-level commencing at its W extremity with a line of basins, and on the opposite side sweeps

along a ridge of snowy mountains at the foot of the Sierra Nevada. The scenery is of a very magnificent description, and near the centre of the lake is a singular pyramidal rock, about 600 ft in height, so striking in its resemblance to the Egyptian pyramid of Cheops as to seem the work of art rather than of nature. The water is slightly saline, and both fish and water-fowl appear to be very abundant. The lake has no visible outlet, but receives the discharge of Mud Lake from the N and Salmon trout river from the S.

1 PYRAMUS, a river, Asia. See JYNOX.

PYRENEES (Spanish, *Pyrenæos*, Latin, *Pyrenæus Montes*, German *Pyrenæen*) a lofty mountain chain forming the boundary between France and Spain and stretching across the whole of the isthmus which connects the Spanish peninsula with the rest of the European continent, and abuts with one extremity on the Mediterranean Sea, and with the other on the Atlantic Ocean. Its length from Cape Cruz, N of the Gulf of Biscay to the Point of Fagnier near Fontarabie, is nearly 270 m and its breadth near the centre, where it is greatest, scarcely exceeds a third of the length or 80 m. Though the chain thus defined terminates at two opposite ends, it cannot be said to be isolated, since to the W it is obviously continuous across the N of Spain by the Cantabrian mountains. The direction of the chain is E.S.E. to W.N.W. It does not, however, lie in the same straight line but rather consists of two lines which form parallel ridges about 30 m distant from each other, except near the centre, where they become united by means of a remarkable rectangular plateau in which some of the loftiest summits are found. Both on the N and S sides numerous branches are thrown off generally at right angles to the principal axis, and subside rapidly as they recede from it, forming various transverse, but very few longitudinal valleys. The chain rises both from the S and W towards the centre and, in accordance with a general rule which holds in regard to the European chains which lie in the direction of the equator, the descent on the S side is much more abrupt than on the N. Owing to this the S has much fewer lakes than the N slope, but far surpasses it in the boldness and grandeur of its scenery. As already observed, the loftiest summits of the chain are near its centre. Its culminating point, Maladeta, situated there, has the height of 11,424 ft, and a great number of peaks is the same locality exceed 8500 ft. To the E. of the centre, the chain lowers so rapidly that its average height soon becomes little more than 2000 ft. To the W the height diminishes much more gradually, and many peaks have heights varying from 5000 ft. to 7000 ft. and even 8000 ft. The principal passes in the Pyrenees formed by the meeting of valleys from op-

LE PUY - From Jales. Vespere de la Vierge Marie.

houses, rising in a succession of terraces, clusters round the larger rock and, in like manner, the suburb called Anguille clusters round the other. But while the site is thus remarkably picturesque, the interior of the town is by no means prepossessing. The streets are ill formed, narrow dirty, and in their upper part inaccessible to carriages. They are moreover paved with debris of volcanic breccia, which equally after rain, frost, and drought, becomes unpleasant, slippery and even dangerous to walk upon. The principal edifices are the cathedral a heavy ungainly building in the Romanesque style, occupying the highest part of the town, and rising high over the other houses. The church of St. Laurent, a large edifice, deriving its chief interest from containing the ashes of the celebrated Constantine Du Guesclin, the theatre occupying an octagonal building, fitted to have once been a temple of Diana; the prefecture, a new edifice in a good style; the college church, with a fine facade; the seminary a large and handsome edifice, admirably placed; and the museum, containing a considerable number of Roman remains, and other local curiosities. The manufactures consist of lace tulle and blonde, forming the staples of the town. Woolen covers, common stuffs, and lustrer bottles for wine. There are also tanneries, naileries, fulling-mills, dye-works and a bell foundry. The trade is in addition to the above articles, in corn, iron, earthenware, tinware, horses, and cattle. Le Puy is the see of a bishop, possesses a court of first resort and commerce, a consular chamber of manufactures, a diocesan seminary, and agricultural society. Pop (1837) 18,795.

PUYLAURENS (Latin, *Podium Laurens*) a France, dep Tarn 13 m. S.E. Lavaur, with oil works. Having early embraced the Reformation, it was often the scene of sanguinary contests between the Protestants and R. Catholics, and in the interval between the issuing and the revocation of the edict of Nantes, a Protestant university was established in it, in which the celebrated Bayle is said to have been a professor. Pop. 1958.

PYZOL, a vil. Spati, prov and 18 m N.W. Valencia, with two schools, a church, and an episcopal palace. P 2498.

PUZZO MAJOR, a vil and ocoo lld. Sardinia, prov and 23 m. S.E. Alghero, on a hill, with a convent. Pop. 1925.

PWILCROCHAN, par Wales, Pembroke, 3016 ac.

Pop. 2114.

PWLLHELI, a seaport, Wales, co. and 31 m S.W. Carnarvon, on N side, Carlligan Bay. It is well built, paved, and lighted; has a modern parish church, Presbyterian, Independent, Calvinistic, and Wesleyan Methodist chapels; a new large quay, a national and other schools, building-yard, a harbour, which admits vessels of 100 tons, and at which there

points sides of the axis, take in the E. part of the chain the name of Cols, and towards the centre that of Ports. No fewer than 75 are counted, of which 36 may be crossed on horseback and some in wheeled carriages. The most frequented are those of Portus and La Perche in the E. and St. Jean Pied de Port in the W. The nucleus of the chain is evidently granite, with the primitive schists which overlie it, constituting the loftiest summits, with the exception of Mont Ibañeta (11,149 ft.) and Macbrou (10,030 ft.), and some large adjacent masses which are formed of mountain limestone. The granite, however seldom forms continuous ridges along the principal axis, but rather appears in a number of remarkable protuberances situated to the N. of it. Above the micaceous schist and primitive limestone, which occur in connection with it, the largely-developed strata of argillaceous schist and transition limestone, forming two great belts parallel to the primitive chain, one on the N. and the other on the S. side. Above these secondary rocks appear, of which by far the most common is the mountain limestone, which occupies the greater part of the S. slope but on the N. side attains little elevation being there almost entirely confined to the lower heights at the bottom of the principal chain. Above the mountain limestone the principal rocks are Jura limestone and trap. The number of thermal springs existing in the Pyren. as seems to indicate the presence of volcanic agents but basalt and other rocks of igneous origin are very rare. The minerals of the chain include iron copper lead, zinc, manganese, antimony and cobalt. There is no trace either of silver or gold but particles of the latter are found in decomposed limestones and in the strata of several other districts. The only mineral which has hitherto been worked to any advantage is iron. Mineral springs both cold and thermal are numerous and much frequented by visitors. The limit of vegetation on the Pyrenées is about 600 ft. higher than on the Alps. The rhododendrons which in the latter are not found higher than 3000 ft. are here found at 5500 ft. and alpine plants are found on the loftiest summits. In regard to the region of perpetual snow. In the Pyrenées this is found only on the N. slope, where it does not, as in the Alps, form a snowy cone, the lower limit of which looks as if marked by a very almost horizontal straight line, but on the contrary forms large isolated masses the base of which is often concealed by the mountains in front of them. This makes it difficult to fix the snow line with precision but according to the most accurate estimate it is 9190 ft., or nearly that of Mount Cenis. Glaciers are not numerous in the Pyrenées and hence the torrents and rivers which rise in the chain are fed chiefly by springs. Those on the S. side flow towards the Ebro and are carried by it to the Mediterranean; those on the N. side flow partly to the Mediterranean and partly to the Atlantic the watershed between the two seas being not formed throughout by a central ridge but only westward as far as Lourdes, when the water shed changes its direction and is carried northward by a branch which ultimately joins with the Garonne. The largest river of the chain, and the only one of importance which preserves its name throughout its whole course, from its source to its mouth, is the Garonne. In respect of average height and mass, the Pyrenées is unquestionably the second mountain chain of Europe, but its least interesting point, Maladeta, has only the third place the first belonging to Mount Blanc and the second to the Corno di Milius in the Sierra Nevada in the S. of Spain which is nearly 200 ft. higher than Maladeta. Contrary to the general rule that the loftiest summits of mountain chains are found in the line of the principal axis, Maladeta, Posets (11,277 ft.) and Mont Perdu, the three culminating points of the Pyrenées are situated on the N. slope.

LYNNÉEN BASSES, or LOWERS PYRÉNÉES, a dep. France, bounded N. by dep. Gers and Landes, W. the Bay of Biscay and Spain, S. the Pyrenées, also separating it from Spain, and E. dep. Hautes-Pyrénées, greatest length E. to W. 84 m., greatest breadth, 54 m., area, 2808 sq. m. This department is formed in the S. by the lower slopes of the Pyrenées, and has a general inclination towards the N. W. Numerous ramifications extend over great part of the interior and give the surface a very diversified and often very picturesque appearance. The highest mountain is the Pic du Midi de Pau on the S. E., composed of a deep-grained granite. The whole department, with exception of a small portion

in the W., the waters of which are carried directly to the sea by the Ebro and the Nivelle, belongs to the basin of the Adour which receives in succession, proceeding from the E., the Léon, Gabas, Lay de France, Lay de Béarn, Oloron with its tributaries Osson and Aups, and the Basse-Adour. Of these rivers only the Adour, Aize, and Nivelle, which reach the sea, are navigable for a few miles above their mouths. The Pyrenées, forming the E. boundary give this department a N. exposure, and from the many mountains during which their highest summits are covered with snow continue to produce sudden changes, and send down currents of cold air after the season has far advanced. The worst thing in the climate is its variability, and hence it has been said that all the four seasons of the year are sometimes experienced here within the range of a single day. Hence catarrhs are frequent in spring and fluere in autumn. In the more mountainous districts potatoes are not uncommon. The soil generally is of very indifferent fertility and owing as much to its ruggedness as to its exposure, is not well adapted for cultivation. Not much less than one-half of the whole surface is waste, and little more than one-fifth arable. On this the principal crops grown are wheat, rye, barley, millet, flax, and maize, particularly the last two, of which the former furnishes raw material for the fine tissues known by the name of Béarn laines, while the latter forms the principal food of the inhabitants. The cereals produced fall far short of the home consumption the minerals too, notwithstanding indications of argentiferous lead, copper iron, cobalt, and sulphur, are of little economical importance, but these deficiencies are in some measure compensated by immense supplies of excellent timber, extensive forests clothing the mountain steep, and occupying more than one-sixth of the whole area of the department. Textile manufactures particularly that of linen, for which Béarn has long been famous have made considerable progress. Woollens also in the shape of flannel, common hoary table-covers, carpets and bonnets, are deserving of notice. The other principal articles are leather, paper, earthenware, quills, brandy and cream of tartar. The trade is in wine, brandy, liqueurs, resins, madders, chocolate, prepared skins, fine wood, thick leather, cotton twist, and printed cottons, tawber, horses, mules and cattle, hams and colonial produce. Much of this trade is contraband carried on with Spain. For administrative purposes Basse-Pyrénées is divided into five arrondissements—Pau the capital, Bayonne, Mauléon, Oloron, Orthez—subdivided into 40 cantons and 561 communes. Pop. (1852) 446,997.

PYRÉNÉES-HAUTES, or UPPER PYRÉNÉES, a dep. France, bounded N. by dep. Gers W. Basse-Pyrénées S. the Pyrenées separating it from Spain and E. Hautes-Garonne, length exclusive of a narrow tongue which projects N. W. between dep. Gers and Basse-Pyrénées 48 m., breadth, 45 m., area, 1790 sq. m. The surface, as the name of the department implies, is extremely mountainous. On the N. frontier are some of the loftiest summits of the Pyrenées, and even near its centre rises the Pic du Midi de Nivelle, 9567 ft. Much of this scenery is of the most magnificent description. The surface gradually lowers towards the N., but numerous lofty ramifications spread out in all directions enclosing between their ridges deep dells, and sometimes even spacious valleys of considerable fertility. A series of ridges stretching from N. to S. forms the principal watershed and divides the department into two unequal basins the larger on the W. and N. W. belonging to the Adour which as well as its important tributary Pau, here takes its rise, and the less on the E. and S. E. belonging to the Garonne which receives its waters chiefly through the Neste. The climate is very variable, but on the whole temperate. The rugged and mountainous nature of the surface is very unfavourable for agricultural operations; and hence little more than one-fifth of the whole is arable, and of this by far the larger part lies in the extensive and beautiful plains of Bagnères. All sorts of cereals are produced but the quantity falls far short of the consumption. The forests are extensive, and perhaps constitute the principal source of revenue in the department. The vine also is much cultivated on the lower slopes, and much wine of tolerably good quality is produced. About one-third of it is consumed at home, and the far greater part of the remainder is converted into brandy, leaving only a comparatively small portion for export. The meadows and pastures are in general excellent, and great numbers of horses,

well adapted for light armor, mules and asses, horned cattle, sheep, and swine, are raised. The best furnish the famous lambs of Bayonne, and are largely exported. Considerable attention is paid to the rearing both of poultry and bees. The minerals are of little importance. No metal with the exception of a little iron, appears to be wrought, but excellent quarries both of slate, granite, and marble, exist in several localities. Iron pyrites, hematite, and thermal arsenum occur, and the splendid black basaltic columns which surround them attract crowds of visitors. The principal manufactures are horreolaerie, sugar, linen crape, alpaca, leather outfitry, agricultural implements and linens. The trade is chiefly in butter and cheese honey, sheep, horses, mules, swine, lams, poultry clove and wood, including ship-timber. For administrative purposes, Haute-Pyrenée is divided into three arrondissements, namely, the capital, Argelès and Bagneres-de-Bigorre subdivided into 30 cantons, or 436 communes.

F. (1897), 251-264.

PIRENEAN ORIENTAL or **EASTERN PIRENEAN**, a deep France, bounded N. by dep. Aude, N.W. Arizès, S.W. and S. Spain, and E. the Gulf of Lion greater length E. to W., 68 m greatest breadth 35 m, area, 1671 sq. km. This department is hemmed in on the S. and W. by the principal chain of the Pyrenees, and traversed by ramifications, which taking the general direction of W. to E. divide it into several longitudinal and nearly parallel basins which discharge their waters into the Mediterranean chiefly by the Agly the Tet, and the Tech. None of them is navigable. The climate is represented as remarkably fine, but this representation must be taken with considerable allowance. It is true that the excessive heats of summer are often tempered by refreshing breezes, and that the keenest winter cold seldom descends far below the freezing point, but the summer is so hot and the autumn so commonly often miserably raining each other and blighting with equal fury from opposite directions, the S.E. or S.W. winds loaded with moisture maintaining a warfare with the N.E. or transhumane which is so dry as sometimes to shrivel up the alk. and both only ceasing from their strife to make way for the kind of sunmoon which Spain sends from the S. Not much less than one-half of the whole surface is waste, and the portion which remains for the plough brings considerably under one-fourth, is by no means of great natural fertility. But notwithstanding on the lower grounds where irrigation can be successfully applied the returns are so exuberant that the cereals produced both satisfy the consumption and leave a surplus for export. On land of this description three crops in two years—one of corn and two of madder—are not uncommon. The effect of irrigation is still more striking than in the case of the lower grounds, from which flows the Agly, the Tech, and the Tet, the waters from which furnish the best cuttings of madder. The annual produce of this madder, the fodder thus obtained as well as the natural pastures which are of great extent and excellent quality are employed in rearing vast numbers of stock, particularly horses, well adapted both for the farm and the road, mules, for which there is a

great demand from Spain, heretofore chiefly wine, and grapes. A considerable extent of surface is allotted to the culture of the vine, and several of the wines produced bear a high name. Among them may be mentioned Roussillon. The most important mineral of the department is iron, which is extensively worked, melted, and manufactured. The other principal manufactures are leather, broad-cloth, molasses, knitted handkerchiefs, &c. The principal cities are Narbonne, and Carcassonne. The departments bordering on the Pyrenees, which is the most commercial. The exports in value far exceed the imports and consist chiefly of wine, brandy, woolen stuffs, Spanish linen, Bayonne hams and other salt provisions, swine, sheep, horses, mules, iron, and marble. For administrative purposes, Pyrenees Orientales is divided into six arrondissements, viz. Perpignan, the capital, Carcassonne, Narbonne, Béziers, and Prades. It is divided into 17 cantons, and 227 communes. Pop. (1826), 181,965.

 pearance of industry and activity and at the neighbouring
 port of Katacolle a considerable trade in country produce and
 European manufactures is carried on

PYKILL, a tn Prussia, gov and 24 m S E. Stettin on an affluent of the Pise. It is walled, flanked with towers entered by three gates; has several courts and public offices, two churches a townhouse, and three hospitals; a fishery, and a trade in cattle. Near it is a fountain in which, in 1124 Otto of Bamberg is said to have baptized 7000 Pomeranians. Pop 5320

PYRMONT a celebrated watering place, Germany, principally Waldeck, cap. dist. in a beautiful valley at the foot of a range of finely wooded hills 1 built Emmer 34m. S. S. W. Hanover. It is a small but well built place, with several fine promenades, and consists of an open square and a long street lined with Linden trees. It contains a palace, in which the Prince of Waldeck resides during the watering season and a very complete bathing establishment, which is much frequented particularly by the aristocracy of Germany. The water is chiefly chalybeate, possessing valuable medicinal properties, it is strongly impregnated with carbonic acid gas and produces an exhilarating and even intoxicating effect. About 260 000 bottles of water are annually exported. One of the curiosities of the place is the Mount Hühle, or gas grotto, which emits vapours similar in nature and effect to those of the Grotto del Can in Italy. A railway is laid to the village of Kassel, 12 m. distant. The bathing establishment has the usual accommodations of theatre, ball-rooms, gaming-tables &c. The district is covered with hills, elev. 3700 feet. *J. A. 1841*

QUANGSEE, or **KWANGSEE** (*Broad Water*), a prov. China, bounded N by Kweichow and Hoonan, E. Quangtung, S. Quangong and Tonquin, and W. Yunnan, lat 21° to 28° 20' N. lon. 104° 55' to 113° 35' E. area, 78,300 sq m. It is mostly mountainous, and incapable of cultivation; but along the banks of the Tchoa-kiang and its tributaries, by which it is watered great quantities of rice are cultivated. Among other products are, opium, castor-oil, salt-stones, and cabinet-woods. The province has no manufactures of importance, but is rich in mines of gold silver, quicksilver and other metals, most of which are worked under the superintendence of government. It is one of the least-populated of the Chinese provinces, and is inhabited by many partially-civilized tribes. Kwe-li-fou is the capital, but Wuchow-fou is its largest and most important trading town. Pop. 7,111,895.

QUANGTONG or **KWANGTUNG** a maritime and the most S. prov. China lat. 20° 12' to 2° 30' N lon 107° 55' to 117° 15' E. bounded N by Kiangsoo and Hoonan, N E by Fokien S. by the China Sea and the Gulf of Tonquin, and W and N W by Quangsee area, 79,456 sq m. The surface is extremely variable, being mountainous in the N. but for the most part fertile. The principal products are, fruits, rice, silk, sugar, tobacco and vegetables. Lead iron, and coal are also abundant. The manufactures are extensive embracing lacquered wares, and grass, cotton and silk cloths. The extensive sea coast is deeply indented with bays, which with the famous Canton, and other rivers, afford great facilities for commerce. Along the coast are scattered an immense number of islands, and among which is the large island of Hainan. The capital is Nankoo other important towns are Amoy, Shanghai-fou, and Shanghai-fou. Pop. 19,147,080.

QUARA, a maritime in Japan, Isl. Nippon, on Owari Bay 60 m. E. Miako.

QUANTOQ HILLS, a mountain range, England, co. Somerset, extending from Watchet, on the Bristol Channel to near Taunton greatest elevation 1428 ft.

QUAN FOXHEAD two pars. Eng. Somerset:—1 (East), 2582 ac. Pop. 281 —2 (West) 1491 ac. Pop. 250

QUAREGON a vil and com. Belgium, prov. Hainaut 4 m. W. by S. Mons with a church chapter-house, two public schools, a philanthropic society an iron-foundry three breweries, two distilleries, and several flour-mills, manufactures of leather, clay pipes, and brass vessels and a trade in coal obtained in the vicinity. Pop. 4712

QUAREMONT a vil and com. Belgium, prov. E. Flanders, 30 m. S.E. W Ghent. Loom weaving and agricultural wares are carried on. Pop. 2050

QUARFF BAZEMAY and RHYRA a par Scotland, co. of Orkney and Shetland, on the Mainland of Shetland, ½ in S.W. Lerwick Pop. 1612 **St. BERNAY BASSA**

QUARGHENTO a vil and com. Italy 1 mi. N. of Alghero, near Porto Cervo with a church two oratories and the remains of an old castle. Pop. 2410

QUARITZ, a to Yunnan, gov. and N N W Luegita with a castle, two churches, old works, and several mills. Pop. 1484

QUARLEY par Eng. Hants 1063 ac. Pop. 179

QUARNDON, par Eng. Derby 960 ac. Pop. 529

QUARVERO, a gulf of the Adriatic, between Myra and the shores of Military Croatia greatest length, from N to S. about 27 m. breadth, 21 m. It is formed by the islands of Veglia and Cherso, between which and the opposite coasts three navigable channels communicate with the open sea. The coasts of the gulf are generally steep, and the navigation is often rendered dangerous by violent storms, but there is good anchorage at various points. The chief sea port is the gulf of Fiume.

QUARVILL, a to France, dep. Nord, 5 m. N.E.E. Valenciennes, on the Belgium frontier, with manufactures of sherry beet-root sugar and animal black. Pop. 2226.

QUARRENDON, par Eng. Bucks 2080 ac. Pop. 64

QUARRI, or **KWARRI**, a to Central Africa, Housa, 70 m. E. Sokoto, on the road from it to Kano. It is enclosed by an earthen wall. Pop. about 6000 Fulae.

QUARRINGTON par Eng. Lincoln 1620 ac. P. 346.

QUARTO a vil and com. Italy Piedmont, div. and 8 m. E. Aosta, l. bank Doce, with a court of justice, and six churches. Pop. 3078

QUARTEN, a vil. and par Switzerland, com. and 25 m. S.E. W. St. Gall on a mountain spur above the Lake of Walenstadt; and contains an old church. In 1455 the Swiss here defeated the Austrians. Pop. 1535

QUARTO, a river. La Plata, rises in a mountain range, lat. 31° 30' S. in the W. of dep. Cordova, flows S.E. and disappears among marshes, after a course of about 300 m.

QUARTU a to. rd. Sardinia, 3 m. E.N.E. Cagliari, on an unhealthy plain near the bay of same name. It has extensive salt-works on the lagoons which line the shore. P. 5129

QUARTUXIO a vil. and com., Isl. Sardinia, div. Cagliari, in the vicinity of Quartu. Pop. 1719

QUATFORD par Eng. Salop; 1812 ac. Pop. 692

QUATILAMBA, KATILAMBA, or DRAKENBERG, a mountain range, S. Africa, which stretches to E. along the W. frontier of Natal, presenting very rugged precipices towards the E. but descending very gradually on the W., so as to form the abutments of an elevated table-land. In the S. where loftiest, they attain the height of at least 8000 ft., and are covered with snow for more than four months, in proceeding N they descend near their centre to 5000 ft., and finally merge into hilly ridges and plateaux. To the numerous perennial streams issuing from them, Natal is indebted for much of its fertility.

QUATRE-BAS, a vil. Belgium, prov. S. Brabant, 30 m. S.E. Brussels, became celebrated for the battle fought here two days before that of Waterloo, and in which the Duke of Brunswick fell.

QUATRLS Fkaks, or **FOUR BROOKS**, a group of islets, Kiritia Islands, between Rinnair and Urup they are more barren lofty rocks and though originally supposed to be four they are only three in number. The most E., called Teetepoo or Torpoo is an extinct volcano.

QUATT MALVERN par Eng. Salop 2074 ac. P. 356

QUATRO-VILLE, four separate vils. kmpl. of Italy, gov. Naples, near Marina. They form a single commune. Pop. 2504

QUAZZULO a vil and com. Italy Piedmont, div. and 21 m. N.W. Turin in a small valley of the Tesso, with a church and a beltry which rises conspicuously from an isolated rock. Pop. 8652

QUEBEC, the capital city of Lower Canada, l. bank St. Lawrence, which is here about 1 m. broad, at the confluence

QUEBEC.—From the Citadel, looking down the St. Charles River.
From Capt. Angell's Sketches in Canada.

of the St. Charles, 140 m. N.E. Montreal; lat. (N.E. location) 46° 45' 0" N., lon. 71° 15' 45" W. (n.) The city is

a third of the inhabitants of the city bosonum. The winter in Quebec is as severe as in the centre of Russia, and the summer is as warm as in the S. of Italy. The inhabitants are mostly of French descent: the French language is that chiefly used, and the large majority profess the R. Catholic religion. Pop. (1852) 42,052. (MacKay's Canada Guide. Private information.)

QUEBRODO, or **CANARON**, a vill and par Briml, prov Pernambuco, 1 bank São-Francisco, 275 m. W N W Fort-tigore with a church. It raises a good deal of cotton and exports great numbers of cattle. Pop. 3,000.

QUEDA Malay peninsula. See Kewat.

QUEDEBURY par Eng. Gloucester 1458 ac. P. 401
QUEDEBURY, a tn. Prussia, gov. and 85 m. S. W Magdeburg on the Elbe. It consists of the old and new towns. It is walled, flanked with towers, and entered by 10 gates has three suburbs, and is a dull manufacturing place. It contains seven Protestant churches, of which the Markt kirche, built in the old German style, and the St. Servat-

and in a few places marble is obtained. The soil is fertile, excepting where bogs occur; but there are pretty numerous towards the centre of the county. Principal rivers, the Barrow and Mors, both of which have their sources in the Elbe-Bloom Mountains. There is only one lake in the co. Loosch Amagch length about 1 m. Agriculture is not generally in an improving state drainage, in particular being much wanted. The principal crops are wheat, oats, barley here and rye, potatoes, turnips &c. A good deal of inferior cheese is made for the Dublin market. The co. is divided into 11 baronies, and 58 par. Principal towns—Mountpellet Mountroth, and Maryborough. It returns three members to Parliament, two for the co. and one for the bor. of Portlinton. Pop. (1841) 158,880 (1851) 111,624.

QUEENBOROUGH, a tn. and par England, co Kent, on the lile of Sheppey 2 m. S. Sheerness, with a church, and an Independent chapel, inhabitants employed in fishing and oyster-dredging. Area of par 500 ac. Pop. 773

QUEENBOROUGH par Eng. Leicester; 1890 ac. Pop. 586

QUEENSFERRY two tns. Scotland—
1 (South) A royal burgh, seaport m. and par co. Linlithgow, S. side, Firth of Forth, at a point where the latter suddenly narrows, again to expand to a width of 2 m. to 3 m. 8½ m. W by N Edinburgh. The inhabitants are principally engaged in fisheries, but a considerable traffic also arises from the conveyance of passengers across the ferry. Until the erection of the Granite and Barnhulch piers, and the completion of the Edinburgh and Granite, and Edinburgh and Northern railways, this ferry was the most important from the metropolis to the N. of Scotland Pop. 720.
—2 (North) A vil. co. Fife, 6 m. S.S.E. Dunfermline, N. shore, Firth of Forth opposite R. Queensferry. It is frequented for summer and sea-bathing quarters. Pop. 461

QUEENSTOWN formerly Cove a maritime town to Ireland prov Munster co. and 9 m. S.W. Cork, N. side of Cork harbour, lat. 54° 51' N, lon. 8° 18' 45" W. and on S. side considerable elevation. The streets are chiefly southward, and present a very picturesque appearance: they are wide clean and well paved and the houses in the principal streets are mostly large, of stone, and well built. It has a handsome church R. Catholic chapel, Methodist meeting-house several schools, fever hospital and a dispensary a club-room, two reading rooms, and a large handsome market house. About 60 years ago, Cove was a mere village, consisting of a few scattered houses. Its rapid increase has proceeded principally from its convenient situation for the shipping in Cork harbour. Cove has little trade and no manufactures, being almost solely dependent on the military and naval establishments in its vicinity and on the numerous visitors attracted by the singular beauty of the place, and by its delightful climate. In honour of Her Majesty's visit to Cove in 1849 the name of the place was changed to Queenstown. Pop. (1841) 5142 (1851) 11,428.

QUEGUAY, a river Uruguay which falls into the Uruguay, 13 m. above Paysandú, after a W N W course of about 120 m. Principal affluent, the Quimbacho.

QUEICH a river Rhénish Bavaria, rises in a branch of the Voges, flows S.E. past Lautau; and after a course of about 35 m., the greater part of which is navigable, joins I. bank Rhine at Gersheim.

QUEIMADA ISLES, two isls. Brazil, prov São-Paulo; lat. 24° 35' S, lon. 46° 40' W. (s.)

QUEISA, a river, Prussia, prov Silesia, rises N. side, Kienigsberg, on the frontiers of Bohemia, 70 m. W S W Breslau, flows N past Landau, and joins I. bank Bobr, 6 m. W Spottau. total course, 70 m.

QUEL [anc. Yae and Sae], a tn. Spain, Old Castile, prov. and 30 m. S.E. Logroño, I. bank Gilega, at the foot of a lofty peninsula crowned by the remains of a castle. It has a suburb a school, some manufactures of linen, an oil and a flour mill, numerous distilleries, and a trade in brandy, oil, and wine. Pop. 1867.

QUEENSBURG From Bridge, Lancaster, Hesse and French Boundary.

church, are the most curious and handsome a townhouse, gymnasium, a poorhouse, orphan asylum, and several hospitals. On an eminence above the town is an old castle, once the residence of the Abbess of Quedlinburg who as princess of the Empire, had a vote in the Diet, and a seat on the bench of Rhenish bishops. One of them was the mother of the celebrated Marshal Saxe and mistress of the king of Saxony. It manufactures woollen and linen goods, meta, leather matches soap tin articles paper oil vinegar and other and has best root sugar works, and numerous mills and distilleries. The poet Klopstock was born here. P. 14,222.

QUEEN two par. England. Somerset.—1 (Central); 2492 ac. Pop. 773.—2, (Chewton) 955 ac. Pop. 177

QUEEN CHARLOTTE ISLANDS, See CHARLOTTE.
QUEEN CHARLOTTE SOUND N Pacific Ocean, separating Vancouver's Island from the mainland of British America on the N. and forming the commencement of a long series of inlets continued along the N. and E. of that island. Cape Cato, in the N.E. limit, is at lat. 51. 12' N, lon. 137. 57' 30" W. The navigation is dangerous from the Virgin and Pearl Rocks, the prevalence of fogs, and the violence and irregularity of the tides.

QUEEN ELIZABETH FORSLAND an isl. British N. America; lat. 65° 30' N; lon. 69° W

QUEEN'S COUNTY an island co., Ireland, prov Leinster, bounded, N. and N. by King's co., E. Kildare and a detached portion of King's co., S.E. Carlow S. Kilkenny, and S.W. Tipperary, length, N to S. 38 m. breadth, 37 m.; area, 664 sq. m., or 424,864 ac., of which 242,452 are arable. The surface is generally flat, rising in the N.W. into the Silver-Bloom Mountains, whose highest summit, Ardara, is 1734 ft. above sea-level. In the S.E., are the Dyers' Hills, consisting chiefly of a series of isolated eminences. The soil is composed principally of sandstone, and a part of the second of the softest sandstone, which are largely developed in the S., and extensively worked. Iron, copper, and manganese are found, but not worked. Limestone strata;

QUELIN, a city, China, cap. prov. Quansung, on a branch of the West river, in the N. E. part of the prov.; lat. 25° 12' 12" N. lon. 110° 40' E. It is poorly built, has no note-worthy edifices and little trade.

QUELPAERT an isl., N. Pacific, about 80 m. S. E. Cape Providence, the most E. point of the peninsula of Corea lat. 35° 39' 40" N. lon. 126° 53' 4" E. It is decidedly volcanic, the entire S. side being either close-grained gray or greenish basalt, or a scoracious tuff. In the center, or nearly so, rises Mount Anukland, the loftiest peak, about 8544 ft. high, when free from clouds, its summit has the appearance of the lip of a small crater, but evidently long since dormant from the abundance of trees growing near to its edge. When viewed from the sea the island presents a pleasing variety of hill and dale the N and E sides being cultivated to the height of about 3000 ft. All the higher parts of the island are covered with thick forests of pines and other northern trees. The soil is very poor. The principal products are wheat, barley, rice, maize, the sweet potato and the large Russian wildflower. Quelpaert is supposed to be one of the penal settlements of Corea, which may account for the variety of races observable among the inhabitants, as well as for the gross and filthy manners of the people. The construction of the houses is similar to that of the people of Lee-Choo, those in the cities are roofed with red tiles, which, they say, are brought from the continent those of the lower orders are thatched. They are surrounded by stone walls about 6 ft. in height, so as to form a perfect inclosure. The people have but few sailing vessels, and these are miserably constructed they frequently make use of rafts. The capital city of Quel paert stands in a broad, barren valley about the centre of the coast-line having a conspicuous flat eminence on its E. side and a small river on the W. The city walls are apparently of European design being unlike the works of China and Lee-Choo and exhibit satisfactory evidence of a knowledge in the projector of the art of defence. They are 35 ft. high, built in the form of a parallelogram, the longest side is next the sea, measures 500 yards, and contains seven bastions with embrasures throughout, but only a few sufficient guns. At right angles with the sea, the wall front measures 200 yards. The main gates, which are inland and seaward, are in recesses formed by two of the bastions, with apparently an additional gate on the E. angle. Along the coast are various small islets, some of them well wooded but there is only one good anchorage that on the N. side, opposite the city—(Sir F. Balcarras *Voy. Sumatra*).

QUELWZ, a in Brazil prov. Minas Gerais 25 m. S. E. Rio-Prato, 3000 ft. above sea-level. It has several streets, but with exception of the townhouse, the houses are built of earth. Inhabitants chiefly miners, but some are employed in rearing cattle, or cultivating millet.

QUENDON par Eng. Essex, 645 sq. Pop. 199

QUENTINGTON par Eng. Gloucestersh; 1830 ac. P. 369

QUENTIN (Str.) [anc. *Augusta Veromandorum*] a town in France, dep. Aisne, on the top and partly on the slope of a hill whose base is washed by the Somme, 87 m. N. E. Paris with which it is connected by railway. It consists of the town proper and three suburbs. The former was once fortified, but the ramparts have been thrown down and converted into a promenade. The principal streets are spacious and the houses well built. The buildings most deserving of notice are the cathedral church, one of the finest, purest, and most majestic Gothic structures in this part of France the townhouse, also Gothic, supported by eight pillared arches, which form an arcade and surmounted by a tower, the Church of St. Jacques, public library of 14,000 volumes, infirmary several hospitals, a courthouse, and theatre. The manufactures, particularly of cotton and linen tissues, are very important; and the environs are covered with extensive fields of clover. The trade, in addition to the staple manufactures, is chiefly in corn and fruit, wax, liquors, and colonial produce. St. Quentin has a court of first resort and commerce, a commerce school, communal college, academical society of sciences, and a consulting chamber of manufactures. It is a place of great antiquity and bums on the frontiers between France and the Low Countries, makes an important figure in the wars between the French and Spanish monarchies. A battle was fought under its walls in 1657, between the French and the Spaniards; the latter, who were greatly aided by a body of

English troops which Mary had sent to the assistance of her husband, Philip II., gained a complete victory, and afterwards made themselves masters of the town. Pop. 23,318.

QUENTIN (Str.) a town France, dep. Gard 2 m. N. E. Uzès with manufactures of crucibles, earthenware; brick works and an oil work. Pop. 1994.

QUENU, an isl. E. coast, Chili and N. E. of Isl. Chiloé lat. 43° 46' S. lon. 78° 10' W. separated from the island of Chiloé, on which the town of same name stands, by a channel which is 2 m. wide, and in its centre has a depth of 31 fathoms.

QUERASCO See CHENAMCO.

QUERBACH, a vil. Prussia, prov. Silesia, gov. and 35 m. S. W. Lagnitz. It has manufactures of Prussian blue and of articles of turnery a bark and two saw mills cobalt is worked in the vicinity. Pop. 1011.

QUERGETA a vil. and par. Tuscany comp. Pise about 2 m. from the sea-coast. It has a handsome church, in the form of a Greek cross, with a dome, and an house which attracts numerous pilgrims and a trade in oil, corn, and maize. Pop. 3465.

QUERCY [anc. *Quercetum*] an anc. prov. France, now included in dep. Lot and Tarn-et-Garonne. It was divided into Upper and Lower Quercy Cahors was its capital.

QUERETARO a dep. Mexico bounded, N. by dep. San Luis Potosi, W. Guanajuato S. W. Michoacan, E. and E. Mexico, and N. E. Vera Cruz state, 2444 sq. m. It forms part of the central plateau of the Cordilleras, presenting a very rugged surface, traversed by mountain spurs and lofty heights, sometimes bare and sometimes covered with forests, and though no angle summit is of remarkable character the scenery is often romantic in the highest degree. Its rivers are few and almost all of insignificant dimensions, the only two deserving of notice being the Tula or Rio-de-Montesuma, which separates the state on the E. from those of Mexico and Vera Cruz and the Rio-Fuiz which has cut a deep bed in the porphyry near San Juan del Rio. The most important vegetable product is grain, which is raised in large quantities, and together with cattle forms the chief wealth of the state. The minerals, once famous, are now comparatively unimportant, though 216 mines are still counted including 5 of gold, 193 silver 7 copper 1 lead, 1 tin 6 quicksilver, 2 antimony and 1 jaldre. Manufactures have made considerable progress and many woollen and cotton fabrics are woven from materials produced within the state—the former from the Lana de Chihuahua, and the latter from a species of cotton much used in the manufacture of a favourite kind of mantas, shawls, and robes. To spin the cotton, and also in part to weave it, two factories have been erected producing weekly 10,000 the cotton twist, and 400 pieces cloth. Queretaro is divided into six districts—Querubim, San Juan del Rio, Cadeyeta Santa Maria Amelco, San Pedro Iolman and Jalpan. Pop. (1850) 184,161.

QUERT PARK a city Mexico cap. above dep. on a plateau 6365 ft. above sea level 119 m. N. W. Mexico, on the sides and summit of several converging hills. It consists of the city proper and suburbs, separated by a small stream, and presents an appearance as one imposed on plateau, being perhaps, after Mexico, the finest city of the Confederation. It is built with great regularity all the streets stretch at right angles from three large squares. Many of the private buildings are not only substantial but elegant, and among the public edifices, particular notice is due to the principal church a magnificent and richly-decorated structure and a noble aqueduct, about 2 m. long, spanning a plain, with arches 90 ft. high and by communicating with a tunnel in the opposite hills, bringing a copious supply of excellent water from a distance of 6 m. Its manufactures, though greatly declined, make considerable quantities of woollen and cotton goods, horse covers, articles in leather, sugar, &c. Its trade after suffering much from the unstable state of the government, has begun to revive. The peace between Mexico and the U. States was ratified here, by the Mexican Congress, in 1848. Pop. 59,702.

QUERFURT a town, Prussia, prov. Saxony, 18 m. S. W. Halle, on the Querubach. It is surrounded with walls, and has an old castle, three churches, a superior higher school and two hospitals, provincial and city courts, manufactures of saltpetre, a trade in horses and cattle, and several mills. Pop. 3687.

QUERIMBA ISLANDS, a chain of isls., E. Africa, Mozambique Channel belonging to the Portuguese territory of Mozambique between Cape Delgado and Pemba Bay; the fort, near N. part of Querimba Island, the most S. of the range, is in lat. 12° 28' 45" S. lon. 40° 38' E. (a). The principal islands are Amata, Yumbia Kanga, Mstemo, Ibo, and Querimba; all of them low, fertile of coral, with long flat reefs extending E. and having excellent harbours, but only a few of them inhabited. The town of Ibo, the Portuguese frontier post to the N., is well fortified.

QUERO, a river Central America, which rises in the state of Guatemala flows N., and after a course of above 50 m., falls into the Bay of Honduras.

QUEROZOLA, a vil. ducy and 18 m. S.W. Modena, celebrated for the petroleum springs in its vicinity.

QUESADA, a to. Spain, Andalucia, prov. and 88 m. E. Jaen. It is poorly built, has a church, a large courtyard, a tower, forming part of an ancient fort, and now used as a prison, a school, an hospital and manufactures of white soap, several oil and flour mills and a trade in corn, oil, wine, and fruit. Pop. 4508.

QUESALTENANGO a to. Central America, state and 88 m. W.N.W. Guatemala, cap. dep. of its name. It ranks next to the capital consists of regular and paved streets, and houses which are well though somewhat fancifully built and has a large and imposing church with a richly decorated front, a handsome balcony, and several other architectural edifices and an extensive trade in wheat, cotton, sugar, and woolen and cotton fabrics. Pop. about 20,000.

QUESALTEPEQUE, a to. Central America, state and 88 m. E.N.E. Guatemala, dep. Vera Paz. Pop. about 4000.

QUESNOY (La) [see *Quercy*] a to. France, dep. Nord, 87 m. S.E. Lille. It is walled and otherwise fortified in general well built, has an interesting parish church, handsome townhouse and several manufactures of nails, and calico, breweries, tanneries, and cotton-mills and a trade in corn, fax, hemp, iron, horses, and cattle. Pop. 8106.

QUESNOY (see *Quercy*) a to. France, dep. Nord, 7 m. N. Lille, on the Basses Doubs canal, with manufactures of starch from chamo, sails, iron pots, and arvizis; oil works, beet-root sugar-refineries, breweries distilleries, flour and falling mills and a trade in coal and fax. Pop. 1837.

QUERFEMBERT a to. France, dep. Morbihan 14 m. E. Vannes. It is an old place, for the most part poorly built has manufactures of leather and a trade in butter. Pop. 1020.

QUETTRICK, par Eng Cornwall 4531 ac. 1 777

QUETTA, a to. Beloochistan. See *Suwa*.

QUEVAUCAMPS, a vil. and com. Belgium, par Hainaut, 12 m. W. by N. Mons with a church, chapter-house, school, and some woollen weaving but the export of black marble, quarried in the vicinity, forms the chief trade. Pop. 2237.

QUEVILI Y (Perry) a vil. France, dep. Seine-Inférieure, 8 m. S.W. Rouen, near r. bank some with manufactures of chemical products and machines rope-walks, a dye-work, wax-refinery, bleachfield, and several cotton-mills. Pop. 2544.

QUEZALTENANGO. See *Quetzaltenango*.

QUI, a to. N. Asia. See *Far East* *Texas*.

QUIA, a district, W. Africa, between the Sokoto and Cameroons rivers, immediately E. of Nkora-Lema and consisting of a rich alluvial flat of about 1200 sq. m., on which large crops of maize, rice, and yams are raised.

QUIALBO, commonly called *Chama*, a vil. Dominicans Republic, E. end, at height about 90 m. E. by N. the city of Santo Domingo. It is a small place at the mouth of a stream of same name which is partially navigable. Off it is an open roadstead, with good anchoring ground in 8 to 9 fathoms.

QUILAK, a to. and par Portugal about 25 m. from Coimbra. Pop.

QUILIXA, a to. New Granada. See *Orizaba*.

QUIBENOU, a peninsula, France, which projects S. from dep. Morbihan into the Bay of Biscay for about 7 m., with an average breadth of 3 m., and includes a large and well-sheltered bay defended by batteries on the shore and the fort of Penfithy, which, with the village of Quiberon, forms a fortress of the fourth class.

QUIBIA, an isl. New Granada, S. coast, dep. Veraguas; lat. 7° 20' N. lon. 81° 40' W.; in the form of an irregular

cruscent, 19 m. long, N. to S. with an average breadth of about 7 m. It is low flat, and covered with dense forests. Wild animals including deer, monkeys, tigras, and venomous snakes, abound; and the surrounding sea is full of alligators, sharks, and gigantic rays. The pearl-fishery was at one time valuable, but has long been abandoned. Quibe was in early times an important station of the Buccaneers and English ships of war from its proximity to the principal field of action against the Spanish galleons.

QUICARA, or *Hicaron*, a group of small isls. New Granada, in the E. Pacific, E. of Quibo, and near the W. entrance of Montijo Bay lat. 7° 10' 50" N. lon. 81° 45' 18" W. The whole group is only about 5 m. long, N. to S. The largest is irregular in its surface, and has on its E. side a hill 830 ft. high, and is well wooded with forest trees.

QUICHE, a market to. Central America, state, and 25 m. N.W. Guatemala. Pop. 2500.

QUIDDEHAM, par Eng Norfolk 1126 ac. P. 109

QUIEVRAIN, a vil. and com. Belgium par Hainaut, 12 m. W.W. Mons with a spacious church a school manufactures of linen and woollen fabric, tobacco, cheese, leather oil, &c. breweries, corn-mills, and a salt-refinery. Pop. 2341.

QUIEVY, a vil. France, dep. Nord, 11 m. P. Cambrai, with several breweries, and extensive manufactures of linen and cotton goods. Pop. 2917.

QUILLANGO, or *Quimasso*, a vil. and com. Italy Piedmont, dep. Aosta, prov. and near Biella. It consists of mean houses, and narrow uncommodious streets, and has a church and a Capuchin convent. Two sanguinary battles were fought here in the beginning of the present century between the Austrians and French. Pop. 3025.

QUILLEBOE (F. Latin *Guellobotum*) a to. France, dep. Eure, 7 m. N. Pont-Audemer, l. bank Seine 10 m. above its mouth lat. (high) 49° 28' 24" N. lon. 0° 31' 42" W. (a). It is in general poorly built, but has an excellent harbor in which the larger vessels that cannot moor to Rouen usually anchor or discharge part of their cargoes. manufactures of cotton-hosiery and less a valuable fishery and a trade in corn, cattle, and timber. Pop. 1447.

QUILLIMANK, a maritime to. E. Africa, Portuguese territory of Mozambique l. bank Quillimank river the most N. arm of the Zambezi and 15 m. from its mouth lat. 17° 51' 48" S. lon. 37° 1' E. (a). It is built on an unhealthy marsh and without any regard to regularity and consists of several substantially built brick houses and numerous huts built of reeds, and thatched with coarse grass. The only public buildings are a small church and a number of sheds in a long quadrangle including the custom house, barracks, and prison. Quillimank is visited by numerous vessels, and carries on a brisk trade in gold and ivory. Pop. (including country for a few miles around) about 15,000.

QUILLOTA, a to. Chili prov. Aconcagua, in a beautiful and fertile valley 28 m. N.E. Valparaiso. It was founded in 1728, and has since suffered severely on different occasions from earthquakes. The copper-mines in the vicinity are regarded as the richest in Chili. Pop. 8000.

QUILLO, a to. E. Africa. See *Kilwa*.

QUILON, a seaport, Hindostan. See *Cochin*.

QUIMPER, or *Quimper* (*Quimper* [see *Vapourum* Norm]) a to. France, cap. dep. Finistère, at the confluence of the Odor and Eir 184 m. N.W. Nantes. It consists of an old and a new town, the former is surrounded with walls flanked with towers, but the houses are very poorly built; the latter contains a number of good mansions, particularly along the quay which fronts r. bank Odor, and forms a harbor accessible by vessels of 200 tons. The principal public edifices are the cathedral a fine Gothic structure of the 15th century, with a richly-sculptured portal between two massive towers the church of the Cordeliers, and adjoining edifice, both in ruins the prefecture the college, an extensive building which formerly belonged to the Jesuits the military hospital, theatre, &c. Next the prefecture a rocky mass rises to the height of 650 ft. covered with trees and shrubs. The top, which is flat has been formed into an excellent promenade. The manufactures consist of felt and cardenware, leather, and beer. There are also building yards. The trade is important, chiefly in corn, wine, brandy, wax, honey, butter, meat, dried and salt fish, iron, wool, hemp, fax, linen, horses, and

castles. The fishing of marlons is extensively carried on. Quimper is the see of a bishop, has a court of first resort

QUIMPER CATHEDRAL.—From Fort La Touraine.

and commerce, a consulting chamber of manufactures a diocesan summary secondary ecclesiastical school and communal college. Pop. 1832 9604.

QUIMPERLE [see *Kemperlewee*] a tn France, dep. Finistère, at the junction of the R16 and laule, 67 m. S.E. Brest. It is surrounded by lofty hills has a court of first resort agricultural society a Gothic church an Lruoline and a Capuchin convent, and a communal college manufactures of cloze, several tanneries, and paper-mills and a trade in corn, cattle, leather paper, &c. Vessels of 150 tons ascend into the heart of the town and discharge their cargoes at a broad quay lined with warehouses and handsome dwelling houses. Pop. 3981.

QUIN var *Irel* Clare 9362 ac. Pop. 2547.

QUINCINETTO a vil and com Italy Piedmont div Turin prov and 9 m N.W. Ivrea with a handsome church, and two public schools. Pop. 1460.

QUINCY two tns., U States.—1 Illinois 1 bank Mississippi 170 m. N.W. St. Louis. It is laid out with great regularity, well built, has a spacious public square, four neat churches a courthouse, various manufacturing establishments including saw and flour mills, and an extensive and rapidly increasing trade. The haven is one of the best ocean boat landings in the Mississippi. Pop. (1850) 691.—2 Massachusetts, on Braintree or Quincy Bay a branch of Boston harbour and on the Old Colony railway about 7 m. S. by E. Boston. It is well built and well kept, has a handsome stone church a townhouse forming a noble granite structure several academies and schools manufactures of shoes and other articles in leather, carriages, harness, coach lace, hats &c., but the most important and lucrative employment is the working of the quarries which furnish the well known Quincy granite, of which some of the finest edifices in the U States are constructed. The fisheries also are important, and a considerable number of vessels are fitted out in the building-yards. Quincy numbers among its natives the two presidents, John Adams and John Quincy Adams, father and son. Pop. (1850) 5017.

QUINDICI a tn. Naples, prov Lavoro, 7 m. E. Nola, in a valley. Pop. 8410.

QUINDIU a Cordillera of the Andes, in the S.W. of New Granada, stretching in a N.W. direction from that of

Guacanes to that of Erro and forming part of the main chain which divides the waters of the Magdalena from those of its principal tributary the Cauca. Its culminating point, Tollima, has a height of 16 176 ft.

QUINGEVOLE a vil and com kingdom of Italy prov Mantua, 6 m. W. Rovere, between r bank Po and r bank Nocechia. Pop. 2086.

QUINON an excellent harbour E. coast, Anam, 145 m. S.S.E. Thour. It is narrow at the entrance, but safe and commodious, being almost completely landlocked. About 10 m. from the harbour is a town of some name.

QUINSIGAMOND or **LEGE POND**, a lake, U States Massachusetts, about 30 m. W.S.W. Boston. It is a beautiful sheet of water in the form of a crescent, about 4 m. long by 1 m. broad, and in some parts 9 ft. deep. It contains 12 islands. This lake is the chief feeder of the Blackstone canal.

QUINTANA, a tn Spain, Estremadura, prov and 64 m. S.E. Badajoz with a townhouse, prison, a handsome granary three schools, a church and a hermitage some weaving in common linen, and several flour-mills. Pop. 3406.

QUINTANAR DE LA OROSA, a tn Spain, New Castile, prov Toledo, 68 m. S.E. Madrid. It has two large squares a large and well-built townhouse a house for the public weigh and measures, a granary small prison four schools and an advanced secondary a church and several hermitages five soap-works oil flour, and chocolate mills brick and tile kilns and manufactures of blankets, counterpanes ropes, &c. and a much frequented market. Pop. 5656.

QUINTANAR DE LOS RIOS, a tn Spain New Castile, prov Cuenca 118 m. S.E. Madrid on the Valdeguera. It has a townhouse prison substantial and elegant granary two schools a church and five hermitages manufactures of augers of excellent quality, a flour and several oil mills. Pop. 2919.

QUINTANILLA, numerous small places, Spain. The only one deserving of notice is *Quintanilla de la Orosa*, prov and 18 m. W. Leon with a church and a school. 1 1269.

QUINTIN a tn France, dep. Charente Nord, 10 m. S.W. St. Julien, on the Gironde with a cathedral a townhouse, and a handsome chateau, built on the ruins of an old castle and manufactures of fine henn a paper-mill blast-furnace and a considerable trade in linen wax, honey, calf skins, coarser hats, catia, &c. Pop. 3814.

QUINTIN SAX OF MEDTOWA a vil Spain Catalonia, prov and 35 m. from Barcelona with a church courthouse, school manufactures of cotton twist and paper several flour mills, and a distillery. Pop. 1318.

QUINTO a vil and par Switzerland cant. Tessin, Val Laventina, 22 m. N.W. Heliouzon. It contains a large and handsome church and has a considerable trade in cheese. Many of the inhabitants go into Italy in winter to act as herds and sellers of milk. Pop. 1863.

QUINTO a vil Spain, Aragon prov and 20 m. S.L. Saragossa, r bank Ebro, with a townhouse, two schools a church built on the top of an eminence commanding the town, a chapel and several hermitages. Near it are mineral baths, which have long enjoyed great celebrity for the cure of rheumatism, syphilis, herpes, leprosy, and, above all, catleous complaints. The season lasts from June 1 till the close of September. From 64 to 71 Fah is the range of the temperature of the water. Pop. 1378.

QUINTO a river La Platte, runs near lat. 22 S, in the N. of prov San Luis, flows S.E. and after a course of nearly 400 m. is lost in a marshy lake.

QUINTO AL MAR, a vil and com Italy Piedmont div and about 6 m. E. E. Genoa, on a height above the Gulf of Genoa. It consists chiefly of villas and other man stous, of substantial appearance, belonging to the richness of Genoa. Pop. 1764.

QUINTON, two pars. Eng.—1 Gloucester 4800 ac. Pop. 567.—2 Northampton 1170 ac. Pop. 188.

QUIZANO a vil and com Italy Lombardy prov and 30 m. S.W. Brescia, in a finely diversified district on the Savarona. It is a handsome, well built place, with an elegant church. Pop. 3933.

QUITOTEPEC, or **CHASO DE LAS JUNTAS**, a vil Mexico dep. and about 80 m. N. Oaxaca, near the junction of the Quiotepec and Salado. On the hill or corvo from which it takes its name, are numerous remains of military works, ap-

generally intended to defend an extensive palace and temple, whose massive ruins still crown its summit. The temple, which, like most of the Aztec religious structures, is pyramidal, bears no resemblance to the remains discovered in Yucatan and seems to indicate a lower state of art and less refined civilization.

QUIRICO (San) a vil. and com. Italy, Piedmont, div. and a little N. of Turin, 1 h. from Ivrea, on the high road to Lombardy. It has a castle of justice, a handsome church, and a small theatre. Pop. 5668.

QUIRICO (San) in VAL D'OCCA a vil. and com. Turin comp. Stena, 6 m. from Piner. It has two churches and a school. Pop. 1664.

QUIRIGUA a ruined city Central America, state Guatemala, on the Motagua, rich in monumental remains.

QUIRIQUINA an isl., R. America, off Chili, about lat. 38° 40' S.; lon. 78° 10' W. It is about 3 m. long by 1 m. broad in the W. entrance of the Bay of Concepcion, which it shelters from N. winds.

QUIRPO an isl. British N. America, at the entrance of the Strait of Bellefleur, (N. point) 51° 38' N. lon. 55° 24' W. (N.).

QUIRTELLO a vil. and com. kingd. of Italy prov. and 16 m. S. S. W. Mantua, r. bank boschia. A sanguinary battle was fought here in 1734 between the Imperialists and the French, in which the latter were defeated. Pop. 6979.

QUILLY a v. in E. Africa, on the Sofala, a few miles above the town of that name. lat. 10° S. lon. 32° 30' E. The district of which it is the capital possesses much gold though not of the best quality, and the natives, who do not understand the art of working it, barter it in its natural state to the Portuguese. Topazes and rubies are also found. The other products are various kinds of grain and pulses, gum, pitch, timber and salt.

QUITO, the cap. city of Ecuador in a ravine on the E. side of the volcano of Pichincha, 9540 ft. above the sea, 150 m. N. N. E. Guayaquil. Its streets, with exception of four which meet in the large central square, are narrow, unevenly paved, and extremely dirty and the houses, built for the most part with sun-dried bricks, and thatched with the leaves of the maguay or chagapuro (*Agave americana*), present an architectural merit. The more important public buildings and establishments are the cathedral more remarkable for its plainness than the richness of its decorations, several other churches and convents the townhouse, court-house, president's palace, two colleges, one of them occupying part of the extensive and handsome buildings of the old Jesuit college, but both under very indifferent management the episcopal palace, orphan asylum, and hospital. The manufactures consist chiefly of woolen and cotton goods whose, though coarse, are substantial and in considerable demand here, hosiery and confectionary the last in high repute; and the trade in corn, and other agricultural produce, sent to Guayaquil in exchange for molasses, iron, and steel and to Peru, in exchange for wine, brandy oil, and different metals, is very extensive. The imports from abroad include all kinds of European tissues and hardware. The weekly markets are abundantly supplied with provisions, among which cheese, eaten in excess at all meals and by all classes, is the most conspicuous item. Quito was taken by the Spaniards in 1534 and incorporated as a city by Charles V. in 1541. It has repeatedly suffered much from earthquakes. Pop. variously estimated, from 50 000 to 70 000.

QUITTA, or **PARICE'S TOWN** formerly a Danish, now a British fort and town, N. Guinea Slave coast, 87 m. E. N. E. Accra lat. 5° 55' 0" N. lon. 0° 59' 45" E. (s.) Pop. 5000.

QUIVOX (Str.) par. Scot. Afr. 5000 a. Pop. 7147.

QUORRA, river, Africa. See Kikwa.

B.

RAAB (Latin *Arabo*) a river Austria, rises near Passau circle Gries in Styria, flows first N. E. enters Hungary turns N. E. passing the towns of Komorn, Marasloff, and Raab joins r. bank Danube total course, about 170 m., chief affluents, r. the Maresch, and l. the Felsitz, Finka, Fennarh Glina, Little Raab, and Leytha.

RAAB, or **NAIR GYON** (Latin, *Arabona*) a N. Hungary cap. eo. of its name, at the confluence of the Raab and Rabnitz with the Danube 87 m. W. W. S. W. It stands in a beautiful plain almost surrounded by three rivers, and is thus advantageously situated both for defence and commerce.

It consists of an inner and an outer town. The former is well fortified and defended by a castle, and is separated by a glass from the latter which is properly only a suburb. It is upon the whole, well built. The houses are generally of stone, and many of them are handsome. The greatest disadvantages of the place are a scarcity of good water, and a paucity of fuel. It contains three churches, a Lutheran, Calvinistic, and Catholic an episcopal palace, diocesan seminary, two monasteries, a royal academy, archiepiscopal museum, a principal and several other schools and has manufactures of calicoes, including awnings and tobacco-bastards, and a considerable trade. Raab was a place of some importance under the Romans, and makes a figure both in the early wars of Hungary, and those of still more modern times. A great many Roman coins have been found here. Pop. 18,000. — **THE COUNTRY** area, 461 geo. sq. m., is almost level throughout, and consists, for the most part, of fertile soil though not without the occasional occurrence of bogs and morasses, and some tracts of barren sand. The principal river is the Danube, two arms of which traverse the N. portion of this county and form the island of fishitt or fishington, the greater part of which belongs to it. All kinds of corn are grown in abundance also garden-crops, fruit, and &c. Good wine and a little silk are produced. The trade on the Danube is very active. The inhabitants are chiefly Hungarians, and belong to the R. Catholic church. Pop. 113,300.

RAALTJ, a vil. Holland one of the prettiest in prov. Overijssel, 9 m. S. E. Zwolle; with two churches, a school, and a weekly cattle market. Pop. 463.

HAAMSDONK, a vil. Holland, prov. N. Brabant, 10 m. N. E. Breda, with two churches, a convenient convalescent house, and a school. It was one of twenty-seven villages which were totally swept away by a flood Nov 18 1811. Pop. 1069.

RAAHAY an isl. Scotland. See RASAY.

RAAEZL a vil. Austria, Moravia, circle and 11 m. S. W. Troppau, on the Mera. Initial station chiefly employed in cultivating fax spinning it, and dealing in yarn. Pop. 1820.

RABASTEAS, a N. France, dep. Haute Pyrenees, 25 m. E. N. E. Ahy. It is an ancient but poorly built place, was once walled and defended by a strong castle, and suffered much during the civil wars particularly from the atrocity of Mollat, who, in revenge for a wound in the face which obliged him ever afterwards to wear a mask, massacred the inhabitants, without distinction of age or sex, threw 60 Protestants despitefully headlong from a tower and laid the town in ashes. Pop. 8470.

RABAT a maritime N. Morocco, prov. and 100 m. W. Fez, on the Atlantic, at the mouth of the Bouregub, and opposite Salé. It is surrounded with a wall flanked by massive towers, and has a citadel and batteries. The streets are steep and inconvenient, but the houses generally have a respectable appearance, and some of them are well built. It has some manufactures and considerable trade. In November 1851, it was bombarded by a French squadron, under Rear Admiral Dubouché. P. 21,000, including 8000 Jews.

RABBA a large, populous, and commercial N. Central Africa, 1 bank Niger, lat. 9° 15' N. lon. 8° 29' E. The market is very celebrated, and is considered one of the largest in the country. It is generally well supplied with slaves of both sexes, ivory, and a variety of articles, both of native and foreign manufacture.

RABAH, or **RABATH ARBOS** See **AMMAN**
RABCA, or **RABOCCA**, two vils. Hungary, Rither
 Danube, co. Arva, near the frontiers of Galicia, 22 m N N E
 Als-Kubla, with two churches, some manufactures of linen,
 and articles in wood, and a trade in cattle. Pop. (Rabca),
 1583; (Rabosca) 1145.

RABE (Nest), a vil Hungary Thither Thies co. Bihor
 N Groszwarda with a Protestant church, and a crab-factory
 in the Barzary. Pop. 1583

RABIVAL, a tn in Central America, state Guatemala,
 prov and 50 m S W Yax Paz, in a mountainous district
 near the sources of the Usumacinta, a tributary of the Usumacinta.
 Pop. about 8500

RABISHAU, a tn Prussia, gov and S W Legnitz with
 a R. Catholic church and a saw, oil and other mills. P. 1863.
RABNABAD a low sandy all. Hindoostan, Bay of Ben-
 gal, off the Sunderbunds, at the W entrance of the E. mouth
 of the Ganges, and separated from the mainland by a narrow
 channel or river of same name. It is about 16 m long by
 6 m broad.

RACALE, a tn Naples, prov Otranto, 9 m S E Galli-
 poli, with four churches a convent, and hospital Tobacco
 and cotton are grown in the neighborhood. Pop. 1300

RACAVAN, par latr Andria 17 563 ac. P. 4924

RACCAO or **VERERO** and **RA FERRARESE**, a vil, and
 par Italy Venetia, prov Udine, 7 m S S W Bovigo,
 with a church. Pop. 1610

RACONIGI, a tn Italy Piedmont, dv Carl prov
 and 11 m N E Saluzzo, in a very fertile plain 1 bank
 Macra. It is well built, has spacious and generally regular
 streets, lined by substantial and often elegant mansions. Its
 principal edifice is a magnificent royal castle with extensive
 well laid-out gardens and parks. The other public build-
 ings are two parish and several other churches, some of them
 adorned with fine frescoes, two monasteries, a college a
 military and other schools, an hospital, a *mont-de-piété*, and
 several charitable institutions. The chief industrial employ-
 ment is the preparation and spinning of silk. Pop. 10 109

RACHA-CHUMBA a lama city Mongolia, 880 m W
 Yeldin at the foot of a sandy mountain. It consists of several
 large edifices, surrounded by a great number of small houses.
 Three elegant and majestic Buddhist temples rise in the centre
 of the establishment. On the avenue of the principal temple
 is a square tower of colossal proportions, and on the four
 angles are four monstrous dragons sculptured in granite.
 This place is a favorite resort of devout pilgrims.—(Hue)

RACHECOURT, a vil, and com. Belgium prov Luxem-
 burg, on a stream of same name, 5 m S S W Arlon. The
 inhabitants are almost all employed in agriculture. P. 1185

RACINE, a tn U. States, Wisconsin, on the Root near
 its mouth in Lake Michigan, and on Green Bay, Milwaukee,
 and Chicago railway 73 m S E E. Madison. It has an Epis-
 copal college, a courthouse, jail, and other public buildings
 and a considerable trade. Pop. 5193

RACKENFORD par Eng Devon 2893 ac. P. 473
RACKET RIVER, U. States, New York rises in nume-
 rous lakes and ponds, and enters the St. Lawrence at the N
 boundary of the state, opposite Cornwall Island, Canada, after
 a N course of 145 m

RACHEKATH par Eng Norfolk, 1980 ac. P. 281
RACHEKEV, a market in Hungary, co. and 24 m S
 Pesth, on an island of the same name formed by the Danube
 It has a handsome summer palace, built by the celebrated
 Frances Eugene, and some trade in fruit and fish. Pop. 4200.

RACON, a river, U. States, rises in Iowa, about lat.
 45° N flows S E and joins r bank Mississippi on the frontiers
 of Missouri and Illinois, after a course of about 250 m.
 Its chief affluent is the De Weyer, which joins it on the left.

RACON par Eng Essex, 1180 ac. Pop. 96

RACE, or **O-BACE** a market in Hungary, co. Bacs,
 26 m N N E Peterwardein, on the Theise with two churches,
 a synagogue and some trade in silk and fish. Pop. 11 182

RADA or **CHIAZZI** or **CAPIRE DI RADA** a vil and com.
 Tuscany, 16 m N Siena, with a church, convent, and old
 castle. Pop. 2376.

RADACK and **RALICK** two chains of islands, N. Pa-
 cific, stretching S. E. to N N W between lat. 4° 59' and
 11° 25' N; and lon 166° and 172° E, and dividing Mar-
 shall's Archipelago into two parallel ranges, of which Radack

is on the E and Ralick on the W. They have, almost with-
 out exception, the usual coral character, and consist of a
 narrow belt or reef, unfathomable on the outside and enclosing
 a more or less shallow lagoon within. Many of the groups
 contain cocoa-nut and bread-fruit trees in clumps of beautiful
 verdure, and support numerous inhabitants, who, though more
 savage, are distinguished by the excellence of their canoes,
 and their skill in managing them. Both chains are very im-
 perfectly known but their productions and capabilities seem
 not to be of much importance.

RADAFALVA or **RADEKESDORF** a vil Hungary, co.
 Eisenburg, on the Ipoly, 3 m from Fürstenfeld; with a
 church and a trade in corn cattle, and wool. Pop. 1013.

RADAUNE, a river W Prussia, flows very easterly into
 the Baltic and joins the Motlau a little above Danzig after a
 course of 80 m

 Bruck, with a church an old castle, a charitable endowment,
 smelting-furnaces, and copper-works. Pop. 1465

RADVA, two places Austria.—1. [or *Radva*] a vil Tran-
 sylvania, 35 m N N E Bistritz, on the Smeush. It has a

Greek united church, and was in early times a place of considerable importance, but was destroyed on an incursion of the Tartars in 1343. Near it lead and silver are worked. Pop. 1000—3. A market to Hungary, on, and 17 m. E. by N. Arad, near the mouth of the Maros. It has two churches, a Franciscan monastery and some trade in cattle. Pop. 1384.

RADNAGE, a village, Eng. Bucks, 1853 ac. Pop. 463.
RADNITZ, a m. Bohemia, circle and 14 m. N.E. Pilsen with a church, synagogue, townhouse, old castle, and school; and manufactures of linen, several mills, and a trade in horses and cattle. Pop. 2318.

RADNOR, or **RADNORSHIRE**, an inland co. S. Wales, bounded N. by Montgomeryshire and Shropshire, E. and S.E. Herefordshire, S. and S.W. Brecknockshire, and W. Cardigan shire. Area, 249,600 ac., of which about one-third is supposed to be inclosed, and of this inclosed portion a fourth only is under the plough. The surface throughout is hilly in some parts approaching to mountainous, the highest summit of the forest of Radnor reaching an elevation of 2163 ft. above sea level. The principal portion of Radnorshire is composed of the strata forming the Silurian system, but on the W. and N.W. side of the county the upper beds of the older rocks, composing the Cambrian system make their appearance. Granite and porphyry occur in many parts and a coarse amygdaloidal trap is met with. A great portion of the country consists of common-land, bogs, and moor-land. Barley, oats, and potatoes are the principal crops, chiefly however for home consumption. But on good soil in the vicinity of market towns, considerable quantities of grain are raised for sale. But the chief dependence of the farmer is on the stock raised on the pasture-land and common land, which not only support large numbers of sheep, but in the more sheltered parts, cattle of all sorts. The cows are principally of the Herefordshire breed. The draught-horses in general use is rather small, but capable of enduring great fatigue. The original Welsh ponies are still bred in the mountains. Large quantities of butter are made. The ancient forests of Radnorshire, which were of great extent, have long since disappeared. Manufactures, trading, chiefly flannel. None of the rivers are navigable. It returns one member to Parliament, and one is returned for New Radnor in conjunction with other places. Pop. 24,716.

RADNOR (New), a part. for small market in S. Wales co. Radnor. The town, on a plain in the vale of Radnor 60 m. N.W. Bristol has a wharf and jail a handsome new church and Welsh Calvinistic Methodist chapel, and several useful charities. Inhabitants chiefly engaged in agriculture. The borough sent with 1 representative, Knight, &c. in sending a member to Parliament. Pop. bor., 2345.

RADNOI two parts. W. also—1 (Old), Radnoi; 10 000 ac. Pop. 1263—2 (New) 2343 ac. Pop. 481.

RADNOTH, **RADNOT** or **JERNOT** a vil. Austria, Tyrol, Tyrolia, co. Kellberg, on the Maros 44 m. N. Hermannstadt, with a handsome chateau, and two churches. P. 1706.
RADNOTH a vil. Austria, Tyrolia, co. and about 80 m. from Vienna with a church. There is a sulphur-mine in the vicinity. Pop. 1169.

RADOKALA or **KRISTO** **KONAROV** a group of islands in Pacific, Marshall Archipelago, and extends about 64 m. N.E. to W.S.W. lat. 11° 30' and 11° 35' 45" N. lon. 166° 35' 30' and 167° 14' 30" E. The islands are principally two—a larger about 76 m. long, trending N.E. and S.W., with an entrance to the lagoon on the S. and a less situated to the N. of it, and 14 m. long by 3 m. wide. They are both of coral formation, recently supplied with vegetable productions, and apparently uninhabited.

RADOLFSZELL, a m. Baden, Lake circle on the N. shore 11 m. N.W. Konstanz. It is walled; has a church, hospital, manufacture of white and red leather, and articles of copper wire. Pop. 1220.

RADOM, a m. Russian Poland, on the Radomka, 66 m. N. Warsaw. It is walled, defended by a castle, and has a court of law several public offices, two S. Catholic churches, a Jewish college, and gymnasium. Pop. (1841), 5845.

RADOMSKA a m. Russian Poland, 73 m. S.E. Kolsko, in a valley on the Radomka with three churches, and a trade in cattle. Pop. (1841), 2797.

RADNITZ, or **BRUNNENSTADT**—1, A river Turkey in Europe rises near a horn of the same, south of Ghimadli, Macedonia, flows E. 4 E., and joins the bank Karas, after a

course of about 75 m.—2, A m. on the above river, emp. dist. of same name, 75 m. N.W. Samsun. It consists of about 400 houses, and has some trade in corn and wine.

RADSTADT a m. Upper Austria, 3 m. S.E. R. Salzburg, 1 bank Enns. It is walled; has three churches, a chapel, monastery school and some trade in cattle, cheese, and wood. Pop. 2608.

RADSTOCK par Eng. Somerset, 1005 ac. P. 1792.

RADSTONE, par Eng. Northampton; 810 ac. P. 168.

RADWAN, or **RADVANY** a market in Hungary. Hither Danube, co. Szol., 7 bank Danube 2 m. S. Veszöl, with two handsome chateaux, two churches, manufactures of woollen cloth, a powder and a polishing mill. Pop. 3000.

RADWELL, par Eng. Warwick, 1550 ac. Pop. 244.

RADWELL, par Eng. Hert., 748 ac. Pop. 88.

RADWINTER, par Eng. Essex; 5802 ac. P. 916.

RADYD, or **RYADYD**, par Wales, Glamorgan, 1530 ac. Pop. 417.

RADZIVOLOV a m. Russia, gov. Volynsk circle and 18 m. N.W. Kremenets, near the frontier of Galicia, having one of the frontier custom-houses. It carries on a considerable transit trade. Pop. (1856) 7519.

RADZYŃ, a m. Russian Poland, 74 m. E.N.E. Warsaw on an affluent of the V. Lepre; with several churches, and much frequented annual fairs. Pop. 1200.

RAE, or **ROY** **SARLES** a m. Hindoostan, Oude 43 m. S.E. Lucknow 1 bank Rye. It has an extensive tract of a state of desolation and the towns altogether is in a deplorable condition though at one time the seat of extensive cloth manufactures. Pop. 3000.

RAFFESBOY a group of isls. Low Archipelago, lat. 16° 43' S.; lon. 144° 11' W. They are three in number and are very small only one of them contains a few inhabitants. They appear to be the same as the Sangaili Group of Wilkes U. States exploring expedition.

RAFI **MS HAY** a bay N. coast, Australia, a few miles E. of Port Kemington in Colburn Peninsula lat. 11° 10' S. lon. 152° 30' E.

RAFFNA a vil. Hungary, co. Krassova, on the Berava, 6 m. from Boguchan. The inhabitants are Walachians. Pop. 2214.

RAFFORD par Scot. Elgin 6 m. by 5 m. P. 1020.
RAPHUND a lake, Sweden, 120 and 78 m. S.E. Östersund. It is of very irregular shape greatest length, from N.W. to S.E. 34 m. breadth, about 9 m. It has a large fall a vil. and part of same name on its N. shore and discharges itself at the S.E. into the Njurunda.

RAGATZ, a m. and par Switzerland can and 80 m. S. by E. St. Gall, at the mouth of the gorge through which the Tamina rushes in its course to join the Rhine and owes its prosperity partly to its central position at the junction of several important public roads and partly and still more, to the recent establishment of baths supplied from this celebrated hot spring of Pfäfers. Pop. 1337.

RAGDALE, or **WEEKDALE**, par Eng. Leicester

1890 ac. Pop. 114.

RAGENDORF or **BASKA** a market in Hungary, co. Wieselburg 18 m. S.E.E. Presburg; with two churches and a synagogue several mills, and numerous orchards. Pop. 5300.

RAGLAND par Eng. Monmouth 4063 ac. Pop. 880.

RAGNIT, a m. Prussia, prov. E. Prussia, gov. and 53 m. N. Gumbinnen, 1 bank Memel. It has several courts and public offices, two churches, a house of correction; and a trade in wood, cattle, corn and linseed. Pop. 2791.

RAGOI, a m. Spain, Andalusia, prov. and 18 m. from Almería, with a church, cordeliers, prison school, flour-mills, and a trade in corn, wine, oil, and masts. Pop. 1317.

RAGOUHUB a m. in Hindoostan, prov. Malwa, 15 m. from Tiliore. It is defended by a fort. Pop. about 500.

RAGUIN a m. Germany, Anhalt-Desau, on the Mulde, 8 m. S. Dessau, with a church, manufactures of woollen and linen cloth and several mills. Pop. 1569.

RAGUSA (anc. *Demissa*) a seaport in Austria, Dalmatia, on a peninsula in the Adriatic, at the mouth of the valley of Ombla, lat. (fort) 42° 38' 54" N., lon. 18° 7' E. (m) It is surrounded by old walls flanked with towers and bastions, but possesses little strength, being completely surrounded by the adjacent hills. The houses are strongly built of exten-

lent stone, many of them with handsome balconies. The more remarkable edifices are the Cathedral, the church and convent of the Franciscans, the church and convent of the Jesuits, the former considered the finest building in Raagusa, and the latter now used as a military hospital; the governor's palace, an ancient structure in the Florentine style with fine arcades and arched windows, the custom-house, the Opera Pia, a kind of house of refuge for young females; and various other charitable institutions. Outside the town are two extensive suburbs, one of which is a large and well-enclosed bazaar, and near it is the Lazaretto. The manufacture of little importance, consist chiefly of silk and woollen goods, and ordinary and morocco leather, but the trade with Italy and the Levant is extensive, and has the advantage of two good harbours. Raagusa is the see of a bishop, the residence of a governor, and the seat of several important courts and public offices. It is of very early origin, and is supposed to have been founded by Greeks. It fell under the power of the Romans, then under that of the Greek emperors, and finally asserted its independence, which it successfully maintained both against the Turks and the Venetians. It has repeatedly suffered much from earthquakes, more especially that of 1667 by which great part of it was laid in ruins. Rescortib the mathematician was born here and last buried in the cathedral. Pop. 5000

RAAGUSA a tn. Sicily, prov. and 29 m W S W Syracusa, r bank river of the same. It contains several churches and convents, considerable manufacture of silk stuffs, and a trade in iron, wine, oil, horses, and mules. It is supposed to stand near the site of the ancient Hybla Heron. P. 21 466

RAHAD a rapid river Abyssinia, which enters the Bahir-el-Azrek or Blue Nile, 68 m N by W Semmar after 2 N W course of 140 m direct distance

RAHAN, two pars Irel. —1 Kings co. 14,988 ac. 1 op. 2097 —2 Cork 10,063 ac. Pop. 1940

RAHARA, par Irel Roscommon 3363 ac. Pop. 763

RAHDEV, a vil Rhodis Prussia, gov. and 68 m S S W Minden. It consists of several convents, a village, and has a Protestant church and a trade in cattle. Pop. 3843

RAHDUPPOOR, a petty state and to Hindoostan tributary to the Governor in N W part of prov Gujarat, and, with the adjacent territory of Pahlaspour, occupying the country between the Rann of Cutch on the W and the mountains of Rajpootana eastward. Area, 850 sq m. It is intersected by the lower course of the Bhinnas, and some other rivers, and is mostly level arid, uncultivated, and covered with jungle, yet, on the whole, more fertile than the tracts in its vicinity. Pop. 62 800, who are with difficulty kept in subjection to the Marathi government. —The rivers lat. 23 40' N lon. 71 31' E. 30 m from the Rann is enclosed by an old brick wall, flanked with towers, and some years ago contained 4000 houses. It shares in the transit trade between Marwar (Joudpore) and Cutch, and exports glass, hides, and wheat.

RAHELTY par Irel Tipperary 4876 ac. 1 op. 976

RAHENY, or RARNEY, a vil and par Ireland co. and 44 m N E Dublin a station on the railway thence to Drogheda. Area of par 920 ac. Pop. 646

RAHILL, par Irel Carlow 2664 ac. Pop. 846

RAHMANIEH, a tn. Lower Egypt, on the Nile, 25½ m S S E Rosetta

RAHOUN, par Irel Galway 11 015 ac. Pop. 6341

RAHOVA or ORATA, a tn European Turkey Bul garia, r bank Danube, 47 m W Nikopol. Pop. 2000

RAHUGH par Irel Westmeath 4974 ac. Pop. 837

RAHWAY, a vil. and township, U States, New Jersey 39 m N E Trenton, with seven churches an academy a female institute a tannery, a distillery a paper-factory and numerous flour, grist, and saw mills. Pop. 4000

RAI Koud, or RAHOUNO one of the Kurile Islands, near the centre of the group lat. 46° 18' 20" N, lon. 153 15' E. It is small, but hilly and has a lofty peak.

RAIATEA (the *Utaia* of Cook) one of the Friendly Islands about 180 m N W Tahiti, lat. 16° 50' S, lon. 151° 24' W (n.); about 40 m. in circumference, mountains, covered with vegetation, and overflowing with water in nearly all its forms—cascades, rivers, and swamps. It rises in the centre to an elevation of 7000 ft. and is encircled by a coral reef at the distance of 1½ m or 2 m from the shore. The soil is

exceedingly fertile. The outside of the native houses here has a cheerful and agreeable appearance, being white-washed and plastered, but the inside is extremely filthy. The natives, though naturally an indolent people have attempted some ship-building, and export a considerable quantity of arrow-wood.

RAICROON, or RAICROON, a tn. Hindoostan, prov. Beja poor, 110 m S W Hyderabad lat. 16° 10' N lon. 77° 30' E. It is a large but irregularly-built place, defended by an old fort and some new works.

RAIDAH, a small tn. Arabia, S coast; lat. 15° 2' N, lon. 50° 30' E. It is the residence of a chief, whose territory extends 95 m along the coast. It exports frankincense, cloves, ambergris, and shark's-fin.

RAIDROOG or RYDROOG a tn and hill fortress Hin doostan presid Madras, dist. and 34 m S W Bellary on the Mysore frontier lat. 14° 49' N lon. 76° 58' E. The fortress stands on a vast mass of granite connected with other rocky heights. It is reached by a broad causeway, which has by great labour been cut in the perpendicular face of the hill, and passes through several gateways of solid masonry forming parts of a triple line of fortifications. About midway up the ascent are the remains of a palace and some temples to Rama and Krishna. A remarkable temple to the latter divinity is amongst those in the town which covers a large space of ground, chiefly at the foot of the hill and formerly contained 3000 houses. 1 op. 700 —(Madras Almanac, 1840 etc.)

RAIGHILL See KRYSTON

RAILSTOWN, par Irel Tipperary 204 ac. Pop. 149

RAINE ISLE, an islet in the Great Barrier Reef lat. 11° 38' S, lon. 144 2 15' E. (n.) 1000 yards long by 500 yards wide, and in no part more than 30 ft. above high-water mark. A beacon, the summit of which is 75 ft. above sea-level has been erected upon it, marking the best entrance through the outer reef towards Torres Strait.

RAINFORD a chapelry England, co. Lancaster 5½ m N N F Prescott, with a church, an Independent chapel, and a school. Pop. 2363

RAIKHAM, five pars England —1 Essex 2812 ac. P. 868 —2 (East) Norfolk 1636 ac. Pop. 124 —3 (South) Norfolk 1040 ac. Pop. 153 —4 (West) Norfolk, 1870 ac. Pop. 891 —5, Kent, 3838 ac. Pop. 1155

RAINHILL, a township, England co. Lancaster 2½ m S S E F. Prescott with a cruciform church a R Catholic chapel and a station on the Liverpool and Manchester railway. Pop. 1522

RAINY LAKE, a lake, British N America, between Lakes Superior and Winnipeg and forming part of the boundary between the possessions of Great Britain and the United States. It has 1130 ft. above sea-level is about 40 m long by 15 m broad receives the waters of numerous small lakes from the P and N E, and empties itself by Rainy River, about 80 m long into the Lake of the Woods

RAINY a river U States, Michigan rises on the S. side of the state and after a tortuous E course of 130 m, falls into Lake Erie, 2½ m below Monroe. It has a rapid current and affords extensive water power

RAISMPS, a tn France dep. Nord 2 m N Valenciennes the centre of an important coal-field, which bears its name. It has manufactures of cast and malleable iron, nails, chains &c. and has also breweries. Pop. 3433

RAIHBY two pars Eng Lincoln —1, 680 ac. P. 204 —2, (near Maltby), 1930 ac. P. 163

RAJAGRITHA, a tn Hindoostan, presid Bengal, prov. and 16 m S Bahar, on the lofty site of an old fortress. Near it are also numerous hot and cold springs, which are the objects of religious pilgrimage with the orthodox Hindoos, 50,000 persons sometimes assembling at once.

RAJAHMUNDRY, a dist. and tn. Hindoostan, the dist. belongs to the Northern Circars of the Madras presid. and lying between lat. 16° 20' and 17° 35' N and lon. 81 10' and 82 40' E. bounded, N by dist. Visagapatnam and the territories of the Nizam, W and S W dist. Masulipatam, E and S. the Bay of Bengal. Length, E to W 100 m, breadth 80 m. Area, 6050 sq m. In its S. half, it is intersected by the river Godavary which here forms a delta. The surface is generally low and flat, but hilly in the N, climate, though very hot, is healthy except near the hills where it is unwholesome even to natives. About 36 kunds of paddy or

rice, with grain and many dry grains sugar-cane in the rich delta of the Godavary betel cotton, tobacco, &c. are raised. Cattle are small but plentiful, as are sheep and goats. This is the only locality on the E. side of India where such is met with. Fine agates are found in the bed of the Godavary. It was formerly celebrated for its woven fabrics; these have declined in quality. At Samulcottah, drill, &c. in imitation of European cloths are successfully made, and carpenters, modellers, &c. are skilful. Principal ports—Coringa and Narayampoor and other towns, Samulcottah the chief military post and Peddapoor. Pop. 387,300. —**RAJAHMUNDY** the cap. to and seat of principal court, is on the E. bank of the Godavary just above its subdivision into two arms, 40 m. from the sea, and 65 m. N. E. Samulcottah lat. 16° 59' N; lon. 81° 54' E. It stands on elevated ground and consists of a principal street half a mile in length and many narrow lanes running from it on either side, the whole lined by mean houses of mud and tiles interspersed with some large dwellings of Zemindars, who are chiefly Brahmans. At its N. end is the fort containing the barracks hospital jail and magazine, and surrounded by two companies of a native regiment. Mahomedans are few and poor in both the town and district but there are numerous mosques attesting their former wealth and numbers. Pop. somewhat over 20,000.

RAJAMAILAI, a tn. in Hindoostan prov. Bengal on the Ganges, 68 m. W. N. W. Moorshedabad. Its advantageous

RUINS OF THE RAJMAHAL PALACE, RAJAMAHAL.
From an original drawing by Captain Smith, 4th Regiment.

position early raised it to importance, and it was long the acknowledged capital of the Bengal and Bihar provinces. The removal of the British court of justice to Bangalore has seriously affected its prosperity and caused it to assume a dull and deserted appearance, but it is still a large town, with no fewer than 13 market-places, the remains of a splendid palace, and an important transit trade. Pop. about 50,000.

RAJANAGULI, a small in Hindoostan prov. Bengal on the Ganges, dist. and 23 m. S. by W. Dacca.—2, A vil. Hindoostan, in the N. Circars, 11 m. N. E. Rajasamundry. It is well built and contains two temples.

RAJANAGULI, a tn. Naples, prov. Alzuomo-Ultra II., 6 m. W. Salerno, with two convents, and an ancient aqueduct, partly carried through the solid rock. Pop. 1550.

RAJAPILPETTA, a tn. Hindoostan, prov. and 60 m. S. Hyderabad lat. 16° 22' N, lon. 75° 37' E.

RAJAWUR RAJASTHAN, a tn. in the S. of the Punjab cap. of a petty rajpoot of same name, on an affluence of the Chenab, 60 m. N. S. W. Berrangur 2800 ft. above sea-level. It consists partly of brick houses, occupied by the wealthier classes, but more generally of mud huts, strengthened with frames of timber. The inhabitants are chiefly engaged in the culture of wheat and rice. The latter crop, by keeping the ground always flooded, makes the district very unhealthy and both cholera and leprosy are common.

RAJDEFR, a tn. Hindoostan, prov. Candahar, strongly situated in a precipitous mountain, only accessible by a narrow

foot-path cut through the rock, and secured by gates. Though plentifully supplied with water and provisions sufficient for a year, when besieged by the British in 1818, it was evacuated by the garrison as soon as the mortar-batteries opened, and passed without the loss of a single man.

RAJECI, a market tn. Hungary. Officer Danaba, co. Trutsehn near the Kiliuka, 54 m. N. W. Neusch with a church, a synagogue, and manufacture of horse cloths, a tannery and paper-mill. Pop. 2019.

RAJGHUR, a tn. in Hindoostan, prov. Agra, in a hilly district. It is both large and strongly fortified.—2 A tn. prov. Malwah 85 m. N. E. Oojein.—3, A small tn. N. Hindoostan, more than 7000 ft. above sea-level, lat. 30° 49' N, lon. 77° 28' E.

RAJODE, a tn. Hindoostan, prov. Malwah, 46 m. W. by S. Oojein lat. 23° 5' N, lon. 75° 5' E.

RAJOO, a tn. Hindoostan, prov. Goudwana, r. bank Malumuddy where it receives the Pyri 27 m. S. Byspoor; with a celebrated temple of Rajoo Loehnu contains images of Gauru, Kuntmann, and Jagath Pal the rajah who is said to have constructed the temple, shrines, and mythological sculptures. On a rocky island at the junction of the stream, is another temple dedicated to Mahadeva.

RAJONIA, a tn. Hindoostan, prov. Bombay Gujarat peninsula, 68 m. N. E. the promontory of Din Head, lat. 21° 2' N, lon. 71° 40' E.

RAJPIPIA, a tn. Hindoostan, prov. Gujrat, cap. dist. of same name, 54 m. E. Baroch on the top of a lofty mountain and in an almost inaccessible country. It is unheld by Rhaula.—The district 100 m. long by 45 m. to 60 m. broad though generally rugged and mountainous, has some fertile tracts along the banks of the Nerbada, and is said to have at one time supported 500 towns and villages. It has valuable camellia mines in the vicinity of Rattimpoor. The climate is unhealthy and particularly destructive to strangers and the water is said to be detestable.

RAJPOOR, two places, Hindoostan.—1 A tn., prov. Belajpoor dist. Luncen, 96 m. N. W. Gou.—2 A tn. prov. Malwah, 18 m. from Kook-
n.

RAJPOOTANA, a large prov. India, in the W. part of Hindoostan proper, extending from the Jumna and (humbled rivers) W. to Sindh and Bahawalpoor and comprising the greater part of the Indian desert. Its main characteristics have been described under the article **LAHMER**, which name it also bears. It is subdivided into the following states, which are subsidiary to the British, and comprised under six political agencies.—

| State. | Area in sq. m. | Pop. | Remarks. | Area in sq. m. | Pop. |
|--------------|----------------|-----------|-------------------------|----------------|-----------|
| Osseypore... | 11,616 | 1,701,409 | Tank & de- solation. | 1,896 | 125,673 |

| Kerwala... | 1,278 | 107,000 | Banera... | 5,924 | 151,200 |
| Total | 105,618 | 6,695,135 | | 17,618 | 1,808,373 |

Grand Total Area, 114,934 sq. m. Pop. 8,195,008.

—(Trigonomet. Survey of India.)

RAJSHAHYE, a dist. Hindoostan, presid. and prov. Bengal chiefly between lat. 24° and 25° N, lon. 86° 30' and 90° E., bounded E. by the main stream of the Ganges, which separates it from the dists. Moorshedabad, Jessore, and Furreedpoor E. Myrmaningh; N. Rangpoor and Damragpoor; and W. Midich. Area, 2564 sq. m. In the W. and N. the country is hilly, and overgrown with green jungle; elsewhere the surface is flat, contains several extensive lakes, and is intersected by many arms and affluents of the Ganges. Half of it is under rice-cultivation; the rest is principally

divided between indigo and mulberry plantations in the proportion of two to one. The rice and tobacco raised are often insufficient for home consumption. Here are no compact villages or towns, forts, or very substantial edifices, the dwellings being mostly scattered sparsely over the country. Bantah, the capital and Nataru, are the principal places. Pop. 671,000 mostly Hindus.—(*Trigon. Survey of India, Bengal Committee*).

RAKAS-TAL, lake, Tibet. See **RAYANA-HEADA**.

RAKAY, a vil. U. States, New Jersey, on a river of same name, and on the New Jersey railway, 36 m. N. E. Trenton, in a well-cultivated district, with seven churches, an academy and some manufactures. Pop. (township) 8806.

RAKNEH, a vil. Afghanistan, 40 m. W. Dera Ghossee Khan on the road to Kandahar, where the Bengul pass intersects the Sakhee Sarvar pass. It is a small place, of about 400 huts, lying on a stream. A road practicable for wheel carriages leads from Rakne to Kandahar.

RAKOCZ (NAGY), a vil. Hungary, Thither Themas, co. Ugov, in a well-wooded district, about 9 m. from Nagy Sallós. It has two Greek churches, a trade in timber, and several mills. Pop. 1088.

RAKONIAZ, a vil. Hungary, co. Szabolcs, on the Theles, in a fertile district about 2 m. from Tokay. It has a trade in corn, wine, and tobacco. Pop. 3796.

RAKONITZ, or **RAKOWITZ**, a vil. Bohemia, circle of same name, in a valley enclosed on all sides except the W. on the Gltz or Golden, 28 m. W. Prague. It is surrounded by old walls flanked with bastions, in tolerable preservation is entered by four gates, each of which is surmounted by a tower has a handsome market-place, three churches a synagogue, high school, hospital, and manufactures of soda, glass, and earthenware, and extensive iron-works. Pop. 2644. — The church area, 748 geo. sq. m., is watered by the Elbe, Mollau, Reger, and Mite. It is well-wooded, produces good crops of corn and hops, and has valuable mines of iron and coal. Pop. 186,569.

RAKOS, or **RAKOWKO**, a vil. Hungary Hither Themas, co. Beragh, about 9 m. from Munkacs with two churches. Pop. 1416.

RAKOVA, a vil. Hungary Hither Danube, co. Trentsch, 3 m. from Gassa with a church and a trade in timber. Pop. 2928.

RAKOVICZA, a vil. Hungary Thither Themas, co. Temesvár, on the Theles, 6 m. from Kuszat with a church. Pop. 1115.

RAKOW, a tn. Russia, gov. Podolsk, on the Dniester 187 m. S.E. Kamensk. It is one of the best quarters of the Southern, who have here a gymnasium, and had once a print press, at which a number of their huretical works, particularly the celebrated Rakow catechism, was published. Pop. about 1000.

RAKSA, a vil. Hungary, Thither Themas co. Szathmar 19 m. from Aranyos-Mogyos with a Greek non-united church. Pop. 1206.

RAKWITZ, vil. Austria, Moravia circle Hradisch, 12 m. from Ceska. It has a parish church and a mill. Pop. 1048.

RAKWITZ, or **RAKOWITZ**, a tn. Prussia, prov. and 22 m. S.W. Posen with a church and important corn-market. Pop. 1716.

RAKDING, a mountain peak, N. Hindoostan in the Himalayas, 1. bank Bhilal above Murang; lat. 31° 29' N. lon. 78° 22' E.; height, 21,411 ft.

RALEIGH, a city, U. States, cap. N. Carolina, 135 m. S.W. Richmond Virginia lat. 35° 47' N. lon. 78° 48' W. on the N. Carolina central railway. It is regularly and neatly laid out, containing a large and four smaller squares, and has a state-house, a massive granite structure after the model of the Paphosion, 100 ft. long, 80 ft. wide, and surrounded by massive columns of granite, 5½ ft. diameter, and 80 ft. high, and surmounted by a beautiful dome, a court-house, jail, governor's house, a theatre, a market, five churches, three academies, several schools, and a deaf and dumb institution, two banks, and a considerable trade. Pop. 4938.

RALEIGH ISLANDS, N. Pacific. See **BARBERS**.

RAILO, a vil. Austria, 6106 ac. Pop. 1673.

RAM HEAD, a promontory, New S. Wales, 20 m. S.W. from Cape Howe; lat. 37° 40' S.; lon. 149° 30' E.

Vol. II.

RAMA, or **RAMALA**, a tn. Palestine, 26 m. N.W. Jerusalem. It is pleasantly situated, and contains a spacious and strongly built convent, which is kept in excellent repair. In its vicinity are some ancient groves of olive-trees. It is supposed to be the ancient Arimathea. Pop. 8000.

RAMALES, a vil. Spain, prov. and 26 m. S.E. San Sebastian. Along with the neighbouring fort of Guasqualine, it was obstinately held by Morote, the Carlist general, in 1837, but he was at length forced to surrender to Espartero who was created Duke of Victoria for his services on this occasion. On evacuating, the Carlists set fire to the town, which remains still a heap of ruins. It has however a church and a school. Pop. 806.

RAMBA, a tn. Ecuador. See **CANASA**.

RAMBE, or **GHILLY**, one of the Fudje Islands lat. 16° 24' S. lon. 179° 58' 40' W. It is lofty and well wooded, with many deep bights, one of which, on the S.E. side, affords good anchorage. There is a large settlement on its N.W. side.

RAMBERT (87) two places, France.—1. A tn. dep. Ain, in a narrow valley r. bank, Albarine, 22 m. S.E. Bourg. It is the central locality of an important manufacture of common linen, and has extensive silk mills and iron-works. Near it, in a branch of the Jura mountains, is the narrow gorge of St. Rambert, about 12 m. long. It is a narrow, narrow defile, with perpendicular rocks on either side. The silicates and iron found here in abundance are sent into pail blengrams, which are used in building walls and chimneys. Pop. 1785.—2. A tn. dep. Loire, 40 m. S.E. Montbrison with a very old and interesting parish church; building yards, at which nearly 8000 hargos are annually constructed and a trade in wine. Near it are blast furnaces and other iron-works. Pop. 1465.

RAMBERVILLEERS [anc. *Remberti Villere*] a tn. France, dep. Vosges, 16 m. N.E. Epinal. It is well built, and the streets are kept clean by a current of pure water; but though many of the houses are good some of the public offices are particularly deserving of notice. It has a library of 10,000 vols. manufactures of linen linen leather delft, and earthen ware and a trade in corn, hemp, cloth, paper and cutlery. It is an ancient place, in which the kings of France had a house in the 9th century. It was the capital of a castellany of the temporal bishops of Metz, one of whom surrounded it with palisades in 1120, and another in 1280 added twenty-four towers and walls, of which some traces still exist. Pop. 4445.

RAMBLA, a tn. Spain Andalusia, prov. and 17 m. S. Cordova. It is substantially built, and has regular paved and clean streets, and a large and several small squares, a townhouse, a granary, house of refuge, an asylum for poor widows, a founding hospital a superior and two elementary schools, a parish church, several convents, two of them converted into schools and several hermitages. Although agriculture is the chief occupation, many of the inhabitants are employed in preparing chocolate and wax, and as carpenters and shoemakers but above all, in the manufacture of water-pitchers, there being 12 potteries for that description of earthenware. The women are employed in weaving ordinary linens and knitting stockings, of which many are exported. Pop. 9000.

RAMBLA (San-JUAN DE LA), a vil. and com. Canary Islands, on a plain in the N. E. of the Isl. Tenerife. It contains a parish church, courthouses, prison, and primary school and has some trade in corn, wine, silk, and wax. Pop. 1418.

RAMBOUILLET [anc. *Rembouillet*] a tn. France, dep. Seine-et-Oise, in a beautiful valley near the extensive forest of same name, 27 m. S.W. Paris. It has good houses, and regular spacious, well-cleaned streets, but it, on the whole, a dull place remarkable only for its chateau, the residence of the kings of France, and a fine park, in which the first model farm in France was established and for its sheep-fold, which was the first depot of Marino sheep brought to France from Spain by Napoleon. From this flock have sprung the pure race, and the mixed race of sheep, which constitute one of the greatest sources of wealth in the country. Pop. 2687.

RAMDROOG, a tn. Hindoostan, presid. Madras, in the Palghat end district, 48 m. S.E. Bellary, lat. 14° 44' N. lon. 77° 31' E.

RAME, par. Eng. Cornwall; 1231 ac. Pop. 741.

RAME HEAD, a promontory, England, co. Devon, projecting into the channel, W of Plymouth Sound lat. 50° 19' N. lon. 4° 18' W. (a).

RAMELTON a to. Ireland. See **RAMESBURGH**.
RAMET, a vil. and com. Belgium, prov. and 7 m. S.W. Liège, on the Meuse with a brewery, three mills, and a trade in agricultural produce. Pop. 1475.

RAMGAON a vil. Hindoostan presid Bengal, dist. Khamoon 17 m. S. Almora, on the declivity of a steep mountain.

RAMGERT, a to. Hindoostan prov Mysore, 48 m. N.E. Seringapatam. Inhabitants chiefly employed in rearing cattle. Some fat is obtained in the neighbouring hills from a tree called Jala.

RAMGHAT a to. Hindoostan prov. and N. by E. Agre, r bank Ganges, which is here fordable in the dry season.

RAMGHAT a pass Hindoostan leading from prov. Nepjeor over the W Ghats, to the Portuguese territories on the Malabar coast, of which Goa is the capital. The ascent from the E. to the summit of the pass, which has a height of about 2200 ft. and is marked out by a small temple of Shiva, is very gradual but the descent, on the W side was at one time so sharp and steep, as to be almost impracticable for loaded cattle. It has, however, much improved, and now descends in regular gradations by a carriage road which passes through a continuous forest but does not present the usual precipices and yawning chasms for which the scenery of the Bhor's Ghats pass is celebrated.

RAMGHI R. a dist. and to. Hindoostan, the district being the largest under the Bengal presidency and occupying most of the S. part of prov. Bahar lat. 22° to 23° N. lon. 85° to 87° E. It is bounded N. by dists. Shahabad Bahar and Bhagulpore E. Benarshoom and the Jungle Mahale S. Singhbhum and other territories ceded to the British by the rajah of Benar and W. Chota Nagpoor a vast seminary formerly included within its limits Area, 8534 sq. m. It is a wild country among the least civilized in India, consisting mostly of mountains, or rocky hills, covered with forests and jungles, and intersected by the Dummoodah river which flows E. to join the Ganges (Hooghly). The declivities are covered with a thin layer of very fertile loam, on the uplands pulses and cotton are raised from is everywhere plentiful, and coal, lead antimony &c. are met with, but few mines are opened. Many of the zamindars are of great extent. The commercial transactions are insignificant, though the great road from Calcutta to Benares passes through this district. Except numerous old brick forts (now partially demolished), there are few durable buildings and Ramghar has been distinguished mainly for crime and unhealthiness. The inhabitants are principally Hindoos Mahomedans make but a small fraction of the whole. Principal towns—Chutia, the capital Banaghar Bazar Singh, and Sheregoty. Pop. 572,318. (—*Tynges. Survey of India*) —1 A to. in this district, on the Dummoodah lat. 22° 38' N. lon. 85° 43' E. —2, A vil. in the British Himalayan prov. Khamoon, R. Almora, in a narrow valley, the sides of which are cultivated in terraces with great care and industry. It consists of at least 2000 detached huts. (—*Geographical Magazine*)

RAMGUNGA, or **RAMA GANGA**, a river in N. Hindoostan. It rises in the mountains of Khamoon, 25 m. N.W. Almora, flows directly S.E. through prov. Kailash, and after a course of about 300 m., joins the bank Ganges, on the frontiers of Delhi and Oude, not far from Kanjga. Its principal affluents are the Koolia and Dooah Gangs, which both join it on the left.
RAMGUN a to. Hindoostan prov Orissa, on the Malabar, 100 m. W. Cuttack; lat. 20° 28' N. lon. 84° 28' E.
RAMILLER Orissa, a vil. and com. Belgium, prov. Brabant, near an old Roman road on the highway from Namur to Louvain, 28 m. S.E. Brussels. It is famous for the victory gained here (May 23 1706) by the allies under the

Duke of Marlborough over the French, under Marshal Villars. Pop. 735.

RAMIREZ (Dinoo) ISLANDS. See **Dinoo**.

RAMIREERAM, or **RAMESBURGH**, an isl. and near S. extremity of Hindoostan, between it and Ceylon, lat. 9° 17' N. lon. 78° 21' E. It forms a part of the chain of islands and rocks stretching from Ramnood on the mainland, to Manar in Ceylon, and separating the Gulf of Manar on the S. from Palik's Strait on the N. It is of irregular shape, 11 m. in length, by 6 m. in width, with an additional narrow neck of land on its S.W. side 12 m. in length joining the sands called Adam's Bridge. Its surface is generally low, sandy, and interspersed with jungle and palm-groves, in its centre is a tract of fertile soil, where betel, oil-nuts, cotton, and some grains are produced. It is well watered, and contains several salt swamps, which render its inhabitants liable to fevers but it enjoys the benefit of a comparatively cool atmosphere being subject to the influence of both monsoons and its temperature during most of the year ranging between 78° and 85° Fah. At its W. end is its chief port, Pambun, opposite the Pambun Channel, through which vessels have been in progress to obtain a passage for large ships. The town on the E. shore of the isl. contains some good streets, nearly 1000 houses, most of which are well built, and a magnificent palace constructed in part of vast granite blocks,

PAGODA AT RAMIREERAM.—From Rali's View in India, &c.

possessing a tower 100 ft. high and a fine colonnade. A flagged road lined at intervals by resting houses and pagodas, connects the town with Pambun. The island being held of great sanctity by Hindoos, is visited annually by thousands of pilgrims and is the residence of many Brahmins and wealthy natives and the centre of an active trade. The inhabitants of Pambun possess a considerable share in a fleet of vessels carrying raws, timber, &c. between all the adjacent coasts, and importing rice, cotton cloths, &c. for home consumption. Pop. 4500 including some Mahomedans and native Christians. (—*Statist. Rep. on the Madras Presid., Madras Almanac*, 1841.)

RAMNAD, a to. and large secondary or sub-district Hindoostan, presid Madras, dist Madras, of which the secondary forms the S.E. portion, comprising a long tongue of land projecting toward Rameswaram and Ceylon. The river lat. 9° 18' N. lon. 78° 56' E., 45 m. S.E. Madras, is on the S. bank of the river Vayal, and consists of a sort of delta in extent, in which are the remainder a palace, and treasury, Protestant and R. Catholic churches, the commandant's residence, &c.; and considerable suburbs outside the walls. The houses are mostly of mud, and thatched. Many large merchants and manufacturers of coarse cloths inhabit Ramnad. Pop. 10,000. —The secondary lat. 9° 5' to 10° 5' N. lon. 78° to 79° 24' E.; area, 1300 sq. m. is wholly level, and about half of it is under culture, the rest consisting of sandy and waste land, mangrove, and low jungle. Some manufacturers of cotton cloths and iron goods are carried on the side exports are cheap, which yields a fine red dye, salt, fish, tobacco, cotton and its fibres, skins, paddy, and about a million cowshells annually, mostly sent to Bengal, where they are in

great request for the manufacture of native ornaments. The inhabitants of the interior are principally Hindus; those of the coast Mahomedans, with about 10,000 E. Catholics, mainly occupied in fishing. Pop. 307,417.—(Statist. Rep. of B. Div. of Madras Presidency.)

RAMNAGHUR, a town, Hindoostan, presid Bengal, prov. Allahabad, on bank Ganges, a little above the W extremity of Benares, chiefly noted for the large fort or palace, the usual residence of the rajah. It is a huge edifice of stone, projecting into the river, and is furnished with a garden, laid out in

THE RAJAH'S PALACE, RAMNAGHUR.—From an Original Drawing by Capt. Smith, 40th Regiment.

Hindoo fashion. Near it is a pagoda left unfinished by Rajah Chait Singh, the mythological sculptures of which have been greatly admired for their elaborate execution. Chait Singh intended to build a large town at Ramnaghur with regular and wide streets, but he was deposed before any more was completed than the two spacious streets, crossing at right angles, which form the present town.

RAMNAGUR, several places, Hindoostan.—1 A considerable town, prov. Bahar 150 m. N E Benares, on the Ganges, on the frontiers of Nepal.—2, An ancient fortress, Delhi, which now covers an area of several miles in circuit with its ruins.

RAMNER, a snowy mountain of the Himalayas, in the N of prov. Kutch, estimated height, 22,768 ft. above sea-level, 50 m. N Almore, lat. 30° 20' N lon. 79° 38' E.

RAMNUGGAR, a large town in Punjab, in a spacious plain 1 bank Chenab, 70 m. N N W Lahore lat. 32° 20' N, lon. 78° 38' E. It is surrounded by a wall flanked with round towers, and has eight well supplied basars. Here is a ferry across the Chenab, which at its lowest season has been found 300 yards wide, and 9 ft. deep. In the adjacent plain the troops of Runjeet Singh were accustomed to rendezvous for campaigns to the westward. Pop. 11,000.—(Bombay Geog. Journal.)

RAMOAN par Ind Antim 12,066 ac. Pop. 4102

RAMOO a town Hindoostan, prov. Bengal, dist Chittagong, in a fertile plain, on a large river of same name, 250 m. E. S. E. Calcutta. Owing to the lowness of the site, the whole country around is regularly inundated, and very unhealthy.

RAMPIRAM par Eng Docet 2030 ac. Pop. 413

RAMPOOR, numerous towns, India.—1, Prov. Delhi, cap. a small state protected by the British in Rohilkund, E. bank Koolie, a tributary of the Ganges, 18 m. E. Meerabad lat. 28° 50' N lon. 79° 54' E. It is a strong place, surrounded by a thick bamboo hedge and mud walls, and consists chiefly of mud huts, with two forts, and some good edifices occupied by the ruling family. The state, of which it is the cap., has an area of 780 sq. m. with a pop. estimated at 220,400; and it has been noted as one of the best governed and most flourishing of Indian territories. Its foreign relations are now conducted by the British agent in Rohilkund.—(Heron. Survey of India.)—2, A town, cap. Bussahar, one of the protected Sikh states, 1 bank Sutlej 50 m. E by N

Bahagpur, lat. 31° 27' N lon. 77° 38' E. It occupies a narrow space on the cliff bordering the river, here crossed by a bridge of ropes, on which passengers, &c., are seated, and drawn over. In its architecture the town has something of a Chinese or Tibetan character; it possesses several temples greatly resorted to by Hindoo pilgrims, and a large annual fair at which traders of Hindoostan meet those of Cashmere, Ladak, and Chinese Turkestan, who bring shawl, wool, and woollen fabrics, radmas, and other produce, to be exchanged for grain, iron, spices, cotton cloth, sugar, &c.—(Statist. Rep. of B. Div. of Madras Presidency.)

RAMPOOR, a town, Hindoostan, presid Bengal, upper prov., the one 14 m. S. by W Baharumpoor the other 41 m. N Bareilly.—5, A town, Oude, 68 m. S. E. Lucknow 24000

RAMPOOR, numerous towns, Hindoostan.—the prin dist in the Indus dominion, and the former residence of the Holkar family, on the Jelys, an affluent of the Chambal 30 m. E. Narmath, lat. 24° 27' N lon. 75° 12' E. It is walled, and contains a Hindoo temple of celebrity but it has greatly declined in importance since the transference of Holkar's court to Indore.

RAMPTON, two par. Eng.—1 Cambridge 1812 ac. Pop. 231.—2 North 2156 ac. Pop. 456.

Chedola, about 50 m. long by 10 m. broad, with a chain of low hills and several mud volcanoes in the S—2 A town, cap. above isl. lat. 15° N lon. 98° 15' E, on both banks of a creek crossed by noble bridges. It is compactly built, has a large bazaar and a considerable commerce. Pop. 7000

RAM'S ISLAND a small isl. Ireland, co. Antrim, the largest in Lough Neagh about 1½ m. from the shore, and 6½ m. S by W Antrim.

RAMSAY a vil and township Canada West, co. Lanark on the Canadian Mississippi an affluent of the Ottawa 66 m. N N W Kingston. It has Presbyterian, Methodist, and R. Catholic churches, and is the most thickly settled township in the district having a woollen factory, manufactures of articles in wood, a saw and a flour mill and a large trade in agricultural produce. Pop. (1852), 2356.

RAMSEY a vil and ecclesiastical par England co. Lancashire 5 m. N. Barry, on the Irwell and E. Lancaster railway. It is a large and rapidly increasing place indebted for the foundation of its prosperity to the first Rev. H. Peel, who here commenced his manufacturing career. It has a handsome church, Presbyterian, Evangelical, Wesleyan, and Primitive Methodist chapels and extensive cotton-mills and print-works. Pop. 2686

RAMSDEN, two par. Eng. Essex.—1 (Bellhouse), 2686 ac. Pop. 456.—2 (Orange), 1458 ac. Pop. 292

RAMSDORF, a vil Prussia Westphalia, gov. and 53 m. W S W Münster on the Aa, with a church an oil mill, and some general trade. Pop. 1080

RAMSEY a market town and seaport England, N. E. coast Isle of Man on a spacious bay of its name, 17 m. N E Douglas. It is irregularly built, but has wide streets, a chapel a courthouse a valuable herring-factory, and an extensive trade in exporting provisions. Pop. 3701

RAMSEY, a market town and par England, co. and 9 m. N N E Huntingdon, on a tongue of highland stretching out into the fens. It consists of two principal streets tolerably well kept, with an open brook flowing through the center of the town. The houses are mostly old, of brick, clay, and

timber, but a considerable number have recently been rebuilt to a superior style. It has a handsome church, places of worship for Baptists, Wesleyans, Primitive Methodists, and Unitarians; some interesting remains of a magnificent abbey founded in 969; a literary institute, a well-endowed grammar-school, and a number of other useful institutions; inhabitants chiefly employed in agriculture. Pop. 10, 2641. Area of par. 76,819. Pop. 4845.

RAMSEY par Eng Essex 6693 ac. Pop. 657
RAMSGATE, a seaport and market tn. England, co Kent, 67 m E.E. by London, with which it is connected by railway, 4 m S.E. on the North Foreland, at the S.E. corner of the Isle of Thanet, lat. 51° 19' N lon. 1° 25' 30" E (n.). The older parts of the town occupy a natural hollow or valley in the chalk cliffs that form the part of the coast, while the newer portions occupy the higher ground on either side. The latter, from their elevated position on the cliffs, command an extensive sea-view. Many of the houses are very handsome, some being arranged in streets, terraces, or crescents, while others are detached villas. The places of recreation and resort comprise a theatre, assembly-rooms, several libraries, and baths. It has a parish church, in the early English style, with a lofty tower and spire; places of worship for Baptists, Independents, Wesleyans, Primitive Methodists, R. Catholics, and Jews; several schools, including a national R. school, two infant, and a free school; a dispensary, an hospital for women, and a literary and scientific institution. The harbour is artificial, formed by piers, and nearly circular comprising an area of 48 ac, and including a dry dock and a patent slip for the repair of vessels. The E. pier is nearly 5000 ft. long, and the W. pier 1500 ft. both built of Portland and Farne stone and granite; the entrance to the harbour is 240 ft. wide. Ramsgate has a considerable coasting trade, particularly in coal and imports some timber from the Baltic. An immense quantity of eggs, also, are imported annually from France. Ship-building and rope-making are carried on to a considerable extent, and there is a considerable fishery. Ramsgate is a member of the Cinque Port of Sandwich, and also a popular watering-place, to which latter circumstance it chiefly owes its recent rapid advancement. Pop. 11,838.

RAMSHOLT par Eng Suffolk 2107 ac. Pop. 303.
RAMSTADT (Dussel) a vil. Hesse Darmstadt, prov Starkenburg on the Mosel, 7 m S.E. Darmstadt with a church an iron works, and numerous mills. Pop. 2147.

RAMSTEIN a vil. Bavaria, Palatinate, near Landstuhl with a church and two mills. Pop. 1089.

RANAÍ one of the Sandwich Islands, N.W. Hawaii, lat. 20° 44' N lon. 156° 58' W (n.) about 15 m. long and 6 m. broad. It is volcanic, dome-shaped and generally barren being subject to long droughts, besides having a naturally infertile soil. The ravines and gorges are, notwithstanding filled with thickets of small trees. The shores abound with shell-fish, medusae, and cuttle-fish. The inhabitants are not numerous.

RANEY par Eng Lincoln; 12340 ac. Pop. 115.

RANCE—1. A vil. and com. Belgium, prov. Hainaut, on the Espe 30 m S.W. of Mons. It has quarries of building stone and marble, two forges, a brewery, marble saw-works, a flour-mill, and a trade in wool. Pop. 1148.—2. A river France, rises in Mount Masset dep. Côte-d'Or Nord, flows first E. to the foot of the Jura at Vilaine, then N.E. and falls into the English Channel at St. Malo. Total course, 60 m of which 18 m. eusemment at Dinan, are navigable.

RAND, par Eng Lincoln 2380 ac. Pop. 148.

RANDALSTOWN, a market tn. and formerly a pari. for Ireland, co. and 44 m N.W. Antrim; with a handsome market-house, church, R. Catholic church, and two Presbyterian meeting-houses, a dispensary, and schools. Cotton-spinning and cotton-weaving are carried on to some extent. Pop. 749.

RANDANS, a tn. France, dep. Puy-de-Dôme, 20 m N.E. Clermont, chiefly remarkable for its castle, which latterly belonged to Madame Adelaide, sister of the late Louis-Philippe. Pop. 1497.

RANDAZZO, a tn. Sicily prov. and 25 m. N. Catania, at the N. foot of Etna, r. bank Alcantara. Pop. 4487.

RANDERS, a tn. Denmark, prov. Jylland, cap. town of its name, 1 bank Gudenaa, about 6 m. above Skamstrup in the Randers Fjord, 111 m. W.W. Copenhagen. It contains an arsenal and a chemical school with six professors; and has

several industrial establishments, including manufactures of gloves, for which it has long been famous. The harbour near the town has only 7½ ft. water but there is a good building-dock, and at some distance below, at the mouth of the fiord, there is another harbour with 9 ft. to 10 ft. water, and roads with good anchorage in 4 to 5 fathoms. Randers is important in a military point of view, and could command from 10,000 to 15,000 men in the town and its neighbourhood, in a position which could not easily be forced. Pop. (1851), 7788.

—The RAILWORK, area 710 gao. sq. m. contains 5000 and 145 parishes. Pop. 69,900.

RANDOLPH, numerous places. U States, particularly—1. A vil. and township, Vermont, 28 m. S. Montpelier; with a Congregational church a flouring academy, several schools, tanning, grist, saw, and oil mills; four tanneries, and a woolen factory. Pop. 2666.—2. A vil. and township, Massachusetts, 15 m. S. Boston, with six churches, an academy several schools and mills, and extensive manufactures of shoes. Pop. 4741.

RANDOW, a river Prussia, issues from a lake in circle Angermünde, prov. Brandenburg, flows easterly N. and joins 1 bank Ucker in prov. Pomerania, total course about 70 m., a considerable part of which has been converted into a canal and made available for navigation.

RANDWIG, par Eng Gloucestershire 1360 ac. P. 950
RANÉA a river, Sweden, rises in Luleå Lappmark in N. Bothnia, flows S.E. and after a course of about 180 m., falls into the Gulf of Bothnia, 18 m. N. N. 1 mile.

RANEAH a tn. Hindostan, prov. Ameer 14 m W. Sreeah. Near it is an immense sheet or shallow lake.

RANLEPOOR, a manufacturing tn. Bunde, 45 m. S.W. Hyderabad. It is irregularly built, but has a cleanly and pleasant appearance. It formerly had extensive manufactures of cotton. Pop. 5000.

RANLACH a vil. Ireland, co. and 1 m. S. E. Dublin, of which it forms a suburb, consisting of numerous well built houses. Pop. 2230.

RANGAMATTY, a tn. Hindostan, prov. Bengal cap. dist., 22 m. N.E. Rungpoor. At one time contained 1500 houses, several of these inhabited by Mogul chieftains but now has only about one-sixth of that number of scattered huts, and the vestiges of a fort and mosque.—The district stretches on both sides of the Rangoon river, E. to the confines of Assam, and has an area estimated at 2629 sq. m.

RANGATRA or **SOUTH EAST ISLAND**, one of the three which form the group of Clatham Islands in the E. Pacific lat. 44° 30' S. lon. 176° 39' E. It is better than a bare rock rendered conspicuous by its remarkable shape.

RANGENDINGEN, a market tn. Germany, Hohenzollern-Hochingen, on the Starzel about 3 m. N.W. Hisingen. It contains a manory. Pop. 1297.

RANGI HAUTS, or **PITS**, an isl. 6 Pacific, Clatham group lat. 44° 15' S lon. 176° 50' E. greatest length, N. to S., 7 m., breadth about 3 m. altogether inaccessible, except on the E. by a narrow channel. It is thickly wooded, and inhabited by a party of aborigines from Clatham Island.

RANGAI Toru, the most W. of the group of Islands forming the N.W. entrance to the road of Auckland New Zealand, lat. 38° 45' S, lon. 174° 50' E. It is of volcanic origin, highest peak 920 ft. above the sea. In its centre is a very perfect crater, about 150 ft. deep.

RANGOON a tn. Burmah, on a branch of the Irrawaddy which joins the Pegu about 20 m. from its mouth in the Gulf of Martaban lat. (pagoda) 16° 47' N, lon. 96° 10' E. (n.). In 1824, when taken by the British, it extended along the river's bank in the form of a parallelogram, and consisted of narrow streets crossing each other at right angles, and paved with bricks set on edge, and of houses which were almost all composed of wood and bamboo raised on piles and thatched, with the exception of the public buildings, generally built of brick. Its defences consisted of a strong bastion, 16 ft. high, and strengthened with sowers of brick or wood at the gates. Its most conspicuous buildings were pagodas, the largest of which, called Shoo-de-gon, occupied a terraced hill, surrounded by smaller pagodas and many magnificent trees. In 1860 upwards of 3000 houses, including the custom-house and residences of the principal merchants, were destroyed by fire, but in 1862, when again situated by the British, though the old town consisted merely of heaps of ruins, a new town

had been formed about $1\frac{1}{2}$ m. from the river, apparently in the style of building already described. This new town formed nearly a perfect square, and was enclosed by a mud wall about 16 ft. high and 6 ft. broad, and a ditch. The great pagoda, situated on the N side of the square, had been cleverly worked into the defenses, so as to form a kind of citadel, which on this occasion was the scene of almost all the fighting that took place. It was defended by the Burmese with considerable obstinacy and valour, but the moment it was stormed they fled in confusion from the gates and all the country around immediately submitted. The town had suffered severely, and even in many places converted into ruins, but shortly after the capture, while the British troops were still present, the inhabitants, to the number of 30,000 to 40,000 flocked in and rebuilt it, while the river side, from 3 m. to 4 m., was lined with boats containing men, women, and children.

RANI GAT or **RANI-GAUM**, an isolated height rising about 1000 ft. above the surrounding plain crowned by a ruined fortress in the Eusofyie country, b. E. Afghanistan 16 m. N by W Obaid, and W the Indus, above Attock and supposed to be the celebrated *Aorras* captured by Alexander the Great.

RANKWEIL, a market tn. Austria, Vorarlberg, dist. and 4 m. N. E. Feldkirch, on a height. It is a very common place, and was once an imperial free town. It has two churches, a posthouse, manufactures of turnery and cherry brush and tile-works. Pop. 3029.

RAN, a tn. Austria, Styria, on a height above 1 bank. Sea, 17 m. W W. Agrum. It has an old castle with numerous towers, a church and Franciscan monastery and some trade in wine. It is supposed to occupy the site of the Roman *Novesium*. Coal and marble are worked in the neighbourhood. Pop. 1080.

RANVOCH (Loon) a lake, Scotland, co. and 85 m. N N W Perth, about 11 m. long and about 1 m. average breadth, surrounded by lofty mountains covered by forests. The margin is picturesquely studded with farm houses and manse.

RANBAET a vil and com. Belgium, prov. Hainaut 28 m. E. Mons with a church townhall and school in habitants mostly engaged in henebary in the coal mines, and in the manufacture of sails, brooks, tiles &c. P. 2448.

RANBACH, a vil. Nassau, 9 m. N. E. Coblenz with a church, tile-works, and lime-works. Pop. 1102.

RANBEEK, a vil. Belgium, prov. Brabant, 6 m. N. Brussels. It is famous for a great battle fought here in 1145 for the titulary of Godfrey III., Duke of Brabant, when the lords of Diest, Blackeb, Wesemael, and Wammal defeated those of Gumbergh and Malines.

RANBET a vil and com. Belgium, prov. and 6 m. E. E. E. Antwerp, with manufactures of linen, a brewery a flour-mill, and a trade in agricultural produce. Pop. 1667.

RANTON par. (Inhabits of **RANTON AMENT**) Eng. Staf. ford. 2870 m. Pop. 380.

RANTZAU, a vil and lordship, Denmark, duchy Holstein, on three little islands formed by the Barnstedter or Langelsund, about 23 m. E. N. E. Glückstadt, with the remains of an old castle, partly occupied as an extensive flour-mill. Pop. vil, 100. Area of lordship 66 geo. sq. m. and pop. 14,400.

RANWORTH, par. (Inhabits of **RANWORTH**) Eng. Norfolk. 1902 m. Pop. 876.

RANZO, a vil and com. France dep. Alpes Maritimes, par. Oreglia, near Fiere, with three parish churches, and the remains of an old castle. Pop. 1235.

RAON AIX BOIS, a tn. France, dep. Vosges, 5 m. N. W. Remiremont with manufactures of cotton. Pop. 1828.

RAON L'ETAPPE a tn. France, dep. Vosges, 25 m. N. E. Epinal, r. bank Meurthe, near the junction of the Plaine. It has manufactures of calico and potash and a considerable trade in wood. Pop. 3217.

RAPALLO, a tn. Italy, Piedmont, div. and 16 m. E. S. E. Genoa, as the N. W. extremity of the gulf. It has two squares of limited extent, a court of justice, an ancient collegiate church, two monasteries, a superior Latin school, an hospital, an old castle now used as a prison, manufactures of lace, and two annual fairs, each of which lasts two days. Pop. 9933.

RAPALLO (St. MARINETTA) m., a vil and com. Italy, Piedmont, div. Genoa, prov. Chiavari, near Rapallo,

beautifully situated near the gulf of Genoa. It has a number of well built houses, a large square paved with stones of various colours, so as to form a kind of mosaic, a handsome collegiate church with an imposing facade, Doric below, and Composite above, an old castle of a square form situated near the sea, and still available for defence; an hospital, and a communal school. Pop. 6226.

RAPHOE, a market tn. formerly seat of a diocese, and par. Ireland co. Donegal. Arm. of par. 18 225 m. Pop. 5108.—The town 3 m. N. W. Landed in well built has a central square, a plain cathedral, with the palace of the former bishops in an adjoining park. A E. Catholic chapel and two Presbyterian meeting-houses, a free school and several charities. St. Columb is said to have founded a monastery here. The sea was united with that of Derry in 1830. Pop. 1428.

RAPINO or **RAPINI**, a tn. Naples, prov. Abruzzo-Citra, 8 Chieti with two parish churches a convent, and hospital. Pop. 1800.

RAPITA (San CARLOS DE LA), a seaport in Spain, Catalonia, prov. Tarragona, on an elevated flat on the shore of the Mediterranean, about 26 m. from Tortosa. It owes its foundation to Don Carlos III. who, with a view to take advantage of its position between the provinces of Aragon, Valencia, and Catalonia, intended to make a great commercialemporium, but the extensive works commenced during his reign were abandoned at his death and Rapita is now comparatively insignificant. It has a parish church, primary school courthouses, and prisons, and a considerable coasting trade. Pop. 619.

RAPOLANO a vil and com. Tuscany, 18 m. from Siena, on a height, with a very ancient church, a theatre the remains of an old castle, and thermal springs. P. 9335.

RAPOLLA, a tn. Naples, prov. Basilicata, 3 m. S. E. Melfi with a handsome cathedral, a church, and a convent. Pop. 3000.

RAPONE a tn. Naples, prov. Basilicata, dist. and S. S. W. Melfi. Pop. 2300.

RAPOZOS, a vil and par. Brazil, prov. Minas-Geraes, 80 m. N. W. Ouro-Preto with a church. Millet, harrocks rice, and sugar-cane are cultivated and a considerable quantity of rum is distilled. Pop. 4500.

RAPELANA OAK, a tn. U. States, Virginia, runs in the Blue Ridge, and after a S. E. course of 130 m. enters Chesapeake Bay by a broad estuary, 26 m. S. E. the mouth of the Potomac. It is navigable for small craft 110 m. to Fredericksburg.

RAPPELAL, a tn. Baden, circle Unterthurn bei Neckar-Buchhofen. It contains a parish church and a castle, and has saline springs, from which nearly a half of the duchy derives its supplies of salt. Pop. 1038.

RAPPELSWILF, two places, Switzerland.—1, A tn. and par. can. St. Gall. N. E. shore of lake, and 18 m. S. E. of town of Zurich, partly surrounded by walls and surrounded by an old castle and a church with two towers. The most remarkable object in Rappelswil is its bridge, above $\frac{1}{2}$ m. in length which stretches to a tongue of land quite across the lake. It is only 12 ft. broad, and formed of loose planks with out any ledge. Pop. 1504.—2 A vil. and par. can. and 9 m. N. by W. Bern. It has some of the finest and best cultivated fields in the canton, and rears great numbers of swine on the oak mast of the forests. Two castles at one time stood on two neighbouring hills. Pop. 1719.

RAPPA, a tn. Barm, 1 bank Rhine, 88 m. W. Barmen.

RAPTEE, or **RAPTY** a river Hindoostan, runs in the Himalayas, in the W. of Nepal flows S. E. across the N. E. corner of Oude, into prov. Allahabad, passing the town of Gorakhpore, and after a course of about 180 m. joins 1 bank Gogra by two branches. Its chief affluents are the Irrah and Tivary on the left.

HARAKA an isl. Low Archipelago lat. 16 7 S., lon. 145 1 W. (N.) It is nearly of the shape of an equilateral triangle, 16 m. on each side, and its N. and S. sides are fringed by a submerged reef. It is low and well covered with trees, a few of which are coco-nut trees. It includes a lagoon, which communicates with the sea by a narrow channel. It is of an elliptical form, and appears to be about 10 m. or 12 m. long, N. to S. The natives are of an hospitable and modest disposition.

RARATONGA or **MANUWA**, an isl. S. Pacific Ocean, belonging to the group of Cook's islands; lat. $31^{\circ} 19' S.$, lon. $169^{\circ} 8' 35' W.$ It is about 80 m. in circuit, and consists of a mass of mountains, becoming visible at a great distance, and has a very romantic appearance. It presents bold cliffs to the sea, and is surrounded by a reef with several small openings, which admit small vessels, but afford no anchorage or shelter. It appears to be of volcanic formation. The inhabitants, about 4000, have been converted to Christianity and made great progress in civilization. They live chiefly in the three villages of Avarua in the N., Atua in the S.E. and Arorua in the S.W. These villages are well built, plastered with lime, and whitened, and have a very clean and comfortable appearance. The chief productions are yams, sweet potatoes, figs, pine-apples, turkeys, fowls, and ducks. Rararonga was devastated by the great hurricane of March, 1846.

RARBAK, a vil. Hungary. See **ROHREBACH**.

RARITAN a river and bay U. States, New Jersey. The river enters the bay at Amboy, after a S.E. course, and is navigable for small craft 17 m. to Brunswick whence it is joined by a canal to the Delaware at Trenton. The bay an inlet of the Atlantic, between Sandy-Hook and Staten Island, 10 m. N. New York, is 16 m. long from the ocean to Amboy and 12 m. at its greatest breadth.

RAS-AL-HAD the E. point of Arabia lat. $27^{\circ} 53' N.$ lon. $59^{\circ} 35' E.$

RAS-ARUNAH or **URIMARRAH** a remarkable headland, coast of Beloochistan, in the Arabian Sea lat. $25^{\circ} 8' N.$ lon. $64^{\circ} 35' E.$ It stretches N. to S. and being connected with the mainland by a low and narrow isthmus looks at a distance like an island. The bay on the E. is shallow and exposed to the S. and W. that on the E. is both deeper and better sheltered, the water shallowing gradually towards the shore from six or seven to three or four fathoms.

RAS-EL-KHIMA, a seaport in Arabia, cap. of the Pirate Coast lat. $25^{\circ} 48' N.$ lon. $56^{\circ} 4' E.$ on a sandy peninsula, defended by several batteries.

RAS-MOHAMMED the most S. point of the peninsula of Sinai in the Red Sea, between the gulfs of Suez and Akabah lat. $27^{\circ} 50' N.$ lon. $34^{\circ} 15' E.$

RASALGETT a cape Arabia. See **HAD**.
RASAY, or **RASAYAN** an isl. Scotland one of the Inner Hebrides, co. Inverness, between Skye and the mainland about 13 m. long, N. to S., and 2 m. broad at the widest part. It may be considered as forming a single ridge of

NEOGEE CASTLE, RASAY. From N. Catholic Western Isles.

unequal height, but in its S. or highest end, averaging 1800 ft., uniting on the flat-topped summit of Dun Oon, 1800 ft., on the S.E. coast. The W. side of the island is sufficiently

uninteresting; on the E. it is otherwise; here are numerous scattered farms, each surrounded with its cultivated tract; and the whole diversified by sowing rocks, ferns, cliffs, and patches of brushwood. On a lofty cliff, bordering the sea, in the N. part of the E. coast, stands the picturesque looking castle of Brochal. Freshness of the finest quality abounds in this island, as does also limestone, and a valuable kind of granite. There are several plantations of wood in a very thriving condition on the island chiefly Scotch fir, larch, birch, ash, oak, alder, &c. The herring-fishing was at one time carried on here to a great extent, particularly in the Sound of Hazy, the narrow channel which separates the island immediately from Skye.

RASCHAU, a tn Saxony, circle and 15 m. S.E. Ewickan; with a church, chalybeate springs a sulphur and arsenic work, two mills, and some trade. Pop. 2378.

RAREN three par. England, co. Lincoln.—1 (Market) A market tn and par., 12 m. N.E. Lincoln on the Rase is a very beautiful district, and on a branch of the Manchester Sheffield, and Lincolnshire railway. It is well built, has a commodious church, places of worship for the Wesleyans, Independents, Baptists, and E. Catholics a national school and a mechanics institute. Area of par., 1230 ac. Pop. 2110.—2, (Middle) A par. about 1 m. W. by N. of Rase-Market Area, 8470 ac. Pop. 948.—3 (Ward) A par. 8 m. W. Rase-Market Area, 2730 ac. Pop. 375.

RASGRAD a tn. Turkey in Europe, Bulgaria, on the Ak-Lour and the road from Stumla to Rustank 215 m. N.W. Constantinople. It lies in an elevated position above a ravine which forms its chief defence, and is surrounded by a palisaded dry ditch. Excellent grapes are cultivated in the vicinity. Pop. 30,000.

RASHAEIN par. Iral Austria 19,258 ac. P. 6389
RASHEE, par. Iral Austria 6481 ac. Pop. 1505.

RASINES, a vil. Spain, prov. Santander, in a plain on the road from Castle to Laredo. It has a church and school manufactures of coarse linen, a flour-mill and a trade in corn. Pop. 1558.

RASPEIG (SAN VICENTE-DE) a tn. Spain, prov. and 4 m. from Alicante with two endowed schools, and a church. In the vicinity are several hermitages. Agriculture is the chief occupation and the trades carried on are mostly those connected therewith. Pop. 4657.

RASPELAU a vil. Bohemia, circle and 89 m. S. Danzig with a church of the 14th century a school an excellent limestone quarry, and limekilns. Many of the inhabitants are weavers. Pop. 1415.

RASREGU, or **RASHAU** one of the Kurile Islands, N. Pacific Ocean, N.E. Siberia, lat. $47^{\circ} 50' N.$ lon. $153^{\circ} 30' E.$ It is about 20 m. long, and nearly the same in breadth. Like the other islands of the group it is mountainous and rocky but produces good timber, and abounds with beavers, and other furred animals.

RASREIN lake, European Turkey Bulgaria, N.E. extremity on the coast of the Black Sea, with which it communicates by several mouths. It is of a triangular shape, the base being about 80 m. long, and the other two sides from 20 m. to 25 m. each.

RASSELWITZ (DEUTSCH) a vil. Prussia, prov. Sillesia, gov. Oppeln circle Neustadt, on the Hohenstein, with a R. Catholic church, and two mills. Pop. 1777.

RASBOVA a tn. European Turkey, Bulgaria, r. bank Danube 88 m. E. by N. Silistria. The remains of a fortified barrier, constructed by the emperor Trajan, extend between this town and Kustendy on the coast of the Black Sea, a distance of about 37 m.

RASTADT a tn. Baden, circle Middle Rhine, on the Rhine, here crossed by three bridges, and on the railway from Carlsruhe to Freiburg, 80 m. N.E. Strasbourg. It is one of the fortresses of the Germanic Confederation, and a place of considerable strength, has well-built houses and spacious streets, contains a palace, a large edifice of red sandstone, in imitation of that of Versailles, the residence of the last margraves of Baden, but now uninhabited, and in a dilapidated state, an allo convent, a Protestant and three Catholic churches, a museum, town-hall, orphan asylum, lyceum, manufactory, and several schools and has miscellaneous articles in steel and hard-ware, wooden and mathematical instruments, and a considerable trade in wood and cattle. Two important congresses were

held here, one in 1714, and another in 1799. The latter terminated abruptly with the assassination of the French despot. The authors of the atrocity have never been discovered. A monument outside the town marks the spot. Pop. 6800.

RASTEDE, a vil. and par. Germany, Oldenburg, 8 m. N Oldenburg. It consists of two separate villages, and contains a parish church. Pop. 908.

RASTENBURG, a tn. Prussia, gov. and 55 m. S E Königsberg, on the Graber. It contains a castle three churches, a gymnasium, infirmary, and two hospitals, has several courts and public offices, and manufactures of woollen cloth, leather, and articles in copperware. Pop. 4556.

RASTRICK, a vil. England, co. York, W. Riding, 4 m. S.E. Halifax, with a handsome chapel, places of worship for Independents and the Society of Friends, an endowed school and other charities and extensive manufactures of fancy goods. Pop. 3917.

RAT, or **KRYV IZLAVS**, Alutian Archipelago, comprising five islands of considerable size, namely Renssopchof, Amchitka, Krye or Rat Island, Kiska, and Bonbury. Krye Island is in lat. 51° 45' N. lon. 159° 40' W.

RATJAIN, par. Ireland, Meath, 1633 ac. Pop. 816.

RAFASH, par. Ireland, Kerry, 6963 ac. Pop. 5290.

RATHY, par. Eng. Leicester 5410 ac. Pop. 1241.

RATCLIFFE, two pars. Eng. — 1 (upon-leas) Notts 970 ac. Pop. 145. — 2 (on-the-Wend) Leicester 880 ac. Pop. 128.

RATCLIFFE-ON-THE-TRENT a vil. and par. England co. and 5 m. S.E. Nottingham, on the Trent, from which it sometimes suffers by inundation. It has a parish church, a Wesleyan chapel, an endowed school, manufactures of hosiery and a wharf, at which some trade is carried on. Area of par. 1880 ac. Pop. 1778.

RATH, par. Ireland, Clare, 6489 ac. Pop. 1858.

RATH, a vil. Rhenish Prussia, gov. and near Düsseldorf. It is a straggling place, with a R. Catholic church. P. 1430.

RATHANAGH, a market tn. and par. Ireland, co. Kildare. The town, 31 m. S.W. Dublin, on the Grand canal, is tolerably well built, has a handsome church and chapels for Methodists, Friends, and R. Catholics two schools, and a dispensary. Little trade, and no manufactures. Pop. 1004. Area of par. 11 530 ac. Pop. 3544.

eldorf; with a R. Catholic and two Protestant churches.

a manor-house and an hospital. Justice-of-peace court,

and manufactures of lace and earthenware a tile-work paper-

mill and a marble quarry. Pop. 4063.

RATHBUN [German Republika] Latin *Rathbun*

French *Rathbun* a tn. Bavaria Upper Palatinate r. bank

Donau, here crossed by a stone bridge of 15 arches, about

1100 ft. long and opposite the junction of the Regen 65 m.

N. N. E. Munich. It is surrounded by old ramparts, in a some-

what dilapidated state, and is entered by six gates. It is very

lofty loopholed towers by which they are surrounded. There

are, however, several squares and handsome streets and

squares, and numerous fountains. The most remarkable

public buildings are, the cathedral founded in 1275, and one

of the finest Gothic edifices in Germany with a lofty and im-

posing front, flanked with two unadorned towers, a richly-

sculptured portal and an interior arranged with much sim-

plecity and in excellent taste and lighted by beautifully-painted

windows the church of St. Kunemann, patron of Rathbun, origi-

nally built for Scotch Benedictines, a large pile of buildings,

now converted into an extensive but not handsome palace,

the town-house, a gloomy, irregular structure adorned with

a beautiful Gothic portal and historically interesting as the

place in which, for nearly a century and a half, the imperial

diets were held the fiscal and episcopal palaces, the mint,

theatre, synagogue, public library antiquarian museum

lyceum, seminary gymnasium, picture-gallery, blind asylum,

and several monasteries and convents. The manufactures

consist of woollen and cotton goods, leather, and articles in

leather steel and hardware, porcelain, and earthenware, wax

candles, and tobacco. There are also numerous breweries and

distilleries, building-yards, dye-works, tanneries, and

various other mills. The trade for the town of Danube, with the

steam-boats which ply upon it, affords admirable facilities in

of great importance, and includes a good deal of transit. The

principal articles, in addition to the above articles of manufac-

ture, are salt, wood, and corn. Rathbun is the seat of a

bishop, the seat of a superior court of appeal courts of first

resort, a mercantile court, custom-house, and other public

offices and possesses a botanical garden, and several literary

and benevolent societies. It is an ancient place, and acquired

considerable importance under the Romans, from whom it

received the name, first of *Castra Reginum*, and then of *Aquae*

Reginae. All the buildings erected by them have disappeared,

with exception of a square, massive tower, of rough masonry

which is understood to have formed part of a Roman castle.

In more modern times it became the residence of the old

dukes of Bavaria, then rose to the rank of a free imperial

city and continued long to be the chosen seat of the imperial

diets. Before the discoveries of modern navigators opened a

new way to the East, it was the chief emporium for the pro-

vince; but soon after these discoveries trade opened for itself

other channels, and Rathbun, like the other imperial cities

of Augsburg and Nuremberg, fell rapidly into decay. It has

been repeatedly suffered much from the ravages of war. The

square which it has stood number no less than 17 and was often

accompanied with bombardments. Of these the last, and

perhaps most disastrous was in 1809 when, after an obstinate

defence by the Austrians, it was stormed by Bonaparte.

Pop. 28,000.

RATLEY, par. Eng. Warwick 1500 ac. Pop. 471.

RATLINGHOPE, par. Eng. Salop 5569 ac. P 278.

RATNAPORA [Tingalee, 'City of Jewels'] a tn.

and fort, Ceylon, beautifully situated on r. bank Kulu,

61 m. S. E. Colombo. It has but one street of contiguous

houses the others being dispersed over the face of an accli-

vity. The larger houses are painted white and yellow, and

have a foreground of beautiful green turf, with thick flower-

ing shrubs. It has a bazaar, well supplied with provisions,

and numerous shops for the sale of spices. The fort, though

inadequate to withstand any other than a native force, is

sufficient to protect the large village which lies under its walls.

Ratnapora is the seat of the gem fishery carried on chiefly

in a small tributary of the Kulu or Kulu-ganga, in the silt

and mud of which the precious stones are found. These are

principally topaz, kirschstein, and yellow and yellowish-

green sapphires. Rubies of large size, and fine sapphires, are

also found, but are extremely rare.—(Prideaux's Ceylon.)

BATTERY par. Eng. Devon, 2633 ac. Pop. 411.

BATTLESDEN par. Eng. Suffolk 2654 ac. P 1801.

BATOATH, a vill. (formerly a pari. bor.) and par. Ire-

land, co. Meath, 15 m. S. by W. Drogheda; with a neat

chapel, a handsome R. Catholic chapel, a national school, and

a dispensary. Area of par., 9385 ac. Pop. 1323.

RATONEAU a small tn. France in the Mediterranean,

dep. Bouches-du-Rhône, rather more than 2 m. W. S. W.

Marseille; the harbour of which it defends by a fort, and

several batteries which have been erected upon it.

RATHBUN.—From Trinity Church in Hamburg.

irregularly built, and the streets are generally narrow and winding. The houses are more remarkable for their antiquity than remarkable for architectural merit, though many of them have an imposing appearance, rendered more striking by the

RATOT, or **RATOLA**, a vil. Hungary, Thither Danube, co. and 4 m. from Vamperin. Though now comparatively insignificant, it was once a place of some importance. It has a church and two mills. Pop. 1306.

RATSCHEKOW, a tn. Russia, gov. Podolsk, between lofty hills, 118 m. S.E. Kamenets. It is tolerably well built, has several Greek churches, and an active trade. Pop. 1600.

RATTENBERG, a tn. Tyrol, circle Unter Inzthal on the Inn, 27 m. S.E. Innsbruck. It is walled, and was once a place of considerable strength, but the fortifications have been dismantled. It now contains the ruins of an old castle, and a handsome old church, lead, silver and copper are worked in the neighbourhood. Pop. 1050.

RATTAY, a par. Scotland, co. Perth, containing the villages of Old and New Ratray. Old Ratray lies on an elevated platform at the foot of the Grampians, and in the Shire, 15 m. N.E. Perth. It is old, and irregularly built. Contiguous to it is the neatly-built village of New Ratray which is a favourite resort for invalids. The spinning and weaving of flax is carried on to a considerable extent in both places the mills being propelled by water power. Area of par., 5 m. by 3 m. Pop. 2586.

RATZ, a vil. Hungary co. and 22 m. E. Szekesvarhely, on a lofty height, above the Danube. Much fruit, and an excellent red wine, are produced in the neighbourhood. Pop. 2190.

RATZ-ARADATS, a vil. Hungary co. Torontal on the March of Fegyver, about 8 m. from Nagy-Betsekerek. P. 1333.

RATZ-BUEHL, a tn. Prussia, prov. Pomerania, gov. and 54 m. S.E. Kolau, on the Odra or Zah. It has a court of justice, a church and manufactures of woolen and linen cloth. Pop. 1310.

RATZ-BUEHL, or **RAUBURG**, a tn. Denmark, duchy Lauenburg, on the S.E. extremity of the lake of the same name, 15 m. S.E. Lubeck. It occupies a small island, and has a very strong position, but has no facilities for trade. It is properly the capital of the duchy being the seat of the government, and the general place of meeting both for the civil and ecclesiastical authorities. It contains a handsome cathedral, situated in the N. part of the town and an important grammar-school. Pop. 3000.

RATZBURG, a vil. Hungary co. and 4 m. from Frensburg, with an extensive trade in wine, in the growth of which almost all the inhabitants are employed. Pop. 2197.

RALCBBY, two parts, Eng. Lincoln—1, (North) 3460 ac. Pop. 577—2, (South) 2430 ac. 1 op. 867.

RALDOLV, a vil. Prussia, gov. and S.E. Oppeln, in a well-wooded district, on the Radka. It has a Catholic church; tile-works, a blast furnace and other iron-works. 1 op. 1060.

RAUDNITZ, a tn. Bohemia, circle Leitmeritz, 1 bank Elbe, 24 m. N. by W. Prague. It is well built, and has a handsome church, a castle, with a good collection of paintings, and a library of 40,000 volumes, a Capuchin monastery, and a synagogue. On the crest of a hill near it is a chapel, to which numerous pilgrimages are made. Pop. 5200.

RAUDTEN, a tn. Prussia, gov. and W. Breslau on the Schwarzwasser; with a Protestant parish church, and an hospital and a worsted and several other mills. Pop. 1211.

RAUMO, a seaport tn. Russia, Finland, gov. and 51 m. N.W. Abo, on the Gulf of Bothnia. It consists of wooden houses has a church, building-yards a good harbour and a considerable trade, chiefly in wood. Pop. (1841), 1771.

RAUNDE, par. Eng. Northampton, 2680 ac. P. 1870.

RAUBER, a market tn. Upper Austria, circle and 41 m. S. Salzburg, in a valley of same name, on a height above the Embsach. It has a church, chapel, and school; a thermal spring, and four mills. Near it is a gold mine which has been partially worked from time immemorial. Pop. 1635.

RAUSCHENBERG, a tn. Hesse Cassel, Oberhessen, cap. hdl., 10 m. S.W. Marburg with two schools, and an hospital; a brewery, and two mills. Pop. 1628.

RAIBIN, 172-Niz, a market tn. Austria, Moravia, circle and 12 m. E. Bratin, in a valley, with a church and a town-house. Pop. 1074.

RAVITCHKA, or **RECHKA**, a vil. Austria, Moravia, circle Hradisch, about 80 m. from Wladikrova, with two churches, and a school. Pop. 1431.

Vol. II.

RAVANA-MIRADA, or **RAKAS-TAL**, one of the 'sacred lakes' of Tibet, in the tract of Kailas, at the source of the Sutlej river, lat. 30° 40' N. lon. 81° 10' E.; 15,000 ft. above the sea, at the S. foot of Gangdhar, a peak 25,000 ft. in height, and a few miles W. of the other sacred lake Manasarovar, the spring waters of which it receives. It is about 20 m. in length, N. to S. by an average breadth of 5 m., and at its N. extremity gives efflux to one of the head streams of the Sutlej. It is thus described by Mr. Strachey who visited it in 1848.—The varied outline of the lake, with its islands and innumerable headlands—the intense blue of its waters, glittering in the sun under a cloudless sky with snow white breakers that covered its surface and dashed against its rocky coasts—while Kailas reared its glorious dome of snow in the background—formed a picture of uncommon beauty, but the effect of the scene was greatly marred by the utter desolation of everything, and any real enjoyment was entirely destroyed by the bitter blasts of the S. wind, which did not fail to chill us to the very bones.—(Strachey in *Journal of the Royal Geog. Soc.* xxi. 63.)

RAVAAD, a vil. Hungary Thither Danube, co. and 10 m. from Raab, in a well wooded and fertile district with a R. Catholic chapel, a brewery, and a trade in corn and wine. Pop. 1260.

RAVEL, the central river of the Panjab, rises in Kulu, lat. 33° 30' N. lon. 76 E., and flows very tortuously, but mostly S.W. to its confluence with the Chenab, 35 m. N. Moolian and lat. 30° 33' N. lon. 71° 45' E. total length, estimated at 450 m., in which course it passes the towns Chumha, Blauli, Tulamba, and the city of Lahore, which last is about midway between its source and termination. Near its head it is 7000 ft. above the sea, and has been found 116 ft. across at Chumha, where it is crossed by a bridge it is 48 yds. or 50 yards broad. At the Meenae ferry about 220 m. from its source it is when fullest upwards of 500 yards in breadth, and 13 ft. deep. But from Lahore to the Chenab its banks are precipitous, it is rarely more than 150 yards across and it is fordable in most places for eight months in the year. At Lahore it divides into three principal arms, and again before its confluence with the Chenab which it joins by three mouths. It is the *Hidraotes* of Alexander's historians.—(Thornton *Gazetteer of Countries near the Indus*.)

RAVELLE, two parts, Eng. Hants—1, (Great) 2040 ac. Pop. 225—2, (Little) 760 ac. Pop. 40.

RAVELLO, a tn. Naples, prov. Principato Citra, dist. and 6 m. W. Salerno. It is the see of a bishop and has a handsome cathedral, several other churches, a monastery, nunnery and three almshouses. Pop. 1700.

RAVENDALE (East and West), par. Eng. Lincoln 1480 ac. Pop. 135.

RAVENFIELD, par. Eng. York (W. Riding) 1170 ac. 1 op. 130.

RAVENINGHAM, par. Eng. Norfolk 2416 ac. P. 284.

RAVENNA, a deleg. Italy, bounded by deleg. Ferrara, N.W. Bologna, S.W. and 4 deleg. of Tuscania S.E. deleg. Fieschi, and E. the Adriatic greatest length N.E. to S.W. about 50 m. greatest breadth, 24 m. area, 509 sq. m. In the S. it is traversed by ramifications of the Apennines, but slopes rapidly down towards the N. and N.E. terminating in the former direction in an extensive plain, and in the latter both in plains and lagoons. It belongs wholly to the basin of the Adriatic, being drained by the Po di Primaro, with its affluents Embozzo and Sento, the Lame and the Molino. The climate in the interior is agreeable, but on the coast humid, misty and insalubrious. The soil is very fertile, especially in corn, maize, leguminous crops, hemp, flax, rye, and sorghum seed, saffron, wine, oil, milk, and fruit. A great deal of salt is obtained from the marshes on the coast. Pop. 168,415.

RAVENNA, a tn. Italy, cap. above deleg. 1 bank Montone, near the confluence of the Reno, about 4 m. W. of the Adriatic, and 43 m. E. by S. Bologna. It stands in a marshy and unhealthy district, is surrounded by earthen ramparts, has a circuit of about 8 m., and being far too large for its actual population, has a dull melancholy appearance, though many of its houses are handsome, and its streets are in general regular and spacious. The principal edifices are the cathedral, founded in the fourth, but rebuilt during the last century, and adorned with some of Guido's finest paintings; the

ancient baptistry, separated from the cathedral by a street, the Basilica of San Vitale, in the pure Byzantine style, with all the accessories of Eastern splendor built in the reign of Justinian in imitation of St. Sophia at Constantinople, and adopted by Charlemagne as the model of his church at Aix-la-Chapelle; the Basilica of San Giovanni Evangelista, founded in 426, by the Emperor Galla Placidia, consisting of three naves, supported by 24 columns, and surrounded by a quadrangular colonnade, in which are two remarkable bells; the church of San Giovanni Battista, founded also by Galla Placidia, the mausoleum of Galla Placidia, containing a massive sarcophagus of Greek marble, in which the ashes of the empress lie; the palace of Theodorice, the last of the Goths, once a most magnificent structure, but reduced to a mere ruin by Charlemagne, who, with the consent of the Pope, carried away its ornaments and mosaics; the tomb of Dante consisting of a sarcophagus of Greek marble; the archbishop's palace and chapel, the townhouse, the library containing 40,000 vols., and 700 MSS., the museum, containing a rich cabinet of minerals, and the academy of the fine arts. The manufactures are almost confined to silk and are of very little importance. The trade, which was at one time extensive, has greatly fallen off, but the port is still much frequented by the trading barges of the Adriatic. This port was in early times one of the best on the coast, and large enough to contain the fleets of Augustus, but it gradually silted up so as to be rendered almost useless. The evil has been so far remedied by the family Naviglio, which is about 5 m. in length, and gives a direct communication with the sea at Porto Corsini.

Ravenna, under the emperors, became one of their greatest naval stations. During the decline of Rome, A. D. 404 Honorius made it the seat of the Western empire, and by availing himself of its strong natural position due to the morasses with which it was surrounded, and adding to its fortifications, made it almost secure against any hostile attack. During his reign and the reign of his sister Placidia, it was adorned with many of its noblest edifices. Not long after it fell into the hands of Odoacer who in his turn was expelled by Theodoric under whom it became the capital of the Goths. After two of his descendants had died the seat at Porto Corsini, the celebrated general of Justinian who used it as a storehouse and converted it to a harbor, his favorite lieutenant Theodoric, after being for nearly two centuries, was terminated by Attilius king of the Lombards, who, having captured the city, made it the metropolis of the Lombardic kingdom in 754. Pepin and Charlemagne having succeeded in expelling the Lombards, made a present of Ravenna and its ecclesiastical to the pope with whom, though not without occasional interruptions, it remained till 1859. Pop. 10,592.

RAVENSBURG a m. Wittenburg circle Danub. capital, in a valley on the Schuman, 22 m. E. N. E. Constantinople. It is walled, has three gates, and three suburbs, is irregularly built, and has three churches, one of them, the Franziskirche, a handsome edifice, several old monasteries, an hospital, porches, Latin school, and manufacturers of chocolate, oil, and paper oil-works, dye-works, breweries, silk, flax and worsted mills. Pop. 4499.

RAVENSDEN par Eng Bedford 2150 ac. P 571 RAVENSTHORPE, par Eng Northampton 1830 ac. Pop. 467.

RAYENSTONE, three par. Eng. —1 Bucks 2250 ac. Pop. 446.—2 Derby 1130 ac. Pop. 596.—3 (Dale) West-merland, 18,450 ac. Pop. 330.

RAYSTEIN, or RAYSWICK a m. Holland prov N. Brabant, 17 m. E. N. E. Middelburg on the Maas with two churches a Latin and a common school inhabitants engaged in agriculture and in trade. Pop. 875.

RAYNAGUERA, a market to Ormaiz, co. and S. W. Agraria in a mountainous district. It has a parish church. Pop. 1097.

RAWA, a m. Russia, Poland, on the small river Rawka, 43 m. S. W. Warsaw, once strongly fortified. It has four churches, an Academy seminary, and an old castle, a brewery and distillery. Pop. 18461, 4881.

RAWLIFFE, a vill. and chapel, England, co. York (W. Riding) 84 m. N. E. by S. Selby with a handsome church, places of worship for Primitive and Wesleyan Methodists, and a free school. The manufacture of socking is carried on here to a considerable extent. Pop. 1554.

RAWDEN, a chapel, England, co. York (W. Riding), 64 m. N. W. Leeds; with a chapel, places of worship for Baptists, Friends, Primitive Methodists and Wesleyans; and a school at Woodhouse Grove, for the education of the sons of Wesleyan ministers. Pop. 2657.

RAWDON, a vill. and township, Canada West, co. Hastings, on a small stream a tributary of the Trent, about 58 m. W. W. Kingston. It has recently made rapid progress, and has a distillery, two sawmills, a saw and a flour mill, and produces large quantities of maple-sugar and agricultural produce. Pop. vil. 400 township (1855) 8097.

RAWICZ, or RAWICZ, a m. Prussia, gov. and 55 m. S. Posen. It is surrounded with walls and ditches, is tolerably well built and well paved, contains a Protestant and a R. Catholic parish church, synagogue, Franciscan monastery, burgher school, and school for deserted children, orphan hospital workhouse, and house of correction, and has manufactures of woollen and flannel cloth, tobacco, hats, and tapestries, and spinning-mills, and a trade in corn and wool. P. 10,049.

RAWIL-PUR, a m. Punjab, in the doab formed by the Indus and Jellum, and midway between those rivers, 67 m. E. S. E. Attock lat. 28° 55' N., lon 73° 15' E. It is surrounded by a bastioned wall and has an old fort: its houses are low pitched and flat-roofed, streets clean. It has a good bazaar a thriving transit trade between Hindoostan and Afghanistan, and a cheerful and pleasant appearance. On its S. side is a large thoury W. of the town is a large mosque, with the shirkas of a Mahomedan saint. Rawil Pinda is highly celebrated for the beauty of its women. Pop. 8000 (Masson, in *Bombay Geog. Jour.*, vol. vi.)

RAWMARSH par Eng. York (W. Riding), 2448 ac. Pop. 2533.

RAWRETH par Eng. Essex 2377 ac. Pop. 418. RAWTENSTALL (St. Mary), a vill. and station on the E. Lancashire railway England, co. Lancaster, near Haslingden; with a handsome church, a national school, places of worship for Wesleyans and Unitarians, extensive cotton and woollen manufactures. Pop. 5635.

RAYDON, par Eng. Suffolk, 2335 ac. Pop. 555. RAYGONGE or RAYANGONG, a m. Hindostan, prov Bengal, dist Dinagpore about 940 m. N. Calcutta. It is of modern origin, but consists of narrow, dirty streets, lined with about 800 houses and 700 huts. It carries on a very extensive trade, particularly in cattle, of which 5000 bearing burdens are said to arrive daily.

RAYLEIGH, a m. and par. England, co. Essex, on Hail leigh Hay 14 m. S. E. Chelmsford. It has an ancient church in the early English style, a Baptist chapel the remains of an old castle, and a brewery and malting establishment. Area of par. 2875. Pop. 1463.

RAYMOGHEY par Ireld. Donegal 15,100 ac. P 4316. RAYMUNTERDONEY, par Ireld. Donegal 12,614 ac. Pop. 2888.

RAYNE, par Eng. Essex 1675 ac. Pop. 589.

RAYNE, par Scot. Aberdeen 11 sq. m. Pop. 1550. RAZ, or Raz du Raz, a headland, France, S. W. coast, dep. Finistere, lat. 46° 5' 24" N., lon. 4° 48' 45" W. (p.) It forms the S. entrance of the Bay of Douarnenez, and is crossed with a lighthouse 259 ft. high.

RAZA, one of the Cape Verde Islands, lat. 16° 30' N.; lon 24° 55' W. (p.) Its low and barren, and the coast steep and rocky it is inhabited by blacks only.

RAZA, or Raza, an isl. Brazil, in front of the entrance of the Bay of Niteroi or Rio-de-Janeiro. It is of an oval shape, and on it is a lighthouse. Vessels pass on either side, the depth of water being on the N. side from 15 to 20 fathoms, and flat on the S. side not much less. The width of channel on the former side is 6 m., and on the latter 4 m.

RAZES, a dist. France, which was a dependency of the former prov. Languedoc, and had Limoux for its capital. It consisted of Basle proper and Basle, now included in dep. Aude, and of Fossilles, now forming separate Prades and Fieux-Lauris, in dep. Pyrenees-Orientales.

RAZ, or Raz (Latin, Caracota), an isl. France, Bay of Biscay, about 5 m. off the coast of dep. Cherbourg-Inférieure, 6 m. W. Brest, but hid from the town by the headland of Chef de Rais; greatest length, W. N. W. to S. E. 2 m., 10 m.; breadth very irregular, being 1/2 m. more than 1 m. near the central part, where is formed a kind of isthmus, and nearly 4 m. on

either side of it. The coasts on the S. and W. are lofty and precipitous, but much indented on the N. where there are several good harbours, particularly those of the villages of Ars La Flotte, and the small town of St. Martin. The last is defended by a Citadel of considerable strength, and there are three other forts on different parts of the island. The soil is not fertile, scarcely producing either corn or pasture, but the vine thrives well, and is cultivated to some extent. A considerable extent of surface is occupied by salt marshes, from which much salt is made. This manufacture and fishing form the chief employments. There are also several fisheries of brandy, and a trade in it and in wine. In 1623, the British, to relieve the Protestants who were besieged in Rochelle, made an unsuccessful attempt on this island. Pop. 15,885.

READING, a parl and mun. for and market in England, cap. co. Berks, 1. bank Kennet, near its confluence with the Thames, 86 m. W by S. London on the Great Western railway. Though the town in general is very irregularly laid out, the principal streets are spacious, and the town generally is well paved, lighted with gas, and abundantly supplied with water. The houses are mostly of brick but a great many also are of Bath stone, they are for the most part well built, and the shops handsome. The town is rapidly extending both E. and W. It has an imposing castellated county jail and house of correction on a similar plan to that of the model prison at Pentonville, a new assize hall a spacious hospital, and a public hall, a fine edifice with a suite of apartments for the literary scientific, and mechanical institution, a small theatre, news room, and baths, three parish churches, and places of worship for Baptists Independents, Wesleyans, the Society of Friends, and E. Catholics several charitable institutions, including a blue-coat school for boys, a green-coat school for girls a public dispensary six sets of almshouses, and other minor charities. The textile manufactures of Reading, formerly various and extensive particularly the woollen manufactures, are now limited to the weaving of some coarse linen silk ribbons, and galloons, and some floor and sail cloth. There are also two or three iron-foundries, and several yards for boat building. But Reading cannot now be considered as a manufacturing place. Its present importance is derived from its being the centre of a very extensive traffic in timber, bark, hops, wool cheese, malt, beer and all the agricultural products of a very fertile district, which are forwarded by large and railway to the metropolis. The Kennet is navigable for barges of 110 tons, and on its banks are suitable wharfs. There are here the remains of a magnificent abbey founded by Henry I. who was buried within its precincts in 1135 as was also his queen, and his eldest son. Pop. 31,458.

READING, a in L. States, Pennsylvania beautifully situated in a wide basin at the foot of lofty hills and slopes, 1. bank Schuylkill, which is here crossed by two fine covered bridges, at the junction of the Union canal and Schuylkill Navigation, and on the Philadelphia and Reading railway, 50 m. N. W. Philadelphia. It is built with great regularity in straight and spacious streets, crossing each other at right angles, and dressed with a covering of white gravel, or disintegrated sandstone, which consolidates so as to be equal or superior to a macadamized road, and is amply supplied with excellent water, conducted by an aqueduct from a spring in a neighbouring hill called Penn's Mount. Many of the houses, and more especially those of the central square, are substantial and even elegant. The more important public edifices are 15 churches, among which the Lutheran and German Reformed, both handsome structures with lofty spires, are conspicuous; the courthouses, finely situated on a commanding height, presenting a very imposing appearance and adorned with a pillared portico, the prison, adjoining the courthouse; an academy, a female seminary, and several other substantial edifices. The principal public works are several large flour-mills a cotton-factory for fine muslins, of which about 80000 yards are daily produced, extensive workshops for making and repairing machinery, a saw-factory, and other iron-works, a pottery, two breweries, and several tanneries. Other important manufactures are woollen hats, which have long been extensively made for the southern and western markets; boots and shoes, castings in iron and brass, rifle-barrels, tools, and agricultural implements. The

ale and porter of the breweries are celebrated and wine of fair quality and in considerable abundance is made from extensive vineyards in the neighbouring districts. In the vicinity of the town is found in abundance, and a kind of conglomerate, which being susceptible of a high polish, is known by the name of Potomac marble. Reading was originally settled by emigrants, chiefly from Wittenberg and the Palatinates, and still retains strong indications of its origin. German is in common use, and several of the newspapers, and service in two of the churches, are in German. Pop. (1850), 15,743.

REAL, a river, Brazil, which almost during the whole of its course, of about 160 m. forms the boundary between provs. Bahia and Sergipe. It flows generally W. E., and mostly through a mountainous country where its channel is constantly obstructed by cataraets but for the last 55 m. it is free from cataraets, and has a wide and deep tidal channel. Its principal affluents are the Jaguin, Guararima, and Plumbi, all of which it receives on the right. Its mouth, about 35 m. N. E. of the Ilha de Itaparica is in lat 12° 28' 4. S.

REAL-MONTE a in Mexico, dep. and 56 m. N. N. E. Mexico, 9000 ft. above sea-level. It was long famous for its mines, which are still partially worked. A few miles N. E. is the celebrated cascade of Regia.

REALLEJO a maritime in Central America, state Nicaragua, on a bay of the Pacific, 28 m. W. W. Leon; lat 13° 27' 54" N. lon 87° 9' 30" W. (a.) It has an excellent harbour, composed of a salt-water creek, into which several streams empty themselves. The entrance is protected by an island about 3 m. long which leaves a channel at either end by which ships may enter the larger of the two being a quarter of a mile wide inside is a noble basin, nowhere less than 4 fathoms deep, with a mud bottom, and capable of containing 200 ships of the line in security. It exports some indigo, cotton, sugar mahogany and other timber, and is one of the ports used for passenger traffic by Lake Nicaragua to California. Pop. 3000.

REALLEJO DE ANJOS a vil Canaries, 1st Tenerife, in the delicious valley of Orotava, about 2 m. from the sea. It has a townhouse, prison an elementary school a granary church several suppressed convents whose churches are used for public worship, and near it numerous hamlets. It has also two flour-mills, and a brewery-distillery. Pop. 3237.

REALLEJO DE ADELA, a vil Canaries, 2d Tenerife at the foot of a high chain of hills. It has a church, several primary schools, and two flour-mills, and supplies the neighbouring villages with firewood charcoal and fruit. P. 8865.

REALMONT (anc. Regalis Mons), a in France, dep. Tarn 12 m. S by E Alby. It is built with great regularity, has an extensive public square, surrounded by a fine walk, manufactures of crapes, serge, and linen, and excellent bleach fields. Pop. 2238.

REALSEY, par Eng Leicester, 1800 ac. Pop. 509.

REAY, par Scot. Caithness, 18 m. by 9 m. Pop. 2506.

REBAIA, a vil and com Belgium, prov. Namur, on the Dendre, 18 m. S. E. Tournay with manufactures of linen, earthenware and tiles for roofing and pavement; two breweries and a trade in corn. Pop. 1092.

REBEQ-BOARON a vil. and com Belgium prov. Brabant, on the Sene, 18 m. S. S. W. Brussels. It has manufactures of tobacco lace, thread and wicker-work, two mills tile-works and pavement quarries. Pop. 8840.

REBIBSORA or Kie-BESHA a vil Austria Transylvania, 18 m. from Bistritz, headquarters of a Walachian frontier regiment. Pop. 1500.

REBSTLIN, a vil. and par Switzerland, can and S. E. St. Gall with a Protestant church, a K. Catholic chapel, and three schools. Many of the females are employed in tannery. On a neighbouring hill stands the castle of the same name. Pop. 1611.

RECALLI, a vil Naples, prov. Lavoro. S. W. Caserta; with two churches. Pop. 1500.

RECANATI (Latin Rechinatus), a in Italy, deleg. and 9 m. N. E. Macerata, on a lofty and commanding eminence. It contains many the palace, a cathedral with a Gothic doorway, and richly-carved roof several other churches, and a townhouse. Near it is a splendid aqueduct communicating with the subterranean channels, which convey water to Loretto. Pop. 8000.

RECCA, or **RUSA**, a river, Austria, Myria, rises in the R. of Stralsburg, prov. Lauenburg, flows S. W., then N. W., and at the village of Cansdau, 18 m. S. N. E. Trilow, plunges into a chain and suddenly disappears into the sea, about 80 m.

RECCO, a in Italy, Piedmont, div. and 14, m. E. S. E. Genoa on the Gulf of Genoa. It has spacious but ill-furnished streets, a large church, a handsome oratory, a convent with a church attached and a townhouse, in which the public schools are kept. The trade is chiefly in linen, flax, thread, oil, and fruit. Some small vessels are built. Pop. 4557

RECHE, a vii. Prussia, Westphalia, prov. Münster circle Tecklenburg, with a R. Catholic church, and a trade in cattle. Pop. 1540

RECHERCHÉ BAY Van Diemen's Land near the entrance into D'Entrecasteaux Channel lat. 43° 35' S., lon. 147° 5' E.

RECHNITZ, a in Hungary, see **BOHOSCH**.

RECHTENBACH a vii. Bavaria, Palatinate, near Burg-sheim with a church. Pop. 1097

RECIFE, a tu. and seaport, Brazil. See **PERNAMBUCO**.

RECHUJA VO, a in Naples, prov. Principato-Lite dist. and 20 m. E. Capua, on a mountain r. bank Pla-tau. Pop. 1620

RECHT, or **RECHT**, a in Bohemia, circle Tabor, with a church, a chapel, a castle, and a mill. Pop. 1360

RECKEN a vii. and com. Belgium, prov. W. Flanders 26½ m. S. Bruges, r. bank Lys weaving dyers, and tan-ning are carried on. Pop. 2347

RECKENBACH a vii. Bavaria, Lower Franconia N. W. Hamburg on the Elbe with a church and castle. Pop. 1154

RECKHEIM, a vii. and com. Belgium, prov. Luxemburg, 15 m. E. Hessel. It has a large depot-de-marchandise for the vignette of provs. Liège and Luxemburg. The market is employed in making stockings, gloves, and other articles of dress. Pop. 1045

RECKLINGHAUSEN a tu. Prussia Westphalia, prov. and 29 m. S. W. Münster on the Halbeck with a court of justice, four churches and a castle, manufactures of linen, a brewery distillery and trade in linen. Pop. 3501

RECLUS and **RECLUS**, a vii. France dep. Savoie, at the foot of Little St. Bernard near l. bank lake. It is poorly built, consisting of a few narrow streets with side pavements, raised from fl. to r. to prevent the water in descending from the mountain forests from penetrating into the houses. It has manufactures of woollen cloth, and some trade in cattle and dairy produce. Pop. 1840

RECHARD a vii. kind of Italy, gov. Venice prov. and 20 m. N. W. Venedice, near the source of the Agno. It contains a church and two oratories. Near it are mineral springs said to be very efficacious in liver complaint and extensive quarries of pyrites, sulfates, and red marble. Pop. 3173

RECHTER, prov. Eng. Kent, 1653 ac. Pop. 278.

RED, a river, British America, which rises on the E. side of the Rocky Mountains, expands into a lake of same name, flows S. E. and after a course of about 80 m., joins r. bank Saskatchewan lat. 50° 44' N., lon. 110° 5' W.

RED-LAKE, a river U. States, rises near the sources of the Mississippi issuing from a lake of same name, flows W. S. W. and joins r. bank Red River after a course of about 100 m. Red lake, from which it issues, is about 25 m. long, by 6 m. broad.

RED RIVER, a large river U. States, rising at the base of the Rocky Mountains, in New Mexico. It flows E. S. E. forming the boundary between Texas and the Indian territory and between Texas and Arkansas. In the latter state it turns S. E. and falls into the Mississippi, 125 m. W. New Orleans, total course, above 1000 m. chief affluents—the Washita, which joins it in Louisiana; and the False Washita, which it receives in the Indian territory. Much of its course is through rich prairie, with red soil, which colours the water. About 100 m. above Nashitoches, which lies 100 m. above the mouth of the stream, commences a swampy expansion of the river called the Red, 70 m. long, and 20 m. to 30 m. wide, produced by the river dividing into a number of channels, sometimes shallow, which have been obstructed by fallen trees and other matter brought down by the stream. No solid is many places had the Red become, that willows and grass were growing in the soil among the trees.

At great expense this obstruction has been cleared away so far as to admit the passage of steam-boats. About 4 m. above Nashitoches, the various channels again unite, soon, however, again to separate into numerous channels and bays.

RED RIVER (Nouva) a river, N. America, rises in the Minnesota territory U. States flows N. into British N. America, and falls into Lake Winnipeg, after a course of about 800 m. On this river is a settlement of same name, belonging to the Hudson's Bay Company.

RED SEA, or **ARABIAN GULF** [anc. *Mare Rubrum*, *Mare Erythraeum*, or *Sinus Arabicus*, French *Mer Rouge*, *Golfo Arabico*, German, *Das Rote Meer*, Arabic *Marbabian*, Arabic, *Bahr-el-Hijaz*, Sea of Hejaz] a branch of the Indian Ocean communicating with it by the Strait of Bab-el-Mandeb, stretching in a N. N. W. direction between Arabia on the E. and Abyssinia, Nubia, and Egypt on the W. and only separated from the Mediterranean on the N. by the Isthmus of Suez, which where narrowest, does not exceed 80 m. across; it forms a very long and comparatively narrow expanse, stretching for 1430 m. with a breadth which where widest, as on the tropic of Cancer does not exceed 300 m. and in general averages about 180 m., but diminishes gradually both at its S. and N. extremities having at the former across the strait a width of only 14½ m. further south by the Isthmus of Perim are two channels, a larger on the E. of 11 m., and a less on the W. of 1½ m., and sinking at the latter into two branches, the one of which, forming the Gulf of Akaba, penetrates by E. into Arabia for about 100 m., with an average breadth of about 15 m., while the other forming the Gulf of Suez, follows the general direction of the sea, and penetrates between Arabia and Egypt for about 200 m., with an average breadth of about 20 m. In the fork between these two branches is the celebrated Mount Sinai or Jebel Musa (Mount of Moses). The shores, both on the E. and W. coast generally of a low tract, mostly sandy though sometimes in swampy varying in width from 10 m. to 50 m. and suddenly terminated by the abutments of a lofty table-land, of 2000 ft. to 6000 ft. high. The Red Sea may thus be considered as occupying the bottom of an immense longitudinal valley which probably at one time extended between the table-lands without interruption but has since been partially filled up by coral-workings which, extending in parallel lines at a short distance from either coast have subdivided the sea into three different channels, and have also studied its shores with numerous small islands. In the main channel the depth sometimes exceeds 250 fathoms and is supposed to average at least 100 fathoms, but diminishes towards the extremities where the depth in general does not exceed from 40 to 50 fathoms. In the Gulf of Suez this depth gradually decreases to 30 fathoms, and still continues to shoal till at the harbour of Suez it amounts to only 8 fathoms. In the Gulf of Akaba, on the contrary the depth of the main channel is fully maintained, and apparently, in some places, even exceeded. The currents of the Red Sea are entirely the result of its prevailing winds. From October to May when the West Winds generally with great consistency from the S. a strong current is formed in the Strait of Bab-el-Mandeb and proceeding S. accumulates the water so much as to produce a general run of level of about 2 ft.; from May to October, on the contrary the N. wind continues to blow without interruption, but with such force and consistency as both to give the current a S. direction and carry off the 2 ft. of level which had been previously accumulated. These winds, however, proceeding either directly N. or S. affect only the main body of the sea, and leave a considerable belt along the coast subject to alternations of land and sea breezes and not unfrequently to sudden squalls. This chief danger to navigation, however, arises not from these, but from the number of shallow reefs, of the presence of which no previous intimation is given, as the sea never breaks upon them. This absence of breakers is at tempted to be accounted for by the porous nature of the coral, which offers so little resistance to the sea, that it diffuses itself through it without commotion, as if it were passing through a sieve. The principal harbours of the Red Sea are on the Arabian coast, Suez, and Suez, and Massara; and on the Arabian coast, Jidda, Hodeida, and Massara. The trade from shore to shore is not of much importance, consisting chiefly of the transport of pilgrims, considerable numbers of slaves, and some goods from Egypt, but a much more im-

portant trade has recently risen up in consequence of the opening up of the old route from Europe to India across the Isthmus of Suez, and along the Red Sea. It was that part of the Red Sea, called the Gulf of Suez, that the Israelites crossed in their flight from Egypt.

REDBETH, par Water, Farnborough 300 sq P 187

REDBOURN, a vil and par England co. Hertford, 4 m. N W St. Albans. It has a church situated about 1 m. from the village, and places of worship for Baptists, Independents, and Wesleyans. Area of par 4515 ac. Pop. 2085

REDBOURNE, par Eng. Lincoln; 864 ac. Pop. 854

REDBRIDGE, a hamlet, England, co. Hants, 3 m W N W Southampton, near the termination of the Andover canal, at the head of Southampton water and on the Southampton and Dorchester railway. It is a large and populous place, of ancient origin, and has building yards, a large brewery, and a considerable trade, exporting grain, and importing coal, timber and slates, &c.

REDCAR, a township and watering place, England, co. York (N Riding) 6 m. N Guseborough, on the Stockton and Darlington railway; with a chapel, places of worship for Primitive and Wesleyan Methodists; a school and a productive fishery off the coast. Pop. 1033

REETZ, a market in England, co. York (N Riding), 47 m. N W York at the junction of the Aike and the Swale. It has two endowed schools and extensive lead mines. Pop. 1844

REETZ a vil and com. Belgium prov. and 10 m. S Antwerp, on the road to Boom. It has three breweries a tannery several mills, and a trade in corn and cattle. P 1262

REETZ, numerous small places Prussia. The only one deserving of notice is a tn, prov. Brandenburg gov. and 3 m. N E Frankfurt, on a height above 1 bank Elbe, with a church, manufactures of woollen cloth and hats, and a trade in horses and cattle. Pop. 1899

REFOYOS two places, Portugal —1, (de Bate) A tn and par, prov. Minho, com. Guimarães, near r. bank Tago, about 20 m. from Braga. —2, (de Bate d'Alto) A tn and par, prov. Douro, 15 m. from Oporto. Pop. 680

REGA a river Prussia, prov. Pomerania, formed by the Old and New Rega, about 6 m. S W Stettin. The united stream flows N W but very circuitously, and falls into the Baltic after a course of about 70 m.

REGALATO, a tn. Italy, prov. and 26 m. W N W Catania, near r. bank Salto, with a college. Pop. about 6000.
REGELLA, a vil. and com. Tuscany, comp. and 18 m. E S E. Florence, in the Upper Val d'Arno, S. side of Mount Vallombrosa near the torrent Botta. It has a court of justice, and a parish church. Pop. 9000.

REGEN, a market tn. Lower Bavaria, cap. dist. and on a river of its name, 30 m. N N W Passau; with four churches, numerous breweries, and a trade in cattle. Pop. 1220.

REGEN, a river, Bavaria, rises on the W side of the Rottenwald, near the frontiers of Bohemia, flows N W to Cham, then W, and lastly S, to its junction with 1 bank Danube, opposite to Maitshon total course, nearly 90 m., affluents, the W. side and the Cham.

REGENSBURG, a tn. Bavaria. See Ratisbon.

REGENSTALF, a tn. Bavaria, Upper Palatinat, on the Regan, here crossed by a bridge, 7 m. N N E. Ratisbon, with three churches, an infirmary, the ruins of a fine old castle, and manufactures of potash and saltpetre, a brewery, and saw, bark, and flour mills. Pop. 1565.

REGEN'S SW ORD a remarkable peninsula, China, between the Yellow Sea and the Gulf of Leaoang.

REGENWALDE, a tn. Prussia, gov. and 42 m. N E. Stettin, r. bank Rega. It is walled has three gates, a church, a castle and tan oil, walk, and saw mill. Pop. 2402.

REGGIO, or **RAVIA ALOPACATA**, a town, (from *Regium* / *Regia*) a tn. and seaport, Italy, cap. prov. Calabria-Ultra I. in a fertile plain, E. coast the Strait, and 9 m. S E. town of Mesima lat. 38° 5' 54" N lon. 15° 40' E. (u.) It is walled, flanked with towers, and has several extensive suburbs. The old town was almost entirely destroyed by the great earthquake of 1783, and a new town has gradually risen up built on a regular and uniform plan, with good houses and spacious streets. The principal edifices are the cathedral a collegiate and ten parochial churches, seven convents, a royal college, an university and a founding hospital. It has manufactures of silk goods, linen, common pottery, ceramics, and other sorts of perfume stockings and gloves, made of the filaments of the Plant, a marine bivalve a considerable trade in oil and silk, and an active fishery. Reggio is the seat of an archbishop and of a high criminal and civil court. It was founded under the name of *Phlebia*, by a Greek colony 700 years B.C. After it had risen to great importance, it was besieged, and starved into an unconditional surrender by Dionysius, tyrant of Syracuse, who carried off most of its inhabitants as slaves. It recovered its liberty under his son Agathocles, but ultimately fell under the Roman yoke, and became a municipal town. Julius Caesar did much for its improvement, and changed its name to *Rhegium Julii*. From the Romans it passed first to the Goths, next to the Normans, and then to Ferdinand of Aragon, king of Naples. During the 16th century it was twice reduced to ashes, in 1544, by Barbarossa, and in 1553 by Mustafa Pasha. Its last great calamity was the earthquake of 1783, which made it almost a complete ruin. Pop. (1850), 18,483.

REGGIO (anc. *Regium Lepide*) a tn. Italy, duchy and 15 m. W N W. It is a beautiful country, near 1. head Crustino, and on the canal of Tuscany. It is surrounded by ramparts, and defended by a citadel, is well built, has regular streets, several of them lined with porticoes and many handsome houses, in the one of a library, the seat of several courts and public offices, and has an ancient cathedral adorned with marble columns, and several fine statues of Clement, several other churches, among which that of Madonna della Ghara, in the form of a Greek cross, and adorned with numerous frescoes, is considered the chief ornament of the town, a handsome townhouse, library, museum, library, theatre, manufactures of linen and silk goods, and of articles in bone, bone, and ivory, a trade in cattle and wine, and a large annual fair. Reggio is the birthplace of Ariosto. P. 16,000.

REGGIO (Latin, *Regium*), a tn. and com. Parma, duchy and 7 m. E. Gualtiera, with a court of justice, a church, a picturesque-ruined castle, an elegant theatre, primary and musical schools, an hospital, and a trade in corn and wine. Pop. 5363.

REGILL, a vil. and com. Spain, Biscay prov. Guipuzcoa, at the foot of Mount Harro, about 10 m. from Tolosa with a church a good schoolhouse, a school, and a trade in corn and wool. Pop. 1545.

REGNITZ, a river Bavaria, which, formed at Furth by the junction of the Rednitz and Pegnitz, becomes immediately navigable, passes the towns of Erlangen, Forchheim, and Bamberg, and about 3 m. below the last joins 1. bank Main, after a course of 40 m.

REGOIA, or **PRADO REGOIA**, a vil. and par. Portugal, r. bank Douro, 4 m. N N W Lamego with a Latin school, extensive vine culture, and a handsome quay. Pop. 1902.

REGOLY, or **REGOLY**, a market tn. Hungary, Thither Danube, co. Tolna and 84 m. N E. Pesth, on the edge of an extensive marsh, where the Koppány joins the Kapos, has a church, the ruins of an ancient castle, two mills, and some trade in wine and cattle. Pop. 1556.

REGUAIN, or **FLAT ISLAND**, Bay of Bengal, off coast of Aracan, 8 E. Cheduba lat. 16° 30' N lon. 92° 45' E; is remarkable as being a fourth to the three localities of the Old World previously known, in which the straits are undergoing a process of upheaval. These localities were Scandinavia, and the countries of the Baltic generally the W coast of Italy and the coasts of Ostia. In Reguain, which, like the other islands in the vicinity, presents visible marks of subterranean fire, the ascertained rise, which is said to have commenced with a great earthquake in 1720, or 1760 is from 9 to 12 ft., but in other islands to the N and more especially in Cheduba, the rise is 25 ft. The upheaval in a greater or less degree extends S E by S, to 3 W by N, over a tract 100 m. long, and varying from a very narrow strip to 30 m. broad and is in the line of prolongation of the great volcanic belt of the Sund Islands.

REGUISHEIM, or **RECHEN** a vil. France dep. Haut-Rhin, 14 m. S. Colmar, r. bank Ill, near the canal of Neufbrunach. Pop. 2201.

REHA, or **ROMA**, a tn. Anatolia Turkey. See **OSMAN KEHAU**, or **KACMAN**, a market tn. Bavaria, Upper Franconia, on the Gröbenbach 29 m. N E. Bamberg with an extensive brewery and a flax, cotton, and several other mills. Pop. 1600.

REHNBURG, a tn. Hanover, principality Calenberg in the vicinity of the Steinhuder lake, 23 m. W N W Hanover. It has a bathing establishment supplied by chalybeate and sulphurous springs, which are in considerable repute. Coal is worked in the neighbourhood. Pop. of tn. 1825.

REHETOBEL a tn. and par. Switzerland, can. and N. E. Appenzell, with a church, inhabitants chiefly employed in weaving and the rearing of cattle. Pop. 1658.

REHMEN, a vil. France, Westphalia, gov. and 7 m. S W Münster, 1. bank Weser at the confluence of the Werre. It has a church, extensive salt-works, and a trade in cattle. Pop. 1912.

REHMUTPOOR, a tn. Hindoostan, pres. Bombay, prov. Belapur on an affluent of the Krishna, about 14 m. from Satara. It contains several Hindoo temples.

REHNA a tn. Meklenburg Schwerin, 1. bank Rodegast, 19 m. W N W Solvorn, entered by four gates. It has two public squares, a church, townhouse, and savings' bank, manufactures of woollens, and several breweries and distilleries. Pop. 2578.

REIHESDORF a tn. Saxony, circle Bautzen, on the right 4 m. E. Zittau with a church, and a cattle manufactures of linen, a brewery, and distillery. Pop. 1013.

REICHELHEIM two places, Germany.—1. A tn. Hesse-Darmstadt, prov. Starkenburg 6 m. N W Erbach, at the foot of a hill crowned by the ruins of an old castle. It has a church. Pop. 1240.—2. A vil. Hesse, on the Morfeld, 19 m. N E. Frankfurt, with a church, manufactures of linen, and several distilleries. Pop. 761.

REICHENAU, a vil. Bohemia. See **REICHENAU**.
REICHENAU, several places, Bohemia, government—1. (or **REICHENAU**, or **REICHENAU**, (Latin, *Reichenau*), A tn., circle and 9 m. E. E. Kladsko, on the Elbe, with a demerary church, two castles, an old and a new, the latter one of the handsome buildings of the kind in Bohemia, a Plarist college, not now used; a townhouse, gymnasium, two hospitals, and manufactures of cloth. Pop. 3500.—2. (or **REICHENAU**), A vil., circle Leitmeritz, 56 m. N N E Prague; with a church; inhabitants chiefly employed in rearing and spinning silk, and weaving and bleaching linen. Pop. 1636.—3. A vil., circle and 15 m. N E. Brumitz, on both sides of the Moldau. It has a church, a school, a saw and three other

mills. Pop. 2222.—4, (New, or **Neu-Rickow**), a vil., circle Taber, with a church and a castle. Pop. 1047

REICHENAU a vil. Saxony, circle Bautzen, on the Odra, 7 m. S. Bism, with two churches and manufactures of linen and ribbons, dye-works, bleachfields, and several mills. Pop. 6663.

REICHENAU, or **MUTTENAU**, an isl. Baden, on that part of Lake Constance named Untere, 4 m. W W Constance. It is of a triangular shape, and about 3 m. long and 1 m. broad. It is covered with vineyards, and divided into three parishes. It once possessed a famous Benedictine abbey the abbots of which acquired large domains, and became princes of the empire. Pop. 1265.

REICHENAU, or **REICHENOW**, vil. Austria, Moravia, circle Olmütz, 9 m. from Gröben with a church. Pop. 1689.

REICHENAU (Alt), a vil. Prussia, Silesia, gov. and 22 m. S. Liegnitz with a Protestant and two R. Catholic churches, and several mills. Pop. 1813

REICHENBACH, two places, Prussia:—1 A to gov. and 30 m. S.W. Breslau, r. bank Peile. It is walled, flanked with towers and bastions, and has four suburbs, several courts and offices a Protestant and three R. Catholic churches a townhouse, castle, and several schools, extensive woollen and cotton manufactures, bleachfields, dye-works, and oil and vinegar works. Pop. 5478.—2 A to gov. and W Liegnitz with a Protestant church and hospital, manufactures of silk, linen, and several mills. Pop. 1153

REICHENBACH a in Saxony, circle and 7 m. S.E. Zwickau. It has two churches, schools; manufactures of woollen linen, and cotton goods hosiery, and stone-ware, worsted, flax, and cotton mills; dye-works and bleachfields and a considerable trade. Böttger, the antiquary, was born here. Pop. 5616

REICHENBERG, or **LAMSK**, a in Bohemia circle Buns-lau, in a fertile wooded district on the Neisse 56 m. N N.E. Prague. It consists of the town proper and a suburb called (Christiansburg, and is after Prague, the largest town in Bohemia. It is well built, but has many irregular, uneven, and narrow streets. It contains two churches a schoolhouse, one of the largest and finest buildings of the kind in the kingdom, an elegant theatre, musical and several other schools, an infirmary and poorhouse. Linen and woollen cloths are extensively manufactured, and form important branches of trade. Pop. 18 600.

REICHENVALL, a in Upper Bavaria, in a wide and beautiful valley, 65 m. S.E. Munich, r. bank Isar here crossed by two bridges. It has four churches, a townhouse, and hospital, and one of the most important salt-works in the kingdom. The salt is obtained from 30 springs, and the annual produce averages 12 000 tons. In 1817 after great expense, and by the genius of the celebrated engineer Kutschenbach these springs were brought into connection with those of Trausnitz and Rosenberg and the salt-works of Berchtesgaden, by a conduit carried above 50 m. over hills and valleys. Pop. 2650.

REICHENSAUSEN a vil. Hesse-Cassel Niederhessen circle and 4 m. S.W. Eschwege with a church. Pop. 1689

REICHENSTEIN a in Prussia, gov. and 45 m. S.W. Breslau with a Protestant and R. Catholic church an hospital, and manufactures of woollen and cotton goods, potash, rice, starch, snuff and gunpowder. In the 16th century there were mines here which produced about 25 000 ducats of gold. At present, arsenic is the only mineral actually worked. Pop. 1972

REICHENSTEIN (Unter), **BAVERN** or **REICHENSTEIN**, a village in Bohemia circle Pilsen, r. bank Waidau, 30 m. S.E. Klatzau, with a church and glass works. Pop. 1684.

REICHENHOFFEN, a in France, dep. Bas-Rhin, 32 m. N.W. Strasbourg; with a paper mill, an iron work, and a considerable trade in madder, which is extensively grown in the neighbourhood, and in gypsum, which is extensively used for agricultural purposes. Pop. 2823.

REICHTADT, or **EKART** a in Bohemia, circle Buns-lau, at the foot of the Kammberg, 43 m. N N.E. Prague with a church, castle, Cistercian monastery, and school, considerable manufactures of cloth, cotton, and wax cloth. The son of Napoleon Bonaparte held his title of duke from this town. Pop. 1900.

REICHTADT (Ossa and Nieren), two contiguous vils Saxony, circle Dresden, bail and near Dippoldswalde, with a church a castle, and six mills. Pop. 1056.

REICHTHAL, a in Prussia, gov. and 85 m. E. Breslau, on the Spandau, with a R. Catholic church, townhouse, school, hospital, and a trade in cattle. Pop. 1133.

REIDIA a river Russia, near m. S.W. extremity of gov. Novgorod, flows N. and after a course of about 90 m. joins the bank Lobat, near its mouth in Lake Imaen.

REIF a in Tyrol. See Riva

REIFENBERG a vil. Austria, Myria, circle and near Gitz, on the Brenzau, with a church and two castles. Pop. 1290.

REID (La) a vil and com. Belgium, prov. and 16 m. S.E. Lodge, on the Wesy and the Ambieve. It has limestone quarries, brickworks, and a flour-mill. Pop. 1899

REIGATE a part bor. market, and par. England on Surrey the town 19 m. S.S.W. London on the railway to Brighton on a branch of the Mole; stands on a bed of fine white sand much used in the manufacture of glass, and has a small townhall in the market-place an ancient church, built of squared limestone, with an embattled tower and some interesting monuments, places of worship for the Society of Friends and Independents, a free grammar and a national school, a lunatic institute, and several churches. Reigate returns a member to Parliament. Pop. bor., 1640 Area of par. 6009 ac. Pop. 4227

REIGHTON, or **REIGHTON** par. Eng. York (E. Riding); 1818 ac. Pop. 247

REIGNIER a vil and com. France dep. Haute Savoie prov. Faucigny near l. bank Arve. It is a straggling place with a court of justice, and a trade partly in wine, but chiefly in cattle and dairy produce. Pop. 1709

REIGOLDSWILL, a vil. and par. Switzerland, can Basel, Switzerland, 12 m. S.S.E. Basel in the valley 1650 ft. above the sea. It has a good church, parsonage, school-house, and a savings bank many of the inhabitants are employed in weaving silk ribbons. Pop. 1108.

REIKIAVIK **REIKIAVIK** or **REIKIAVIK** (Danish **Rei-kiev**) a seaport and cap. of Iceland on the S.W. coast, and a tongue of land which projects into the Faxaflói lat. 64° 8' 24" N. and lon. 21° 55' 15" W. (N) It is the seat of a bishop, the seat of government, and residence of the principal authorities of the island and has a cathedral, a superior grammar-school an observatory a public library some manufactures of coarse woollens a good harbour at which a considerable trade is carried on and an important annual fair. Pop. 900

REIL a vil. Prussia gov. Treves, on the Moselle, with a chapel and an iron-mill. Pop. 1438

REILINGEN a vil. Baden circle Lower Rhine, bail Schwetzingen with a church. Pop. 1371

REIMA, a in France. See Rimsau.

REINACH, or **REINACH** a in, and par. Switzerland, can Aargau, 18 m. S.E. Aarau. It is a stirring manufacturing place, with an extensive cotton printfield and a saw and two flour mills. Pop. 2870

REINEPZ, or **REINEPZ**, a in Prussia, gov. and 65 m. S.S.W. Breslau l. bank Gleiser Westritz, and the Kossbach. It is surrounded by mountains has two churches and an hospital; manufactures of woollen and linen cloth leather, and paper a worsted two saw and several other mills. Near it, in a secluded valley are mineral springs, with a bathing establishment, much frequented in summer and a few miles N. of the town is the Heuschnee, or Heuschnee (Hay barn) so called from its shape, and presenting a vast assemblage of detached rocks of fantastic forms. The highest, called Grom-vaters Stuhl (Grandfather's Chair) is 2800 ft. above the sea. Near it is a much-frequented pilgrimage church. P. 2846.

REINNET, Cape Colony. See GRAAF-REINNET

REINFELD a vil. Denmark. duchy Holstein cap. bail of same name, in a beautiful district, on the Helmsse, 11 m. W S.W. Lütbeck. It is well built, and contains the remains of an old castle. Pop. 900.—The bail. N. of the Travé has an area of 85 sq. m. Pop. 2200

REINHEIM a in Hesse-Darmstadt, prov. Starkenburg near Dieburg. It is an ancient place, surrounded by walls and ramparts, and has two parish churches, a synagogue, and three mills. Pop. 1196.

REINOSA, or **REYRUSA**, a mountain chain, Spain, between provs Burgos and Santander. It detaches itself from the S. slope of the Cantabrian mountains, and stretches N W to S.E., terminating near the environs of Burgos. It gives rise to the Ebro on the E., and the Pisuerga on the S.W. The latter currents are covered with snow during the far greater part of the year, but the slopes are covered with forests, containing excellent marble timber.

REINOSA, a *tu. Spain*, prov and 33 m. S.S.W. Santander on the Ebro, here crossed by a fine bridge. It has an elegant townhouse, public schools for both sexes, a church an hospital, hermitage, two convents, and two public promenades; manufactures of woollen and linen, several flour mills, and a considerable traffic in grain and flour. P. 1734.

REINSDORF, a *vil. Saxony* circle Zwickau, bail Wildenfels, with two churches, manufactures of linen, three mills, mineral springs, coal mines, and a trade in fruit and furs. Pop. 1003.

REINSTEADT a *vil. Saxony-Altenburg*, near Kahla, on the Selke, with a church and a fine manor-house. P. 1154.

REINSWALDE, a *vil. Prussia*, prov Brandenburg gov Frankfurt, circle Borsa, with a church. Pop. 1152.

REISCH or **REZ REUSCH**, a market to Austria, Moravia, circle Igla. It has a church, a Premontrean abbey with an extensive library and a chapel. Pop. 1040.

REISCHDURF or **REUSCHDURF**, a *vil. Bohemia* circle and 18 m. from Hana, with a church, a school, and limestone quarries. Pop. 1918.

REISEN or **REYSEYA**, a *vil. Prussia* gov and 45 m. S.W. Posen, with a palace belonging to Prince Sulkowsky and one of the finest in Poland, a Piarist college and two R. Catholic churches, and manufactures of woollen and linen cloth. Pop. 1170.

REISE, par *Irel. Waterford* 9227 ac. Pop. 884.

REITENDORF, a *vil. Austria*, Moravia, circle Olmütz, with a church, a castle, an hospital and a mill. Pop. 1640.

REITH a *vil. Tyrol*, circle Schwyz, with a church and a chapel. Pop. 1125.

REKAM, or **RIKAM**, two places, Hungary:—1. A market, Thuder Thelcs, co. and 12 m. N.E. Temeswar with a church. Pop. 2068.—2. A *vil. Hither Danube*, co. Pesth. Pop. 2613.

RELLICKMURRY and **ATHAMAL**, par *Irel. Tipperary* 12,208 ac. Pop. 864.

RELLYN a *tu. Spain*, Valencia, prov and 22 m. N.E. Albufera, with crooked and steep streets, a bad townhouse, a granary, and an hospital in ruins. Two elementary schools, a church and chapel and a hermitage. Agriculture, three oil mills, five flour-mills, and a few looms for domestic linens employ the inhabitants. Pop. 2433.

REMAGEN or **REINMAGEN** a *tu. Prussia* gov and 23 m. N.W. Coblenz, 1 bank Rhine. It is surrounded with walls and ditches, entered by five gates, and contains a Protestant and a R. Catholic church. It was founded by a Roman colony. Pop. 1786.

REMBANG a *prov. Java*, bounded, N by the Java Sea, E. prov Soerabaya, S.E. Kediri, S. Madelon, and W. Seurawak. It is fertile, but not mountainous, no highest peaks being under 2000 ft., and with several smaller peaks only one navigable stream, the Solo. The country along the coast is little better than a dry barren sand-waste, and inland it is stony and rocky and for the most part covered with thick date forests. In short, only about an eighth part of the area is capable of cultivation. Rice, tobacco, and vegetables are the chief products, some timber is floated down the Solo, some trade is done in rice and turmeric, and in importing gambier, and some sugar is manufactured in two districts. Ship-building to a limited extent is carried on at the ports of Rembang, Dancong, Galangan, and Bangor. Rembang is rich in old holy graves, held in great respect by the Javanese. Pop. 460,000.

REMBANG a *tu. Java*, above prov on a deep bay on the N. coast, W. of the river Rembang, and 60 m. W.N.W. Temeswar lat. 6° 40' 50" S.; lon. 111° 17' E. (a). It is a lively thriving town, with a roseny bazaar, a good hospital, a mosque, a school, and some other respectable buildings. Its harbor one of the best in the island, is protected by a point named Oeding-Bender, which stretches far into the sea, and by some islands, among which are the two Brothers. It

has a good trade in ship-timber, and in ship-building, and exports it as valuable sale-pine.

REMEDIOA, a *tu. New Granada*, dep. Cundinamarca, prov and 87 m. N.E. Antioquia. Its gold-mines, formerly so rich, are abandoned, but it has some trade in timber. Pop. 4000.

REMENTHAM, par *Eng. Berks* 1590 ac. P. 486.

REMETE, **REMETE**, or **REMETE**, a market to Ham gary, Hither Thelcs, co. Zepa, on the Grinles, 58 m. N.W. Kemplin, with a Protestant and a R. Catholic church, brewery, and brandy distillery. Pop. 2143.

REMETE, or **REMETE**, a *vil. Austria*, Transylvania, co. Nieder-Welsenburg, on the Klygo-Putaka, near the junction with 1 bank Mara, 16 m. N. Karlsburg. It contains a Greek united church and has mineral springs. Pop. 2690.

REMICHA, a *tu. Holland*, district and 17 m. N.E. Luxembourg, 1 bank Moselle. It is very beautifully situated in a most fertile district and has an old castle, a townhouse, prison, church and school; and a considerable trade in wine, agricultural produce, and fruits, especially apples, pears, cherries, strawberries, plums, and nuts. There are also tannery and pottery works and several lincolns, and gypsum-mills. In April, 1822 there was fought here a severe engagement between the forces of the bishop of Treves and Metz, and the Romans, in which the bishop was killed. Pop. 2300.

REMYELMONT [anc. *Arenas Cantuaris*] a *vil. France*, dep. Vosges, picturesquely situated at the foot of the Vosges, 1 bank Moselle. The houses, though for the most part rather low are neat and regular and usually adorned with arcades. The streets are well laid out and spacious. The principal edifices are the church and hospital. Its chief manufactures are cotton, muslin Paris point, stained paper, and leather. There are also cotton and saw mills, and iron and steel works. The trade is of considerable importance Remmont being the entrepot for the produce of the mountainous districts in the neighbourhood. The leading articles are cheese, called Gerdard and Gruyere. Pop. 4633.

REMIINGEN a *tu. Bavaria*, Lower Franconia, 10 m. W. Würzburg, with a Protestant church, two mills, several mills, and a trade in corn, fruit, and cattle. P. 1068.

REMIO (Raz) a *seaport in France*, dep. Alpes Maritimes, 80 m. E.N.E. Nice cap. prov on the Mediterranean. When viewed from the sea it presents the figure of a triangle the base of which is formed by the shore, and the apex by the dome of the sanctuary Delta Costa. It consists of an upper and a lower town. The former is very ancient, and consists of a number of poor houses, placed in narrow and almost inaccessible streets the latter is much better built, and has one handsome modern square, but the streets are generally steep and ill paved. A great scarcity of good water used to be felt, but a copious supply has recently been introduced from a distance of about 3 m. San Remo is the residence of a military commandant, and the seat of a superior court of law and of several public offices and has 14 churches, several of them belonging to convents, and one, the sanctuary Delta Costa, already mentioned, adorned with four columns of alabaster. A seminary and college, a large townhouse in which the public schools are kept, and a small harbor, chiefly frequented by fishing vessels and small crafters, which load with oil, fruit, and salt provisions. Pop. 9854.—The *PROVINCIA*, area, 217 sq. m., is covered by the Maritime Alps, which descend in beautiful hills and torrents towards the shore, and send down numerous torrents. The soil is fertile, and great quantities of oil and fruit, particularly oranges and citrons, are produced. The prov. is divided into 8 mandements, subdivided into 36 communal. Pop. 61,000.

REMOUCHAMPS, a *vil. Belgium*, prov and 12 m. S.E. Lege. It has a very remarkable double grove, nearly 1 m. long and containing a great variety of beautiful specimens. In its mouth at what is called the *Lake d'Estée*, numerous fossil bones of lions, tigers, bears, and other animals, were found in 1822.

REMPTENDORF a *vil. Germany*, Rhenus-Greits, bail. Burgk, with a church and several mills. Pop. 1266.

REMPSTONE, par *Eng. North*, 1690 ac. P. 389.

REME, a *river*, Wurtemberg, rising in a hilly district not far from its R. from the Rhine, and joins the town of Remlingen, Gmünd, and Schorndorf, and joins the bank Neckar at Ludwigsburg, after a course of 60 m.

RENESCHIED, a to. Prussia, gov and 18 m. E.S.E. Muenster, on a rugged height. It contains a Protestant church, and has extensive manufactures of various articles of ironmongery, which are largely exported to Holland, Russia, America, and other countries. Pop. 11,902

RENY (or) Reny (Grosz) Zivak, a to France, dep. Doubs-de-Milva, 40 m. N N W Mirecourt, near the canal of St. Etienne, is a beautiful basin, covered with olive-groves. It has a handsome boulevard, formed on the site of the ancient ramparts, somewhat narrow and irregular streets, but many of the houses, though old, are well built. The only edifice deserving of notice is the Hotel de Ville, a handsome modern structure, situated in the public square, which is adorned with a pyramidal fountain. The trade is in wine and corn, and there are silk-mills. Pop. 6123

RENELX (Friesland, Rome, Latin: Renelx) a to. Belgium, prov. E. Flandre, 30 m. S. Ghent. Its picturesque situation has three public squares, each adorned with a fountain; three churches and two chapels; a townhouse, hospital, orphan asylum, *conseil des prud'hommes*, a superior primary government, and several commercial and private schools; a mutual society, and different benevolent institutions particularly one which bears the name of *Freres des Bonnes Oeuvres*. The manufactures consist of cotton stuffs linen cloth, flannels, hats, earthenware, soap, oil, chocolate, confectionery, and tobacco. There are also breweries, distilleries tanneries, saw-mills, greenhouses, bleachworks, thread-mills, brick and tile works, &c. The linen trade is very extensive, the weekly and monthly markets are much frequented, and as the two annual fairs, each lasting two days a great deal of business is done. Renelx dates from the 8th century. In 1478, and again in 1519, it was almost destroyed by fire. Pop. 12,545.

RENCHEN a to. Baden, circle Middle Rhine, r. bank Rheine, 9 m. N N E Offenbach; with a church manufactures of linen, and a trade in hemp. Moreau defeated the Austrians here in 1795.

RENDERSHAM, par Eng Suffolk, 2020 ac. P. 850

RENDERSBURG, a to. Denmark, duchy Holstein, on ball, on both sides the Eider, and on a little island in its channel, 54 m. N N W Schleswig. It stands in a level district on the frontier of Schleswig and is a place of great strength. It is divided into three parts—the Altstadt, Newwerk, and Krowerck. The Altstadt, the oldest part, occupies the Eider-tale, and is defended by seven-irregular bastions and six outworks. Newwerk stands on the l. or Holstein bank of the Eider, and is defended by six regular bastions and ravelins and seven outworks. The efficiency of its defences can be greatly increased by flooding. Krowerck is on the r. bank, or Schleswig side of the river, and not only guards the entrance to the fortress on that side, but also protects the large wharf on the canal and the harbour. There are in all five parts, of which the Altstadt has three, and the Newwerk and Krowerck one each. Rendsburg ranks as a fortress of the second class, and is also the second artillery depot in the kingdom. Its arsenal and barracks are extensive and complete, and nothing is omitted that can contribute to its importance as a military station. Its principal buildings and establishments are two churches, one of them large and richly ornamented, with a curious altar-piece, a provincial court-house, the main warehouse, the Schleswig-Holstein head bank; the second head bank, a large bell-foundry, a superior grammar-school, and three hospitals. The town is situated

Yo. II.

generously situated for trade. Both the Eider and the Schleswig-Holstein canal, which joins it here, give ample water communication, while a branch railway puts it in connection with the trunk line between Kiel and Altona. The harbour, a winter haven of the fourth class, has 11 ft. water, and there are five stations at which vessels according to their class can load or deliver their cargoes. The most important of these stations is at the sluice in Krowerck. The origin of Rendsburg is unknown, but it owes its Altstadt to Frederick III. in 1589, and its other divisions, its privileges, and principal fortifications to Christian V., who continued improving it from 1684 to 1692. It has stood repeated sieges and bombardments. Pop. 10,400.—The RAIL, the largest in Holstein is not all united, but includes a number of isolated patches. Its area is 93 geo sq m. Pop. 21,900

RENFREW, or RENNFRUWINE, a co. Scotland, bounded, S and S.W. by co. Ayr. E. by Lanark, N. by the Clyde, and W. by the Firth of Clyde. Length 31½ m., breadth 18½ m. area, 241 sq m., or 154,240 ac., of which about 100,000 ac. are cultivated. The most elevated ground occurs in the S.W. and S.E. but they attain no great height, the loftiest summit in the co. being about 1200 ft. or 1800 ft. above sea level. There are, however, numerous beautiful and extensive valleys, watered by the White and the Black Cart, the Gryffe, &c. Towards the centre of the co. the general features are sinking and picturesque, being in many places well wooded and varied by fine meadows, knolls, and rising-grounds. Along the Clyde the country is comparatively flat, and the soil various, but a great part of it is deep, loamy clay, extremely fertile. The S.E. part of the county is included in the great coal-district of the W. of Scotland. Limestone sandstone, freestone, granite, and secondary trap rocks, are found in considerable abundance. Good freestone for building is quarried; limestone is also wrought for burning and the mines of coal and ironstone give employment to a great number of persons. Grazing and dairying are extensively practised in the country in the vicinity of the high districts, where the pasture is excellent. In the middle district, where the latter is not so good, all sorts of crops are raised with the best advantage. But Renfrewshire derives its principal importance from its manufactures and shipping, including as it does, Paisley Greenock, and Port-Glasgow as well as the county town Renfrew. It returns three members to Parliament, one for the county and one each for the burghs at Paisley and Greenock. Pop. 161,091

RENFREW, an anc. royal and par. burgh, and par. Scotland, cap. above co. 6 m. W N Glasgow about half-a-mile from the Clyde. It consists of a main and several lesser streets, well lighted with gas, and has a jail and workhouse, an old parish and a Free church, a grammar-school endowed by a charter of Robert III. and the Blythwood Testimonial, a superior school established in 1843, a subscription library and an Athenaeum, were opened December 1. 1858. Silk and muslin handloom weaving are carried on, and many of the inhabitants are engaged in a bleachfield at one end of the town, and in the extensive foundry and shipbuilding yards on the banks of the Clyde and in a distillery in the vicinity. A short canal connects the town with the Clyde, which is here crossed by a ferry and furnished with a commodious quay or wharf at which the river steamers touch in their passage to and from Glasgow. Renfrew gives the title of Baron to the eldest son of the reigning sovereign, and unites with Kilmaronock, Rutherglen Port-Glasgow and Dumbarton in sending a member to Parliament. Pop. of par. 8398 of tot. 3722

RENFREW a vil Canada West, on the Bonne Chere, which here forms a magnificent fall about 70 m. N Kingston. It has a Presbyterian and a R. Catholic church, a grammar-school, a foundry, tannery, carding, saw, and flour mills, and exports large quantities of potash.

RENGERDORF, a vil Prussia, prov. Rhine, gov. Prussian, circle Gluck with a church, a castle, and several mills. Pop. 1086

RENOLD, par Eng Bedford, 2166 ac. P. 464

RENI, a commercial port, Russia, gov. Bessarabia, at the mouth of the Pruth in the Danube. It exports wheat, barley, and maize, chiefly to Constantinople. Pop. (1849), 7814.

RENINGHE a vil and com. Belgium, prov. Flandre, 55 m. S.W. by W. Bruges, near l. bank Krommebeke. It has six breweries, a bleachfield, several flour-mills, and

manufacture of leather, ropes, candles, tobacco, and oil; and a trade in cattle, grain, and timber. Pop. 2069.

RENINGHELST, a vil. and com. Belgian, prov. W. Flanders, 23 m. S.W. Bruges, with two breweries, and three flour-mills. A great variety of medicinal plants are cultivated in this commune. Pop. 2145.

RENKUM or **RENCUM**, a vil. Holland prov. Gelderland, 8 m. W. Arnhem, near the Rhine. It has many good houses, a Protestant, and a Reformed Presbyterian church, several schools, a paper-mill and a brewery. Inhabitants chiefly engaged in agriculture and in the wood trade. Pop. 819.

RENSEROD, a vil. houses, about 40 m. N. Wiesbaden. It has a Protestant parish church. Pop. 1419.

RENNES (anc. *Condate Rénovæ*) a fr. France, cap. dep. Ille-et-Vilaine, agreeably situated on the activity and at the foot of a hill on the canal of Ille and Rance, at the confluence of the Ille and Vilaine, 60 m. N. Nantes. It is traversed from E. to W. by the Vilaine, which divides it into the high and the low town, and is crossed by three bridges. The latter the smaller of the two, on the l. bank, is on a flat so low as often to suffer from inundation. It is very poorly built. The houses in it, as well as those in the adjoining suburbs, are mostly of wood, and the streets are narrow and winding. The lower town, between the river Vilaine and l. bank Ille, and strikingly contrasts with the low town by the elegance of its buildings and its spacious regular streets which are almost mathematically straight, and intersect each other at right angles. This decided superiority it owes to a dreadful conflagration which took place in 1720, and in the course of the seven days during which it raged laid the greater part of the high town in ashes. This same event, however which has thus given it the appearance of a handsome modern town, has deprived it of much of its historical interest, by destroying almost all its ancient edifices. Of these the only one of any consequence which now remains, is the Palais de Justice, a stately structure in which the statue of Brittany used to stand. Of modern edifices, the principal are the cathedral of Breton architecture, the Hotel de Ville part of which is occupied by the public library, a handsome theatre, the new church of Toussaint, the artillery barracks, and arsenal. But the chief attraction of Rennes is in its promenade. The best are the Mail, Champ-de-Mars, and Thabor. The last, in particular, forming part of the old garden of a Benedictine monastery in fr. great extent and finely planted, and occupying a height which overlooks the town, affords fine views both of it and of the surrounding country. The manufactures, not of great importance, consist chiefly of silk-throw, sailing nets, sail-tarn, starch, earthen pipes, paper and playing-cards. There are also spinning mills, wax refineries, breweries, and tanneries. The trade is of considerable extent, being greatly facilitated by canal communication. Both with St. Malo on the one hand, and Brest and Nantes on the other. The principal articles are dressed, linen, butter, corn, wine, sugar, honey, wax, fish, timber, and cattle. Rennes is the seat of a bishop, and the seat both of a court of first resort and commerce, and of a high court of appeal for dep. Côtes-du-Nord, Finistère, Ille-et-Vilaine, Loire-Inférieure, and Morbihan, and possesses a college, a faculty of law, secondary school of medicine, a university secondary discourse seminary and a society and school of painting. In the time of the Romans, Rennes was the capital of the Redones. On the decline of the empire it was seized by the Saxons, and afterwards by the Franks. From then it was taken in the 9th century by Normans, vassals of the Bretons, whose successors made it their capital. By the marriage of Anne of Breton with Charles VIII., it became finally united to France. During the middle ages it was strongly fortified, and stood several sieges; the most memorable of which is that of the English, under the Duke of Lancaster who was obliged to raise it after it had continued six months. Pop. (1857) 39,582.

RENNINGEN a vil. Württemberg, Kreis Nustlar 18 m. W. Stuttgart with a church. Pop. 1745.

RENO (anc. *Rhenus*), a river, Italy rises in the N. slope of the central Apennines, on the N. frontiers of Tuscany, near the Romanes, near the N. E., and joins the bank of the Franciscan, a little above Florence, total course, 90 m. It is not properly navigable, but carries barges in winter when the water is high.

RENTERIA, a fr. Spain, Biscay, prov. Guipuzcoa, l. bank Oyareun, near its mouth in the Bay of Passages. It is walled, has five gates, an ancient and spacious church; an Augustinian monastery, a handsome town-hall, and two schools, two primary schools, an iron-mill, and other iron-works and a considerable export of iron and steel. Pop. 1067.

RHENTON, a vil. Scotland co. and 2 m. N. Dumfriesshire, on the railway to Ballach, 7 bank Leven with a nat. Free and a Reformed Presbyterian church, several schools, a library, and a monument to the memory of Smollett, the novelist and historian, who was born in the vicinity. The inhabitants are chiefly engaged in the extensive calico-printing, dyeing and bleaching establishments, which here have the Leven. Pop. 2598.

RHENTSCH, or **ROCHENSTADT**, a vil. Bohemia, circle Rakonitz, near Pargitz, in a valley enclosed by lofty hills, with a church and a school. 1 op. 1058.

RENEWICK, par. Eng. Cumberland; 4220 m. Pop. 316.

RENY a fr. Russia. See **RENY**.

REOLE (La) (anc. *Regula*) a fr. France, dep. Gironde, 30 m. S.E. Bordeaux built in the form of an amphitheatre, on the side of a steep hill whose base is washed by the Garonne. It has very indifferent houses, steep, narrow and irregular streets, and an ugly, noisy bazaar, except the remains of an ancient abbey and of an old castle said to have been built by the Saracens. It has manufactures of combs, hats, vinegar and leather, and a trade in corn, flour, barley, and cattle. Pop. 8054.

RHOLID (anc. *Beryla*) a vil. and com. Spain, Valencia, prov. and 40 m. from Albacete in a plain with a church, a primary school and manufacture of articles in iron. P. 1025.

REHWICK, or **RECHHAM** par. Eng. Lincoln 1480 m. Pop. 585.

REITZEN a fr. Prussia prov. Brandenburg gov. and 11 m. E. Frankfurt, on the Elbe, with a church, manufactures of woollens and hats and a trade in horses and cattle. Pop. 2502.

REPTES, three par. England, Norfolk;—1, 1739 m. Pop. 380.—2 (North) 2731 m. Pop. 623.—3, (South), 2081 m. Pop. 699.

REPS or **KHALON** a market to Austria, Transylvania chief place still of same name at the foot of a height crowned with a castle, on the Rostsch and Schwanenbach, 18 m. S.E. Udrhely. It contains a Protestant, R. Catholic, and Greek church, and a school and has fair chiefly for linen and horses. There are mineral springs and a sulphur mine in the neighbourhood. Pop. 2200.—The ruins of Reps or Kshalon-Sank has an area of 170 geo. sq. m. Pop. 7600.

REPTON or **REPTON** a vil. and par. England, and 64 m. S.W. Derby, with a handsome church, places of worship for Wesleyans and Independents, a free grammar school and other charities. Area of par. 6440 ac. P. 2223.

REPUBLICAN Pass, a river, U. States, rises in Nebraska territory; about lat. 39° 30' N., lon. 103° 30' W., flows N.E. flowing on the right Solomon's Fork, and the Grand Saline Fork, and finally after a course of nearly 300 m., unites with the Neosho H. Fork in forming the Kansas.

REPULAE BAY—1, British N. America, at the E. extremity of Melville peninsula lat. 66° N., lon. 56° 30' W.—2 A bay, Australia, N.E. coast; lat. 30° 30' S. Its shores are low, but the hills adjoining rise to a great height. Pelopon islands are in this bay, they are of small size.

REQUENA a fr. Spain, New Castile, prov. Guasco, and 44 m. W. Valencia. It was formerly a place of great strength, and there are still some traces of the walls round the old town with a portion of the citadel. It has a variety of educational establishments, an hospital, three parish churches, a nursery two suppressed convents, one of them converted into a town-house, and the other, which stands on an embankment overlooking the town, into a barracks. The chief branches of industry are agriculture and silk manufactures, there are 650 looms for cottons, grays, and serges, &c., several dyeworks, &c. and altogether about 1900 persons are employed in the different processes connected with these manufactures. Besides, there are 10 flour-mills, one for oil, two brandy stills, a soap and vermilion manufactory. Agricultural produce, as well as the products of manufacturing industry, are exported to Valencia and Cadiz. Pop. 13,364.

REBIZ, a tn. and par Portugal, prov Beira-Alta, about 6 m. N Viseu. Pop. 780.

REBIZICK, par Scot. Kirkcubright 16 m. by 6 m. Pop. 1785.

REBOBIE, par Scot. Forder, 9 m. by 2½ m. Pop. 711.

REBBI, a tn. in Persia, cap prov Gilan, 150 m. N W Tataria, near the Bay of Bessale, Caspian Sea. The houses here are of a very superior construction, and the streets generally well paved; but the whole town is so enveloped by trees, that no idea of its full extent can be formed from its appearance, taken in any one point of view. The bazaars are extensive, regular, clean, paved, and well kept, but not entirely covered in from the weather, a part of them, however, is shut in by gates. Beggars are more numerous and importunate here than in any other town in Persia, the streets and bazaars swarm with the most miserable and loathsome objects, forcing themselves not only into view of, but into contact with, the persons they meet. The present town is comparatively modern, having been built near the site of a more ancient city about 880 years ago. Pop. estimated at 50,000.

REBCELA, two nearly contiguous places, Hungary—1 (*Femes*). A vil. Thither Thais, co. Krasova, on the Berava, 8 m. from Nagyszall, with a R. Catholic church and valuable iron-mines. Pop. 1068.—2 (*Old or Walodou*) also on the Berava. It has a Walachian church. Pop. 905.

REBINA, a tn. Naples, prov and 6 m. S E Naples, on the gulf of that name. It stands about 70 ft. above the site of the ancient Herculaneum, and contains two churches and a convent. There are numerous fine villas in its environs. Pop. 8900.

RESINAR, **ROEDNA**, or **STATERDOEF** a vil Austria, Transylvania, R. bank Sobes, 9 m. S W Hermannstadt; with two Greek churches, and a trade in wood. Pop. 605.

RESITZA, an magnificent tn. Russia, gov and 145 m. N W Vitebsk, cap circle. The circle contains several large lakes, is well wooded and has a light sandy soil, not well adapted for wheat, but productive of rye and buck-wheat. Pop. about 57,000.

REMBOLIS, par Scot. SE KIRKMICHAEL and CUTHBERTON. Pop. 1651.

RESOLUTION BAY, Marquesa Islands W side of Isl. Santa Christina.

RESOLUTION ISLAND—1 An Isl. N America, entrance to Hudson Strait, lat 51° 30' N lon 64° 30' W (2). Length, 40 m. breadth, 38 m.; with a cape of same name on its N.E. side.—2 A lagoon lat Low Archipelago lat. 17° 25' S, lon 142° 24' W small and low and thinly inhabited.

RESTON, two pars. Eng. Lincoln—1, (*North*) 703 ac. Pop. 47.—2 (*South*); 710 ac. Pop. 180.

RESTORATION ISLAND, a small Isl. E. coast, Australia; lat 12° 37' 30" S lon 143° 37' E. about 9 m. in extent. It is a mere granite rock with a very scanty covering of soil, but produces a few small trees, and some fruits. Water is abundant, and on the shores oysters are plentiful.

RESULTANA, a tn. Sicily, prov and 14 m. N Calatanissetta, R. bank Salvo. Pop. 2000.

RETHNOI a cape, Siberia. E. coast, at the mouth of the Anadyr; lat 68° 45' 44" N lon 176° 45' 69" E.

RETFORD (*East*) a par. bor., market tn., and par England, co. and 23 m. E N E Nottingham, pleasantly situated on the railway from London to York, the Chesterfield Canal, and on the Lida, here crossed by a bridge connecting it with West Retford. It consists of several streets, well built and paved, and a market-place lined by good houses, and has a large and handsome parish church, partly ancient and partly modern, with a lofty tower, Renter Baptist, Independent, and Wesleyan chapels, a free grammar-school, a workhouse, hospital, and several almshouses, and a considerable trade in horses, cattle, cheese, and hops. West Retford from a very early period, enjoyed the privilege of sending a member to the House of Commons, but owing to the corrupt practices which prevailed, the franchise was, in 1826, thrown open to the hundred of Basewick. Pop. tn., 2943, par. almshouse bor., 44,054.

RETHNOI (*new Retford*), par Eng. Note, 1080 ac. P. 653.

RETHNOI (*new Retford*), a tn. France, dep. Ardennes, beautifully situated on a height above R. bank Aime, which is here navigable. It has wide and regular streets, but the

houses, generally of wood, are very indifferent. It has two long public squares, in one of which, forming the market place, is an extensive building in which the markets are held; three churches, one of which has four towers, and is surrounded by a handsome belfry; manufactures of woollen cloth, such as mere shawls, muslins, and hosiery; famous tanneries, and a worsted mill, and a trade in woollen cloth, iron nails, corn, wine, brandy, groceries, &c. Pop. 7507.

RETHELOIS, an ancient dist. France, which belonged to prov Champagne, and now forms the S W part of dep. Ardennes. Bethel was its capital.

RETHFM a vil Hanover, gov Luneburg 33 m. N W Hanover, L. bank Aller. It has a church and a custom-house. Pop. 1540.

RETHY WARRECK, a vil. and con. Belgium, prov and 29 m. E. by N Antwerp with several cloth factories, a tannery, a brewery, an oil, three corn mills, and a dye-work. Pop. 2504.

RETIMO or **RETRMO** a seaport in Isl. Candia, N coast, 40 m. W tn. of Candia lat. 25° 22' 17" N lon 24° 38' 19" E. It extends a considerable way along the shore is well built, and defended by a dike. The port is now of little utility being nearly choked up with sand, so that a vessel drawing more than 6 ft. water cannot enter. It has no export trade, the inhabitants being for the most part, employed in agriculture, gardening and making soap from olive-oil or in the culture of the vine, the produce of which is commonly sent to Candia.

RETSE, or **RECSA** a market in Hungary Hither Danube, co. and 2 m. from Pressburg. It has a parish church and produces some excellent wine. Pop. 2197.

RETSKP a vil Hungary Hither Thais, co. Heves, on the side of Mount Matra, above the Paradiseash, with a church and a small spring. Pop. 1185.

RETTEDDON par Eng. Essex. 8933 ac. Pop. 817.

RETTMOVA a vil Hungary Thither Thais co. Te me war, about 4 m. from Verocis, with a handsome Greek non-mixed parish church. Pop. 1184.

RETTZ, an ancient dist. France, which belonged to prov Bretagne and now forms the S.W. part of dep. Loire-Inférieure.

RI TZ, or **RITZ**, a tn. Lower Austria, 80 m. N W Vienna. It is walled has several suburbs, an old church, a new hospital, and Dominican monastery, with a library and small collections of minerals and coins, and a considerable trade in wine, some of which, produced in the district ranks among the best in Austria. Pop. 2777.

RETTZACH a market in Bavaria, circle Lower Franconia, on a height above the Main over which there is here a ferry 9 m. N W Würzburg. It has a church, to which numerous pilgrimages are made several mills and a trade in wine. Pop. 1080.

RETTSTADT a vil Bavaria, Lower Franconia, dist. and near Carlsbad, with a church several mills and a trade in corn and wine. Pop. 1983.

REUDNITZ, a vil Saxony, circle and near Leipzig. Pop. 2343.

REULI a tn. France dep. Indre, 9 m. N Issoudun, on the Thele. It contains a curious old edifice, which bears the name of Grande Maison and has some trade in corn and wine. Near it is an ancient Gothic church and at too great distance stands the fine chateau of Furt-Reully. Pop. 2201.

REULMARE, or **NAU AARFUS**, a vil Austria, Thier tyrolia, co. Niederwiesenberg, dist. Zalschitz, east the river of same name 18 m. N W Abtbrunnau. It consists of four distinct portions, with several churches, and a post office.

REUNION (*Isle-de-la*) a name given to the Island of Bourbon in 1793 and resumed since the Revolution in France in 1848.

REL, a city, Spain, Catalonia, prov and 10 m. W Tarragona, in a plain at the base of a chain of hills, about 4 m. from the Mediterranean. It was once well protected by fortifications, as may be seen from their remains. It is divided into two parts, the ancient and the modern, the latter being distinguished by the superior architecture of the houses, and by the greater regularity of the streets. In the former is the principal square, surrounded by spacious colonnades, serving as a promenade to ranges of shops, and in all the streets

the great centre of attraction to men of business as well as idlers. Most of the squares are used as market-places, and among them are distributed 18 public fountains of various forms. Among the public institutions and edifices the most worthy of notice are the townhouse, a spacious structure of

REUS.—Town House, View in Spain.

the Tuscan order, with magnificent halls, adorned with statues and pictures; the ancient and extensive public prison; an asylum for orphans of both sexes; an hospital in the arc-convent of Carmelites, supported by revenues of its own, among others, the profits of the public theatre, which belongs to it; the parish church, of simple Gothic architecture, with a lofty hexagonal tower; a Franciscan convent, one of the finest in the province, now occupied with primary schools and a millage; the theatre, capable of containing 1500 persons, and the barracks, a grandiose edifice of regular and solid architecture, with accommodation for two full battalions of infantry and two squadrons of cavalry. There are besides numerous other schools and colleges, both public and private, and several chapels. Agriculture employs a considerable number of hands, but the principal branches of industry are the manufacture of cotton and silk stuffs, tanning and dressing leather making coats of all sizes, soft soap, fine earthenware, bleaching yarn and henna, and making machines for carding cotton. There are upwards of 5000 handlooms, for all kinds of cloths, plain and striped cottons and mixtures of silk and cotton, factories for silk ribbons, and handkerchiefs, silk cord damasks, and velvets, dye-works, brandy distilleries, oil-mills innumerable, &c. There are 60 works for cotton fabrics alone. Reus imports fine sheep, cattle, wine, cotton, hemp, silk, dye-stuffs, wool, iron, tin, hides, &c. and exports, besides the produce of industry, brandies, and other spirits, wine, silber, almonds, oil, shoe-leather soap &c. weekly market on Monday which regulates the prices of various articles, such as breadstuffs, flours, almonds, and other fruits, throughout the peninsula. Reus, during the Peninsular war was impoverished by the exactions of the French under Mandarion, and its trade severely damaged by the English blockade. Pop. 35,048.

REUSCH (AAR and REZ) two nearly contiguous villa, Austria, Moravia, circles and 15 in S. Igits. They have two parish churches, and fine rock-crystals are found in the vicinity. Pop. about 1700.

REUSCH (Twe), [Latin, *Rues* and *Urm*] a river Switzerland, rises in Lake Lucerne, in Mount St. Gothard where within a circuit of 10 m., the Rhine, Rhone, and Ticino, with innumerable small tributaries, have their source. It first consists of three small torrents, which unite in the valley of Urm, and Uri, through which it dashes along with great rapidity in a N.W. direction, and falls into the E. extremity of the Lake of Lucerne, from the N.W. entrance of which, at the town of Lucerne, it emerges a navigable river; proceeds for a short way N.W. till it receives its most important tributary, the Emme, then turns N.E., and lastly, in N.W. traverses one. Aargau, and joins the bank Aar, near Windisch, total course, about 100 m. In the upper part of

its course it falls rather than flows, descending 3000 ft. before it reaches Urm, and 2500 ft. more before it reaches the lake, and forming numerous magnificent cascades.

REUSCH, three principalities of Central Germany, somewhat intermingled with other territories, but lying between Saxony, Bavaria, and the Rhenish duchies, and belonging to an older and a younger line, the former of which holds the 8th, and the latter the 51st place in the Germanic Confederation; area of the whole principalities, 450 geo. sq. m. The territory of the older line, usually called the principality of Reuss-Greiz, consists of the lordships of Greiz and Burgk, and has an area of 112 geo. sq. m. These lordships are separated from each other the one being traversed by the Elster while the other lies along both banks of the Saale. The surface is better adapted for pasture than agriculture, raising great numbers of horned cattle and sheep, but scarcely raising grain sufficient to meet the consumption. The most important crops are potatoes and fax. hops also are partially grown. The territories of the younger line form the two principalities of Reuss-Schleiz, and Reuss-Lobenstein-Ebersdorf the former having an area of 96 geo. sq. m. and the latter an area of 162 geo. sq. m., and in addition to these principalities include the lordship of Gera and the domain of Reulburg, which, together have an

area of 120 geo. sq. m. These territories are, on the whole, fertile, and well wooded, raise sufficient grain to supply the consumption, and possess among their main crops, which is partially worked and rearing also, which are extensively quarried. The two principalities of the younger line, though belonging to two different branches, rank only as one state, having only a single vote in the plenaria of the Confederation. In the representative assembly the whole principalities only share one vote along with those of Hohensollern, Lichtenau, Waldeck, and Lippe. The representatives of the older line were raised to the rank of princes in 1775—those of the younger line ranked only as counts all 1790 and 1806. Both lines, as well as the vast majority of their subjects, are Protestants. Pop. 100,934.

REUSSENDORF a vil Prussia, gov and S.W. Prussian with a castle, tile-works, and several mills. Pop. 1321.

REUTIGEN a vil and par Switzerland, and about 27 m. E.S.E. Bern, at the junction of the Summe with the Kander, at the entrance of the Simmenthal and the foot of the Stockhorn. It has one of the most important horse and cattle fairs in the Oberland. Pop. 1212.

REUTLINGEN a m. Württemberg circle Schwarzwald, on the Ebn, a small affluent of the Neckar 20 m. S. Stuttgart. It is surrounded by walls and ditches; has very narrow streets contains four churches, one of them handsome; a townhouse, Latin school, and the ruins of an old castle; and has manufactures of woollen and linen cloth, fire-engines, glass, paper, and gunpowder; a ball-factory, a spinning, and several other mills. Reutlingen is the capital of the circle, and the seat of several courts and public offices. It is of considerable antiquity, and rose to be a free imperial city—a position which it long maintained. It was incorporated with Württemberg in 1802. Pop. 11,118.

REUTTE, a market in Austria, Tyrol, circles and 17 m. N. Innt. r. bank Lech; with a church, a Franciscan monastery, an hospital, manufacture of cotton stuffs, and several breweries. Pop. 1218.

REV or **VAB**, a vil. Hungary, on Riber, on the Nepl Kőrös, 6 m. from Eled. It has a church, and some trade in agricultural produce. Pop. 1176.

REVEL, a gov Russia. See Euxina.

REVEL, or **RAVAT**, a seaport in Russia, cap. gov Revel or Rethonia, on a small bay in the Gulf of Finland, 300 m. W.R.W. Petersburg; lat. 59° 28' 49" N., lon. 24° 46' 15" E. It is one of the best places of commerce, surrounded by strong walls, fortified with bastions, of which part still remains. It consists of the town proper, and a large suburb built along the beach, and has tolerably well-built houses of brick, many of them of a very antique appearance; but the streets are narrow and long. It is the residence

of a government, and the seat of several important courts and police offices; contains: 2. St. Catharine, two Greek, and five Protestant churches, all of stone; one called the Cathedral, a handsome edifice, and another called St. Olava, possessed of a library of 10,000 vols.; a castle, occupied as public offices; a modern townhouse, an admiralty a gymnasium and other schools, and several hospitals; and has an excellent harbor, with great depth of water, though rather of difficult entrance, at which depth of water have a station, and an important trade is carried on. The principal exports are hemp, flax, corn, goat's hair, spirits, and timber the imports colonial produce, herring, mait, wine, tobacco, dye-stuffs, lead, cotton and silk goods, drugs, &c. Revel is much frequented for sea-bathing. Pop. (1848), 34,041.

REVEL, a tn. France, dep. Haute-Garonne on a height above a fertile plain, 80 m. S. E. Toulouse. It has manufactures of stockings, bonnets, linen, covers, and liquors, cottons, dyes-works, tile-works, and tanneries, and a trade in corn and flour. Pop. 3299.

REVELLO, a tn. Italy, Piedmont, div. Coni, prov. and 6 m. N. W. W. Saluzzo, near 1 bank Po. It is well built and has several elegant mansions spacious and handsome streets, and two squares, a court of justice and a fine shady walk two ancient churches, an hospital, and a public school. Pop. 5510.

REVELSTOCK, par Eng. Devon, 1478 ac. P. 510. **REVERE**, a tn. and once capital of Italy gov. Venice prov. and 17 m. S. S. E. Mantua, r. bank Po. with three churches, and manufactures of liquors and tallow works. Pop. 8182.

REVERE, a vil. and com. Belgium, prov. Hainaut, on the Rampo, 25 m. E. Mons with a brewery, a brick work, two mills, and a trade in agricultural produce. Pop. 1418.

REVERBY, par Eng. Lincoln, 4600 ac. Pop. 668.

REVILLA GIGEDO, -1, A group of isle. N. Pacific Ocean W. of Mexico and S. of the peninsula of California, about lat. 18° 43' 14" N. lon. 110° 54' 14" W. It consists chiefly of the islands of Socorro, or St. Thomas, St. Benedicto, San Bartolome, and Santa Rosa, or Clavon Island. They appear to be of volcanic formation, are partly black and barren, and in some places are so covered with the *Crotalaria*, or prickly pear as to make it difficult to penetrate into their interior. -2, An island, N. Pacific off Russian America lat. (Point Whalley N. point) 55° 56' N. lon. 181° 18' W. It is large and rugged; rises into mountain masses, and is partly encircled by Behm canal, and partly separated by the canal of Revilla Gigedo, both from the mainland and the island of Gvinia.

REVIN, a tn. France, dep. Ardennes, r. bank Meuse 12 m. N. Montheau. It is built in the form of an amphitheatre, and has some trade in wool. There is a blast-furnace in the neighbourhood. Pop. 2493.

REWALI, a state and tn. Hindoostan, protected by the British, and surrounded by the Anglo-Indian territories, in Baghlyad, prov. Allahabad lat. 34° to 25° N. lon. 81° to 68° E. Area, 9837 sq. m. It is chiefly an elevated table-land, but also comprises portions of the country on both sides of the Kymoor hills, watered by the Son and Tons rivers, tributaries to the Ganges, and which hold a north-eastern course. The surface is in part covered with jungle, but on the whole, highly cultivated the condition of the peasantry is, however, much depressed. No temples of note exist entire, but the ruins of many are scattered over the country the forts which formerly abounded here were destroyed by the British in 1813. The revenues of the rajah amount to about 20 lacs of rupees, or £20,000 annually; the armed force consists usually of 4600 men, though from 10,000 to 12,000 might occasionally be mustered. Pop. 1,200,000. Chief towns, Rewal and Badoogah. -The town, lat. 34° 34' N. lon. 81° 12' E., 69 m. S. W. Allahabad, is in a basin, and is a double wall, the outer one of massive architecture, and flanked by round towers. It presents various traces of former splendor, and contains a fortified palace of the rajah, which, however, like the rest of its buildings, is in decay or ruins. Pop. probably 7000. -*(Jacquemont, Bengal and Agra Districts, Trigon. Survey of India.)*

REWEL, par. Eng. Devon; 1840 ac. Pop. 289.

REWINDORF, a vil. Austria, Moravia, circle Posen, near Hetschowitz; with a church, and three mills. Pop. 3644.

REYDON par Eng. Suffolk; 2737 ac. Pop. 287.

REYES (Loa), two isls., S. America -1, New Granada, dep. Magdalena, prov. Santa-Marta, 86 m. N. E. Managua. It was founded in 1550 and has gold, silver, and copper mines. Pop. 10,000. -2, *(San Sebastian de)*, Venezuela, prov. and 46 m. S. S. W. Caracas. It has a brisk trade in cacao, tobacco, marapilla, and cattle.

REYMERSTON, par Eng. Norfolk 1699 ac. Pop. 340.

REYNAGH, par Ire. King's co. 8714 ac. Pop. 3861.

REYNOLDSSTON, two par. Wales -1, Glamorgan;

1047 ac. Pop. 616. -2, Pembrokeshire 625 ac. Pop. 1034.

REZAT, a river Bavaria, rises 10 m. N. W. Augsburg, flows circuitously S. E., and then N. E., and 5 m. N. W. Regensburg, unites with the Pegnitz in forming the Regnitz, total course about 40 m.

REZENDE, a vil. and par Portugal, prov. Beira-Alta, com. and 11 m. W. S. W. Lamego. Pop. 2790.

REZENDE, a tn. Brazil, prov. and 100 m. N. W. Rio-de-Janeiro on a height near r. bank Parahiba. It contains a church a primary school, and an hospital, partly used as a lunatic asylum. Sugar-cane and coffee, rice, manioc, hair, oats, tobacco, and millet are cultivated in the district, and conveyed on mules to Rio-de-Janeiro but much of the millet is employed in fattening swine and poultry. Pop. 5000.

REZZATO a vil. and com. Italy, Lombardy gov. Milan prov. and 5 m. E. S. E. Brescia. It is well built has five churches, and near it an excellent stone quarry. Pop. 1838.

REZZO, a vil. and com. France, dep. Alpes Maritimes div. Nizza, on the Chiava, in the hollow of a valley. It has a large square, in which the parish church stands and the ruins of an old castle. Pop. 1162.

RHAYADER, or **RHAYNE**, a par. bar. market tn. and par. S. Wales, co. Radnor. The town on the Wye, 16 m. N. W. N. W. New Radnor is irregularly built, has a market-house, a church Wesleyan and Calvinistic Methodist chapels, a free grammar and several other schools, woollen manufactures on a small scale, and several extensive cattle-markets.

It unites with New Radnor in returning a member to Parliament. Pop. 1007. Area of par., 138 ac. Pop. 919.

RHEIDJA, a tn. Prussia, prov. Westphalia gov. and 40 m. S. S. W. Minden, 1 bank Emme with two churches and a castle, manufactures of linen, a flax mill and a trade in cattle. Pop. 1744.

RHILDE, a vil. Prussia prov. Westphalia, gov. Münster, circle Borken, on a stream of same name. It has a R. Catholic church. Pop. 1612.

RHEDEN or **RHEDEX** a vil. Holland prov. Gelderland, 6 m. N. E. Arnhem with a Protestant church, and a well-attended school. Pop. (agricultural) 965.

RHEIDT, a vil. Rhineland Prussia, gov. and 12 m. S. S. E. Cologne, circle Sieg, on the Rhine with a R. Catholic church and a mill. Pop. 1298.

RHEIMS, or **RHIMS** [anc. *Durocoriorum*] a tn. France, cap. dep. Marne in an extensive basin surrounded by slopes covered with vineyards, 23 m. E. N. E. Paris. It is surrounded with walls flanked with towers, and generally well built. The streets are spacious and tolerably regular and several of the squares are both large and handsome. The markets, which have a current of nearly 3 m. are planted, and form an excellent promenade. The principal edifices are the cathedral, one of the finest Gothic structures of the 13th century now existing in Europe, 466 ft. long, and 121 ft. high surmounted by two massive towers, and adorned with a richly-sculptured portal and facade, and with beautifully-painted glass, the church of St. Remy originally belonging to a Benedictine monastery the oldest, and still, with exception of the cathedral, and notwithstanding the injury which it sustained at the Revolution, the finest church in Reims; the Porte de Mars, one of the gates originally built by the Romans as a triumphal arch in honour of Caesar and Augustus, and recently repaired so as to have again become, after great dilapidation, a truly splendid structure; the town-house, with an elegant facade of modern construction, and several ancient mansions, particularly the hotel of the Counts of Champagne, furnishing good specimens of picturesque street-architecture. The manufactures consist of woollen cloth, woollen covers, damasks, marine vest-ments, cashmere shawls, tapestries, hosiery, soap, candles, gingerbread, and biscuits. There are also numerous dye-works, worsted-mills, wax-refineries,

breweries, and tanneries. The articles of trade include, besides champagne wine, which is the most important of all, barley, corn, flour, colonial produce, combed wool, cotton twist, lamp, fax, leather and numerous articles of manufacture. Rheims is the seat of an archbishop, and possesses a court of first resort and commerce, a chamber of commerce, court of justice, exchange, council of prud'hommes, diocesan secondary secondary ecclesiastical school, and college. It is a place of great antiquity. Even before the Roman invasion it had acquired some importance, when it was known by the name of Durocortora. At a later period it became the principal town of Belgae Gaul, and was adorned by numerous handsome edifices. Christianity is said to have been introduced into it in 380, and its cathedral to have been founded about 400 by St. Nicaeus, who perished shortly after in a massacre by the Vandals, who had made themselves masters of the town. St. Remi, one of his successors, converted and baptised Clovis, and almost all the Frankish chiefs in 496, after the battle of Tolbiac. Philip Augustus caused himself to be consecrated at Rheims in 1179, and the example has since been followed by his successors, with the exception of Henry IV. Rheims often suffered much from war and was repeatedly in possession of the English, who were finally expelled by the Maid of Orleans, in 1431. In 1814 the Russians gained possession of the town, but were shortly after surprised and driven out by Napoleon, whose success on this occasion is the last which he was destined to enjoy. Pop. 42,481.

RHEIN is a European. See RHINE.
RHEINBAACH is a Prussian, gov and 20 m. S. Cologne. It is walled entered by three gates has a justice-of-peace court, and several public offices, two R Catholic churches, manufacture of woollen and linen cloth, iron, and leather and a trade in cattle. There is here a Roman aqueduct. P 1826.

RHEINBEK, a vil Denmark, dachy Holstein, cap. bill of its name in a finely wooded valley watered by the Billie, over which there is here a bridge, 9 m. S.E. Hamburg. It is a well-built place, and contains an old castle, now partly used as a courthouse. The half-way is the most R. in the duchy area, 40 sq m. Pop. bill. 320.

RHEINBERG is a Prussian gov and 24 m. N.W. Düsseldorf on the Old Rhine with a Protestant and a R Catholic church; manufacture of woollen and linen cloth, and a cotton-mill. It existed in the time of the Romans was afterwards fortified, and was repeatedly besieged. P 2575.

RHEINBOLLERN a vil Rhenish Prussia, gov and 25 m. S. Coblenz with two churches, two mills, and a trade in cattle. Pop 1061.

RHEINREITBACH, a vil Rhenish Prussia gov and 25 m. N.W. Coblenz, near 1 bank Rhine with a R Catholic church, vatrol and iron works, saw-mill-furnaces and copper-mines. Pop. 1035.

RHEINRELL, a vil Rhenish Prussia, gov Coblenz, chole and near Neuwied, on the Rhine with a R Catholic church. Pop. 1341.

RHEINE, a m. Prussia, prov Westphalia, gov and 23 m. N.W. Münster 1 bank Rhine. It contains a castle, the residence of the Duke of Loos-Corwarren, five churches, an old Franciscan monastery an orphan and an ordinary hospital and has manufactures of woollen and linen cloth, a printmill, tanneries, chicley-factory and several mills. In the neighbourhood are Hunstone-quarries and salt-springs. Pop. 2254.

RHEINECK, a m. Switzerland, can. and 10 m. E.N.E. St. Gall, beautifully situated among vineyards and orchards 1 bank Rhine, a little above its entrance into the Lake of Constance. It has a handsome church, a townhouse, hospital, and orphan asylum, manufactures of linen and cotton goods, and a considerable trade. Considerably above the church stand the ruins of an old castle. Pop. 1211.

RHEINFELDEN, a m. Switzerland, can. Aargau, 1 bank Rhine, here crossed by a wooden bridge, 9 m. E. Basel. It is walled has a large and handsome church, a tobacco factory an oil and a paper mill, and a considerable general trade. The river both above and below the bridge, is embanked by rocks, which form rapids and falls, and on an island in its centre stand the ruins of the feudal castle of Hohen. In a battle gained here in 1688, during the Thirty Years war, by Duke Bernard of Saxe-Weimar, the Duke of

Rohan was slain. During the Austrian dominion, Rheinfelden was one of the four *Waldstätten*. Pop. 1221.

RHEINGAU (*Rhine valley*), a territory in the S. part of duchy Nassau, extending along the R bank of the Rhine for about 15 m. between Biebrich and Ridesheim, in the bailiwicks of Wiesbaden Eltville, and Ridesheim. It is equally distinguished by its beauty and fertility; produces excellent wine and fruit, and maintains a very dense population.

RHEINHAUSEN, a m. Nassau-Darmstadt, prov Saarburg, 10 m. S.E. Darmstadt. It is walled, and has two churches, a synagogue, and several mills. Pop. 1196.

RHEINMAGEN, a m. Prussia. See REINMAGEN.

RHEINBERG, a m. Prussia, prov Brandenburg, gov and 40 m. N Potsdam on a lake of same name, where the Rhine issues from it. It has a church, and a castle with a park, in which are statues of Prince Henry of Prussia, and Augustus William, and monuments to several of the distinguished soldiers who fell in the Seven Years war. Frederick the Great spent his youth here. Pop. 2169.

RHEINBAHLEN, a m. Baden, Palatinate, on the Elbenbach, here crossed by a bridge, 9 m. S.E. Laden. It has a mill. Pop. 1965.

RHEINKE, a m. Prussia, prov Westphalia, gov and 8 m. S.W. Minden, 1 bank Weser a little above the confluence of the Weser. It has extensive mill-works, and a trade in cattle. Pop. 1912.

RHEINLEN, or **RHEINLEN** a m. Holland, prov and 21 m. S.E. Utrecht, 1 bank Rhine. It is an old place, was formerly walled and had three gates, which were destroyed in 1640. It has a spacious market-place, surrounded with houses, a townhall, weigh-house, a church and a school. Agriculture tobacco-growing, and some trade are carried on. Pop. 1465.

RHEINISH BAVARIA. See RHEINISH.

RHEINISH HESSE, a prov Hesse-Darmstadt (which see).

RHEINISH PRUSSIA Germany. See PRUSSIA.

RHEINE, a m. Rhenish Prussia, gov and 5 m. S. Coblenz, on the Rhine, over which there is here a ferry. It is an old place, built almost entirely of wood, and has a R. Catholic church. Near it stood formerly the *Rheinpfalz* (King's Seat), where the electors used to meet and deliberate on the affairs of the empire. It was an octagonal, open-roofed building, supported by eight pillars in the circumference, and one in the centre with seven stone-aces round the sides for the electors. Many treaties of peace were concluded and emperors elected and dethroned here. It was pulled down in 1807 but was rebuilt, partly from the old materials, in 1843. Pop. 1400.

RHEYDT, a m. Rhenish Prussia, gov and N.W. Cologne, circle Gladbach, on the Rhine. It has a castle, two churches, manufacture of cotton, silk, and mixed silk goods, soap, glass, and vinegar a tannery numerous dye-works, and a trade in linen. Pop. 1576.

RHIN, **RHEIN**, or **RHYNE**, a river Prussia, issues from a chain of lakes, on the frontiers of Mecklenburg, flows S., passing Rainsberg and Alt-Ruppin, expands into several lakes, flows W., and after a course of about 70 m. pours back Havel on the frontiers of Prussian Saxony. It is named by a canal at Ruppin with the upper course of the Havel.

RHIN (**RAB**) or **LOWER RHEINE**, a dep. France, bounded N. by Rhenish Bavaria and dep. Moselle N. the Rhine, separating it from the grand duchy of Baden, S. dep. Hesse-Rhin; and W. dep. Vosges, Moselle, and Meuse, greatest length, S to N 60 m., average breadth, about 22 m.; area, 1777 sq m. In the W. it is mountainous, being crossed by the chain of the Vosges, which traverses it S. to N. in a direction nearly parallel to that of the Rhine, towards which the department has a general slope, the mountains, which are generally clothed with forests, gradually descending into lower hills, on which the vine is extensively cultivated, and finally merging into plains, which, on approaching the river, occasionally become more swampy. The greater part of the department is drained directly by the Rhine, but it also receives within its extensive circumference, of which the most important is the Ill. More than one-third of the whole surface is arable, and one-fourth is in wood. The mountainous districts are necessarily devoted to pasture, but the soil in the plains, which stand no high above the river as not to be swampy is very fertile, and yields good crops of all kinds of

grain, though not in sufficient quantity to meet the home consumption. Madder and tobacco also are extensively cultivated, and in particular districts excellent hops are grown. In some cantons cabbages are grown on a large scale, and employed in making the well-known chouxcroute [German, *sauc brezel*], which forms an important article of traffic, particularly at Strasbourg. The principal mineral is iron which is extensively worked, and there are also traces of silver, lead, antimony, and manganese. Excellent quarries of building-stone and gypsum, and good beds of potter's-clay are found in several districts. A little coal also is raised. The manufactures consist chiefly of iron, fine broad-cloths, linen calicoes, straw hats, leather, gloves, starch, all kinds of hardware implements and utensils, fire-arms, and cutlery. The trade, which is greatly favoured by several canals, but more particularly by that which connects the Rhine with the Rhine, is important. The principal articles are corn, brandy, wine, beer, cherry-brandy, vinegar, oil, chouxcroute, tobacco, madder hemp, iron and ironware wood, hams and poultry. The great majority of the inhabitants is Protestant. The department is divided into four arrondissements—Strasbourg, the capital, Reversheim, Schlettstadt, and Wissembourg—subdivided into 88 cantons and 542 communes. 1 pop. (1852) 587,438.

RHINE (Haut-) or **URRER KUEHN** a dep. France, bounded N. by Bas-Rhin, E. the Rhine separating it from the grand duchy of Baden, S. Switzerland and dep. Doubs, and W. Haut-Rhin and Vosges, greatest length N to S, 55 m., average breadth, 30 m., area, 1558 sq. m. The surface in the S. and W. is almost entirely covered by mountains which take a N direction, and belong to the chain of the Vosges though on the S. they join with the chain of the Jura. These mountains form the W. limit of the basin of the Rhine, to which the whole department belongs with exception of a small portion in the S. which belongs to the basin of the Rhodan. Besides the Rhine, the only river of any consequence in the tributary the Ill but the most important water communication is furnished by the Rhine and Rhodan canal by which an uninterrupted communication between these magnificent rivers has been established. Considerably more than one-third of the surface is arable and rather more than one-fourth is in wood. About one-eighth consists of meadow and pasture. A great part of the wood is in the long and somewhat narrow tract which lies between the Ill and the Rhine, and contains several extensive forests, of which the largest, that of the Hark, has an area of more than 35,000 acres. The arable land is generally fertile, and produces corn in sufficient quantity to leave a surplus for exportation. Besides grain, the principal products are potatoes, of excellent quality hemp and madder, and a considerable quantity of tobacco is grown. About 25,000 acres are in vineyards. The wine none of which bears a high name, is chiefly consumed within the department, but some is exported to Switzerland and Germany. The minerals include silver, lead, copper, iron, antimony, asphalt, gypsum, marble and potter's-clay. By far the most important of all is iron. The manufactures consist chiefly of iron, broad-cloth, linen, and longmen cloth, printed goods, both linen, cotton, and silk, carried on extensively in Colmar, Millhausen, Thann, &c.; stained paper, straw hats, hosiery leather, mineral acids, soap, household utensils, ironmongery clock-work, and porcelain stoves. In several districts there are extensive cotton-mills, dye-works, sugar-refineries, breweries, distilleries, potteries, blast-furnaces, and other iron-works. The trade is in corn, wine, brandy, kirschwasser, steel, ironmongery, cotton, and other prints, fruit-trees, cattle, &c. The majority of the inhabitants is R. Catholic, but the number of Protestants is very considerable. The language generally spoken is German, though for the most part in a very impure form. For administrative purposes, the department is divided into three arrondissements—Colmar, the capital; Altkirch, and Belfort, subdivided into 29 cantons and 490 communes. Pop. (1852), 494,147.

REIN or **Scot. Perth**; 4 m. by 1 m. Pop. 388.

REIN (Latin, *Almona*, German, *Alm*, Dutch *Rijn*, Italian, *Reno*) the most splendid river of Germany is also one of the most important rivers of Europe, as its direct course is 416 m., and its indirect course 665 m., the number of its tributaries, great and small, 13,800, and the area of its basin, 46,549 sq. m. It is formed in the Swiss cant.

Grison by three main streams, called the Vorder, Mittel, and Hinter Rhine, or the Lower Middle, and Upper Rhine. The Vorder Rhine rises in Mount Crispalt, N. E. of St. Gothard, and derives its water from three sources. The first issues from Lake Toma and Faldidale at the foot of the Malinthal-erstock, and is afterwards augmented from the Rados glacier; the second rises at Monte-Sole-Solinas-de-Rovosca, and the third at the foot of the Cresta Alta, these three sources, of which the second traverses the Val Cornara, and the third the Kluental, become united at Canot (Chumant). The Mittel Rhine issues from lake Skur in the Dintial, W. of the Lukmanierberg, traverses the Miedelsenthal and joins the Vorder Rhine at Disentis, from which the united stream is called only Vorder Rhine. It takes an S. direction, and at Reichenau unites with the Hinter Rhine, which issues from the Rheinswald glacier in Mount Adels on the Vogelsberg, and has a course of about 70 m. through the Rindwaldthal, before reaching Reichenau. Here the three united streams take the common name of Rhine, have a width of 150 to 140 ft. and admit of floating. The Rhine first becomes properly navigable at Colre after receiving the Pleiser. It now turns N., and shortly after being augmented by the Langart, quits the Grisons, forms the boundary between them and St. Gall on the left, and Liechtenstein and Vorarlberg on the right, receiving the Ill from the latter, and along with several minor streams, forms the Rhodan or Lake of Constance, contained by the Zeller or Untersee. On issuing from the Untersee it flows W. separating Switzerland from the grand duchy of Baden, and continues its course to Schaffhausen and Basel, receiving as it proceeds, on the left, the Goldach, Thur, Thun, Glis, and Aar, and on the right, the Waatch and Aig, mountain streams of the Black Forest. At Basel it again begins to flow N., separates the French dogs. Upper and Lower Rhine from Baden forms the boundary between the latter and Rhodan. It flows thenceforward through the grand duchy of Hesse, forms the boundary first between the Hesse and the Baden, and then between Hesse and the Prussian Rhineish provinces, till it wholly enters the latter at Coblenz. During the course from Basel now described it receives from France the Ill and several little streams from Baden the Weser, Eise, Kinzig, Mayr Pfalz, and Neckar from Rhineish Bavaria, the Lauter and Queich from Rhineishesse, the Main from Nassau the Lahn, and passes Germersheim, where it divides into a number of arms which afterwards unite, Strasbourg, Spire, Mannheim, Worms, Mainz, Hilberoth and Bingen. In Rhineish Prussia it receives on the left the Weich, Saar, Wupper, Ruhr, and Moselle, and on the right the Nahe, Moselle, Ahr, and Riff, and flows past the towns of Neuweid, Bonn, Cologne, Düsseldorf, and Weel. Thenceforward below Emmerich, it enters the Dutch prov. Gel derland and shortly after divides into two branches, S. and N. The S., called the Waal carries off two-thirds of its water, empties twice with the Maas and as the Old Maas, falls under the name of Merwe into the North Sea. The N. branch after making several windings in its course to Arnhem, but still retaining the name of Rhine, divides in front of Westervoort before reaching Arnhem, into two branches. Of these, the one on the r. proceeds as the New IJssel, in the bed of the canal which reaches dug to connect the Rhine with the Old IJssel till it reaches Doornik where the New and Old IJssel unite to pour their accumulated waters into the Zuider see. The L. arm proceeds under the name of Rhine in a course nearly parallel to the Waal, passing near Wageningen and Rhemen to Wyk by Durenede, where it again bifurcates sending a very feeble branch, under the name of the Crooked Rhine, to Utrecht, where by the canal of Vaart it communi cates with the much larger branch which had taken the name of Lech, and flowing past Vianen and Boomborch, unites with the Maas above Grimsen op-de-Lek. The Crooked Rhine becomes little better than a ditch, on leaving Utrecht it proceeds towards Leyden, and at the beginning of this century, was lost in a sand d. little beyond Katwijk—*kan-kan-Hijn*. At an earlier period it had here found an outlet into the ocean, and in more recent times, after surmounting many difficulties, the lost water of the Rhine has been collected in a canal, and by the aid of three strong the outlet has again been established. The breadth of the Rhine and the character of its channels, differ much at different parts of its long course. Its breadth at Basel is 750 ft.; between Strasbourg and Bâle, from 1080 to 1200 ft.; at Mainz, 1500 to 1700 ft.; and at Biebr-

landmass, where it enters the Netherlands, 3150 ft. Its depth varies from 2 to 23 ft. and at Düsseldorf amounts even to 50 ft. From the Lake of Constance to Basel it has a very rocky bed but, lower down, contains numerous islands, partly composed of sand and clay. From Barmen several of the islands are clothed with herbage, and from about of cultivation, between Strasbourg and Germersheim they form thickets of brushwood. The Rhine abounds with fish, including salmon and salmon trout, but more especially sturgeon lampreys, pike, and carp. Wild fowl also abound on its banks and countless islands. Some gold is contained among the sands brought down into it from the mountains of Switzerland and of the Black Forest.

The navigation of the Rhine is very important, particularly for W Germany. As already mentioned it first becomes navigable at Cologne, in the Grüns; but the continuous and commodious navigation does not begin till below Biehlhausen, and the traffic is loaded vessels is not important above Spire. From Strasbourg to Mentz, the bottom of the vessels in which it is carried is from 100 to 125 tons; from Mentz to Cologne, 185 to 200, and from Cologne to Holland, from 400 to 450 tons. The navigation is rendered dangerous by waterfalls, more especially those of Biehlhausen, of Jockach, near the mouth of the Wutach, of Lauenburg and of Rheinfelden. It is also rendered dangerous by the Bingerloch, near Bingen, where the stream becomes suddenly narrowed and confined between lofty precipices, and, by summer storms, though as a less degree, at Biehlhausen, St. Clair and at Lohr.

The Rhine is distinguished alike by the beauty of its scenery and the rich fields and vineyards which clothe its banks. Hence, no river in Germany more especially since the introduction of steam-vessels, attracts so many tourists. From Basel to Mentz it flows through a wide valley, bounded on the l. by the Vosges, and on the r by the Black Forest, and the mountains along the Bergstrasse. From Mentz the mountain ridges approach the stream at first only on the bank, where they form the Rheingau; but at Bingen they begin to hem in the l. bank also, and continue from there to Kölngraben to present a succession of lofty mountain summits, bold precipices, and wild, romantic views. Pleasant towns and villages lie nestled at the foot of lofty hills above them, on all sides, rise rocky steep slopes, clothed with vines, and every now and then the castles and fastnesses of feudal times are seen frowning from precipices apparently inaccessible. At times the chain of ridges on either side opens out, and allows the eye to wander into romantic valleys, along which tributaries of less or greater magnitude keep dashing down, or gradually winding to the parent stream. On the river itself much additional variety and beauty are given to the scenery, by the constant recurrence of picturesque and verdant islands. The elevation of the Rhine above sea-level is at the Col d'Obere Alp, 9967 ft., at Buechenan, 2021 ft., at Constance, 1335 ft., at Basel, 771 ft., at Kohl, 468 ft., and at Cologne 121 ft.

RHINE (PROVINCE OF THE), or RUHRISCH PRINZIM [German, Rhine Province], a prov. Prussia, between France, Belgium, Holland, Hanse District, Russia, Hanse-Hamburg Oldenburg, Bavaria, and prov. Westphalia. Area, 6798 sq. m. In the S it is hilly, being pervaded by the ranges of Hohen-Venn, Kiffel, Hoch-wald, Idar-wald, and Hundertkell. It is watered by the Rhine, the Moselle, and some affluents of the Meuse. The proportion of unproductive land is very small. Grain, potatoes, flax, hemp, tobacco, hops, oil-seeds, grapes and other fruits are cultivated, and horned cattle, horses, sheep, goats, and swine, are extensively reared. It is the most important mineral district in the kingdom, iron, copper, lead, coal, zinc, gypsum, clay, marble, alabaster, and porphyry, being wrought, and it is likewise the most active manufacturing district, there being numerous iron-works and machine-shops, chemical works, sugar refineries, glass works, porcelain works, cotton, woollen, linen, and silk spinning and weaving factories and paper mills, falling, tan, and grain mills; with above 2000 breweries, and above 3000 distilleries. It is divided into the five governments (Regierungsbezirk), of Cologne; Düsseldorf; Aachen, or Aix-la-Chapelle; Trier or Treves and Coblenz. Pop. (1849), 2,811,177, of whom 858,908 are Protestants, 2,114,286 Roman Catholics; and 29,851 Jews.

RHINELAND, a vil U. States, New York, 85 sq. m. Albany, l. bank Hudson; with three churches, an academy, an iron-foundry and a paper-manufactory. Pop. 1300.

RHIO Rao, or Rhow, a prov. Dutch possessions, in the Indian Archipelago, comprising the Rhio Archipelago and the Lings Islands; area, 2877 sq. m. It is bounded, N by the Straits of Singapore and Malacca, E. by the Chines Sea, S. and W. by the sea which washes the shores of Sumatra.

RHIO, Rao, or Rhow, an isl. group, Indian Archipelago, in the Dutch possessions, lying chiefly S. and E. from Singapore. The chief island is Rintan, sometimes also called Rhio, besides which the group includes Galang, Ganapung, Battam, and numerous smaller islands, both at a distance from and close to their shores. The navigation among them is very intricate. The group is separated into two sections by the Strait of Rhio, which passes between Blatang on the E. and Galang and Battam on the W.

RHIO Rao, or Rhow, a seaport in Indian Archipelago, 50 m. S.E. Singapore, on the small isle of Pulo-Pinang, which has in an indentation on the S. side of Blatang, from which it is separated only by a narrow channel. It is a neat-looking town arranged, with great regularity, in two divisions, the European clean and handsome, and the Chinese, or native, rather dirty. It is defended by a fort, built of large stones brought from Malacca when that place was occupied by the Dutch in 1824. It has many good buildings, among which are the governor's house, a stone Protestant church and a school. Its haven is roomy and in it, during October and November, may be seen 80 to 100 large and small vessels. Through Chinese, Bengalese, and Arabian merchants, a considerable trade is carried on with China, Annam, Siam, Borneo, Celebes, Java, Sumatra, Singapore, Penang, and even the W. Indies. It was declared a free port in 1894.

RHIO par Wales, Carnarvon; 1855 ad. Pop. 578. **RHIO** or Ro a vil and can Italy Lombardy, prov. and 9 m W N W Milan, r. bank Lura, with a large church, founded by Cardinal Carlo Borromeo, a masonic college, and a large educational establishment. Pop. 8716.

RHODDA, or Rhoda, an isl. Egypt, in the Nile, opposite Cairo, 2 m. long. It contains the palace's garden.

RHODE (Rte Gexner) a vil and cant. Belgium, prov. Brabant, 7 m. S. Brussels. It has manufactures of paper, breweries, corn-mills, and a trade in wool, &c. Pop. 2300.

RHODE ISLAND, the smallest of the U. States of N America lat. 41°23' to 42°3' N lon. 71° 6' to 71°38' W and bounded, N and E. by Massachusetts, N. the Atlantic, and W. Connecticut length, N to S. 49 m. greatest breadth 38 m., area, 1340 sq. m. The surface, which in the N is hilly and rugged, but elsewhere generally level, is divided into two parts by Narragansett Bay, a fine body of water about 30 m. long by 15 m. broad and containing several islands, and among others the one which gives the state its name. The principal rivers are the Pawtucket and the Pawtuxet, both affluents of the Providence, which falls into Narragansett Bay and the Pawtucket, which, after forming the boundary between this state and Connecticut, falls into Rhode Island (whence the climate, particularly that of Rhode Island (which has an area of 50 sq. m.), is mild and equable, and well adapted for its pleasant summer and winter resorts, for travellers from the S. The soil is of a different fertility but from careful and skilful cultivation raises good crops, particularly of Indian corn and oats. Many factories, however, form the staple interest of the state; and cotton and woollen goods give employment to numerous mills and factories, and a few vessels are built. The foreign trade, once considerable, has greatly decayed in consequence of the rivalry of neighbouring ports, possessed of greater advantages. The chief religious denominations are the Baptist, Congregationalists, Episcopalian, and Methodist. For the higher branches of education, the only collegiate institution is Brown University at Providence; the number of public school districts is 282, and the number of scholars under 15 years of age attending is 88,003. The government is vested in a governor, senate, and assembly, elected annually by universal suffrage. The most important town is Providence; but there is no proper capital, as the legislature holds its sittings not only at it, but also at Newport, and occasionally at South Kingston, Bristol, and East Greenwich. Rhode Island was first settled, in 1639, by a small colony

headed by Roger Williams, who had been banished from Massachusetts for his religious opinions. William Giddings, with others banished for the same cause, joined him in 1638. A charter was afterwards obtained from Charles II securing universal toleration, and vesting the government in a governor, deputy-governor, 10 assistants, and representatives chosen by the freemen of the several towns. The form of government conducted in force till 1841. P (1850), 147,544.

RHODEA, a town principally Waldeck on a height, 25 m W N W Cassel, with a church and a castle. Pop. 1630.

RHODES, a large and celebrated isl. and city in the Mediterranean, Asian Turkey, S coast, Anatolia from which it is separated by a channel 10 m. broad lat 35 52 to 36 28 N lon 27 40' to 28 18' E. 50 m. long S.W. to N.E., and about 16 m. broad. Nearly in the centre of the island is Mount Artimus or Allayra, 4008 ft. high. The land descends gradually towards the sea and forms a series of plains, constituting by much the larger proportion of the island. These plains being watered by numerous rivulets, are extremely fertile, but are almost entirely neglected. Corn, olives, cotton, wine, figs, oranges and other fruits, are amongst the principal productions of the island, however, there is barely enough raised to supply the demands of the inhabitants, but of the remainder there are considerable quantities exported, which with the conveyance of goods from Smyrna, forms the chief occupation of the inhabitants. Pop. 30,000.

The city of Rhodes stands at the most N part of the island, lat 36 20' 58" N lon 28 10' E, and although it still has an imposing appearance, is greatly reduced from what it was by violent times not covering more than a fourth of its former area. The walls, however, remain as they were they are encompassed by a fosse or ditch 70 ft. wide now dry. There are several churches converted into mosques, a convent, and the palace of the Grand Masters, a public library of about 1000 volumes placed in a new building erected for that purpose; a college or medressa, attended by about 150 students and five other schools for boys, and six for girls. Its harbour formerly so famed is now half filled up with sand, and only accessible in small vessels. It is divided into two by a raised mole, on the east of which is a lighthouse and which protects the mole from all winds. It is supposed that the famous Colossus stood across the passage from the outer to the inner basin. The Colossus was made of brass, and was erected in honour of Apollo the tutelary deity of Rhodes and is said to have been 100 ft. high. It was set up about the year 278 a.d. and was thrown down by an earthquake 60 years thereafter, and lay where it fell for nearly 800 years, or till a.d. 667 when the island having been taken by the Saracens they broke the statue to pieces, and sold the brass. Rhodes was in ancient times one of the most celebrated states of Greece and particularly distinguished for its wealth, commerce, and naval power, being one of the last which surrendered to the Roman arms. It was no less distinguished for its superiority in art, science and literature all vestiges of which however disappeared under the barbarous sway of the Turks by whom it was taken in 1522. Pop. city 10,000.

RHODE Z, a town in France. See Rhodes.

RHODT, a vil. Bavaria, Palatinat, can and near Edenkoben, with a church and saltstone quarries. Pop. 1452.

RHON or **Rhinensprung**, a small mountain chain, Germany, in the E. of Haveria. It is connected at the S.W. extremity with the Spesshardt, whence it extends N.W. past Bruckman to Fladungen, and then turns N.N.W. to Yoch. Its S. portion being the more elevated of the two, takes the name of Hohe Rhon and in its culminant point, Kreuzberg attains the height of 3100 ft. The forests are of limited extent and the whole country covered by the same, is of a bleak and very forbidding aspect. The rocks consist chiefly of lava and basalt, the sources of which are still so visible that a great number of extinct volcanoes have been traced. There are no subterranean of any consequence.

RHONA, (P. from Salgeth) a vil. Hungary Thither Thuis, co. Marmaros, 12 m. from Salgeth with a church. Pop. 1141.

RHONABREK, a vil. Hungary Thither Thuis, co. Marmaros, 12 m. from Salgeth; with a Greek church, and extensive salt-mines. Pop. 1298.

RHONE, an E. dep. France, bounded N. by dep. Seine-et-Laine, E. Ain and Isere, S. and W. Loire. Its greatest W. 11

length, N to S, 51 m.; average breadth 20 m.; area, 1066 sq. m. Its W. boundary is formed by the Cevennes, which stretch along from N to S, and send out several main branches. The surface gradually lowers towards the E, where its principal boundary is formed by the Rhona, and its tertiary the Saône. About one-half of the surface is arable, one-ninth in vineyards, and one-eighth in wood. The principal crops are wheat, buckwheat and maize but the produce falls far short of the consumption. Potatoes are extensively cultivated, and all the fruits of France, with the exception of the orange and olive, are raised with success. Much of the wine produced is of excellent quality. A considerable portion of the surface is devoted to the culture of the mulberry for the purpose of rearing silk worms. The minerals include coal but not to great extent, or of good quality. Argentiferous lead and copper the mines of which, in the department, are the only ones in France which are worked to profit. There are also good quarries, both of building-stone and marble and beds of potter's clay. Manufactures have here received great development. Those of silk are the most renowned in Europe, particularly for the finer class of goods. The other leading manufactures are muslin plain and embroidered, hats, woollen covers, tinsel, lacquer, starch, paper glass, ironware, &c. The admirable advantage of this department in regard to water communication make it an important entrepot for the traffic both of the N and S of France. The principal articles in addition to those furnished by its own manufactures are corn flour, cheese wine, heavily colonial produce, &c. Dep. Rhone is divided into two arrondissements—1 Lyons, the capital, and Villefranche, subdivided into 25 cantons, and 257 communes. Pop. (1852), 574,745.

RHONAT (Bourgeois) See Bourgeois-Rhonor.

RHONÉ (P. from *Rhodon*) a river, Europe, rises in Switzerland near the E. frontiers of the cant. Valais, in a glacier of its name between Mont Furea on the E. Gallenstock on the N. and Grimsal on the W. about 18 m. W.S.W. the source of the Vorder-Rhon 5904 ft. above sea-level, dashes down with great rapidity into the valley, leaving from cascade to cascade, traverses the centre of Valais in a westerly direction and near Villeneuve enters the Lake of Geneva at its E. extremity. On entering the lake its waters are uncharged with mud, but on issuing from it, at its S.W. extremity at the town of Geneva, it is of a pure deep blue colour, soon after changed into a muddy brown by the accession of the glacier-born Arve, which joins it 1½ m. below Geneva. Proceeding S.W. to the frontiers of dep. Ain in France, it turns almost due S., forming the boundary between that department and Savoy then turning suddenly N.W. traces the boundary between the same department and dep. Loire and reaches Lyon. Here having at least doubled its volume by the accession of the Saône, it proceeds almost due S., separating depts. Rhone, Loire, Ardèche, and Gard on the W. from depts. Loire, Drôme, and Vaucluse on the E. On approaching Avignon it takes a more easterly course but still N. course, separates dep. Gard from dep. Bouches-du-Rhône, traverses part of latter department and finally falls into the Gulf of Lion in the Mediterranean. At Arles it divides into two branches, the loss of which under the name of Old Rhone, flows S.W. forming the W. side of the large delta, known by the name of the Ile de Camargue. The main branch under the name of Grand Rhone, continues the S. course, but again divides into two branches and enters the sea by two mouths. The most important towns watered by the Rhone are Lion and Geneva in Switzerland, and Lyon, Yverdon, Tournon, Valence, Vienne, Font St. Esprit, Avignon, Arles, Orange, Beaune, and Arles in France. The principal affluents are, on the right, the Valserine, Ain, Saône, Doux, Erioux, Ardèche, Cèze, and Gard or Gardon; on the left, the Dranse, Valaisane, Arve, Fior, Giron, Bormio, Gère, Gualme, Isère, Drôme, Rhône, Les Arènes, Egnone, and Durance. Its whole course is about 550 m. of which 900 m. are in Switzerland, and 250 m. in France. From its frontiers while 900 m. are navigable. The basin of the Rhone is bounded on the E. by the Lepontine, Pennine, Graian, Cottian, and Maritime Alps S.E. by the most southern ramifications of the Maritime Alps, N. by the Bernese Alps, Jura, Vosges, and Flandres and W. by the Cevennes and Cote-d'Or. The whole length of the basin from N. to S., from the source of the Saône to the Gulf of Lion, is 375 m. and the breadth,

from the source of the Rhone W to that of the Gröbe, a tributary of the Saône, 195 m. By means of a series of magnificent canals, the navigation of the Rhone has been continued, without interruption, to the Elbe, Seine, Loire, and Garonne.

RHONI a to. Transcaucasian Russia, Imbetta, on the Archa. It is the site of an archbishop, and has a church; and a considerable trade in wine, silk, fruit, tobacco, and hemp.

RHONICE, or HANON, a vil. Hungary. Mithér Danube, co. Szék, on the Hunos, 21 m. from Veszeli; with a church, and extensive coal and iron works. Pop. 1193.

RHOON or RHOOS a vil. Holland prov. S. Holland, 15 m. W N W Dordrecht with two churches, a school, a townhouse, and an old castle. Pop. (agricultural) 1255.

RHOCILLY par Wales, Glamorgan 2470 ac. P 507

RHOCOLYN par Wales, Anglesey 2580 ac. P 483.

RHOSOMWYTH, par Wales, Pembrokeshire 2536 ac. Pop. 501.

RHOSMARKET par Wales, Pembrokeshire 17.9 ac. Pop. 485.

RHOTIE, par Wales, Cardigan 1307 ac. P 123
RHOTAS, KHARATA, or ROTAGUR, a to. Hindoostan, prov. Bahar on an angle formed by the Son and the junction of another stream, 72 m. S.E. Benares. The fortress occupies the flat summit of a mountain, accessible only by a steep ascent of 3 m. and entered by three gates, which rising one above another are defended by cannon and large stones ready to be rolled down. The battlements, though much disordered, are in many places entire, and the ruins of the palace, with its gardens and banks, as well as several Hindoo temples still existing, are very magnificent.

RHODIAN a bor. port, and par N. Wales co. Flint. The town 5 m. N N W St. Asaph and about the same distance from the sea, r. bank Clwyd is for the most part neatly built, has a church, and places of worship for Calvinistic Methodist Wesleyan, Baptists and Independents two national schools, the ruins of a magnificent castle, erected in 1015 the remains of an old Cistercian abbey and the first mass of the building where King Edward I. held his parliament in 1255, when he passed the statute of Rhodlan, the inhabitants chiefly employed in agriculture Rhodlan union with Flint &c. in returning a member to parliament. Pop. bor. 1472. Area of par. 5670 ac. Pop. 8049.

RHUN, or POLUN KHUN, one of the Molucca isles. Banda group. It lies 11 m. W Great Banda is about 3 m. long, and suffers from want of good fresh water. Its principal village is Lochon, besides which there is a Dutch fort, and a small garrison. The population is small. Fish are plentiful on the coast, and large serpents in the jungle.

RHYD-BORDELL a hamlet, Wales co. Glamorgan on the Taf, here crossed by a bridge and on the Glamorgan canal. It contains a number of pleasing villas the ruins of an old castle, and a tidal spring. Pop. 1313.

RHYL, a hamlet, N. Wales, co. Flint, 4½ m. N W St. Asaph, with a station on the Chester and Holyhead railway, much frequented during summer for sea-bathing.

RHYNIF and DUNE, par Scot. Aberdeen Pop. 1017

RHYNN, or RHYNYS OF GALLWAY a dist. Scotland, consisting of the remarkable peninsula in the N W of Wytoshire, connected with the mainland by the isthmus between Looe Bay and Loch Ryan. It forms a long and comparatively narrow belt stretching about 27 m. from Corran point in the N to the Mull of Galloway in the S.; with a breadth in its N. part of about 5 m. and in its S. part not more than 3 m. The coast is generally bold and rocky and the interior besides being finely diversified, consists for the most part of a dry loam well adapted for the turnip husbandry.

RIAJIK, a to. Russia, gov. and 64 m. S.E.E. Riazan. It is an ancient place, once surrounded by ramparts, of which part still exists. has four churches, an almshouse, and houses of convalescence, and some general trade. Pop. (1849) 3225.

RIAJI (RIAJA COLEMANA), a to. Spain, Galicia, prov. and about 50 m. from Coruña; with a church, courthouse, primary school, and manufactures of coarse linen. P 1811.

RIANCÓ LA-PUERTA, a to. Spain, prov. and 89 m. N E Leon, on an angle formed by two arms of the Esla, near its confluence with the Valdebarón. It occupies a healthy and naturally site, and has a church, courthouse, primary school,

manufactures of agricultural implements; and some trade in agricultural produce. Pop. 1215.

RIANÉ (ann. Zhenoue) a to. France, dep. Var, 28 m. N W Brignoles, with manufactures of hats and silk, and a considerable trade in corn. Pop. 2559.

RIARDO, a to. Naples, prov. Lavello, 11 m. N W Caserta, on a hill; with two churches, and a strong castle. Near it is a mineral spring, which boils incessantly and a very remarkable grotto. Pop. 580.

RIAZA, a to. Spain. Old Castle, prov. Segovia, 57 m. N Madrid. It has a good modern townhouse, with prison attached, a granary an hospital an elementary school for each sex and several private schools a church with three naves, and in the vicinity two hermitages. The manufacture of coarse cloths and the miluature of fine wools, are carried on. Pop. 2026.

RIAZA a river Spain, formed by several small streams R. of Riofre prov. Segovia, Old Castle, N side Sierra Guadarrama flows circuitously N N W past the town of Riazan, and after a course of about 45 m. joins r. bank Duero.

RIAZAN a gov. Russia, bounded N by Viatka, N W Moscow W Tula, S. and E. Tambov, lat. 55° 2' to 54° 50' N, lon. 58° 15' to 41° E. greatest length N to S, 180 m. greatest breadth, 125 m. area, 11,568 sq. m. The surface, nowhere mountainous, is finely diversified by numerous low hills and undulating plains, and has soil of remarkable fertility particularly on the N. In the N there are several extensive marshes. The only river of any importance is the Oka, which directly or by its affluents, drains the whole government, except a small part of the S. belonging to the basin of the Volga which there traverses a small part of the government and is connected with the Ufa by the Transvolga canal. Cereals of all kinds are produced in quantities greatly exceeding the home consumption. Hops and tobacco are also extensively grown, and exported to Petersburg and Moscow. About one-eighth of the whole surface is occupied by wood chiefly pine, with an intermixture of oak, lime, and birch. The pastures are particularly good, and great numbers of fine cattle are annually fattened. The rearing of bees forms an important occupation and furnishes a considerable export of honey and wax. The minerals of any value are almost confined to millstones, limestones and gypsum. The most important manufactures are linen and hosiery. There are also extensive glass works, numerous tanneries, and several foundries. For administrative purposes, the government is divided into 12 districts, of which Ruzan is the capital. Pop. (1850) 1,263,000.

RIAZAN, a to. Russia, cap. above gov. on the Trubezh, at the confluence of the Lebedza, 105 m. S.W. Moscow. It is surrounded by palisades and an earthen rampart is on the whole poorly built, most of the houses being of wood, and the streets very imperfectly paved. It is the residence of a governor, the seat of an archbishop, and the seat of several important courts and public offices. has two wooden and eighteen stone churches, among which are three cathedrals, a large and handsome structure occupied by the public offices and law courts, several monasteries, a diocesan seminary gymnasium and other superior schools; three poorhouses and a workhouse, and house of correction manufactures of woollen and linen cloth needles, and leather and a considerable general trade. Pop. (1849) 16,711.

RIBAFI BCHA or RIBAFIXIMA, a to. Spain, Old Castle, prov. and 7 m. S.E.E. Logroño, 1 bank Ebro with a church, school and hospital a distillery an oil and several flour mills, and a trade in wine, oil, and fruit. Pop. 1432.

RIERARROJA, two places, Spain. 1. A to. Catalonia, prov. and 50 m. W Tarragona, r. bank Ebro with a church, courthouse, primary school, numerous flour-mills, and a trade in agricultural produce. Pop. 1888.—2. A to. prov. and 13 m. N Valencia, r. bank Turia; with a church, courthouse, primary school, castle, and a gypsum, and several oil and flour mills, and a trade in wine, oil, silk, and agricultural produce. Pop. 1803.

RIHAS several places, Spain. 1. A to. Catalonia, prov. and about 50 m. from Gerona, surrounded by sterile mountainous; with a church, courthouse, and school manufactures of cotton twist, and some trade in wool. Pop. 798.—2. (San Pedro de) A to. Catalonia, prov. and about 24 m. from Barcelona, with a church, courthouse, school, hermitage situated

on a height, and some trade in wine. Pop. 3114.—3 (San Esteban *donde* de 52). A vil. Galilea, prov and 9 m. N.E. Ormaiztegui, on a lofty and rugged height above the Bñ; with a large Benedictine monastery church and a trade in maize, wine and chickens. Pop. 573.

RIBBESFORD, par Eng Worcester 4430 ac. P 5485
RIBBLE, a river England which rises among the mountains on the borders of Yorkshire and Westmoreland, about 9 m. N.E. Kirby Lonsdale; flows first S.E. past Settle, then S.W. into Lancashire past Chorley, and continues the same direction to Preston, a little below which it turns a broad estuary, and falls into the Irish Sea, after a course of about 80 m. It is navigable to the bridge at Preston, beyond which the tide ascends about 8 m. and in consequence of the deepening and narrowing of its channel below that town, the navigation has been greatly improved, and at the same time thousands of acres of rich alluvial land have been recovered.

RIBBESFORD a vil and par England, co. Lancaster, 6 m. N.W. Blackburn, near the Calder. Though now an obscure village, it was anciently a Roman station, the importance of which is indicated by the great number of Roman antiquities including ruins of temples, altars, statues, coins, &c., which have been found here. Beside the parish church, a rude irregular pile, with a tower too broad for its height, there are Independent and R. Catholic chapels, a free school, almshouse, and good slate quarry; area of par 8150 ac. Pop. 3888.

RIBE, or **RIBEN**, a to. Denmark, duchy Schleswig cap. bal of same name, enclosed by the Ribe or Rysen, about 3 m above its mouth, 45 m. N.W. Leneburg. It is the see of a bishop. has two churches one of them a large cathedral built in the 13th century the interior of which is about 300 ft long, 160 ft. broad and 130 ft. high and containing the tombs of several Danish kings. The harbour which was once good, has now only from 3 ft to 4 ft. water, and larger vessels must lie at Nordby on the island of Fanø. A great many woollen stuffs were at one time made here, and known in commerce by the name of Ribetyn, or Ribe cloth but this, and any other branch of trade which the town possessed, has ceased to be of importance. From the beginning of the 13th to the middle of the 15th century, Ribe had eleven churches and seven convents and carried on a trade so extensive as entitled it to rank as one of the most important places in the kingdom. Near it is the strongly fortified castle of Ribershus, built in 1115. Pop. (1851), 3964.—Ribe, though locally in Schleswig, gives its name to a bailiwick, the greater part of which belongs to Jutland. Of its whole area of 900 geo. sq. m. 520 geo. sq. m. belong to the latter. Pop. (1851), 59,200.

RIBBAUVILLE, or **RASCHWITZ**, or **RIPPONSWILLER**, a to. France, dep. Haut-Rhin at the entrance of a picturesque valley, and surrounded by vineyards, 10 m. N.W. Colmar. On the highest part of the town a handsome church has been erected and near its centre stands a handsome office which is used as the Hotel de Ville. The manufactures consist of catines, napkins, and cotton goods. There are also breweries, and a cotton-mill. At a short distance W. of the town, is the old castle of Ribershus on the summit of a hill, and lower down on adjoining heights, are the castles of St. Geron and St. Ulrich. On the ridges of the Vosges above the town is an old rampart or wall of unknown date, called the Helden mauer, or Pagan wall. Pop. 6555.

RIBEIRA GRASPADA, a to. Azores, E. coast, Isl. St. Michael 15 m. N.E. Ponta-Delgada. The streets are narrow and irregular, and the houses constructed of lava. Pop. 8000.

RIBEIRAO, or **LAPA DO RIBEIRAO** a to. Brazil prov Santa-Catarina, at the bottom of a creek in the island of that name, 8 m. S. Desterro. It has a church, and a considerable trade in sugar rum, and salt fish. Pop. 2000.

RIBEIRAO, or **SAO JOSE DO RIBEIRAO**, a vil and par Brazil, prov. Mato-Grosso, 24 m. below the junction of the Guaporé and Matto Grosso where there is a *fazenda*, with a garrison to resist the incursions of the wild Indians. It contains a parish church, and is inhabited chiefly by Indians and *Mestizos*, who live mostly by hunting and fishing, and also assist in carrying goods by land or water to Para and Mato Grosso. Palm trees, balsam, and sassafras, abound on the banks of the Madeira, in the neighbourhood.

RIBEIRAO DO CAXO, an numerous stream, Brazil, prov. Minas-Geraes. It rises near the town of Maratão, flows W. making many windings and joins a bank Gualleão after a course of 110 m.

RIBEMONT [and *Ribou Mont*] a to. France, dep. Aisne, 26 m. N.W. Laon with manufactures of linen and calico. Condorcet was born here. Pop. 2420.

RIBERA, several places, Spain, particularly—1. (*del Alago*) A vil. and com. Old Castile, prov. and about 4 m. from Oviedo, on the Nalon. In the vicinity are the much-frequented thermal baths of Priorio. Pop. 1821.—2. (*Alta*) A vil. and com. Old Castile, prov. Alava, on the Bayas and Zadorra, a little S.E. Vittoria. It has several flour-mills, and a trade in cattle. Pop. 1150.—3. (*del Fresno*) A vil. Spain, Extremadura prov. Badajoz, on the Fresno. It has two schools a nursery in ruins a church and in the vicinity a hamlet. There are five flour and three oil mills. P. 2420.

RIBERÁ, a to. Sicily, prov. and 27 m. N.W. Girgenti Pop. 4000.

RIBERAC a to. France, dep. Dordogne, in a fertile basin on the Dronne 18 m. W. N.W. Périgueux. It is irregularly built, contains the remains of an old castle and an ancient church has manufactures of leather, and a trade in corn linen and swine. Pop. 1416.

RIBNITZ, a to. Meklenberg-Schwerin circle Wendisch on a lake which communicates with the Baltic 15 m. N. Rostock. It is entered by three gates contains two public squares, two churches, two houses, and convent, and has some shipping. Pop. of bail 4891.

RIBORDONE, a vil. and com. Italy Piedmont, div. Turin, prov. Ivrea, on a lofty hill in the valley of F. m. It has several churches, a sanctuary, and free school. P. 1427.

RIBSFON (*HEAT and LITTLE*) two townships England on York (W. Riding) the former 34 m. N. Wetherby. The celebrated spire, the Ribston pippen was first grown in this township. P. 170.—2. 34 m. N. W. Wetherby 1 246.

RIBY, par Eng Lincoln 3740 ac. Pop. 547.

RICAN or **RICATY** a to. Bohemia circle Kaurzin with a church, school townhouse, manufactures of linen for lacy and shoes tile-works, and a trade in corn, cattle, and timber. Pop. 1008.

RICCAL par Eng York (E. Riding), 3080 ac. P. 630
RICCARTON a vil. and par Scotland on Ayr. The vil. 1 bank Irvine, which separates it from Kilmarlock. stands on an eminence, and has a neat modern church. Coals are extensively wrought, and tiles largely manufactured in the parish. Pop. 4638.

RICCIA, a to. and com. Naples, prov. banno, 14 m. R.F. Campobasso with five churches, eight chapels, and a Capuchin monastery. Near it are a sulphur ore spring, and a small lake abounding with fish. Pop. 6152.

RICLO a vil. and com. Italy Piedmont, div. Genoa prov. Levante 5 m. N.W. Spina, a slope of a ridge of hills with a handsome church and some transit trade. Pop. 2373.

RICE LAKE, Upper Canada, Newcastle dist., 17 m. long, by 3 m. average breadth. It communicates with several lakes to the N., and discharges its surplus waters by the Trent into Lake Ontario.

RICHEY, a to. France, dep. Aube, in a mountain valley watered by the Laigne, 95 m. S.S.E. Troyes. It consists of three adjacent villages, distinguished by the names of Richey Haut, Richey Mairie, and Richey Bas. They are irregularly and for the most part, poorly built, but contain some good houses, and three churches with lofty spires and have manufactures of brandy tanneries, and dye-works. A great quantity of wine, of good repute, is produced in the neighbourhood. Pop. 3019.

RICHARD'S CASTLE, par Eng. Salop and Hereford 4871 ac. Pop. 657.

RICHARDSON'S RIVER British N. America. It falls into Back's Inlet, Arctic Ocean in lat. 67° 54' N. long. 113° 56' W.

RICHARDSTOWN, par Ire. Leath 1090 ac. P. 499
RICHBOROUGH a decayed vil. England, co. Kent, on the Stour 2 m. N.W. Swadwell supposed to occupy the site of the ancient Roman city Rutupun.

RICHE, an Isl. S. Pacific Ocean, E. coast, Papua, lat. 8° 2' S. lon. 147° 57' E.

RICKELIEU (anc. *Ricciogugli*), a town, France, dep. Indre-et-Loire, in a fertile wine district on the Mable, 23 m. S.W. Tours. It was originally only a petty village, but, in 1637 was converted by Cardinal Richelieu into a regularly-built town, with spacious, regular streets converging so as to meet in a handsome public square. Its celebrated citizen is now a mere heap of ruins. The manufacture of beetroot sugar and heavily so the trade in wine, largely fruit and other products of the district, are considerable. Pop. 2467.

RICKELIEU, RIVER, or **JOHN** or **CHANDLER**, a river, Lower Canada, dist. Montreal, issuing from N. extremity of Lake Champlain, near the U. States frontier. It flows N. and enters the St. Lawrence at Lake St. Pierre, after a course of about 80 m.

RICHILL a small town, Ireland, co. and 2½ m. E. by N. Armagh with places of worship for Presbyterians, Wesleyans, and the Society of Friends. It had formerly a flourishing linen market. Pop. 627.

RICHMOND, a port, and municipal bor. market town, and par., England, co. and 42 m. N.W. York (N. Riding), 1, bank of the river, which is here crossed by a handsome stone bridge. The town on a branch of the York and Newcastle railway, is picturesquely situated on a neat and well built cliff of stone, has a handsome town hall two churches one of which, supposed to have been erected about the time of Henry III. presents some specimens of the Norman style and places of worship for Baptists and Wesleyans and a R. Catholic chapel a free grammar-school of high reputation, numerous other public and private schools, three hospitals, and other charitable institutions. The trade of Richmond at one time considerable and various is now mainly connected with agricultural produce and supplying the wants of the numerous wealthy families residing in the vicinity. There are iron and brass foundries, roperies, hatteries, paper and corn mills. In and around it are numerous interesting remains of antiquity the most remarkable of which is the castle, comprising an area of nearly 6 ac. and one of the most majestic ruins in England its great tower about 100 feet high is a fine and very perfect specimen of the Norman work. Richmond returns two members to Parliament Pop. bor., 1969 area of par. 2341 ac. Pop. 4106.

RICHMOND a vill and par. England co. Surrey, 12 m. W.S.W. London, with which it is connected by railway partly on an acclivity of Richmond Hill and partly on a plain along the Thames, which is here crossed by a handsome stone bridge of five arches. It has a theatre, a mechanic's institution, new lecture hall and session house, the last three all new and tasteful structures, two churches two Wesleyan chapels, an Independent, a Lady Hampton's Connexion a Baptist, and a R. Catholic, numerous schools of various descriptions a dispensary, and seven sets of almshouses. Being wholly a place of recreation, Richmond has no manufactures, if the celebrated cake, called Made of Honour be excepted, of which large quantities are made the inhabitants living solely by providing for the numerous visitors who throng thither during the summer season. The scenery in the vicinity is very beautiful, and the view from Richmond is one of the finest to be obtained anywhere its interest is not a little heightened by the great number of noblemen and gentlemen a seats which present themselves in all directions. Richmond was a favourite residence, for many centuries, of the monarchs of England, several of whom died there. Pop. vill 9086 area of par. 1280 ac. Pop. 9255.

RICHMOND—1. A town, New South Wales co., Cumberland on the Nepean 89 m. N.W. Sydney with a neat church—2. A town, Victoria, on the Yarra Yarra, near Melbourne—3. A town, Van Diemen's Land, 14 m. from Hobart Town with a stone bridge, jail, and courthouses.

RICHMOND a city, U. States, cap. Virginia, finely situated in a healthy and picturesque district, on both sides of Shoshone Creek, at its junction with the James, immediately below the lower falls, and on the railway from Fredericksburg to Petersburg 105 m. S. by W. Washington. It stands opposite to Manchester which communicates with it by two bridges, and may properly be regarded as its suburb. It was originally laid out on a regular plan, to occupy an area of about 8 sq. m. A large portion of the space has not been built over but the part actually filled up consists, for the most part, of handsome streets, which cross at right angles,

and are usually 65 ft. wide. Of the houses, about 2000 in number, one-half are of brick, and one-half of wood. Near the brow of an elevated plain called Shoshone Hill, and one of the finest quarters of the town is Union Square, which contains about 9 ac., tastefully laid out and shaded with fine trees, forming a beautiful promenade. The most important public edifices are the Statehouse, finely situated in the centre of Capitol Square, containing a model brought by Mr. Jefferson from James, in France, adorned with a portico of lofty Ionic columns which adorned for its shafts and beautiful proportions and containing in an open hall in its centre, a marble statue of Washington by a French artist; the City-hall contiguous to the Statehouse, an elegant and costly edifice of Grecian architecture, with a Doric portico at each end, and about 20 churches, several of them large and elegant, the Penitentiary an immense building forming the sides of a hollow square, 300 ft. by 110 ft.; the State armory another large edifice 840 ft. long by 990 ft. with the Governor's house, the county courthouse, the medical department of Hampden-Sydney College, occupying a handsome building in the Egyptian style and the college of Richmond and St. Vincent the last R. Catholic the Lancasterian school for the education of the poor the female orphan asylum supported partly by the corporation and partly by private munificence the museum, theatre, almshouse, county and city jails, and the water-works, which by two forcing-pumps worked by water-power, raise a supply for the city at the rate of 800 000 gal. daily. Among literary institutions, the Virginia historical and philosophical society is deserving of notice.

The manufactures of Richmond, furnished with an almost unlimited supply of water-power by the falls of the James, are extensive and include a large cotton-factory paper saw and numerous flour mills, blast-furnaces, foundries, and other iron works. Tobacco also is manufactured on a very large scale. The trade is important, and consists chiefly in the export of wheat, flour and tobacco. The winding nature of the James and its distance of 150 m. from the ocean somewhat restricts the means of water communication, more especially as the tide at the wharfs of the town rises only 4 ft. and vessels drawing more than 10 ft. cannot approach them. This depth, however, is sufficient for steamers of which several lines ply regularly to Petersburg, New York, Norfolk, and Baltimore. Richmond was founded in 1752 and supplanted Williamsburg as the seat of government in 1780. Pop. (1850) 27,443.

RICHMOND a vill, U. States, America, Indiana, on the E. fork of the Whitewater and at the junction of the Indiana Central and the Richmond and Newmarket railways, which here connect with several lines from Ohio, 69 m. E. Indianapolis. It is a flourishing place, with a large number of mills and factories, two weekly newspapers and an extensive trade in agricultural produce. Pop. about 3000.

RICHMOND a vill, Canada West, beautifully situated on the Goodwood 73 m. N.E. Kingston. It is a thriving place with Episcopal Presbyterian, Methodist, and R. Catholic churches a grammar-school a distillery two tanneries, and saw filling and flour mills. Pop. (1853) 1126.

RICHMOND HILL, a vill Canada West, pleasantly situated, 16 m. N. Toronto. It is a long and straggling but tolerably well-built place, with a Presbyterian and a Methodist church a tannery and saw and flour mills driven by steam.

RICHTENBURG a town, Prussia, gov. and 12 m. S.W. Stralsund on the N.E. extremity of a small lake of same name. It has a law court, and a trade in horses and cattle. Pop. 1879.

RICHTENSWELL, a vill and par. Switzerland, can. and 13 m. S.E. Zurich, on the frontiers of Schwyz, and on a bay S. shore, Lake Zurich. It has a very large cotton-factory, and near it is the old castle of Widenswell one of the finest and best-preserved castle ruins of Switzerland. Zimmerman, the author of the well-known work on *Alpine* resided here for some time, and highly praised its beauty. Pop. 2642.

RICKINGHALL, two par. Eng. Suffolk —1. (St. James), 1610 m. Pop. 450—2. (Superior), 1857 m. P. 754.

RICKLING, par. Eng. Essex; 1831 m. P. 509.

RICKMANSWORTH, or **RICKMANSWORTH**, a market town and par. England, co. Hertford.—The town, 9 m. S. of the Athens is agreeably situated in a valley, near the con-

Source of the Gola and Gola, with the Chas, and on the Grand Junction canal. It is irregularly built, has a spacious and handsome church, recently built chapel for Baptists and Wesleyans, national and British schools, some manufactures of screw-plugs and horse-hair; and near it an extensive brewery, and flour, cotton, silk and paper mills. Area of par, 4937 ac. Pop. 4861.

RIELA [anc. *Nerabrigo*] a tn. Spain, Aragon, prov and 11 m. W S.W. Saragossa, near the Jalon, with a church, courthouses, prison, and school flour-mills, distilleries and a trade in fruit. The celebrated Arabian writer Abdalla, commonly called Alhribil was born here. Pop. 1395.

RIECCO-RINO, or *Ricovanzovica* a river Turkey in Europe, which runs in the mountain range between Montenegro and Dalmatia. flows E past Cattigue, and after a course of nearly 60 m. falls into the Lake of Sentur, near Toblahuk.

RIEGLER, a tn. Spain, prov and 27 m. N.W. Murcia. With a church, courthouses, prison, school, and manufactures of linen but more especially of articles in exports. Pop. 1000.

RIEDERBERG, a vil. Holland, prov S. Holland, 7 m. S.E. Rotterdam. It is a scattered place, with a church. Inhabitations chiefly engaged in flax culture. Pop. 725.

RIDDINGS, a tn. and township, England, co. Derby, 3 m. S. Alfreton, on the Cromford canal. It has a handsome church, with a tower and spire; Baptist, Independent, and Wesleyan chapels, handsome school buildings for boys, girls, and infant schools, extensive collieries, blast-furnaces, and other important iron-works, in some of which large quantities of ordnance stores are manufactured. Pop. 4,400.

RIDDLERSWORTH, par Eng Norfolk, 1157 ac. P 141. **RIDEAU** a river and canal, Canada West, connecting Kingston on Lake Ontario with the Ottawa, immediately below Chaudiere Falls. It is 130 m. long, and in some places very crooked. The traffic on it is great.

RIDGE par Eng Ilrta 3907 ac. P 366.

RIDWAYE three par. Eng Stafford —1 (*Hemsted*) 2394 ac. Pop. 411 —2 (*Masegar*), 2475 ac. Pop. 555 —3, (*New*) 816 ac. Pop. 90.

RIED —1 A market tn., Upper Austria, circle Inn on the Oberach and Ikenbach 37 in W S.W. Linz. It is the seat of a rural and criminal court, contains a castle and a church, and has manufactures of linen and woollen cloth. The French defeated the Austrians here in 1805. Pop. 2600 —2, a vil. Tyrol, circle Innt, with a church and a Capuchin monastery. Its inhabitants distinguished themselves during the Tyrolean war in 1799. Pop. 720.

RIEDLINGEN, a tn. Württemberg, circle Danube, on a height above the Danube 29 m. S.W. Ulm, with two churches, several chapels, and a trade in corn. Pop. 1770.

RIEGEL a market tn. Baden, circle Upper Rhine, ball Koenigsau on the Elbe with a church. Pop. 1841.

RIEGERSBURG a small market tn. Austria, Styria, circle and 24 m. E.S.E. Grätz, containing a remarkable feudal fortress of same name, which crowns a mass of volcanic rocks, 400 ft. above the level of the March and is most conspicuous object far and near, said to bear a wonderful resemblance to Edinburgh castle, but to be rather more elevated. It is partly cut out of the living rock, and partly built of huge blocks linked with iron but notwithstanding its apparent durability is rapidly yielding to decay.

RIEGERSHLAG a vil. Bohemia, circle and about 34 m. S.E. Tabor with a church and school, oil, and other mills, and a linen bleachfield. Pop. 2056.

RIEGOLD a vil. Prussia, circle and 36 m. S.W. Leun, on the side of a hill. It contains a church, and primary school, and has a trade in corn, flax, and cattle. Pop. 1690.

RIESEN a tn. and par Switzerland, cant. Basel-stadt and 3 m. N.E. the town of Riehen, the entrance of the Wissem thal, in a fine fertile district. It has a handsome church, and a commodious school-house. A great many of the inhabitants live by gardening. Riesen suffered much both during the Thirty Years' war and during the European struggle in 1812-13. Pop. 1658.

RIEKA, a tn. European Turkey, Montenegro, cap. dep. of same name, on a small stream which falls into the N.W. extremity of Lake Scutari, 11 m. S.E. Cattaro. It is surrounded by hills, occupying a very picturesque but unhealthy position, is better built than most of the villages of Montenegro, having houses of stone, roofed with tiles, and appears to be in a very flourishing state. Many of its inhabitants are refugees from Podgorica in Albania.

RIELLO a vil. Spain, prov and 30 m. W S.W. Leon, between two small streams, with a church, courthouses, prison, and primary school and a trade in cattle. Pop. 1314.

RIERA a vil. Spain, Catalonia prov and 9 m. N.E. Terragona, in a plain between the Eays and La Mos with a parish church a primary school, and a trade in wine, oil, and hemp. Pop. 1240.

RIESA, a tn. Saxony circle and 25 m. N.W. Dresden, on the Leipzig and Dresden railway and at the confluence of the Jekna with the Elbe. It contains a castle, and has a dock yard, and some shipping. Pop. 2467.

RIESENBURG or *Pradutza*, a tn. Prussia, gov and 10 m. E. Marienwerder, on the Liebe. It is walled, has a 1. restaurant church and manufactures of cloth. Pop. 8432.

RIESENBERG (*Great Mountains*), a mountain chain, Germany, sometimes included along with others under the general name of Sudetes but more properly confined to that chain which commencing at the Neuse of Glaz, where the Sudetes properly terminate, stretches in a somewhat curvilinear but N.W. direction to the Neuse of Lusatia and thence W to the right bank of the Elbe, which separates it from the Erzgebirge. Its whole length, as thus defined, is about 120 m. its breadth nearly 35 m. Different names are applied to different parts of the chain as those of Habichtswald and Haunberg to its S.E. end, and that of Schickelsberg to its W. portion. The culminating point of the chain is the Riesenkuppe or Schickelskuppe, on the borders of Bohemia and Prussian Silesia, where the Elbe has its source but, though the loftiest summit which Germany possesses N. of the Danube, its height does not exceed 6000 ft. Other remarkable heights are the Drun or Borenberg 5156 ft. the Grand Kahl, exactly the same height as the Borenberg, and the Grand and Little Stummbach (Storm cap) respectively 4950 ft. and 4920 ft. The greater part of the chain has a very wild and desolate appearance, but its W. portion forms part of the beautiful and romantic land to which the name of Saxony Switzerland has been given. The mountains are for the most part composed of granite and schist. The lower parts of the chain are well wooded with oak and beech but at higher elevations remains trees only are found. Still higher, the trees degenerate into stunted shrubs and the Iceland moss is found growing. In some localities are extensive tracts of heathy peat swamps and shallow lakes, generally enveloped in mist. Here numerous rivers take their rise. The Elbe, the most important, receives all the drainage of the S. slope of the chain and also of a small part of the N. after it has forced a passage for itself across the mountains, but with this exception and that of another small portion received by the Sprö, the whole drainage of the N. slope is carried to the Oder chiefly by the Neuse of Glaz, the Elbe, with its tributaries Queuse and Ols, and the Neuse of Lusatia. The mine rails of the Riesengebirge, though much less rich than those of the Erzgebirge are still of considerable importance.

RIESEL a tn. Silesia, prov and 15 m. S. Lattendorf at the foot of a mountain of same name, from which sulphur is obtained.

RIETBERG or *Rietrasau* a tn. Prussia, prov Westphalia, gov and 40 m. S.W. Minden, 1 bank Rhine. It is walled has two gates, a church, progymnasium, Franciscan monastery, poorhouse and manufactures of linen and tobacco, a bleachfield, and distillery. Pop. 2052.

RIETI a tn. Italy, cap. del. of same name, in a beautiful district on the Velino 42 m. N.N.E. Rome. It is the see of a bishop, has a court of law, and several public offices manufactures of woollen stuffs, and mineral springs. Water much cultivated in the vicinity. Pop. 8903.

RIELUX [anc. *Rin. Zietosagen*] a tn. France dep. Haute-Garonne, 27 m. S. Toulouse, on the Aude. It is well built; and has a handsome church with a bold lofty spire. P. 1881.

RIEZ [anc. *Agelliparion*], a tn. France, dep. Basses-Alpes, 20 m. S.S.W. Digne. It was formerly the see of a bishop,

and has numerous ancient remains, but otherwise no object deserving of particular notice. It has manufactures of cordage, oil and vinegar, some trade in these articles, in wine, and dried fruit. Pop. 3517.

RIGA, a to Ruman, cap. gov., which sometimes bears the same name, but more frequently that of *Lithuania* or *Lavonia*, on both sides of the S. Dvina, about 5 m. above its mouth, in the Gulf of Riga. Sit. S. W. St. Petersburg, lat. 56 55' N., lon. 24° 0' E. (N.). It is situated on a sandy flat, surrounded by hills, on which numerous fine villas make a cheerful and showy appearance, and consists of the town proper and suburbs, still more extensive than the town itself. The communication across the river is kept up by a bridge of boats about 500 yards long. Riga is a place of considerable strength, being both surrounded by walls and bastions, and defended by a citadel. The older part of the town, still confined within earthen walls, consists of narrow winding streets, huddled together without any regularity. The more modern parts of the town are much better built, and contain at least three good squares. Along the river on both sides are spacious quays, which afford excellent promenade, and the esplanade and gardens, both within and near the town, are well laid out. The public buildings are very numerous, and include no fewer than 45 churches but not many of them are deserving of particular notice. Among others are the cathedral, not of much architectural merit, but containing some interesting monuments. St. Peter's church, a beautiful building with an altar and chancel of marble, an Oriental dome and a spire which is said to be the highest in the empire; the castle, the oldest edifice in the town originally the residence of the masters of the Teutonic order and now occupied by the governor-general, the townhouse, with the exchange adjoining it, the merchant house, the arsenal, the library not of great extent, but rich in natural history, the museum, the gymnasium, and several other superior schools; the theatre, and the military and other hospitals. The manufactures are not of great importance, and consist chiefly of starch, soap, playing-cards, artificial flowers, bric-a-brac and reduced sugar. The trade is very extensive, and gives Riga the first place after the capitals of St. Petersburg and Moscow. The principal exports are flax, hemp, tumbler tallow, grain, asbestos, &c., the imports, wine, woollens, colonial produce, silk, &c. The following table of the vessels that entered the port of Riga in 1847-1849 and 1854 shows at the same time the countries chiefly interested in its trade.

NUMBER AND TONNAGE OF VESSELS OF VARIOUS NATIONS, ENTERED AT THE PORT OF RIGA FROM 1847 TO 1854

Riga is the residence of a governor and the seat of a superior court of appeal and of several other courts and public offices. Pop. (1849), 87,954; (1853), 77,428.

RILIA or *Lavonia*, a golf, Ruman, which washes the coasts of *Lithuania*, *Lavonia*, and *Estonia*, and extends in the W. to a comparatively narrow strait, communicating with the Baltic, the island of Osel almost closing it on the N. W. Its greatest length, N. to S., is about 120 m.; and its average breadth, 70 m. The chief river which it receives is the S. Dvina, near the mouth of which is the port of Riga. The navigation, owing to several small islands and sandbanks, is considered dangerous.

RIGLI, or *Rex*, an isolated mountain of brecciated rock, Switzerland, com. Schwytz, between Lakes Zug and Lucerne, 5905 ft. high. Its summit affords one of the finest views in Switzerland, and is annually visited by numerous travellers, for whose accommodation a wooden hotel has been erected at a height of 5875 ft. Lower down is a little church, much frequented by pilgrims.

RIGLIANO, a vil and par. Tuscany, 8 m. E. Pisa, near 1 bank Arno with a parish church, and extensive manufactures of seras coats.

RIGNANO, a vil and com. Tuscany, 15 m. E.S.E. Florence, L. bank Arno, here crossed by a bridge. It has a church, a school, and several mills. Pop. 4584.

RIGNANO, a to Naples, prov. Capitanata, 11 m. E. San Severo, on an eminence, near L. bank Candellaro. P. 3000.

RIGOLATO, a m. kingd. of Italy, gov. Venice, prov. Brioni cap. dist. on an affluent of the Tagliamento, 38 m. N. W. Udine with two churches, an oratory, and mill. Pop. 687.

RIGBY, par. Eng. Lancashire, 1040 m. Pop. 120.

RIGTICA or *Ilari Luyeva*, a vil Hungary, Either Danube, co. Bacs 48 m. N. W. Kara with a church. It stands in a well-cultivated district, in which excellent wheat is raised. Pop. 813.

RIHURSI, a to Hindustan, Punjab, on the most S. of the Himalaya ranges, near L. bank Chenab, 90 m. N. N. E. Lahore. The town is insignificant; but the fort, situated on a conical rocky height to the S. of it, is one of the best constructed and strongest in the country. It consists of a square, with very lofty walls, rising immediately from the precipitous steep sides of the hill and towers at each angle, which, with most of the interior buildings, are bomb proof. Pop. m. about 1000.

RILJ, river. See Ruma.

RILJ (Dn), a vil. Holland, prov. N. Holland, 18 m. N. by W. Amsterdam, with four churches and two schools, a townhall and an orphan hospital. Inhabitants chiefly engaged in trade, which is facilitated by the two harbours on the canal which passes Rijn. There are also manufactures of lace, leather ropes, yarn, cloth, candles, book-binding yards, and several mills. Pop. 1987.

RILJSE, a to Holland, prov. Overijssel, 16 m. N. N. E. Deventer. It has a Protestant and R. Catholic church and a school, and a townhall, situated in a large open market-place. Agriculture is the chief occupation but there are also manufactures of cotton and linen fabrics, yarn, tobacco, potteryware, tiles, and bricks. Pop. 1299.

RILSWIJK, or *Kynewick*, a vil. Holland, prov. S. Holland, 2 m. S. E. the Hague. It consists chiefly of a closely built street, in a finely planted road, and is much resorted to by pleasure-seekers from the Hague. It has two churches and a school. In its castle, destroyed in 1783, a treaty of peace was concluded September 10 1687 between Spain, France, Britain, Germany and the Netherlands. Pop. (agricultural), 2155.

RILLAER, a vil. and com. Belgium, prov. Brabant, on the Meuse, 25 m. N. E. Brussels. It has a church. Pop. (agricultural), 1605.

RILLE, a river, France, issues from a lake in E. of dep. Orne, enters dep. Eure, flows circuitously N. N. W. past Beaumont, Colombier, and Pont Audemer, and about 10 m. below the last town, joins the estuary of the Seine, on its L. bank, total course, nearly 90 m. Its chief affluent is the *Charante*. It is navigable to Colombier for vessels of 40 tons to 50 tons. In the forest of Beaumont, the greater part of its water is lost in a chasm, and afterwards reappears.

RILLINGTON, par. Eng. York (E. Riding), 4648 m. Pop. 1228.

RILSK, a to Ruma. See Ruma.

RIMA-SZOMBATH, or *Gros-Szombath*, a market to Hungary, on Günsz 72 m. N. E. Pesth, on a plain, L. bank Rima, here crossed by a handsome bridge. It is well built; contains a Protestant gymnasium; has manufactures of leather, tobacco, and tannery, and carries on a considerable trade in

corn, wine, tobacco, honey, wax, and cattle. Beryls are found in the neighbourhood. Pop. 8057

RIMAC, a river Peru rises in the Andes, flows W for about 50 m., passes Lima, and falls into the Pacific at Callao.

RIMBACH, a market tn. Hesse-Darmstadt, prov. Starkenburg, circle Hungenhausen, near Lindenfels, with a parish church. Pop. 1226

RIMGAB, a vil. Bavaria, Lower Franconia, near Würzburg, with a church, a castle and a mill. Pop. 1620

RTIMINI, or **RUMINO** [anc. *Arpinum*] a tn. Italy, dioc. and 24 m. E.S.E. Forl. in a fertile plain between the Marecchia and the Osa. It is surrounded with walls, but has a decayed, melancholy look. Many of its houses are handsome, and it has several palaces built of marble. The principal objects of attraction are the cathedral, or church of San Francesco, originally built in the 14th, but remodelled in the 15th century after the designs of Leon Battista Alberti, the great restorer of Roman architecture, and regarded as his master-piece, the church of San Giuliano with a superb altar-piece, by Paul Veronese, the church of San Girolamo, with a fine painting by Guercino, the triumphal arch of Augustus, of simple and massive architecture, with two Corinthian columns on each side, and, above all, the bridge of Augustus over the Marecchia, built entirely of white marble, consisting of five arches, each with a span of 27 ft. and though built 18 centuries ago, still in perfect preservation. The manufactures consist of silk, glass, and earthenware. The trade was at one time of considerable importance having been greatly facilitated by an excellent harbour which has now become so completely sanded up as only to admit the smallest vessels. The present trade is confined to corn, silk, salt, and fish. Pop. 17,000

RIMITERA, an isl. S. Pacific Ocean N. the Society Islands lat. 22° 40' S. lon. 122° 20' W. It rises near its centre to the height of 800 ft., has no proper harbour, but is inhabited by a mild and inoffensive race, from whom provisions can be procured at a cheap rate.

RIMON or **RIMONAN** several places Palestine, particularly a vil. occupying a high conical rock of chalk 15 m. W Jerusalem. It is repeatedly mentioned in Scripture, and appears to have been an important stronghold of the Benjamites. See Judges xx 40, 47 and xl 15

RIMOGG, a vil. Hungary illthor Danube, on Neograd near Somoany in a well wooded district with a R. (atholic church, and a trade in timber. Pop. 1528

RIMPTON, par Eng. Somerset, par Eng. 998 ac. Pop. 998

RIOCOBON-RO a tn. Spain Old Castile, prov. and 17 m. S Logroño, in a beautiful plain, bank Ebro. It is regularly built has a church, courthouse, school, and hospital, and a trade in oil and hemp. Pop. 1087

RINDI, a river Hindoostan, rises in prov. Agra 45 m. N.E. of the town of that name flows S.E. past Kanah and after a course of about 100 m. joins bank Jumna, 12 m. W Futehpore

RINECK, or **REINICK**, a tn. Bavaria, Lower Franconia, in a valley, a bank Rhine, here crossed by a bridge, on the frontiers of Hesse-Cassel, to which it partly belongs. It was formerly the capital of an extensive territory of same name, and has a church, a castle, and several mills. Pop. 1542

RINGAGONAGH, par Ire. Waterford, 8246 ac. Pop. 1921

RINGAROGA, or **DUNROGAT**, a small isl. Ireland co. Cork, 4 m. S W Skibbereen, in Bellinore Harbour, 2 m. long by 1 m. broad, and connected to the mainland by an excellent causeway and bridge.

RINGENBACH, par Ire. Cork 5478 ac. Pop. 3626

RINGELADORF, a vil. Lower Austria, near Rabensberg, at the confluence of the Zaya and March, not far from the frontier of Hungary with a church. Pop. 1400

RINGELSHAIN a vil. Bohemia circle Bunzlau on a small stream, 5 m. from Gabel with an ancient church. Pop. 1267

RINGGENBERG, a vil. and par Switzerland, can. and 27 m. S.E. Bern on the S.W. shore of Lake Rigi. The church is picturesquely situated and at one extremity of the village are the remains of the old castle of the Lords of Rigi, the garrison deserted in 1362, in a feud with the inhabitants of the village. Pop. 1184

RINGLAND, par Eng. Norfolk 1210 ac. Pop. 381

RINGMER, a vil. and par England co. Sussex, 2 m. S N.E. Lewes. It has an ancient church with several curious monuments, and a modern wooden steeple an independent chapel and artillery barracks, which is now partly occupied as a lunatic asylum. Area of par, 5836 ac. Pop. 1374

RINGMORE, par Eng. Devon 1128 ac. Pop. 837

RINGROBE, par Ire. Cork 9240 ac. Pop. 8281

RINGRASH, See *ASHRINGER*

RINGSFIELD, par Eng. Suffolk, 1666 ac. Pop. 287

RINGSBALL, par Eng. Suffolk 2116 ac. Pop. 371

RINGSHHEIM a vil. Baden circle Middle Rhine, bail. Eitenham with a church. Pop. 1243

RINGSTEAD two par. England —1, Northampton; 1981 ac. Pop. 727 —2, (Great St. Andrew and St. Peter) Norfolk, 2814 ac. Pop. 612

RINGTED [Latin, *Rengtedum*] a tn. Denmark, bail. Sorø, almost in the centre of isl. Zealand, 34 m. S.W. Copenhagen. It is a very old place, and was of some importance in the 12th and 13th centuries. It contains an old church in the form of a cross, in which many members of the royal family are buried. It has often suffered much from fire. On the last occasion, 1806 the half of the town and part of the old church, were consumed. Pop. 1200

RINGSWOLD, par Eng. Kent, 1710 ac. Pop. 789

RINGWOOD a market tn. and par. England, co. Hants, on the Avon, which here divides into three branches, each crossed by a stone bridge, and afterwards uniting them, forms a large expanse, with an island in its centre, 30 m. W S.W. Southampton. It is an ancient, but well-built place, and has a spacious ancient church an independent and a Unitarian chapel, a free grammar-school; manufactures of woollen cloth and hosiery, both rather on the decline, a large brewery and some trade, facilitated by the Avon, which is here navigable. Area of par, 3055 ac. Pop. 3328

RINKJÖRING a tn. Denmark, prov. N. Jutland cap. bail. N.E. shore of fiord of same name, 51 m. W Viborg. It has some manufactures of tobacco, woollens and soap. There is no proper harbour, but the trade in agricultural produce is considerable. There is here a ferry over the W. end to the island of Holmøland, but the channel is so shallow that the journey is often made on foot or on horseback. Pop. 1200

RINKWICK which is the largest in N. Jutland area, 1300 gen. ac. m., occupies almost the whole of the central part of the W. coast of the province but generally consisting of bleak unfertile tracts in by no means populated according to the extent. It contains only three small towns, and 119 parishes. Pop. 57,600

RINTPLN a tn. Hesse-Cassel, Niederhessen, 11 m. S.E. Minden 1 bank Weser here crossed by a bridge of boats. It is partly surrounded by walls and entered by three gates contains two churches a palace gymnasium, and hospital, is the seat of a superior court, and several other courts and offices, and has a trade in linen and corn. Pop. 8161

RIO with affluents several places, 1 original particularly —1, (de-Montes) A tn. and par. prov. Baixa-Alta, about 10 m. from Viseu Pop. 850 —2, (Tinto) A tn. and par. prov. Douro 4 m. from Oporto Pop. 3800

RIO (Aizto-e-Hasso) a com. Tucumay isl. Elba, about 5 m. N. Porto-Luzerna. It consists chiefly of two vills. Rio-Alto, situated on a height and Rio-Basso, or Marina Rio, situated on the shore below, with a handsome church and has extensive mines of oligitic iron. Pop. 3502

RIO-BORRHO, a vil. and par. Brazil prov. and 84 m. V.E. Rio-de-Janeiro. It is a place of respectable appearance especially when viewed from a distance contains a parish church, with the other houses clustering round it as a centre, and has a trade especially in mandarin, sugar, and coffee. Pop. dist., 8000

RIO-BRANCO, a river Brazilian Guiana. See *BRANCO*.

RIO-BRAVO-DEI-NORTE, a large river, N. America. See *GRANDIS* (Rio)

RIO-DE-CONTAS, a tn. Brazil, prov. and 200 m. W S.W. Bahia, on the Brancão or Contas Pequenas. The houses, generally of earth, with a framework of wood, are irregularly built but, being plastered over, and white-washed, have a showy appearance. It is the seat of a court of law, contains two churches, a townhouse, and prison, and has a considerable trade in cotton, of excellent quality, cattle, and manna.

town, occupies a flat tongue of land of an irregularly quadrangular shape, having its greatest length N.W. to S.E. The hills already mentioned are on the N. side, and approach so close to the sea as to leave room for only a single street, towards the S. and S.E. the lofty and finely-wooded promontories of Mount Corcovado press close upon the houses, the space between is generally level, and covered with houses of substantial and often elegant appearance, regularly built, for the most part of granite, with an upper story of wood covered with tiles, and having long and generally narrow streets, which intersect each other at right angles, and are well paved with granite in the centre, and a raised side-path for foot-passengers but have the serious disadvantage of being very imperfectly cleaned. On the W. side of this part of the town, is a large square called Campo da Aclimação, and immediately beyond it, and approached by a bridge built over an arm of the sea, is the new town, almost the whole of which has risen into existence since the arrival of the court. It has thus all

de Misericórdia, founded in 1593, and richly endowed, the Hospital of Invalids, and the Hospital of Leprosy and Syphilis.

The educational and literary institutions include the Imperial college, in which Latin, English, French, mathematics, philosophy, and theology are taught the college of São-José, in which similar instruction is given; a school of medicine and surgery, a naval and military academy, an academy of belle-lettres, and a library of 80 000 volumes, and a botanical garden. The principal criminal establishment is the house of correction, but there are also two large prisons within the city, and numerous smaller prisons, both in the town and in the different parts. The prison of Rio-de-Janeiro is one of the finest in the world. It is perfectly sheltered is deep enough for vessels of the largest size, and so spacious, that it may be said to have no limits. All the navies in the world might ride in it without jostling each other. The accommodation on shore is, however defective. The want of good quays makes the landing-places very indifferent, and there is

nothing which deserves the name of docks. Repeated attempts have been made to establish manufactures on a large scale, and Imperial patronage has been lavishly bestowed on them, but as yet they barely maintain a sickly existence. The only articles deserving of notice are leather and glass, which owe any prosperity which they possess to foreign skill and industry. But the want of manufactures is compensated by a most extensive trade in all the produce of the country, and particularly in hides, sugar and coffee. The exports of the first two, though of considerable extent, have rather declined in recent years, but that of the latter has long continued to advance with rapid strides, and the amount annually shipped rose from 478,950 bags in 1832

VIEW OF RIO DE JANEIRO, FROM THE SEA. — From Voth's, Voyage autour du Monde.

the advantages of modern construction, and is distinguished by its general elegance, and a number of fine squares. The principal public buildings are the senate-house (Palácio do Senado Imperial), a large modern structure, on the N. side of Campo da Aclimação (not possessed of much architectural merit); the town-house (Palácio Municipal) a simple and unadorned edifice, yet not without an air of majesty, the imposing church of Nossa Senhora da Gloria, one of the most recent and conspicuous churches of the city, finely situated on a round hill of the same name which projects into the sea, the church of São-Francisco, with a hospice attached, and surmounted by two round towers, the church of the Cross, richly decorated both within and without the church of Candelária, one of the largest in the city adorned with a majestic façade and surmounted by two towers the loftiest in Brazil; the convent of São-Bento, a massive structure, with windows, heavily barred with iron gratings, which give it the appearance of a prison, but is richly decorated within, that nearly its whole interior is gilt; the convent of St. Anthony a gorgeous edifice, with two luminous chapels and a vast cloister, on a hill opposite to it, the monastery of St. Theresa the aqueduct, the finest architectural monument of which Rio-de-Janeiro can boast, consisting of a double series of 43 lofty and beautiful arches, stretching from Mount Corcovado, and conveying the water of its springs into the heart of the city, to supply its numerous and elegant fountains, the theatre, a vast structure, deficient in regularity and symmetry, the imperial palace, a large stately building, long used as a residence by the viceroys, and now, with exception of a suite of rooms in which a court is occasionally held, appropriated to public offices, the palace of the fine arts, a beautiful structure, concealed and almost buried among old ramous houses, the senate-house, the exchange, prominently situated in the Rio de Janeiro, the widest and finest of the streets, the Post-office, courthouses, the mint, opera-house, naval arsenal, and museum. Among benevolent establishments are the Casa

The first settlement in the neighbourhood of Rio-de-Janeiro was formed by the French in 1555, and consisted chiefly of Protestant refugees. Their leader Villegaignon, having proved a rascally to his faith, had almost retired the settlement by internal dissension, when a Portuguese force appeared

and completed its destruction in 1567. The conquerors laid the foundation of a new city which they called St. Sebastian, and which has continued to advance, till it has grown up into the present capital of Rio-de-Janeiro. Bahia was formerly the capital of the country but on the arrival of Don John in 1608 he transferred the seat of government to this city. Pop. 170,000 of whom 80,000 are Brazilians by birth or adoption; 25,000 foreigners, and 85,000 slaves.

RIO-DE-LA HACHA New Granada. See HACHA

RIO-DUT-KEE a large bay coast of Guinea, Right of Africa, E the Old Calabar River W the Cameroons River and 50 m N Fernando Po. It receives several creeks and on its shores are several populous villages.

RIO-DULCE, a river Central America. See DULCE

RIO-GRANDE, JERA or GERA, a large river W Africa, rises in Fouta Djallon about lat. 11° 20' N lon 11° W flows W and enters the Atlantic by a wide estuary between the Nupes and the Cameroons. See JERA

RIO-GRANDE-DE-LA PLAZA, a river, Bolivia. See GUAYBE

RIO-GRANDE-DO-TORE a maritime prov. in the N E of Brazil lat. 4° 37' to 7° 30' S. lon 35° to 38° 40' W, bounded N and E by the Atlantic, N prov. Pernambuco, and W Ceará, area, 28,860 sq m. The surface is mountainous in the S and S W where it is covered by several mountain ranges, of which those of the Carina Novos and Tibão are the most conspicuous. These serras gradually descend towards the N and E, and finally sink down into extensive sandy flats, particularly on approaching the coast. The principal rivers, which have all either a N or an E. direction, are the Aguanzã, Apodi, Camero-Mirim, Caminhã, Guapaba, Piranhas the longest of all, Potengi or Grande, Rio de, and Tarobara. Having their sources within the province, or on its frontiers, and finishing their courses within it they are of comparatively small extent and though well fitted to facilitate transport from the interior by canoes and barges, are not of much navigable importance. The same remark applies to the coast, the greater part of which is lined by dangerous shoals. It presents numerous small harbours, at which the inferior class of coasters can take in cargoes, but throughout its whole stretch of nearly 300 m. there is not one harbour capable of receiving large vessels. The proximity to the equator makes the climate intensely hot it is said however not to be unhealthy the air being remarkably pure. The soil is generally good, but not remarkable for its fertility. For a long time the sugar-cane was the principal cultivated crop, but considerable tracts, formerly devoted to it, are now occupied by cotton, which may be regarded as the staple of the province. The other leading crops are manioc, millet, and haricot. Many of the plains are covered with pasture which is grazed by large herds of horses and cattle. The minerals include gold, silver and iron but the quantity is so small that there are scarcely any mines in active operation with exception of those of salt, the produce of which is of some importance. Amethysts and rock-crystals abound, and quarries of limestone, sand stone, and granite might be opened in every district. The forests are not very extensive, but are rich in resins, gums and balsams, and furnish excellent dye-wood and various kinds of timber. Along the coast, where the soil is sandy the different species of palm predominate. The principal exports are salt, cotton, sugar, hides, dressed and undressed, salt fish, and drugs. For administrative purposes, this province is divided into two comarcas—Natal and Açu. Its provincial assembly, composed of 20 members, holds its sittings at Natal. Besides Natal it includes the towns of Acori Apodi, Estremoz, Gomima, Porto Alegre, Santa Anna-de-Mato, São Gonçalo, São José-de-Mipid, São José-de-Angicos, Totoró, &c. Its name is derived from the river Potengi, which the first explorers improperly named Rio-Grande. Pop. 110,000.

RIO-GRANDE-DO-SUL, or **DO-RIO-GRANDE**, a N. Brazil, prov. Rio-Grande-do-Rio-Grande, agreeably situated on a peninsula between the Bay of Mangueiras and the S extremity of the Lake of Foz de Iguaçu lat. 25° 2' S. lon. 52° 8' W (A). Its houses are almost all of earth, and its streets are unpaved. It contains a parish and two other churches, a two-house with prison, a Latin and two primary schools, and is the seat of a court whose jurisdiction extends from the sea W to Uruguay, and from Lake Petes to Castilhos-Grande. Its port, which is well sheltered, and admits vessels drawing 15 ft., enables it to carry on a considerable trade in dried beef, tallow, wax, horns,

&c. and particularly hides, of which the quantities imported into Great Britain, in 1845-51, were as follows:—

IMPORTS INTO GREAT BRITAIN OF RIO-GRANDE SALTED HIDE.

| Imported into | 1845. | 1846. | 1847. | 1848. |
|---------------|---------|---------|---------|---------|
| Liverpool. | 63,400 | 41,060 | 85,200 | |
| London | 119,500 | 68,980 | 69,200 | |
| Outputs | 114 06 | 66,000 | 125,600 | |
| Total. | 229,406 | 204,940 | 236,500 | 415,600 |

One of the greatest obstacles to the prosperity of the town is the want of good water which is only obtained by digging very deep wells, or bringing it from a distance of 4 m. Pop. 25,000.

RIO-GRANDE several rivers, S America. See RIOGRANDE

RIO-PARDO, a N. Brazil, prov. Rio-Pedro-do-Rio-Grande, a bank river of same name, near its confluence with the Jacuhy, 80 m. W Porto Alegre. It contains several churches, a Latin and two primary schools, at the seat of a court of justice, and has a harbour fit only to admit coasters, which generally load with meat, or Paraguay tea, dried beef, and other kinds of produce. The district is fertile, and the soil appears to be particularly adapted for the growth of fax. It has suffered much by oval dimensions. Pop. (1847) 10,445.

RIO-PRATO, two places Brazil.—1 A N. prov. and 380 m. W N W Bahia, at the confluence of the Preto with the Grande, an affluent of the São-Francisco. It has a church and a school.—2, A vil. and par. prov. Minas-Geraes, a bank Prov. one of the earliest settlers of the Araxá, 35 m. N E. Diamantina with a church. In addition to the ordinary produce, it raises a great quantity of cotton. Pop. 3,000.

RIO-RIOCO (MIRANDA DO) a N. Spain, Leon, prov. and 26 m. N W Valladolid, in a magnificent plain, beside the river of same name. It was formerly of much importance, having been a kind of emporium in the 14th century but its industry and commerce have greatly declined. It has several churches, and a suppressed Franciscan convent, converted now into an hospital; manufacturers of leather, serge, and linen, dye-works, and lime and brick kilns. The Spaniards, 50,000 strong, under Blake and Cuesta, were defeated here in 1808 by Bonaparte with 13,000 French and lost 6,000 killed and wounded, the loss of the French being under 600. Rio-Rio was miserably sacked by the conquerors. Pop. 6,777.

RIO-TIETO (LAS-MINAS-DO) a N. Spain, Andalusia, prov. and 36 m. N E Huelva, picturesque situated in a basin, surrounded by pine-clad hills. It consists of good modern houses, and of paved and well closed streets contains a parish and an auxiliary church, a primary school, and a mining directory, and has in its vicinity mines of iron, lead and copper which have been worked with success from a very early period, and extensive smelting establishments, and malleable iron-works. Pop. 937.

RIO-YANQUEO two places, Brazil.—1 A vil. and par., lat. and prov. Santa-Catharina, with a church. The inhabitants grow sugar-cane and fax. Pop. 1290.—2 A vil. and par., prov. Minas-Geraes, on the Barrero, near its junction with the Vermelho, 110 m. N E E. Serrá. It consists chiefly of a number of earthen houses encircling the church, grows tobacco and coffee and provisions for the supply of Diamantina. Pop. 4000.

RIOJAMAIRA (JEROVO), a N. Ecuador 80 m. N E Guayaquil, and 11 m. from the ruins of Old Riobamba, which was destroyed by an earthquake in 1797. Pop. 20,000, chiefly Indians.

RIOGRORDO, a vil. Spain, Andalusia, prov. and 4 m. N E Malaga with a townhouse, prison, school, church, and two hospitals. Pop. (agricultural) 2465.

RIOJA, an anc. dist. Spain, included in the modern provs. of Burie, Burgos, and Alava. It was divided into High and Low Rioja, the former extending from Belorado to Logroño, and the latter from Logroño to Alfoz and Carrión-del-Rio-Alamo; the chain of hills which separates the basins of the Ebro and Duero formed the boundary between the two. This district is about 70 m. to 80 m. in length, and 80 m. to 85 m. in breadth, and its soil is fertile, but most miserably cultivated. Pop. 25,000.

RIOJA, a vil. Spain, Andalusia, prov. and about 8 m. from Almería; with a church, court-house, prison, and pri-

very school, an oil and a flour mill. Guinea is found near it. Pop. 1049.

RIOJA (La) an island prov., and its cap. La Pleta lat. 28° to 21° S. lon. 68° 50' W. to the Chilian Andes, bounded, N by prov. Catamarca, E Cordoba, and S. San Juan. It is intersected N to S. by the parallel ranges of the Famatina Mountains, and the Sierra Yalisco. The Varadero and the Juchal are the principal rivers. The vine is cultivated in the N part of this province towards the W the inhabitants are employed in agriculture, and at a particular season, in hunting the vicuñas in the Andes; great quantities of cattle are reared on the rich pastures of the Llanos in the S., but the fairs of the province arise chiefly from the vases of silvers in the Famatina Mountains, which are said to be superior in richness to those of Potosí. Besides Rioja, the capital, the other principal towns are Chichilco, Guadalupe, and Colorado. Pop. about 30 000. — The capital, RIOJA, is situated at the foot of the Sierra de Yalisco lat. 29° S., lon. 67° 50' W. It was founded in 1691. Pop. about 2500.

RIOLOBOA, a vil. Spain, Extremadura, prov. and about 40 m. from Cáceres, on the Alagon with a church, primary school, an oil and a flour mill, and a trade in agricultural produce. Pop. 1065.

RIOLE, a tn. France, dep. Harault, 3 m. N.E. St. Pons in a valley, watered by the Janr. It is well built and has manufactures of woollen cloth. Pop. 2131.

RIOM [anc. *Ricomagus*] a tn. France, dep. Puy-de-Dôme, in a fertile plain near the Ambone 10 m. N. Clermont. It is encircled by well planted boulevards has spacious streets, and houses, which, though of a somewhat gloomy appearance, from the dark lava of which they are built, are generally good, and occasionally handsome. The only buildings deserving of particular notice are the courthouse, prefecture, several hospitals, and the remains of the old ducal castle, of which there is still a chapel in good preservation. The principal manufacture is linen, and there are several distilleries and tanneries. The trade is in corn, wine, hemp, fruit, and oil. Rio is the seat of a court of first resort and commerce, and possesses a communal college, and has four annual fairs. Pop. 3058.

RIOMAGGIORE, a vil. and com. Italy Piedmont, dep. Cuneo, prov. Lymagne, 5 m. W. Syrmio, on the Gulf of Genoa, in a ravine, on the sides of an impetuous torrent. It has an ancient Gothic church, a still more ancient sanctuary, the remains of an old castle, and a considerable trade in wine, which is largely grown in the vicinity. Pop. 2704.

RIOMFALVA, a market tn. Austria, Transylvania, about 10 m. from Medias, with a Protestant church and a trade in wine. Pop. 1142.

RIONERO, two tns. Naples — 1 A. tn. prov. Basso 9 m. N. N. W. Lucania, on a hill with a church and chapel. Pop. 1820. — 2 A. tn. prov. Basilicata, 6 m. S. Melfi, partly in a valley and partly on two hills with three churches, and a Capuchin convent. Its chief manufacture is woollen stuffs. Pop. 10,000.

RIOU, a small tn. France, off dep. Bouches-du-Rhône, 7 m. S. by W. Marseilles; lat. 48° 10' N., and lon. 5° 35' E. It is of some importance as standing in the fur way for that harbor in coming from the S. E.

RIQUW, Indian Archipelago. See Rano.

RIPA, several places, Naples — 1, (Bottom) A. tn. prov. Salerno, 9 m. S. E. W. Lucania, at the foot of a high hill with three churches. Pop. 2500. — 2, (Cassidy) A. tn. prov. Basilicata, 6 m. S. E. Melfi, on a height with four churches, a monastery, and a summary. St. Donatus was born here. Pop. 3000. — 3, (di Orlino) A. tn. prov. Abruzzo-Ulteriore E. Chieti, on a hill, r. bank Alento. It contains four churches and a monastery. Pop. 3700.

RIPALIMOSANI, a tn. Naples, prov. Salerno, 7 m. N. Campobasso, in a valley, with three churches, 12 chapels, and a convent. Pop. 5325.

RIPABELLA, or **RIPABELLA**, a vil. and com. Tuscany, 26 m. from Pisa, on the top of a hill above the Rialdo with a church, a school, the remains of an old castle, and a trade in corn. Pop. 1258.

RIPATEANSONE, a tn. Italy The Marches, 11 m. S. E. Fermo; the seat of a bishop. Pop. 2000.

RIFE, par. Eng. Sussex, 1120 ac. Pop. 333.

RIFEN, a tn. Denmark. See Rina.

RIPENYE, a vil. Hungary, Thirder Theiss, co. Maros, on the Nagys, 56 m. from Bistritz. It has a Greek church. Pop. 2728.

RIPLEY, two places, England — 1 A market tn. and par., co. York (W. Riding), 184 m. N. Leeds, and a station on the Leeds and Thirsk railway. It is neat and well built; has a spacious cruciform church, a Methodist chapel, and a free school. At Ripley Castle Oliver Cromwell passed the night succeeding the memorable battle of Marston Moor. Area of par., 6586 ac. Pop. 1286. — 2 A vil. and chapelry co. Derby, 4 m. S. by W. Alfreton. It is an improving place, lighted with gas; and has a neat modern chapel of ease, places of worship for Wesleyans and Unitarians, a national school, several features of sandstone and clay-lane, and extensive collieries. Many of the inhabitants are employed at the Buttery iron-works. Pop. 8071.

RIPOLL, a tn. Spain, Catalonia, prov. and 51 m. W. N. W. Girona, in a valley at the confluence of the Ter and Fraser. It contained a fine Benedictine church and monastery, which, as well as the town itself, were almost destroyed during the last civil war. It is now recovering gradually from its disasters, and so much of it as has been rebuilt is in a very improved form, and the whole when completed, will make Ripoll one of the handsomest towns in the province. It was once famous for its manufacture of fire-arms. Pop. 589.

RIPOLLCT, a vil. Spain, Catalonia, prov. and 8 m. from Barcelona, 1 bank river of same name. It has a church, a school, manufactures of cotton twist and copperware, several paper and flour mills, and a trade in the above articles of manufacture, and in agricultural produce. Pop. 1281.

RIPON a city, par., and mun. bor. par. England, co. York (W. Riding), 1 bank Ure, here crossed by a handsome stone bridge of 13 arches 22 m. N. W. York, on the Leeds and Thirsk Railway. It has four principal streets, but well kept streets, rising from all sides towards the spacious market-place, which is surrounded by good houses, with a handsome obelisk in the centre. On the S. side of the market-place stands the townhall, an elegant structure, comprising a handsome suite of assembly-rooms, with other accommodations. The cathedral is one of the finest churches in England. It is a large cruciform structure, with two square towers each 110 ft. high, length E. to W. 246 ft., length of transept, 192 ft. It contains many curious and interesting monuments. Trinity church is also a very handsome building, cruciform, and in the Gothic style of architecture. There are chapels for Wesleyan and Primitive Methodists, Independents, and E. Catholics a grammar two national and several other schools, a dispensary and literary institution. Inhabitants chiefly engaged in agriculture. Ripon sends two members to Parliament. Area of par. 55 786 ac. Pop. par. 15 108, bor. 6080. **RIPPINGALP**, par. Eng. Lincoln 2740 ac. P. 681. **RIPPLE**, par. Eng. Kent 1134 ac. Pop. 223. **RIPPL**, a vil. and par. England, co. Worcester, 4 m. N. by W. Tewkesbury with a handsome church a chapel of ease, several almshouses and limestone quarries. Area of par. 4140 ac. Pop. 1097.

RIPPOLDSEA, a vil. Baden, circle Middle Rhine, in the Schatzbachthal, 31 m. E. S. E. Strasbourg. It possesses chalybeate springs, with a complete bathing establishment, which is much frequented. Above 540 000 bottles of water are annually exported. Pop. 818.

RIPPODFN a vil. and chapelry, England co. York, on the road from Manchester to Roehdale, and on the Ryburne, here crossed by two stone bridges, 6 m. S. W. Halifax. It has a chapel of the Tuscan order, with a tower a Wesleyan chapel and several sandstone quarries. Pop. 7417.

RIPTON, two pars. Eng. Huntingdon — 1 (Abbot's) 2656 ac. Pop. 371. — 2 (King's), 1210 ac. Pop. 259.

RISANO a tn. Austria, Dalmatia, circle and 10 m. N. Cattaro, on a bay of the Adriatic enclosed by finely wooded hills. It has a church, a monastery, a castle seated on the summit of a rock overhanging the town, and a harbour, at which a considerable trade is carried on. Pop. 1000.

RISBOROUGH (Mons'), par. Eng. Bucks, 2220 ac. Pop. 1064.

ROCHETTA, a tu Naples, prov Principato Ultra 18 m N.E. San Angelo de Lombardi, on a hill with a handsome church and three chapels. Pop. 4000.

ROCHETTA DEL TAVARO, a vil and com Italy Piedmont, div Alessandria, prov Asti, near the bank Tanaro. It has two churches and two squares, two churches, two castles one of them in ruins and the other converted into a private mansion. Pop. 8028.

ROCHELLE LA-LOUËRE, a tu Italy Piedmont div and 22 m N.E. Genoa, in the centre of the valley of Barbera at the confluence of this stream and the Susola. It is entered by two gates, has a court of justice, and an old castle to which it owes its name a church and a palace. Pop. 1215.

ROCHELLA (La), a tu Naples, prov Calabria-Litra 11 m N.E. Gerace, on a height near the Tyrrhenian Sea with two churches. Pop. 8400.

ROCESTER, a vil and par England co Stafford, at the junction of the Churnet and Dove, and on the Uttoxeter canal 4 m N by E Uttoxeter; with an ancient church Baptist and Methodist chapels, a national school and a large factory built by Sir Richard Arkwright for a cotton mill but now used for doubling loco-tread. Area of par 2105 ac. Pop. 1180.

ROCH, par Wales, Penbryn 4003 ac. Pop. 763.

ROCH, (Roch) a vil and com France dep Haute Savoie div Tannguy near Salanches. It was formerly defended by several screens of which some still remain and has a trade in cattle and dairy produce. Pop. 1670.

ROCHDALE, a market to and par bor Englan, Lancashire, 10 m N.N.E. Manchester on both sides of the Roch, here crossed by five bridges on the Rochdale canal the Calder and Hebble navigation, and the Manchester and Leeds railway. It is irregularly built, and consists for the most part of narrow and inconvenient streets, but great improvements have recently been made. Several of the old streets, more especially the principal thoroughfares, have been widened out, and various modern streets present a handsome appearance. Almost all the streets are well paved and well lighted with gas, and an abundant supply of water is obtained from four reservoirs in the vicinity. Most of the houses are built of brick, but a few of the best are built of stone obtained from quarries in the vicinity the usual covering of the roofs is stone, not slate. The places of worship in connection with the Establishment, within the parish, are about 16, but of these only five are within the borough, and the only one particularly deserving of notice is the original parish church, finely situated on a lofty height, and approached from the lower part of the town by a flight of 123 steps, it is a spacious and venerable structure of the 13th century, partly in the late Norman and partly in the Perpendicular style with a square embattled tower, several windows of rich tracery, and some very ancient monuments. Of the numerous Dissenting chapels, the Wesleyan Methodist Association Methodists, Primitive Methodists, Huntingdon Methodists, Presbyterians, Friends, B. Catholics, and Unitarians, have one each, Baptists, and Independents, two each. The other more important buildings and establishments are the townhall, a large public hall used for concerts, grammar, national, British, infant, and other schools.

The staple manufactures are woollen goods, chiefly hats, shawls, blankets, kerseys and cotton goods, chiefly calicoes. There are also various cotton-mills, at which warps and yarn are spun. The only other manufactures of importance, are silk, which employ a large number of persons of both sexes; and iron which employ several families machine-shops, &c.

In the vicinity are extensive quarries for building and pavement, iron mines, and extensive collieries. The weekly markets, held in number, are well frequented, more especially the one on Monday for woollen goods and grain, and there are three annual fairs, besides a fair every fortnight for cattle. Rochdale is a place of considerable antiquity, and had a Roman station in the vicinity, but its history presents no event of interest. Its woollen manufacture appears to have been introduced by the Flemings in the reign of Edward III., and having continued to flourish, is mentioned as famous in the reign of Elizabeth. It was first constituted a borough by the Reform Act, and sends a member to the House of Commons. Pop. par bor, 29 135.

ROCHEL, par Irel. Leath 3305 ac. Pop. 1018.

ROCHEL, par Eng. Cornwall 6440 ac. Pop. 1386.

ROCHE (La), a tu France, dep Haute Savoie, div Fan cigny dist. and 5 m W 4 W Barmville, 1 bank Arve overlooking a fertile plain. It has several small squares, one of them planted with old lime-trees an ancient church with a lofty spire, two other churches, an hospital, and handsome townhouse manufactures of cotton stuffs, and silk hats, and a trade in cattle. Pop. 3140.

ROCHE-CHALAIN, a tu France dep Dordogne, 22 m W S.W. Périgueux with manufactures of leather and potash. Pop. 1065.

ROCHE-LES-LAUREN, a tu France, dep Côte-d'Or, 40 m. N. Dijon. Pop. 3499.

ROCHELOUAT (anc. *Rupes Cawarth*), a tu France, dep Vienne, on the site of a rocky acropolis, washed by the Isère, 30 m W Lanas. It has a court of first resort, a picturesque-estimated castle, partly in a dilapidated state, and manufactures of vinegar and glass brick and tile works and a trade in linen and thread. Pop. 1693.

ROCHEFORT, a vil and com. Belgium prov and 28 m S.S.E. Namur, on the Homme, among rocks, on the road from Namur to St. Hubert. It is an ancient place, and was the capital of the county of Ardenne. It consists of poorly built houses, and irregular and ill-paved streets; and has a church three chapels a courthouse, the ruins of an old castle quarries of marble lead-mine, and a trade in wood, bark, cattle, and wool. Pop. 1098.

ROCHEFORT on ROCHEREAU-SUB-MER (anc. *Rempfort*), a tu and port France, dep. Charente Inférieure on bank Charente, about 9 m. above its mouth, 20 m. S. Le Rochelle. It stands partly on a height, and partly on a low swampy flat, and is surrounded by ramparts which are planted and afford a fine shady promenade. The houses are somewhat low but are in general neatly built, and the streets, which are wide and well-paved are regularly formed, intersecting each other at right angles. The three principal streets are planted with a double row of Italian poplars and acacias and in the centre of the town is the place d'armes in the form of a regular square, adorned with a fine fountain, and lined on each side with a double row of elms. Rochefort owes much of its importance to its admirable position, which has made it the third among the naval arsenals of France. The river, at the quay is deep enough to float the largest vessels, being 20 ft. at low-tide, and 40 ft. at the highest spring-tide; at its mouth five forts protect the entrance, and outside is a spacious roadstead, protected by the islands of Rhé, Oléron, and Aix. The only edifice particularly deserving of notice is the Hospital-de-la-Marine, outside the town, on an eminence, approached through a fine avenue; it consists of seven isolated buildings, containing 1200 beds, distributed in large and lofty halls, and having attached an excellent anatomical theatre, museum, and botanical garden. The arsenals and dock yards are on a very extensive and magnificent scale, and the residence of the naval commandant is surrounded by a garden, which serves for a public promenade. A good many large vessels are built here and there are extensive vinegar-works and sugar-refineries. The trade is corn, colonial produce, salt, wine, brandy, &c. Rochefort possesses courts of first resort and commerce, a communal college, a second class

great number of respectable houses of stone, interspersed with several of brick or shingle. The objects of most interest are the cathedral, founded in 1804, now completed at various periods, and presenting a mixture of styles, among which the neoclassical elements of its W. front is very beautiful, while the spacious steps form an excellent specimen of the early English style; the interior of the choir, containing a quadrangular area nearly 100 ft. square, has considerable display of the great tower, which is in the form of a square, 70 ft. broad at the base, and 104 ft. high, and is considered one of the most perfect specimens of Norman military architecture now existing; the royal free grammar-school, forming part of the establishment of the cathedral, and several other endowed schools; the townhall, a handsome brick building with a Doric colonnade of decorated pillars; the dockhouse, a neat building erected on the site of the old guildhall; the theatre, assembly-rooms, &c. Besides the cathedral, there are two parish churches, both surmounted by square towers, and possessed of ancient stone fonts, and places of worship for the Wesleyans, Friends, Independents, and Unitarians. There are no manufactures of any consequence, except shipbuilding, which is carried on to some extent; and the trade, carried on mostly by small coasters, consists chiefly of coals and oysters; the former imported, and the latter obtained from a productive oyster-fishery belonging to the corporation. Many of the inhabitants are employed in the adjoining naval establishments. Besides two weekly markets, one well supplied with provisions, and the other for corn, there are monthly cattle-markets, and two important annual fairs. The borough is governed by a mayor, 5 aldermen, and 18 councillors, and has returned two members to Parliament since the reign of Edward I. Pop. 14,938.

ROCHESTER, a tn, U States, New York, on both sides of the Genesee, 7 m. above its mouth, in Lake Ontario, on the Erie canal, which here crosses the river by a splendid aqueduct, and on a trunk line, forming part of a chain of railways from Boston and New York to Buffalo. The town, on both sides of the river, though not very regular in its walls, is chiefly of brick or boulder stone, and contains many substantial and handsome houses, often rendered more attractive by gardens or shrubberies. The communication between the opposite banks is kept up by three bridges, one of these forms the continuation of Buffalo Street, which is both straight and spacious, and divides the town transversely into two parts by running nearly through its centre. The chief public buildings and institutions are 23 churches, some of them elegant structures, a courthouse and jail, a collegiate institute, a university founded in 1850 by the New York Baptists Union for ministerial education, with a theological seminary attached, a library and valuable cabinet of minerals, two female seminaries, an ethnology, mechanics' institute, and young men's association. The rise and progress of Rochester have been extremely rapid, even for an American town, and are owing partly to its central situation giving it the command of a most important transit trade, and still more to the immense water power furnished by the falls of the Genesee, which here makes an entire descent of 265 ft. by a series of rapids and cascades. One of these, called the Great Cataract, has a height of 95 ft. and from its advantages James Fitch took his last and fatal leap. The power furnished by the falls is supposed to equal that of 1230 steam-engines of 30 horse-power, and is chiefly employed in driving flour-mills, which are here on a scale of almost unparalleled magnitude. It is also used more partially in saw, paper oil, tanning, and cotton mills, and is more or less available in other manufacturing establishments, as woollen factories, tanneries, distilleries, breweries, &c. In 1812, two iron huts were the only buildings on the site now occupied by Rochester, and even in 1850 the population did not exceed 18,000. Pop. 1840, 20,191; 1850, 34,561.

ROCHESTERDOWN, a tn, par. Ensl.—J. Limerick; 1165 ac. Pop. 171. 183. Tisbury; 1063 ac. Pop. 367.

ROCHESTER (L.), a tn, France, dep. Savoy, about 16 m. S.E. Chablais, 1 bank Giron, picturesquely situated in a very mountainous district. It has a church, the remains of an ancient castle, manufactures of leather, iron-wares, supplied from extensive mines in the vicinity, and a trade in corn, wine, and wool. Pop. 1255.

ROCKFORD, a tn, Eng. Worcester, 1379 ac. P. 251

ROCKFORD, a market town, par. England, co. Shrop. The town, on the small river Rock, 15 m. S.E. Cheshire, has chapels for Independents and Wesleyans, a union workhouse, and several schools and almshouses. Rockford Hall is a part of the ancient mansion in which the unfortunate Queen Anne Boleyn formerly resided. Area of par., 1855 ac. Pop. 1704.

ROCKLITZ, a tn, Saxony circle and 30 m. S.E. Leipzig, 1 bank Mulde here crossed by a bridge. It consists of a high and low town, contains two churches and a castle, and has manufactures of woollen and cotton goods, castles, calicoes, carpets, earthenware, needles, and playing-cards, several bleachfields and spinning-mills. Pop. 4104.

ROCKLITZ (L. VON AND NUNEN) a vil Bohemia, circle and N. Bidschow at the confluence of the Elbtitzwasser with the Great Iser. It contains a handsome church and has manufactures of lawn and muslin, linen and cotton goods; two bleachfields, and two mills. A good deal of fax is both grown and spun in the district. Pop. 2067.

ROCIANA, a vil Spain, Andalusia, prov. and about 20 m. from Huelva, 1 bank Tinto, with a church, priory, primary school, and a trade in corn and wine. Pop. 1935.

ROCK par. Eng. Worcester 7754 ac. Pop. 1925.

ROCK, a river, U States, Wisconsin and Illinois, rises in Wisconsin, about lat. 44° to 50° N. Lake Michigan flows S. S. W., receives several tributaries, enters Illinois and falls into the Mississippi 3 m. below Rock Island lat. 41° 30' N. lon. 90° 40' W. At the lower part of its course it has several rapids, which lay the navigation at low-water.—Rock Island lies at the foot of Rock River rapids. It is 8½ m. long, 3½ m. broad, and its sides are of perpendicular rock, 30 ft. above the highest floods. Fort Armstrong is situated on its lower extremity.

ROCKBEAK, par. Eng. Devon 2575 ac. Pop. 477.

ROCKBOURNE par. Eng. Hants 5798 ac. P. 516.

ROCKLIFFE, par. Eng. Cumberland 6073 ac. P. 941.

ROCKEVIAUSPUN, a tn, Bavaria, Palatinat, 1 bank Alsenz 90 m. S.W. Mentz. It contains a Protestant and a R. Catholic church, and has a mineral spring, a trade in cattle, and three mills. Pop. 1733.

ROCKFIELD par. Eng. Monmouth 1995 ac. P. 393.

ROCKFORD a vil U States, Illinois, at the rapids of Rock River and on the Galena and Chicago Union railways, 170 m. N. by E. Springfield, with a courthouse jail, &c., and immense water-power derived from the rapids. It is visited by steam boats. Pop. 2093.

ROCKHAMPTON, par. Eng. Gloucester 1208 ac. Pop. 235.

ROCKINGHAM, a par. and small market in England, on and 20 m. N.E. Northampton, in the midst of Rockingham Forest, area, 890 ac. Pop. 261.

ROCKINGHAM BAY a spacious and beautiful harbour, N.E. coast, Australia; lat. 15 10' S.

ROCKLAND three par. Eng. Norfolk;—1, (All Saints and St. Andrew); 1671 ac. Pop. 490.—2, (St. Mary) 1560 ac. Pop. 484.—3, (St. Peter); 1010 ac. Pop. 447.

ROCKLAND a small seaport in U States, Maine, W. shore, Penobscot Bay, about 55 m. S.E. Augusta. It has an excellent harbour from which there is regular steam-boat communication with Boston and Bangor, and an extensive trade in lime, obtained from inexhaustible quarries in the vicinity and well known on the coast of the U States for its superior quality. The quantity annually shipped is estimated at about 100,000,000 casks. Pop. (township), 5692.

ROCKTON, a vil and township, U States, New York, 91 m. W. N. Albany beautifully situated among romantic scenery on both sides of the Mohawk, near the Erie canal, and on the Utica and Schenectady railways. It has five churches, an academy, a bank a woollen and other manufactures, flour, plaster, and glass mills. Pop. (township), 4255.

ROCKY, or Lower an m. S. Pacific, off N. coast, Papua; lat. 5° 20' S. lon. 147° 50' E. It presents an immense cone of from 2800 ft. to 4000 ft. in height, with a large hollow on its N. E. side, indicating the situation of an ancient water. It is covered with verdure, and has a belt of low land along its shore, which appears to be inhabited.

ROCKY MOUNTAINS, an extensive mountain district, N. America, which, forming a continuation of the great chain which stretches southward through Mexico, New Mexico,

and Utah, under the executive name of Sierra Madre, Minera, Grulla, and Verde, commencing with the termination of the last about 45° N., and continues, it is indicated, without interruption, till it reaches the Arctic Ocean, W. of the mouth of the Mackenzie river. Near its commencement, in lat. 45° 10' N., and lon. 110° 15' W., it presents a summit 15,500 ft. in height, to which the name of Fennoscandia Peak has been given; and though it suffers a very considerable depression in lat. 46° and 46° N. again attains a still higher elevation than before, more especially between lat. 48° and 50° N., where Mount Meeker has a height of 15,700 ft., and Mount Brown, a height of 15,900 ft. Between these, however, there is a depression called the Athabasca Portage, which has a height of only 7800 ft., and has long been used by the traders of the Hudson's Bay Company as the principal pass into the basin of the Columbia. Farther E., between lat. 49° and 50° N., there is a still more practicable pass at about 7000 ft. Both these passes, placed near the limit of perpetual snow and in the vicinity of peaks towering several thousand feet above them, exhibit scenery of the most magnificent description, and are in some respects among the most remarkable spots upon the surface of the globe. To the N. of 50° N., the slope begins to lower rapidly, and at 55° N. does not exceed 4000 ft. Ultimately the average height does not exceed 3000 ft. Beyond 55° N., the Rocky Mountain range ceases to have the character of a continuous chain, and consists rather of a series of isolated groups separated from each other by considerable depressions. The E. slope, which is at first very precipitous, terminates suddenly on the edge of a very extensive and elevated plateau the W. slope, instead of terminating in a plain forms a series of narrow longitudinal valleys, separated by ridges of comparatively moderate height, till at a considerable distance to the W. another mountain chain begins to rise, forming part of a range which stretches continuously along the coast from Cape St. Louis, at the S. extremity of the peninsula of Lower California, to Mount St. Elias, and has received the name of the N. American Sea or Maritime Alps, including the Sierra Nevada and coast range of Upper California, and the Cascade Mountains of Oregon, &c. This range contains numerous magnificent displays of volcanic agency, and has even several active volcanoes, but the Rocky Mountains furnish comparatively few specimens of volcanic products, and consist chiefly of metamorphic masses of granite, gneiss, and mica schist. They are also, in general, heavily provided with vegetation, but occasionally magnificent forests occur; and in several of the low elevated districts towards the S. extremity of the chain the mica schist and granite are covered with many species of *Artemisia*, especially *A. tridentata*, *serotina*, and *canadensis*. The waters of the Rocky Mountains belong to three basins. The most extensive is that of the N., which receives its supplies chiefly by the Mackenzie, which flows N. to the Arctic Ocean and by the Snokatchavan, and many other streams which flow E. to Hudson's Bay the second great basin is the Atlantic, which receives its supplies partly through the N. American lakes, and partly by the Mississippi; the third basin is the Pacific, to which the only important tributary from the Rocky Mountains is the Columbia. **ROODUR**, a vil. in com. Rodango, prov. and 3 in N.W. W. Lugo. It is famous for the battle fought in its place, in 1746, when the French, under Marshal Saxe defeated the allies, under Duke Charles of Lorraine. Pop. 560. **ROOGEL** (anc. *Rogon Regis*), a m. Prussia, dep. Ansbay, in a beautiful and extensive plain, surrounded on all sides by the forest of Ansbay. It is walled, flanked with bastions, and otherwise fortified; has a court of first resort, a commercial college, and agricultural society, and a hospital, at which convalescents and other patients are sent. It is chiefly remarkable for the great victory which the French, under *Condé*, gained in the neighborhood over the Spaniards. Pop. 1364. **ROGEE** (Novi), a market-t. Hungary on Gmünd, 11 m. from Bannau, on the Rhenus, here crossed by a bridge. It has a church, and trade in linen and drapery. Pop. 1808. **RODA**, a m. in S.W. Arabia, prov. Yemen, S. in N.W. Sana. It is kept clean and neat, being the residence of many of the merchants of Sana, who retire to their country-houses there after the business of the day is over. The gardens are very fine, and the vineyards beautiful. The town is well visited by several small streams.

RODA, a m. Germany, Saxony-Altenburg, in a sheltered wild country, among wooded mountains, 50 m. W.S.W. of Weimar; with three churches, a castle, and straggles in tall soil. Pop. 3287. **RODA (Zai)**, a m. Spain, Murcia, prov. and 34 m. N.W. Alicante; with 2 townships, a Franciscan monastery, now converted into a prison, several schools, as hospital for lodging the wandering poor, a public library, a church, and two hermitages. The hermits are kept in an old monastery. There are some vineyards; a considerable quantity of cotton is raised, and some sheep and wool are exported. In 1588, the king of Castile, Alonso, was here defeated by the Moors. Pop. 5379. **RODLACH**, a m. Saxony-Coburg, on a stream of same name, N.W. W. Coburg, with two churches, and schools, and a trade in cattle. Pop. 1571. **RODOLPHEN** or *ROTHALDEN*, a vil. Bavaria, Palatinate, near Pirmentz with a church, glass-works, and a mill. Pop. 1609. **RODANSTOWN**, par. first March 1871 m. Pop. 583. **RODORNE-CHARENTAIS**, par. Eng. Wille 2736 m. P. 600. **RODOBROUGH**, a vil. and par. England, co. Gloucester, 1 m. W.S.W. Stroud, on the river of that name. It has a parish church, an Independent chapel, an endowed school, and six mills, at which woollen cloth is manufactured. Area of par. 1210 m. Pop. 2208. **RODDY**, a m. Denmark, S. shore, isl. Lolland, on a bay of the shallow Rødder Fjord. The bay is accordingly named up that there is no harbor or quay in the vicinity of the town, but a summer-harbor, of the 6th class, admitting vessels drawing 7 ft., is situated in the Kromme-Gab, at the mouth of the fjord, and about 5 m. from the town, and enables it to carry on some trade. Pop. 1800. **RODDEN** par. Eng. Somerset 990 m. Pop. 308. **RODDENAU**, a vil. Hesse-Cassel, Oberhessen, circle and near Frankenburg, on the Eder, with a church, and three mills. Pop. 603. **RODDINO** a vil. and com. Italy Piedmont, div. Coni, prov. Alba, on a steep hill with a church, and an elementary school. Pop. 1106. **RODELHEIM**, a market to Hesse Darmstadt, Oberhessen, on the Rhine, 11 m. N. Frankfurt. It has two churches, and a castle; with fine gardens, and several breweries, distilleries, and tobacco-factories in the environs are elegant villas, belonging to citizens of Frankfurt. Pop. 1688. **RODELSEN**, a vil. Bavaria, Lower Franconia, dist. Marktheim, near Roddinghausen with a church, a media, many features of potato, and a trade in excellent wine. Pop. 602. **RODEN**, *ROENKEL*, or *ROOR* a vil. Holland, prov. Drenthe, 12 m. N.W. Assen with a Calvinistic church, a school, and two annual fair-markets. Pop. (agricultural), 543. **RODEN**, a vil. Rhineland Prussia, and 30 m. S. Treves, near r. bank Saar with a R. Catholic church, important manufactures of ordinary and white leather, and four mills. Pop. 1609. **RODENBERG**, a m. Hesse-Cassel, Niederhessen, 17 m. W. S. W. Hanover; with a church, castle, and school; and manufactures of vinegar, tobacco, and leather. Pop. 1128. **RODENGU** a vil. and com. Italy Lombardy, gov. Milan, prov. Brescia, dist. and 5 m. N.E. Capriata, with a mill but very ancient church, said to have been founded by Charlemagne in 774. Pop. 1129. **RODENBERG** (Gross and Klein), a vil. Prussia, prov. Saxony, gov. Magdeburg, circle Wittenberg; with a church. Pop. 1007. **RODEWALD**, a vil. Hesse, prov. Kassel, 25 m. N. W. Hanover; with a church. Pop. 1403. **RODGE**, or *ROUSSET* (anc. *Rodgus*), a m. France, dep. Aveyron, 80 m. N.W. Montpellier, 8 m. south to the west and south of a hill, at the foot of which the Aveyron flows; and, from its lofty position, has a striking appearance from whatever quarter it is approached. But the streets are steep, narrow, winding, and dirty; and the houses are mean, being constructed for the most part of wood, with projecting fronts, which extend both right and left, and give the whole town a gloomy, uninviting look. The principal edifices are the cathedral, a magnificent structure in the French style built of stone, with a remarkable and lofty tower, which rises far above the cathedral above the apothecary's palace, the prefecture, in the

centre of the town, the college, originally belonging to the Jesuits; the public library, of 15,000 volumes; the townhouse, beautiful, and also treasury of the Cordeliers. It has manufactures of serge, serge moching, woollen covers, wax and tallow candles, playing-cards, and leather worsted-mills and dye-works; and a trade, in addition to the above articles of manufacture, in cloths, muffs, and cattle. Roden is the see of a bishop, the seat of a court of first resort and commerce, and possesses a chamber of manufactures, college, diocesan university, astronomical cabinet, cabinet of natural history, and philosophy and deaf and dumb institute. Pop. (1852), 7906.

RODESIUM, two places, Harz-Darmstadt, Oberhausen —1, (see *der Beker*), A vil. circle and near Glessem with a church. Pop. 337.—2, (see *der Beker*) A circle, Friedberg with a Protestant church. Pop. 1980.

RODI, a tn. and com. Naples, prov. Capitanata, 21 m. N. E. San Severo, on the Adriatic, at the foot of Mount Gargano; with a collegiate church, and a Capuchin monastery. Pop. 2469.

RODIRZMO, a vil. Spain, prov. and N. W. Leon, near the Bierzo; with a church, manufactures of linen, and a trade in corn, wax, and cattle. Pop. 1845.

RODIGA, a vil. Italy, Venetia, prov. and 9 m. N. W. Manica with two churches, several chapels, and a mill. Pop. 1500.

RODINO, a market in Bavaria, Upper Palatinate, 1. bank Rega, 23 m. N. E. Regensburg with two churches, and a townhouse on a plain-work, and several breweries. There is a paper-factory in the river, and amber is found in the neighborhood. Pop. 1190.

RODING a river, England, on Essex rises near Dunmow; flows towards S. W. between Epping and Haverhill Forests, and falls into the Thames, a little below Barking. It is navigable to Ilford total course, about 40 m.

RODINGTON, par Eng. Selop 1615 ac. Pop. 494.

RODMARTON, par Eng. Gloucester 4010 ac. 1 416

RODMELL, par Eng. Sussex 1934 ac. Pop. 825

RODMERHAM, par Eng. Kent 1391 ac. P. 538.

RODRIA, a vil. Al. Austria, the Banat.

RODNEY (Bourne) par Eng. Somerset, 2345 ac. P. 516.

RODONY or **RODONY** **RODONY** a vil. Hungary, Thidher Dumba, co. Eisenburg, on the Finkabach, 24 m. from Götz, with a Protestant church. Pop. 1178.

RODONY or **RODONY** (see *Roody*) a tn. Turkey in Europe, Roumelie, smalik Gallipoli, N. shore, Sea of Marmara, 77 m. W. Constantinople. It is surrounded by castellated walls, flanked with towers; is well built, containing many handsome streets, and has large caravanserais, public baths and an important trade in corn, wine, and other commodities. The caravans are covered with vineyards, which produce an excellent wine. Pop. estimated at 40,000.

RODRIGUE, or **RODRIGUE**, an id. Indian Ocean, E. N. E. Mauritius, lat. 19° 50' S., lon. 68° 50' E. It is, exclusive of its coral-reefs, about 13 m. long, E. to W. and 3 m. to 6 m. broad. Its appearance is striking. A central peak of granite rises from the midst of a group of hills, divided from each other by valleys, running N. and S. The island is composed of granite, with beds of overlying sandstone and limestone. The island appears generally to be dry a soil, generally calcareous, with a few loam on the surface, and is very fertile. Springs of excellent water abound in the interior, but on the coast there are only rivulets, which frequently fall in summer. The banana, plantain, cantaloupe, strawberry, and raspberry, sugar-cane, cotton plant, several kinds of pine, papaya, cabbage, and cocoanuts are found wild. Yams and castors, which form the bulk of the food of the inhabitants, are native to the soil. Tamarind and acacia trees, the latter growing to a considerable size, and bearing quantities of gum, are plentiful; and there are a few mango-trees and breadfruit. Cattle and sheep, large species, goats, hogs, and horses are found, and wild cats, rats, and mice, exist all over the island. Guinea-fowl in large flocks abound everywhere. A great variety of sea-birds inhabit the cliffs. Frogs, lizards, and other game have been introduced, and succeed. The natives are intensely black and sly, and are extremely lazy. Pop. estimated at 350.

ROER, a river of Rhineland, Prussia and Holland. It rises in the Hunsrück Mountains, 30 m. S. E. A. A. in the Rhine flows N. by St. Aust. Duren at Jülich, and thence N. W. into Dutch

Limburg and joins the Meuse at Moersmond; total course, about 90 m.

ROLEMOND (Latin, *Munda-Rava*, French, *Rochemond*), a tn. Dutch Limburg, 23 m. N. by E. Maastricht, on the Meuse, at the confluence of the Roer. It was formerly fortified, and had seven gates and many towers of the last ones remains still exist, but the walls have been replaced by promenade. The town is nearly surrounded by canals. It has several streets, and is connected by an elegant bridge across the Roer with the suburb of St. Jans. It has large and elegant churches, in a building erected in 1653, as the bishop's palace, a large, spacious townhall, the Munsterkerk, a Byzantine structure, and one of the most beautiful buildings in the kingdom the Munster abbey, now serving partly as a church, and partly as a prison and a cavalry barracks, the parish church in the market-place, a large, beautiful edifice, a Reformed church, a convent of the Sisters of Mary, an hospital, a royal college, a large assembly, and several schools. The manufactures consist of cloths, silks, cottons, and cotton-yarn, flamed paper, shot, pipes, wax, candles, and salt and there are print and bleachworks, dye-works, tanneries, and oil, bark, tanning, and grain mills. Pop. (1850) 7173.

ROSEKILDE (Latin, *Rogaster*) a tn. and seaport, Denmark, lat. Seeland on a shallow branch of the Cattegat, called the Roskilde Fjord, 18 m. W. Copenhagen, with which it is connected by railway. It contains a palace, erected for the meetings of the Provincial States, two churches, one of them, the cathedral, among the oldest and finest of the large churches of Denmark; a cathedral school and a convent for noble ladies. The harbour is a winter-haven of the fourth class and admits to its quay, near St. Jurgensberg, vessels drawing 9 ft. water. Its mineral springs have long been famous. Roskilde is said to have been founded by the pagan king Ros, at the end of the 5th century, king Harald established his residence in it in 980, and it soon became one of the largest and most important towns in Denmark. In 1044, Canute the Holy founded the cathedral, whose ruins still remain, and extended over 28 churches. It was afterwards five times ravaged by the plague and eight times devastated by fire. This circumstance, added to the removal of the court to Copenhagen, and the introduction of the Reformation, gradually brought the town to its present comparatively humble position. Pop. (1851), 3805.

ROSLUX a tn. Belgium, prov. Hainaut, 8 m. N. E. Mons, houses mostly well built. It has a church, chapel townhall, prison, hospital, almshouse, musical society several public schools, and in the vicinity a superb chateau, surrounded by an extensive park, belonging to the Prince de Croy-Solre, inhabitants chiefly employed in agriculture, and the working of coal-mines. There are three flour-mills, two breweries, two salt-works, and a tannery. Pop. 3654.

ROFRANO a tn. Naples, prov. Principato-Ultra, 11 m. E. Di Vallo, on a lofty hill with four churches. Pop. 3650.

ROGART par Scot. Sutherland 63,800 ac. Pop. 1515

ROGAREN, or **ROGAREN** a tn. Prussia, gov. and 22 m. N. by E. Posen on a lake which communicates with the Walla. It consists of the old and new town and of a suburb has several courts and offices, a Protestant, and two R. Catholic churches, and a synagogue; manufactures of woollen cloth, and a trade in cattle. A large proportion of the inhabitants are Jews. Pop. 4755.

ROGATE par Eng. Sussex, 4878 ac. Pop. 1117

ROGATSCHEW a tn. Russia, gov. and 66 m. S. S. W. Moulvay at the confluence of the Dnieper with the Dniester. It was once surrounded by walls which have been converted into walks and contains a Greek united and a R. Catholic church and a castle. Pop. (1851) 2095.

ROBERTON, a hamlet, England, co. Monmouth, 2½ m. W. S. W. Newport. Pop. 1240.

ROGRIETT par Eng. Monmouth, 2905 ac. Pop. 60

ROGLIANO, a tn. Naples, prov. Calabria-Citra, 6 m. S. Cosenza. It is divided into the three districts of Rogliano, Retti, and Spendi, and has a number of handsome buildings, among others, six churches, and a Capuchin and a Dominican convent. Pop. 2859.

ROGONAUTFOOR, a tn. Mindocoon, present and prov. Bengat, dist. of Jambala, 155 m. N. W. Calcutta; lat. 22° 35' N., lon. 96° 44' E.

ROMA, an Isl. Indian Archipelago, Flores Sea, about 20 m. N. E. Timor; lat. 7° 42' S., lon. 137° 26' E. (a). It is about 17 m. long, by as many broad, and of considerable height; with several small islands contiguous. The islands, for its number, rather heavy, catch turtle, and carry on trade, agriculture, and cattle-rearing.

ROMAGNANO, a tn. Italy Piedmont, div and 16 m. N. W. Novara, beautifully situated on the side of a hill above l. bank Sesia. It is well built, and has two large squares, one of which is an obelisk surmounted by a cross. It is the seat of a court of justice, and has two churches. Pop. 2619.

ROMAGNESE, a vil. and com. Italy Piedmont, div Geneva, prov and 12 m. N. W. Bobbio; with a church, and an old strong castle. Pop. 1823.

ROMALD-KUNN, a vil. and par England, co. York, 6 m. N. W. Barnard Castle. The village, built round a verdant green, has a neat and pleasing appearance; and the parish church, built in the form of a cross, and surrounded by a large ramparted tower, contains some curious monuments. Area of par., 53,776 ac. Pop. 3569.

ROMAN, a tn. Turkey in Europe, Moldavia, beautifully situated at the entrance of the Danube, with the Bosph. 40 m. W. B. W. Jassi. It still possesses some remains of Roman walls is well built, and is the seat of a Greek bishop. The district is one of the most picturesque and best-peopled in Moldavia.

ROMAN-DE-LA-YEZA (Sax.) a vil. Spain, prov Leon, dist. Astorga, is a plain on the Tago, with a church, a primary school, and a trade in agricultural produce. Pop. 1719.

ROMANCHE, a river, France, issues from the glaciers in the N. of the Hautes-Alpes, arround Briançon, enters the Isère, flows directly to the sea, then W. and joins a bank Dean, N. W. of Wallis, by a course of 50 m., part of which is used for navigation. Its current is very rapid, and much obstructed by rocks and small islands.

ROMANENGO a vil and com Italy Lombardy, gov Milan, prov and 21 m. N. W. Cremona, in a fertile district with a church, an old castle, and a trade in corn, flax, and silk. Pop. 1552.

ROMANO, — I A in Italy, Lombardy, prov and 12 m. S. E. E. Bergamo, near the Serio. It is an academy place, still surrounded by a wall and broad, and entered by three gates, but the ramparts have been partly levelled and converted into a public walk, and partly cultivated as gardens. It is well built, having well-formed, handsome streets, some of them lined with arcades, and has a large and elegant modern church, surrounded by two steeples two other churches of the 16th century, a Capuchin convent, an ancient castle, which the Venetian governors used to occupy, a large hospital, and rich charitable endowment, tanneries, tins and lute kilns, a saw, and several silk mills. Pop. 4199 — 2 A vil and com. Piedmont, div Turin, prov and 5 m. S. E. W. Ivrea, near a bank Chiusella, here crossed by a bridge, where the French and Austrians had some severe fighting in 1800, to the advantage of the former. It was once defended by a strong castle, of which only a tower, now used as a belfry, remains, and has a large and massive church, of recent erection several minor churches, a townhouse public school, and charitable endowment. Pop. 2304 — 3, (See *Romano del Gargano*), A vil and com. duchy Modena, on a hill at the foot of Mount Verrucchio, near a bank Secchia, with a handsome and richly-decorated church of modern construction. Pop. 1457.

ROMANO-KAY, or **CAYO-ROMANO**, an Isl. W. Indies, off N. coast, Cuba, in the Old Beluma Channel. It stretches N. W. to S. E. for about 48 m., and though generally spoken of as only a single island, truly forms two, separated from each other by a channel ½ m. wide. The E. end has some heights, whilst, towards the centre, form a kind of saddle; the W. end consists of low, wet, unimproved land. Near Romano are a number of keys—the Paraden, Condena, and Verde, &c. Between the two last there is tolerable anchorage.

ROMANO (Sax.), a vil. and par. Saxony, comp. Pommern, co. Rugen, near a bank Alt, about 1 m. from San Sebastian; with a church, and the remains of an old castle. Pop. 1170.

ROMANOW, a tn. Russia, gov and 23 m. E. W. Jaroslavl, l. bank Volga, opposite to Borzoglek. It is surrounded

by ramparts and ditches, has seven churches, one of them a cathedral, courthouse, and other public buildings, many churches of linen and silk, tanneries, and a considerable trade, particularly in corn. Pop. (1842), 4605.

ROMANA (anc. *Almonia*, *Almonia*), a tn. France, dep. Drôme, picturesquely situated, r. bank Isère, here crossed by a handsome bridge, which communicates with the town of Pange on the opposite bank, 10 m. N. E. Valence. It is enclosed by a fosse and walls flanked with towers, and is entered by five gates but has no edifice deserving of notice, except the church of St. Bernard, and the theatre, situated in the centre of a good promenade, called the Champ-de-Mars. The manufactures consist of silk, hosiery, woollen cloth, and serge, and there are also tanneries, a silk-mill and lime-kilns. The trade is in wool, hemp, linen, silk, wine, olive-oil, and skins. Romans is the seat of a court of commerce, and possesses a chamber of manufactures, and a diocesan seminary. Pop. 7228.

ROMANSHORN a vil and par Switzerland, can Thurgau, on a tongue of land on the S. W. side of the lake and 11 m. S. E. the town of Constance. It is well built, and contains a church and two schools. On a height above it stands an old castle, still in good preservation, and supposed to occupy the site of an old Roman light-house. There is a small harbour on the lake, which has a good deal of trade, and an active fishery is carried on. Pop. 1381.

ROMANSEIGH par Eng Devon, 2491 ac. P. 246. **ROMANOFF** several isls. Pacific, particularly — 1, (or *Odoko*), A group in the Marshall Archipelago, of an irregular oval form, extending about 38 m. from S. W. to N. E., with a breadth of about 10 m. It is encircled by a reef, on which are distributed 56 islands, of small dimensions. *Odoko*, the largest, lat. 9° 28' 30" N., lon. 170° 16' 12" E., is only 2 m. long, but has a good anchoring place. The inhabitants are inoffensive and friendly — 2, (*Idoko*, or *Mogono*) an Isl. Low Archipelago, lat. 14° 57' 20" S., lon. 144° 26' W. It is about 5 m. long, ½ N. E. to S. E. W., and not more than 10 m. in circuit, and though evidently of coral formation, has no lagoon.

ROMÃO (Sax.), a tn and par Portugal, prov Beira-Baixa, about 45 m. N. E. Coimbra. Pop. 1605.

ROMBLON, an Isl. Indian Archipelago, Philippines, and forming a dependency of prov Capi, in Luzon. It is situated among the Tablan in the W. and Sibuyan on the S. E. is about 12 m. long, ½ to ½, by 6 m. wide, and contains a neat village, with a small fort, a church, and a harbour, which admits only small vessels. Pop. 5052.

ROMK, a vil and township U States, New York, 91 m. W. N. W. Albany with which it is connected by railway and on the Mohawk River, and Erie canal. It has six churches, a courthouse and jail, bank, female seminary, U States arsenal, cotton factory blast-furnace, a brewery, and flour and saw mills. Pop. township (1856) 7918.

ROME (Latin, *Roma*) the cap. city of the Papal States, the most celebrated of ancient, and in some respects, the most remarkable of modern cities, on both sides of the Tiber, though chiefly on the l. bank about 15 m. from its mouth lat. 41° 54' N.; lon. 12° 28' E. The river, in coming from the l., makes two very remarkable bends of nearly equal dimensions, forming a figure closely resembling that of the letter S. The upper bend, which of course has its convexity towards the E., follows a large alluvial flat little raised above the level of the stream, and well known by the ancient name of the Campus Martius. Within this flat, and on a declivity which stretches irregularly along the E. side, and rises with some abruptness from it, the far greater part of modern Rome is situated. The only other portions of any extent are situated on the opposite side of the river, consisting chiefly of a suburb called Trastevere [beyond the Tiber], extending over the upper part of the lower bend along the W., and thence N. W. in a narrow belt along the right bank; and of the Borgo, commencing a little beyond the N. convexity, and forming a most important part of the city, since it is terminated on the E. close to the river, by the castle of St. Angelo and on the W. by the vast and magnificent pile of St. Peter's. Of the seven hills of ancient Rome, all of these situated on the left bank of the Tiber, only three of them properly lie within the limits of the modern city. They form part of the declivity or ridge already mentioned,

as bounding the Campus Martius. Their names are the Quirinal, the Viminal, and the Esquiline. The first occupies the W. edge of the valley, nearly opposite to the center of the Campus Martius; the second is immediately to the E. of it, and the third to the S.W. where it projects forward as if to meet the river while wishing it to form its second large bend. The other four hills are the Esquiline, the most E. of

rather more than 8 in. a maximum breadth of 300 ft. and a maximum of not more than 400 ft. and a deep and rapid current rolling along a considerable volume of water deeply tinged with yellow mud. The quays which in several other cities similarly situated, constitute their greatest ornaments and furnish their finest promenades, are here altogether wanting; many parts of the banks are even unprovided with

all and $\frac{1}{2}$ E. of the Viminal the C.elian also contains the E. bar $\frac{1}{2}$ of the Esquiline, the Aventine which is the most S. of all and almost at the river and the Palatine which has an intermediate position. Forming a kind of central nucleus between the Capitoline on the N.W., the C.elian on the E., and the Aventine on the S.W. These four hills and the spaces with in and around them covering a large extent of ground to the N. and E. of the present city, have no human habitations except a few solitary convents and villas no longer inhabited and are occupied for the most part by gardens and vineyards. In ancient times however they stood in the very heart of the city and hence are still the sites of some of its noblest ruins.

A use of the hills have much elevation, and most of them are approached by easy ascents. The Esquiline which is the E. finest, has a height of 214 ft. and can only be considered as an elevated flat. The Palatine 170 ft., appears originally to have had precipitous sides but they have either been levelled down or are turned up by rubbish. The Capitoline though the lowest of all only from 150 ft. to 160 ft. is from its abrupt face and well marked outline the most conspicuous. The right bank of the Tiber has also its alluvial flat bounded by hills especially the Janiculum immediately to the W. and the Vatican considerably to the N.W. All these hills on both banks and a considerable additional space, though only partially built upon, may be said with truth to be included in the city space they are all used and by its existing walls. These, built of brick with occasional patches of stone work and crested with numerous towers have an average height of about 9 ft. are pierced by 16 gates, of which four are closed up, and form a very irregular polygon with a perimeter of nearly 15 m. Of these, 12 m. are on the E. or left and of course only 3 m. on the right bank. The walls on the left bank are ancient, and following the same line as that traced by Aurelian A. D. 271 much in many parts be identical with the original structure, though comparatively little of it can now be traced. The walls on the right bank are much more recent and form two separate inclosures, a transverse wall immediately N. of the Borgo separating it from the suburb of Trastevere, and connecting it, with its needs of St. Angelo into a kind of isolated citadel.

The river here at the points where the walls on its left bank commence and terminate, has a length including windings, of

THE ENVIRONS OF ROME

rather more than 8 in. a maximum breadth of 300 ft. and a maximum of not more than 400 ft. and a deep and rapid current rolling along a considerable volume of water deeply tinged with yellow mud. The quays which in several other cities similarly situated, constitute their greatest ornaments and furnish their finest promenades, are here altogether wanting; many parts of the banks are even unprovided with protecting walls, and hence, as the flats along the banks are low and the level of the water above the sea is only from 35 ft. to 40 ft., whenever, from any cause, as a continuance of strong W. breezes, the current is retarded inundation to a greater or less extent inevitably ensues. In ancient Rome the communication between the opposite banks was maintained by eight bridges. Vestiges of all of them can still be traced but only four are now entire and in use. The most N. and consequently highest up the stream, is the ancient *l. uis. Etilia*, now called *Ponte San Angelo*, because directly opposite to the castle. It is a noble structure, composed of three large central and small side arches, and though extensively repaired in 1688, and then disfigured by statues devoid of merit is still substantially as the ancient Romans left it. At a considerable distance below is the ancient *l. uis. Traiana*, now *Ponte S. Stefano*, because rebuilt by the fourth Pope of that name, in 1474. It has four arches. The other two bridges are about $\frac{1}{2}$ m. lower down where the stream is divided into two channels by the island San Bartolomeo, anciently *Insula Tiberina*. The bridge from the left bank to the island

called the *Ponte di Quattro Capi* from a four-headed Janus which stood near it as the ancient *Pons Fabricius*, and retains a good deal of its original structure, it consists of two large arches, with a smaller one between them for a large excess of water in case of floods. The other bridge, properly only a continuation of the one just described is the ancient *Pons Cestius* or *Gratiatus* and now bears the name of the island which it connects with the right bank it has a large central arch and two smaller side ones. The open space, twelve in number as already mentioned, are only disarming of a passing notice. The finest, the *Porta Maggiore* situated near the E.E. corner of the walls and leading by one of the three streets which meet in front of it to *Franco* consists of a noble arch of travertine; the *Porta San Sebastiano*, the most S. of all consists of two fine semicircular brick towers, resting on foundations of solid marble the *Porta San Giovanni* occupying an intermediate position between the two already mentioned, possesses less architectural merit, but forms a much more important thoroughfare than either because the high road to Naples by the *Camine Maritimo* passes out of it the *Porta San Paolo*, on the S.W., is considered the most picturesque of all the modern gates. Retreating again to E. side, we have to the N. of *Porta Maggiore*, in turn the *Porta San Lorenzo*, formed of two ancient towers, on the N.E. the *Porta N. o. rebuilt in 1504* on the site of the ancient *Porta Nomentana*, from the designs of Michael Angelo, and on the N. at a short distance from the left bank of the river one of the finest of all the gates, and by far the most frequented, the *Porto del Popolo*, built by Vigorini in 1561 from Michael Angelo's designs, and consisting of four Doric columns, with statues of St. Peter and St. Paul, by Michel, in the intervals between them. This gate leading out to Florence, is that by which most visitors from the N. usually enter the city and is perhaps the best point from which to commence, either in describing it, or forming a practical acquaintance with it. It may be proper however before proceeding to a particular description of the interior to premise that the whole space within the walls is divided into 14 *rioni*, or districts. Of these only two *Trastevere*, and the *Borgo*, or *Città Leonina*, as it is sometimes called are on the right bank of the Tiber. The twelve on the left bank are arranged not according to the space which they cover, but the density of the population

they contain, and probably also according to certain local peculiarities. Hence, the extensive tracts on the E. and S., because nearly without inhabitants, are wholly included in three districts while none are allotted to the more limited, but more densely-peopled portions of the city situated to the N. and W. of the Capitol.

When Rome is entered from the N. by the Porta del Popolo, it is seen at first from the most advantageous point of view, and produces a more favorable impression than a closer inspection is found to justify. Immediately within the gate is the spacious though irregular Piazza del Popolo, with a fine Egyptian obelisk in its centre, and two handsome churches in front, standing so far apart from each other and from the adjoining buildings, as to leave room for the divergence of three principal streets one in the centre, between the churches, proceeding almost due S. While the other two start off on either side, to the S.E. on the left hand and the S.W. on the right. The central street is called the Corso, from the horse-races which take place in it during the Carnival. This street, the finest of which Rome can boast, is about 50 ft. wide, and stretches for a mile in a direct line, to its termination in the Piazza di Venezia, near the V. front of the Capitol. It is lined with splendid palaces, and at all times, but more especially on holidays when its centre is thronged with carriages and its side pavement with pedestrians presents at once a very animated and a very imposing appearance. The diverging street on the left, above referred to, is the Via Balbano. It proceeds first directly to the Piazza di Spagna, and thence to the Quirinal. It is of tolerable width and considerable length and contains a large number of handsome edifices. The whole of the city to the E. of this street, and in the triangular space included between it and the Corso being situated on the high ground above the Campus Martius, is well aired and healthy and is usually selected for residence by English visitors. The number of private palaces and elegant mansions which it contains also justifies its claim to be regarded as the aristocratic quarter. The other diverging street, on the right of the Piazza del Popolo, is the Via Ripetta. It proceeds nearly directly to the Tiber, and in parts almost close to the river and though neither so elevated in its site, nor so aristocratic in its appearance as the Corso and Via Balbano is decidedly handsome. Several other streets intersecting those already noticed, more especially the Strada di Porta L., stretching W. for nearly a mile from the gate of that name, and another, following nearly the same direction under the successive names of Via Sistina, Via Felice, and Via delle Quattro Fontane are both well built, and of importance as great leading thoroughfares, but, after due allowance is made for these, it must still be admitted that Rome taken as a whole, is not well built. The streets are generally narrow and ill paved with small stones of lava not one of them except the Corso has side pavement, and though they are generally well drained by a system of sewers founded chiefly on the ancient plan many of them are extremely dirty. This is particularly the case in the *rione* [district] San Eustachio, in the heart of the Campus Martius and filled with streets of shops and manufactures in the *rione* Ponte, making the angle formed by the bend of the Tiber below San Angelo, and in the *rione* San Angelo in Pescheria in the vicinity of the Capitol, and opposite to the Island of Tiber Island. Chiefly in this *rione*, but partly also in that of Regola adjoining, is a very dirty quarter, called Trionfo, surrounded by walls, and entered by two gates, which are looked at night by the police. It is allotted to the Jews, and contains their synagogues, schools, and public schools.

Rome cannot boast of many squares of much merit, though not a few of these are remarkable for the obelisks and fountains which they contain. The Piazza del Popolo, with the fine obelisk in its centre has been already noticed. The latter of red granite, broken into three pieces and covered with hieroglyphics, came from before the Temple of the Sun at Heliopolis, in Egypt. Its entire height, including base and ornaments, is about 116 ft. The Piazza Navona, occupying the site of the ancient Circus Agonalis, and still retaining its shape is about 230 yards in diameter and is sometimes used for chariot-races. It is adorned with three fountains, one at each extremity and the third in the centre. The last consists of an immense circular basin 18 ft. in diameter and an ancient obelisk of red granite, based on a central mass of rock to

which four figures, representing four river gods but utterly destitute of merit, are chained. The Piazza di Spagna takes its name from a fountain within it, which has the form of a boat but possesses little merit. A more remarkable ornament of this piazza is a magnificent staircase of travertine, leading to the church of Trinità de Monti conspicuously seated on an eminence above it. The Piazza del Pantheon, so called from an ancient mutilated fragment which now bears the name of Pantheon's statue, has less merit than fountains, being the spot where the Romans excluded of all means of expressing their opinions through the press, have long been accustomed to give utterance in those by means of placards. These, though often coarse are seldom deficient in wit or keen nature, and have hitherto acquired so much celebrity that the term *pasquade* has become European. Larger spaces for amusement or exercise have been formed only in a few spots. One of the finest, but least frequented, is the garden of the Vail on situated on the right bank, on the hill and adjoining the celebrated palace of the name at the N.W. extremity of the city. A much more frequented spot is a public garden at the opposite extremity occupying the high ground E. of the Piazza del Popolo and commanding extensive villas. In the same locality but at a short distance without the walls the gardens of the Villa Borghese, forming a finely planted and richly-decorated park of 8 m. in circuit though private property having been thrown open by the liberality of the proprietor, forms the true public park of Rome, and is the favorite resort of all classes, often exhibiting, a very gay and animated scene.

The most remarkable edifices divide themselves into two classes the ancient and the modern. In several respects the former might claim precedence, but as most of them are only remains not in actual use, it accords more with the nature of a *Concise* to begin with the latter.

Ecclesiastical Edifices.—Of these, the churches alone exceed 700. Many are, of course very insignificant but after deducting these, there remain far more than can be noticed within the limits of this article, with the fulminant in which their magnificent or historically important are very soon to require. Selecting only those which it is impossible to omit, we naturally turn at once to St. Peter's. This Basilica, which has justly been pronounced by far the most magnificent which has yet reared its head in Christendom stands on the r. bank of the Tiber, near the W. extremity of the Borgo, on one of the worst sites which could possibly have been chosen, a hollow space between the Janiculum and the Vatican, and so concealed by them and a ridge behind which connects them, that the church on three of its sides, up to the height of the nave actually concealed and is not seen to advantage from any commanding point either within or without the walls. It is approached through a piazza, the buildings along which are admirably concealed by a superb colonnade, forming two semicircular porticoes, and consisting of 284 columns, with an entablature on which 129 statues of saints each 11 ft. in height, stand sentinel. The main body of the building consists of a Greek cross, with a dome of gigantic dimensions, rising from its centre, and borne up by four colossal piers. On this dome in particular Michael Angelus displayed the wonders of his genius, and produced a work which impresses the beholder with a feeling of the sublime akin to that with which the grander scenes of nature are beheld. The figure is not the work of the same great mind but of an artist whom Forsyth engraver as a wretched plagiarist from Carle is not in harmony with the other parts of the structure. Though too low, and otherwise defective it is made to come forward so prominently as to conceal the dome which accordingly cannot be seen from any part of the piazza in its full proportions. This defect, however is fully overcome when the interior is entered and a scene of solemn grand, rich and harmonious almost beyond conception bursts upon the view. The extreme length within the walls are 601 ft. in the central body, and 445 ft. in the transept the height from the pavement to the cross is 428 ft. Owing to these immense proportions objects within the area lose somewhat of their effect by contrast, and appear comparatively diminished. Thus the Baldacchino, a splendid bronze canopy over the high altar, and immediately under the dome, though 120 ft. high, appears not more than 30 ft. and the chair of St. Peter, behind the altar seems scarcely to rise from the pavement, though 70 ft. above it.

The same effect is perhaps still more strikingly manifested in regard to the magnificent mosaic paintings on the interior of the great dome, which, seen from below, are so much diminished that the pen in the hand of the painter in one of the 17 compartments, seen from below, seems to be less than 1/2 inches in length, though in reality 6 ft. To those who know St. Paul at London, an idea of the vastness of St. Peter's may be given by mentioning that the floor of the former has an area of only 2 acres, and that of the latter of 5 acres. The cost of erection is still more disproportioned. That of St. Paul's was not more than £750,000, that of St. Peter's, including its monuments and embellishments, is estimated at from 17 to 18 millions. Here, however, other considerations enter and place St. Peter's in a less favorable light. The immense sums lavished upon it were in too many instances the hard-won savings of the industrious poor snatched away from them by the ebullience of indulgence, a ebullience so reckless and palpable as at last to have roused the general indignation of the better part of the Christian world and thus made the completion of this wonderful temple not merely a precursor but a main cause of the glorious Reformation. Among the other remarkable churches of Rome though they all suffer by the overshadowing of St. Peter's, are St. John Lateran on an isolated spot near the wall of the city. Owing to the numerous restorations and repairs, changes to which the original structure has been subjected, it is only here and there that it is preserved. It is a large, composed of four large columns and six pilasters, surmounting a massive entablature and balustrade on which are colossal statues of our Saviour and ten saints, is considered a fine specimen of the architecture of the last century while its Cosim chapel on which elaborate ornaments and gilding columns of precious marbles, bas-reliefs, and even gems have been lavished with the greatest profusion is without a parallel. This church, which furnishes one of what are considered the great sights of Rome in the benediction of the people by the pope on Ascension-day from one of its balconies is remarkable as the spot where five councils, which bear its name have been held. Santa Maria Maggiore, which ranks third among the basilicas is supposed to occupy the site of a temple of Juno Lavinia, and to have derived from it the three Ionic pillars of white marble which support its central nave. Its interior, adorned with the six pillars and enriched with tasteful and costly decorations is one of the most of its class in existence. But its exterior though provided with two octastyle porticoes of Ionic order. In front of it is a most beautiful Corinthian column of white marble 44 ft. high, exclusive of the base and capital. It formed part of the splendid basilica of Constantine but is believed to belong to a much earlier and better period of art. A bronze statue of the Virgin on its top has given it the name of the Columna della Vergine. Santa Croce in Gerusalemme, the fourth of the Roman basilicas, takes its name from its supposed possession of a portion of the true cross and a quantity of earth which was brought from Jerusalem and mixed with its foundation. It is richer in relics than in architectural merit but possesses some fine mosaics of Egyptian, Syrian, and is not without historical interest as the church in which the pope used annually to consecrate the celebrated Golden Rose and by the presentation of which to the great emperor of Saxony it was once vainly hoped to entice him away from the cause of the Reformation. Among the parish churches a very few are specified. Santa Agnese, and its stand on the spot where St. Agnes was publicly exposed, after being put to the torture, and presenting one of the purest and most elegant specimens of the Greek cross. St. Agnese, with an elegant but simple front of travertine taken from the Colosseum the earliest chapel that was constructed in Rome, and a celebrated fresco by Raphael, representing Isaiah and two angels. St. Andrea della Fratte, rendered conspicuous by its fantastic cupola and temple, and remarkable for its curious view on Good Friday when among other profane mummeries an ode is made by what is called the *Tre Ore* to imitate the hours of our Saviour's agony on the cross. St. Andrea della Valle, remarkable for its columned facade, with statues by Domenico Guidi, Ercole Ferrata, and Vascello its beautiful cupola, and its fine paintings, including frescoes of the four Evangelists and of the Flagellation, and Liberation of St. Andrew by Domenichino. St. Antonio Abate, supposed to occupy the site of a temple of Diana, and

famous for the singular spectacle which it exhibits on the Feast of St. Anthony when droves of animals of all kinds, including the mules of the peasantry, and the horses of the pope and cardinals, assemble at the church door to receive a benediction and be sprinkled with holy water, as a preventive against disease during the ensuing year. San Carlo a church of great antiquity, and supposed to occupy the site of a temple of Jupiter but claiming notice on the somewhat singular ground of being internally and externally the ugliest of all the Roman churches. St. Bartolomeo, built on the island of that name in the Tiber on the site of the celebrated temple of Aesculapius, and containing 24 granite columns supposed to have belonged to it. St. Bernardo, a remarkable circular building originally one of the halls or temples which fronted the outer wall of Diocletian's baths, surmounted by a dome of striking appearance and richly ornamented within with statues. San Donato in the Trastevere, and to be the burial-place of Rhetri. San Giovanni, with a magnificent sarcophagus of alabaster 17 ft. in circumference. Caputene or Sta Maria della Concezione celebrated for its pictures of the Archangel Michael by Guido the Conversion of St. Paul one of the best works of Pietro da Cortona and the Ecstasy of St. Francis, by Michelangelo. San Carlo al Corso, with one of the best cupolas in the city four frescoes of the Cardinal Virtues, by the Roman school, a fresco by Guido, and a Last Supper of Andrea, considered the masterpiece of Pinturicchio. San Clemente, on the Esquiline, said to have been founded on the ruins of Clement, St. Paul's fellow labourer by Constantine and containing a number of interesting frescoes by Masaccio. Sta Costanza a circular building outside the Porta Pia built by Constantine with a baptistery and adorned with a peristyle of 14 coupled granite columns supporting a dome. Sta Francesca Romana with some curious mosaics, and several fine tombs, among others that of St. Francesco, covered with rich marble and bronze. San Francesco a Roma with a Dead Christ by Annibale Caracci. San Giuseppe in Velabro, remarkable as the only church in Rome dedicated to England's tutelary saint. Gesù the church of the Jesuits with a facade and cupola, by Giacomo della Porta, and an interior enriched with the rarest marbles, and several fine paintings decorated in the most gorgeous style, and containing the monument of Cardinal Bellarmine the celebrated R. Catholic controversialist. San Ignazio, the church of the Jesuit college richer even than Gesù in elaborate decorations, though often not in the best taste. San Gregorio on the Caelian, so called after Gregory the Great, on the site of whose family mansion it is built, and containing 16 columns of Egyptian granite from some ancient building and some celebrated frescoes by Guido and Domenichino. San Marcello in the Corso, a very ancient church dating from the fourth century and celebrated for the fine paintings of Perino del Vaga. San Marco, with a nave and two aisles, separated by 20 columns of jasper. Sta Maria degli Angeli originally the Pantheon, or great hall of Diocletian's baths converted into a church by Michael Angelo, and one of the most imposing which Rome possesses, containing 8 antique columns of Oriental granite, with attached bases of white marble, a fine fresco by Domenichino and the tomb of Saviour Rosa. Sta Maria de' Cosmedin, said to have been built originally in the third century, on the site of the temple of Læra and Proserpine consisting of a nave, divided from two side aisles by 12 ancient marble columns, and remarkable for the fine Alexandrine pavement. Sta Maria di Loreto, covered by a double dome, and enriched with a statue by Fiammingo considered one of the greatest productions of modern art, and an altar-piece, by Perugino. Sta Maria sopra Minerva, so called from occupying the site of a temple of that goddess, remarkable as the only Gothic church in Rome, and celebrated for its full length statue of our Saviour by Michael Angelo. Sta Maria de' Monti-Santa, and Sta Maria de' Miracoli, the two churches already referred to as separating the Corso from the Via Babuino and Via Ripetta, and better known from their position fronting the main entrance of the city from the R., than any architectural merit which they possess; Sta Maria de' Miracoli, with a small marble ship in front of it, originally one of the oldest Roman churches but entirely renewed from the designs of Raphael, entered by a portico of Michael Angelo, and remarkable within for 16 fine columns of granite, and two of porphyry, and the frieze of the nave painted in chiaro-scuro by Giulio Romano, and Perino del Vaga. Sta

Maria-della-Pace, consisting of a nave, crowned by a fine octagonal dome, and celebrated for its plain style, particularly the four Sibyls, considered among the most perfect works of Raphael but unfortunately injured by recent restoration. Sta. Maria-del-Popolo an ancient church modernized on the plans of Bramante, interesting from the number of its fine sculptures and paintings, and remarkable for its stained glass, the only specimen which it possesses. Sta. Maria-in-Restoration, said to be the first church in Rome, publicly set apart for worship, consisting of a nave and two aisles separated by 21 granite columns, evidently from ancient edifices, and admired by some of the finest fresco of the city an assumption by Donatello. Sta. Maria-in-Vallcelia, sometimes called Chiesa Nuova, one of the largest and most imposing of the Roman churches and enriched by marble and other ornaments chiefly by Pietro da Cortona and some of the earliest productions of Rubens. Sta. Maria-della-Vittoria with fine paintings by Domenichino, Guercino, and (Gent) and a so-called miraculous picture of the Virgin, whose intercession is said to have obtained many victories over the Turks, flags taken from which at the siege of Vienna are suspended from the roof. San Martino al Monti, with a very chaste and imposing interior consisting of a nave separated from two aisles by 24 ancient Corinthian pillars, of different varieties of marble some fine paintings by Gaspar and Nicolas Poussin and a crypt which formed part of the baths of Trajan. SS. Niccolò e Nicolini remarkable chiefly for its two canopies or marble pilasters its ancient mosaic and the episcopal chair of Gregory the Great. San Onofrio enriched with some fine paintings by Donatello and a scene by Raphael, a rather interesting as the burial place of Jesus. San Paolo-all'Esterno contains on a spot outside the walls alleged to be that where St. Paul was beheaded, though the accuracy of the tradition is rendered more than doubtful by the absurd fictions associated with it respecting those three figures which indignantly spring up while the head in falch, is said to have three bounded. San Pietro-in-Memoriam, finely situated on a platform, from which perhaps the best view of modern Rome is obtained and near the spot where St. Peter is said to have been beheaded and celebrated for the fine paintings of Sebastiano del Conito, by Michael Angelo, a sixteenth-century convent immediately adjoining is a school of study by Bramante, consisting of a circular building, sustained by 16 granite Doric columns and universally admired as a model in its kind, and one of the most elegant of its modern structures. San Pietro-in-Vincoli a majestic edifice, supplied within by 20 ancient Ionic columns of Greek marble 7 ft. in circumference, and celebrated for its statue of Moses, one of the greatest creations of Michael Angelo and fine paintings by Domenichino and Guercino. San Trinità entered by an ancient vestibule, resting on two granite columns, supported within by 16 Corinthian granite columns possessed of a remarkable pulpit, sustained by a double flight of steps, composed of the largest blocks of rosso antico in existence and numbering among its relics a column of Oriental Jasper brought from Jerusalem and gravely alleged to be the very column at which our Saviour was scourged and a portrait of Him once in the possession of St. Peter. Sta. Trinità in-Aventina occupying the supposed site of the temple of Jove Regina, supported within by 24 Corinthian fluted columns of white Greek marble, and enriched with some small but exquisite paintings by Basso Verato. San Stefano Rotondo a large and ancient structure, in the form of a circle, at its base impluvium, supported within by 56 pillars of granite and marble, arranged in an inner and outer circle, and having its walls covered over with hideous frescoes of martyrdoms equally disgusting to the eye and defective as works of art. San Trinità-degli-Inglese in the Trastevere said to have been founded in 775 by the king of the East Saxons now dedicated to Thomas à Becket, one of whose arms is exhibited as a relic, and containing various portraits of Roman Catholics who were put to death during the reign of Henry VIII. and Elizabeth. Trinità-de-Pallagren with some remarkable paintings, especially a celebrated attempt to represent the Trinity by Guido—and the Trinità-de-Monti already referred to as occupying a conspicuous site above the Piazza di Spagna, approached by a magnificent staircase, and celebrated for its descent from the Orna, in which Donatello da Verro, with the assistance of Michael Angelo has exhibited all his other works.

Vol. II

Palazzo, Muscum, &c.—The Vatican situated on the hill of same name, in the N. W. part of the city, immediately N. of and at one point connected with St. Peter's, is an immense irregular pile constructed at different periods, without any previously formed plan and hence devoid of harmony. It was probably commenced as early as the time of Constantine, and had become a palace of some consequence in the 3d century when it was occupied by Charlemagne at his coronation but the popes began to reside in it for the first time after their return from Avignon, in 1277. One monument was the vicinity of the Castle of St. Angelo, with which it communicates by a covered gallery. From this time the popes varied with each other in extending and embellishing the Vatican, though the task of roughing out the old palace nearly in its present form, was reserved for the work of all the infamous Alexander VI. The historic chapel of Innocent, the museum the library and the new palace, which now constitutes the most conspicuous portion of the whole pile, and its ordinary papal residence, are all of later origin. The whole is very an immense space and is rather a collection of separate buildings than a single structure. Owing to this its exact dimensions are not easily measured, but the length is estimated at 1131 ft. and the breadth at 767 ft. To give some idea of its vastness we are told that it has 8 grand staircases, 200 smaller staircases, 30 courts, and 44½ apartments. The most celebrated portions are the Scala Regia, leading to the Sala Regia, or hall of audience, a splendid apartment, covered with frescoes, illustrating various events in papal history and appropriately enough given a conspicuous place to the Massacre of St. Bartholomew, the Capella Sixtina or Sixtine chapel a lofty oblong, apsidemic, about 160 ft. long and 50 ft. broad, covered with frescoes by Michael Angelo a nave which the Last Judgment 10 ft. by 60 ft. is most conspicuous, and celebrated as the spot where two cardinals meet in conclave to elect a pope, and many of the most gorgeous specimens of the Roman church are performed the Apella Sixtina remarkable chiefly for Michael Angelo's two frescoes of the Conversion of St. Paul and Martyrdom of St. Peter the latter a splendid picture of three stories completed from the design of Bramante by Raphael whose magnificent fresco constitutes its greatest ornament, the statues of Raphael or four chambers all owned by the Loggia, and equally admired by the same master hand, the Sala Regia of Raphael worked from his cartoons and kept in a gallery adjoining the Sala Regia, a picture-gallery containing a collection which, though small in extent not more than 60 pictures is unsurpassed in real value the museum, consisting of a series of galleries, in which the rich treasures of art which the world possesses have been amassed including many others the Latin and Greek MSS. the library supported by many collections in the number of its volumes, but by none in the value of some, and the pre-arranged value of more of its MSS. for as yet no systematically few of its treasures have been properly examined the manufacture of mosaic, a large establishment immediately adjoining the palace and once occupied by the Inquisition and its garden in which as an interesting place of resort, whereas has already been mentioned. Another palace or rather series of palaces crowns the summit of the Capitol and it bears the name of the Piazza del Campidoglio. It is a piece of land from the Corso by a flight of steps at the foot of which two Egyptian obelisks and at the summit two colossal statues of Castor and Pollux standing beside their horses are conspicuous. In the centre of the piazza is a bronze equestrian statue of Marcus Aurelius, the horse of which is so full of life that Michael Angelo on seeing it is said to have said it comes. In the Arch and the square are the senatorial palace, in which the Senate holds its court ornamented by Michael Angelo with a Corinthian colonnade, and crowned by a lofty tower beneath which the whole city seems to be exposed in detail, the palace of the Conservators containing the library or collection of books, the museum of the Capitol with many interesting objects but few masterpieces of sculpture except those in the hall of the Dying Gladiator and a picture-gallery more extensive than that of the Vatican, though the paintings individually are of far less intrinsic merit. The private palaces, both by their number and magnificence constitute one of the peculiar features of the city and contain some of its finest collections, but cannot here be detailed.

most celebrated temples are those of *Faustina*, on the island of the Tiber of which only a few remains are visible, among the buildings of the coevals of *San Marcolomae* of *Antoninus* and *Faustina* situated in the Forum and now incorporated with the church of *San Lorenzo* in *Miranda* of *Antoninus* *Pius*, now represented chiefly by eleven marble columns of its portico forming part of the present *Vignola* di *Torra*, or custom house of *Corso* and *Trasverina*, already mentioned as the site and part of the structure of the church of *S. Maria* in *Coemeterio* of *Concord* only recently brought to light, on the side of the *Capitoline*, and still in regard particularly to a portion of its flank tolerably preserved of *Fortuna* *Virilis*, near the *Fonte* *Boato* now occupied as the *Armenian* church and presenting one of the purest specimens of the 1st in Rome of *Jupiter* *Capitolinus*, once the most magnificent of all the pride and wonder of ancient Rome, as it looked proudly down from the summit of the *Capitol* but now only dubiously traced in part of its foundations of *Mimara* *Medica*, still forming a *pietra* *regia* ruin on the *Acqueduct* near the *Porta* *Maggiore* of *1st* *Mimara* still a beautiful ruin, consisting chiefly of two *Corinthian* columns, supporting a magnificent entablature and continued frieze with an *atlas* above, containing a full length figure of the goddess of *Batoni* on the side of the *Capitoline* above the Forum and forming one of its picturesque ruins

and above all of the *Lantheon* situated in a small dry piazza, between the *Corso* and the *Piazza* *Navona*, but at once one of the most magnificent and best preserved monuments of ancient Roman architecture. Its excellent preservation is undoubtedly owing to its early conversion into a Christian church under the name of *S. Maria* *Rotonda* it is entered by a noble portico 110 ft. long, by 40 ft. deep, on opposed of 16 *Corinthian* columns of *Thracian* granite, with capitals and bases of *Creek* marble and consists in its interior of a rotunda, 145 ft. in diameter crowned by a dome, the height of which is also 145 ft. The dome is embellished the work of *elias* in *tint* of *bronze*, hung on bronze *plasters* and the pavement is of *porphyry* *mosaics* and *galle* *subito* arranged in round and square *shells*. The body of the building is of brick and lime in its interior surface is even larger niches, 12 of which have dated *galle* *subito* columns the external surface was once coated with marble, but *vandalism* in which *1st* *Urban* *VIII* bore a principal part, has deprived the building of this and many other ornaments. The most interesting object within is *Raphael's* tomb. To other antiquities most deserving of notice are *arvian* *pillars* *baths* *aqueduct* and *amphitheatre*. One specimen of each will suffice. The first is the arch of *Constantine* built on which is called the *Vin* *Triumphal*, and one of the most elaborate and imposing monuments of the city though in several parts indicative of the decline of art. The noble pillar is the column of *Trajan* 125 ft. high composed of 34 pieces of white marble, covered over with matchless sculptures, giving the history of *Trajan's* achievements and containing, among others no fewer than 200 human figures. For the colossal statue of *Trajan* holding a *golden* *globe* which originally crowned the pillar, one of its *Feet* has been substituted. If not the most extensive at least the most perfect of the *baths* are those of *Caracalla*, situated under the E. slope of the *Aventine*, and occupying an area of at least 1 m. in circuit. Their ornaments have all disappeared, but nature has done something to supply them and few sights are more impressive than their mountainous ruins, and *dwarf* *arches* encircled by *flowery* *glades* and thickets of *odoriferous* *blooming* *trees*. The *aqueduct* are justly regarded as the most stupendous of the *Roman* works, but most of them though originally brought within the walls have their most magnificent remains considerably beyond them. That of the *Aqua* *Julia*, which pursued a course of 40 m., has a line of *arches* 5 m. long which stretches across the *Campagna* and is still used for bringing

in water into the city. The *amphitheatre* *furnish*, in the *Coliseum* the grandest of all the *Roman* ruins. It is situated in the interval between the *Palatine*, *Quirinal* and *Esquiline* hills, and covers with its slopes an area of above 5 a.c., it is built principally of *travertine*, intermixed with large masses of brick and tuff. The external elevation consisted of four stories, three of them composed of tiers of *arches*, and the

THE COLISEUM AT ROME.—From Cooke's Views in Italy

seats extending backwards and upwards in regular rows from the arena, were capable of accommodating, at least 87 000 spectators. The arena was 287 ft. long by 180 ft. wide and furnished the attraction which drew together this immense assemblage composed of all classes of society noble and plebeian male and female. It gives a dreadful idea of the times to think that the main part of the sport consisted in the mutual butchery of trained gladiators, and in the exposure of heathen criminals and Christian martyrs to be torn to pieces by wild beasts.

History The history of Rome is properly speaking, identified with that of the *Roman* empire, which it did not even be excluded in a dry recital of events within moderate limits. In a more restricted sense however the city itself may be regarded as having an individual history consisting chiefly of an account of its first foundation and of the various augmentations and embellishments which it received during the successive stages by which it rose to be not only the mistress of the world considered as the capital of a kind of universal empire but to be also for centuries the grandest, the richest, and the most populous of European cities. To this latter portion of Rome's individual history the present brief sketch is confined. Though much that historians have so graciously related and their readers implicitly believed in regard to the origin of the city is more than to be questioned that it was founded by *Romulus*, 753 years B.C. (124 was the *Palatine* hill and its houses consisting of humble huts, were enclosed by a rude wall probably like the hill itself, of a quadrangular form and pierced by three or four gates. Like all ancient Italian cities Rome appears to have had a clear unoccupied space both within and without the walls, and known by the name of *postranea*. *Taurus*, guided apparently by some ancient record, has in the twelfth book of his *Annals*, minutely traced its contour. Writers are at variance as to the gradual extension of the city but the prevailing opinion is, that on the union of the *Sabines*, a great addition was made including the *Capitoline* and part of the *Quirinal* hills with the intervening space afterwards chiefly occupied by the Forum. That on the destruction of *Alba Longa* its inhabitants came and fixed their residence on the *Capitol* that the *Aventine* was taken in by *Annius* *Marcius*, and the *Viminal* *Regurine*, and remainder of the *Quirinal* by *Tarquinius* *Priscus* and *Severus* *Julius*. New walls enclosing the whole city as it then existed, were begun by the former sovereign, and completed by the latter about 570 B.C. These walls embraced a circuit of about 5 m. and continued for 800 years to form

the observed time of the entry through it cannot be doubted that also in the other and populous suburbs were found in various parts of the vicinities. The number of gates in the Serevian walls probably varied at different times but according to Iliny amounted during the XVIII century to 37. But, while the limits of the city remained the same size changes were made on its appearance and gorgeous palaces and temples and other magnificent structures rose up in every quarter. The walls of Aurelian having resolved to be left to make the empty common time with the areas actually or virtually occupied by most of the houses, the walls of the city were built in the XVIII century. The walls are understood to have been mostly in the 17th century, those now existing built by the emperors Maximian and Constantine. The most important houses and public wealth, the survey of the forum by Iliny, 181, 180.

The quality of life at home at different periods is an interesting question but from want of data cannot be satisfactorily answered. There have been extravagant enough claims for the three millions or the day in. Our bill is a more probable and certainly not an unreal estimate of 180,000,000.

TONCZ is a village in Helianz prov. Hammut on the Ilmon in a mar by district - m. S. Turinav. It has a Protestant and a R. Cath. Church, two schools, an oil and the manufactures of tobacco and of tiles for roofing, and pavement, a brewery, a flour mill and a trade in agricultural implements. Pop. 1,170.

ROSENA, a town and seaport, Denmark, capital of Bornholm. It is defended by batteries. It has a good harbor, several big long-wards in which a good number of war vessels are built. A harbour with 11½ ft water and a considerable trade. The greater part of the inhabitants are seafarers or fishers. It was the residence of the governor of the island and the seat of its principal courts and offices. It was in 1798 a town which was built by Christian V. and bears the name of Fredrik. But it was used merely as a name because the name of the town was not changed.

10348180. A. a. Saxe-Altenburg 14 m. S.W. Albu-
ture. It is a place of some strength & walled and defend-
ed by two rivers. It contains a castle, church and bathing estab-
lishment, as it has manufactures of flannel and weaving two
textile works and several mills. 1 p. 1860.
